THE CARROLL RECORD.

Chesapeake & Potomac Telephone, 3-R. VOL. 16. TANEYTOWN, MARYLAND, SATURDAY, DECEMBER 11, 1909.

NEWS NOTES HERE AND THERE

Condensed Items of Interest from County, State and Our Exchanges.

Rev. Dr. Charles F. Steck, of the others, or outdo them; and often the Frederick Lutheran church, has tendered circle of friends, or relatives, to which his resignation, to take effect Jan. 31. A call has been extended him to take both for the pocketbook, and for the ex-charge of a new Lutheran congregation, tent of the true spirit of love back of the in Washington, D. C.

The following are the census super-visors for Maryland; Isaac H. White, First district; L. Sparks, Second district; Frederick T. Dorton, Third district; Charles F. Mack, Fourth district; John J. Stump, Fifth district.

When hogs sold at \$8.40 a hundred at the Kansas City stock yards, on Tues-day, a record for 27 years was established. In July, 1882, several carloads of hogs sold for \$8.80, during a cholera epi-demic. The limited supply of fat hogs is the cause for the present high price. A year ago hogs sold for \$5 in Kansas

The proposition to change the date of inaugurating the Presidents and Vice-Presidents of the United States from the G fourth of March to some time in Aprilor May, which was actively agitated following the outrageous weather of the last fourth of March, will be taken up in

Dr. F. A. Cook, the Arctic explorer, is at a sanatorium at Wells, Maine, suffering from a nervous breakdown, but is not likely to suffer any permanent ill effects from his condition. His records of the discovery of the North pole ar-rived safely at Copenhagen, this week, and will soon be examined by the Uni-versity of Copenhagen.

Col. John W. Avirett, publisher of the Cumberland Evening *Times*, pleaded guilty in the United States district court Saturday to an indictment charging him with violating the United States statue against gift enterprises dependent upon chance, and was fined \$20. The alleged violation consisted in the publication in The Times, on October last, of an adver-tisement telling where tickets for a raffle could be obtained.

went into the buffet of the Union Station Tuesday afternoon, and taking out her hatchet, wielded it indiscriminately, smashing about \$50 worth of bottled whiskies. She was at once arrested and taken to the House of Detention, charged with determine principal and the statements of the statement of the s with destroying private property. A large crowd of persons in the station was attracted by the commotion in the

buffet and excitement ran high.

Word has been received in Washington from former President Roosevelt, that

True Spirit of Christmas Giving. Christmas giving has been very much

over-done, in recent years, due to a misapprehension of the true spirit underlying a beautiful and appropriate seasonable custom. It has degenerated, largely, into giving "for the looks of the thing;" into an effort to keep up with

one makes gifts, is much too large, gift

Generally, gift giving should be con-fined to family circles and to very close friendships, except in cases in which giving represents real relief or suffering-help to the needy-and in recognition of valuable services rendered. Giving for mere show, or for the purpose of securing a return gift, is always unworthy of

There is something about Christmas giving,—the thinking about others, and what they will like,—that warms the heart and makes one feel cheerful and happy and busy. That is, if the giving is done in the right way; not by bestow ing useless trifles that soon degenerate into "clutter," just for the sake of giving something, nor gifts so expensive that you begrudge them, because handsome ones have been or may be given to

Give something you believe is needed committees. or desired by the recipient. If too much for your single purse, the spirit of the day is "combination." How, for in-stance, would the mother appreciate an the House of Representatives soon after Congress convenes. family might unite in giving to another a good picture or a subscription to a magazine. Pretty china and porcelain disher, are always acceptable, and will bring many a pleasant thought of the donor if marked, "For daily use." But the main thing is for each to be bent on making every other member of the fam-ily happy and comfortable, even down to the old horse and dog and cat and distinctly Taft-like-characterized by

Death of Mrs. Susan Ridinger.

Mrs. Susan Ridinger, widow of the late Mr. Isaac Ridinger, who had been seriously ill for the past month, died on services were held on Wednesday morn-Mrs. Carrie Nation, who came to Washington to keep her eye on Congress, of which she was a member, followed by of which she was a member, followed by interment in the U. B. Cemetery on the Westminster road.

Mrs. Ridinger, leaves the following children: Charles E., Joseph C., Mrs. Ella Stultz and Annie Hyser, of Taneytown; Fabian, Mrs. Mande Warren and Miss Lizzie, of Baltimore; Seward, of Westminster, and Harry, of Washing-

CONGRESS IN SESSION. The Union Bridge Farmers' Club met at the home of H. Fuss and wife, on Nov. 27, 1909. The meeting was called

Very Quietly Opens What Will Likely be a Very Important Session.

without any unusual scenes, and quickly adjourned, according to custom, in honor of deceased members. Notwithstanding the battles to come, Speaker Cannon freceived quite an ovation, and he will control the present House, with-out a question of doubt, notwithstand-ing the strong body of "insurgents" who like anybody better than "Uncle loe" Joe.

In the Senate, the proceedings were subdued, almost solemn, and here too no business was transacted of any consequence, the only ripple being an effort made by Senator Bailey to have the Senate meet at 2 o'clock, instead of 12 o'clock, as heretofore.

In the House, Messrs. Gill and Mudd, of Maryland, were absent because of illness, but both are expected to be in their seats after the holidays. Representative Fowler (Rep.) made

good his threat to introduce a tariff bill, and it was dumped into the basket with perhaps a thousand others, which will, in due course, be referred to proper

The President's message was received, mend, but much to praise faintly when not condemning. The worst that has been said about it, is, that it is long and not sensational, and that a number of important topics have been laid aside to become the subjects of special messages. A President's message commended by to the old horse and dog and cat and the birds that winter with you; and it will thus be sure to be a happy time, full of the true spirit of Christmas. How and the true spirit of Christmas. How and the true spirit of Christmas. everybody by saying that these questions would be treated, later, in special mes-sages, and nobody doubts that they will Mr. Taft has evidently concluded that his opinions on these questions need not be dumped into Congress at the very outset, and that he means to take ample time to consider them, even to the extent of letting Congress take the initiative, if it wants to.

Unly one paragraph in the message was subjected to adverse comment, and this criticism emanated entirely from conservative Republicans. This was in regard to Mr. Taft's recommendation of a civil pension list to take care of the aged employees of the Government. This recommendation will hardly receive the support of such leaders as Senators Ald-rich, of Rhode Island; Hale, of Maine; Gallinger, of New Hampshire, and Lodge of Massachusetts, if their private expressions are any guide.

The short hours of employment and the excellent pay of the Government service, compared with the wages and work in private employment, make these Senators think it bad politics and worse Haines and wife, P. Wood and wife, to work in private employment, make these business to bestow pensions upon an-

to order by the president and minutes of last meeting read and approved. Committee A was called on to report. Congress assembled, on Monday, thoughts; no time should be wasted, even a woman who took a grist to the

mill, knit while the miller ground it, then mixed her bread and set it in a warm corner of her wagon to raise while she drove home, knitting all the way. D. Wolfe read from *Literary Digest*, "The dwindling food supply." The wolf

on the national door-step seems more real to Mr. Hill than to the rest of us, while the vision of hostile battleships menacing our coasts are more real to the rest of the country than to him. We are spending hundreds of millions yearly for past wars and present defences, and ing Cook's stay there, and the story is an ingenious one, if not true. wolf. The armed fleets of an enemy approaching, Mr. Hill declares, would be no more alarming than the relentless advance of a day when we shall have neither sufficient food or means to pur-chase it for our population. Mr. Hill

says if he could have his way, he would build couple of warships less a year and would take that \$5,000,000 or \$6,000,000 year each, in the shape of model farms. Its purpose would be to furnish to all in its neighborhood a working model for common instruction. The farmers could see as they passed these farms how their daily labors could be increased and imimpress itself upon the farmer. Mr. Hill says that in less than 50 years we will not raise wheat enough to feed the peopl

D. Wolfe read, as proxy for Mrs. Wolfe, "Mothers who gamble." Today, says the *Christian Advocate* (N. Y.), this country abounds with gambling mothers. Bridge whist is the medium The committee which mothers. Bridge whist is the medium by which the play of chance is carried on. It has led thousands of mothers to families assemble in their own homes servatory; Dr. C. F. Pachule, astronowhere the children see their own mother spending hours in such games. This leads the children to think there is no harm in gambling. Boys instinctively harm in gambling. Boys instinctively feel that betting on horse races, pooling and gambling with cards, are right be-cause mother does it. No mother can effectively instruct her children in morals and teach them to pray to God asking his blessings, nor can she effectwarn them against vices of any ively kind.

This being the time for election of This being the time for election of officers, D. Wolfe was elected president; H. Fuss, secretary. Members present, D. Wolfe, P. Wood and wife, W. J. Ebbert, wife, and son, Willie; R. Sayler, Wm. Flickinger and wife, M. T. Haines, wife, and daughter, Bessie; Miss Anna Wills H. Ence and family Vicitors Wolfe, H. Fuss and family. Visitors, F. J. Englar and wife, J. W. Fuss, wife, Wood, Miss Marie Royer, Mrs. Burr, Mrs. C. R. Metcalfe, Master Charles in the Polar regions, but remains fixed Wolfe, Miss Rose Yingling, Miss Eliza Rakestraw, Miss Duckett.

Then adjourned to meet at R. Savler's,

report at next meeting. H. Fuss, Secretary.

STILL AFTER DR. COOK.

Another Story that Dr. Cook's Evidence of Polar Discovery is a Big Fake.

