TANEYTOWN, MARYLAND, SATURDAY, APRIL 23, 1910.

NEWS NOTES HERE AND THERE

Condensed Items of Interest from County, State and Our Exchanges.

Mark Twain, the great humorist and writer, died at his home in Connecticut, on Thursday, in his 75th. year.

The rain is over, for a few days at least, says the weather man; but he will not say that the cold weather is over, so strawberries and peaches are not yet safe.

Rev. Dr. E. R. Eshbach, of Frederick, pastor of the Reformed church in that city for nearly 36 years, died last Saturday, following an extended illness. Fu-neral services were held on Monday morning, conducted by Dr. Geo. W. Richards, of Lancaster, Pa.

The continued rain, this week, has had the effect of lowering the market price of hay. Many farmers have been holding back their stocks, on account of the dry weather. In some sections the price has dropped as much as \$5.00 a ton.

----Aroused by the charge made by Dr. A. P. Stauffer at a temperance mass meeting in Hagerstown that more profanity is heard on the streets of Hagerstown than in New York, relatively speaking, the street commissioners of that city have started a crusade against swearing on the streets and have appealed to the citizens to co-operate in breaking up the habit.

Mr. and Mrs. John Milton Reifsnider, of Westminster. Md., announce the engagement of their daughter, Marianna Reifsnider, to Second Lieutenant Thos. Stanley Clarke, United States Marine Corps. son of Mrs. George Gray Ward, Jr., of New York. The date of the wedding is not given. Lieut Clarke is at present assigned to duty in Panama.

The Maryland Press Association will meet at Havre de Grace, on the 27th., where it will be entertained by the city officials and the Board of Trade. A fish dinner will be served by the citizens, and an opportunity given to witness the catching of shad, from floats, by big seines drawn by steam, and also to see how the various fish products of Maryland are handled.

Church of Brethren Meet in Washington. The Eastern District of Maryland, Church of the Brethren (Dunkers), met last Tuesday at the Meetingbouse, Fourth The County Commissioners Will

last Tuesday at the Meetingbouse, Fourth Street and North Carolina Avenue, Southeast, Washington, D. C. Elder C. D. Bonsack, of Westminster, a former pastor of the Washington church, was elected moderator; Thomas J. Kolb, of Detour, Md., reading clerk, and A. P. Snader, of New Windsor, writing clerk. The district embraces Washington, D. C., Baltimore City. Westminster and

C., Baltimore City, Westminster and Frederick, and has 27 meetinghouses, 37 Appointments, 18 Elders or Bishops, 60 Ministers and 27 Sunday Schools. The Middletown Valley church had a query asking the district to appoint a press agent, on the ground that there was too much sensational matter written by the reporters. The paper passed, and at the next year's meeting the press agent will give out the news the meeting wants published. The meeting for 1911 will be held in the Grossnickle Meetinghouse, near Ellerton, Fred'k Co., the third Tuesday after Easter. There were 12 papers, or queries, before the body, but none were sent to the annual meeting at Winona Lake, Ind., which begins Whit-Monday.

Elder Charles D. Bonsack was elected to represent the district at the yearly meeting. There are two other districts in Maryland that will send delegates— the Middle and the Western Districts. W. T. Miller, of Walbrook, was ap-pointed by the district mission board to fill the Baltimere Mission for

fill the Baltimore Mission for one year. The mission board expended \$1,200 for mission work the past year. Elders Geo. K. Sappington and T. S. Fike were appointed by the mission board to or-appointed by the mission board to or-ganize the West Point Mission, near Reisterstown, Baltimore county, and the Long Green Mission into churches. A delegation of prominent elders from the Exercise Mid-Eastern Shore, Md., applied to the Eastern district for admission. They are now in the Eastern district of Pennsylvania, and were advised to get the consent of the Pennsylvania district. The district meeting of 1912 will be held in the Woodberry meeting house, near Baltimore, third Tuesday after Easter.

Status of the Fish Laws.

In order to find out, if possible, the and Frederick counties, we addressed an inquiry to Mr. Talbott Denmead, Secreof the Maryland State Game and tary Fish Protective Association, who, as yet, is not in possession of definite informa-tion. He says, in reply to our letter: "I wish I could give you the exact

information you desire, but unfortunately there were so many local bills passed E. Harrison, special assistant attorney of the Department of Justice, is now in to afford the time from my work to go to afford the time from my work to go the West investigating the charges that the so-called butter combine arbitrarily fixes the price of that commodity. This inquiry, and that now being conducted in New York into the alleged pool in raw cotton, are declared to be the only ones under way by the Government into a codification. I expect to have the in-formation the first of next month, and will be very glad to let you have it as soon as I can get it. I have a copy of the Wertenbaker bill (Frederick and Carroll Wertenbaker bill (Frederick and Carroll under way by the Government into re- counties) but am at sea as to the amend-

> Apparently there is a state law which of the state.

It seems also true that the state has long time.

THE ASSESSORS APPOINTED.

Name District Assessors Next Week.

