From the Japanese.

Everybody in Kosatsu called him O Baka. That is to say the "Honorable Great Fool."

At last E-mura, the old priest at Manroa, or Hall of Ten Thousand Lamps, took O Baka to help him keep the lamps lighted, which, as every one knows, must never go out.

Then O Baka said to himself, "I cannot lend you E-mura's umbrella. Before he went away he told me if you asked for his umbrella I should give it to you, for we would never get it back."

When E-mura came back O Baka told him with pride of what he had done. "O Baka, rightly named," exclaimed the priest, "you did right not to lend the umbrella, but you should have used more tact."

After the priest had gone, Kanoaka, the farmer, the same who that year laid in E-mura's rice, came in great haste. His pony was lame and he wanted the use of the priest's pony to finish hauling his wood.

"I can't let you have it, Kanoaka," said O Baka. "I have told him to say to you if you came to borrow his pony that he had the pony out one day in a great storm, and turning a corner, a gust of wind took the pony and laid all its ribs bare."

When E-mura came home O Baka said, "I have done well," and related how he had refused the pony to Kanoaka.

"You are a Great Fool truly, O Baka. You did right to refuse to lend the pony, but why anger Kanoaka?"

"I can't let you have it, Kanoaka," said O Baka. "I have told him to say to you if you came to borrow his pony that he had the pony out one day in a great storm, and turning a corner, a gust of wind took the pony and laid all its ribs bare."

ed a like question, and the next, another. Locomotives and the demand for a person became epidemic. One of the officers of the boat was reported that there were not private nooks and corners enough for the crew, who wanted to "snooze."

So configurations were checked themselves in their staterooms to escape infection. This means not only failed but became a source of grief. At Honolulu it was found that sixty heads were beating as thirty. The lovers moved in procession to the nearest church, where, as soon as the preacher recovered from the shock, they were married.

Lord Salisbury keeps in his home at Hatfield the big stone which was thrown through the carriage window at Dumfries Oct. 21, 1884, after one of his speeches.

Leslie Stephen, the eminent critic, was up to a few years ago a remarkable pedestrian and when a young man used to walk from Cambridge to London in a day.

The emperor of Japan has an allowance of about \$2,000,000 a year from the state to keep up the imperial establishment. He has also a large private fortune, having invested in stocks and real estate.

John W. Bowler, general superintendent and director of physical training in the public gymnasiums of Boston, has accepted a year's appointment as director of physical training at Dartmouth college.

Henry Savage Landor, artist, linguist and explorer, is described as "short and fragile, yet wiry and capable of great endurance. He is said to feel cold when he is all and wears a suit of serge through a London winter."

Baron Nathaniel Rothschild has leased for five years a piece of ground at the highest point of the Ampezzo road, between Toblach and Ampezzo, in the Austrian Tyrol.

King O'Malley, the only member of the first Australian commonwealth parliament against whose return a petition has been lodged, was the second most popular candidate in all Tasmania.

BREVITIES

PERSONALITIES.

The ex-Empress Eugenie has never worn anything but black since the death of the prince imperial.

The emperor of Japan has an allowance of about \$2,000,000 a year from the state to keep up the imperial establishment.

John W. Bowler, general superintendent and director of physical training in the public gymnasiums of Boston, has accepted a year's appointment as director of physical training at Dartmouth college.

Henry Savage Landor, artist, linguist and explorer, is described as "short and fragile, yet wiry and capable of great endurance. He is said to feel cold when he is all and wears a suit of serge through a London winter."

King O'Malley, the only member of the first Australian commonwealth parliament against whose return a petition has been lodged, was the second most popular candidate in all Tasmania.

Professor J. Scott Clark of Chicago university, who has been constructing a large dwelling with his own hands opposite the campus in Evanston, has given up the job and retired from the carpenter's trade.

The greatest obstacle to the extensive construction of hard roads in this country is unquestionably the cost of their maintenance.

A French insurance company has just put into operation the novel device of insuring candidates for parliamentary honors against defeat at the polls.

NEW IDEAS IN ROADS.

CHANGE SUGGESTED IN REPAIR OF MACADAM HIGHWAYS.