Another story, that Dr. F. A. Cook's records of his discovery of the North Pole have been "faked," went the rounds of the papers this week. This time, the story is that Dr. Cook engaged, through a Mr. Dunkle a pagingtor through a Mr. Dunkle, a navigator named Loose to prepare certain calculations for him, in order to strengthen and complete the detailed scientific evidence of the discovery. The story goes that he was to have paid \$4000.00 for the work, , but actually paid only \$260.00, which resulted in the exposure. Dunkle and Lewis were at the Waldorf Astoria, dur-

It is the concensus of opinion, however, that the story looks "fishy," especially because it is not at all probable, that, should Cook have needed the evidence, he would have balked on paying a few thonsand dollars for it, as he made quite a lottune out of his lectures, and is not "short" financially. The general public is generally willing to withhold its and start at least 1000 agricultural verdict until the Danish officials report schools in the United States, at \$5,000 a on the evidence now in their hands as

walter Lonsdale, secretary to Dr. Cook, who brought the explorer's records to Copenhagen, also declared that the accusations published in New York and London against Dr. Cook were totally proved. The example could not fail to unfounded. He said that the papers delivered to the University of Copenhagen contained the original observations made by Dr. Cook during the expedition with-out alterations. Mr. Lonsdale stated further that the explorer's report was founded on these and dictated by Dr. Cook to him, no other person having

> mer, attached to the observatory; Gustav ical office, and Dr. F. A. Engstrom, director of the Lund Observatory

> A summary of the affidavits of persons claiming to have aided Dr. Frederick A. Cook in the preparation of his Polar data, published in London and New York, was read with amazement. Scientific circles are inclined to be incredulous regarding the charges and some persons like Dr. Carl Burrau, the astronomer, consider them so improbable that their effect will be to strengthen

confidence in Dr. Cook. In an interview, Dr. Burrau said:

"Passages in the story telegraphed here give me the impression that the matter is thoroughly untrustworthy. Take, for instance, the statement about over the horizon. In order to make ob-servations at the North Pole, a more ex-tended and more detailed knowledge is necessary than is enjoyed usually by the average ship's captain. "It will, however, be easy for the uni-left thumb broken.

Engineer Dies From Fright.

John McCall, of Littlestown, one of the oldest engineers on the Northern Central railroad, made his last run, Friday evening, when he died of fright shortly after he was slightly injured in a collision on the Frederick branch of the Northern Central railroad, a short dis-tance east of Stoney Brook, at the York Valley Lime and Stone company quarries

near Hellam. He had charge of locomotive No. 4134, and was shifting cars. He backed a "battleship" loaded with soft coal in on a siding at the quarry, and after coming off the siding reversed the locomotive to go on another siding. The brakeman on the coal car applied the hand brakes when the car reached the end and the car drifted down the siding, which is on a heavy grade. When the brakeman realized that he was unable to hold the car he shouted a warning to McCall, who may or may not have heard it. moment later the heavy steel car side swiped the locomotive cab, tearing the right side entirely off and throwing Me-Call to the track, where he was pinned between the parallel bars and driving wheels of the locomotive. The crew with great difficulty removed

the injured man from his position, and only succeeded after sawing off his wooden leg, which was fastened under the engine in such a way that it was impossible to move the man otherwise. The accident occurred at about 5.45 and the engineer died at 6.30 o'clock from fright, his injuries consisting only of a slight gash in the forehead, the index finger of his left hand cut off and the

Paris and London, sailing from the latter city for New York early in June.

Resolutions protesting against the further existence and official tolerance of gambling devices and games of chance in York, Pa., were adopted recently by the York Ministerial Association, and an appeal was made to Mayor Jacob F. Weaver, and Judges Wanner and Bittenger, to require at the bands of their respective officials the prompt and faithful maintenance and enforcement of the laws prohibiting persons from disposing of goods of value and of merchandise by means of lottery tickets, cards, dice, paddles, wheels and slot-machines.

Before an audience of distinguished surgeons Prof. Thomas Jonnesco, the Roumanian scientist, on Tuesday demonstrated that painless operations could be performed upon patients while they remained conscious. Instead of rendering the patient unconscious with ether Prof. Jonnesco hypodermically injects stovaine into the spine, at the same time administering strychnine to strengthen the heart. Three children and a woman were operated upon by local surgeons after Dr. Jonnesco had applied the stovaine. The patients watched the operations and conversed with the surgeons while they operated without feeling the least pain.

year, is a Christmas Gift worth while. It will give more pleasure, and to more people, than any other Dollar's worth to be had.

MARRIED.

SIX-TROXELL.-On Dec. 8, 1909, at Reformed parsonage, Taneytown, by Rev. D. J. Wolf, Mr. Ersa Six and Miss Daisy Troxell.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

RIDINGER.-On Dec. 5, 1909, in Tan-eytown, Mrs. Susan Ridinger, aged 73 years, 11 months, 7 days.

WHITMORE.-On Dec. 10, 1909, near Taneytown, Mr. Louis Whitmore, aged 84 years, 25 days.

IN LOVING REMEMBRANCE

How sadly I have counted the hours That measured these sorrowful months, Since thou wast laid 'neath a mantle of flowers My sister I loved so dear.

Silently the shades of evening Gather around our lonely door, Silently they bring before us That dear face that we will see no more.

O smile upon us from on high, Ask God to lead us when we die That we may meet you up above Some sweet day by and by. By her sister, Mrs. Harry Smith.

Beneath the silent shades of home, In the narrow casket bed, They have placed our dear, dear sister With the calm and peaceful dead.

We never more will see thy bright face; Our eyes look for thee in vain, Thou will not again be in thy place, Thou hast left this world of pain. By her sister, Mrs. David R. Fogle.

Church Notices.

There will be preaching in the Church of God, in Uniontown, Sunday at 10.15 a. m., and at 7. p. m. Sunday School at 9 a. m. L. F. MURRAY, Pastor.

Services Sunday at Ladiesburg, 10.30 a. m.; S. S. at 930 a. m. St. Paul's, Union Bridge, at 7.30 p. m. MARTIN SCHWEITZER, Pastor.

was 20 years. He testified in his own behalf that Rhoda told him on five different occasions that she was 20 years old. There will be preaching services in the Taneytown U. B. church, Sunday morning at 10-o'clock, and at Harney in the evening at 7 o'clock. C. W. CHRISTMAN, Pastor.

But there are other Senators who are will proceed to Europe, where the ex-President will deliver addresses in Berlin, ryland in 1868 and for over 40 years tion. Senator Carter, of Montana, is

> "Something ought to be done, and I problem which confronts every administration by the incumbency of the faithful employees who have grown old in the service of the Government. They are no longer able to keep up their work, but humanitarian reasons influence every administration to keep them.

> "As a matter of fact, we now have a civil pension list by indirection as these employees are kept on the rolls and charged up to every administration. We ought to find a way to do directly what we are doing indirectly and provide for these worthy people along humanitarian lines, and at the same time improve the service in the departments."

County Offices Filled.

The office of County Clerk is now filled by Oscar D. Gilbert, who has ap-pointed the following assistants: chief clerk, Rev. W. L. Seabrook; assistants, Ralph Reifsnider and J. Edward Murray. The fourth clerkship, which was de-clined both by Levi D. Reid and Calvin R. Chew, is being filled temporarily by Thomas J. Gunn, democrat, one of the clerks of the previous admintstration. Mr. William Arthur, Register of Wills, has appointed Harry L. Rinehart, dep-uty, and George E. Lippy, temporary clerk. Mr. Hoffacker, deputy under Dr. J. J. Stewart, will remain in the office

for a time. Mr. Francis L. Hann as County Treasurer.

The County Commissioners organized by electing George W. Brown, president, who has two years to serve. Mr. J. Fink has four years to serve, and Mr. Stansbury, just elected, six years. The last named is the first Republican on

the board in 42 years. Benj. D. Kemper, sheriff, has entered The deer hunting season of Adams County, Pa., may be said to have been upon his duties, with Wm. C. Shearer as his chief deputy, and Chauncey E. Jerome, Harry C. Hesson and William J. Helm, local deputies.

The Orphans' Court remains unchanged, there having been no election for this Court this year. With this exception, and the Commissioners office, the Republicans control the administration of affairs in the Court House and Jail.

Harry C. Hickman, the sandwich man at Washington Junction, has just bought 1000 acres of land in Loudoun County, Va., from John A. Paxton, for \$31,000. The land is divided into three fine farms. Hickman has made this money, or most of it, selling sandwiches on the B. & O. passenger trains that stop at Washing-ton Junction. Every passenger train on does were not a total loss, for where the the main line stops there for at least five animals were found in time, it was sent man and his assistants.

Evangelistic Meetings in Uniontown.

For the RECORD.)

The meeting recently held in the M. P. church, Uniontown, deserves more than mere passing notice. It is due Rev. Shelhorn, who conducted it, to say, it has done much good, and given an up-lift to the church and all others who attended, looking for any thing good. Rev. Shelhorn's methods are commonsensed and winning, and to judge from the attention and interest manifested, he won his way into the hearts of all. The meeting is not to be measured by the number of converts (though there was a number, and would have been

more but for certain environments) but rather by its spiritual uplift.

The Red Men, of which Order Rev. Shelhorn is a member, attended in a body, on Sunday night, and were given a special kindly talk in addition to the regular service. There was also a children's service, on Friday afternoon, which was largely attended.

There were good congregations, and sometimes almost an overflow, and excellent interest during the entire meeting. The service closed, Tuesday, p. m., of last week, with an interesting farewell service.

Rev. Shelhorn has held evangelistic services in every state and territory in the United States. He has also been in Mexico and Canada. He has had all manner of experience, and carries in his pocket a flattened bullet which was fired at him through a window in a Mr. Edward O. Dodrer has succeeded western town, by a hired emissary of the saloons. It barely missed his head, passed entirely through the opposite wall and was found in the next re Truly, he is a man of God, and used

by the Master in bringing thousands of souls into the church. The church feels the better for his having been with us. BY ONE INTERESTED.

