# THE CARROLL RECORD.

VOL. 16. Chesapeake & Potomac Telephone, 3-R.

TANEYTOWN, MARYLAND, SATURDAY, NOVEMBER 27, 1909.

No. 22

#### NEWS NOTES HERE AND THERE

#### Condensed Items of Interest from County, State and Our Exchanges.

The official returns give Hering (Dem) for Comptroller, a plurality of 9,739. Majority against the amendment, 16,711. Hering's majority over all was 3,662.

Chairman Hanna, of the Republican State Central Committee, reports the recent campaign expenses, state and city, to have been \$50,429.47, of which sum, Carroll county received \$200.00.

An enterprising butcher in Germany, hearing that an unruly elephant in the Ghent Zoological Gordens was to be killed, bought the carcass. He made 3800 pounds of sausage out of it and sold every pound at good prices.

It is reported that Congressman Mudd is sufficiently recovered to resume, in part, his duties as Congressman, this winter, though his physicians will insist that he continue treatment and avoid New England in 1621 was, as you state, anything approaching hard work.

A rather odd fact, in connection with the recent campaign in this county, is, that one of the defeated candidates published a card of thanks for the support he received, while not a single one of the candidates elected did likewise. Are we to conclude that defeat is more a matter of thankfulness, than success?

The Democratic State Central Committee spent \$56,363.79 in the past campaign, according to the report of Chairman Vandiver. In the list of contributions to counties, Carroll does not triumphant. There has been a bounte-appear, which may partly account for ous harvest and when the time for the the disastrous result. The above a-mount includes both state and city ex-

Forty-six years ago Friday, President Lincoln delivered his famous address at the dedication of the National Cemetery at Gettysburg. The car in which he rode to Gettysburg is still being used near Seven Stars by the Western Maryland railroad gang occupying it for sleeping quarters. It is an old-time combination passenger and baggage car.

Suffering from a nervous breakdown as a result of the mental strain under which he labored in preparing his report for the University of Copenhagen, Dr. Frederick A. Cook, claimant to the discovery of the North Pole, has left the Gramatan Inn, in Bronxville, and is at the home of friends in Manhattan. His condition is such that even his most in-timate friends are not allowed to see

It is rumored that Rev. W. L. Seabrook, of the Sentinel, will be chief downty closh moder Closh (City Windsor, Union Bridge, and other points. deputy clerk under County Clerk Gilbert, and that the deputy Register of Wills will be Mr. Harry Rinehart, of Frizellburg. It is also rumored that present deputy clerk, George A. Miller, who has been in the office over 40 years, was offered a subordinate position, declined. Mr. Miller has been a faithful and efficient deputy, popular with members of both parties.

Mr. William L. Marbury, a Baltimore attorney, comes out in an interview favoring a property qualification to be dropping of all educational tests He says such a proposition positively eliminates any danger to white voters, but will reach nearly every colored voter. This plan would also do away with ballots and Wilson laws, and he thinks it would carry, easily, if brought before the voters of the state.

month Mr. Rayner was the only candidate in the primaries. He was called upon to bear all the cost. He contributed \$13,200.05, and on Saturday Chairman Vandiver returned to him \$647.53 which was unexpended. Thus the primaries stand Senator Rayner \$12,561.52. Necessarily he had other expenses, and it is safe to say that the Senator's legitimate outlay for his re-election will be in the ighborhood of \$20,000, or almost onehalf of the total salary for the term of six years.

The United States Court, at St. Louis, has ordered the Standard Oil Company dissolved, as a company held to be conspiracy in restraint of trade. The case was heard last April, able counsel representing each side, and the verdict rendered by the Court is a distinct victory for the Government. The case will now go to the Supreme Court of the his 79th. year. United States. The case is one of the most notable in the history of the nation on account of the important industrial and legal questions and the vast financial interests involved. The evidence filled 21 volumes and occupied more than 10,000 printed pages and the arguments of counsel more than 300 printed pages.

Stooping over to lift a bucket of water from a 25-foot well, two one-dollar bills fluttered from Mrs. Antone Mecken-dorff's shirtwaist, on Tuesday, at Beverly, N. J., and dropped to the bottom. Mrs. Meckendorff did not want to lose those two dollar bills, so she thought of the idea of letting herself down in the bucket. She tried the notion, but as she stepped into the bucket she lost her hold and dropped down the well to the bottom into four feet of water. The woman shouted for help and her cries were heard by a crowd of boys nearby. They let down a stout rope, which the woman, who weighs over 200 pounds, tied under her arms, and with a mighty effort she was hauled up out of the well. All the injuries she received was a broken arm, but she got the dollar bills.

Memorable Thanksgiving Days.

Editor CARROLL RECORDS In the RECORD of last week, I noticed a slight error concerning the first Thanksgiving Day ever held in America, and the first ever known to the world. It is true that the Thanksgiving Day set apart by the Puritans, viz: November 18th., 1621, is the first one ever held in America, but history tells us that Queen Elizabeth, of England, appointed a day of praise and thanksgiving to commemorate the destruction of the Spanish "Armada," in July, 1588. It was kept on November 29th. 1588, or thirty-three years before the New England Thanksgiving Day of 1621.

Another memorable Thanksgiving Day was observed by the inhabitants of

Lyden, Holland, October 3rd., 1575. For four months Lyden had been besieged by the Spaniards under the fierce Duke of Ava, and when at last the siege was broken up and relief came to the famished inhabitants of Lyden on October 3rd., 1574, the 3rd. of October, the following year, 1575, was set apart. That great Thanksgiving Day was also commemorated by laying the corner stone of the great University of Lyden, so famous in the centuries since.

the first one ever observed in America. Another memorable Thanksgiving Day was observed by this new-born nationand the first one, too, ever kept by this new-born nation—was November 24th., 1784, after the conclusion of the great Revolutionary War. Then all over the country, the joy bells rang, and the new flag of freedom, the stars and stripes, floated proudly to the breeze. To commemorate the occasion, Congress recommended a day of thanksgiving, viz:

November 24th., 1784. When the great Civil War had lasted about three years, a rift in the dark cloud is seen and Freedom seems annual Thanksgiving comes around, President Lincoln makes it a National holiday. So in every Northern State for the first time is Thanksgiving kept the same day, November 27th., 1863. Very remarkable, that all the above Days of Thanksgiving were observed in the month of November, except the one held by the people of Lyden, in October. A. D. BATEMAN.

(The article in last issue, had reference, of course, to the first Thanksgiving Day as a religious and social festival, largely the latter. We thank Bro. Bateman for further light on the subject.—ED. RECORD.)

#### The Cluxtons Failed to Appear.

To say that there was great disappointment in Taneytown, on Tuesday evening, on account of the Cluxton Company failing to make its appearance, is a very mild statement. The Company failed to make connection, at Harrisburg, from Mt. Carmel, Pa., in time to get here. There would have been a full house, Ail single tickets sold for the performance, will be redeemed at McKinney's. The season ticket holders will be amply protected; there will either be another performance to take the place of the forfeited one, or a pro-rata refund will be made.

There has been a very gratifying advance sale of season tickets; sufficient to assure the financial success of the venture; but, to have the very first attraction on the list fail to show up, may have a tendency to injure the whole course. We ask all to be patient in the matter, as every effort will be made to replace this one feature with an attraction equally good, or better. In any case, ticket holders will not suffer any financial loss.

The Prohibitionists of Maryland express themselves as pleased with the vote received by the Prohibition candidates in the last campaign, and say it shows that the party is steadily and For the United States Senate this gradually growing in numerical strength in Maryland. The total vote received by Harris, the candidate for State Comptroller this year, was 4,488, as compared with 3,302, the vote received by Chafin, the Presidential nominee, in 1908. Because of the interest manifested in Presidential elections a larger vote is generally polled in this election than in any other, and the Prohibitionists say this condition is as true with their party as with the Democratic and Republican.

#### DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

KEPHART.-On Nov. 21, 1909, near Piney Creek church, Mr. David Frank Kephart, in his 70th. year.

GARNER.-On Nov. 21, 1909, near Taneytown, Mr. William H. Garner, in

#### IN MEMORIAM.

The members of Taneytown Lodge No. 3¢, K. of P. have learned with profound sorrow of the death of their late fellow-member, Milton H. Reindollar was one of the charter members of the re-instituting of the Lodge of K. of P., having taken the Page Rank on the 25 of June, 189°; but owing to his business he was not very regular in his weekly attendance, though always kept his dues paid up and was willing to lend a helping hand for the betterment of the Order.

In our town, where most of his life had been spent, and where he was so well known, no man stood higher. Of commanding presence, amiable disposition, firm, but gentle in manner, faithful and conscientious in the discharge of every duty, he has left the priceless legacy of a good name, and in his death we feel that not only his home, but the town have lost one whose life and character have reflected honor upon us all; and whose example should be an inspiration to those of us who are still fighting the battles of life. Therefore be it

\*\*Resolved\*, That this minute be entered as part of the proceedings of this meeting, that it be published in the Carroll Record; and that a copy be sent to the family of the decased brother, as an expression of the cep sympathy felt for them in their great bereavement.

E. K. Reaver, Chas. E. Riddinger.

E. K. REAVER, CHAS. E. RIDINGER, L. D. REID, Committee.

#### ROAD INFORMATION WANTED.

#### The Road Commission Should Publish a Statement Showing Results.

The Record has at various times called attention to the dearth of road improvement news, especially with Association, will hold its annual meeting and exhibit, on December 1.

The Maryland State Bee-Keepers Asimprovement news, especially with reference to the financial end of the question. A year ago, there was quite a lot of road-making news and plans going, numerous meetings of the Road Commission, etc., and according to our recollection there was one partial financial statement; but for months and months there has apparently been "noth-

ing doing."
A State Campaign came and passed, one partisan question—the disfranchisthe people, and the one great question of interest to agriculturists—road making—received no notice whatever. In our issue of Oct. 30, this paper said, editorially:

penditure of money than any other to come before the legislature—money that them. must be supplied by the tax-payersand it would seem that if the results are perfectly satisfactory, so far, and will bear the light of full ventilation, it would be a splendid opportunity for making this information known, as politicians usually make the most of

fine past records.' Now, the question is, is this keeping silent course to be pursued until the legislature meets? If so, it is time that the people were getting interested. The legislature is the people of the state, boiled down. It ought to be distinctly representative and in order that it may be, the people have a right to know, in advance, all that it is possible to know about the great questions to come up, in order that they can consider and de-termine them and pass their conclusions on to their representatives-they should be given all possible, definite information, about what has been accomplished by the Road Commission, and the expendi-

tures up to date. Within the next few weeks, several conventions, representative of agriculture, will be held in Baltimore. These conventions will represent the great taxpaying, road-using, body of our citizens. Let them take action on this very matter; decisive, positive action. Let them demand an accounting for the past two years' work for improved roads. Let them ask for information which will give a clear view of the future, and its re-lation to another big appropriation. It will not do to bush this matter up until the legislature meets, and then rush a bill through without giving the people, who must eventually pay the bill, a show to protest, if they want to.

If road-making operations, so far, have been perfectly satisfactory, and the money spent to the satisfaction of the people, there is no good reason why the facts should not be known. Let there be light! Let the Road Commission un-

#### Death of Mr. William H. Garner.

Mr. William H. Garner, a well known farmer of this district, died at his home, near town, on the Uniontown road, on Sunday afternoon, in his 79th. year. Mr. Garner had been in failing health for several years, and recently had been confined to his bed, beyond hopes of recovery. Mr. Garner had lived at his late home, which is one of the most desirable small farms in Taneytown district, ever since his marriage, about fifty years ago, except for a short time, in Taneytown.

He leaves a widow, and three sons; Daniel W., John A. P., and Jerry J., all residents of Taneytown and vicinity. Funeral services were held at the house. on Wednesday morning, interment following in the U. B. cemetery, on the Westminster road, Rev. C. W. Christman officiating, assisted by Rev. W. E.

#### Death of Mr. D. Frank Kephart.

Mr. D. Frank Kephart, a prominent farmer, of near Piney Creek church, died instantly on Sunday afternoon, of some affection of the heart, while standing in front of his house, eating an apple. He had been complaining of rheumatism, but there were no indications of serious trouble-death was entirely unexpected. He leaves a widow and three sons, as follows, Charles B. and Russell, at home, and Raymond, in Baltimore.

Funeral services were held on Wednesday afternon, interment being made in the Lutheran cemetery, in Harney. Mr. Kephart was in his 70th, year of age. The services were in charge of Rev. C. W. Christman and Rev. W. E. Wheeler.

#### Fair Association Fined.

Hagerstown, Md., Nov. 23.—The Hagerstown Fair Association, which was recently indicted for permitting gambling at the recent fair, pleaded guilty today, through its attorney, Mr. J. Clarence Lane, to the sixth count in the indictment-knowingly permitting the

gambling.
Judge Henderson imposed a fine of \$100 and the costs, the latter amounting to \$6.55. The maximum fine is \$500. with an imprisonment clause.