Constant Renewal to Give Way to Repairing a Road Three to Five Years—Cost of Maintenance Reduced—Use of Machinery.

It is commonly said and thought that in the construction of macadam roads there is nothing new under the sun. All the American engineer can do is to copy the precedents and practice of the English and French road builders.

Russell says that there is to have a man continually going over the roads of a given district, mending a low place here and filling a rut there, taking the proverbial stitch in time that is supposed to save nine. Now, whatever experience in Europe may be, results here show that this is to have a man continually going over the roads of a given district, mending a low place here and filling a rut there, taking the proverbial stitch in time that is supposed to save nine.

Of course, however, Mr. Gillette does not go to the extreme of proposing to make no repairs whatever between surfacings. Minor repairs, such as filling potholes, mending raveling shoulders, filling ruts to crosswalks and manhole covers, will do much to promote the comfort of those that use the road and cost comparatively little.

The French are not supposed to be great travelers, yet the Touring club of France has 80,000 members. The thrift of the French may be inferred from the fact that one-fourth of the whole population are depositors in savings banks and that the amount of their credit is over 4,000,000,000 francs.

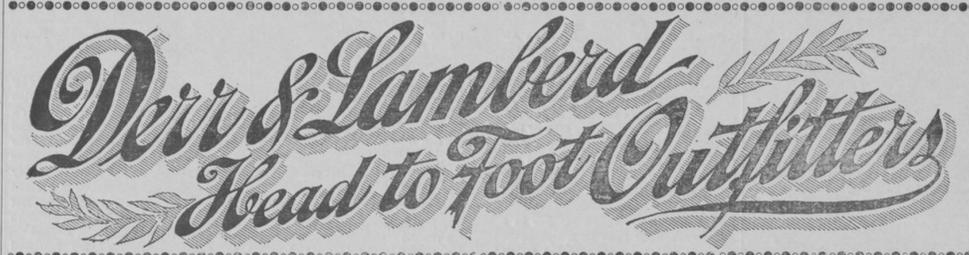

A strike for the mustache is threatened in Paris. One automobile concern has ordered clean shaves for its chauffeurs, and the men, in union assembly, have resolved to quit the machines sooner than the hirsute adornments of their upper lips.

The road engineer has gradually created a new industry in this country in the past ten years. His profession is one that offers extensive inducements in many directions, and bright minds find employment therein for talents that are of the highest order.

Use of the Corrugated Variety Becoming More Common. "Glass is becoming a more important building factor every day," said a contractor whose men have put up the steel skeleton of many a New York skyscraper.

Corrugated or ribbed glass of various forms will be used extensively in all of the big buildings now under construction in this city.

The Great Model Emporium Weekly Store News.

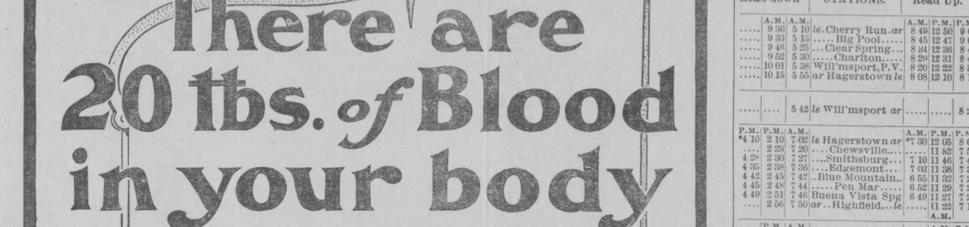

Fall Dress Goods. The correct new Styles here reign. Every desirable color, weave and fabric is represented; also a complete selection of Blacks.

This is the Last Day of Our GRAND OPENING AND FIFTH ANNIVERSARY! SOUVENIRS FOR ALL THE LADIES.

New PETTICOATS. A complete stock of new Black Mercerized Satteen Skirts, at very special prices from \$1.00 to \$3.00.

FALL FURNITURE LINE. We are ready! The best selection of Handsome, well-made Furniture at Moderate Prices is here for you.

There are 20 lbs. of Blood in your body. The average man in good health has about 20 lbs. of good blood in his body.

YAGER'S Sarsaparilla With Celery. Makes Rich Red Blood. It renews the vitalizing power of blood that has lost its strength. It increases the number of corpuscles. It strengthens the nerves.

