Carriers Cannot Open Fences.

The Postoffice Department has issued instructions to Rural Carriers that they are not to tear down fences or open roads through private property in order to deliver mail on their routes when the roads are drifted shut. They are simply equired to go as far as they can, but when roads are not open, and it is not possible for them to continue without throwing down fences, they will return to the postoffice from which they started where the mail will be held until called for, or until the roads are opened. Patrons must also clear away the snow to their boxes, so as to permit the Carrier to deposit mail without leaving his held at postoffice until called for.

Always Give Route Numbers.

American has not only shown a bit of exceedingly commendable enterprise in of the Rural Route along which they reso quickly getting back into such mag- side; also, when a change in address is so quickly getting back into such magnificent quarters, but it is admitted by the reading public generally that it is now a much better journal, in every way, than it has been at any time in its subscription list is not alphabetically arranged, but by Postoffices and Routes, therefore the importance of giving the information requested, in order that errors may be avoided.

The U. S. Constitution Explained.

PART III. In our last paper, mention was made of the party animosities engendered in the strife for the adoption of the Constitution. It was indeed the first political

agitation in the country. It divided the people into two great political parties which under different names have continued to the present. In this struggle for ratification, Washington, Jay, Madison and Hamilton were champions for the Constitution; Jefferson, Patrick Henry and Randolph against it. Let us hear some of the objections urged against it by its opponent

They argued that the territory occupied by the 13 States was too large to form one government but should be divided into three or four confederacies; that the military would over-ride the civil authorities; that there was too much power centered in the general government; that the Federal government should not collect an internal, or excise tax, but should raise all its revenue by customs duties, leaving to the States exclusively the right to levy an excise tax.

This claim for the States was unreason will save considerable expense,
Within the last week there has been nine carloads of coal put on the College switch for us to unload, making fully 300 tons of coal. The College ordered it is such a very as to have one carload a week put on the switch, but instead of that they held it back until the College was practically out of coal. In fact when or limit to a single source for raising revenue. Just now Japan gives us a very suggestive idea of the cost of war-in taking Port Arthur it cost her \$30,000,000

The excise law was very odious to the anti-federalists. In Washington's Adninistration the resistance to it culminated in the Whisky Insurrection in the western part of Pennsylvania. The whisky manufacturers refused to pay the tax imposed on their product. So for-midable was the resistance to the execution of the law that Washington was bliged to send an army of 15,000 to uell the rebellion. Jefferson was highincensed at this act of the president, He said, "I expected to have seen some justification of arming one part of society against another; of declaring a civil war the moment before the meeting of that body which has the sole right of de-

He denounced the law in the following rms; "The Excise Law is an infernal ne. The first error was to admit it by he Constitution; the second to act on that admission; the third and last will e to make it the instrument of dismemering the Union, and setting us affoat choose what part of it we will adhere

The whisky rebels had a good many sympathizers among the prominent men of the country. This tax now furnishes a large part of Uncle Sam's revenue, and no one thinks of denying him the right to collect it. In like manner, time has begun in Garret county, Jan. 16, and will end in Anne Arundel, March 10, is will end in Anne Arundel, Miller as-

The company consisted of F. J. Englar wife and their sons, Fenton, Frank and Seward; Rev. and Mrs. Clarkson, D. Wolfe and wife, M. M. Norris, wife and wife, M. Norris, wife and wife, M. M. N and power in the general government. And while there is centered much more power in the Constitution than in the federation, the danger from this centralization is in a great measure neutralized partments of government; defining the prerogatives of each, and guarding against Dividing the powers lodged in the

general government into three distinct and separate departments (Executive, Legislative and Judicial) is the grand rinciple and par-excellence of our Contitution. None of the old republics had this feature. The articles of confederation provided for no President or Su-The military despotism predicted by

udders, and two overseers. The milk is come, from our well regulated standing eat more, consequently they work betarmy, nor from the militia. There are too many safeguards thrown around them. Sec. 7 of the Constitution says, support armies but no appropriation of to the lower "House" are elected every two years by the people.

And still farther the states are given brove to be above the ordinary cow.

Mr. Deitrich says that a milch cow deeds no exercise from the fact that she are the hardest to be above the ordinary cow.

With these checks and balances the states are given the exclusive right to appoint the officers of the militia when called into service.

With these checks and balances the danger of the military over-riding the ivil authorities, is minimized. There is much more danger to be ap-

prehended from our corporate magnates who are corrupting our legislators and judges and dictating the candidates we shall vote for, thus robbing the people of the sovereignty the Constitution in tended them to have. But, that good old chart that guided the ship of state over many rough seas and breakers, will, when the people assert their rights, carry them safely through the perils now staring them in the face.

