The damage suit of Adam Long against the Western Maryland Railroad Company came up in court in Hagerstown, on Wednesday. Long sues \$3,000 damages for personal injuries alleged to have been sustained at the hands of Detective Cross, an employe of the Western Maryland, when en route from Pen-Mar to Hagerstown last August 13. He alleges that the coaches were crowded, and he, with a number of others, was standing on the platform of one of the cars; that Cross came along and threw him into the car, his head striking a seat, and causing him to sustain serious injuries.

### Carelessness.

In this age of hurry, when matters of the utmost importance are decided flagrations of recent years have not been quickly with a few words, prompt attention to details and the careful observance of hastily made promises are matters of serious consequence. The trouble, for there are so many things to be done, now, within a short time, that decision and accuracy are of such prime importance that their neglect, even in small matters, is almost a crime.

"I forgot," or "I made a mistake," or "I thought it did not make much difference," are apt to be connected with such serious results that the one who makes light of the expressions is likely to have cause for regret, if not to be actually answerable for serious trouble. Thoughtfulness, and care of details, therefore, are most valuable adjuncts to character, and are perhaps of more value than any others which enter into the make-up of the successful man of the present.

The lazy man, of course, forgets because it is too hard work to remember, and the light-head is simply not responsible; and, when such persons neglect duties the probability is that there is the wide distribution of risk. Speculalittle real harm done, for the rule is that | tive insurance, which may, or may not, they are known and are not trusted | with important affairs. ### An Unfortunate Clash.

The unpleasant, not to say undignified controversy generated during the discussion of the rate bill in the Senate ought to take the shape of a warning, and repetition of events which led to the elaborate explanation contained in the letter of President Roosevelt to Senator Allison would be unnecessary if proper segregation of duties of different departments of the government were maintained. The Constitution prescribes the methods by which legislation is to be achieved. The Executive is to inform Congress from time to time of the state of the Union, not secretly or by batches or by faction or party, but in an official manner. Strong as Mr. Tilden was in 1876, the yoking of Mr. Hendricks with him

So far there has been no speculation as to the tail of the next Republican ticket. Both New York and New Jersey have claims. One thinks of them instantly after assigning first place to Indiana, Ohio, Illinois or Wisconsin. The one is the great center of business interests and activities, extending throughout the country, and the other is a sort of suburb of New York, where the same influences prevail. Mr. Hobart proved a lower of strength in 1896 because of his arge business connections in the two states, while Mr. Roosevelt, four years later, was of equal, if not greater, value

The Truce of God. One of the most curious of the many queer mediaeval customs was that known as "the truce of God." From what we have been able to learn of it the custom appears to have originated as an outgrowth of a desire to protect year 1027. up to 101 degrees inside of the first twelve hours, then gradually increase the heat until you have reached 1021/2 to 103 degrees on the fifth day. Now you will observe that the animal heat has begun in the egg and less heat is required in the egg chamber. See to the regulator now, and adjust it again 102 to 103 degrees. After that time it is not necessary to maintain the heat as regularly. I think great injury is done to the hatch by rough usage during the first few days. Almost every machine has an automatic turning rack. This I do not use until my eggs are all tested out. I lay the eggs in compact rows, the large end up and slightly inclining. and each time they are turned I turn each egg separately by hand, and why not? They must have time to cool, and we may as well be employed turning the eggs while we wait. WASHING GINGHAM.

How Dresses of the Material May Be Successfully Cleaned.

In washing nice gingham dresses or waists there are four things to be avoided-hard rubbing, strong soap, hot water and hot starch, says a writer in the Christian Work and Evangelist. Ginghams shrink considerably, and therefore allowance should be made in making. If colored garments are taken singly and rubbed out quickly through a light suds and after wringing are plunged at once into cold hard water the fading process is at once arrested. Then they must be rinsed in cold water slightly salted to which a little vinegar has been added. The former sets the colors, and the latter brightens them. If grass stains are found upon the garment they may be removed by using alcohol, if taken while fresh, but an old stain should first be rubbed with lard and then with from the fifth to the tenth day; I like should be washed through thin starch alcohol. Delicate colored ginghams rinsed in soft, cold water and hung to dry in a shady place, as few colors can stand being exposed to the sun

while damp. To wash the pretty striped and checked gingham dresses successfully rub them lightly through a strong pearline suds, made especially for them; then rinse in clear warm water immediately after they are washed, turn inside out and put them through good clear starch that has been strained, and dry as soon as possible. When perfectly dry sprinkle evenly, roll up a short time and iron on the wrong side over a thick ironing cloth. If the dress is trimmed with embroidery iron the rest of the garment first, then dampen the embroidery and iron on the wrong side over a thick flannel. This will cause the figures of the embroidery to stand out in bold relief, and the dress will look as good as new. Tucks must be pulled straight and ironed on the wrong side first and then on the right side, and they look better if a knife is run under the tucks to keep them from