----The deer hunting season of Adams

an average one in that about the usual number of bucks were killed, and exceptional in the does that were killed. The season closed Thursday of last week, and according to the reports all along the line of deer hunting section, twenty four bucks were killed and eleven does. The camps secured fifteen of the bucks, and these camps were broken up Wednesday, the deers being cut up and meat divided among all the members, the head and hides going to the members who shot them. The slaughter of the eleven does is to be regretted, especially by those who in their excitement shot before they saw what they were doing, and now will have to pay a penalty if they are found out. It is said the State

wise of the charges. -----

Public Education.

During the session of County Superintendents and School Commissioners H. Garner, deceased, returned inventor in Baltimore, Wednesday, Thursday and Friday of last week, the school affairs of the State were pretty thoroughly discussed, and some progressive steps were suggested. A resolution was passed suggesting that a change should be made in the By-Laws so that School Boards may allow teachers half pay for as many as twenty sick days during the school year; the present law provides for three sick days per term.

Dr. Lewis presented a strong paper on "How to Secure Trained Teachers for the Schools." He said that the answer is admittedly difficult, but that faith and courage on the part of School Boards would help to solve the prob-lem, provided School Commissioners turned report of sale of personal propwould permit only trained teachers to erty and settled their first account. take charge of schools.

University, made a strong speech on :Summer Schools for Teachers in Marvland." Many of the States have established such schools, and last summer about 100 teachers from Maryland at-tended such schools in other states. A consensus of opinion was to the effect that our state should endeavor to have the Johns Hopkins open such a school, provided the counties would co-operate

and give sufficient encouragement. "The Salary Law of 1908" was the subject of Mr. McMaster, County Super-intendent of Worcester. He said that for the school year 1908-1909 his county paid the teachers the salaries which they had been formerly receiving, in a ma-jority of cases about \$300. He stated that a law suit is pending in his county -rather a friendly suit-and that an effort is peing made to get the case before the Court of Appeals in January to have it legally settled so that the School Board will have no difficulty in complying with the provisions of the law. The rep resentatives of several counties seemed plain and definite enough not to lead to not named above, the Red Cross, or needless embarrassments.

Section Foreman 30 Years.

Mr. Martin L. Fogle, of Detour, Md., who for the past 39 years has been in continuous employ of the Western Mary-land Railroad at that place, will be relieved shortly at his request, and be assigned to other duty with the company in Baltimore. Starting as he did, comparatively a young man, he saw many of the older school come and go, among those with whom he has come in contact whom was Gen. J. M. Hood, whom he in a business way, though his reappointrelied on as a particular friend. Mr. Fogle has served as foreman alone for 30 a minority of disgruntled politicians, years on what is known as Section No. He has thoroughly acquainted himself 10, covering a distance of five miles, be- with all problems pertaining to instruminutes and each train is met by Hick- to the Mont Alto Sanitorium, and made tween Middleburg and Rocky Ridge, ance, and will likely ask for new legisla-Md. - Thurmont Clarion.

officials are exposed and prosecuted for everybody in the world, whose opinions dishonesty, but how few are convicted; or, if convicted, how light the sentence is in nearly every case. We congratulate ourselves when we hear of prosecutions, for we think, that, after all, our public affairs are being closely watched, and that "the way of the transgressor is hard;" but, we hear the first news, feel satisfied, and forget all about it-apparently, the prosecutors and courts forget about it too, and the "transgressor" has not such a hard way after all.

Court officials in this country to demon- cover for game-both privileges with strate that even forty-two years steady running of the Court House, with full suggests that farmers ought to be apknowledge of all the ins and outs, is not pealed to to leave sufficient cover for an irreplacable loss to the public. After | nesting and mating purposes and a fund all, it is one of the chiefest advantages should be created for the protection and of our system of government, whether restocking of game. He omits to say National or local, that its perpetuity where the game is to be kept after the does not depend on the knowledge and nesting and mating, a very important general ability of one man, set of men, or consideration. Of birds and game he party; but, this fact is mighty discouraging to the fellow who thinks the country can't be run without him-perhaps it

"All Right at the Core."

The other day we picked up a newspaper, and in an article read this sentence, "The average American boy is sure to make good, if he is all right at the core." This expression seemed to stand out in bold relief-it was about all there was to the article, but it was enough. "All right at the core"-how much that means! It means that a boy whose heart is right; who is honorable and trustworthy; who is full of grit and determination and is not lazy and careless, is "all right at the core," notwithstanding boyish freaks and trifling faults, thoughtlessness, and even a crop of "wild oats" occasionally.

The world wants these "all right" boys, and sooner or later they make the old world do as they say. There is nothing that they may not accomplish, within reason-some, more than others, by reason of environment, special ability, and a measure of chance. One thing all can secure—one thing worth more than all else-an honorable name and character; the one thing that cannot be lost, nor taken away, save by the consent of the owner. But, there is the opposite-the boy

wrong at the core, and the world is all too full of them-wrong boys who are continually making other wrong boys. Wrong men, and women too, are constantly spoiling right cores. What a centive to make the fight to stay right, or get right, at the core. As sure as not

"Right at the core" is as good as money in the bank; it means credit, responsibility, integrity. Why do such boys win ? Proud parents know; basi IT IS REMARKABLE how many public ness men know; happy homes knoware worth while, knows. ----

The Game Question Again.

Ex-Game Warden, O. M. Dennis, is out in a letter approving very strongly a 'gun tax'' of \$1.00 in order to pay for the "protection and restocking of game." He is very frank about the matter. He admits that it is not the business of the state to spend money to supply and protect game, for game brings no revenue to the state. He further admits that wire fences and farm-IT WILL BE up to the Republican ing waste land have destroyed natural which the state cannot interfere, but he somewhat idefinitely says:

"Their abundance creates business and revenue for the dealers in sportswill jar and bump a little, for a while, but it's great to get down to make the set of t but it's sure to get down to easy running before long. rabbit for a meal. Therefore, the direct benefit of abundance of game is to the sportsman, dealer in sportsmen's goods and to those who can afford to purchase it for the table. Then, who should pay for the protection and restocking? Not the State, but those who benefit. There is esti-mated to be about \$150,000 guns in Maryland. Assuming that but 10 per cent. of these pay a license fee of \$1.00, which will entitle the holder to gun anywhere in the State, a fund of \$15,000 will be raised, amply sufficient to pro-vide protection immediately, and as the fund grows a fund for restocking pur-If we understand the situation correctly, the business, or sport, of tramp hunting, is about played out. The landowner, or tenant, owns the game as or pigeons; therefore, whatever "direct dance of game, and in the sport of taking it, or marketing it, it belongs to about the question, as to what the legislature ought to do. Clothing and Shoes.

Competition vs. Prices.

Government experts arrive at the conclusion that the main reason why meats are high rests with big profits demanded by wholesalers and retailers; in the first case to an organized understanding which is able to control wholesale prices, and in the second to too many retail dealers, all of whom must make a big profit in order to keep their establishments running profitably. Strangely enough, here seems to be an instance inwhich competition increases, instead of diminishes, prices, as the chief cause of high prices is directly traceable to the retailer, and the report goes on to say that the retail meat business, in the cities, could easily be handled by a much smaller number of dealers.

In this situation, we find an argument in favor of the trust principle, which, according to the best justification for trusts, is a reduction in the number of establishments, and consequently a reduction in expense of operation, and lower prices to the consumer. This is a taking proposition, standing alone; but when we combine with it the monopolistic power-the power to advance prices-and the natural tendency of mankind to take advantage of financial opportunities, then we find an apparently good argument nullified by one, perhaps equally good, but not so popular. So, there you are. With plenty of

Farm and Garden

AUTOMOBILES FOR POWER.

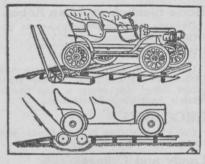

Pleasure Cars May Be Utilized For Farm Work.

Automobiles are coming into use on the farm as a means of pleasure for the farmer and his family. There is nothing more natural than a desire to utilize the splendid power plant contained in a car for other purposes than propelling it over the roads. An ingenious farmer has solved the problem in a manner apparently satisfactory to himself. The farmer devised an arrangement whereby the act of putting the car in its shed places it in position and so associates the wheels with the machinery of the dairy that the engine when started will do the heavy work of running the separator.

4

X

The accompanying sketch shows this device so plainly that it is not necessary to describe it other than to call attention to the two rollers, one of which has its shaft extended outside the box to carry a pulley, from which the belt runs to an overhead shaft. It is easily apparent that the revolution of the wheels of the car will cause a reverse motion of the rolls, which is transmitted by means of the pulley and belt to the shaft and thence to the machinery. In this way the wear on the

THE MOTOR AS A POWER PLANT.

tires is rendered uniform. The grip on the rolls that these tires exercise is surprising.

A peculiarity of this arrangement is that the car shows a tendency to skid from side to side. This, however, is easily overcome by means of props or bumpers, which are put in place so as to limit the sidewise motion of the car within the shed, the mere pressure of the hand serving to move the car easily when the wheels are revolving on ·the rolls.

In very warm weather or on long. heavy pulls it is sometimes necessary to connect the circulating system with the water supply in order to prevent heating of the cylinders.

For sawing wood, cutting feed or any work of an intermittent nature it is necessary for some one to control the engine on account of there being no governor. As a matter of fact. one farmer has a small boy at the throttle most of the time, as the separator is sometimes thrown off without warning.

AID FOR FARMERS' WIVES.

Uncle Sam's Extension of Institute Idea a Help For Women.

