A Lecture on Snakes.

Westminster papers, are to be sys tematically and regularly cut off from participation in the benefits derived the head denote a harmless, or non-time days, while a pint same period of time maxillaries and moveable bones in the head denote a harmless, or non-time days, while a pint same period of time days. money for advertising purposes. A further illustration of this unfair system, was discovered by us, a few years ago, when a blank form used by the Orphan's Court came into our posses sion, stating, in printed terms "pro mation of the head and jaws above starving people. Children wandering viding said notice be inserted three consecutive weeks in some newspaper published in Westminster"—or words to that effect—notwithstanding that the law provides for publication of the head and jaws above referred to, and the digestion of the food and breaking of the shells is assisted by a series of teeth back of the throat and well down towards the stomach. If the snake attempted to eat the egg in its mouth it would looke the most of it but, by swallow one lightly skeletons. The land swarms with multituding one lightly skeletons. loose the most of it, but by swallowing it first and eating it afterwards all the contents of the shell are saved.

ous living skeletons. I have grown accustomed to the sight of stomachs hollowed out like basins. There is

wenomous reptile the treatment is to tie a ligature tightly back of the wound to prevent the poison entering the circulation, and opening the wound to allow the poison to escape. For this purpose the incision should by either of the other two papers referred to.

Some may think our frequent harping on this subject simply a case of "sour grapes"—a purely selfish end aimed at. Is it, really? We are agitating it, without doubt, and expect to keep it up, but do we not represent wenomous reptile the treatment is to tie a ligature tightly back of the wound to prevent the poison entering the circulation, and opening the wound to allow the poison to escape. For this purpose the incision should be as deep as the wound. The greatest number of snake bites are received in the extremities and for this reason it is comparatively easy to accomplish the treatment. Where, however, the bite is received in a larger part of the body, and one less accessition that the combined the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to prevent the poison entering the circulation, and opening the wound to allow the poison to escape. For this purpose the incision should be as deep as the wound. The greatest enterior the constraint of the same than the poison entering the circulation, and opening the wound to allow the poison to escape. For this purpose the incision should be as deep as the wound. The greatest enterior the poison to escape. For this purpose the incision should be as deep as the wound. The greatest enterior to prevent the poison escape. For this purpose th to keep it up, but do we not represent more than our interests? Do not the stockholders of the Record and the owners and subscribers of every other paper in the county outside of West.

McKinley not to Campaign.

The partisan press of the country 1900 in Canton will not be a duplicate in any circle. There was an alertness has so far been surprisingly sparing of the campaign of 1896. It is not the of eye, a mobility of mouth, a smoothof its advice to our government as to present intention of President Mc-, ness of feature, an absence of the how to proceed in the present crisis Kinley to make speeches to delegal lines that denote care and mental in China. suffer at the hands of the Turks, and something about the horrible massacre which occurred there only a few years ago. He said some of it was too bad to tell, but it was all terrible. Surely it ought not to be allowed The Armenians are a progressive and industrious people, while the Turks are too lazy to do scarcely any work at all, and will steal all they can from the Armenians, who being in the minority, find it simply impossible to get any redress or common justice in the courts. So they have trouble all the time, and fear another outbreak at any time.

He as a food product are interesting. Candling eggs is an important feature of the storage season. It is a simple process of holding an egg to the light in a dark room for the purpose of determining its quality. Handlers, who store eggs, have learned by experience the necessity for eliminating all except the largest, cleanest and freshest eggs from cases which are to be carried in storage for several months. Charles A. Moler, head candler at Armour's, has from ten to thirty men working under his direction throughout the season.

It is a simple for the light in a dark room for the purpose of determining its quality. cent) without specifying its form.

