Attorney-General Bryan has sent a letter to State Treasurer Vandiver and Comptroller Atkinson, suggesting to them the inadvisability of paying out any money under the Shoemaker read law, passed by the recent legislature. The law, which does not go into effect until next January, provides for the payment from the State Treasury of \$200,000 annually for the roads in the several counties. Mr. Bryan does not believe any money should be paid under the law until its constitutional validity has been finally and authoritatively declared by the judicial tribunals of the state.

#### We Give the Laws Away.

As we have quite a number of Democratic exchanges which are publishing the principal new General Laws, ments" containing said laws, and these will be given to those of our patrons who may especially desire them. As the RECORD is not able to them. As the RECORD is not able to "fold in" these "ready-made" sheets, and charge the bill to the state, thereby depriving our subscribers from residuent the laws for the publication of which they are paying, the next best thing we can do is to give away as many copies as we receive, as above stafed.

O! dear Father, how can it be?

Evidently, the Monarch of Charles

To those of our readers who desire to speculate in advance, with the Monarch of Charles are under way for a series of platform like that provided for him platform like that provided for him at Albany last month, there will be excursions from Chicago to St. Louis, no serious issue before the country no serious issue the country no serious issue before the country no serious issue the count getting ready for him in November.

WE HAVE for a long time suspected that there is "a screw loose" in the mental and moral make-up of the Editor of the Clarion, but we never guessed the truth-that he has failed to accept the first Commandment. When he asks "Which Providence? the RECORD refers to in a recent editorial, our mountaineer contemporary admits his scepticism with reference to Christianity. Truly, as he says, 'What's the use of sending mission aries to convert the heathen"-when we might send them to Thurmon where the field appears "ripe unto the harvest."

#### Contemplated Improvements.

We had fully expected to increas the size of the RECORD at the close of Volume 10, July 1st., but investiga tions demonstrate that this cannot be done without dispensing with th power (water motor) which we have found so satisfactory, and installing instead, an engine in order to give the power required to run a new and do this (not on account of expense) vote, white and colored, in each of trality that our government observed larger press. As we are unwilling to the size of the paper will remain as at the counties of the state, the counties through the South African war, in present, at least for another year. We will, however, purchase a new ply being in italics;

dress of type, and endeavor to give our readers a still more sightly paper, typographically, than they have been receiving, and continue the plan of turning away much foreign advertising, as we have been doing during the past year. Consideration for our subscription patronage has already cut off a large advertising revenue from this class, and, in addition, we have discouraged, rather than encouraged the taking of large amounts of space by county advertisers.

Further economy of reading matter space will be made whenever possible. The RECORD never runs the character of advertising which is practically "dead head," as many papers do-so easily recognizable by the craft-in order to make a show of large advertising patronage—we get paid in full for space, or do not give it. The same is true, in a different, sense, as to reading matter. Not all is grist that comes to our mill, as we do not publish near all that is sent us, consideration al

ways being given to quality. Therefore, while the larger paper plan is dismissed, with regret, we shall endeavor in every way to improve the standard by which the RECORD has been known in the past, and trust that the future may open the way for the accomplishment of our ambition to supply more reading matter, as well as the reception of struggle in Colorado in the May them, the present effects from these greatly increased revenue from adver-

Topic.—Crowns trodden under foot.—Isa.

Xxviii, 1-7; Rev. lii, 11.

The crown is a symbol of royalty and is worn by kings and queens. It is an ancient and universal ornament and "probably originated from the fillets used to prevent the hair from being disheveled by the wind. Such fillets are still common. They gradually developed into turbans, which, by the addition of ornamental or precious materials, assumed the dignity of miters or crowns." In the Bible the thorns that were placed upon the Saviour's brow are called a 'crown of

beauty of Samaria because of its sins, and He warns Judah against a similar condition and consequently a similar fate. This is His denunciation: "Woe to the crown of pride of the drunkards of Ephraim and to the fadof them that are overcome with wine." Though drunken and rebellious against laws of God and are yet filled with a spirit of self complacent pride.

2. The crown of glory. The unfaithful were to be uncrowned, while God himself was to become the crown of the few who remained faithful. "In that day will the Lord of Hosts become a crown of glory and a diadem of heauty unto the residue of His people."

Most of the conditions for the production of the conditions for the production of the conditions of the cond duction of certified milk are not exsensive. With the majority of dairymen only a few call for the outlay of additional money. The most important conditions, those involving cleanliness and safety, can be secured with-out appreciable expense. Here improvement can begin, and should begin at once, and go forward as rapidly as possible until all milk offered for direct consumption is produced according to the granded of duced according to the standard of

certified milk. There are, and doubtless always will be certain men producing milk who, from the sloyenly methods they practice, are a disgrace to the dairy business. Such laws should be enacted and such a system of inspection instituted as will compel these men to be decent in their practices in handling milk or quit the business. It is time the dairymen moved in this matter and asked for inspection. If they do not the public will soon do so, and when such matters are taken in hand by those who do not have the necessary technical information on the subject, the business may be injured and injustice done to honest dairymen who are putting out a good grade of milk.—Wilbur J. TAME WILD BIRDS.

Odd Creatures That Were Found on the Island of Laysan. Naturalists commissioned by the United States government recently discovered on the distant island of Laysan, in the Pacific, some new birds and many novel facts in regard to known species. The visiting scientists were perhaps the first human beings whom the myriads of birds that crowd this tiny speck of land had ever seen. In consequence birds representing speroof on top and then make a groove all riedly away at the sight of man came up to the naturalists, looked curiously into their faces, perched on their writing tables, wonderingly inspected the tripods and other accessories of the cameras and permitted themselves to be stroked. The fact that these birds are ordinarily regarded as the wildest species made a profound impression on

the visiting scientists. Among the odd instances of lack of fear on the part of these birds of Layface of Mr. Fisher, one of the scien- pass from one room into another. Fire Loss of Baltimore.

From 1000 reports of insurance adjustments in which figures were re turned, Mr. Paul Turner, chairman of the general loss committee, has figured out the totals of value, insurance Mr. H. L. Hagan, representing the Y. M. C. A. Concert Co., of Frederick, was here yesterday taking orders for \$29,947,000, on which the gross amount of insurance was \$26,558,000, of which \$23,611,000 was paid by the companies in settlement of the claims against lar's Opera House, Thursday evening, them. To these figures Mr. Turner adds \$3,162,000 as the value of the fire-
