

CHRISTIAN ENDEAVOR.

Prayer Meeting Topic For the Week
Beginning Sunday

By REV. S. H. DOWDY.
Topic—God's omnipotence—Ps. cxxxix, 1-12.

The word omnipotence means everywhere present in short, that God is everywhere present when the word is applied to Him. This is one of the great attributes of God. He is everywhere. (1) He is everywhere in what is called His immanence. This does not mean pantheism or that all things are God and the only God, but at the same time the spirit and power of God are present throughout the entire natural world, in every flower and plant and tree. (2) God is everywhere present in that He sees the entire universe from the depths of the human heart to the highest heavens. His spirit also dwells in our hearts if we are His through faith in Jesus Christ. His Son, who loved us and gave Himself for us.

The psalmist most comprehensively sets forth the omnipotence of God. (1) He applies this truth to the individual. "O Lord, Thou hast searched me: Thou hast known me: Thou hast known my path and my lying down and art acquainted with all my ways." We can do nothing that God does not know; we can go nowhere without finding Him present. (2) He applies it to our hearts. We can think no thought that He cannot read and see and know. How careful, therefore, we should be of our thoughts, words and deeds: "Thou God seest me" should lead us to make our lives just what God wants them to be. (3) The psalmist also applies this great truth to space. "Whither shall I go from Thy spirit?" If to heaven, if to hell, if to the uttermost parts of the earth, there is no escape from Him. We cannot sin against Him or reject His Son, our Saviour, and escape God. Adam and Eve tried to hide from God, but they were unsuccessful. So has every one else been since the first sin. The only way to flee from God is to fly to Him, and then only can we find peace of soul and forgiveness of sin. As Augustine said, "Thou hast made us for Thyself, and the heart is restless till it is in Thee."

BIBLE READINGS.

I Kings vii, 22-27; Isa. lvi, 1, 2; Jer. xxxiii, 20-24; Matt. xviii, 19, 20; Jeremiah, 23: 13, 15.

Three Foreign Notes.

Lord Langford, president of the committee in charge of the last Irish Christian Endeavor convention, in his address of welcome said that the history of the Christian Endeavor movement is one of the most glorious of stories and that God's providence has been very apparent through it all. In a recent address Rev. John Pollock, president of the European Christian Endeavor Union, said that the Christian Endeavor movement is a name for the society after the first of the Christian Endeavor pledge, "I will strive to do," etc. It was after writing that word "strive" that the name thought struck him to call it a society of Christian Endeavor—a society of Christian strivers.

India—Christian Endeavor tells a soul stirring story of how the Christian Endeavorers of one society compelled the universal fear of cholera among the natives and went out in Christ's name through all the heathen country as the disease appeared, to bring peace and comfort to the sick and their friends, and instead of timidity and distaste they found ever increasing joy filling their hearts as the opportunities multiplied and were seized.

A Byproduct of the Boer War.

An interesting testimony to the value of the Endeavor movement is given in the Sunday at home by the founder, Dr. F. E. Clark, describing work among Boer prisoners in the Transvaal. In 1901, when there were nineteen societies, with a membership of nearly 1,000. In Ceylon ten societies were formed, with about 800 members, while six island societies in the Bermudas had 500. In the Transvaal, where the Boer war was in progress, 175 young men giving themselves to missionary work. On their return to South Africa a missionary institute was promptly provided, for the missionary spirit had come to pervade the whole Dutch church as well as the prison camps. This byproduct of the Boer war will prove its noblest legacy. "Out of the eater came forth meat, and out of the strong came forth sweetness."—Christian, London, England.

Mountain Mission Note.

John Willis Baer, in an account of a visit to the Appalachian mountain region, says, "I saw a man who gave me by his life a lesson in the mountain still, whose past lives had been stained with sin, but who had given his heart to Jesus Christ, and at the table of the Lord it was a rare privilege for me to sit with them and listen to their testimony of the saving grace and power of the Son of God."

New Blood Constantly.

"A Christian Endeavor society," says the Texas Christian Endeavor, "needs new blood constantly. A society consisting of the same individual members for several years without change is sure to be sluggish and lifeless, stiff in the joints and slow to mend. And it doesn't matter how good the quality of those members either."

Willian H. Stevens declared that

one advantage of the Christian Endeavor society is that it brings so many admirable young men and young women together, giving them a chance to get acquainted and resulting in so many wise and fortunate marriages.