Attorney Lane, in pleading guilty, stated to the Court that the men who were at the head of the fair association were persons of honor and integrity, and the practice of permitting games on the fair grounds had grown up and was tolerated by the people. He spoke of the custom of having raffles at church

Judge Henderson, in a few remarks, stated that in view of all the circumstances and as the fair association would have to stop the practice of allowing gambling devices on the grounds, he would not impose the maximum penalty.

#### Meetings of Interest to Farmers.

The meeting of the Maryland State Grange will be held in the Fifth Regiment Armory building, on November 30 and 31, and the Maryland State Horticultural Society will hold its meeting at the same place, on Dec. 2—3. The Maryland Cereal and Fo age Crop

sociation will meet in the Armory, on Wednesday, Dec. 1. The addresses and discussions at this meeting will be on subjects pertaining to bee-keeping, and will be of much interest. Hotel headquarters will be at the Rennert, Cor. Park Ave. and Lexington St.

The annual meeting of the State Dairymen's Association, which will be held on Wednesday next, December 1st., at without any reference worth while to the the Fifth Regiment Armory, Baltimore, \$5,000,000 road-making project. The promises to be an important one to the dairymen of the State. Cash prizes which have been offered by the Associing amendment. The real interests of ation for the best exhibits of milk have

All dairymen and the general public "Road improvement is a question of paramount importance, even if it is not a "paramount issue," politically. It is a matter likely to call for a heavier extant a matter likely to call for a heavier extant and the contest of the milk prizes is open to all dairymen, the only restriction being that they, or members of the families, are

> These meetings are likely to be largely attended, due to the general revival of interest in agricultural pursuits, an interest which is not confined to any particular section, but which covers the entire state. Many will no doubt arrange to attend all the meetings.

#### Death of Mr. Noah Myerly.

Mr. Noah Myerly was born in Carroll county, Maryland, Sept. 26th., 1822, and died in El Paso, Texas, at the home of his daughter, Mrs. Laura Schwartz, November, 2nd., 1909. He was confirmed in the German Lutheran church at the age of 14 and has always been a consistant and conscientions member of this body. He was thoroughly conversant with all the doctrines and discipline of his church and was greatly grieved when he noted the tendency on e part of many professed followers of Christ failing to take their christian vows seriously.

Mr. Myerly was married in 1846 to Miss Mary Thompson, a native of Penna. To this happy union four children were born, all but one surviving the father and mother. Mrs. Myerly passed to her reward in the year 1901, from the old home in Hume, Illinois. The only son, Mr. William Myerly, died in the year 1894. The three surviving daughters, who to-day mourn the loss of a loving and devoted father, are Mrs. Elizabeth Julian, of Hume, Ill.; Mrs. Lydia Pennington, of Decatur, Ind., and Mrs. Laura Schwartz, of El Paso, Texas.

where he followed the milling trade. In the early 50's he removed to the state of Ohio, where he persued the same trade. Ohio, but removed later on in the 50's to the state of Illinois, spending most of the remaining period of his life upon a farm in Edgar county of that state After many years of patient and honest toil, he removed from the old farm place, 17 years ago, to the town of Hume, Ill., where he made his home until three years ago when he removed to El Paso, Texas.—Hume Record (Ill.)

#### Murphy-Englar.

The home of Mr. and Mrs. Jesse Englar, 519 North Arlington avenue, Baltimore, was the scene of a pretty wedding on Thanksgiving day, at noon, when their daughter, Miss Merle Englar and Mr. John Alexander Murphy were married. Rev. D. Ezra K. Bell, of the First Lutheran Church, performed the

The bride wore a modified princess gown of blue siik moire, trimmed with crystal cloth and pearls, with hat and gloves to match, and carried a shower bouquet of white chrysanthemums. A reception followed for relatives and a few friends. The house was decorated with a profusion of white flowers and

for a trip West. They will be at home at 825 Hamilton Terrace after Jan. 1. -0-0-0-

#### Carroll County Election Expenses.

Under the corrupt practices act, all candidates for public office are required to file sworn statements of the amounts expended by them during a campaign. A partial list of such expenses has been filed with the County Clerk for Carroll county, as follows:

B. Frank Crouse, treasurer, reports the receipts of the Democratic party as \$1,504.89; expenditures, \$1,117.70; balance on hand, \$387.19. John H. Cunningham, treasurer, re-

ports the receipts of the Republican party as \$1,199.50; expenditures, \$1,220. The report of Dr. J. W. Hering, Dem-

ocratic candidate for comptroller, shows \$500 contributed to the state campaign fund through Murray Vandiver, and \$52.16 traveling expenses. Oscar D. Gilbert, Republican candidate for clerk of the Circuit Court, \$189.;

William Arthur, Republican candidate for register of wills, \$202.; B. Frank Stansbury, Republican candidate for county commissioner, \$59.35; B. D. Kemper, Republican candidate for sheriff, \$41.95; Judson Hill, Republican candidate for the House of Delegates,

The only defeated candidates who have filed expense accounts are Ulysses H. Shipley, Republican candidate for County Treasurer, \$33.29; Dr. S. R. Waters, Democratic candidate for House of Delegates, \$103.40, and Theodore Yeiser, Democratic candidate for County Surveyor, nothing.

To the Honorable, the Judges of the Circuit Court for Carroll County.
The grand jurors of the State of Maryland, for the body of Carroll county, for the November term, in the year nineteen hundred and nine, having finished the

investigation of matters brought to their attention, respectfully report unto your Honorable Court:

That they have been in session thirteen days, which is somewhat longer than usual for grand juries to sit for quite a groom wore the conventional black. number of years past, but it was made necessary, in a large measure, by the investigation of matters that might have his fine Ford automobile. After the been sifted out by officers charged with such duties, but for lack of whom they felt it incumbent upon them to do what they could to ascertain the guilty parties, and bring in presentments and indici-ments against them. During the session they investigated fifty cases, examined ninety-nine witnesses, and received the reports of the seven constables in the county. They found forty-one present-ments and true bills and among the cases in which neither presentments nor indictments were found was that of Granville S. Hall, held under recognizance for his appearance, on the charge

As required by law, they visited the ail; examined its condition, and interriewed the prisoners confined therein, of these were nine. Some of them of larceny of money. jail; examined its condition, and interviewed the prisoners confined therein, of whom there were nine. Some of them awaiting the action of this body, and the others under sentence from Justices

Mr. Myerly spent the earlier days of his life in the state of Pennsylvania where he followed the million to the first where he followed the million to the first and final account.

They also visited the alms house, and found there thirty-six inmates; twenty-one of them being white men, two colored men, twelve white women and one of money and personal property and re-

colored woman. The condition of the jail they found to be all that could be reasonably expected, considering the fact that the building is not a modern one, which renders it conchase money and execute deed for real siderably more easy to escape from the buildings of like character built in more The last will and testament of Milton modern times. They received no com- H. Reindollar, deceased, admitted to plaints from the prisoners of their treatment by the sheriff.

The almshouse property and buildings they found to be in good condition under the management of Mr. Humbert, the present steward, and his most excellent wife, who is the stewardess. They are led to recommend, by reason of their own observation, and the suggestion of a regular visitor and interested worker, for the good of the inmates at the Almshouse, that, notwithstanding the fact that all is done for the inmates that could possibly be expected by Mr. Humbert and his wife, and such help as they have, it would be only right and proper for the still more efficient care and comfort of the inmates, especially the sick and helpless ones, that a woman should be employed by the County Commissioners to assist the stewardess in her attendance upon them. This could be accomplished, the grand jury is advised, at a very reasonable and moderate cost to the county.

The grand jury is also led, by reason Mr. and Mrs. Murphy left afterward of its present experience with the constable system of the county, to recommend that some legislation is needed in order that the detection of crime, and the apprehension of the offenders could be more surely and readily accomplished there being thirteen districts in the county, with a population of upwards of forty thousand persons and four hundred and torty square miles of territory, policed, outside the incorporated towns, only by the seven constables of the county, two of them being in one district, together with the sheriff and such deputies as he may choose to appoint, and pay out of his own pocket.

They are glad to report, however, the comparative absence of the more serious crimes. The large majority of the cases brought to their attention being rather petty offenses, and that such is the case is attributable to the fact that the vast majority of the people of the county are law-abiding citizens.

to express their appreciation of the kindness and courtesy shown them in their inspection of both the jail and the almshouse by the officers in charge, as well as the delightful refreshments served times when if the editor would publish them at each of these places.

their attention at this time, the grand jury respectfully asked to be discharged, subject to the further summons of your honorable Court.

the counties will have to keep wide awake to prevent well laid schemes from awake to prevent well laid schemes from going through, having for their object, class legislation-and small classes, at that. Maryland has, in common with other states, suffered from the carefully planned efforts of various "interests," and for many years. These interests employ eminent counsel, have their desired legislation all ship-shape before the legislature convenes, and see that it is favorably handled on the floor. Such legislation has a pre-arranged following, as well as plenty of influential lobbyists, and is most difficult to defeat.

The counties, as a rule, are not promoters of such legislation, but there are occasional notable exceptions. No matter where it originates, or what following it has, class legislation is usually wrong. There is too much of this, and not enough of the general sort. Men are elected to the legislature, not to give benefits and privileges to the few, but to care for the best interests of the many.

It is one of the unfortunate facts with reference to our legislative bodies, that too many, even of our best men, are unskilled in parliamentary usages, and are likely to be easily led, or misled. The man serving his first term, unless he be of unusual mental calibre, or especially well read on public measures, can do but little; indeed, he is kept busying trying to keep track of what is going on,

The "regulars," therefore, are apt to shape all legislation, and to lead from because of their advantage in the way of "knowing the ropes," and especially because they are likely to be given all the Committee chairmanships. In matters political, Committee reports are almost universally adopted; in matters nonpolitical, this is also the rule, but subject to more exceptions.

Every legislature is fortunate when it THE ATTEMPT of the editor of the contains a few strong leaders who can

The Rockville Sentinel (Dem.) com-We have always favored, and always ments bitterly on the fact that over 50,000

> "Neglect of civic duties is a common rights and privileges, which are spurned with apparent indifference as soon sion of political rights carries with it the obligation to exercise them, and to ignore the fact that the things of which

the cause which they privately espouse. ed in the recent election in Maryland. Sun.

The principal issue of the campaign was one of vital importance, whether viewed from the social or economic standpoint, and probably at no distant day it will be found to bear upon the peace and order of the State. The constitutional amendment was defeated by about 15,000 majority. After deducting the defective ballots, it appears that from 50,000 to 60,000 voters stayed away from the polls. They were mostly white men, and it is a fair assumption that the proportion of them who favored the purpose of the amendment is the same as that of the white men who actually voted upon the question. Upon this basis the amendment would have been adopted by a very decided majority. If there is ultimate danger and unrest as the outcome of the election, the stay-at-home voters are the men who will be responsible for the disastrous consequences.'

This sounds very well, from one point of view, but has the Sentinel tried to discover why so many white voters staved away from the polls? How much careless indifference was thereby represented, and how much quiet rebuke? How many stayed away because they are tired of the struggle of trying to vote? We are glad that such an authority as the Sentinel acknowledges the facts in the case, but regret that the same frankness does not extend to the

As we see the situation, the Scatinel ought to demand of its party that it discontinue all unfair disfranchising and election schemes, and come before the people of the state with fair and aboveboard issues. With its difficult ballots everywhere, and its trick ballots in Wilson law counties, it is a dead sure thing that thousands of white voters will lose their votes, either through their being rejected, or through staying away from the polls. The idea that all the ignorance in the state is confined to the Republican party, has long since been exploded, but a good many political leaders are either too blind, or too stubborn, to realize the fact.

When a cold becomes settled in the system, it will take several days' treatment to cure it, and the best remedy to use is Chamberlain's Cough Remedy. It will cure quicker than any other, and also leaves the system in a natural and healthy condition. Sold by all dealers.

#### A Farcical Primary.

Despite the effort to make the Sena-Rayner, who was the only candidate, by persuading good Democrats to act as judges and clerks of election without pay, the Senator's declaration of money expended shows that making even a lone race for the Senate is an expensive luxurv. The faithful did not respond and it cost the Senator, in round numbers, \$12,000 to go over the course alone.

Of course, there is a defect in a law which compels a man to go to any such expense when there is nobody running against him. It is all wrong to make a candidate stand the expense of an election, anyhow, and we should protest heavily to become a candidate for the From the actions of the average gift United States Senate if the primary were anything about the Senatorial primary. of a Senator-where there is but one candidate—is settled and got out of the of a deep religious nature, lively, modest, away from the politicians excuse for that body.