Extension of the farmers' institute idea to include the farmers' wives is goats is being successfully demonthe latest development of the policy strated on the Lassen national forest, of paternal solicitude for the great in California, where they are cutting American agriculturist as pursued by trails for fire guards through the the department of agriculture. the farmer's wife and daughters more attractive are the purpose of this new division of the department. Professor John Hamilton, formerly

state secretary of agriculture of Pennsylvania, is at the head of the division of farmers' institutes.

The work of the women's institutes is perhaps broader in its scope than that for the men. It is certainly more varied. In twenty-one states of the Union they have begun the work already, and within a year or so every agricultural state in the Union will have organized institutes for the women folk.

The department of agriculture has just issued its first pamphlet on the subject of the farmers' institute for women. It is hoped that this will be the same lines. It is the hope of the department authorities that they will it as any other bushes. be able to put in circulation a comprehensive series of bulletins, similar to those in regular circulation on general farm subjects, which will prove of real interest and great value to the farm women of America-really worth while treatises on the art and science of living and being happy amid ideal farm surroundings.

The Beautiful Acacias.

The Australian acacias, or wattles, as they are popularly called, form a valuable group of plants for greenhouse decoration during winter and spring, while for the mild districts in the south they are excellent for outdoor culture. When grown for the conservatory or greenhouse they are usually placed in pots or tubs, but place. where space can be afforded in winter gardens and similar structures they are first rate subjects for planting in* borders. Planted in this manner, they grow rapidly into large bushes and flower profusely. One objection may be raised in planting acacias in borders, for in the event of a specimen getting too large for its position if: cannot be successfully transplanted

heavy manzanita bushes. At the beginning of the experiment there was some doubt as to the goats' willingness to eat the manzanita, but it has but a forerunner of much more along been found that where there is little else they will just as readily attack

> The grazing season was so late this year in the Lassen forest that the goats did not begin operations until about the middle of June, but since then they have made rapid progress, and the result promises to be a success from every point of view.

The trails will first be opened and then kept free of sprouts by the goats, saving the government considerable labor in cutting them out by hand, as has been done heretofore, while the brushy forage, which otherwise would have been wasted, will support 3,000 goats very comfortably.

The Age of Cattle.

At twelve months an animal should have all its milk (calf) incisors in

Fifteen Months .- At this age the central pair of incisors (milk teeth) may be replaced by a pair of permanent incisors (pinchers), these being through the gums, but not in wear. Eighteen Months .- The middle pair of central incisors at this age should be fully up and in wear, but the next pair (the first intermediary) not yet through the gums.

Twenty-four Months .- The mouth at this age will show two middle (permanent broad) incisors, fully up and in wear.

Thirty months generally show six broad permanent incisors, the middle and first intermediary fully up and in wear; the next pair (second intermediary) well up, but not in use.

Thirty-six months show three pairs of broad teeth, which should be fully up and in wear, and the corner milk teeth may be shedding, with the corner permanents just appearing through

AGRICULTURE IN ALASKA.

Remarkable Possibilities of the Far Northwest Possession.

The area of Alaska is so great that the United States government maintains five agricultural experiment stations in the territory, so situated that crops may be tested under all the climatic conditions. Sitka, on the strip of coast projecting southeast, has a fairly mild climate, while the station at Rampart is close to the arctic circle. C. C. Georgeson, special agent in charge of all the stations, in his annual report for 1908, recently issued by the United States department of agriculture, declares unqualifiedly that "Alaska is an agricultural country," that good hay can be produced "in any quantity" for winter feeding, while the native grasses "can maintain live stock in excellent condition in summer." He says also that "potatoes, cabbage, cauliflower, rhubarb, turnips, lettuce and, in short, all the hardy vegetables can be grown to perfection up to and even within the arctic circle, as has been proved by thousands of settlers." But before Alaska can be largely settled railroads and wagon roads must be built. Under present conditions, he says, "few farmers can afford to go to Alaska with their families, live stock and equipment." The expense of transportation "would equal the cost of a farm in the states."

Abundant sunshine is essential for good crops in Alaska. In 1908 the rainfall during the growing season at Sitka was 16.22 inches against 24.76 inches the year before and 18.91 inches in 1906. The smaller rainfall meant more sunshine, and the result in 1908 was large crops of potatoes, cabbage. cauliflower and various root crops. The quality also was better.

Mr. Georgeson believes that Alaska has undeveloped resources sufficient for the support of a large population. But there, as he says, "Nature is stern and uncompromising, and we must submit to the conditions she imposes."

Among many interesting facts given in the report is this: Watermelons were brought to maturity out of doors on the Hot Springs farm, which is in the Tanana valley, in latitude 64 degrees north. It seems that on part of this farm the soil is warmed from the same source, whatever it is, that heats the water of the springs. This farm has now 150 acres regularly under crop, the greater portion devoted to potatoes.

The Pest That Kills Plums.

The quickest and most economical method of fighting the curculio where there are only a few trees is to place a sheet under each tree early in the morning as soon as the insects appear and jar the trunks. When they fall gather and burn. This should be done twice a week for two or three weeks. when most, if not all of them, can be caught before the fruit is injured. The plum, the damson and the apricot are the fruits most injured. Slugs that attack the pear and other trees may be killed by dusting the leaves when damp with fresh air slaked lime. Apple trees should be sprayed early in the spring when buds commence to form, after the blossoms fall, when fruit is one-third grown and when half grow. The bordeaux and paris green solution is the best remedy. These may be had already prepared

All Around the Farm.

It is claimed by those who have trained many horses that, taking the colt when training first begins, they can be trained to walk over four miles an hour. The walking gait is the most important one to the farm and road horse. The mistake with many in training young horses is that they are too soon put to trotting, which is a gait they more readily learn than fast walking

If the land is to be plowed twice before planting in order to make it thoroughly fine, it will be well to roll it before the second plowing in order to pack the surface somewhat and make the earth turn better without clogging the moldboard. The roller is also useful in breaking clods and in packing the surface to prevent excessive evaporation in dry weather.

In order to get hens in prime condition to produce fertile eggs you are required to follow as closely after nature's plan as possible. Provide them with a liberal amount of green food, together with animal food at least twice each week. If you cannot give them a large, roomy yard, release them from confinement at least an hour each day.

The day of the hog which is half solid fat is limited. Consul Webster of Niagara Falls states that the Canadian hog raisers and packers have been forced, through lack of demand for fat hogs, to produce the leaner bacon type which can be sold to advantage on the British market and is suitable for the export trade.

A heifer should be milked as long as possible during her first period of lactation even if she does not give much milk. When allowed to dry up at six months she will go dry every time at the same period when a cow. Heifers are very susceptible to education in this respect.

Provided the hen is cooped or tethered, young chickens may be allowed to run in the onion and asparagus beds.

Uncle Sam's Granary.

This country each year produces more corn than all other countries of the world combined-2,927,000,000 out of 3.888,000,000 bushels. It grows more wheat than any other country in the world-634,000.000 out of 3,108,000,000 bushels. It produces more oats than any other country in the world-754,-000,000 out of 3,582,000.000 bushels. It is the third largest annual producer of barley in the world, 153,000,000 bushels-only 7,000,000 bushels less than Germany, with Russia leading.

the gum.

Thirty-nine Months.-Three pairs of broad teeth will be fully up and in wear. The corner teeth (incisors) through the gum are not in wear.

Heat In Cows.

Difficulty is often experienced in catching certain cows in heat. Some animals do not come in heat regularly and show scarcely any signs when the period is on. A healthy cow should be in heat once in three weeks and during the period is excitable, falls off in milk and shows many other unmistakable symptoms. The only course open where a cow does not show signs is to try her once or twice a week for at least three weeks. If she fails to show during this time, wait a week or two and repeat the program. It often happens that cows will not breed from one cause or another. There is no remedy, so far as we are aware, that will aid materially in bringing on the period. Of course proper feed and care and not allowing breeding animals to lay on too much without going to a great deal of troufat can but assist in the maintenance of all normal body functions. ble, for few shrubs or trees are more

The disease, he said, is common in Great Britain and Germany, but had never been definitely found in this country.

A government report says that in the The malady is a form of staggers and is often fatal, but Dr. Moore says United States 2,600,000 cattle die anprompt preventive measures will nually from disease, exposure and neglect. This country always feels unquickly check its spread. comfortable when statistics of waste

Smallest Cows.

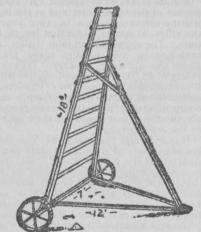

The smallest cows in the world are After timbers have been cut from found in the Samoan islands. The the log they should be dried as rapidly average weight of the males does not and evenly as possible so as to remove exceed 200 pounds. The females averthe moisture and prevent checks. Wood should not be placed in contact age about 100 pounds, are very stockily built and are seldom taller than a with the ground until it has been thor-Merino sheep. In color these cattle oughly dried; otherwise some fungus are nearly all alike, a reddish mouse color marked with white. They have Here are some facts worth rememvery large heads, and their horns are bering: Fifty pounds of butter make one firkin; 100 pounds of fish make one of exceptional length.

Rye Meal For Dairy Cows.

The Pennsylvania experiment station has discovered that rye meal as a part of a properly balanced ration for dairy cows is as efficient in milk and butter production as an equal weight of cornmeal.

at the agricultural stores.

Orchard Ladder on Wheels. The accompanying sketch represents an orchard ladder on wheels. It is something that will be appreciated until the orchard crops are in. Take a pair of old mower wheels and one piece of 2 by 4 scantling for an axle. Place the ladder upon this scantling. To keep it upright use poles, two at the bottom and one near the top of the

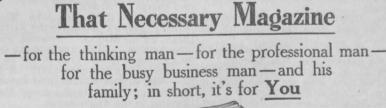

USEFUL IN THE ORCHARD.

ladder, extending to the ground. The upper one is forked at the top so as to hold the ladder firmly. The ladder is eighteen feet high, and as the foundation is broad there is no danger of its falling over. The brace is so made that it can be adjusted, thus enabling one to place the ladder at any angle.