Under the new assessment law, the Governor appoints two assessors from each Assessment district, and the County Commissioners one assessor from each election district, the three constituting the Board of Assessors for each district. These officials receive \$5.00 a day compensation; one paid by the county, two by the state. The assessor representing the county is also to act as Secretary of the Board, and is to receive \$2.00 a day, paid by the county, for this extra service. The assessors for Carroll County, as

named by the Governor, for the four Assessment districts, are as follows; First District, comprising Taneytown, Uniontown, Middleburg, Union Bridge election districts; R. Lee Myers and

James B. Reaver. Second District, comprising Myers, Westminster and New Windsor election districts, George E. Marker and J. Frank

Crouse Third District, comprising Manchester, Hampstead and Woolerys election dis-tricts, George R. Rupp and John W. Reaver.

Fourth District, comprising Freedom, Franklin and Mt. Airy election districts, C. W. Selby and Adolphus Chenowith.

The assessors for the election districts | have not yet been announced by the County Commissioners. The work is to commence on June 1, and be completed within ninety days.

The Drop in Wheat.

Those who have been holding their wheat for a fancy price, are likely regret-ing they did not sell when the price was in the \$1.25 neighborhood, as the present big drop in price is likely to hold somewhere about the Dollar mark, according to the judgment of most dealers, though there is nothing more uncertain than market prices.

The fall in price has caused a sharp drop in the price of flour, and city bakers have already increased the size of loaves of bread, which means the saving of thousands of dollars to the poor.

It is confidently predicted that the high cost of food has reached its limit, and that meats and other food products must fall. Hogs have fallen over \$1.00 a hundred, this week, in the Chicago

Several reasons are assigned for the falling off in wheat prices. Chief among them is a lack of export demand, due to fairly good crops having been harvested in other wheat-growing countries. The Argentine crop is up to the average. The India crop is also of fair size, while from Russia comes the report that its crop is the largest grown in years. Again the millers throughout the country, in anticipation of a shortage and not wishing to be caught short as they were in 1909, stocked up early in the season and have had on hand sufficient prohibits the emptying of any seine, or net, so as to leave small fish to perisn wheat to carry them over. Then, too, the prospects for a bumper crop this on land, or in shallow water; also, that year have had its effect on the market. it is unlawful to dynamite for fish, or to set fish pots, or baskets, in any waters to be one of the best harvested for a

Jurors for the May Term. The May term of court. for which the urors were drawn on Monday, will be-

gin Monday, May 9, and the list of jurors by districts is as follows: Taneytown-George W Demmitt, Al-bert Study, Edmund F. Smith, George A. Arnold

(For the RECORD.)

ALDRICH AND HALE TO RETIRE.

Senate Leaders Give III-health as Reasons for Declining Re-election.

Washington, April 18.-Senator Ald-rich authorized the announcement to-

night that he will not be a candidate for re-election to the Senate and that he will present term on March 3, 1911. The announcement was made upon

his return to Washington from Rhode Island, where he had been in consulta-

Myers-George W. Yeiser, George W. Jones, Sr., Urias Markle. Woolerys-Joseph F. Ward, George W. Barnes, Jacob F. Rader, Edward Nisser. Freedom-Edwin M. Mellor. Robert W. Carter, John Oliver Devries, Jr. Manchester-Charles H.Zepp, Horatio R. Garrett, Daniel D. Sharrer, William H. Newcomer, Harry L. Leese. Westminster-Joseph J. Price, Theo-dore Logue, William L. Armacost, Jos. L. O'Farrell, Atlee W. Wampler, Joseph W. Smith, Orlando Reese, Irwin Scott "I have decided not to be a candidate again," said the Senator. "Since some-thing of my plans has leaked out al-ready I would be glad to have you make that statement. I had not in-tended to say anything for a few days. as I would have preferred to have ap-prised my friends in Washington of my plans personally, but I suppose it is just as well as it is."

Mr. Aldrich talked freely of his determination to retire. Ill health alone dictated his decision. During his serv-ice in the Civil War he had a long siege o. typhoid fever and as a result of that

Union Bridge—Daniel Leakins, Chas. Edwin Engel. Mount Airy—Singleton A. Aldridge, Henry W. Clary. Barret—Lloyd B. Shipley, Benjamin Barret—Loyd B. Shipley, Benjamin

One week ago the Senator went to New York, where he consulted with his physician. They were insistent that he rid himself of the more exacting of his burdens and devote a large share of his time to outdoor exercise. He could see no way to lead such a life if he accepted another term of six years in the Senate, and therefore he decided to retire.

After talking the situation over with the members of the family the Senator went to Rhode Island, last Friday to make the necessary arrangements. He wanted to confer with his Republican associates and to insure the sending of a Republican to the Senate to succeed him.

"And there is no doubt of the result." he said. "The party leaders have canvassed the situation, and there is no doubt that a Republican will take my place. All of my associates in the state are just as confident as I am on that

Following Senator Aldrich's announcement, came a like announcement from Senator Hale, of Maine, that he too would retire with the close of the present ongress.

The insurgent leaders, especially, regard these announcements as heralding the beginning of a new regime, which will greatly strengthen and harmonize

Amorg many senators the opinion is held that Aldrich and Hale are retiring because they see the end of their waning power. In the old days Aldrich could give his curt demands and have them

No. 43

Gettysburg College Presidency. The Federation of Gettysburg College

Clubs are taking action regarding the successor to Dr. Hetelbower as president of Gettysburg College. The clubs propose to send recommendations to the committee of the Board of Trustees appointed to name available men at the meeting in June. One of the clubs passed the following declaration: We believe that the new president of Gettys-burg should be a man well versed and positively retire at the expiration of his trained in American educational meth-

ods; a man with that executive ability which will make the best practical use of the means at his command; a man with sufficient influence among men to win and hold the interest of public spirited men and women of means; a man who by his publications or educa-tional work has made his name widely and favorably known and his ability felt as an educator; a man who is a Lutheran --clerical or lay."