#### Picking a Wife in the Garden of Love.

Don't advertise for a wife unless you mean business. Don't advertise unless vou are prepared for a rush. Don't, unless you are cool headed, fearless and strong enough not to allow yourself to be kidnapped. Little as you may think it, there are thousands of ladies left in this country who have never been married, not to mention the throng of widows who never do get left and who are on the lookout for No. 2, No. 3 or No. 4, as the case may be.

Girls are shy and widows are cov; they are the sought, the courted, the hunted. They are the timid dears who run at the rustle of a leaf; they are the ones who elude, while the men must pursue. That is all very well; we have been told it all our lives. But don't believe everything Laura Jean Libbey writes. Many a man has looked upon a face over which the mantling blush flushed in rosy shyness, has seen the eyelids aroop over eyes like those of a startled fawn, and before he knew what was happening has found himself standing up at the altar with the minister pronouncing a life sentence.

The dispatches from Delmar state that Mr. John N. Furbush, a wealthy farmer of near that place, has advertised for a wife. As an inducement it is stated that he offered a wedding gift of 5,000 real dollars to the lady of his choice. Of course, to the woman the man is the main object, for they will marry for true love alone; but the \$5,000 is not to be overlooked. Mr. Furbush, being a man of standing and substance and a good citizen, was very desirable in himself; and then there was the \$5,000.

Did he get any replies? Well, the mail at his postoffice increased so rapidly that it looked like the day before Christmas. Letters poured in by the hundreds-letters from pretty young girls, from good housekeepers, from good-lookers, from widows who just know how to conduct husbands, from "dreams of beauty." They came from Maine, from California, from the North, South, East, West and other directions; from blondes, brunettes and those who could be either to suit the taste or fashion.

Mr. Furbush has an embarrassment of riches. His trouble is not to find a girl, but to decide which girl. Among the hundreds he has great difficulty in detorial primary less expensive for Senator ciding. It is a serious matter, and man must take his time to make up his mind. He can't afford to make a mistake. He may have heard that tender lyric of Richard Carle's:

With a million peaches 'round me, I should like to know, How I picked a lemon in the Garden of Love,

Where only peaches grow. What a man wants in a woman is somewhat as follows:

She must be a dream of beauty that will make Maxine Elliott faint and Calvalieri fade away. She must be an angel with the smile

of a seraph and a great mass of magnificent hair, and all her own natural. She must possess a perfect temper and

never raise her voice save in song. She must be a good cook and always

ready to do same. She must be a splendid housekeeper

She must love children and be able to merchants, and do not blame them; fore they need the gifts. We do not "direct primary" the Democratic party care for them and raise them by hand. She must be a fine musician and have a mind stored with all the intellectual tion, both at home and abroad, is sharp standing customs, which are likely a situation and robs the city of any real wealth of the ages, but must never get and energetic, and they need all the part of the pleasure of gift-giving, but it share in determining the question of the idea that hubby hasn't the superior

She must dress in the latest fashion,

She must be interesting, elusive, gay, way of the Legislature, thus taking retiring, self-sacrificing, brilliant, fascinating, but a lover of home and fireside, letting the matter block the work of preferring the society of her husband to anything else on earth, but not worrying when she doesn't get any of it.

That is all that most men require. It chief claim to distinction will be that it is little enough, goodness knows. But even then you may not always get a woman that exactly fills the specifications. Some of them have their faults, and even in the center of the Garden of Love a man must be particular. - Balt. Sun.

#### .... Kills Her Foe of 20 Years.

"The most merciless enemy I had for 20 years," declares Mrs. James Duncan, of Haynesviile, Me., "was Dyspepsia." I suffered intensely after eating or drink ing and could scarcely sleep. After many remedies had failed and several doctors gave me up, I tried Electric Bitters, which cured me completely. Now I can eat anything. I am 70 years old and am overjoyed to get my health and strength back again." For Indigestion, Loss of Appetite, Kidney Trouble, Lame Back, Female Complaints, its un-equaled. Only 50c. at R. S. # Farm and Garden

WHY HAY IS GRADED LOW.

Success of Alfalfa In the West on Irrigated Lands.

The rules of the National Hay association recognize twenty-three grades of hay, which seem to fall into five classes-timothy, clover, mixed timothy and clover, wild grasses and alfalfa. Choice timothy hay must be sound, properly cured, of bright natural color, not mixed with more than one-twentieth of other grasses and well baled. Lower grades of timothy are Nos. 1, 2 and 3 and "no grade." Clover hay has two grades, No. 1 and No. 2. No. 1 clover must be medium clover, sound, properly cured, not mixed with more than one-twentieth of other grasses and well baled. Choice alfalfa hay must be reasonably fine leafy alfalfa of bright green color, properly cured, sound, sweet and well baled. Other grades of alfalfa are Nos. 1, 2 and 3 and "no grade." These rules are used by most cities that have official inspection.

A large percentage of the timothy on the market is graded below No. 1. The reasons are that many meadows are cut for years until they become weedy and mixed with other grasses and that

FIELD OF ALFALFA IN CALIFORNIA.

the hay is often cut too late, so that it loses the bright natural color and palatability. If the farmer would send to market nothing but what the feeder considers good he would get a higher price. It might be necessary in some price. It might be necessary in some "School Hygiene." cases to educate the country buyer

among city feeders, because it is not only nutritious, but palatable and nonlaxative, and the horse is not likely to overfeed. Nevertheless other kinds of hay would often prove better for the feeder. Alfalfa, for instance, has high muscle building qualities and is especially valuable for draft horses. It is highly relished, however, and the horse may overfeed. Doubtless the feeder will in time learn that hay from legumes has great value when properly Schools."

Meantime the farmer is obliged to include clover and other legumes in his rotation in order to maintain the fertility of his land.

In any case the hay should seek to produce the highest grade by keeping his meadows pure and by proper methods of cutting, curing and stacking.

The hay crop of California is one of our most valuable agricultural products, being since 1905 worth over \$31.-500,000. Alfalfa is increasing yearly in acreage and value. From three to five cuttings may be made yearly on irrigated ground.

California grain hay (cut in the milk) is highly valued for feed and is sent east by the train load for feeding race horses. It often averages in value per acre more than the grain, as in 1906 the value per acre for grain hay was \$10.80 as against \$8.50 for grain. The illustration shows a field of alfalfa hay in California.

Getting Rid of Weeds.

The problem of weed eradication is one of the most serious which contront the farmers of Iowa and adjoining states. During the last few years a method of killing weeds has been discovered which promises to greatly lighten the annual toll which the farmer pays to these pests. This new method consists in spraying the weeds with certain destructive materials known as herbicides. Some of these herbicides, of which iron sulphate is the most promising, will kill nearly all kinds of common weeds without injuring the oats, wheat or other crop in which they happen to be growing. In fact, in several cases the sprayed grain was thriftier and yielded more than that which did not receive the treatment. This method is especially valuable for destroying mustard in grainfields and dandelions and other weeds on lawns.

California's Farmer Congressmen.

John Bidwell and Timothy G. Phelps were the only two farmers ever elected to congress since California's admission into the Union, nearly sixty years ago. Bidwell resided at Chico, in Butte county, and was elected in 1864 from the Third congress district. At that time there were no railroads to the east and all communication was by steamer. When Bidwell reached San Francisco he met John Conness, who nad already served one session in the senate. In conversation over the transportation question Conness said he had crossed the isthmus of Panama three times and proposed to try Nicaragua for a change. So Bidwell and he went on to Washington together by way of San Juan del Sur and Greytown.

#### THE GRANGE

Conducted by J. W. DARROW, Chatham, N. Y., Press Correspondent New York State Grange

Plan For the Discussion of Lecturer's Programs.

Practical Subjects So Presented That They May Be Most Generally Discussed In All Granges Throughout the State

The literary programs presented by the lecturer of the state grange of Oregon and the method proposed for their use are worthy more general publicity. Oregon is a small grange state, and its granges are divided into ten districts for the state lecturer's purposes. The names and location of the granges are printed by districts as diagram No. 1, and following those is a schedule known as diagram No. 2, which is as SCHEDULE OF PROGRAMS, DISTRICTS

AND MONTHS.
1 2 3 4 5 6 7 8 9 10

Districts Ivos.	-	-	-	_						
Nov. '08. Prog. No.	1	2	3	4	5	6	7	8	9	10
Dec Prog No.	2	3	4	9	6	4	- 8	9	10	7
Inn '00 Prog No.	-3	4	5	6	7	- 8	9	10	1	2
Fah Prog No.	4	5	6	7	- 8	9	10	1	2	43
March Prog No.	- 5	6	7	- 8	9	10	1	- 2	3	- 4
April Prog No.	6	- 7	- 8	9	10	- 1	2	3	4	- 6
May Prog No.	- 7	-8	9	10	- 1	2	3	. 4	b	. (
June Pros. No.	- 8	9	10	1	2	3	4	5	6	- 1
Inly Prog. No.	- 9	10	- 1	2	3	4	b	6	4	
SeptProg. No.	10	1	2	3	4	5	6	7	8	
	1	.1.	. 7.	-1-		***	+1	20	6111	h

Following this schedule are the jects to be discussed throughout the year, known as diagram No. 3, the programs being numbered from 1 to 10, each program comprising four subjects They are as follows:

GENERAL PROGRAM FOR YEAR. PROGRAM I.
"Road Legislation For Oregon."

"The New Farm Home."
"Surroundings of the Home."
"The Greatest Present Needs of the Country School."

PROGRAM II. "Our National Immigration Problem."
"The Folly of the Bare Fallow."
"The Care of the Home-Home Sanita-

"The Schoolhouse and Its Surroundings."

PROGRAM III. "Our National Waterways and Their

PROGRAM IV. lso.

Timothy has the lead. especially of Natural Resources."

"Tillage, Drainage and Irrigation."
"Mold In the Home."
"The Raising of School Funds." PROGRAM V.

"The Prevention of Disease."
"The Farm, Orchard and Garden." "The Distribution of School Funds."

PROGRAM VI. "Food Adulteration and Its Detection-Pure Food Laws."
"Soils—Their Origin and Classification."
"Pure Water and Pure Milk."
"Centralization and Consolidation of

PROGRAM VII.

"The Patent Medicine Evil and the Cru-

sade Against It."
"Plant Food—Character and Source."
"Meats and Vegetables." "High School Development In Oregon."

PROGRAM VIII.
"Our Defective, Dependent and Delinquent Classes and the Institutions Which "Barnyard Compost and the Mainte-

nance of Fertility."
"Diet and Mastication."
"Literature For Boys and Girls—School

PROGRAM IX.

American Farmer Feeding the "The Advantages of Crop Rotation."
"School Training In Domestic Econo-

"Agricultural Education." PROGRAM X.

"Elimination of the Tramp."
"Clover, Vetch, Alfalfa and the Field

"The Fireless Cooker."
"Ethical Ideals In School and Home." The carrying out of the lecturer's plan is an easy matter. If the reader will select any program, as No. 1, and notice where it occurs in the schedule he will catch the idea. It is a good one. Here are forty important topics covering many subjects in which the farmer is vitally interested, directly or indirectly, and if the plan is faithfully carried out every grange in the state will consider them during the year. There is, therefore, a certain unity in the literary work of the granges of Oregon, and an opportunity is afforded all the granges in a given district of the state to consider the same subjects at the same time, and when the year is done it is reasonably certain that the general discussion of these subjects will add very materially to the sum total of practical knowledge possessed by the grange membership

A Grange Talk.

of the state.

Professor M. W. Harper delivered a lecture before Forest City grange, Ithaca, on "Breeding Horses For Profit and Pleasure." He recommended the breeding of draft horses as being much easier and more profitable than to raise other breeds, because the advent of the automobile has not affected the price of draft horses, while it has that of the fine carriage breeds. In his opinion, the best manner in which farmers of this state can acquire good draft horses is to form associations for the breeding of such animals.

A Remarkable Showing.

The growth of the grange during the year ending Sept. 30, 1909, will make a remarkable showing. With more new granges organized than in any year for thirty-five years and the membership increased in the same propertion, there is abundant reason for the friends of the organization to rejoice.

#### That Necessary Magazine

-for the thinking man-for the professional manfor the busy business man-and his family; in short, it's for You

25 cents per copy

\$3.00 a year

the rule in magazine buying of America's intellectual aristocracy. It is indispensable to the busy business man, who must keep abreast of the times, because it gives him the real news of the day in concise, readable form; it is invaluable to the thinking man, who demands only the truth and then draws his own conclusions, because it gives him just plain, straight facts.

It is helpful to the whole family. In it you will find a monthly picture

of men and affairs by Dr. Albert Shaw, in his comprehensive editorial. "Progress of the World;" a clever cartoon history of the month; book reviews; the gist of the best which has appeared in the other magazines and newspapers of the world; pithy character sketches; and interesting articles on the all-important topics of the day. Authoritative, non-partisan, timely and very much to the point, "it's a liberal education," is the way subscribers express it.