Keeping Surplus Eggs.

When eggs are only required to be preserved for two or three months they keep very well packed in dry salt or bran. The meat of the egg may shrink and rattle within the shell when shaken, but its edibility is not impaired. Coating the egg with vaseline or butter will also keep it for a short time, or any application which effectively seals the pores of the shell and excludes air will prolong the freshness of eggs. If the egg is even momentarily submerged in boiling water the albumen thereby becomes sufficiently coagulated to prevent the entrance of air. In some of the rural districts in England and Scotland eggs for home consumption are smutted over with a mixture of sulphur and lampblack, a cheap and effective preservative. But the limewater mixture is best for general purposes.

ment on the 23rd. Sunday School, Sunday afternoon, at 2 o'clock, preaching at 2.30, by Rev. C. E. Benson.

Emmitsburg.

On Monday while Edward Baker was working on a new building of John T. Gelwick's on East Main St., the ladder, on which he was standing, slipped and fell 22 feet, he falling with it. He lived until Wednesday morning, his sufferings were intense. He is survived by a widow, who was Miss Christina Topper, daughter of the late Jacob and Julia Topper, and four children, the youngest four years old. His funeral took place Friday morning from St. Joseph's Catholic church.

ed plans for a concerted effort to bring about his election. General Vandiver believed himself so thoroughly entrenched in the office of state treasurer that it has probably never occurred to him that he would have an opponent for the elec-tion. He has powerful triends, and an insurgent movement to defeat him must be of an unusually strong nature.

Senator Brewington is a protege of the late Elihu E. Jackson; is said to be in absolute control of Wicomico county, and his influence extends to other counties

on the Eastern Shore. A state treasurer is elected at every ssion of the legislature, and as the legislature meets only once in two years, the office, of course, is for that length of The election is on joint ballot of time. both houses, and usually takes place about the middle of January. It pays a no charge for admission. On Jan. 23, 1909, Dr. John Merritte Driver gave a lecture in the Assembly Hall, on the subject, "America Facing the far East." This was without doubt in the order given.

course. He will appear again on Dec.
16. His subject will likely be one of the following: "Ultimate America, Future Destiny of the Anglo-Saxon."
A. C. Wine, of Denton, Md., is expected here on the 15. He will attend the leave minimum and a few days with the leave minimum and the leave min known, but they will argue that the duties of one place conflict with the other. General Vandiver is one of the few old guard left in active politics. He has Taylorsville. The farmers are busily engaged in he has been collector of internal revenue for the district of Maryland, has been a member of the legislature at half a dozen or more sessions, was speaker of the House in 1892, and for a year was mayor of Havre de Grace. In 1895 his friends urged him to become a candidate for the governorship, but he declin-ed to permit his name to go before the convention.-Balt. Star

to the sweep of winds-in open defiance of death dealing storms. They willingly did a prodigious amount of work each day, and then as bedfellows they offered their fur as shelter and bones as head rests to their two footed companions. We had learned to appreciate the advantage of their beating breasts. The bond of animal fellowship had drawn tighter and tighter in a long run of successive adventures. And now there was a stronger reason than ever to appreciate power, for together we were seeking an escape from a world which was never intended for creatures with thumping hearts. Much very heavy ice was crossed near the eighty-eighth, but the endless unbroken fields of the northward trails were not again seen. The weather changed considerably. The light cutting winds from the west increased in force, and the spasmodic squalls came at shorter intervals. The clear purple and blue of the seas were gradually changed to light gray, and a rush of frosty needles came over the pack for several hours each day.

Could Brook No Delay.

The inducement to seek shelter in cemented walls of snow and wait for better weather was very great. But such delay forestalled certain starvation. Under fair conditions there was barely food enough to reach land. while even short delays might easily jeopardize our return. We could not, therefore, do otherwise than to force ourselves against the wind and drift with all possible speed, closing the eye to unavoidable suffering.

With no alternative, we tried to persuade ourselves that conditions might be worse

The Mullet In Gulf Waters. The mullet has always attracted a

goodly share of attention. His fame is not circumscribed by the boundaries of the gulf. Whether the visitor be from the Atlantic or the Pacific coast or from the shores of the Mediterranean or the Baltic, he wants to see, examine and feast on the mullet.

He is the best known fish that swims. Some have a prejudice against him; but, like all feelings of this nature, it rests on an unsubstantial foundation. It cannot bear investigation for the mullet plays a greater part is appeasing the craving for sea foods than any fish that inhabits the waters of the gulf. He is here in summer and winter, in fall and in spring, When the fisherman contemplates his plight, when luck is against him and a feeling of depression creeps over him. the mullet, always ready to give him a helping hand, rushes into his seing and contributes to his fortune and to the gastronomic pleasure of the thoasands of people to whom they are shipped. He is a regular standby. In pa sperity and in adversity he is always here in abundance .- Pascagoula Chronicle.

Fairfield's Blood Tonic and Egg Producer makes hens lay better, causes young chicks to mature earlier and old digestion and enabling fowl to secure the full amount of nourishment from their food. Ask for Fairfield's New Poultry Book. Sold under written guarw. Yeiser, Union Mills; T. W. Mathers ons, Manchester, and M. R. Snider Harney.

Helping Him Out.

He was well groomed, sober, evidently intelligent, but he looked worried as he approached a policeman on Broadway, near Long Acre square. "Officer, I know my name and all that sort of thing," said he, "but 1 don't know where I live. What'll I de about it?"

"Advertise," said the bluecoat with a stony stare. "What are you giving me?

"Honest," continued the worried one. "I'm a stranger in New York. Got here this morning. Had the address of a boarding house on a slip of paper a friend gave me. Went there, engaged board, left my trunk and then went out on business. Now I've lost the strip of paper somehow, and I've forgotten the street and number. What'il I do?

"Advertise." repeated the bluecoat, but less bluntly. "Then go to a hotel and wait for an answer. Another way is to write to the friend who gave you the address.

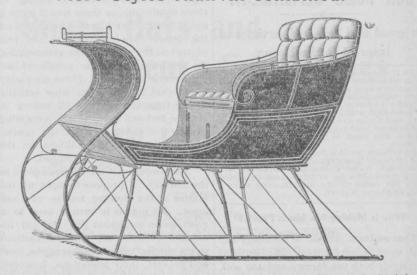

"Thank you." said the lost one gratefully .- New York Globe.

culties of the return. Though the mercury was still frozen and the sun's perpetual flush was lost in a frigid blue, the time was at hand in lower latitudes for the ice to break and drift southward.

With correct reasoning all former ment. expeditions had planned to return to land and secure a line of retreat by hand my lonely march ahead of the May 1. We could not hope to do so until early in June. It seemed, therefore, probable that the ice along the eighty-ninth and eighty-eighth paral- ciently from the icy airs. There were outskirts of the polar sea would be much disrupted and that open water, small ice and rapid drifts would seriously interfere with our return to a sure footing on the shores of Nansen sound. All of this and many other possibilities were carefully considered before, but the conquest of the pole was not possible without risks.

Famine and Frost.

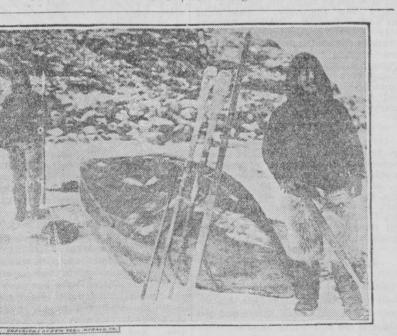

We started earlier than all other polar aspirants, and no time had been lost en route. If misfortune came to us it could not be because of wasted energies or unnecessary delay. In the last days of the onward rush to success there was neither time nor opportunity to ponder over the bitters of subsequent remorse, but now, facing southern skies under which were home and all for which we lived, the back trail seemed indescribably long. In cold sober thought, freed of the intoxication of polar enthusiasm, the difficulties darkened in color. We now saw that the crucial stage of the campaign was not the taking of the pole. The test of our fitness as boreal conquerors was to be measured by the outcome of a final battle for life against famine and frost.

The first days, nowever, passed rapidly. With fair weather and favorable ice long marches were made.

We aimed to return along the one hundredth meridian. There were three important objects to be gained by a route somewhat west of the northward march. The increasing easterly drift would thus be counterbalanced. We hoped to get near enough to the new lands to explore a part of the coast, and a wider belt would be swept out of the unknown area.

The pack drift proved quite active, and we were quickly carried eastward beyond our daily drift allowances. On April 30 the pedometer registered 121 miles, and by our system of dead reckoning, which was usually correct, we should have been at latitude 87.59, longitude 100. The nautical observations gave latitude 88.1, longitude 97.42. We were therefore drifting eastward with increasing speed, and to counter-

THE FOLDING CANVAS BOAT.

pel action. These hard fought times felt. were days long to be remembered, but only the marks of the pencil now remain to tell the story of a suppressed existence.

Fellow Feeling For Dogs.

The long strain of the march had given a brotherly sympathy to the tric of human strugglers. Under the same strain was made the descent to canine levels. The dogs, though still possessing the savage ferocity of the wolf, had taken us into their community. We now moved among them without hearing a grunt of discord, and their sympathetic eyes followed until we were made comfortable on the cheerless snows. If our dogs happened to be placed near enough they edged up and encircled us, giving the benefit of their animal fires. To remind us of their presence frost covered noses were every year."

THE CARROLL RECORD SATURDAY, DECEMBER 11, 1909. OUR HOME DEPARTMENT.