The first of the clubs to make known its choice is the Yale Gettysburg Club, which has named William Anthony Granville, Ph. D., of Yale University, as their first choice. Others named who would make successful presidents" are Prof. Luther A. Weigle, of Carleton College, and Prof. Luther P. Eisenhart of Princeton University. - Gettysburg Compiler.

State Legislation for Hucksters.

A few days ago the august Governor of the Commonwealth of Maryland, sitting in a spacious chamber in the State House at Annapolis, tossed an important looking document of great size across the table to his companion and asked: "Isaac, is this bill all right ?"

And the young but permaturely sternvisaged Attorney General looked the measure over and handing it back to the Governor, replied:

"Your Excellency, this bill is O. K." The Governor stuck his pen freshly into the yawning mouth of a convenient ink well, poised the writing appliance for an instant above the document and attached his signature. Thus was a new law created by the regularly constituted authorities of the State of Maryland, and the title of the law (divested of the legal and legislative technicalities and verbiage with which it is necessary to surround the acts of the Assembly) was:

An Act Limiting the Hours

During Which Hucksters Can Buy Poultry In the City of Frederick.

Before the signing of the bill it had been evolved by some person possessing originality and a deep-rooted interest in the welfare of the city of Frederick. It had been presented in the House of Del-egates of the General Assembly of the State. It had been referred to a comwill greatly strengthen and harmonize the Republican ranks, which at present are in great need of harmonizing. The passing of Aldrich and Hale means the dawning of a new era in the Senate. It marks the end of the old autocratic rule, whereby a few men have dictated the course of legislation. Among many senators the onlinion is straight in their seats and, while ad-miring galleries looked on, had singly and separately responded "aye" as the roll was called on a motion to incor-porate this law in the statutes governning the people of the Commonwealth.

Likewise the bill went to the Senate obeyed without question. A few years ago the power of the as straight as possible in the chairs pro-

are especially urged to encourage the children in the observance of the day and to plant at least one forest shade tree by the side of a public road. As usual, there will be special exercises in the schools of the city during the afternoon on Arbor Day.

bille alle at

George W. Aldridge, the Republican boss of Rochester, N. Y., was defeated for Congress, on Tuesday, by his Democratic opponent. The district has been Republican, for 20 years, for Congress, but was carried by Hearst (Dem) for Governor. Aldridge was unpopular in his party, and was repudiated by the independent classes for his connection with certain cases in which bribery figured. His nomination was forced by element of his own party.

Plans were filed with the Building Department on Sunday, for a 39-story building to be erected at Wall and Nassau streets, New York, for the Bankers' Trusts Company. The building will be 539 feet high from the curb to the top of the tower. The structure will be the fourth highest in the city. The plans call for the expenditure of \$3,000,000. Above the 39 office floors will be a windowless tower 94 feet high. The front will be a granite, with Ionic columns from the second to the fourth floor.

A trolley line from Baltimore to York, Pa., running out the Reisterstown pike, now seems assured. Plans have already been completed for the line from Hanover Pa., to Reistertown, the franchise having been granted by the Maryland authorities after some opposition. From Reisterstown the road will be built into Baltimore, the connection being made at Hanover-with the lines of the York Railways Company. Work will be started immediately at Reisterstown and as there is little grading and bridge construction work to be done, it is anticipated by the contractors that the work on that end will be completed within a vear.

Contracts for the construction of the W. M. extension from Cumberland to Connellsville, have been awarded to the Carter Construction Company, of Pitts-burg. Bids for the construction were invited in three sections, and it was expected that the contracts would be awarded to several different concerns to facilitate its completion. The line is to be 83 miles in length and will give the W. M. entrance into Pittsburg over the Pittsburg and Lake Erie, with which it has a 99-year traffic agreement. It is believed that the United States Steel Corporation is closely affiliated with the Carter Construction Company. The new line will cost about \$12,000,000 to construct and equip.

made no appropriation for publishing the fish and game laws, and that there is likely to be more or less doubt as to just what the present laws are. We hope to receive a synopsis of the laws, from some reliable source.

W .M. R. R. Double Tracked.

The Western Maryland Railroad Company's new tracks between Emory Grove and Baltimore, which cost about, \$1,000,000 will be put into service this month, when all trains operated be-tween the two points will use the double track instead of the single track as at present.

When the new double-track portion of the road is put into operation the Western Maryland will have prachimself, against the wishes of the better tically a double track system all the way to Highfield, Md., or at least it will be almost as effective as the two-track system. The double track, which has been completed, extends as far as Emory Grove. At that place the Western Grove. At that place the western Maryland divides, one branch extending via this place to Highfield, while the other diverges, touching Westminster and joining the old Baltimore & Harrisburg division at Highfield. Thus, according to the officials of the Western Maryland, the road gets the result of a double-track system as far as the last named place.

IN SAD BUT LOVING REMEMBRANCE

Of our dear sister, Mrs. Clara B. Bowers, who died one year ago today, April 22, 1909. Gone, but not forgotten.

One long year has passed, Since we were forced to part; But time nor space can never era Her memory from our hearts. er erase

The depths of sorrow tongue cannot tell, At the loss of our sister we loved so well; And while she rests in peaceful sleep, Her sacred memory we will always keep.