In closing this paper, let me say that the Constitution of the U.S. is a marvelous instrument of wisdom and foresight. That our patriotic fathers, gathered from all parts of the country with such diverse opinions, should have succeeded in devising a plan of government containing so many provisions, yet found to answer so fully the object of its framers as to require no essential alteration in the space of 116 years! It is wonderful; more, it is miraculous! Not a single provision as it came from the hands of the Convention, except the single one changing the mode of electing

Hear what a distinguished English statesman (Bryce) has to say of our Constitution: "The Constitution of the Mayor Time U. S. ranks above every other written Constitution, for the intrinsic excellence cumstances of the people, simplicity brevity and precision of its language; its judicious mixture of definiteness in J. D. Nicodemus, of Washington; George principle with elasticity in details.

Painted Cows Sold.

Some time ago Osias Durst, a dairy man of Maspeth, in Queens Borough, N. Y., sold three cows to Bruno Ernst, by March 1, or else they cannot apply until March 1, 1906. Prior to the law being declared constitutional the survey paid for the bovines was \$350. It was not paid, and finally Durst demanded that the cows be returned. Late one miles requested to be built in these 11 back to their former owner, and everycounties is 159, and the survey experts thing seemed bright, except that Durst Fowler.—On Feb. 2, 1905, Leslie Newbare, only child of Mr. and Mrs. Harry past four months. THE WABASH CAMP.

Interesting Sketch of Railroad Construction Life.

A correspondent of the Cumberland Evening Times gives the following intersting account of how the army of men building the connecting link of the West-ern Maryland railroad between Hancock and Cumberland subsist in their construction camps. He says:
"It costs \$1,200 a day to feed the men

we have working between Cumberland and Hancock." Such was the statement made to the writer by McArthur Bros., the contractors, who have 2,629 men at work. That means \$35,000 a month. Fresh dressed beef is delivered at every camp daily, and as it requires a pound and a half a day a man it can be readily seen that the meat bill for 2,629 men is no small item. In addition to the fresh meat, there is an allowance of three-fourths of a pound of salt meat a man

daily, and that runs up into figures.
"These men however, do not live on meat alone, and possibly those who look amazed at the figures for their own store account for a week or a month would not enjoy having a bill for 75 bushels of potatoes a day, and yet that is what it takes to feed these men. Of coffee it takes 240 pounds, of sugar 600 pounds, 3,360 pounds of flour, 30 cases of corn and numerous other articles that run into big figures, the bill for butter and eggs being the one that staggers a person.

'With these men scattered along 40 miles of work it is manifestly impossible to have a central boarding or lodging place. As a result, every four or five miles, sometimes much closer, there are camps where the men eat and sleep. These camps consist of from 8 to 12 buildings, one-story frame structures covered with tar paper. As a rule the ouildings are erected in one straight row, but in some camps there are two rows

The largest building is the commissary where supplies of all kinds can be procured. Then there is the boarding house. This is usually about 40 feet long and 20 feet wide with the commissary. feet wide, with two rows of oilcloth-covered tables with benches along the sides. At the entrance to the dining room is the kitchen, with a large range and shining pots and pans of every shape hanging from the rafters. The cooks are usually editerators of Lewis F. Prugh, deceased the rafters.

"The writer ate dinner at Turncrist & first and final account.

Meyer's camp, at Sideling Hill tunnel on James M. Stoner, a Monday. Arriving late, the dining room was full, there being 60 men at the tables. At the second table there were 30 linelading the wives of some of Lydia A. S. Frownfelter and Levi J. Administrators of Gershon S. the contracters, commissary clerks, timekeepers, etc. No difference is made in the meals served to the laborers and the order to sell same. superintendents, foreman and others. The meal consisted of fresh meat, potatoes, beans, corn, excellent coffee, good butter, apple pie and pudding. Everything was well cooked, and the entire place was scrupulously clean. As the superintendents, foreman and others.

a saying fully exemplified in the camps. At the boarding house just described only Americans eat. Then there is the Aus- stock. trian section, the Italan section, etc. The Austrians will not 'mix' with the Italians, and the Americans have no deJacob J. Study, deceased, returned by The living in each of the foreign sections differs. In the camp visited four buildings constituted the Austrian section and three the Italian. The Austrians do not stint themselves on provisions and must have beer served on the table the same as the Americans have coffee. In most of their buildings they take up as much room with their beer kegs as with their personal belongings. The Italians eat comparatively little. This is attributed by the American to the Bagaries' desired. by the Americans to the 'Dago's' desire 'I prefer the Austrians to the Ital-

The unfortunate, the weak and actual crime than any other drug on ed for. morning he was nonplussed. Two that and the ignorant are able to procure all usually gave full pails were good for but they want of this nefarious drug from a pitifully small quantity, and a cow with some source, and it is wrecking their a temper as gentle as a summer zephyr developed a bovine Xantippe. Durst was fairly bewildered. He looked at the cows again, and more carefully; the marks were all there; surely those were bis cows.

