

The Lincoln Memorial.

(For the Record.) When the United Colonies were engaged in the bitter struggle for freedom...

Successing generations have revered the memory of that man, his name is engraved on the heart of every American...

No imposing monument greets the visitor to the city on the Potomac where the man fought the people's battles...

As the one-hundredth anniversary of the birth of Lincoln approaches, the lack of a suitable material expression of our regard for him is more keenly felt...

The first task of this commission was to decide what kind of memorial was most appropriate. The one that has met with most favor was conceived when Mr. McLeary, chairman of the commission...

We do not desire a memorial to be primarily utilitarian, since its being so defeats its highest purpose; and yet when we remember that Lincoln's life was a useful one, devoted to the people...

Every year the great work of Lincoln is becoming better understood and consequently better appreciated. Posterity as well as ourselves will want to honor Lincoln; hence his memorial should be a growing memorial.

Though centuries shall multiply as days yet the name of Lincoln will remain as long as men revere the principles of his life; then his memorial must be built to remain.

This proposed boulevard will be second to none in magnificence of scale and beauty of construction. One who has seen the Avenue des Champs Elysees at Paris or the Grand Boulevard of Chicago may have a fair conception of what this road will be.

Shall we not then approve a plan, which by combining the artisan's skill with that of nature, will produce a mark both useful and beautiful, which will unite by a Lincoln memorial such a historic spot as Gettysburg with our Capital and which will weld in a closer bond of brotherhood the land of Dixie and the North?

Shall we not expect a still better construction with our modern methods of engineering science?

"And how about trading stamps? Give 'em, I suppose?" "No-o," admitted the proprietor, almost losing his professional poise.

When Bagg' Below the Eyes. If you are puffed or baggy below your eyes be sure one of two conditions exist—either there is danger from the kidneys or the eyelids is inflamed. The first needs the diagnosis of a doctor. You can tell the second for yourself by standing before a mirror and gently turning back the lower lid. Hot compresses will also give relief, and the puffiness may be gently massaged.