Yager's Cream Chloroform Liniment. is for external application. It soothes pain of any name. It has been endorsed by thousands of sufferers from Rheumatism as the only thing that gives relief.

WESTERN MARYLAND R. R. MAIN LINE. Schedule in effect June 23rd, 1901. Read down CHERRY STATIONS. Read up.

676 Green. This signature is on every box of the genuine Laxative Bromo-Quinine Tablets.

THE QUESTION OF MARRIAGE. How to get people to marry is a more important question than how to get people to church.

Let it Alone. Scott's Emulsion is not a good medicine for fat folks. We have never tried giving it to a real fat person.

BETWEEN THE ACTS. Clyde Fitch's new play for Annie Russell will be called "The Girl and the Judge."

Sowing Grass Seed. There are many who think they can get better crops of grass by sowing the seed in August or early in September without grain than in any other way.

CURIOS FACTS. Wireless telegraphic stations are being established all along the Gulf of St. Lawrence.

German Money in Samoa. Consul General Osborn reports from Apia, Samoa, that on July 1 the German government began the issue of German money as the legal tender of the colony.

Our Job Printing has a deservedly wide reputation. Why? Because it is always clean, first-class work. The proof that it is appreciated, and in demand, is the fact that we are always busy.

TANEYTOWN LOCAL COLUMN.

Current Items of Local News, of Special Interest to Home Readers.

Jesse Hoover, of Brooklyn, is visiting relatives in this neighborhood. Miss Lou Renner returned to Washington, D. C., on Saturday evening last.

Lawrence Shoemaker, who has been in Yorkers, N. Y., for some time, is at home in this place at present.

Master Earle, son of Milton A. Koons while playing, one day this week, had his collar bone broken.

Another alarm of fire last Sunday afternoon. No damage, but some valuable experience. Don't throw hot ashes in a straw barnyard.

Mr. and Mrs. H. B. Miller left for the Pan-American Exposition, last Saturday, for a ten day's trip. Dr. and Mrs. F. H. Seiss returned on Tuesday.

If you want to vote, and are not registered, don't forget that Oct. 1st, and 8th, are the only dates for registration this year—Next Tuesday, and Tuesday one week.

J. Sentman Sheets has bought the Betsey Donnelly property, on Emmitsburg St., and will replace the dwelling with a new one. This will remove one of the old eyesores of this section of the town.

"Enclosed find \$1.00 for subscription for the Record. Just returned from Minnesota on a three-weeks fishing outing, and the sport was fine. With the best wishes for continued success of your paper."—L. EDWIN MOTTEN, Kansas City.

Rural Route Inspector, A. F. George—the gentleman who secured Senator Wellington so severely by letter—was in this district, on Tuesday, and examined the recommended change in Route No. 19, which will carry the service to Harry L. Feeser and John S. Pfoutz. The change will be made in the near future.

Before putting up stoves for the winter, see that they are perfectly clean and that chimneys are free from dirt and soot. Especially examine the portions of the chimney where pipes enter, and where they pass through the roof. Many fires occur because of carelessness with stove pipes, dirty flues and cracked chimneys.

Thomas Lawrence, of this district, was seriously injured last Saturday by being crushed by one of Mr. Trimmer's traction engines. He was under the engine doing some work to it, and without coming out, directed it to be moved; unfortunately for him it was moved the wrong way, crushing him to the ground, but the motion was reversed just in time to save his life.

The season is at hand when there is both more time, and more desire for reading; besides, there will be more to read, of the newsy sort. We think more people ought to take the Record, and ask our present patrons to recommend it to their friends. We are now adding a string of new ones, each week, and, if we get too many for our press to turn out in time, we'll get a faster one—see if we don't.

The memorial service, which was to have been observed in the Lutheran church last Sunday morning, in honor of President McKinley, was not held on account of the sudden and unexpected illness of the pastor, Rev. C. A. Britt. It will take place this Sunday morning, however, so far as now known. The evening service will be a Praise Service, similar in character to the one held on Children's Day, August 20th. This change in the discussion of the timely topic—Anarchy—from the evening of Sept. 29th, to the morning of Oct. 6th, is made in response to the request of several members of the church who cannot attend the evening services, but who desire to share in the benefit of the discussion.

