Frederick County Tax Rate.

The tax rate for 1904 for Frederick county has been fixed by the County Commissioners at 92 cents on the \$100 an increase of 5 cents over the rate for last year. The taxable basis is \$21,043,616,as against \$20,815,310 last year, but the greater proportionate increase in the estimated expenditures necessitated the increase in the rate. There is an increase of \$6,000 in the appropriation for the School Commisoners to enable it to comply with the act of the legislature fixing \$300 as the minimum salary for public school teachers. There is also a levy of \$4,600 to pay for damages to bridges and roads by last year's floods, and one of \$970.16 to pay the expenses incurred in connection with the smallpox cases in the county last winter.

day, and several hundred people from Baltimore, as well as from the surrounding country, journeyed there over the Western Maryland Railroad. The day was particularly interesting, as, in addition to being the first day that the gates of this garden spot were thrown open to the public, there was a special excursion of the Independent

Order of Mechanics and their friends For those who elected to stay at the park there were many entertainments and of a varied character. There were the merrygorounds and the shooting galleries, which are always so popular; a Férris wheel and a miniature railroad, which are quite new, and the latter of which has been christened the "Little Wabash," and a goat course. The many pleasant methods for gratifying the taste for amusement which is owned by any healthy. minded child, or grown up, either, for that matter, as was evinced by the fact that the little mechanics by no means had a monopoly upon the amusements, were all availed of. Then there was dancing, and to the music of Professor Bohl's Orchestra the light fantastic was tripped; and a photo-graph gallery, where the vain and those who "just wanted a souvenir" of the excursion could have their photographs taken. The amusements have been made quite a feature of the park this year, almost rivaling

the scenery in attractiveness. But a large number of people preferred to tramp or drive about the picturesque country surrounding the park, and the roads were fairly alive with pleasure-seekers. In the spring-time the seepery always picturesque situation.

Some of Mr. Gorman's local friends are somewhat provoked because of what they term his timidity. They say that if he would only give them the word they could start him off with nearly 250 delegates and a strong show to win. "But, no," they say; "he is to win. "But, no," they say; "he is to win. that India is becoming Christ's and that some day this beautiful and fas- tant function—liberating plant food cinating land will be a diadem in the already in the soil. If a little lime be Some of the signs that India is becoming Christ's are as follows: 1. The great work among the out-

casts of India. The outcasts are the millions of India who are beneath all castes. They are scarcely looked upon as human beings. For centuries they have lived hopeless, despairing lives, but now they see hope in Christianity and for the past thirty years have been turning to Christ in large numbers. The work among them was begun by the Methodist church in northern In-by manuring or fertilizing the soil will spread over the empire, for the out-

These are not distinctively Christian, but they were brought about under the pressure of Christianity and are therefore a sign of Christianity's increasing influ-

3. The movement among the educated of India. Under the influence of eastern teaching and customs the educated men of India are becoming dissatisfied with their native religions. This will not immediately make them Christians. It may even for a time tend to drive them to infidelity and atheism, but it gives Christianity an opportunity to reach them since it is more apt to bring them under its influence. That this is the case is illustrated in the vast audiences that have listened to the lectures of Dr. John Henry Barrows and Cuthbert Hall delivered in the great cities of India under the Haskill foundation, which provides for such lectures every two years. 4. The passing away of prejudice against Christianity. From one India

mission field it is reported: "A marked change is noticeable in the treatment of the Christians by the people. They are no longer held in such contempt as they used to be. Their very touch was considered polluting. But now many * * * enter into friendly conversation with them, and some even go so far as to shake hands with them. We mention this simply to show how the light of the gospel has begun to dispel the thick darkness of prejudice that has enveloped their minds for centu-

5. The results of famine relief. In the recent famines in India Christians have been of great assistance in relieving the great distress. From 50,000 to 100,000 children in the famine districts have been placed in Christian more than this, such Christian philanthropy cannot but break down prejudice and win the hearts of the people.

6. The gradual weakening of the caste system of India. This has been a great barrier, but it is breaking down. There is as yet nothing like intermarriage, and yet the line of demarcation hammedans and Christians, ate at the

mixed with strong manure, such as hen manure, an odor of ammonia will become apparent. This means that the lime is liberating the ammonia from the manure and that it is escaping into the air. If lime be mixed with the soil similar action will take place. If a crop be growing upon the soil it may absorb part of the escaping ammonia, and a larger crop will result, but this larger crop is made at the ex-

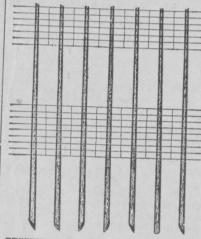

pense of the soil stores of plant food, soon refuse to respond to lime, because all the material in it upon which lime can act has been drawn out, and the soil is poorer than if no lime had been used.

European farmers who have used lime for many years have become so convinced of its injurious effect when used in this way that they say "lime enriches the father, but impoverishes the son," and it is customary in some places to prohibit the use of lime in leasing land.

When used as an adjunct to liberal manuring or fertilizing lime may be made to perform a most important service, but its use as a substitute for manure or fertilizer means ruin to the

Surprise Social.

A very pleasant surprise social took place at the home of Mr. and Mrs. Wm. Eckard, in Stumptown, on Tuesday evening. Mr Jos. Storm entertained the company with his graphophone. Refreshments were served about 10 o'clock. Those taking part in the eyent were:

Mr. and Mrs. Wm. Eckard, Mr. and Mrs.
Charles Haines, Mr. and Mrs. Geo. A. Shoe-maker, Mrs. Jerome Storm, Mrs. Joshua Rinaman, Misses Annie Storm, Bessie Mettie F. and Emma Rinaman, Carrie Eckark; Messrs

(For the Record).

A day to be remembered by those present, was that of June 20th, it being the occasion of a surprise birthday dinner and reunion given to Mr. and Mrs. Emanuel Zepp, at their home in Pleasant Valley. It was a happy surprise to the old folks, and a time to make their dear oid hearts glad. Surely, one of the happiest times in the lifetime of father and mother is when, after years of separation, all their children are gathered once more around the family board.

Much of the time was spent in the old orchard, and dinner was partaken of under the spreading boughs of a favorite old apple tree. At an appropriate time, photographs of the group were taken. A prominent feature, greatly enjoyed by all, and especially so by the father and mother, was the concert by Edw. P. Zepp's wonderful talking machine,