Senate Passes Statehood Bills.

Washington, Feb. 7.—After a contin-Senate, at 8.45 o'clock to-night, passed the Joint Statehood bill. As passed, the bill provides for the admission of the state of Oklahoma, to be composed of Oklahoma and Indian Territory, and New Mexico, according to the present boundaries, with Arizona eliminated. New Mexico has an area of 122,580

square miles. It is as large as Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York and New Jersey. It has a population of 195.350. Oklahoma has an area of 39,030 and Indian Territory 31,400, making a state of 70,430 square miles. It is as large as New York, New Jersey, Connecticut and

Massachusetts combined. Oklahoma has a population of 398,331 and Indian Territory of 392,160. This gives a total

left as it is. A rather remarkable condition was attached to the bill admitting Oklahoma, that it must agree to adopt Prohibition as a state law for the next twenty-one years. This is generally regarded as a victory for the Woman's Christian Tem-

perance Union, as this organization strongly backed the feature. It is thought that in the joint committee an attempt will be made to eliminate New Mexico from the bill. Activity, it is understood, will be confined to doing this rather than restoring the bill to its place, William Franklin, of California, and Mrs. Edgar Jenkins with whom she resided. original form. Then, when the bill goes to conference after non-concurrence in The sp the Senate amendments, the House will insist on giving Statehood to Oklahoma only. Unless the Senate accepts this, the programme is to hold the bill in deadlock until Congress expires, and no new State will be made.

Orphan's Court Proceedings.

MONDAY, Feb. 6th., 1905.—Letters of administration on the estate of Sarah Blocher, deceased, granted unto Isaiah M. Blocher and Jacob H. Blocher, who received warrant to appraise, also order to notify creditors.

Machen Goes to Penitentiary.

August W. Machen, the first head of the entire Rural Delivery System, left Washington, Tuesday night, with eleven other convicts, for the Moundsville, W. Va., peitentiary, where he will serve a two-years' sentence of imprisonment None of Machen's relatives saw him off, but a large number of friends greeted him and in several instances offered him money, if needed.

Mr. Machen said that he had spent practically all of his money in his deense; that he never had owned any rea estate in his own name, and, therefore had none to transfer. He said that to liquidate the fine of \$10,000, which h also was sentenced to pay, he would take the oath of insolvency and spend one more month in the penitentiary. He said that his money was so much exhausted that his brothers and brothers-in-law would have to take care of his family. and that the latter would go to Westminster, Md., this coming summer. Mr. Machen added he expected he would be assigned to clerical work in the peni-

Politics in Baltimore.

The Baltimore Reform League, which has taken a prominent part in past city and state campaigns, is preparing to become active in the municipal campaign now at hand. The chief field of operations of the league will be an investigation of the records of the several candidates of the two parties for the First and The ward leaders of both parties are

slow in bringing forward candidates for the City Council. They hesitate to declare themselves for any of the few candidates who have thus far declared their ambitions. Their policy, as defined by the leaders of the two organizations, is to await until the field is full, and then to get behind those candidates in the several councilmanic districts and wards who give promise, after nomination, of provoking the least criticism. Not only is each party anxious to gain the upper hand in the two branches of the Couneil, but each is also anxious to do nothing in the spring campaign which would injure the chances of success in the fall caine in Frederick. The use of this campaign, when a bigger stake, the constitutional amendments, will be play-

A New Political Power.

The public is beginning to owe a great deal to a few bold and fearless magazines for publishing articles relative to the use of money by corporations for corrupting legislative bodies. Because these bold statements are appearing now, practically for the first time, does not necessarily mean that wholesale "boodling" of the class named is a new thing; been but newly discovered, and at the same time a new power for directing the issue, and it is a surprising fact that it appeared.

its being to them a money-losing propo- newspaper-making, rather than a fault sition. Whether magazine political of the reader. morality is the pure article, or not, it is at least taking its place, for the time, and the demands of advertisers, have and is proving immensely popular with about destroyed the typographical sothe masses who are being given an in- briety of the average newspaper, daily sight of corruption and trickery long and weekly, until it must be a positive suspected but not known face to face.

ly, with copious extracts, and help along paper which looks as if it was made for the new order of publicity from a more reading, and not for a "find the news" or less safe distance, ready to either run puzzle picture. enough for years, to know that party famous. nominees are intelligent. The much talk of an "educational qualification" has a tendency to deceive men with the idea that intelligent suffrage is the best suffrage, but it is nothing of the kind-it the following to say of President Roosemust be honest, as well as intelligent. velt; With the recent startling disclosures as to corruption in Massachusetts and Rhode Island—where educational qualifications protect (?) suffrage—for our infications protect (?) suffrage-for our in-

a potent force for good government. We must know, absolutely, that those who are given public place are incorruptible, and in order to know this we are made. In many sections it is a and praise the man in the White House. nation. In order to secure the prizes, one must be, through thick-and-thin, a party man. he must be loyal to "the organization" and not have rebellious opinions of his own; he must first be satisfactory to the "bosses," to state the situation clearly, or his virtues must seek