Squabs. Two little squabs, side by side, Were talking of the stiff-necked Scot, Of the world, far and wide, As in their nest they lay.

Telling of Squabs who were known To have nothing to eat But what was gathered from wheat sown; Very poor and cold were their feet, Papa Pigeon came with corn and wheat, That was feed for them to eat; Busy little throats, blue, green and red, Were shining—fattening heads.

Fifteen day old Squabs were great advent To Baby George and Brother Ned, Who pronounced them fine and fat— They will bring 25c at SCHWARTZ'S PRODUCE—sure of that.

That Much-Used Word. We give below a little exercise in elocution. It may not appear entirely intelligible at first, but it is perfectly so if the correct inflection be given. Now that is a word that may often be joined, For that that that may be doubted is clear to the mind; And that that that is right is as plain to the view As that that that that we use is rightly used, too; And that that that that that has, is right, In accordance with grammar, is plain in our sight.

The word that may have four constructions in a sentence; it may be a demonstrative pronoun, a demonstrative adjective, a relative pronoun, or a conjunction. As a relative pronoun, it is equivalent to which, and substituting this word for that when used as a relative and making use of a few italics, the meaning of the foregoing verse may be made more clear: Now that is a word which may often be joined, For that that that may be doubted is clear to the mind; And that that that is right is as plain to the view As that that that that we use is rightly used, too; And that that that that that has, is right, In accordance with grammar, is plain to our sight.

Union Veteran Legion Encampment. On account of the above Encampment of the Western Maryland R. R. Co., will sell excursion tickets from all its stations to Gettysburg, Pa., on October 8 to 11, inclusive, the return portion being made good until October 12, at the low rate of one fare for the round trip, thus affording an opportunity to all to visit the largest and most interesting Encampment that has been held at Gettysburg for years.

A DREARY EXISTENCE.

THE LONELINESS OF THE ENGLISH LIGHTHOUSE KEEPERS.

At the Bishop Station the Sentinel That Lights the Waves Lives in Almost utter Isolation—A Service With Few Enticing Features. During the storms that rage intermittently around the English coast in winter the landsman's mind turns in sympathy toward those who in ship or lifeboat are fighting the waves for dear life. But how often does he give one thought to the men who immerse themselves in the lighthouses that stud the coast?

"I would rather spend my life in a penal settlement than be a lighthouse keeper," declared a man to the writer after a visit to the Bishop lighthouse on the Cornish coast. "A convict does only a little of the world he lives in, but a lighthouse keeper sees nothing but a dreary expanse of water. I am not surprised that many of them should lose their mental balance."

The visitor to the Bishop lighthouse did not overlook the picture. It was only the other day that one read of the Longships lighthouse, also off the coast of Cornwall, having been completely isolated for many weeks in consequence of fearful storms. The keepers had been reduced to smoking coffee, hops and tea leaves, though, fortunately, they had not wanted for food.

The keepers of the famous Eddystone lighthouse do not infrequently find themselves in a similar predicament. In a gale the waves that buffet themselves against this wonderful monument to the engineering skill of the country are of such stupendous magnitude that they rise to a height of 200 feet and sweep right over the lantern. To those cooped up inside the sound of these waves is like that of a battery of guns at close quarters. "I remember times that I saw a tree with a man on the top of it," was the graphic description of one who spent many years of his life there.

The new Eddystone is the roomiest and most comfortable of all our rock lighthouses. For a sea view of it shows the various compartments, commencing at the bottom with the water tank; then the entrance, the two oil receptacles, the storehouse, the crane, the living apartment, the low light, the bedroom and the service room in the order named. Formerly only two keepers were employed in the lighthouse, but a grim incident resulted in their number being increased. One of the two men died. So fierce ran the seas that the remaining keeper could not get the body of his late comrade to the shore. For a month the tempestuous weather continued, and for a month the surviving keeper lived alone with the body as his only companion. He was afraid to cast it into the waves, for he might be accused of murder.