How to Weigh Without Scales.

To weigh without scales remember that ten eggs weigh one pound; four ounces of an egg weighs one ounce; one pint of sugar weighs one pound; one quart of sugar weighs one pound; one pint of brown sugar weighs thirteen ounces; two cups (level) granulated sugar weigh one pound; two cups (level) sugar weigh one pound; one pint liquid weighs one pound; one pint chopped meat weighs one pound.

How to Make Iceing.

When making iceing for cake, after beating the whites of the eggs and boiling the sugar and water to what you think is the proper consistency, or until it forms a hair when dropped from a spoon, pour the mix, little by little, into the beaten whites, beating thoroughly. Then place the stepback on the stove, repeating this process until all of the sirup has been used.

Rickets.

Simply the visible sign that baby's tiny bones

are not forming rapidly enough.

Lack of nourishment is the cause.

Scott's Emulsion nourishes baby's

entire system. Stimulates and makes bone.

Exactly what baby needs.

THE SUNDAY SCHOOL.

Lesson X.—Third Quarter, For Sept. 8, 1907.

THE INTERNATIONAL SERIES.

Text of the Lesson, Num. xxi, 1-9. Memory Verse, 9—Golden Text, John iii, 14, 15—Commentary Prepared by Rev. D. M. Stearns.

[Copyright, 1907, by American Press Association.]

The fourteenth chapter ends with the record of some who insisted on going up to take the land when they found that their unbelief was to cost them forty years in the wilderness, so they went in their presumption and were slain.

The fifteenth chapter also tells of the presumption of one who dared to break the Sabbath by gathering sticks, and it is plainly stated that disobedience is presumption and despising the word of the Lord (Ex. 30, 33). This last sin led to the plagues in the borders of their garments with a ribbon of bane, that they might look upon it and be holy unto the Lord who had brought them out of Egypt (Ex. 37-41). Chapter xvi is full of the rebellion of Korah and his companions against Moses, their punishment, the sympathy of the people with the guilty and the plague from the Lord that took away so many thousands of them. Chapter xvii tells of Aaron's sin in offering incense to his choice of Aaron by causing his rod to bud and blossom and bear almonds in one night, while the other eleven rods remained only dry sticks. Chapter xviii establishes the preeminence of Aaron, the high priest, and the separation into the Lord and the Lord Himself was specially their portion (verse 20). Chapter xix is the remarkable story of the red heifer or the provision for cleansing the way. Chapter xx, Heb. 12, 13; I John 1. Chapter xx begins with the death of Miriam and ends with the death of Aaron, which cut him off from leadership and the promised land. He believed not God, gave way to speaking and made the rock instead of seeking to it. In today's lesson we have first a signal victory of Israel over their enemies and then another one against the devil, followed by a chastening and deliverance. That God should ever hear or do anything for such a rebellious people is written for our encouragement and that we may adopt Jeremiah's plea, "Lord, I beseech thee, turn away from Thy anger against us, do Thou it for Thy name's sake" (Jer. xiv, 7). He will specially bless all whole heartedness against sin or for Him, and this seems to be the special point in the first three chapters of our lesson. In II Chron. xvi, 14, to vii, 1, there is a good comment upon it, and another good promise in connection with it. In II Chron. xvi, 9, As in the days of Israel, so in our days, He is seeking those who are willing to be wholly set apart for Himself, who will cheerfully be His portion and let Him be peculiarly their portion (Ex. xix, 4-6; Ps. iv, 3; Tit. ii, 14, 15; Ps. cxxxix, 17). He followed by the story of the golden calf, which He will specially reveal Himself.

The last part of our lesson is a sad record, and yet their sin and God's manner of deliverance is one of the most glorious of stories. It is the story of the sinners, a type that our Lord specially dwelt upon and used concerning Himself in John iii, 14, 15. We know that Aaron died in the first year after our lesson. In the Bible (Ex. xxxiii, 38), and if this event was in that year, as it would seem to be, we see Israel rebellious to the last and the rising generation inheriting the sin of their fathers. "Disobedience is the root of all sin," says the apostle, "and speaking against God and against Moses (verses 4, 5), so they began and so continued (Ex. xvi and xvii; Num. xi, 4-9), and so we continue in spite of all the lessons, saying, 'What shall we eat, what shall we drink, or where will we find clothing?' (Matt. vi, 31) acting as if we had no Father in heaven and therefore making self our center instead of God. The same sin that we confess with the same sin in us, clenching us and ever seeking to win us wholly to Himself.