We watched her breathing through the night; Her breathing soft and low; As in her breast the wayes of life Kept heaving to and fro.

So silently we seemed to speak; So slowly moved about— As we had lent her half our powers, To eke her living out.

By her loving Sisters, MRS. J. A. THOMSON. MRS. J. H. HAWK.

Church Notices.

The Lord's Supper will be administered at Emanuel (Baust) Reformed church, Sunday, at 10.30 a. m.; preparatory services on Satur-day, previous, at 2.30 p. m. Y. P. S. at 7.30 p. m.; subject, "Winning the World." MARTIN SCHWEITZER, Pastor.

There will be preaching in the Church of God in Uniontown, Sunday, at 10.15 a. m. Sunday school at 9 a. m. Preaching at Frizell-burg at 7.15 p. m.

L. F. MURRAY, Pastor.

Wheat is not the only food commodity that has declined in price. Old potatoes are lower now than they have been for several seasons. In the retail markets the ruling prices range from about 50c a bushel up, according to quality, but the statement is made that out West, where a great many farmers held back their crops in anticipation of higher prices, they are now glad to get rid of them at from 20c to 25c a bushel, and as a matter of fact, potatoes are selling at a lower figure in New York state.

Children's Aid Meeting.

A public meeting will be held in the Opera House, Taneytown, on Tuesday, April 26th., at 7.30 p. m., at which Mr. Geo. L. Jones, General Secretary of the Henry Watson Children's Aid Society, will give an illustrated lecture on the causes, treatment and prevention of child dependence. Mr. Jones will dis-play a large variety of pictures, illustrating every phase of the problem.

This county has made a substantial contribution, by offering many homes to friendless little children. For the care of homeless little ones, it deserves the consideration this Society is trying to give it. It is the purpose of the meeting, to show how this agency can still further help this county and how the county can help the agency to do more efficient work.

We commend the above cause to the readers of the RECORD, and urge that the above meeting be well attended. The work and purposes of this Society are such that they are entitled to general support. Moreover, those who furnish homes for children, not only benefit the children, but themselves as well; therefore, the act is not wholly benevolent and philanthropic.

-0.0. Ancient Easter Eggs.

A reader of the REORD, at Uniontown,

sends the following item: "I notice in the Sun, an etched Easter egg forty-five years old, reported from Hagerstown, Md. At Uniontown, Md., are two Easter eggs, one seventy-four years old, and another fifty-eight, beautifully etched by Eleanor Hammond Bohorts Was Roberts was a student Roberts. Mrs. Roberts was a student at Liditz Moravian School, Bethlehem, Pa., and the grandmother of Mrs. Harry Birnie, Taneytown, Md., and of Mr. Milton Zollickoffer, and a life-long resident of the vicinity of Uniontown."

Letter from Hawaii.

Another of the series of letters from Dr. S. G. A. Brown, will be found on the sixth page of this issue. These letters are quite interesting, but their length fits them better for an inside page; there-There will be preaching services in the Harney, U. B. church, Sunday morning, at 10 o'clock. At Taneytown, in the evening, at 7.30. C. W. CHRISTMAN, Pastor.

A quiet but pretty wedding took place at St. Simon's Episcopal Church, Phila-delphia, Pa., on April 14th, 1910, when the Rev. William Smythe, united in marriage, F. Myrtle, the only daughter of Mr. and Mrs. Oliver Angell, now of Philadelphia, but formerly of Detour, Carrell Co. Md. and S. Arthur young Carroll Co., Md., and S. Arthur, young-est son of Mr. and Mrs. James T. Myerly, also of Detour, Md.

The happy couple, with the best wishes of their friends for a long, happy and prosperous wedded life, will make their home, at present, with the bride's parents, at No. 1241 Sedgley Ave., Phila-delphia, Pa.

---Taft for Roosevelt in 1912.

Washington, D. C., April 20.-That President Taft has definitely decided not to be a candidate for re-election in 1912 and that he will advocate the nomination of Theodore Roosevelt is the latest sensational story set afloat at the Capital. Several members of Congress, as a result of recent talks with the President, are freely declaring that Mr. Taft does

not wish to be renominated. Mr. Taft has made no secret of the fact that he prefers the work and life of a lawyer to that of an executive. He has made the declaration that all his training has been in the interpretation of the law and not towards an understanding of the expedients necessary to obtain the enactment of laws by Congress

The greatest ambition of Mr. Taft's life, Congressmen are pointing out, has always been an appointment as Chief Justice of the Supreme Court. It was only because of Roosevelt's persuasions and the arguments of his relatives and friends that Taft consented to make the run for the Presidency. According to those who are spreading

the rumors, Chief Justice Fuller, of the Supreme Court, although now eligible for retirement, will remain on the bench three more years. He will retire at a time when it will be possible for Mr. Taft's successor to appoint the ex-President to the chief justiceship.

In connection with these reports, it is declared that Mr. Roosevelt has lately determined to run for a second elective term should the sentiment of the country and Taft's wishes demand it. It is asserted that Roosevelt's letters to the United States within the past month have been making inquiries as to the sentiment of the public with reference to the Payne tariff bill and the prospects of a Democratic House. It is said here that Roosevelt will go on the stump in the West in the Congressional campaign. The Congressional Campaign Committee

Chairman Vandiver says, "We expect ryland, in all six Congressional districts. | over the state.