Keepers of rock lighthouses do not last long. The incessant pounding of the waves against the building, the loneliness, the want of fresh air and exercise reduce the men to a state of nervousness that is sometimes pitiful to behold. They require a fortnight's leave every six weeks, but this liberal allowance does little to improve their physical state. A medical man whose duty it is to pay periodical visits to these lighthouses confesses that there is no remedy for the ill peculiar to the keepers except retirement.

The utter isolation of the silent sentinels of our coast is well illustrated by the case of the Bishop lighthouse aforementioned, which stands right out in the Atlantic. Not once in a year is it calm enough for the men to get to land in a story which comes from a neighboring lighthouse which is the charge of two families. They live on a desert island. From year end to year end they never see a visitor except the man who brings their stores. Eighteen months ago the heads of the two families quarreled, and ever since they have ceased to speak.

At the shore lighthouse of Ushinish the keeper's family has to travel 40 miles to "kirk." It is no reflection on their piety to add that they are not regular attendants.

A lighthouse keeper receives a maximum wage of £75 a year, out of which he has to supply his own rations. These consist of such unappetizing edibles as tinned beef and hard biscuits, usually washed down with weak tea and condensed milk. No intoxicating liquors are allowed.—London Mail.

Evening Up. "She is a very pretty girl, but she's over-dressed," said one student. "No," answered the other. "But I don't let it worry me. I don't believe Shakespeare himself could have understood some of the things he wrote after the stage managers and literary commentators got through with them."—Washington Star.

Women and Jewels. Jewels, candy, flowers, man—that is the order of a woman's preferences. Jewels form a magnet of mighty power to the average woman. Even that greatest of all jewels, health, is often ruined in the strenuous efforts to make or save the money to purchase them. If a woman will risk her health to get a coveted gem, then let her fortify herself against the insidious consequences of coughs, colds and bronchial affections by the regular use of Dr. E. B. Kocher's German Syrup. It will promptly arrest consumption in its early stages and heal the affected lungs and bronchial tubes and drive the disease from the system. It is not a cure-all, but it is a certain cure for coughs, colds and all bronchial troubles. You can get Dr. G. Green's reliable remedies at R. S. McKinney's, Taneytown, Md. Get Green's Special Almanac.

A new counterfeit quarter has made its appearance in Baltimore city. The counterfeit bears the date 1900 and is so well executed that many of them have escaped the detection of the banks and have been received at the Subtreasury, where they were quickly discovered.

THE HEALTH FOOD MAN.

His eyes are balls of polished steel, His lungs are sponges dried, His blood is bullion concentrate In veins of leather hide.

His muscles crack like pulley ropes When hurried into place, His hair is like piano chords, Some chords are lost, they say.

His heart's a little globe of punk, A house of constant gloom, For love can never burn within, Because there isn't room.

His appetite has dwindled down To fit his little food, Till truth is "water in a poke," And bread is "so much wood."

Hot apple tart and pumpkin pies, He reads of them aghast, And waffles brown and chicken stew Are "terrors of the past."

And, smiling, from his vest he slips A tin box of tin, With capsules brown and pellets pink, All rattling within.

Then, with a gulp, he swallows down His dinner from the can, This product from the health food school, The concentrated man.

—What to Eat.

In Danger.

Cop—Who rang that police call? Trembling Truant—I did, officer. I'm going home, and I'll need protection.—New York Journal.

Information. "I have read a good deal about killing mosquitoes with kerosene," said the breathless man who had climbed six flights of stairs to ask the question, "and I wish you would tell me how they do it."

"They drown them in it," responded the answers to queries editor. "If you bet that they soak them in the kerosene and touch a match to them, you have lost. Call again."—Chicago Tribune.

One Naturally Wonderful. "Well," she said in some astonishment as she looked up from her paper, "woman certainly is invading all lines of business. A girl bargain has just been caught."

"I wonder," he commented thoughtfully, "if the time is coming when timid man will be coming a-begging for fear there's a woman under the bed."—Chicago Post.

He Wasn't a Real Cuck. "Why isn't Bunker on the links this morning?" "He's over at the church getting married."

"Well, I can say one thing, Bunker will never make anything but a duffer so long as he lets a trifling social engagement keep him from going the round twice a day."

An Ingenious Scheme. "The Blowhairs tried hard to make it appear that their reception was a big success. Did you hear of one thing they did?"