The fiery serpents causing death cannot but suggest that old serpent, the devil, who is the father of lies and the death of that which caused their death. I think the case that covers it most fully in connection with John iii, 14, 15, is II Cor. v, 21, "God hath made Him to be sin for us who knew no sin, that we might be made the righteousness of God in Him."

The fact in Israel's case was that, if any bitten one, however near death, saw the brazen serpent he was at once well. There was truly "life to the look." If we are sinners, and with Him who was made sin for us. When we are convinced that we are sinners and have lost and see Jesus as having died in our stead, bearing our sins in His own body, we are at once well. The guilty one says for me; this He did for me. I do receive Him as my Saviour," then there is life, eternal life, the forgiveness of sins, the free gift of God to the penitent sinner, the John iii, 14, 15, 16; Eph. i, 6, 7; ii, 13.

Remedy For Bloat In Cattle.

Here is a good cure for bloat in cattle, writes a Nebraska farmer in Farm Progress. Take half a quart of kerosene from the tank or well and pour over the back of the animal. Repeat treatment if the first does not help. This beats use of the knife.

Sheep Dainty Feeders.

Sheep are very dainty animals, and for this reason their breeding troughs should be kept clean. See that the chickens are not roosting on the racks and brush all sheep droppings from the troughs before meal time.

Waterproof Paint.

The following recipe for a waterproof paint for wood or stone will be found reliable. Mix equal ounces of resin, mix it thoroughly with six gallons of fish oil and one pound of melted sulphur; mix some other or any other coloring substance with a little linseed oil, enough to give it the right color and consistency. Apply several coats of the hot composition with a brush. The first coat should be very thin.

Hay Good For Hogs.

But few farmers would consider hay as a suitable feed for hogs, but the Kansas experiment station reports better results from a mixture of alfalfa hay and Kaffir corn than from Kaffir corn only. The hay was fed dry in forks and the pigs were given an abundance. They picked out the leaves and finer stems, rejecting the coarser portions. It was decided that pasture in summer and hay in winter would produce pork cheaply.

Attack of Diarrhoea Cured by One Dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy.

I was so weak from an attack of diarrhoea that I could scarcely attend to my duties, when I took a dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy. It cured me entirely and I had been taking other medicine for nine days without relief. I heartily recommend this remedy as being the best in the world for bowel complaints.—R. G. Stewart, of the firm of Stewart & Bro., Greenville, Ala. For particulars, apply to W. McKim, Druggist, Atlanta, Ga.

Hay Good For Hogs.

But few farmers would consider hay as a suitable feed for hogs, but the Kansas experiment station reports better results from a mixture of alfalfa hay and Kaffir corn than from Kaffir corn only. The hay was fed dry in forks and the pigs were given an abundance. They picked out the leaves and finer stems, rejecting the coarser portions. FOR THE HOUSEWIFE.

Cleaning Silk Skirts.

The method of washing or cleaning the new silk skirts now so generally worn is quite a problem. The proper treatment for a skirt is to rub it gently between the hands in lukewarm water in which white or castile soap has been dissolved. Squeeze the water out with moderate pressure and rinse in tepid water. It is a good idea to add to the rinsing water a few drops of coloring matter the color of the skirt. This coloring can be obtained in the form of a wash and always rubs silk of some amount of its brightness this addition will be appreciated. Iron with a damp, first placing a thin piece of muslin over the silk.

Oatmeal Cleans the Skin.

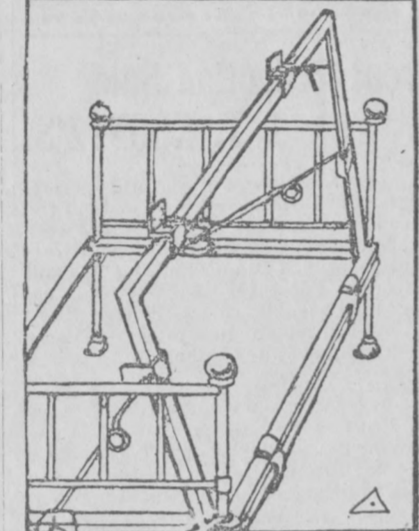

Our grandmothers used to dress their young folks with some of the most horrible concoctions "to clean the blood." Many of these remedies seen out of the question entirely with us, but some of them were efficacious and simple. One of these last mentioned is oatmeal water. To make it put a heaping teaspoonful of fine oatmeal into a tumbler, add cold water to stand all night, and in the morning stir it up well. Let the thickest part settle again and then drink the clear part. This should be continued for two or three weeks, and it will clean the complexion remarkably.