Original and Selected Articles of Interest to the Home.

We invite contributions to this department from all readers who have something to say on topics which relate especially to home im-provement, social conditions, or moral issues. While we disclaim all indorsement of senti-ments which may be expressed by contribu-tors, and desire to be as liberal as possible, we at the same time request all to avoid person-alities, and stick to proper expressions of opinion. opinic

opinion. All articles for this department must be in our office not later than Monday morning, of each week, to be guaranteed insertion the same week, and all articles must be signed with the name of the author, even when a nom de plume is given.

Who is Making too Much Profit?

farmer of both the farmer and the soil, Mr. James J. Hill, has recently stirred up considerable excitement by promulgating a theory that we are liable some time in the future to starve to death. | trust act. Mr. Hill finds grave menace to the rest of the community in the excessive prosperity of the farmer. He finds that too many farm people are moving off to town; that the farms are not being managed so well as they ought to be; that we are exhausting our soil by unscientific cropping, and, in short, that production of things to eat is not keeping pace with the community's appetite.

Mr. Hill, be it noted, is not an original propagandist of this alarming theory. His conclusions are not essentially different from those published by Malthus rather over a century ago. Both saw the race approaching starvation, though by somewhat different philosophic routes. The recrudescence of Malthusianism just now commands attention, partly because it is sponsored by so distinguished a man and so great a practical philosopher and economist as Mr. Hill, and partly because the unprecedentedly high cost of living in times of great productivity gives strong color of reasonableness to the notion that starvation really is somewhere on the trail of many of us.

Whether Mr. Hill is right or wrong, the Department of Agriculture, which has excellent means of knowing about such matters, is organizing a great campaign to find out whether the average productivity of our soil is diminishing and, if so, why, and how to remedy it. Along with this inquiry, the department will continue with redoubled energy its campaign of education to secure better farming and bigger crops.

The spectacle of great numbers of farmers leaving the farms at a time when returns from the soil are generally very profitable certainly justifies serious consideration. Recent careful inquiries have developed support for two strange propositions:

1. That the urban consumers of farm products of all kinds are paying more for them than ever before.

2. That the very farmers who ought to be getting rich on such unprecedented

matter at the coming session of Congress. My plan is to turn it over to a commission somewhat like the old in-That eminent student of sociology and dustrial commission, with instructions the stock market, that distinguished to get the facts about combinations, local and general, their operations, business, profits, actual expenses, etc. Most of these local combinations are in violation of the spirit, at least, of the federal anti-

> "If the people knew the facts, there would be a new attitude toward this question of the cost of living. There is a feeling of hopelessness about remedying conditions. The farmers, with their co-operative creameries and merchandising associations, their farmers' eleyators, their buying in large quantities, their sending away from the local market for much of their purchasing, are giving practical shape to their protest.

"The people in the cities have not made any such progress. The prosecution of a city milk trust is quite a wonder. People in cities are at the mercy of the price-fixers. They can't buy in considerable quantities, because their homes are in flats, without storage facilities, cellars, etc. The smaller the package, the more popular it is with the poorer people, in spite of its disproportionate expense.

"First, we must have a popular understanding of these immense burdens which present-day methods of distribution impose. Then we must have the co-operative effort on one side and the prosecution of the combines on the other to bring about better conditions. To that end Congress will be urged to take some highly important action the coming winter. If it can be induced to initiate such an investigation as I have suggested, that will be the biggest single accomplishment of the session."

During the tariff debate last winter there were some pretty pointed suggestions of this excessive cost of the middlemen's function; but almost all the politicians, fearful of the effect of seeming to attack the great business interests, ran from the first suggestion that there was need of such an inquiry. The matter is going to be presented and pressed at the coming session, and it is anticipated that the proposal will have the backing of pretty nearly all the people. The cost of living is the greatest single issue before the country to-day and recognition of its true elements is beginning to be much more definite than ever be--J. C. WELLIVER, in Farm and Fireside.

The speaker, as I have said, was a weight, and stone in other respects. Patriotic Boys and Girls to Honor Washington.

New York, Dec. 6.-Promising ten of their Christmas pennies to buy one brick in a children's wing of the proposed George Washington Memorial Building at the national capital, scores of American youngsters throughout the country are today reported as ready to organize a boy and girl auxiliary to this movement, which has just been begun here by the George Washington Memorial Association. Thousands of pins, that mark their young wearers as share holders in this tribute of the people of the country to its father, are being prepared for distribution to the little patriots who are sending in their dimes to pile one brick higher the kind of monument that Washington most desired. If every adult admirer of the first president will show half the practical support that the children are beginning to offer, the leaders of the project declare, the \$2,500,000 required to rear this center for the "general diffusion of knowledge" will be speedily assured.

One whole wing in the great building, that all American's are asked to erect and own in memory of Washington as a headquarters and auditorium for the patriotic, scientific, medical: and art organizations of the nation, will be built solely through the efforts of the American youngsters who are today volunteering to spread the idea through their school rooms and playgrounds, it is prophesied. The final admonition of George Washington-"promote, then, as an object of primary importance, institutions for the general diffusion of knowledge"-has been found to lie fresher in the minds of the school children of the country than in those of their elders, who have never carried out this idea for which Washington intended to provide a personal legacy. No more ready response to the call to discharge this moral obligation upon

HOT CAKES.

We often listen to lectures on the undesirability of hot bread for breakfastand we go cheerfully on our way eating hot bread and cakes whenever we have them and enjoying them immensely. Here are a few recipes for these charming if undesirable breakfast dishes.

French Pancakes.-Beat smoothly together six eggs and a half a pound of flour. Melt four ounces of butter and add to the batter, with one ounce of sugar and a half pint of milk. Put a spoonful at a time into buttered frying pan and spread evenly on the surface. Indian Pancakes .- Take a pint of hung a little stocking, five inches long cornmeal, a teaspoonful of salt, one of

soda, pour on boiling water to make a latan filled with salted nuts and tiny thick mush; let stand until cool; add the chocolates. yolks of four eggs, half a cupful of flour and stir in as much buttermilk as will make a good batter. Beat the whites of and enhance the glitter of the silverwell greased skillet. trimmed tree .- Woman's Home Com-

Crushed Wheat Griddle Cakes .- One panion for December. teaspoonful of cracked wheat, two pints of flour, two teaspoonfuls of white sugar; half a teaspoonful of salt, two of baking powder, one egg and one pint of milk. tinually. prices are leaving their middle-Western farms in annually increasing numbers.

Why should the farmer be quitting the farm if he is making so much money I asked that question of a very wise man who has studied the matter many years and whose conclusion represents a mature judgment applied to the best information the government has been able to gather. He replied in substance thus:

"The farmer is not making the huge profits that the consumer's provision bills suggest. The fact is the complicated machinery of distribution is costing too much. There are too many and too large profits between farmer and consumer."

"The railroads ?" I queried.

"No, not the railroads; there may be some excesses, but the transportation to this government a suggestion along the mere suggestion that something changes are not what to do the harm."

"The meat trust, then, and so on ?" "No," replied my informant impatiently. "It isn't the big trusts that are doing the great damage, either; it's the little combinations. The big trusts may fluffy biscuits, and the other kind which get pretty fancy profits, but they are not | are not light, or flaky pastry; but it is farmer's return and the consumer's cost | man on the street is a kind of artificial of local combinations in trade-in retail forward as a new discovery, for it has trade for the greater part.

MRS. COOK AND HER DAUGHTERS.

such as her husband has written. Although Dr. Cook's absence and the depletion of the family finances resulting from his expedition have been hard for Mrs. Cook and her daughters, I have never heard her complain. She has always been confident of her husband's success and ready to make sacrifices to help him.

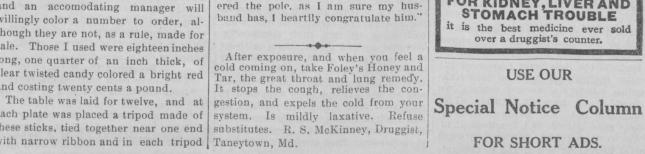

"At present I believe that she wants time to adjust herself to new conditions and fully realize the significance of her position before she talks for publication."

On the other hand, Mrs. Peary, wife of the rival finder of the pole, has played too prominent a part in the career of her husband, with which the world is familiar, to need mention at this day. Mrs. Peary has gone into the frozen regions with the arctic expeditions conducted by her husband as far as it was safe for a woman to live. And her daughter, now a girl of sixteen, was born in the arctic country and is called, much to her present disgust, "the snow baby."

Mrs. Peary met her husband at North Sydney, where she had secured rooms at the hotel with a view of the bay, so she could see the Roosevelt. Commander Peary's ship, when it first put in an appearance.

Mrs. Cook's comment was brief and singularly like the expression of Mrs. Peary on the news of Dr. Cook's achievement. She said:

"If Commander Peary has discovered the pole, as I am sure my husband has, I heartily congratulate him.

THE INTERNATIONAL SERIES.

Text of the Lesson, a Comprehensive Quarterly Review-Golden Text, II Tim. iv, 7-Commentary Prepared by Rev. D. M. Stearns.

LESSON 1.-Paul a prisoner-the arrest, Acts xxi, 27-39. Golden Text, II Tim. ii, 3, "Thou therefore endure hardness as a good soldier of Jesus Christ." Paul knew that bonds and afflictions waited for him everywhere (20-23 margin), but whether he unnecessarily ran into some of them or not we cannot say. This was probably one of the three times that he was beaten with rods (II Cor. xi, 25). He accepted all as being in the will of that Just One for him and coveted only to be His faithful witness.