"No. What was it?" "Why, they took all the chairs out of the rooms so there would be standing room only."—Cleveland Plain Dealer.

WESTERN MARYLAND R. R. Excursion rates to the Frederick and Hagerstown Fairs.

The Western Maryland Railroad announces the sale of excursion tickets to the great Frederick Fair, October 7th to 11th, inclusive, good to return until October 12th. On Thursday, October 10th, special train will be run from Baltimore, stopping at all main line stations and including Bruceville. Returning, this train will leave Frederick at 6:00 p. m. For further information apply to the local ticket agent.

The Western Maryland Railroad announces the sale of Excursion Tickets to the Hagerstown Fair, from October 12th to October 18th, inclusive, good to return until October 19th, inclusive. On Thursday, October 17th, a special train for the Fair, will leave Westminster at 7:30 a. m., stopping at intermediate stations to Chewsville, and returning, leave Hagerstown at 5:50 and Fair Grounds 6:00 p. m. On Wednesday and Thursday, October 16th and 17th, a special train will start from Baltimore, stopping at all stations to and including Westminster; returning, leave Hagerstown each day at 5:25 and Fair Grounds 5:35 p. m. Excursion tickets will be good on regular or special trains.

Charles Steinman, a few weeks ago celebrated his quarter century of London management. He, John Haro and George Alexander have done more for the present English dramatists than any other man.

Phyllis, 18th in daughter of McKee Rankin, the American actor and Harry Davenport of Elma May's company, a brother of the late Fanny Davenport, were married before the register in London a short time ago.

Not Worried. "Can you understand all of Shakespeare's works?" asked one student. "No," answered the other. "But I don't let it worry me. I don't believe Shakespeare himself could have understood some of the things he wrote after the stage managers and literary commentators got through with them."—Washington Star.

Following Instructions.

When a child becomes tired of one sort of amusement, take another tack.—Chicago News.

Infelicitous Inquisitiveness. Mamma (reciting the familiar rhyme)—Old Mother Hubbard went to the cupboard to get her porridge a bone—Little Percy (who has overheard something)—Ma, did she have a skeleton in her closet too?—Smart Set.

THE EDUCATIONAL TRIP PROVED HIGHLY SUCCESSFUL.

Farmers interested in the movement for improved highways—rapid transit needed in Agricultural Districts.

Good roads were made in samples by the National Good Roads association during its special trip which ended recently, and as a result the farmers and owners of acre property throughout the farming districts of the south have come to the conclusion that it will pay to have good earth roads, well drained and so hardened that the heaviest wagons may move over them in order to reach a railroad depot with freight.

The special train of the National Good Roads association, which has been traveling for three months throughout the south, carried machinery and implements in order to prove the benefits according to properly constructed roads. It was recognized from the outset that the majority of the roads in the United States would be earth roads. The majority of the present dirt roads are impassable in hot weather. The success of the National Good Roads association aroused enthusiasm everywhere, and the result of the trip may be that congress will appropriate a large sum of money for the building of country roads.

GOOD ROADS TRAIN.

ITS EDUCATIONAL TRIP PROVED HIGHLY SUCCESSFUL.

Farmers interested in the movement for improved highways—rapid transit needed in Agricultural Districts.

Good roads were made in samples by the National Good Roads association during its special trip which ended recently, and as a result the farmers and owners of acre property throughout the farming districts of the south have come to the conclusion that it will pay to have good earth roads, well drained and so hardened that the heaviest wagons may move over them in order to reach a railroad depot with freight.

The special train of the National Good Roads association, which has been traveling for three months throughout the south, carried machinery and implements in order to prove the benefits according to properly constructed roads. It was recognized from the outset that the majority of the roads in the United States would be earth roads. The majority of the present dirt roads are impassable in hot weather. The success of the National Good Roads association aroused enthusiasm everywhere, and the result of the trip may be that congress will appropriate a large sum of money for the building of country roads.

"The trip of the association proved conclusively," said President W. H. Moore, "that a highway is just as much needed in the farming districts as in large cities. If the farmer can get his products to the nearest railroad station in quick time he saves not only his load, but his wagons. He can do this on a good road. The present dirt roads are more impediments. They will make them impassable. They are not drained properly. The association tried to show how to build a dirt road and how to drain it so that it would remain hard and fit for travel all the time."