Hanna, Platt, Quay and Spooner working together there was nothing to with-stand their influence. Death claimed Allison, Hanna, Platt and Quay. Spooner resigned to practice law. That left the leadership with Aldrich and Hale. They have put through the Tariff bill, but the increasing resistance of inde-pendent senators made the burden heavy to bear.

It means that the committee of committees which names the members of the committees will be reorganized. The steering committee, too, will pass under new control. While the changes will not go into effect until the next Congress keying after the proposition had been meets, a year from next December, there is lively speculation as to the new Senate. Senator Lodge, by reason of and properly organized officials who are Senate. Senator Lodge, by reason of his prominence and long service, will naturally be considered for the place if he then is in the Senate. He is a candidate for re-election, and is encountering strong opposition. Root, of New York, is believed to lack some of the qualities of leadership, but with his high ability he may become the spokesman for the conservatives.

..... Reassessment, and Values.

A subscriber to the Cambridge Record, writes to that paper the following letter, to which the Editor replies: "Property is generally assessed at two-thirds or three-fourths its market value; that is, the value it would sell for, if on the market;" The letter says:

"Under the law for the reassessment of property, what will be the basis for ascertaining the value of property? I mean by this, how will the assessors decide upon the assessable value ? Will it be based on the last sale, the present income, or upon a value such as the own-er will sell for ? Your kind assistance in explaining this matter will be greatly appreciated.

Real estate has in most cases doubled in value since the last assessment, and in some cases it will bring three times as much as it would twenty years ago. We have had considerable discussion of We have had considerable discussion of moniously in preparing a Democratic this subject, but do not seem to have program." been able to agree on any plan among ourselves.

This is an important question and one ification it the victory of the insurgents in the should be decided after the most in the start fight. Regarding the "free that should be decided after the most in the careful consideration, and we hope the silve Governor and the County Commissioners fort will appoint such men for assessing the the value of property as will be guided by adding their own best and impartial judgment, as upon their valuation the taxes will be based for perhaps the next ten, fifteen or perhaps twenty years.'

As we note editorially, in this issue, is depending upon him to keep that the reassessment of property is going to be an act of immense importance to the counties of Maryland, because of greatly increased values, and questions of the to make a clean sweep this time'' in Ma- above sort will likely be discussed all items nowadays-a Spring tonic for

the Governor, but a great many persons will probably have difficulty in under-standing exactly why the bill got any-where or to anybody outside of Frederick city.

Why the General Assembly of the State of Maryland, gathered from its 23 counties, extending from the rock-ribbed pinnacles of Garrett to the wavelaved shores of Worcester, should be called upon to monkey with the affairs of hucksters and hens and roosters of Frederick city is not any clearer to the average mind than why that General Assembly sheuld consent to do the monput up to it.

The city of Frederick is a community looked upon to regulate the affairs of their town by the enactment and enforcement of rules and regulations. Yet the General Assembly of the State was called upon to limit the hours during which hucksters could buy poultry there. It sounds almost as reasonable as would be a law passed by the Congress of these United States compelling Baltimore to paint its fire plugs yellow.

And yet, as strange as is the Fredererick city law and as strange as it may look in the grand old Code, the story of the legislative session of 1910 will go thundering down the ages fairly bulging with many more statutes of equally pe culiar and astonishing character.-Bat. News.

.... Not a Candidate, Says Bryan.

Washington, April 19.-William Jennings Bryan, who arrived to day to ap-pear before the House Committee on Insular Affairs, met the Democratic leaders and "talked politics." He declared he will not become a candiate for Senator.

"Indications point to growth in Democratic strength," he said, "and I hope it is going to be sufficient to carry the House. Then I hope that if the House is Democratic in name it will be Democretic in fact, so that the party can work har-

When asked about this program he refused to dicuss it. Bryan expressed gratrence in his letter sent here derson Day banquet, he said m of it was unwarranted, and

"The Republicans should not begrudge ns our pleasure in their President being compelled to admit that scarcity of money made low prices." He said the responsibility for present high prices lies mainly with the tariff and the trusts.

Baseball, the coming prize fight, and Roosevelt's tour, are conspicuous news newsnanor

SATURDAY, APRIL 23rd., 1910.

All articles on this page are either original, or properly credited. This has al-ways been a fixed rule with this office, and we suggest the adoption of it by our exchanges.

THE EVENING Sun, which appeared for the first time, on Monday, is a very plain paper, typographically, and this fact will surely commend it to thousands of readers who like neatness, order, regularity-just common plainness-in their reading matter. The type is large, the headlines modest-the whole paper looks a little countrified-like a city daily come to its right mind-and aside from its good appearance, the new Sun looks good to read.

A LOT OF FOOL women, who pose as being qualified to exercise the right of suffrage, gave their unfitness away when they hissed President Taft, while delivering to them an address of welcome, last week, in Washington. Their convention afterwards attempted to rectify the discourtesy by passing resolutions of thanks and apology, but the President's fitting rebuke, delivered on the spur of the moment, fits the case elegantly-that before people are entitled to the right of suffrage they should first have proper regard for the opinions of those who disagree with them. In justice to the ladies, it must be said, that the leaders did not indulge in the "snaky" demonstration, nor were they in sympathy with it.

Reassessment of Property.