OUR 1909-10 CATALOGUE

of all American magazines is a money-saver. You can't afford to order for next year without first seeing it. If you appreciate superior agency service, and demand maximum magazine value for the fewest dollars, write for it—today. It's free to YOU.

The Review of Reviews Company, New York

#### THE ROMANCE OF WHEAT.

Once Raised For Princes Only, Now the World's Food.

Wheat is the food of princes and peasants. It is the food of the world. It was known to be the best food for fifty centuries, but it did not until thirty or forty years ago become universal. Every community ate all it raised. There was none to sell. It was so precious that only kings and the nobilities could afford it. It was sowed by peasants, who reaped it with a sickle by hand. For 5,000 years no better plan was conceived than the sickle and the scythe. Then came the reaper, an invention by Cyrus H. McCormick, of Scotch-Irish descent. Then the world began eating white bread.

This new machine, the reaper, when was equal to forty sickles. With one meat into a brooder full of twoman to drive it, it could cut and bind 400 persons. In its most highly de- that they needed it. veloped form, the combined harvester tic a machine that thirty-two horses it is costly. However, cost should be are required to haul it.

and bags it at the rate of one bag times its cost. Feed your poultry regbinders, etc.—is probably as an idea many as 1.500,000 a year, two-thirds of them being made in the United

Because of this harvesting machinery the wheat crop of the world on the end is loosely drawn around is now nearly twice what it was in the waist of a moyen dress and knot-1879. The American crop has multi- ted at the center front. plied six and a half times in tifty If the seams near the collar of your years. Western Canada, Australia, shirt waists scratch the neck and feel

wheat producers. The cost of growing one bushel in should be French seamed. hours. With a self binder it is now ing. ten minutes.

Then came the steamboat and the square meshed burlap was finished railroad that carried the grain. At the with a spider web pattern of dark red outset it was shipped in bags. Then raffia held in place with red silkateen. some railway genius invented the grain It was durable enough and had just car, which holds as much as twenty or twenty-five wagon loads, and today one other cushions. The raffia ends can of the ordinary moving pictures of an be thrust through the material, thus American railroad is a sixty car train hiding rough points. traveling eastward with enough wheat in its rolling bins to give bread to a city of 10,000 people for a year.

The Siberian railway, which is the longest straight line of steel in the world, was built largely as a wheat conveyor. So were the railways of western Canada, Argentina and India. It is cheaper to carry wheat from one country to another than from the barn to the nearest town. The average distance that an American farmer has to haul his grain is nine and a half miles, and the average cost of baulage is 9 cents for a hundred pounds. Thus it has actually become true that to carry wheat ten miles by wagon costs more than 2.300 miles by steamship. Such is the tense efficiency of our wheat carrier system that a bushel of grain can now be picked up in Missouri and sent to the cotton spinners of England for a dime.

First Feeding of Chicks. Don't feed raw dough or rough

mash to young chicks such as you feed larger chicks. Raw dough sours in the crop and brings on all sorts of from one corner. A pretty way to bowel troubles. If you want to feed make a hair receiver of this kind is this stuff cook it well beforehand. Well means through and through, not ribbon and tie with a ribbon string just a hard crust on the outside and and rosette. Toothbrush holders can the middle a soggy, wet mash. This be made of tall baking powder boxes. is as bad as feeding it raw.

Chicks will do well for awhile on a grain ration alone, but they will do try effects.

better if fed a little meat from the first. If the grain ration is dry and sweet chicks can be fed a little green

BREAKFAST IN THE POULTRY YARD.

cut bone from the very first. Just a little thrown in so that each chick can get a morsel or two will help wonderit was full grown into the self binder fully. If you ever dropped a bit of weeks-old chicks and saw them scramenough wheat in one season to feed ble and fight over it you won't doubt

Cooked meat cut up very fine is and thrasher, it has become so gigan- safer and perhaps just as good, but little considered in feeding chicks for This leviathan cuts a fifty foot road- the first few weeks, as a foundation way through the grain, thrashes it can be then secured well worth many every half minute. And the total ularly. They will come to know you world production of reapers of every and wait for you and are all the better sort-self binders, mowers, headers. for it. The illustration will give you

#### NEEDLEWORK NOTES.

A rope made of braids and knotted

America with machinery and high Cluny is at last making beautiful wages is now about half a dollar, the nightgowns that are perfect which is less than the cost in Europe dreams to behold. Rows of this pretand as low as the cost in India, where ty insertion, besides edging of about laborers can be hired for a few pen- an inch and a half in width, are used nies a day. With a sickle the time in combination. Cluny sounds burdencost of a bushel of wheat was three some on a nightgown, but it is charm-

> A cushion made of extremely coarse enough color to look attractive among

The home seamstress will find it much easier to make her own petticoats, both white and flannel, if she buys the ready made circular yokes, which come in all sizes at low cost. These yokes are doubled and so arranged by curves that they fit over the hips without wrinkling. The petticoat is sewed between the two thicknesses of the yoke, and all unnecessary fullness is overcome.

Something useful can be made of a cocoa or baking powder box. Cut out the bottom of the box and cover the cylinder with cretonne, ribbon or wall paper to match the room decorations. Run a ribbon through it to make a hanger, and fasten one end with a circular piece of material. Cover a disk for the opposite side and hinge it on with ribbon. It can be pinned in place or left without the little lid. This makes a useful hair receiver. Cut one end off a small pasteboard box and cover with any desired material to make a neat hair receiver. The box can be hung with ribbons to cut the box, then finish with baby They look pretty when covered with heavy wall paper, in leather or tapes-

Mr. Elias Erb has purchased the property from J. Ham Repp, on Benedum St., and will take possession of it in the near future.

A number of the stores in this place, are now lighted up with electric lights, which is proving quite a success, and it is likely more stores and dwellings will be lighted up in the near future.

The Lutheran Sunday School will have its Christmas service on Christmas night, case of kidney or bladder trouble that is | as is the usual custom of the school.

not beyond the reach of medicine. Cures backache and irregularities that Mr. Barzillai A. Jones and wife, load-Cures backache and irregularities that if neglected might result in Bright's disease or diabetes.

ed their household goods on a car here, Tuesday, to be shipped to Aspers, Adams Co., Pa., their future home.

#### Assisting Farmers to Plan Work.

Mr. R. E. Dimick, a well known writer on farm topics, residing in Wisconsin, says;

'During the past few years great advances have been made along the lines of agricultural education. The experiment stations have constantly broadened their work, and lately Wisconsin, always at the front in agricultural education, has started to make all the public institutions that have farms, demonstration and distributing points for the teaching of improved methods and the distribution of the improved varieties of grain that are being developed at the station. All of this is a long step in advance, but I believe there is another plan that has never been tried out yet that will work great good. I believe that if farmers in each locality will club together and plan their work under the direction of some competent experiment station man it would prove very profitable for the farmers, and at the same time would introduce improved methods more rapidly and more thoroughly than

any other system could do.

An example of what might be accomplished in this way, let us take the dairy farmers. Suppose that a dairy-man has been keeping ten cows which have been bringing him in a net profit of \$10 per cow, and that this is rather it before the holidays.

Mrs. Frank Six, of Pittsburg, is visiting her mother, here. She expects to his herd under the management of the experiment station man and this man showed the dairyman that if he kept one good cow she would make him more money than his ten poor ones. The experiment station man would be able to show by actual results what he could do, and the dairyman could not help being

convinced. Then it would be shown that the dairyman might just as well keep ten good ones as ten poor ones. He would probably say that he had not the money to buy them and that he could not borrow it, on account of having no credit. Men of means, knowing that the business was being run by a competent man, would be only too willing to extend the credit, and the ten good cows under his management would pay for them-selves in a year or two. If instead of sending out thousands of dollars' worth of fancy stock and placing it in the hands of incompetent farmers, J. J. Hill had adopted this plan, I do not think he would now feel obliged to ride through the country after dark to avoid seeing the run-down stock and farms he has

done so much toward trying to build up. I believe that the experiment stations would be only too glad to supply the men for this work, and that the farmers would be only too willing to try it out. Of course, there are those who will cling to their independence, and those who will not do the work as directed. But as they come to see the better-filled pocket books, they will all come to it. Many of the failures in farming are due to the want of ability to lay out and plan work, to read and to study. We often see a run-down farm that is owned by a man that is classed as a lazy man, but more often than not this same man is one of the best in the neighborhood to work for others. He is not lazy, but simply lacks the ability to plan his own work. Give him someone in whom he has confidence to lay out his work for him and he will be encouraged. As soon as he is in the right rut he will keep in it, and then will be able to run his business for himself."

#### No Case on Record.

There is no case on record of a cough or cold resulting in pneumonia or consumption after Foley's Honey and Tar has been taken, as it will stop your cough and break up your cold quickly. spent last week visiting relatives here.

Miss Carrie Shipley, who had been visiting relatives in Catonsville, has re-

#### President Taft Talks Personally.

Mr. William Dudley Foulke, a prominent politician, of Indiana, recently wrote President Taft a rather fatherly letter, in which he aimed to advise him, and to steer him clear of rocky places, mentioning, among other things, the un-popularity of his indorsement of Aldrich and Cannon. Mr. Taft said, in reply that the people of the United States have their leaders, and that he found Mr. Aldrich and Mr. Cannon installed as

keep them literally, but that the Executive is not an autocrat, and that the responsibility for legislation rests on Congress, and, therefore, ultimately on the

To an intimation in Mr. Foulke's letter that there might be a return from Elba, (Col. Roosevelt) Mr. Taft replied that he is not nearly as much worried about his future as some of his friends seem to think he should be.

The President closed the letter with the statement that if he lives he will be President for three years more and that while he holds the job he will be President. He intimated that he does not Several new students arrived during care to be bothered by pessimistic Repeated publicans, as he has a lot of things to do and is going to do them if Congress is willing; and if they are not done, Congress, and not the Executive, will be responsible.

The President's letter to Foulke really is only a repetition of the speech that he made at Macon, Ga., during the recent Taft tour. After explaining the President of the United States is not the Czar that he is popularly supposed to be, Mr. Taft said that he did not intend to be held responsible if Congress did not act on the measures be recommended, and

"As I intend to recommend a good many measures at the next meeting of Congress, I have taken this method intimating to you where the responsibility will be if those measures do not

#### Forced Into Exile.

Wm. Upcharch of Glen Oak, Okla, was an exile from home. Mountain air, he thought would cure a frightful lungracking cough that had defied all reme dies for two years. After six months he returned, death dogging his steps. "Then I began to use Dr. King's New Discovery," he writes, "and after taking six bottles I am as well as ever." It saves thousands yearly from desperate lung diseases. Infallible for Coughs and Colds, it dispels Hoarseness and Sore Throat. Cures Grip, Bronchitis, Hemorrhages, Asthma, Croup, Whooping Cough. 50c. and \$1.00, trial bottle free, guaranteed by R. S. McKinney, Drug-gist, Taneytown, Md.

#### Entertaining and Hospitality.

I have no sympathy with the tired murmur of the straining women who speak of entertaining as "a duty to society." We all have duties to society, but entertaining is not one of them. There is no more obligation for a woman to entertain than there is for a man to swap horses with a neighbor. The conditions as they now exist are identical. The neighbor may desire to swap his horse, but no man feels bound on that account to exchange his own for it against his wish. Since I have recognized the market value of my own horse and how much I am always expected to give "to boot," I

never swap. The real and usually neglected duty to society is hospitality, and that has an important distinction from enter taining. It is hospitality only when the entertainment is without hope of reward. The moment the host hopes to receive in exchange even a good opinion, a little affection or admiration it ceases to be hospitality and becomes entertaining. The foundation of hospitality must be perfect unselfishness.

The question left us to solve in individual cases is, Which will give the most satisfaction as society is now oragnized ?- Ethel Davis in "Dishonesty and Caste."

The Egg Factory on your farm will work full time if you feed your hens Fairfield's Egg Producer regularly. provides them with egg-making materials and makes egg production regular and exceedingly profitable. Costs but a trifle. (Ask for Fairfield's Free Book) Sold under written guarantee by S. C. Reayer, Taneytown, G. W. Yeiser, Union Mills, T. W. Mathers & Sons, Manchester and M. R. Snider, Harney.

Her Logic. A United States senator in one of his campaigns told this story to illustrate the logic of an opponent: Did you ever hear about the young woman in Fort Dodge? One spring morning she sat on the piazza of her pretty little home sewing a button on her husband's coat. The husband himself appeared, and she said fretfully: "It's a perfect shame the careless way the tailor sewed this button on. This is the fifth time I've had to sew it on again for

A Card This is to certify that all druggists are authorized to refund your money if Foley's Honey and Tar fails to cure your cough or cold. It stops the cough, heals the lungs and prevents serious results from a cold, prevents pneumonia and consumption. Contains no opiates. The genuine is in a yellow package. Refuse substitutes. R. S. McKinney, Druggist, Taneytown, Md.