The only, and plain, reason why legislatures are bought, and laws favorable to selfish interests enacted, is simply because the material constituting our nomstrong for the best interests of the peo- at McKellip's Drug Store. ple. Right here there must be a dissassociation of long-standing ideas which connect party success with the best general results; there must be a separation of the "bosses" of the party from the masses of the party, for these two are no longer synonymous as representatives of the best attainable results from popular

The solution, and real conclusion, of the whole business is that the people must "butt in" where caucuses and primaries are being held; they must start, from the ground up-and that is the primary election-to send the best men to party conventions, irrespective of whether they are the most aggressive party workers or not. It has for too long been an established custom in politics that the "workers" must have the honors; it is this custom which is directly responsible for all the boodling and rottenness that we now complain of. If parties cannot be held together without a system of rewards to the faithful, then let the parties go to perdition, for the good of the Nation is of much greater importance than the success of any one political party. But, they would not go -they would simply make up their minds to be good.

Drifted Roads.

the town authorities; as the public roads | ted to stand between the people and the are more in the line of the streets of a President? receive so little direct benefit, there is no | The one strong argument against the good argument why public travel should present electoral system which has stood not be maintained at public expense, for | the test so well is that in favor of chooseing Electors by districts, say congress ional districts, with the Electors standing for Representatives-at-large and for the two Senators to be chosen at large, instead of the present method of electing all Electors on a general ticket. The method would reduce the units or political divisions in a presidential election from States to districts as to most of the Electors, and would approach nearer than the present method to an expression of popular sentiment. Under the present system, where thirty-four votes for President go as the state of Pennsylvania goes, there is too great a concentration of interest and of campaign funds

on pivotal and doubtful States. But we look for no change within the present generation in the electoral system, which in its deliberate formality seems to accord well with the dignity of the office of the Chief Magistrate, who is to-day the most powerful governing official in the world; and the success of the electoral machinery is to be judged by the results-which may be stated in the language of the German historian,

"Nowhere in human annals can there be found so long a line of rulers as the series of the Presidents of the United States, not one of whom has proved unworthy of his high office, and every one of whom, without exception, has been capable, patriotic and devoted to the interests of his country."-Phila. Ledger

Mr. Kirksey's Recommendation. Mr. Kirksey writes:-I give a positive guarantee with every box of Rydale's Stomach Tablets and Liver Tablets I sell, and have never been asked to refund the money in a single instance.

The President on Indian School Appropriations.

is as follows various Catholic and Episcopal schools were brought to my attention by certain cclesiastics and laymen, who requested "What nettles some of the big men of the Interior Department to distribute behind him. It is a matter of common those schools. The Attorney General decided that this request was illegal and could not properly be granted.

Over a year afterward the request was made, originally on behalf of certain Catholic schools in 1903, also on behalf of a Lutheran school in 1904, that where | if the five or six real statesmen in Washthere were Indian moneys held in trust for the Indians by the Secretary of the Interior, the interest on these Indian moneys being distributed among the individual Indians or in such other ways his face. . . . Nearly every man, with known condition that the best men are not nominated to office because they

As one Senator put it to-day; "If we don't bow down and do whatever Mr. direct, and where certain of the Indians don't bow down and do whatever mill netitioned that the menous so distributed in the condition of the Indians don't be don't be a senator put it to-day; "If we don't bow down and do whatever Mr. direct, and where certain of the Indians direct, and where certain of the Indians don't be don't uted to them should be used for the support of the particular denominational school which they desired their children o attend, this petition would be granted. The question raised was, of course, wholly different from that originally with the people—Democrats, as well as Republicans—and the indications are all and of the Catholic church. This new torial circle to-day who controlled the request was submitted to the Department of Justice, and the Department decided that the prohibition of the laws as to the use of public moneys for sectarian schools did not extend to moneys belonging to the Indians themselves and not to the public, and that these moneys belonging to the Indians themselves might be applied in accordance with the desire of the Indians for the support of

the schools to which they were sending their children. There was in my judgment no question that, inasmuch as the legal authority existed to grant the request of the Indians, they were entitled, as a matter of moral right, to have the moneys coming to them used for the education of their children at the schools of their choice. Care must be taken, of course, to see formality; a cumbersome and inaccurate | that any petition by the Indians is genmethod of choosing the President by uine, and that the money appropriated popular vote or a denial of the inherent for any given school represents only the popular vote or a denial of the innerent pro rata proportion to which the Indians making the petition are entitled. But if Executive. The insistence that the these two conditions are fulfilled, it is wishes respected when they request that

Value of Advertising. Advertising space in a newspaper, says the Helena (Mont.) Record, is a commodity. It is a thing of value to the man who uses it, and he bargains for it as he would for anything else of value. If he needs it and believes it is worth the price asked for it, he buys. If he does not believe the bargain would be to his advantage he refrains from buying.