Baltimore city, by the use of well directed political influence, had itself of property; therefore, the counties will suffer on account of the increase in values in property, and pay a heavier share of the state taxes. Just now, farm values are higher than at any time for twenty-five years past, due largely to the increased value of farm products. City property is also higher, due to the advance in building material and labor; but, the city escapes, while the counties

equal to farms, live stock, etc-then the county rate could be reduced from 60¢ to 48¢ and produce the present amount of income to the county. A reduction in rate something like this, or even more, seems probable for the additional reason that a large amount of property, not now taxed, is apt to be found.

While our estimate of the increase in values may be too high-we do not claim to be an expert on the subject-it is neverthless true that figuring along this line must be done, and the double increase considered-both in basis and rate-for both laws are passed, and will be in force by another year.

What Fools We Be!

People who are hurt, financially, by legislation-or imagine that they arewill "vote the other way," while people who are benefitted, financially, by legislation, are ungrateful and selfish and make little or no effort to return thanks and work for benefits received. In other words, if you want to stir up a man's interest in politics, you must hurt him; if you give him what he wants, he takes it and goes to sleep.

Every now and then our good people will stop a while and look and listen to what is going on in politics; they will even raise a little dust, at times, and bestir themselves to secure a certain thing. Then, after they have it, their security in possession is most remarkable; they forget that the "other fellows" are not likely to stay quietly whipped, and the first thing these good people know, their fish have slipped back into the water.

For things secured through politics and politicians, it is necessary to keep everlastingly awake. The basket must be watched. Those who play politics and keep awake 365 days in the year, are the ones who not only get things, but keep them. There is no more uncertain, or unthankful task, than to lead moral, or economic, movements, for the very excellent reason that the rank and file is not to be depended on-its membership is made up of early quitters, whose enthusiasm is warm one day and cold the next-Sunday politicians.

It is a wonder that we receive as much good government as we do, considering that the class of people who are willingly in politics as a business-as a trade, profession, or graft game-is growing; the rest of the people work at something else, and largely for the purpose of making enough money to pay the professionals-and have a little left. For a long time the office has quit seeking the man-now it is a go-as-you-please sprint for the offices, and "we the peoexempt from the general reassessment ple" look on and enjoy the race-and pay to see it. What tools we be ! ----

Partisan Legislation.

The close of every legislative session is usually marked with a number of vetoes, by Justice Story, of Massachusetts, and the chief excuse for which rests in the fact that too much money has been appropriated for other purposes, and it is Harrison, of Maryland, who was a memabsolutely necessary to prevent the ber of the court for only a year. Treasury from being "swamped," even Although there have been .63 though worthy institutions and objects must suffer. According to the Governor, the running expenses of the last session were ite sons in this list. New York and Ohio \$50,000 more than necessary; in other words, this sum was squandered in gifts Massachusetts comes next with six. to party workers, who rendered no Maryland, Pennsylvania and Virginia equivalent service to the state, though the tax-payer should welcome, rather they may have done so to the party. see and Kentucky follow with three This represents \$50,000 that had to be sayed, then, somewhere else. The same is true of the \$15,000 appropriated for "advertising" the overwhelmingly defeated disfranchising amendment of 1909, and is equally true of many other expenditures. Isn't it ridiculous, to say the least, that institutions for caring for sufferers from tuberculosis, the insane, and unfortunates in general, not counting public road conment in operation at the same time that struction and public improvements, must suffer because of the inroads on the State Treasury of mere partisan schemes? party in power is apparently more concerned over ways and means of keeping increase of 6¢ and 71¢ in the state tax in power, through giving away the tax- Justice Day, 61; Justice Moody, 57, and rate, taxes in the counties are going to payers' money, than it is in legislating Justice Lurton, 66. economically and wisely for the people. sure to be the result. > cent. The New York Times reckons that serves:

in many departments of trade must at-tract the attention of all. Railways alone have raised wages an aggregate of \$20,000,000 within a few days. The men asked for the money, and the railways replied, 'Certainly, we will get it back from the people who pay the freight." That was strictly according to the original precedent-the anthracite-coal strike, which was settled to the accompaniment of so much applause by President Roose-We have all been paying more for velt. coal ever since, and have been less en-thusiastic about that method of settling strikes at the common expense as appreciation of the method has grown.

Now there is a similar case in an allied trade. Last week 300,000 bituminouscoal miners celebrated the anniversary of their eight-hour victory with a strike for higher pay. Whatever the result of their demand, they have good ground for expecting the concession of so reasonable a demand, which the employers can have no excuse for not granting, since it will cost them nothing. It is only necessary to collect it from the ultimate consumer."- Literary Digest.

Almost a New Court.

Washington, April 17 .- The changes in the Supreme Court seem likely to make it almost a new body in the near future. Justice Lurton has just been placed on the bench, and the President is considering his choice of a successor to the late Justice Brewer. Rumors that Jastice Moody may resign on account of ill health are insistent, although vigorously denied. Two members of the court. Chief Justice Fuller and Justice Harlan, are near their seventy-seventh birthday. Should these three resign, retire or the hand of death be laid on them in the next three years. President Taft would equal the record for appointing justices since the organization of the court. That record was made by Jackson and equaled by Lincoln and Grant, each naming five members.

gained his position of great authority at stantial increase in the wages of the the hands of four successive Congresses. But there has been a growing disposition in the Republican party to insist up has voluntarily raised the pay of 185,000 on organized authority as against the traditional freedom of conscience, action, and speech that has always belonged to Republicanism in its best period. Even Mr. Taft, and he perhaps more than any one else, has come under the delusion of this idea of party authority. He is constantly talking of party pledges, by which he means that forgotten chain wages of both trainmen and telegraph of resolutions adopted in the convention

be held subject to a party platform in tolerating insurgency, so called, and "The ease with which wages are rising proclaiming full freedom of opinion and

Princeton Graduates Startled.