#### A Traveler's Tale.

The passengers were beguiling the journey with pleasant conversation. One man in particular, who had the look of a traveler, told of long sojourns in foreign lands and kept them all interested with his anecdotes. "Yes, gentlemen," said he, "there is nothing like travel to expand the mind. Now. I don't suppose, for instance, that many of you have ever seen a beet root putting on a waistcoat?" His fellow passengers stared in surprise. "No: we certainly have not!" "Or a lettuce donning a pair of trousers?" "No!" "Or a spring onion fixing on its tie and "No not even that" gentlemen," said the traveler as the train drew up at the terminus and he prepared to alight. "you may believe me or not, as you like, but several times in my travels I have seen not only a beet root or a lettuce or an onion but a whole salad dressing!"-London Mail.

Lame back comes on suddenly and is extremely painful. It is caused by rheumatism of the muscles. Quick lief is afforded by applying Chamber-lan's Liniment. Sold by all dealers.

#### "Sparks."

"I wonder," said young Mr. Staylate, hunting around for subject matter of conversation, "why they used to call beaus 'sparks.' "

"Perhaps," replied the suffering maiden, deftly showing a yawn in the act of apparently concealing it. "it was because sometimes they went out."-San Francisco Chronicle.

#### No Jewish Lullabies.

It is remarkable that, notwithstanding the love and devotion of a Jewish mother, there seems to be no trace of a real Jewish lullaby. Those known are of a recent origin.-American He-

Soup a Luxury. Forcing the habit of the camel, we managed to take enough water before starting to keep sufficient liquid in the veins for the day's march, but it was difficult to await the melting of the ice at camping time.

man endurance to the limit of the

strain of every fiber and cell. The hard work which followed, under an

occasional burst of burning sunbeams,

brought intense thirst.

In two sittings-evening and morning-each took an average of three quarts of water daily. This included the tea and also the luxury of an occasional soup. There was water about everywhere in heaps, but it was in crystals, and before the thirst could be quenched several ounces of precious fuel, which had been carried thousands of miles, must be used. And still this water, so expensive and so necessary to us, ultimately became the greatest bane to comfort. It escaped through the pores of the skin, saturated the boots, formed a band of ice under the knee and a belt of frost about the waist, while the face was nearly always incased in a mask of icicles from the breath-a necessary part of our hard lot in life, and we learned to take the torture philosophically. "From ice it comes, to ice it goes," like the other elements of the body, when the good preacher pronounces the last words "from dust to

From the eighty-seventh to the eighty-eighth parallel we passed for two days over old ice without pressure lines or hummocks. There was no discernible line of demarcation for the fields, and it was quite impossible to determine if we were on land or sea mileposts to pass. To advance and ex- ice. The barometer indicated no elevation, but the ice had the hard, wavone sleep at the cost of our pound of ing surface of glacial ice, with only superficial crevasses. The water obtained from this was not salty, but all of the upper surface of the ice of the polar sea makes similar water. The nautical observations did not seem to indicate a drift, but nevertheless the combined tabulations do not warrant the positive assertion of either land or sea for this area.

An Air Line Course.

This ice gave a cheering prospect. A plain of purple and blue ran in easy undulations to the limits of vision without the usual barriers of uplifted blocks. Over it a direct air line course was possible. Progress, however, was quite as difficult as over the irregular pack. The snow was crusted with large crystals. An increased friction reduced the speed, while the surface, too hard for snowshoes, was also too

frost and through a mental desert.

and paced off the day's pull under the ing became impossible-longer in light winds, shorter in strong winds, but always until the feet became numb and

Then came the arduous task of building a snow house. In this the eyes, no longer able to wink, closed, but soon the empty stomach complained, and it was filled up again-not with things that pleased the palate, only hard fuel to feed the inner fires, while the ear sought the soft side of ice to dispel fatigue; no pleasure in mental recreation, nothing to arouse the soul from

To eat, to sleep, to press one foot ahead of the other, was our steady vocation, like the horse to the cart, but we had not his advantage of an agreeable climate and a comfortable stable at night.

Where Madness Sits.

yond endurance. Their weariness was

main effort of the expedition. On the morning of April 13 a strain of agitating torment reached a breaking point. For days there had been a steady cutting wind from the west, which drove despair to its lowest reaches. The west again blackened sun was screened with ugly vapors,

No torment could be worse than that never ceasing rush of icy air. Ahwelah bent over his sled and refused to move. His dogs turned and looked inquiringly. I walked over and stood by his side. Etukishuk came near and at any time enter as an active part of stood motionless, staring blankly at the southern skies. Large tears fell from seemingly endless fields of ice the Ahwelah's eyes and piled a little frost physical appearances come under a of sadness in the blue of his own shadcareful scrutiny. I watched daily for ow for several minutes. Not a word possible signs of dangerous failure in was uttered, but I knew that each felt strength, for serious disability now that the time had come to free the fetters of human passions. Slowly Ahwelah said, "Unne sinig pa-oo-ah-tonie i-o-doria ("It is well to die-beyond is

For sore throat, sharp pain in lungs, tightness across the chest, hoarseness or cough, lave the parts with Sloan's Liniment. You don't need to rub, just lay it on lightly. It penetrates instantly to the seat of the trouble, relieves congestion and stops the pain.

Here's the Proof.
Mr. A.W. Price, Fredonia, Kans.,
says: "We have used Sloan's Liniment for a year, and find it an excellent thing for sore throat, chest pains, colds, and hay fever attacks. A few drops taken on sugar stops coughing and sneezing instantly."

Bees Swarming Have Scouts. Swarms of bees are sometimes compelled to take refuge in very remarkable shelters. A peculiar and instructive instance was observed by the writer one spring. The swarm flew over a large vineyard which contained few buildings. One of these buildings was constructed of hollow concrete blocks. The swarm flew directly toward a small hole in one of the blocks and disappeared in the interior. No doubt the swarm had rested on a tree had sent out scouts to seek a home. The scouts found the little hole leadery to their comrades. This case furnishes indisputable proof that swarm-

Only Seeking Information. The average New York boy is not a wonder of wit and wisdom, but most see it. Also the contrary. Not long of a Sixth avenue place, "Boy Wanted." He was looking for something

of that kind and walked in. There was nobody in sight, and he stood gazing. Presently the proprietor, a most grouchy person, appeared. "What do you want here?" he in-

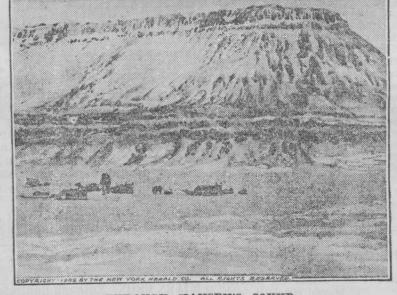

quired with scant courtesy.

"Well," replied the boy, disturbed by the man's manner and hesitating, "do you want a boy here?" "That's what the sign says, don't

"Yep," responded the boy, getting

his second wind. "Then we want a boy."

"Aw right," grinned the boy, back-Compound Syrup White Pine and Tar have me," and he wiggled his fingers for Coughs, Colds, Hoarseness, &c .- Get at the man and went out quickly .-10-23-3mo New York Herald.

THROUGH NANSEN'S SOUND.

polar gateway to its sweep of the | was at hand, however, to consider serinorthern ice at midnight. From the ously the necessity of an early return. end of the polar night late in February to the first of the double days and midnight suns we had forced a trail through darkness, blood hardening temperature and over leg breaking irregularities of an unknown world of ice to an area 200 miles from the pole.

The Midnight Sun.

Now we had the sun unmistakably at midnight, and its new glory was quite an incentive to our life of shivers. Observations on April 8 placed camp at latitude 86 degrees 36 minutes, longitude 94 degrees 2 minutes. In spite of what seemed like long marches we had advanced only 106 miles in nine days. Much of our hard work was lost in circuitous twists around troublesome pressure lines and high, irregular fields of very old ice. The drift ice was throwing us to the east with sufficient force to give us some anxiety, but with eyes closed to danger and hardships the double days of fatigue and glitter quickly followed

one another. The temperature, ranging between 36 and 46 degrees below zero F., kept persistently near the freezing point of mercury, and, though the perpetual sun gave light and color to the cheerless wastes, we were not impressed with any appreciable sense of warmth. Indeed, the sunbeams seemed to make the frost of the air pierce with a more

painful sting. There was a weird play of orgies, seemingly most impressive at this time-clouds of steam rose from the frozen seas. In marching over the golden glitter snow scalds the face, while the nose is bleached with frost. The sun rose into zones of fire and set into burning fields of ice, but with pain we breathe the chill of death.

In camp a grip of the knife left painful burns from cold metal. To the frozen finger the water was hot. With wine spirits the fire was lighted, while oil delighted the stomach. In dreams heaven was hot, the other place was cold. All nature was false. We seemed to be nearing the chilled flame of a new hades. In our hard life there was nothing genuinely warm. The congenial appearances were all deception, but death offered only cold comfort. There was no advantage in sui-

cide.

Nearly half of the food allowance had been used. In the long marches supplies had been more liberally used

Passing Highest Reach.

We had now passed the highest

than anticipated, and now our dog teams were much reduced in numbers. A hard necessity had forced the cruel law of the survival of the fittest, for the less useful dogs were fed to the steady working survivors. Owing to the food limits and the advancing season we could not prudently continue the outward march a fortnight longer.

We had dragged ourselves 300 miles over the polar sea in twenty-four days. Including delays and detours, this gave an average of nearly thirteen miles daily on an air line in our course. There remained an unknown line of 160 miles before our ambitions could be satisfied. The same average advance which we had made on the pack would take us to the pole in thirteen days. There were food and fuel enough

to risk this adventure.

Work and Observations. In the diary of the succeeding days' doings there appear numerous tabulations of Fork and observations. In the new cracks the thickness of the ice was measured. The water was examined for life. The technical details for the making and breaking of ice were studied, and some attention was given to the altitude of uplifted and

submerged irregularities. Atmospheric, surface water and ice temperatures were taken, the barometer was noted, the cloud formations, weather conditions and ice drifts were | to renew its soul despairing blast. The tabulated. There was a continuous routine of work which does not appear and the path was as cheerless as the here. It belongs to the specific details arctic night. of the history of the exploration, which will appear in the later publica-

tion of scientific data. This work, like the effort of the foot in the daily drive of duty, became. more or less automatic and does not the story. As we now run along over meant a fatal termination.

A disabled man could neither continue nor return, but every examination gave another reason to push hu- impossible").

weak to give a secure footing. The loneliness, the monotony, the hardship OF QUALITY! of steady, unrelieved travel were now keenly felt. It is not often that man's horsepower is put to the test as ours was. We were compelled to develop a working energy to the limit of animal capacity. Day after day we had pushed along at the same steady pace over plains of Specially Selected and

As the eye opened at the end of an icy slumber the fire was lighted little by little, the stomach was filled with liquids and solids, mostly cold-enough to last for the day, for there could be no halt or waste of fuel for midday feeding. We next got into harness lash of duty. We worked until stand-

its icy inclosure.

Words and pictures cannot adequately describe the maddening influence of this sameness of polar glitter, combined with bitter winds, extreme cold and an overworked body. To me there was always the inspiration of anticipation of the outcome of ultimate success, but for my young savage companions it was a torment almost bemade evident by a lax use of the whip and an indifferent urging of the dogs. They were, however, brave and faithful to the bitter end, seldom allowing selfish ambitions or uncontrollable passions seriously to interfere with the

#### Original and Selected Articles of Interest to the Home.

We invite contributions to this department from all readers who have something to say on topics which relate especially to home improvement, social conditions, or moral issues.

While we disclaim all indorsement of sentiments which may be expressed by contributors, and desire to be as liberal as possible, we at the same time request all to avoid personalities, and stick to proper expressions of opinion.

opinion.

All articles for this department must be in our office not later than Monday morning, of each week, to be guaranteed insertion the same week, and all articles must be signed with the name of the author, even when a nom de plume is given.

#### The Anti-saloon League's Working Methods and What It Has Accomplished.

The Thirteenth National Convention of the Anti-saloon League of America will meet in Chicago on Monday, December 6, the same day Congress convenes in Washington. For a week before the assembling of the convention the superintendents and field workers of the league will be in conference, preparing campaign plans to be submitted to the national body.

The Anti-saloon League is a remarkable institution. It is the most potent organization in politics, outside of the regular political parties, ever known in the United States. It is avowedly and openly a political institution, yet it has so localized its activities that it works with either or both of the two principal parties, as its best interests may dictate. It does not hesitate to change from Republican to Democratic over night, and sometimes it forces both parties to accept its men and measures. The league, by the adoption of these tactics has had much to do with the growing tendency to settle local political battles without regard to national issues.