It is exactly as if the merchant were bargaining for any other thing he needs in his business. He makes his choice of store fixtures and he selects his stock by the same rule.

Just as in the case of the staple goods through. that line his shelves and fill his showcases and are piled on his counters, the advertising space he contracts for has a value, based upon quantity and quality. The business man buys advertising

space in the newspaper at a certain price per inch, the price based upon the circulation of the newspaper and the quality of its subscription list-quality having particular reference to its availability for If it reaches the class of people he

specially desires to interest in the kind of goods he has to sell, and reaches the people in the locality in which he specially desires to do business, and if it reaches more persons of the kind he is looking for, in the community he is interested in than another newspaper does, then it is worth more to him. He pays according-

Business men do not advertise 'just to help the editor along,' as they did in the early days of the clarions of the crossroads. The advertising expense account is a part of the well-regulated business, and it is gaged with a view to making a

Politics in Washington.

Writing on "The Game of Politics,", as played on the nation's board at Washington, the clever woman who is using 💰 udonym "Marie Columbia," in The Delineator, in the March number has some remarks of special interest in | * The pie was good; his wife regard to statesmen and politicians in general and women politicians in partic-The President has written officially to ular. She says: "Above all others in issue, which has already gone the un- granting contracts for the education of and the politician abound. One naturstates that the Indians have the moral for, in most cases, it is a far cry from | pill he takes is Mckinney's. right to educate their children at the the politician to the statesman. A polischools they choose. The letter, in part, | tician never by any chance considers | anything but the next election, while the "Early in 1902 petitions on behalf of statesman does sometimes think of the next generation. There always seems to have been some economic principle at work in Nature in her creation of

Perhaps it is with statesmen as Swift says it is with men of genius, that never more than five or six geniuses appear in an age, and that if those five or six were united the world could not stand before them. So it would be with statesmen: ington were united in one commo good, the Old Adam that is abroad in our midst would be compelled to wash out regard to riches or section of country, who once comes to Congress i 'bitten' with the life, and even if he does not feel poignantly the charm of the 'sounds and sweet airs' of Washington, his wife does. Hence there is the woman in politics. For is there not a gentle and gracious woman in the sena-

husband thither in his stead? It is a game that everybody more or ess takes a hand in in Washington, and one that women particularly excel in. It is the rule and not the exception for gates, we would say:women in all walks of life to be well posted in things political, from the highest, haughtiest dame of the smart set down to the old negro mammy of the 'Ma'sh' market, who sells, over the top of a barrel, bunches of herbs she calls 'Adam-and-Eve,' which, she says, with a shrewd, sharp look as though guessing your calling, 'will make glue strong enough to guarantee any politician sticking to his job up yonder at the Capitol.'

woman vote of her state sufficiently to

The Sunshine of Spring. The Salve that cures without a scar is Burns, Boils, Bruises and Piles disappear before the use of this salve as snow before the sunshine of spring. Miss H. M. THE HERALD PUBLISHING CO.,

Prayer Meeting Topic For the Week

By REV. S. H. DOYLE. Topic.-Christ a servant, and we are his servants.-Phil. ii, 3-11. A servant! The word has a distasteful sound. To be the personal helper of another or, worse still, in complete subjection to him or his slave has always been most repugnant to the nat-

ural human heart, and yet this word has a large place in the religion of Jesus Christ and has thereby come to have an exalted significance and to designate a relationship that is most desirable. Indeed, after all has been said the position of servant has always been a dignified and exalted one. The highest ambitions of men, rightly considered, have been to serve the person or the cause to which they were most deeply devoted. Love has ever desired to find its expression in service. "Ich Dien" (I serve) is not only the motto of one royal household, but the true insignia of all possessed of real kingly characteristics. Real royalty lives to serve God and its subjects, no matter where it

may be found. In our lesson Paul exhorts the Philippians to cultivate the Christian grace of humility that finds expression in a desire to serve rather than to be served. He exhorts them to unity of heart and mind by having a true conception of their proper relations to each other. Strife and vainglory are to be omitted from their lives. Each person in true humility is to consider every other person better than himself and to consider the interests of others before his own. Could the world have such a true and unselfish humility it would be transformed, and it should be the desire and aim of every Christian to practice, preach and spread such real Christian conceptions of man's relation to his fellow men. Such a condition of heart and mind will result in service, the true and final goal of the Christian

As a spur to the possession and exercise of such a spirit Paul uses the example of Christ, "Let this mind be in you, which was also in Christ Jesus." 1. Christ was a servant. He came into this world to serve it. In His own language He came "not to be ministered unto, but to minister and to give His life a ransom for many." He came to serve and to die a ransom for those whom He served. Though He was in the form of God and could claim equality with God and not do injustice to the Father, yet He "took upon Him the form of a servant!" And to what lowliness His service descended. "He humbled Himself and became obedient unto death, even the death of the cross." Humility, obedience-obedience even to death, and that the despised death of the cross-these were the characteristics of Christ as a servant. one another in His name and for His sake?

