A writer in the Journal des Debats complains of the process of degradation which is going on in the French language. The peasantry, for instance frequently speak of the ass, a humble partner in their daily toll, as "the minister," and other words of dignified import are applied to equally humble. if not actually base, use

The same tendency, however, appears, to be showing itself in Germany, where the title "monarch" passes current in modern slang as a designation for tramps and footpads. The other day a noncommissioned officer in charge of barracks at Danzig addressed this term to a troublesome private just as a captain happened to be passing. The latter at once reported the incident, and the barrack master was brought before the magistrates on a charge of leze majesty.