Powerful as it has become, the Antisaloon League is not, strictly speaking, an organization. In the language of its general superintendent, Rev. A. Baker: 'It is a league of organizations. It is the federated church in action against the saloon. Its agents are of the church, and under all circumstances loyal to the church. It has no interest apart from the church. It goes just as fast and just as far as the public sentiment of the church will permit. It has not come to the kingdom simply to build a little local gaged. sentiment, or to assure the passage of a few laws, nor yet to vote the saloons from a few hundred towns. It has come to solve the liquor question.'

While the Anti-saloon League does not represent the churches by virtue of any ecclesiastical authority, it is nevertheless true that the league is in fact a confederation of churches and churchmen opposed to the saloon. It is made up altogether of men prominent in the pulpit and in the pews.

Practically all churches are represented in the league. The Methodists, Baptists, Presbyterians, Lutherans, Disciples, Universalists, Congregationalists, United indorsed the league by formal action, and have appointed delegates to its councils. The Protestant Episcopal Church is represented by Bishop McVicar, of Rhode Island, who is one of the vice presidents of the national league, and by many clergymen in all parts of the country. The Roman Catholic Church has no ecclesiastical connection with the league, and many of its leaders have opposed the organization in politics. The Catholic Total Abstinence Union, however, has a formal alliance with the league. Arch-bishop Ireland was one of the first vice-presidents of the national league, and Rev. Father James M. Cleary, of Minneapolis, is now a national vice-president.

While there are many leaders, both clerical and lay, in all the churches who are compelled by their consciences to oppose the work of the Anti-saloon League, this organization more nearly approaches a federation of the churches than ever before has been seen in this country. Leaders in the movement de- in a cemetery near Doylestown, and beclare that those pessimists who weep for the downfall of the church, and who declare that religion has lost its influence, would do well to consider the power manifested by the federated churches in the fight against the saloons. Certainly the Anti-saloon League, whether for good or evil, has proved itself a powerful factor in politics in the past decade.

The most remarkable feature of the work of the League, as contrasted with other antiliquor fights, is that the Antisaloon League is not always for prohibition. It "goes just as fast and just as far as the public sentiment of the church will permit." For this reason the league sometimes comes into direct opposition to the Prohibitionists. For instance, at this moment the ultra-prohibitionists in Missouri are insisting upon a state-wide referendum vote on the question of absolute prohibition. The Anti-saloon League leaders are not convinced that Missouri is yet ready for such a radical step, and they are fighting to maintain the present status of the local option law. The late Bishop Charles B. Galloway, of Mississippi, was opposed to state-wide prohibition for a long time, but when the hour came he turned the influence of the Anti-saioon League in and liver trouble as it will stimulate that direction and the state went dry. The Anti-saloon Leaguers are all for needs in order to feel well. R. S. Mcprohibition, eventually, but they are Kinney, Druggist, Taneytown, Md.

willing to take a little bit at a time and Examination Papers of Would-be Teach-

The Anti-saloon League in one state may be fighting with the regular Republican organization for straight prohibition. Across the border in the next state it may be fighting with the Democratic organization for a country-unit local option bill, saying never a word about prohibition. In one city it may be allied with a "citizens" movement to oust a regular party organization from municipal power. In another it may be allied with one of the regular party machines in fighting for nothing more radical than a tight Sunday "lid" as its

It is evitable that an organization which thus seizes every opportunity to advance any part of its propaganda should make alliances with forces which invite the severe criticism of the opposition, and often of the prohibitionists. It is also inevitable that a movement which has manifested such great power should attract to it a certain type of self-seeking politician whose conduct brings the league into ill repute. The leaders of the Anti-saloon League say they realize these things, but that in their great fight they are willing to accept aid from any source. What the league wants is

At the convention in Chicago the principal feature on the program will be the call of the states. The names of the states will be called in alphabetical order and the league workers from each will report the progress of the campaign in his ballwick. Nine states will report "all dry." Of these, Tennessee, North Carolina, Georgia, Alabama and Mississippi, voted out the saloons as the direct result of the campaign waged by the league. From every state in the Union the league workers will report victory in the majority of battles in which the organization has engaged. Twenty-three governors of states, half of all the governors in the Union, are committed in part or in whole to the support of the league. More than half the people of the United States live in prohibition territority, and a great deal more than half of the land of the country is "dry," so far as the legal sale of alcoholic beverages is concerned. During the two years since the last meeting of the National League the organization has won political victories of one sort and another in every state, and in the whole country has won more than threefourths of the fights in which it has en-

A striking feature of the propaganda of the organization is that in its fight on the saloons it devotes more argument to the economic and political phases of the question than to the so-called moral issues. The evils resulting from the control of political machines by the saloons, and the economic losses involved in the business are dwelt upon, while there is not nearly so much said about "drunkards" and "horrible examples."

Thus far the league has done very little in national politics. It has been fighting for certain federal legislation and has put Congress on notice that it must sooner or later deal with the question of prohibition for the District of Columbia. If the league should take up an active campaign in favor of the proposed legislation by which Congress would resign to the states the right to regulate interstate shipments of liquors, then the fight would become national. At this time the leaders of the league are divided in opinion as to whether the time has come to enter the national field as an aggressive political force.-FREDER-ICK J. HASKIN, in Baltimore Star.

#### ers Reveal Unique Ideas.

Indianapolis, Ind.—A list of ludicrous answers gathered from manuscripts recently submitted by aspirants for teachers' licenses in Indiana has been compiled by Mrs. Marietta H. Dunn, chief manuscript clerk in the office of the state superintendent of public instruction.

In each list of monthly questions on literature is one having to do with a biblical reference. One in the August examination asked for an explanation of

One was a Tishbite, Whom the ravens fed.

One answer ran: "It refers to Tishbite, whose duty it was to feed the ravens, which was a very low down occupation, and gives the person to whom it is referred a very low recommendation as to a Tishbite."

Another: "The Tishbite had a dream one night where he thought the ravens were eating him. This Tishbite was Pharaoh's butler."

Still another in which religious and secular history is strangely mixed:

"Aligah, having been told by God to flee from those who sought his life, was fed by the ravens. He was concealed in a cave, protected by a spider web, which after he had entered the cave built the web across the door. When those seeking his life passed by they did not enter the cave, for they thought Elijah could not have entered without breaking the

Early in the year, writes Mrs. Dunn, a question in the literature list asked for a discussion on the value of "memory gems." Some of the "discussions" fol-

"Memory gems make us more ambissious."

"Memory gems are sometimes little advices on etiquette and the right and wrong side of things."

'They are a source of instruction, peace and enjoyment to those who contain them.'

'Memory gems are valuable because they impart a thought that becomes fastened in our powers and which are continually producing some effects on our make-up.

'They electrify the soul."

"Many times in after years, when adversities come thick and fast, a beautiful memory gem will be present to help bear the burden.'

"I think by memory gems our conversations are of more interest to our conversers."

In a recent discussion on "The Science of Education" the following was "Emulation has an important place in

the work of the school, for character is what a person is and emulation is what people think you are." James Whitcomb Riley, the poet, was

a topic in a recent examination. Here are some of the opinions expressed concerning him:

"His scenes are all lain in Indiana." "He is a child and a nature poet."

"I consider his poetry brilliant, wholesome and witty, and think he attains the end he aims at."

"I should say he is a portrayer of child nature in his writings. Nature is dry cold weather of the early dealt with likewise, both nature and the child being blended together makes him very desirous to read."

"He is real good for child life and is among the best for there Lit. His poetry will stand the wear and tear." On the international date line the following was submitted:

"The international date line is the date of the revolutionary war because after that the history of the world was in a manner changed. It is necessary to have such a line as a convenient date to

refer or compare things to." Concerning the Conway Cabal one applicant wrote:

"The Conway Cabal was a cable laid from Newfoundland to Ireland. Mr. Conway had a body of about 20 men. who undertook to lay a cable across the Atlantic ocean so that he would communicate with the people of Europe."

Many school children suffer from constipation, which is often the cause of seeming stupidity at lessons. Chamber-Stomach and Liver Tablets are an ideal medicine to give a child, for they are mild and gentle in their effect, and will cure even chronic constipation. Sold by all dealers.

#### Onion Queen of Northwest.

Dayton, Wash.-Miss Alice Turner of this place is being dubbed the "Onion Queen of the Pacific Northwest." This season she planted and harvested ten acres of onions and cleared above all her expenses \$8,330. The crop was an immense one, being raised on new land and watered with artesian wells.

Miss Turner came into possession of a small farm by the death of her father a year ago. She was at a loss to know what to do with the old home and her mother, when she decided to become an onion grower all by herself.

She engaged men to plow and plant her acreage to onion seed, and throughout the summer superintended the weeding and watering of the crop.

In spite of many scoffings from neighbors, who declared onions would be worthless this fall, she perseyered and now is envied by all. The total crop was purchased by a New York commission man for distribution in the east. Miss Turner realized 75 cents a sack for the onions, which yielded nearly one the onions, which yielded nearly one at R. S. McKinney's Drug Store, Taneythousand sacks an acre.

#### The Cost of Living.

One need not share J. J. Hill's gloomy view that "high cost of living is the beginning of every national decline" to agree with him that it is now and here in America a great and grave national

There is no question as to the facts. Bradstreet's index figure of commodity prices shows an average rise of 56 per cent. in 13 years in the price of the necessaries of life. Rent has in many cases risen in even greater ratio. Wages have generally risen not nearly so much.

We must wait for the 1910 census to show how the workingman now shares in the division of his product, but already in 1900 the wage fund in manufacture was shown to be growing only half as fast as capital, and only onethird as fast as miscellaneous expenses. In 1896 the workingman, clerk or professional toiler could buy more food. shelter, clothing and other necessities and comforts with his wages, salary or fees than at any time since the Civil War. Today the man of moderate means can buy less with his income than in 1896. For him the wheels of progress have turned backward, and he is deeply dissatisfied.

The cause and cure, whatever they may be, it behooves statesmen and leaders of thought to discover. The conditions of which Mr. Hill speaks, and which are known of all men, cannot continue without most far-reaching social consequences and political upheavals in what Americans have long been proud to call the best country on earth for the average man. -N. Y. World. ----

You have been experimenting with the old-fashioned "Cure-all" Condition powder long enough. It's time you were using the Modern, sensible and Scientific kind, the Fairfield Blood Tonics. A separate, and Different, Conditioner for each kind of animal. (Ask for Fairfield's Free Book). Sold under written guarantee by S. C. Reaver, Tanevtown, G. W. Yeiser, Union Mills, J. W. Mathers & Sons, Manchester and M. R. Snider, Harney.

#### The Slumber Pillow.

If you ever take naps, you should

If you are not given to the nap-habit yourself, the pillow will make an acceptable Christmas gift to some one who is. It is best made of linen, as it may be washed often and kept sweet and dainty. It is smaller than the ordinary bed pillow, which it is often inconvenient or

undesirable to use in the day time. It may be used on the bed, so as not to rumple the regular cover, or it makes ed, throwing the handkerchief at one an attractive addition to the couch or of the "passengers." As he throws it sofa pillows.

There should be little embroidery, except at the corners.

Make the cover either of a delicately tinted linen embroidered in white, or of white linen, embroidered in white.

Croup is most prevalent during the months. Parents of young children should be prepared for it. All that is needed is a bottle of Chamberlain's Cough Remedy. Many mothers are never without it in their homes and it has never disappointed them. Sold by all dealers.

#### ---Thanksgiving of the World.

Sixty years ago there was something called a world, in which some of us were alive. It was a world of four or five continents of jarring interests; a world parted by three or four oceans. If I wrote to my brother on the other side of the world I might expect an answer in six months. If in the region where he lived the water failed, or the winds did not blow, the poor people there lay down and died of famine. The barns of Ohio might be bursting, but the starying people had to die.

But 60 years have changed all that. All that has been changed because God has worked with his children, and his children have worked with him. Men have been working each for all, and all for each. When a botanist in Java made gutta percha flow from a tree, and when Alexander Agassiz and the rest compelled the Lake Superior mines to deliver their copper, some hundreds of thousands of God's children between them drew the copper into wire and sheathed it with gutta percha and laid their cable beneath the oceans. The children worked with their Father, and the Father worked with his children It is not one man who has done this. It is not a hundred men. It is the union of the world. It is this union of the children with the Father, and the Father with the children. The great victories have been the victories which you and I have prayed for every morning when we have wished that the Father's will may be done on earth just as it is done in heaven.