2. Christ's humility led to His exaltation. "Wherefore God hath highly exalted Him." We serve ourselves best by serving others best. The man who seeks happiness in selfishness misses the mark, while the man who unselfishly lives for the happiness of others finds the secret of his own hap-The road to exaltation is not through vain personal ambition, but Druggist, Taneytown, Md. through humble self sacrificing service. Service exalts the king in the eyes of his people, the soldier in the eyes of his countrymen, the disciple to his master and the child of God in the sight of his Heavenly Father. "He that exalteth himself shall be abased, but he that humbleth himself shall be exalted." Service, therefore, is not only a Christian duty, but it is profitable. Let us therefore serve Him who served us by serving those who are His.

Matt. v, 1-3; xvi, 24-28; xx, 17-28; xxiii, 1-12; Luke xxii, 24-28; John xiii, 1-16; Heb. xii, 1, 2; I Pet. ii, 18-25; I

Notes at Random.

In Rayner's supply stores, Hampstead, Ireland, is a Christian Endeavor society that meets at 10 p.m. Its members are unable to attend the Christian Endeavor meetings in their churches and so have formed a society at their place of business.

New York city Endeavorers gave last year to missions \$9,340.58 and to benevolences \$4,850.63. This was at the rate of \$2 a member, a magnificent

California Endeavorers have undertaken to support an Endeavorers' hospital, and the Santa Clara Endeavorers start the good work by maintaining a room for a year.

Next Christian Endeavor day every Endeavorer in Great Britain is expected to give an "Endeavor penny" for the extension of Christian Endeavor at home, on the continent and in India. If all give that little sum the to tal will be \$5,000.

Do not expect to "say something" in the meeting without taking time to think of what you are going to say before the meeting. Even a short talk needs prep-

All Run Down.

HIS is a common expression we hear on every side. Unless there is some organic trouble, the condition can doubtless be remedied. Your doctor is the best adviser. Do not dose yourself with all kinds of advertised remediesget his opinion. More than likely you need a concentrated fat food to enrich your blood and tone up the system.

Scott's Emulsion of Cod Liver Oil

Convention. [Tune, "O Mother, Dear, Jerusalem."— Materna.]

O Baltimore, in Maryland,
Fair city of our state,
A privilege is granted thee
In which can all partake.
A mighty host, with legions strong,
A consecrated band,
Will visit thee, with purpose true,
From o'er this great broad land.

Sweet fellowship and thoughts of God, Communion of His saints,

A deepening of the spiritual life,
To grow like Him in grace,
Will be the wish of every one
Expressed in song and prayer,
And may our hearts be tuned to sing

And speak His praises there! Endeavorers, then, of Baltimore,
Prepare for this great feast,
Be worthy of the name you bear
And join in labor sweet
That Leave Christ was released. That Jesus Christ may reign supreme

In hearts of young and old.

And our dear city may receive
Great blessings yet untold.

—Frederick Ohrenschall.

Farm Home Problems. We ought to do our best to make farm ng profitable, but it will not do to make noney the sole object of our labor. This sespecially true if we have children course, a few bones saved from the emory of their early days on the farm. I the joke a success. o bend every energy from daylight to ark, from one year's beginning to another, to the getting of money, is demor-lizing to the farmer, to his wife and oubly so to his children. Life's begining is the most important era.

If to the young it be clouded in gloom, f a home where the only object of living to get money, the shadow rarely ever ts from their minds. This is one of the rincipal reasons why so many young cople leave the farm. Their lives in the d home were a ceaseless grind, unreved by anything which touched the ender side of nature. What then should done to change these conditions. If the house is old and you are unable grow around it, and make such improve-

will cost only a little time to make eautiful and will add greatly to the leasure and home pride of the family. iside make the house homelike and at ractive and have plenty of books, newspers, magazines and music. Every evening let there be a gathering f the family in the cozy sitting room n informal entertainment, with reading oud by some one, singing and ever lancing—auything to inspire sociability and cause them to forget the ills of life We have no right to entail upon our nildren the heritage which many parnts do when they cause them to toil un asingly and never provide them with he comforts and amusements at home o necessary for their welfare and happi ess and by so doing teach them to hate

fe on the farm. There can be little to mar the happiess of the farmer who can maintain a omfortable home and who is blessed with good health, a loving wife and hapy children and whose ambition is to live rightly, honorably and peaceably with Can we, then, refuse to serve Him and | all the world. - Agricultural Epitomist.