LESSON II.-Paul a prisoner-the plot, Acts xxiii, 11-24. Golden Text, Ps. xci, 2. "I will say of the Lord, He is my refuge and my fortress, my God; in Him will I trust." Beaten and his life sought by the mob, liable to be pulled in pieces by the frenzied Jewish council, how comforting must have been the visit of the Lord to him that night with those words: "Be of good cheer. Paul; thou hast testified of Me." LESSON III .- Paul a prisoner-before Felix, Acts xxiv, 10-27. Golden Text, Acts xxiv, 16. "Herein do I exercise myself, to have always a conscience void of offense toward God and toward men." The topics of this chapter are the faith in Christ, righteousness, temperance and judgment to come, the hope of Israel, the resurrection of just and unjust and believing all things written in the law and in the prophets. LESSON IV .- Paul a prisoner before Festus and Agrippa, Acts xxvi, 19-32. Golden Text, II Tim. i, 12, "I know whom I have believed and am persuaded that He is able to keep that which I have committed unto Him against that day." For the third time the story of Paul's conversion, the resurrection of the dead and the future glory of Israel, the present forgiveness of sins through Jesus Christ for all who will turn from the power of Satan unto God and the eternal inheritance. LESSON V.-Paul a prisoner-the voyage, Acts xxvii, 13-26. Golden Text, Ps. xxxvii, 5. "Commit thy way unto the Lord; trust also in Him. and He shall bring it to pass." Paul's advice to tarry at Crete is unheeded. A two weeks' storm follows in which all expect to be lost-probably all except Paul and his party-but again the Lord comes to Paul either personally or by an angel and assures him that no life shall be lost and that he must be

brought before Caesar. LESSON VI.-Paul a prisoner-the shipwreck, Acts xxvii, 39, to xxviii, 10. Golden Text, Ps. xxxiv, 22, "The Lord redeemeth the soul of His servants, and none of them that trust in Him shall be desolate." Death and its master pursue Paul most relentlessly. The soldiers advise killing all the prisoners, and, that being avoided and all having escaped drowning, a deadly viper threatens his life, but the Lord

THE SUNDAY SCHOOL, Prayer Meeting Topic For the Week Beginning Dec. 19, 1909.

Topic.—Our Christmas gifts.—Matt. ii, 1-11. Comment by Rev. Sherman H. Miss Nina's Desperate Resolve Doyle, D. D. The Christmas season always sug-

gests giving. It was on the first Christmas day that Christ, "the unspeakable gift" of God to man, was born into the world. Christmas therefore speaks of Ged's gift to man, and the custom of giving gifts to loved ones and friends at this season of the year has become almost a worldwide custom. In no better way perhaps could we celebrate the birthday of Jesus Christ, the gift of God to the world, than by the giving of gifts. The example of our God is worthy of our imitation, and it is a beautiful sight at the Christmastide to see the spirit of giving that possesses all. The human heart is opened and liberality and generosity abound, and many who at other times are lacking in these things learn the joy and blessedness of giving as well as of receiving.

Taking a comprehensive view of Christmas giving, it may be summed up under three divisions-(1) our gifts to God, (2) our gifts to Christ, (3) our gifts to one another.

1. Our gifts to God. Giving to God is of supreme importance. But what shall we give? That which He desires. How often we try to discover what our friends or loved ones want before we purchase Christmas gifts for them. We should also give to God what He wants. And in the Bible He tells us His desire concerning us when He says, "Son, daughter, give me thine heart." Our hearts as a gift is His supreme want, for everything else goes with the giving of the heart. He who gives all the love of the heart surrenders all else with it. Therefore let us "love the Lord our God with all our heart." As never before let us at this Christmas season give Him the supreme place in our affections, and with this gift there will go time and money and service.

2. Our gifts to Christ. It is hard to separate God and Christ in our giving. Both are divine and both are one. "The Father and I are one." But their relationships to us differ, and thus we may speak at least of offering gifts to each. The heart can only be given to the Father through the Son. Yet the gifts of the wise men may suggest our gifts to Christ. (1) They worshiped Him. When they saw Christ "they fell down and worshiped Him." God the Son is worthy of our worship as well as God the Father. We should hold Him in the highest reverence, bow down before Him and give to Him the best devotion of our minds and hearts. (2) "And when they opened their treasures they presented unto him gifts." (a) Gold Christ needs and wants gifts of money. It is required to carry on His work in the world, and He wants it as gifts. Giving is constantly emphasized in the Scriptures, and we should give of our money to Christ. "Take my silver and my gold" should not only be sung, but acted upon, in the giving of our money to Christ. (b) Frankincense and myrrh. These were precious ointments of the orient. They were the best gifts, such as were given to kings. Such gifts should teach us to give our best gifts to Christ. "Give of your best to the Master." A small boy gave Christ five loaves and two fishes, seemingly a trifling gift. Yet Christ

IN A NOOSE,

and the Way It Ended.

By LAWRENCE ALFRED CLAY. [Copyright, 1909, by Associated Literary Press.]

Things had gone wrong with at least one of the guests of the Mountain House. Miss Nina Hazlett had gone up there with her maiden aunt as chaperon, and they had scarcely got their things unpacked when that maiden aunt began to lecture her on the frivolity of flirting.

Miss Nina had not flirted. She had simply let her eyes dwell for a moment on a good looking young man. Can't one sex look at the other sex without being made to toe the mark for so doing?

And then when the trunks had been unpacked, but not all the dresses yet hung up, the girl had gone walking by herself in the hotel grounds, and upon her return, bubbling over with enthusiasm, the maiden aunt had met her with the statement that she had done a highly improper thing and needn't be surprised if the other young ladies cut her dead.

Improper for a girl of nineteen to walk in the hotel grounds at 3 o'clock in the afternoon to view the fountain and the wolf in a cave? Nonsense! When she could have returned the smile of the bandmaster, but made up a face at him instead!

And after dinner, because a young man and his sister sat opposite and because the young man instead of his sister remarked that it had been a glorious sunset, Nina's maiden aunt said that girls in her time kept their eyes on their plates when eating. Of course it had been a glorious sunset. Of course the sister would have said so had she not been too busy with her soup. Of course the young man knew that the glorious sunset would have to be paid for with other extras, but he

time on.

It was while the lover and the aunt were occupying chairs on the veranda and trying to explain matters that Miss Nina slipped out of the hotel and took the path past the wolf's den and up the mountain. She wanted to get off by herself and think and shed tears and-and probably commit suicide. Yes, that would end all. The aunt would have to weep, Jimmie would go around wishing the noose was around his neck again, and the papers would publish her latest photograph and speak of the affair as a romance. Suicide by all means! One plunge from the precipice, 500 feet high, would do the trick.

Miss Nina had left the hotel half a mile behind and was surveying the country for suitable precipices when a sudden sight caused her to scream out

Around a bend in the path came a big black bear. He halted at sight of the girl. She screamed. He was used to it. He belonged to an Italian stroller who danced him from one resort to another. He stood on his hind legs and waltzed while the girl screamed. He stood on his head and growled while she sank down in a heap and faintly called for help. She forgot that she had broken with Jimmie, and she called on him. The bear's master was resting and

eating lunch a hundred wards behind the bend. He heard no commotion, and he did not worry. When a young lady has made up her mind to commit suicide she should not be particular as to whether she leaps over a precipice or is devoured by a bear. But Miss Nina was inconsistent. She felt herself on the point of being devoured, and she kept calling for help. Indeed, she wanted to live just as long as that old fellow referred to in all well regw lated family Bibles.

If a good looking girl in peril calls for her sweetheart long enough he is bound to come. In this case Jimmie had dropped the aunt as soon as he decently could and was taking a stroll in the forlorn hope that the niece might be met with outside. It was a very fresh kid with a very fresh wink to his eye that said to him:

"She went off up that path, and she's probably expecting you."

Jimmie didn't exactly hustle until he heard faint calls for help. Then he was all lightning. As he came in sight of the bear and the girl he took in the peril. There was a dead limb almost under his feet, and he seized it and sailed in. The bear came down off his head and on to his four feet with promptness and dispatch. He had taken hundreds of kicks from his master and the public, and he took some more now as being all in the day's work. Jimmie was still on the job when the Italian heard the rumpus and appeared to call out: "Whata you doa? Why you wanta

keel my Joseph? He circus bear. He no hurta nobody."

"My dear girl" shouted Jimmie as he turned to Nina. "Is it you-is it Jimmie?"

"Of course it is. Thank heaven I came in time!"

"Yes; he was getting ready to eat me up. Oh, how I screamed for my

aunt" "For your aunt?"

"I mean for you. Oh, Jimmie"-"Well?" he asked as he helped her

her feet and threw a quarter to the

delivered and used him to bless many during the three months' stay in Malta.

LESSON VII.-Paul a prisoner in Rome, Acts xxviii, 11-31. Golden Text, Rom. i, 16, "I am not ashamed of the Gospel of Christ, for it is the power of God unto salvation to every one that believeth." We now see Paul dwelling two whole years in his own hired house as a prisoner and continually preaching the kingdom of God and teaching the things which concern the Lord Jesus Christ out of the law and the prophets and from morning till evening.

LESSON VIII .- Paul's story of his life, 11 Cor. xi, 21, to xii, 10. Golden Text, 11 Cor. xii, 9, "He said unto me, My grace is sufficient for thee, for my strength is made perfect in weakness." It seems a strange portion to be entitled "Paul's life story," but it does tell a marvelous experience of "a man in Christ." who suffered all but death, or, as he says. "deaths oft" and finally a martyr's death, for Christ's sake. The appearances of Christ to him on the way to Damascus and afterward were most exalting, and this one above the rest. LESSON IX .- Paul on self denial, Rom. xiv, 10-21. Golden Text, Rom. xiv, 21, "It is good neither to eat flesh nor to drink wine nor anything whereby they brother stumbleth." The believer, being a citizen of a kingdom of righteousness and peace and joy in the Holy Ghost and being filled with all joy and peace in believing, is supposed to live far above the mere eating and drinking for which so many live and be ready to deny himself any selfish gratification which might offend another. LESSON X .- Paul on the grace of giving, II Cor. viii, 1-15. Golden Text, Acts xx, 35, "Remember the words of the Lord Jesus, how He said, It is more blessed to give than to receive." Again the lesson is one of being so conquered by Him who gave Himself for us that we cannot help giving ourselves wholly to Him for the benefit of others, even at the cost of becoming poorer by doing so, if only we can commend Him to others.