At for each, and each for all !- Edward Everett Hale, in Woman's Home Companion.

horrified his grandmother, Mrs. Maria Taylor, of Nebo, Ky., who writes that, when all thought he would die, Buck-Infallible for Burns, Scalds, Cuts, Corns, Wounds, Bruises. Cures Fever-Sores, Boils, Skin Eruptions, Chilblains, town, Md.

#### The Doctor's First Question

"How are your bowels?" This is generally the first question the doctor asks. He knows what a sluggish liver means. He knows what a long list of distressing complaints result from constipation. He knows that headaches, bilious attacks, indigestion, impure blood, and general debility are often promptly relieved by a good liver pill. We wish you would talk with your own doctor about this subject. Ask him at the same time if he approves of Ayer's. Pills. Do as he says. J.C. Ayer Co., Lowell, Mass.

Prof. J. B. Miner, of the University of Minnesota, declares that the list of backward students in that institution is fourfifths made up of students from well-todo families. Henry Van Dyke in a recent paper in Scribner's Magazine also universities.

#### A Religious Author's Statement.

Rev. Joseph H. Fesperman, Salisbury, N. C., who is the author of several books, writes: "For several years I was affiicted with kidney trouble and last winter I was suddenly stricken with a severe pain in my kidneys and was confined to bed eight days unable to get up without assistance. My urine contained a thick white sediment and I passed same frequently day and night. I commenced taking Foley's Kidney Remedy and the pain gradually abated and finally ceased and my urine became normal. I cheerfully recommend Foley's Kidney Remedy." R. S. McKinney, Druggist, Tanneytown, Md.

#### GAME OF CUSTOMS.

Slow Thinkers Will Have to Pay Duty on Their Baggage.

Some children had been traveling in Europe with their parents, and among the numerous things to interest them were the custom officers, who investigated their baggage for goods on which to charge duty, says the Chicago News. When they came back to America they were detained a long time in the custom house waiting for an officer to examine their trunks. It was great fun for the children to follow the officers about and hear what the people had to say and how much money they had to pay for the dress goods and jewels and everything they had brought from abroa So they immediately invented this game:

One person is chosen as the "customs officer," the rest of the company being passengers. The officer holds a handkerchief knotted into a ball.

"What has A in his trunk?" he askhe must fix in his mind one object commencing with A that can be packed in a trunk. The person at whom the handkerchief is thrown must answer some object commencing with A. If he answers the same word that the officer has in mind he must pay "cus-The design should be worked in French | toms" or forfeit to be redeemed later. or if he fails to answer quickly he

must pay customs. The fun lies in playing quickly and in keeping the passengers wondering whose baggage will be examined next.

#### THE ASS AND THE DOG.

A Fable That Teaches the Necessity of Mutual Help.

An ass, accompanied by a dog was carrying bread to market in a basket. The master followed. While passing through a meadow the master fell asleep, and the ass commenced to browse.

"Friend," said the dog, "I haven't dined today, and grass is no food for me. Stop a minute. I will take a

small loaf out of your basket." The ass made no answer. I am surprised at this, for he is naturally a

good creature. Jowler began again. Grizzle, without losing a bite, still was deaf of one ear. At length, hard pressed by the importunities of the dog, he said to

"I advise you to wait. It will not be long before our master awakes, and he will not fail to give you your dinner." As the colloquy was going on a famished wolf leaped out of a nearby

"Dear friend, defend me!" cried Griz-

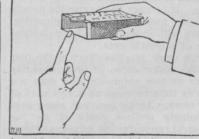

"Comrade," answered Jowler, "I advise you to wait until our master wakes up. He will not be long." Thereupon the dog fled, and the wolf

We must aid one another. He who refuses to give service when he can lays himself open to being refused help when he finds himself in need .-From the French of Perrin.

The Obedient Coin.

strangled the ass.

Take a matchbox and remove the drawer. Hold the box in a horizontal position and place a small coin upon the middle of the top. In order to make the coin go inside without touching it give it several light strokes on

the side which you wish it to enter. As soon as it reaches the edge tip the box lightly, raising the end where the coin is until it is balanced upon the edge. Another gentle stroke of your finger and it will drop inside.

War on Chinese Mothers-in-law.

Chinese women have been successful in their revolt against the barbaric custom of compressing the feet, and now they are engaged in a campaign for the suppression of mothers-in-law. This means modern advancement for tells of the handicap which is found to the Celestial Kingdom with a vengerest upon the sons of wealthy parents as ance, and, though the agitation may they are rated in scholarship in various appear humorous to us, it is of grave import to the mothers-in-law. The Chinese wives have organized anti-mothers-in-law clubs, which doubtless will find the approval of many American husbands. The complaint is that the Chinese mother-in-law is too much of a busybody, that she is an autocrat, a positive nuisance and a bar to complete happiness between married couples. The Chinese wife does not object to being ordered about by her husband, but she has put her foot down against being ordered about by her husband's mother. There can be no doubt of the outcome. The Chinese mother-in-law is bound to lose her

# THE SUNDAY SCHOOL.

Lesson X .- Fourth Quarter, For Dec. 5, 1909.

THE INTERNATIONAL SERIES.

Text of the Lesson, IL Cor. viii, 1-15. Memory Verse, 9-Golden Text, Acts xx. 35-Commentary Prepared by Rev. D. M. Stearns.

The opening chapters of this epistle are very much on the lines we have recently been studying, those of suffering for Christ's sake and denial of self that His life may be manifest and that we in His stead may plead with man to be reconciled to God. We cannot thus plead unless we are showing something of God in our own lives. So when Paul speaks of and makes manifest the comfort which he has found in Christ and is heard saying, "Thanks be unto God, who always causeth us to triumph in Christ" (ii. 14), we feel like listening to one who can thus testify. Then when he tells us that this sufficiency is wholly from God and in no sense from us (iii, 5) we are encouraged, for we know that He is no respecter of persons. But when we hear him say that to manifest the life of sons and daughters of the Lord Almighty we must be separate from all unbelief and unrighteousness and darkness and cleanse ourselves from all filthiness of the flesh and spirit (vi. 14-18; vii, 1) we begin to wonder if we really mean to give ourselves to such a

The lesson today on "The Grace of Giving" includes chapters viii and ix, though we have but a few verses assigned us in the former. The heart of it seems to be in the memory verse viii, 9, with which we should put ix, 15, "Thanks be unto God for His unspeakable gift." Nothing can win us to a life of self denial and cheerful submission or work in us the grace of giving but the grace of our Lord Jesus Christ, who, though He was rich, for our sakes became poor, that we, through His poverty, might be rich. How few consider that the familiar benediction, "The grace of our Lord Jesus Christ be with you," is really a prayer that we may be as willing to become poor for the benefit of others as He was to humble Himself even unto death for us. "Beloved, if God so loved us we ought also to love one another" (I John

It is written of certain Macedonian believers that they "first gave their own selves unto the Lord," and then, though very poor and greatly tried, the abundance of their joy caused them to abound in liberality (verses 1-5). No giving counts in the sight of God that is not from those who have first given themselves to Him. He may respect the gifts of those who are seeking Him, as Cornelius did, but He will surely send to such somehow increased light that they may truly know Him. Paul would stimulate the Corinthians by the example of the Macedonians, and yet he comforts them by the assurance that if they have a willing mind God will give them credit for all that they would do if they had the ability (verse 12). I am often comforted by the assurance that what He expects us to do or to give He will not fail to give the ability for the service, so it is ever an application of 1 Sam. x, 7, "Do as occasion serve thee," or as in the margin, "Do as thine hand shall find." But there is a word in Eccles. ix, 10, which is also pertinent, "Whatsoever thy hand findeth to do, do it with thy might." In the matter of giving we have the same principle in II Cor. ix, 7, "Every man according as he purposeth in his heart, so let him give not grudgingly or of necessity, for God loveth a cheerful (hilarious) giver."

When we remember that whatever we are able to give to God we are giving Him only that which He first gave to us we can readily see that there is no room to boast of our giving. Listen to David as he gave his millions to the temple and saw his people offer so willingly: "Who am I and what is my people that we should be able to offer so willingly after this sort, for all things come of Thee, and of Thine own have we given thee?" (I Chron. xxix, 14.) Ask him why and how he did it and hear his reply: "Because I have set my affection to the house of my God; \* \* \* I have prepared with all my might for the house of my God" (I Chron. xxix, 2, 3). See the Israelites giving for the building of the tabernacle until Moses had to restrain them from bringing, for the stuff they nad brought was sufficient and too much.

How great an illustration there is everywhere of sowing sparingly and reaping sparingly, but how few seem to understand the sowing bountifully and the reaping bountifully (ix, 6). I have for many years associated in my mind viii, 9, and ix, 8, the one telling of His grace that saves us and makes us rich to all eternity and the other of the all grace that He will make to abound toward us, that we may have all sufficiency in all things for every good work. In I Cor. xvi, 2, there is a good plan suggested in reference to giving, "Upon the first day of the week let every one of you lay by him in store as God hath prospered him," but I have found so much blessing for over twenty years in giving to the Lord at least one-tenth of all He sends me that I must commend Mal. iii, 10, to all who will receive it. But the tithe might be considered only our duty and only that which is above the tithe our real offering. Yet there must be no bondage. It must be done cheerfully, not with any grudge, whatever is done. Let it be hilarious, with a glad 'Praise the Lord for the privilege" and a hearty "Of Thine own do we give Thee."

#### CHRISTIAN ENDEAVOR.

Prayer Meeting Topic For the Week Beginning Dec. 5, 1909.

Topic.—Life lessons for me from I John Iv, 7-21. (Consecration meeting.) Comment by Rev. Sherman H. Doyle, D. D.

The apostle John made three impor-

tant contributions to the literature of the Bible. The first was his gospel in which he set forth the deity of Christ. The second consisted of three letters or epistles, the longest and most important of which is the first epistle of John. In the third place he was the author of the book of Revelation, in which we find the records of visions given to him while an exile on the island of Patmos, in the Mediterranean sea. The importance of these three contributions to the Bible cannot be overestimated, and their influence throughout the Christian centuries upon the thought and life of the disciples of Christ has been incalculable. The bosom friend of Christ, the possession of a thoughtful disposition that was capable of sounding the depths of Christ's mystical teachings and his close, intimate, personal association with the life and work of His Master made him especially fitted to set forth the true spiritual life of the Christian, and from his writings many have attained a high spiritual standard of Christian thinking and living.

To analyze I John or to divide its contents into sections is next to impossible. Logical arrangements, so characteristic of Paul, were not common to John. In his writings he seized upon certain great thoughts and poured out intuitions instead of conducting discussions or building up arguments. In this epistle "light, life, sonship, righteousness, knowledge, faith and victory over the world" are his favorite and often reiterated themes. In i, 4, he explains the purpose of the letter when he says, "These things write we unto you, that your joy may be full." Then he shows that this fullness of Christian joy is to be obtained through fellowship with God and His saints upon earth and through overcoming the world without and error within. The keyword of the epistle is "know." John frequently expresses assurance concerning great truths by use of the expression "we know." "We know that when He shall appear we shall be like Him, for we shall see Him as He is." "We know that we have passed from death unto life, because we love the brethren." "We know that we dwell in Him and He in us, because He hath given us of His spirit." "We know that the Son of God is come." One possessed of doubt can do nothing better than read I John, underscoring "we know" and "hereby we know" every time they occur and then returning to make a thorough study of them. Doubt will fly away and assurance will take possession of the mind and heart, bringing peace and rest.

I John has many lessons for the life of the individual Christian. It was written to no particular church or individual, but to all, and, being to all, it is to each one. In the passage selected "love" is the principal theme, and several practical lessons are emphasized. 1. We should love one another, "Beloved, let us love one another, for love is of God." 2. God is love and includes us in His love. "God love \* \* \* Herein is love not that we loved God, but that He loved us and sent His Son to be the propitiation of our sins." 3. We should love God. "We love Him because He first loved us." God's love for us and the method of its manifestation, both as to time and manner, should inspire us to love Him with a love that will lead us to give our lives to Him, as His Son gave His life for us.

BIBLE READINGS. John iii, 16; xv, 1-14; Rom. v, 1-8; I John i, 1-10; ii. 1-3, 15-17; iii, 1-3, 14-24; v, 1-5, 18-21.

Known by Its Finished Product. As the tree is known by its fruits, a factory by its products or a college by its graduates, so the Christian Endeavor society is known by and commends itself by its finished product, the church worker. The object of the Christian Endeavor society is outside of itself, "for Christ and the church," and in proportion as it trains its members to work for these great ends just so far will it commend itself and prove worthy of its name and the right to live. If the word "society" were changed to "training school" in our worldwide title it would perhaps give a better expression of our purpose and also give the church a better understanding of our mission. But meanwhile let us show by the consecrated, devoted, service loving Christian Endeavor trained worker that the Christian who has passed through this society is better fitted for work in the Sabbath school and official positions of responsibility in the church than those from any other source. Train for service and then serve.-Rev. James F. Winnard, President of the Florida Christian Endeavor Union, in Christian Endeavor World.