A Cold, A Cough—Consumption. A brief told history, but true, Rydale's Cough Elixir will prevent this happening to you. It will check the progress of a cold at once, prevent the cough becoming deep seated, and thus ward off conamption. This modern scientific remedy kills the germs that cause throat and ung diseases, and by its stimulating and onic effect upon the respiratory organs helps nature speedily restore these organs to robust health. R. S. McKinney,

The Millinery of Spring.

Whimsically upturned brims characterze the hats of the moment, some of which are unusually attractive. Hats of the Colonial order remain favorites beause of their general becomingness. The ostrich feather in its latest guise is nanipulated into the flat shape of a quill and used in quill fashion to trim the nartest walking hats.

The Spring colors in millinery are won-lerfully attractive. That brilliant hues vill be most favored is certain. Bright olored headgear when worn with a har-nonizing costume is vastly becoming, and the idea has an economical interest since one hat may be made to do duty with several costumes. A pinkish mauve which in the darker tones is closely allied o the Burgundy shades, is a modish bring color. The new pinks and reds here are shown tailor models in straw hat will freshen up the mid-season's cosme or provide the touch of completion to the new street suit. Both rough and fine, satiny straw braids are used to make ese early season hats, and all the ashionable colors are procurable. The mixed straws are especially pleasing—several shades of one color or contrast-

eator for March. When He Goes First.

as in everything else, there are excepas to the whys and wherefors. For example, a man always precedes a woman out of a crowded car and gets

of course, he never precedes her from a room. It is wholly unnecessary and would be the height of bad form. An English custom that is gradually aking its way here is for a man to go rst into a restaurant, leaving the woman follow. The old American fashion ould not have countenanced this, but has a most excellent reason, as it lows the man to select the table. n and not with the waiter.

In many places such doors are opened and more profit seems to come from y pages, but when they are not the man oes through first and then stands hold-than is possible in any other day. g it wide open for the woman. This he cannot do if he is behind her,

or he can push it only the length of his arm, and that over the woman's shoulder, which is far less convenient for her than the new way. When a door opens out the man, of course, always

In spite of the discussion that arises always precedes a woman in going up egg producers, stairs. In going down he follows. He As the pullet leads the way down the aisle of a theatre, ducing period be careful not to have the woman following, and when he them too fat. reaches the place where their serts are he stands and waits for the woman to take hers. The same mode of procedure obtains in a church.—New York Evening mash food make a fine addition to the

Maryland Muskrats.

Practically all of the muskrat pelts

s possible from the cold while in the

trenches or on the firing line, and, conquently, the fur caps, heavy fur gloves

NEW SHORT STORIES

Blaine's Ready Wit. James G. Blaine was a most versatile political orator. He would speak many times a day from the train, which stopped at every important place, and have something new to say each time. He carefully thought up his speech between stations after a brief talk with the committee of the town he was coming to and then corrected immediately afterward the notes which were taken by his own stenographer.

Many people suffer for years from 1884, "I want you to introduce me all heumatic pains, and prefer to do so through New York, because you are alrather than take the strong medicines ways surefooted." I appreciated the compliment as well as the difficulties of the situation. I introduced him at

"For instance, the chards of the world.—Chicago Tribune. derby, of course, takes its name from Derby race track; the billycock from Sir William Coke, who introduced it; the beaver from the fur from which its predecessors were made; the"-"But," interrupted one of his listeners, "how did that old, disreputable wideawake brimmed hat of Blank's

ever get the name wideawake?" De Mille thought hard for a moment scanning the dilapidated headgear "This particular hat is probably called a wideawake because it is so utterly devoid of any 'nap.' "

It Wasn't Duck.

CHOICE MISCELLANY

The "Undesirables." Not a few Britons will read with envy the official statistics just published at Washington showing the manner in which foreign undesirables are dealt with in the United States. Last year very nearly 8,000 of these unwelcome guests were shut out from American hospitality, while 779 others who had previously gained admission were returned to their native countries as unfit for American citizenship. The rejected included paupers, physically diseased persons (there were 1,500 of these incompetents), convicts, the insane and imbeciles-in short, an exceedingly miscellaneous assortment of human rubbish, which, if allowed to land, must have, as in England, proved an intolerable burden to the indigenous population. But there is far nore room in the United States than our cramped and overcrowded isles for continental riffraff. Last year the great republic accepted and digested over three-quarters of a million of desirable immigrants from Europe-an utter impossibility, of course, for the United Kingdom. But with all this readiness to receive really valuable