Pittsburg, Pa., April 17.-President Woodrow Wilson, of Princeton University, last night startled hundreds of Princeton graduates who listened to his speech delivered at the sixty-fifth anniversary banquet of the Princeton Alumni Association, of Western Pennsylvania. So radical were his views that the banqueters refused to believe their ears, until President Wilson had verified his quotations as correct after the feast

In the course of his banquet speech, President Wilson said:-

"The colleges are in the same dangerous position as the churches. I hope that the last thing I will ever be capable of will be casting a shadow on the church, and yet the churches-the Protestant churches, at least-have dissociated themselves from the people. They serve the classes, not the masses. They serve certain strata, certain visible uplifted strata, and ignore the men whose need is dire. They have more regard for pew rents than for soul and in proportion as they seek the respect of their congregations to lift them in esteem, they are lowering themselves in the

whole scale of Christian endeavor. "The colleges are in the same class, looking to the support of wealth rather. than to the people. The State university is being lifted in popular esteem and the privately endowed institution is

The New Spring Goods are now here, Awaiting Your Inspection.

We have never shown a more beautiful assortment of Dress Goods in all the new shades of the season, than at this time. Ask to see them.

Ready-made Clothing.

We have Men's and Boys' Suits at All Prices.

Each Suit is a triumph of quality at its price. The wonderful durability of our Suits is due to the extreme care taken in the making. The trim and tasteful styles we show come from long experience in catering to critical trade. The very moderate prices we ask ably demonstrate the fairness that characterizes all our transactions. Come and take a look at them before your size is gone.

Carpets, Rugs, Linoleums, and Mattings.

You will be sorry if you don't look through this department before making your purchases elsewhere.

Large Assortment of 9x12 Rugs to select from.

SHOFS. SHOES. SHOES.

This department is always up-to date, in all the leading styles and shapes in Gun Metal, Vici, and Patent Leather, at prices as low as the lowest.

Just received an Imported Crate of Queensware that we are selling very cheap.

A good assortment of Knives and Forks, Tea and Tablespoons, Galvanized Pails and Tubs, Etc.

is the germ of LaGrippe, that, breathed spirits after an attack of Grip. If suffer-ing, try them. Only 50c. Perfect satis-faction guaranteed by R. S. McKinney, Druggist, Taneytown, Md.

Reassessment, in itself, even at a higher basis, need not cause apprehen-

sion of greatly raised taxes, except in so far as the basis is not equitably determined. If all classes of property, city, town and country, were fairly assessed, without exemption or favoritism, and if public expenditures are not increased, than object to, the coming general assessment.

But, the outset is not reassuring. Perhaps Baltimore has proper grounds for its exemption, but we doubt it. If it rests on no better reason than the objection of city tax-dodgers, on the desire not to pay higher taxes, then the reason is not only insufficient, but the party in power is directly to blame, especially as it is placing the reassessit is increasing public expenditures and increasing the tax rate.

If there will follow a considerably increased basis in the counties, due to increased values, in connection with the be burdensomely higher; and, this is result:

DAHLIA JACK ROSE.

This Flower One of the Most Profitable That Can Be Grown.

Farmers who grow flowers for profit as a side line-and this appeals particularly to some of the farmers' wives who live near good sized towns-are assured by L. K. Peacock of Berlin, N. J., who produces many kinds of flowers, that the dahlia jack rose is one of the most profitable blossoms. Mr. Peacock cut blooms last season that brought \$6 per hundred, while a Massachusetts man sold his output at \$1.50 a dozen. As to this rose Mr. Peacock writes:

"Now, after another year's growing, during which we had several acres, we can only add to the praise extend-

DAHLIA JACK ROSE.

ed by us last year. It was the healthiest plant we had on the place, the first to get into bloom, and every flower was perfect the entire season, which in our location was a most trying one owing to the extended droughts. True, the stems were not as long as they should have been, but they were as long as those of Sylvia, recognized by all as a first class flower with good stems, and later in the season many jack rose stems averaged longer than any of the recognized standard varieties. Almost every special order for cut flowers included the jack rose.

"Another thing not to be forgotten is the forcing quality of the jack rose. which is even today being placed on the market and sold at prices far above chrysanthemums, as it has that brilliant, rich crimson that appeals to all and cannot be found in the chrysanthemum-a decidedly richer shade than found even in the jacqueminot