One of the chief advantages of pure paris green as an insecticide is its slight solubility in water and the consequent possibility of using it in considerable quantities without injuring the foliage of plants. When, however, deficiency in arsenic content is made good with a soluble form of arsenic, the value of the substance as an insecticide is greatly reduced. There is considerable difference of opinion as to the extent of such adulteration. Of 24 samples of paris green examined during 1899 by the New York state station only one or two showed evidence of admixture of white arsenic. This station states that "the color of Paris green is changed to such an extent by addition of white arsenic or other similar materials that one can usually detect an adulterated article by its appearance. Paris green of good quality is intensely bright green and uniform. When adulterated, the green loses something of its intensity and is grayish green and is not always uniform."-E. V. Wilcox of Office of Experiment Stations.

THE HARDY MICROBES.

Exposure to Liquid Air For Twenty Hours Fails to Kill Them.

The researches of Professor Dewar on liquid air are familiar to all who

cies of microbes can survive being packed in ice, and even higher organsms flourish in the arctic circle. Indeed, the extremes of temperature for low forms of life are widely separated, and so it becomes a matter of very practical public interest, as I shall show, to determine where the limits of ritality in this respect are to be found. The very low temperature of liquid air offered a supreme chance to see how microbes comported themselves under exposure thereto, and so our investigators seized on the opportunity presented them.

Exposed for 20 hours in the liquid air temperature, no injury was apparentiy sustained by the microbes. But in the recent experiments such germs as those of typhoid fever, diphtheria, anthrax, cholera and other ailments, along with nondisease producing species, were submitted to the liquid air test for seven days. In addition to the excessively low temperature, I must The Revolt Against Glitter-A Swing add, the microbes in this experiment were subjected to a tremendous mechanical strain.

Then came the question of the effects f both conditions on the vitality of the germs. These results may be summed up in the word nil. Under the microope they showed no signs of mechanical injury or distortion, and they were as lively-if that term may be applied to denote a condition of vitality-as they were previous to their chilling rooms are fairly strewn nowadays. and cooling experiences.

may be made free from it consists in The defendant proceeded along this either grubbing out or cutting down the affected trees and burning them root and branch. In some instances case in reply, Peter Bennett won. growers have mistaken yellow foliage for the yellows, but it must be re membered, however, that a perfectly green tree may have the yellows in its first stages, while a yellow tree may be made yellow because of some other disease, by starvation or the ac-

from the yellows, and if every grower continues to do his duty, the time is not far distant when the number of they want annexation, even suppostrees affected in this way may be reduced to a minimum. An orchard is not safe as long as it contains a single yellows tree. This is the best season to detect the disease in its early stages since the premature fruit is now making its appearance. All such trees should be distinctly marked so that they can be destroyed at an early date providing time does not admit of their immediate removal.

"As soon as the premature fruit is bargain." removed the tree often shows no further sign of yellows until the following season, and in the meantime A curious historical parallel in conthe disease is spreading if the tree is allowed to remain. Hence no time should be lost to destroy every affected tree as soon as the disease expresses.

The Appetite of a Goat Is envied by all whose Stomach and Liver are out of order. But such should know that Dr. King's New became darkened. The incident was great energy. Only 25c at R. S. Mc peace.—Beltimore News. Kinney's Drug Store.

Chinese make the Finest Soldiers.

"I'm not in favor of breaking up China," remarked a New Orleans college professor the other evening. IN THE STORM.

My child, your hero may not be, In truth, a hero all the time; Remember, it must chance that he Shall still have rugged steeps to climb.

Don't place him on too high a plane
In fancy; then he will not fall
In your esteem and may attain
To something noble after all.

My boy, don't think your sweetheart bears A halo on her golden hair;
A crown of purity she wears,
And you must help to keep it there.
But she will have her trying moods
And be not always kind and sweet;

These are life's nerving interludes-Sad pitfalls for unwary feet. You both are far from perfect yet,

And quarrels will, unhaply, come; Both may be wrong; so don't forget, In anger's blind delirium, That sweet concessions each must make And tender promises renew Or else a loving heart may break
And sorrow come to dwell with you.

—Pearson's Weekly.