> wage rate in the unskilled labor market,-London Globe. Stanley's Last Camp. After a long search over the wilds of Dartmoor there has been found at last what Lady Stanley desired to mark the grave of Sir Henry M., the great explorer. This is a monolith twelve feet long, four feet wide and two and a half feet thick and weighing six tons. It seems so far to have defied the finger of time and so promises to defy it longer still. Lady Stanley would have a stone that was "fashioned by the

> ages, tempered and colored by time and untouched by man. " The long looked for object was found on a farm lying recumbent on the borders of a natural roadway. Three of its faces had been exposed for countless generations. There were considerable difficulties in the way of its removal from Devonshire to Stanley's grave at Pirbright, but they were overcome. The stone now stands in the quiet village churchyard, a testimony to the logic in Lady Stanley's grief and desires and therefore a fitting sign for the resting place of the African wanderer. The inscription bears simply the name so familiar to the world. Beneath it are carved the words "Bula Matari" ("the Rock Breaker"), Stanley's sobriquet in the dark continent.

New Zealand's Great Geyser. One of the wonders of the earth is the gigantic geyser at Rotura, New Zealand, known as Waimangu. It made its appearance about two years ago and is situated near the one time famous pink and white terraces of Rotomahana, whose beauties were swept completely out of existence in the terrific eruption of 1886. The crater out of which the geyser issues is fully half G iner Building. an acre in extent and of enormous depth. When in eruption the whole of the gigantic funnel is filled with a huge column of black boiling mud and stone that shoots in the air to a height skill?" he asked. I told him I was born of nearly 1,000 feet, while the cloud of steam which accompanies it rises in calm weather several thousand feet.

sight of a lifetime. The awful force manifested by the ejection of the vast are so arranged as not to differ much come in from twenty-five to thirty roar of steam and hurling rocks add to ability.

It is often said that Russians are soldiers "born." Occasionally, however, illustrates that very possibility, and shows the necessity for having the artifithe genius of Irving, but the deepest or in Moscow was in one of the side cial standard. Sled Attachment For Bicycles. Sportsmen who are tired of skating can turn their attention to a newly invented device-a sled runner attachment for bicycles-designed so as to transform an ordinary bicycle into one that can be run on ice or snow. It can be attached to any of the bicycle frames in common use and is adjustable to any size machine. The forward wheel and tire are displaced by a runner similar to a sled runner, while the rear portion also has a double runner. Fastened to the back wheel is a tire having spaced spurs at suitable intervals to engage the snow or ice, the tire being inflatable as in the ordinary bicycle. The spurs are alternately acute contain several situations warranted to and obtuse in form, or each alternate The sharper spurs will penetrate the Ernesta Delsarta, Von Possart's snow and ice more readily and insure laughter, who was a comparatively the requisite grip, while the auller been engaged for the Dusseldorf Op- over well beaten snow covered roads with great speed and ease and without jarring or concussion arising from any irregularities in the surface traveled

A Pleasant Social.

(For the Record.)

A Pleasant social was given on Tuesday night, Feb. 7th., at the home of Cornelius McDevitt, near Frederick, in honor of their cousin, Jesse Bear, of Baltimore. After spending many hours in social conversation, music and various games and also a cake walk, all were invited to the dining room where they found a table laden with cakes, candy and cocoa, after which good by was said and all returned to their homes much pleased.

Those present were Cornelius McDevitt, wife and two sisters, Mrs. Iva Fuss, wisses alverta Staley, Elsie Fox, Katie Bell, Elsie and Maud Ray, Lillie Zimmerman and Jessie Fink, Messrs. Fenton Harris, Elmer Staley, Jesse Hoover, Willie Fox, Upton Delaughter, David Smith, Willie, Eddie and Harry Zimmerman, Charlie Sheetenhelm, Jesse Bear, Eddie, Earl and Grayson McDevitt.

JAPAN'S SPY SYSTEM.

Queer Story of Some St. Petersburg Tea Merchants.

A good deal has been heard from time to time of the extent to which the Japanese pushed their spy system, both in Manchuria and Russia, before the war. The accuracy of the following story is guaranteed by the Matin: Toward the end of 1898 a Japanese from Kiusiu arrived in St. Petersburg and opened a tea warehouse on the Nevsky prospect. Shops of this kind simply swarm in the Russian capital, but all the same the Japanese prosper-

MALARIA.

It has recently been discovered that the issue. germs that produce Malaria, breed and mul-germs that produce Malaria, breed and mul-tiply in the intestines and from there spread throughout the system by means of the throughout the system by means of the blood. This fact explains why Malaria is hard to cure by the oil method of treatment. Quinine, Iron, etc., stimulate the nerves and build up the blood, but do not destroy the germs that cause the disease. Rydale's Tonic has a specific effect upon the intestines and bowels, freeing them from all disease breeing microbes. It also kills the germs that infest the veins and arteries. It drives from the blood all poisonous matter and makes it rich and healthy.