Remedy For Weak Eyes.

A simple remedy for weak eyes is what is known as a solution of boric acid, which is no more or less than powdered borax. Put a heaping teaspoonful in an ordinary tumbler of pure water and let it thoroughly dissolve. Then apply to the eyes with the fingers. Never use a sponge or cloth. Let it dry on the eyes. Use it first in the morning and after rising or at any other time. It is no exaggeration to say it acts like magic, relieving the congestion and brightening the eyes remarkably.

Bed Spring That Tilts.

A recent invention renders easier one of the most disagreeable tasks of the housewife—that of cleaning the bedstead. Lifting the springs is hard work. The inventor has endeavored to make this part of the work easy by designing the tilting bed spring shown here. In this bedstead the spring is

MISS CARRO CLARK.

was quickly shattered. Six other books turned out complete failures. I then realized I should have to hustle if I meant to continue in the business. I sought out a number of authors and was fortunate in securing several works that did well."

Miss Clark admitted that for the first three years—she has now been a publisher for five—she worked very hard from morning to night.

She declares that much of her success is due to the periodical journeys she makes to the various cities.

The moment she has some new books ready to send out a tour, and our local travelers have frequently remarked at the amount of ground she covers and the business she transacts on these journeys.

Arriving at a town, she spends two or three hours visiting her agents and arranging sales.

The moment her visit is finished a train is taken to the next stopping place, and so on until the programme is completed.

A Novel Blotter.

A pretty combination blotter is made as follows: The three ordinary, rather large blotters together by piercing through one corner and running in a row of baby ribbon. Then on the outside paste one of the small unmounted penny calendars and a postal view.

At first blush there seems nothing especially novel or attractive about this combination, but its variations are manifold. It is pretty in school or college books, both blotters and ribbon partaking of the shades. In this case the postal map represents it is charming all in red and green and at Easter in green and white.

If one buys the large blotters and cuts them oneself, the cost for twenty blotters covers the entire expense. They are extremely easy to make and, while serving the place of a printed card, are much more personal in their appeal.

If one wishes one may draw or paint around the edge of the blotter a simple decorative border and on the postal map write the name of the giver and the date.

An odd use to which they may be put is to send them as invitations, writing on the back of each one a name, date, time and address. They may be used as name tags, made, stamp and wrap twenty-five of these, an average cost of 8 cents apiece for all expenditures—surely little enough!

Wedding Gowns No Longer Saved.

For one thing, there is a superstition that the wedding gown and veil should be kept for future generations. For another thing, there is not much room in the modern house for storing away old gowns, and there is not much room in modern life for preserving sentiment.

One drum of powdered sugar and one drum of lard make a splendid remedy for colic.

There are few farms these days on which sheep cannot be kept with a certainty of profit.

Occasional headache, belching, bad taste in the mouth, lack of appetite and crying nervousness are symptoms of indigestion, when allowed to go uncorrected, will develop into a case of dyspepsia that will take a long time to get rid of. In that respect your stomach. At the first indication of trouble take something that will help it along in its work of digesting the food you eat. Kodol is the most ideal chair of science in the world.

When John D. Rockefeller endowed the Institute For Medical Research he selected Dr. Flexner as its head. The scientist at the time was professor of pathology at the University of Pennsylvania. His position now is one of great scope and possibility, being in charge, with discretion, of a princely fund for the prosecution of research along the line of his profession. It is probably the most ideal chair of science in the world.

Edward P. Zepp and Mrs. Mary Martin are among those reported ill at present.

Miss Amanda Root, of Baltimore, is spending some time with Mr. and Mrs. Daniel H. Fair.

Mrs. Williams and daughter, Miss Sue, of York, Pa., are visiting at Milton H. Reinhold's.

Miss Gertrude Gardner will return this Friday evening, after a few days stay in Baltimore.