Patience. Patience is the calm endurance of those changes and sufferings that may come to us. Sailors say it is but lying to and riding out the gale. Paul says our God is a God of patience. His great patience is shown in the patience and perfection of creation, awaiting and abiding its proper time and order. -Rev. C. O. Jones, Episcopalian, Atlanta, Ga.

Practical Work.

We do but very little to put out the fire and to protect men from this mundane existence. The real struggle with the flames is delegated to the evangelists, the Salvation Army and the rescue missions. We are contented to talk about it .- Rev. Father A. A. Lamy, Roman Catholic, Worcester, Mass.

# SKIPPER BEN'S GIRL,

The Treasure That Came to the does not notice a bit of wind. Lonely Fisherman.

By FRANK H. SWEET. [Copyright, 1909, by American Press Association.]

If in your travels you ever visit the rugged coast of New England you may come upon the Cove, with its cluster of brown, gray and black wooden houses, having queer, uneven roofs and crooked chimneys, and its narrow strip of pebbly beach, backed

by high, forbidding rocks. You are very likely to find boats drawn up upon the beach, some of them overturned for calking, and great heaps of kelp and seaweed and layers of salt hay, showing how far up the water comes at high tide.

And climbing over the boats or playing along the beach I am quite sure you will find a little girl-a brown faced, barefooted little girl in a faded pink frock, whose hair is like seaweed, a rich chestnut underneath, but faded to a sort of nutty tinge where the sun strikes it.

If you ask this little girl who she is she will peep shyly up at you through

LYING ON THE BEACH WAS A LITTLE GIRL. her tangled hair, with a pair of eyes that will win your love and admiration at once, and will answer, "Dolly!" Then she will run away and hide

among the boats, with her brown curls shaken over her blushing cheeks. But if you ask any one else, say the old lobster man yonder examining his lobster pots beside his warped and leaky old dory, or, better still, old Captain Graves as he stands on the wharfs every day or sits by the stove in Lisha Tucker's store telling of the fishing when he was young, he will

"Thet? Oh, thet's Skipper Ben's

It is a strange story, and it all happened some years ago-a great many years ago, Dolly would say-when Skipper Ben was not a skipper at all, but merely a brown skinned young fisherman.

He lived with his old mother in the little brown house that stands quite by itself by the waterside and whose eaves almost touch the ground. And over in the blackish looking cottage. with the shingles down the sides, lived his sweetheart, a rosy lass named Dol-

They had always been friends ever since they were old enough to go about and sailed boats together in the pools among the rocks or fished from the wharfs. As they grew older the cove "just kind of understood" that they were to be married as soon as Ben should become owner or part owner of a fishing vessel.

was always off on the banks. Each time be came home he laid a little money away in an old stocking, for he was saving up to buy his boat, and once while he was on a fishing cruise with Captain Pratt the captain told him of a prime little schooner he had at home in the cove, which Ben might secure for the contents of his stocking and in payment for his services that

Ben came home a happy youth. He had already christened his new possession the Dolly. And as he walked up the narrow, crooked street of the little fishing town he wondered why all of his old comrades should look at him

with such solemn, pitying glances. Poor Ben! He soon learned why they all looked pityingly at him. His sweetheart, Dolly, was dead. Two weeks before she had been buried in the little graveyard on the hill.

Poor Ben, indeed! He was never the same man afterward. He kept the Dolly and took a pride in her, going off to the banks and becoming in time one of the first fishermen in the Cove. But he never was a boy again. All his old light heartedness had vanished, and he became grave, moody and silent. For some years he lived, when he was at home. alone in the little brown house-for his old mother was dead, too. A lonely time he had of it when he was not at the banks. In the evenings he would sit for hours with his pipe, staring into the fire and thinking how different it all might have been if only Dolly had lived.

One night there was a terrible storm, and Skipper Ben sat by his

lonely hearth smoking and thinking. The wind blew and howled about the little brown house. It rushed down the chimney and beat against the side of the house until it rocked. But Ben

Presently his gloomy thoughts got the better of him. The tiny room seemed to grow as narrow and as suffocating as a grave, and he rushed out into the night and the storm, where he could draw in deep breaths of the wild salt air.

There was no rain, but the clouds were scurrying swiftly across the sky. And well they might with such a wind at their heels.

Such a wind! If Ben had not been the broad, sturdy fellow that he was it would have blown him off his feet. But as it was he strode up and down the beach with long, fierce strides and heeded neither the wind nor the roaring surf.

Was it strange that, with the fierce storm ranging without and the equally fierce storm raging within, Skipper Ben should not have heard the shrieks and cries of distress that night? Not so very strange, I think, but what was strange was that above all the din and commotion he should have heard a feeble wail-the faintest little wail in the world.

But he heard it at any rate and hurried to the spot whence it came.

There, lying on the beach, with its frock securely fastened to a broken spar, was a little child. "Why, you poor little creeter!" ex-

claimed Ben as he unfastened the dress. "How'n the world did you git

The baby stopped crying as soon as she saw him and, stretching out her tiny arms, gave a little chuckle of de-

He picked her up tenderly and, wringing out the soaked little garments, which were like cobwebs and were trimmed with the finest lace, buttoned her up inside his heavy

Then it was that he heard the shouts and cries for the first time and saw men running helplessly up and down the beach and gazing seaward.

What were they looking at? Looking at nothing. They were staring and gaping at the place where a good ship had just gone to pieces. Could no one be saved? No; it was impossible. No boat could live in such a surf, and there is, moreover, no lifeboat at the Cove.

The ship went to pieces where she struck. Of all the crew not one lived to tell the tale, and of all the passengers not one was saved except the little baby buttoned up under Skipper Ben's rough pilot jacket.

But the baby lived and was like a sunbeam in the little brown house, for no one talked of putting her in the asylum. Nor is there any orphan asylum at the Cove, though there are orphans in plenty, for many a good fellow goes to the banks never to return, not supposing that he has said goodby for the last time to the youngsters at home.

The baby cried for "mamma" a little at first, but she soon learned to say "Ben" instead. And from that day on the little room never became narrow and stuffy, and Ben's pipe was the pipe of peace and comfort.

The next year, when he went to the hangs he left her in the care of Lisha Tucker's wife at the store, but the year after she cried so hard when he was going that he took her with him. And ever since she has been his constant companion, and he named her Dolly.

Five years have passed since that stormy night, and Dolly is six years cld. She is a bright, happy little girl, and she loves the grim old ocean dearly, even if it did so nearly become her

Sometimes in the evening when the wind is blowing and shaking the little brown house and the fire is roaring brightly and merrily up the chimney Skipper Ben will tell Dolly how he found her lying on the beach securely fastened to a broken spar.

Then he will pull out a little old, worn leather trunk and will take from it the once dainty baby clothes. They are yellow now and still stained with sea water. He will hold the delicate Ben was an industrious fellow and fabric in his hard, rough hand with reverential awe and look with wonder at the little faded blue ribbons that once were shoulder knots.

"I wonder who your parents was?" he says to Dolly. "Only think what you might ha' been! Why, you might ha' been a markis!'

Skipper Ben's round blue eyes become rounder and bluer at the thought, and he takes his pipe from his mouth. "You might ha' been a dorchess!"

But Dolly shakes her head with her brown curls and lays her cheek against Ben's yough coat, saying: "No, no! I'd rather be Skipper Ben's girl!"

A Man and His Room.

"Piay cards with a man for an hour and you will know him better than if you had mer him in the drawing room every evening for a year," says a German writer. But Socia in the Paris Figuro suggests another character barometer. A never failing test is the hotel room. The way a man arranges his room in a hotel shows whether he has been well reared, what his ideas of propriety are, whether his bump of order has been developed, whether he is methodical or slovenly, and one may even know by the way wearing apparel, ornaments and baggage are disposed of in a room which the occupant knows he will remain in only a few days whether he is thoroughly or superficially educated. "If I had a daughter for whom a young man sued," says Sonia, "I would have him go to a summer resort where I could surprise him in his hotel room. In less than fifteen minutes my verdict would be rendered on the basis of the room's appearance."

The "Sillinger" Stakes.

It only takes a few hours to get from any part of England to Doncaster, see the race for the St. Leger and return home. Yet in the coaching times a journey from London to Doncaster occupied a couple of days.

Taking its name from a famous Doncaster sportsman, Colonel St. Legerproperly pronounced "Sillinger"-the race is the second oldest horse racing event in the country. It was founded in 1776 and always arouses the greatest enthusiasm in the north of England. In fact, in the prerailway days laborers living fifty miles away would save up their shillings for weeks, walk Insurance Company, of N. Y. to Doncaster, see the race, have a bet and walk home again.

John Scott, who in his day was visthors of all degrees, trained sixteen St. Leger winners. There have been many memorable finishes to the race. and on one occasion a horse named Theodore, against whom the odds were quoted at 1,000 to a walking stick-officially 1,000 to 5-won handsomely.

The largest field was thirty, in 1825, and the smallest four, in 1783 and 1785. A horse named Ninety-three won in 1793.-London Saturday Review.

Armed With a Saber Hilt. When William L. Royall of Fauquier county, Va., was seventeen years old he became a Confederate soldier. In his "Reminiscences" he says that the feats performed by the Confederate cavalry in the early part of the war were remarkable, because not one company in ten had any arms that were tit to fight with.

"When I joined my company," he writes, "they gave me a saber which, I think, was used in the Revolution, and this was the only weapon I had. One day, while my regiment was standing in a road, I bantered a comrade to see which of us could cut the largest twig from a tree. I made a powerful cut, and the blade of my saber broke off at the hilt.

"In a short time we were dismounted and ordered to clear the Yankees out of a piece of woods in skirmish formation. We marched through the woods, but fortunately no Yankees were there. I have often wondered what I should have done, armed with that saber hilt, if I had met a Yankee armed with a Springfield musket."

Gymnastics In Switzerland. Once in every three years the gymnasts of Switzerland and the members of the affiliated clubs in other countries, for the most part composed of QUALITY LEADS Swiss residents abroad, meet to compete in the great contest known as the federal gymnastic festival. A carefully prepared series of exercises is gone through on gymnastic apparatus. There is Swiss wrestling, and there are competitions in the national games of what you are today. Switzerland, including throwing the stone (a forty pound square block of Swiss boys and young men, and the come toclubs they form are recognized and encouraged by the federal government.-Illustrated London News.

#### New York People Eat Pemmican.

New York, Nov. 21.—Delicacies which hitherto have been confined to the frozen North will have a place on every well regulated table during the coming win-ter if reports from the Chicago packing-houses are to be credited. It has been an open secret for some time that many of the Broadway hotels and hunger huts were stocking up with permican, musk ox and polar bear milk, but no one had the temerity to forecast the craze for Arctic foods which threatens to sweep the country. Pemmican bids fair to be the most popular of all the dishes, and pemmican parties will be in order from

"If anybody had told me a month ago that I would be featuring pemmican on my bill of faer I would have sent him to Bellevue for examination," said one of the big hotel men yesterday. "Right after Dr. Cook discovered the North Pole we had a tew scattering demands for it, but we paid no attention to them. We thought it was simply a novelty, and that it would die out. Each day found the demand getting more insistent. The climax came last week when a fellow came in and declared if he couldn't get pemmican he'd wreck the establishment We had to use the greatest diplomacy to get him out, and the next day we laid in a stock of it."

"What does it taste like?" asked the

'You've got to acquire a taste for it. The first mouthful tastes like a mixture of red sandstone and coal ashes. It has peculiar effect on you. After you

'What is it made of?" "The groundwork is lean beef from which every sinew and tendon has been removed. This is dried and pulverized. Added to it are the best seeded raisins beef suet. It is all mixed up together, seasoned with pepper and salt and put into hermetically sealed cans."

'Sort of a frapped mincemeat?" "That's it. It's served with a hammer and chisel, and is generally washed down with a cod liver oil cocktail."

Cows coming off pasture will fall off in milk production regularly. It supplies them with the elements they have been Winter milk production. Sold under written guarantee by S. C. Reaver, Taneytown, G. W. Yeiser, Union Mills, Mathers & Sons, Manchester and M. R. Snider, Harney.

#### It Said So; and He Did:

A German took out his first naturalization papers. As he was about to leave had been inclosed the document that

was to assist in his naturalization.

In a few days he turned up again. Presenting himself to the clerk of the court he bestowed upon that dignitary a broad Teutonic smile, saying: 'Vell, here I vos.''

"Pleased to see you, I'm sure," said the clerk with polite sarcasm.—"Would you mind adding who you are and why you are here?"

The man seemed surprised. He exibited his official envelope. "It says, hibited his official envelope. "It says, 'redurn in five days," he explained, "und here I vos!"