6

LESSON "I.-Paul's last words, II 'fim. iv, 1-18. Golden Text, Phil. i, 21, "For me to live is Christ, and to die is gain." What shall we say of giving when we see Paul at the close of a life of untold suffering saying. Now I am ready to give myself a sacrifice, a martyr, for Him whose I am and whom I serve? He could look back over a life of self denying service since that great Damascus day, and he could look forward to a kingdom of eternal glory in the ages to come.

multiplied it and through it fed 5,000 people! Our gifts may seem small, but if they are our best and freely given to Christ He can make a great use of them.

3. Our gifts to one another Christmas day witnesses a vast exchange of gifts. The tendency today is to give more expensive gifts than are necessary. Let us avoid it. Let us also not confine our giving to loved ones and friends, but make some gifts to the poor and needy. Exchange of gifts is largely selfishness, but a gift to one from whom we can expect nothing in return is the true spirit of giving.

BIBLE READINGS.

Ps. lxxxiv, 1-12; cix, 1-4; Prov. xxiii, 26; Mal. iii, 10; Prov. xix, 17; xxii, 9; Matt. x, 42; Luke vi, 38; Matt. v, 18-22; Rom. xii, 1, 2; II Cor. viii, 1-12.

W. J. Bryan and Temperance.

A thrilling period in the recent St. Paul international Christian Endeavor convention is thus described by an eyewitness:

Following the Nebraska delegation, Mr. Coleman spoke of the pledge signing campaign which Mr. Bryan is anxious Christian Endeavorers should take up and read the autograph pledge which the Nebraskan leader had sent him: "I promise, God helping me, to abstain from the use of all intoxicating liquors as a beverage." A burst of enthusiasm followed the announcement of this new movement, of which Christian Endeavorers are to hear much in the months to come.

Don'ts For Endeavorites.

Don't fail to live the truth if you would be faithful to it.

Don't persuade other people beyond your own convictions.

If the average man doesn't get all that's coming to him he is lucky. People who set a good example never

know what it will hatch out. Don't make the mistake of burying your talent lest your future time be occupied in sowing vices.

Influence of Jesus.

In the early days the influence of Jesus was explained according to the genius of that age. Today we must try to account for it in accordance with the genius of this age. They said it was due to His person. He was God. We say it was due to His character. He was the calmest and purest and most unselfish of mortals.-Rev. A. G. Singsen, Presbyterian, Providence, R. I.

HE WALTZED WHILE THE GIRL SCREAMED. wasn't going to spread a pall over the

table by saying that it had been a five ent sunset.

There was one more trial for the young girl that evening. She wanted to sit in a grotto and hear the fountain splash and the band play "A Hot Time In the Old Town Tonight." The aunt made objections, but finally consented. They hadn't been sitting ten minutes, however, when she declared that she smelled liniment and that the man in the next grotto must be using it on a lame leg. They must not tarry another moment-that lame leg might be catching. And what was a grotto, anyhow, but a pile of stones? And what was a fountain but a lot of water going to waste when it could be utilized in washing dishes? And the band -it was playing for money, anyway! Miss Nina awoke next morning determined to be very good, but things began to happen again. She overheard her aunt telling them at the office to deliver all mail to her personally, and in her anger her eyes filled with tears and she jumped up and de 70. Her letters-her love lettersto go to her aunt first and perhaps be

read by her! She would die first! The girl had just composed herself when she received a telegram from Jimmie saying that he would be up on the afternoon train. Jimmie was Mr. James Tillinghast, to whom Miss Nina was so nearly engaged that they had discussed the question of whether they should keep three servants or four. The aunt was handed the telegram. She read and returned it with the observation that it was a wonder how he had allowed himself to be noosed. Jimmie arrived. There was no one at the depot to meet him. At the hotel he had to wait thirty minutes before the answer to his card came back. The aunt greeted him effusively. That was reason enough why the niece should greet him coolly. Been noosed. had he? Been roped like a spring calf, caught on the fly before he had time to know his own mind! She would see about that! Of course Jimmie had wit enough to see that he had struck

a snag of some sort, and he proposed a veranda promenade and explanations. The aunt chimed in. But, looking

him straight in the eye, the girl replied:

"Mr. Tillinghast, kindly excuse me.

Italian to pay the damages.

"Mr. Tillinghast," with sudden dignity, "I have released you from the noose. Pray excuse my emotion." "And what in cats is all this talk about nooses?" he demanded. "Why, aunty says that I have noosed

you." "The spiteful woman! You haven't noosed me yet, but now is the time to do it. I love you, and I saved you from the bear. Don't leave room for me to jerk my head out. There-that's the proper noose, and we'll go back and hear the band play 'Where Is My Aunt Tonight?"

How the Shortsighted See.

The shortsighted and those in possession of perfect sight look upon the world from totally different aspects. The latter see spaces between the clearly defined leaves of a tree and the light shining through those spaces. the former gaze at a soft, blurred mass with no spaces.

A shortsighted man gets quite used to addressing people who are apparently without eyes and nose, and out of doors faces at quite a short distance melt into the atmosphere and become simply a cloud. Looking down a brilliantly lighted street you would probably see a long procession of lamps, twenty yards distant, and each having a distinct flame, but your shortsighted friend would see a conglomeration of shining circles shutting out the rest of the street. But, shortsighted becomes much softer and more beautiful. A coarse red es it by the tongue. face appears to wear only a becoming short than to the normal sighted person.-London Answers.

The Only Trouble.

"Miss Passay hasn't any beau at all, has she?"

"No: her past discourages suitors." "Why, there's nothing the matter with her past, is there?" "Nothing, except that it's too long."

-Philadelphia Ledger.

Reason For Blowing.

"Pop." "Yes, my son."

"Why are the whales always blowing?"

"Oh, just because one of their ancestors swallowed Jonah, I suppose."-Yonkers Statesman.

ture is reduced. When it is a case of simple dislocation the injured part is cauterized with a redhot iron, then coated with clay and bandaged with a strip of cloth. Fifteen days afterward the animal is generally cured .- Vulgarisation Scientifique.

tail its flesh as butcher's meat.

That's All He Forgot.

The cab containing the absentminded man and his family drew up in front of the Broad street station. There emerged the absentminded man, his wife, three children, a birdcage, a dog on a leash and innumerable bundies and parcels. The absentminded man paid the driver, gathered up the bundles, dropped them and pressed his hand dramatically to his fevered brow. "There," he exclaimed, "I just knew

I had forgotten something!" His wife carefully counted the three children, saw that the dog and the birdcage were intact and took an inventory of the bundles.

"We seem to be all here," she remarked. "I am sure we have everything. What do you think it is you DAYTON, MCCALL AND have forgotten?"

"Why, bless my soul!" cried the absentminded man. "Now that we are here I've forgotten where we intended going!"-Philadelphia Ledger.

Tongue Caught Ermine.

"This stole is of tongue caught ermine, hence its high price," the salesman said.

"Tongue caught ermine, eh?" "Yes, madam. You see, the ermine's by way of compensation, color to the coat is extremely delicate. A trap tears it horribly. So the trapper catch-

"The ermine is fond of ice. The blush and the sky seems nearer to a trapper smears heavy knives with grease and lays them here and there on the snow. The snow white ermine, lithe and quick, rushes up in the zero weather, licks what he takes for a fast to his tongue."-Exchange.

> Longest English Lawsuit. The longest lawsuit ever heard in England was that between the heir of Thomas Talbot, Viscount Lisle, and the heirs of Lord Berkeley respecting certain lands and possessions not far from Wootton-under-Edge, in the county of Gloucester. It commenced at the end of the reign of Edward IV. 9-19-tf FREDERICK, MD. and was pending till the reign of James 1., when a compromise took place after it had lasted about 120 years.-London Answers.

complied with, the business will be con- dance. tinued by Messrs. Harry I. and W. Wallace Reindollar.

On Monday, Mr. Harry G. Sell's 4-horse team became unmanageable, and started to run, as he was leaving town, and collided with the lamp post at McKellip's corner, breaking it off at the ground, and completely demolishing the lamp. The team was soon under con. trol, but too late to prevent the damage.

Mr. Louis Whitmore, one of the oldest citizens of this section, died at his home on the Westminster road this Friday morning, at 1 o'clock. Funeral services will be held on Monday morning, at 10 o'clock, interment taking place in the U. B. Cemetery. Mr. Whitmore was in his 85th. year, and leaves a large family of children and grandchildren.

The following were chosen as officers Grand, John J. Reid; Secretary, Charles Ridinger; Fin. Sec'y, U. H. Bower; Treas., H. L. Baumgarduer; Chaplain, Rev. D. J. Wolf; Trustees, W. Rein Motter, C. B. Kephart and Edward S. Harner; Rep. to Grand Lodge, W. Rein Motter.

Gettysburg merchants claim that frequent entertainments - sometimes every night in the week-are interfering greatly with their business, causing more breeze blossoms goods than usual to be charged. The complaint may go so far as to place the business of the burg on a cash basis. slickly six sickly snakes. One of the merchants asks, "As the Susan Shineth shoes and socks; socks and shoes shine Susan. She ceaseth why should they not do the same for their necessities ?"