During the trip, which lasted for three months, the association showed southern farmers the best methods of building roads by constructing 20 miles of earth roads and three miles of macadam. The climax of the trip will be at Buffalo, Sept. 10 to 21, when the convention of the International Good Roads association will be held. President Moore says that states usually appropriate about \$500 a mile for earth roads, and that the money is wasted because the roads are not constructed to proper standards by storms. The special train, with its steam rollers, graders, traction engines, ditchers, plows and stone crushers, was meant only as a feature in the object lesson to farmers in order to carry out the plan for good roads.

"We began at Blossmore, 25 miles from Chicago," said President Moore, "to show what a good earth road meant. We constructed half a mile. The farmers began to realize that it would be better for them to have good roads, because they could ship their products quicker. The association figured out that the United States at peace with the world. Consequently the only problems were for internal economy. There is no doubt that this country is far behind Europe in the quality of its roads. This may be accounted for because the distances are so great in the United States. There can be no excuse, however, for poor roads between small cities and farming centers."

"The trip was amply justified by the enthusiasm of the farmers who witnessed the sample roadmaking. At New Orleans we built one and one-half miles of earth road which was good enough for automobiles. Farmers' wagons could make double time on the road after it was finished. We showed them the best methods of building earth roads by putting in drain tiles for the road itself so as to carry off surface water, and then by constructing ditches to carry off the deep drainage."

"At Natchez we built one mile of earth road and filled in 20 feet at one point. At Vicksburg, Miss., we built a road up to the National park, and dug up cannon balls, skulls and many relics of the civil war. At Greenville, Miss., we ran against the buckshot soil, but we turned the soil and showed the farmers how to make a good road. Then a mile of road was built at Clarksdale, Miss., where the gumbo soil was handled."

"The engineering difficulties were not many, and if roads were constructed according to the plan of being left to country roads the farmers would benefit. We had large conventions at Jackson, Miss.; Jackson, Tenn.; Louisville, Hopkinsville and Owensboro, Ky. We built 500 feet of macadam at the last city. At Cairo, Ill., we tried the last quality in building a mile of road. One of the suggestions made by the association was that oil be used to sprinckle the roads at certain periods, so that water would trickle off into the ditches. The convention at Buffalo will include the members of the National Highway association, of which General Miles is president. We will take up the question as to the best roads according to the soil."

THE TROTTERING CIRCUIT. Ferezo, 2:10 1/2, recently worked a mile in 2:13 1/2, last half in 1:04. Alameda, 2:00 1/4, by Altamont, has been fired for a bowed tendon.

The Swift, 2:09 1/4, has been sent home and will never be raced again. Shadow Chimes, 2:07 1/4, seems to be a good 2:05 prospect, to say the least.

Neva Simmons, 2:11 1/2, has the appearance of being a first class race mare. Anacanda and Joe Patchen will race at the Bethlehem (Pa.) fair the week of Sept. 9.

Two new better than 2:05 pacers—Dan Patch, 2:04 1/2, and Royal R. Sheldon, 2:04 1/4.

Dacey, 2:17 1/2, pacing, by Direct, is only 1 1/4 hands high and was brought up on the bottom.

Searchlight, 2:03 1/4, pacing, is so crisscross in temper that he will not stand training, it is said.

Brush, the big sister of Chain Shot, 2:11 1/4, reduced her last year's record of 2:24 1/2 to 2:15 1/4 at Davenport.

Master Roy, 2:22 1/4, a newcomer, is full brother to Harold H. Little, being by Roadmaster, dam Little Belle, by Brown Dick.

Personette, 2:09 1/4, has won six races this season and lost only one heat. Her speed is not sensational, but she gets the money and does it easy.

Directum Kelly, 2:08 1/4, is one of the season's disappointments. He has been retired to Elm View farm and will probably never again be prepared for a race.

Distilling seems to be prominent in Russia. A Moscow firm, Widow Pavlov, distributed 1,200,000 rubles as dividends for the year 1900 on a capital of 500,000 rubles.