It is often the case that people meet with accidents and bruises that cause disfiguring discolorations from which they suffer not a little embarrassment and annovance. It is worth while to know that there is a simple remedy and one quite within the reach of every one, says the Pittsburg Press. Imme diately after the accident mix an equal quantity of capsicum annum with mucilage made of gum arabic. To this add a few drops of gylcerin. The bruised surface should be carefully cleansed and dried, then painted all over with the capsicum preparation. Use a camel's hair brush and allow it to dry, then put on the second or third coat as soon as the first is entirely absorbed. A medical journal is authority for the statement that if this course is pursued immediately after the injury discoloration of the bruised tissue will be wholly prevented. It is also said that this remedy is unequaled as a cure for rheumatism or stiffness of the

neck. Fertilizing Orchards. Ground bone-not bone meal-applied at the rate of 600 pounds per acre on a Missouri orchard eight years ago still shows its effect on the trees. This is because the particles of bone are given off slowly, the large application providing a supply for years in succession. A combination of 600 pounds of ground bone and twenty bushels of wood ashes (the ashes to be applied every year) should enable the orchard to bear large crops, provided a clover crop is grown in the orchard and plowed under once every four years.

## Birthday Surpise Party.

(For the Record).

At the home of Mr. C. H. Valentine, on the Keysville road, on Morday evening, 14th., Mr. V., gave his wife a real birth-day surprise it being kept dark to her until the guests commenced to come in. Mr. V. pretended he was going to band practice and went away in the evening. Everything passed off nicely; a very nice table was laden with flowers cake, ice cream and lemonade for the guests, who remained until an early hour in the morning.

## I'm Not Alone.

BY REV. W. H. ENGLER. I'm not alone, no not alone, For Christ is with me thro' all time; For in my Soul I hear His voice, He bids me hope and trust in Him. 'm not alone in life's dark hour, His presence always is with me; Where'er I am, where'er I go, I feel His Spirit ever near.

Whether I'm home, on land or sea, His pleasant voice it speaks to me; In troubles deep I hear His voice, In shades of darkness I rejoice.

Calm and serene my soul remains, His presence banishes all my fears; In all my journey thro' this life, His love and peace keep from all strife. Thro' all the storm-clouds here below, Tho' rugged winds do fiercely blow; I know that He is always near, To calm the storms and lead me thro'.

glian News.-London Notes and Que-The Champion Parrot. A woman in a London flathouse was accused of singing hymns to her parrots for the benefit of their souls. This recalls to the London Chronicle the most accomplished parrot in history. It belonged to Colonel Dennis O'Kelly and was famed for its whistling of the One Hundred and Fourth Psalm. When the colonel died in 1787 a large proportion of his obituary notice in the Gentleman's Magazine was devoted to this remarkable bird, which got another

considerable notice of its own when it died fifteen years later in Half Moon street, Piccadilly. This parrot could also whistle "God Save the King" and "The Banks of the Dee" and would go back and correct itself it it got a note wrong. It could even answer questions, and its master was said to have

Ourious Methods That Were Adopted In Sickness and Death. A method much in vogue in Scotland at one time of ascertaining whether a rickness would prove fatal was to dig two holes in the ground, one called the quick grave, the other the dead hole. The sufferer was then placed between the two, and the hole toward which he turned indicated what would be the outcome of his malady. During the interval between death and burial hens and cats were kept carefully shut up. A person meeting these animals at such a juncture was doomed to blindness in the future. Moreover, unless a stream divided the two houses, farmers frequently refrained from yoking their oxen or horses before the body was "laid under the turf of truth." Many women preserved, with the greatest reverence, their bridal attire to cover them in the coffin. Bread and water were placed in the chamber of death, for during the night prior to the burial the spirit of the departed one came to partake of them. Candlelight. Hail, candlelight, without disparagement to the sun or moon, the kindliest luminary of the three, if we may not style thee radiant deputy, mild viceroy of the moon! By the midnight taper the writer digests his meditations. By the same light we must approach to their perusal if we would catch the flame, the odor. Night and silence call out the starry fancies. Milton's "Morning Hymn In Paradise," we would hold good wager, was penned at midnight, and Taylor's rich description of a sunrise smells decidedly of the taper.
