county court this week Mrs. Susan Wilson obtained a verdict of \$300, against Gilbert & Gehr, hardware dealers of Westminster. The facts in the case were as follows; On the evening of October 29th., 1895, Mrs. Wilson was walking on Liberty street to her home, when she fell over a bar of iron which had been placed there by one of Gilbert & Gehr's clerks. The piece of iron had only been on the pavement a minute or two, as the clerk had only gone into the store to get a chisel with which to cut the iron. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The Same... Old Sarsaparilla.

That's Ayer's. The same old sarsaparilla as it was made and sold by Dr. J. C. Ayer 50 years ago. In the laboratory it i different. There modern appliances lend speed to skill and experience. But the sarsaparilla is the same old sarsaparilla that made the record-50 years of cures. Why don't we better it? Well, we're much in the condition of the Bishop and the raspberry: "Doubtless," he said, "God might have made a better berry. But doubtless, also, He never did." Why don't we better the sarsaparilla? We can't. We are using the same old plant that cured the Indians and the Spaniards. It has not been bettered. And since we make sarsaparilla compound out of sarsaparilla plant, we see no way of improvement. Of course, if we were making some secret chemical compound we might.... But we're not. We're making the same old sarsaparilla to cure the same old diseases. You can tell it's the same old sarsaparilla because it works the same old cures. It's the sovereign blood purifier, and-it's Ayers.

The Little Boy Who Ran Away. "I'm going now to run away,"
Said little Sammy Green one day.
"Then I can do just what I choose.
I'll never have to black my shoes
Or wash my face or comb my hair.
I'll find a place, I know, somewhere
And never have again to fill
That old chip basket—so I will.

"Goodby, mamma!" he said. "Goodby!"
He thought his mother then would cry.
She only said, "You going, dear?"
And didn't shed a single tear.
"There, now," said Sammy Green, "I know
She does not care if I do go.
But Bridget does. She'll have to fill
That old chip basket, so she will," But Bridget only said; "Well, boy, But Bridget only said; "Well, boy, You're off for sure. I wish you joy." And Sammy's little sister Kate, Who swung upon the garden gate, Said anxiously as he passed through, "Tonight whatever will you do When you can't get no 'lasses spread At supper time on top of bread?"

One block from home and Sammy Gree Weak little heart was full of fear. He thought about Red Riding Hood, The wolf that met her in the wood, The beanstalk boy who kept so mum When he heard the giant's "Fee, fo, fum," Of the dark night and the policeman. Then poor Sammy homeward ran.

In the spring I sent my daughter to Pratt institute, in Brooklyn, to take sible outlay. a course in laundry work. I have now replaced the flannels, and they are washed each week by our new expert. Flannels and embroideries are the two things that the average or even the exceptionally good washerwoman does not do well, and as not to do well means in 33 East Main St. their case to ruin beyond redemption I consider it a valuable thing to have one member of the family who understands the method."-- New York Times.

Sixty Thousand Seeds to the Plant. The common purslane is one of the wonders of botany, as far as seeds are concerned at least. A single seed of this plant will produce about 20 seed pods in a season. The average number of seeds in each of these, by actual count, der the surface. The lycopodium gives sippi and General Lilly, both of whom is 6,000, making 60,000 in all. As far as we have been able to learn there is vision with which "Majah" Mason no instance of similar fruitfulness in any plant found growing in this country. A single plant of either the Jamestown weed ("jimson"), the butter weed, the rag weed and some of the vervines produce an enormous number year as the purslane does.—St. Louis