Mr. Eli Hann, of Philadelphia, visited relatives in Taneytown and Middleburg district this week.

Miss Annie Wilhite, of Baltimore, has been visiting her mother and other relatives, for several weeks.

Miss Bertie Long has returned home after spending several days with her brother, Claudius Long.

Mrs. M. A. Bollinger has quit house-keeping and is now living with her daughter, Mrs. Dr. F. H. Seis.

Miss Clara Crumrine, of Philadelphia, and Miss Ruth Fisher, of Frederick, were recent guests of Miss Edna Mehling.

Misses Beulah Englar and Ruth S. Elliott, have taken up teaching, for the year, in the school at Raritan, N. J.

Mrs. Martin L. Baffington, has returned home, from a four weeks' visit to her daughter, Mrs. William E. Wagner.

Robert Elliott came home, on Wednesday evening, having symptoms of typhoid fever. He was accompanied by his brother, Charlie.

Dr. R. S. Seis, of Littlestown, Pa., who recently purchased the Hull property, on George St., expects to occupy it early in October.

Dr. C. E. Roop and wife, spent Thursday, at the Blue Mountain House, as the guests of the Cumberland Valley Medical Association.

Miss Eva Mower, of Mr. Wolf, Pa., returned home, on Monday, after several days visit, as the guest of Misses Effie and Lola Stonaker.

E. M. Dutcher, of Middleburg, will enter for exhibit at the Hanover fair, next week, two horses—Norval and Pluto—and a mare and colt.

The canning factory started up, on Thursday. The season will be much shorter than usual, on account of the shortness of the corn crop.

Mr. Arthur Angell, of Stumptown, is quite ill with typhoid fever. Sister Gertrude, of the Lutheran Deaconess home, Baltimore, is nursing him.

Mr. Wille, of Altoona, a brother of Mrs. John D. Kane, has purchased the William Stonfer property, just outside the northern corporate limits.

The Taneytown baseball club met the Annapolis, Pa., club, at Harney, last Friday, and defeated it in a well played game on both sides, by a score of 6 to 5.

Mr. Renben Frock and friend, Miss Anna Fosbender, of York, spent a few days in town, as the guest of his parents, Mr. and Mrs. L. D. Frock, on Fairview Ave.

Cards are out announcing the marriage of Mr. Samuel Ott, of this place, to Miss Rose Mary Rowe, of Emmitsburg, on next Wednesday, at the home of the bride.

On Tuesday, Mrs. Ulysses H. Bowers, entertained members of the Bowers and Storm families, Her brother, George, who has not been in Taneytown for thirteen years, thinks the place has wonderfully improved.

Miss Ellen Long returned home, Saturday morning, after spending six weeks with her grandma and aunt, in Baltimore. She was accompanied home by her aunt Bertie. In the evening a number of Ellen's friends gave her a surprise.

Rev. Thos. Springer will preach in Piney Creek Presbyterian church, Sunday next, at 10 a. m., and in Taneytown church, at 8 p. m. Immediately after service in each church a congregational meeting will be held for the purpose of voting for a pastor.

Mr. Samuel Baumgardner, an aged citizen of this district, died Thursday morning at the home of his daughter, after a few days illness. Funeral this Saturday morning, services in the Lutheran church. Mr. Baumgardner was in his 81st year.

Rev. A. Bateman and wife, of Lansford, Pa., spent a month's vacation on a trip to Rochester, N. Y., Niagara Falls and Canada, visiting Toronto, the Capital. They had a splendid time, thoroughly enjoying the sights in this picturesque northern section.

The Gettysburg Water Company property, in this issue, their mill property and dam, on Monocacy, formerly Starner's mill. Perhaps this property would be worth looking into, with reference to the possibility of the dam supplying power for electric lights for Taneytown.

Last Sunday, Mr. and Mrs. Jerome Storm entertained their children and grand-children, as follows: George Storm, with four children, of New York; Abram Clingan, wife and seven children; Ulysses Bowers, wife and three children, and Miss Annie and Mr. Joseph Storm, and Mrs. Storm's sister, Mrs. Wisotzky, of Gettysburg.

Mr. Chas. J. Baumgardner, of Ipava, Ill., is on a visit to his old home in this district, after a trip to New York, New Hampshire, Jamestown Exposition and West Virginia. Mr. Baumgardner is one of the sturdy Maryland boys who have made a success of it in the great middle west, and who have helped to make that section what it is.

A Free Lecture and Musical will be given in the Opera House, on Monday evening, Sept. 9, under the auspices of Carroll Conclave No. 333, I. O. H., to which all are most cordially invited. The program will be as follows:

Musical Instrumental.
Welcome Address, R. S. McKinney, Music Vocal.
Recitation, Miss Irene Gardner.
Lecture "Home and the Baby" by W. L. Lester, of Harrisburg.
Music Instrumental.
General Remarks.
Music Vocal.

Don't forget the time. Come and be entertained, free of charge.

Three mothers, worn out by the peevish, cross baby have found in Cascasweet a boon and a blessing. Cascasweet is for babies and children, and is especially good for the ills so common in hot weather. Look for the ingredients printed on the bottle. Contains no harmful drugs. Sold by J. McKellip, Druggist, Taneytown, Md.

Maryland Day at Jamestown Exposition

SEPT. 12 IS ALSO DEFENDERS' DAY AND "STAR SPANGLED BANNER" DAY—HISTORIC ANNIVERSARIES.

Author of "Maryland, My Maryland," to Be a Guest at the State Building—Reproduction of Charles Carroll's Famous Home Is Maryland's Edifice at the Fair.

Rich Collection of Historical Paintings and Photographs Attractively Displayed.

MARYLAND DAY at the Jamestown exposition, Sept. 12, is also Defenders' day, the ninety-third anniversary of the bombardment of Fort Mifflin, Sept. 12, 1814. It was on Sunday, Sept. 11, that the British fleet of 18 ships entered the Patuxent river and the next morning landed 7,000 soldiers at North Point to attack Baltimore. The story of their defeat and the death of their commander, General Ross, are matters of history, as is also the recital of their later attempt by water and subsequent repulse by the gallant patriots of Maryland. It was while temporarily detained by the British on a vessel in the river that Francis Scott Key wrote "The Star Spangled Banner." Thus Maryland day is "Star Spangled Banner" day as well as Defenders' day.

Maryland Day Programme.

The officials of the exposition and the Maryland commission have arranged a most elaborate programme to include addresses by distinguished men and the participation of the army and navy. The details were completed by Major Mallory and Lieutenant Bagby, in charge of military affairs at the exposition; Lynn R. Meekins and J. William Bangham of the Maryland commission and R. H. Sexton, director of special events.

On Maryland day, in connection with the celebration, exercises will be held in the Auditorium, at which time there will be addresses by Governor William D. Swann, of New Orleans, author of "Maryland, My Maryland," Governor Swann of Virginia, President Tucker and Director General of the exposition and Captain Frederick M. Cotton, who will also be the presiding officer.

Senator William Pinkney Whyte and Attorney General Bonaparte are also expected to be present to make short addresses.

Mr. Arthur Angell, of Stumptown, is quite ill with typhoid fever. Sister Gertrude, of the Lutheran Deaconess home, Baltimore, is nursing him.

Mr. Wille, of Altoona, a brother of Mrs. John D. Kane, has purchased the William Stonfer property, just outside the northern corporate limits.

Complies with all requirements of the National Pure Food Law, Guarantee No. 2041, filed at Washington.

THE MOCHA JAVA MASQUERADE

Advice of the largest coffee dealers in the world is always to buy the old-fashioned Arbuckle's ARIOSA Coffee in the sealed packages. Don't ask for a pound of Mocha and Java, or buy by the price, for Coffee fluctuates and you cannot get the same coffee for the same price all the time unless you pay too much for it. Most of the so-called Mocha and Java Coffee is simply masquerading, and is not nearly as good coffee for you as Arbuckle's ARIOSA, the blend of the Brazilian Coffees most suitable to the taste and health of American people. By the looks there is no difference between roasted Java and Brazilian Coffees; many people drink Brazilian but pay for Java. The principal difference is that Arbuckle's costs you less. It is a mistake to believe that a high price guarantees quality. When you buy Arbuckle's ARIOSA Coffee, you get a full one pound package of the leading Coffee of the world. Its sales for 37 years are greater than the combined sales of all the other packaged coffees. By giving better Coffee for the money, we have built up a business exceeding the combined businesses of the four next largest coffee firms in the whole world. If your dealer will not supply the genuine, write to ARBUCKLE BROS., New York City.