A New Kind of Corn From China. A small lot of shelled corn of a kind that is new to this country was sent United States department of inch hard wood, with iron plates agriculture from Shanghai, China, in screwed on where the axle passes 1908 and tested the same season. It proved to have qualities that may make it valuable in breeding a corn adapted to the hot and dry conditions of the southwest. The plants raised in the test averaged less than six feet in height, with an average of twelve green leaves at time of tasseling. The ears averaged five and one-half inches in length and four and one-third inches in greatest circumference, with sixteen to eighteen rows of small grains. On the upper part of the plant the leaves are all on one side of the stalk, instead of being arranged in two rows on opposite sides. Besides this, the upper leaves stand erect instead of dropping, and the tips of the leaves are therefore above the top of the tassel. The silks of the ear are produced at the pwint where the leaf blade is joined to the leaf sheath. This corp is very different from any now produced in America. Its peculiar value is that the erect arrangement of the leaves on one side of the stalk and the appearance of the silks in the angle where the leaf blade joins the sheaf offer a protected place in which pollen can settle and fertilize the silks before the latter are ever exposed to the air. While this corn may be of little value itself, it is likely that by crossbreeding these desirable qualities can be imparted to a larger corn. The discovery of this peculiar corn in China suggests anew the idea that, although America is the original home of corn, yet it may by some means have been taken to the eastern hemisphere long before the discovery of America by Columbus. From descriptions in Chinese literature corn is known to have been established in China within less than a century after the voyage of Columbus.

Golden Words of Wisdom Anent the "Back to the Farm" Slogan.

Here is the view of a Vermonter, who signs himself "A Farmer From Town," in a recent letter to a New York paper.

We in the hills have watched with great interest the widely varying comments on the high prices and means for restoring less costly living.

"Back to the farm is the only remedy," but what will induce labor to go back to producing food? The farming population, a fairly large proportion. has simply asserted its right to choose where to work for a living. If labor prefers to build automobiles or to manicure ladies' hands or even, as we see it, to make cheap wrappers in a New England factory town rather than work on a farm, what is to be done?

The only way to make those one time farmers go back to work on the land is to make it pay, and that would mean higher prices than are now paid the farmer. At present 7 cents per pound, dressed, is the best the farmers of this region receive for beef, 3 cents

per quart for milk richer in fat than most that is sold in cities, and vegetables for nearly nothing back from the railroads. But already "the ultimate consumer" pays more than he wishes. The remedy is back to the farm with

"the ultimate consumer" himself! If he will forego fashionable clothes, champagne and canvasback duck, be content with the best beef, mutton and chickens, milk, cream, cheese and butter that any market affords, the city rebel could, with no more than a few thousand invested in land and \$500 a year, live like a lord in lovely surroundings and spend some time in town as well.

If, like us, he chops and hauls some of his own wood, plows his own land and cares for his own garden, \$2,500 to invest and \$200 a year would give freedom and good living-hard for well to do folks to find in town.

On the farm we have no fear of beef trusts nor of illness. When six months' idleness follows a sickness we have a year's fuel ready, some "critters" to sell, a cellar full of vegetables and an unfailing supply of rich milk from which we make our butter and cheese.

To Build Lime Spreader.

Very useful as a farming adjunct is a distributer for spreading lime, ashes or bone on land. A machine built for this purpose by a New York farmer is thus described:

The axle of an old mowing machine is first cut in two and made as long as the machine is to be. Five collars are then shrunk on to the axle equal distances apart in such a manner as to hold the four feed bars about one inch from the axle. One by threeeighths inch iron feed bars are then fastened to the collars with tap bolts and the heads cut off and riveted, making a cylinder which acts as a force feed when revolving with the wheels. The same wheels and ratchets are used that were on the old mowing machine, so it can be put in and out of gear.

The sides of the hopper are constructed of one and one-quarter inch lumber, and the ends are made of two

NO FEAR OF BEEF TRUSTS. An Important Message

We are now filled up full with Spring and Summer Goods, in all the lines, and the best and most important feature of it all, we are away down in prices, to the rock below.

The advance in prices during the winter has not affected us a particle. We are here with a larger stock than ever, and prices lower than ever. Considering the quality, we believe we are 10% lower throughout the entire stock than ever before.

Our Carpet and Matting Stocks

are so large that we must dispose of them at any old price, in order to make room for matching up Carpets, Mattings, Linoleums, Oilcloth, etc.

Our Clothing Stock

is also beyond the limited space we have. Hence we are compelled to shove out some specials, at a sacrifice, so we may have room to place the balance.

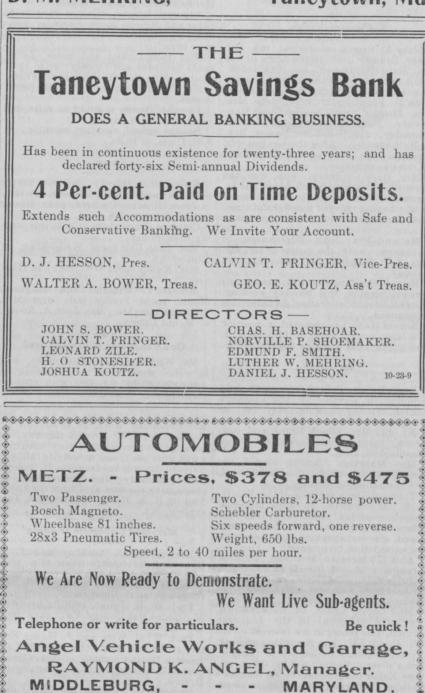

The Shoe Line

is nobby. \$4.00 Shoes going at \$3.50-no matter about the price.

Straw Hats

are out, and are awaiting to protect you from the rays of that hot Sun. Come help us to move-every article you buy will lighten the burden that much With a prosperous season before us, we are yours to serve.

D. M. MEHRING, - - Taneytown, Md.

PEOPLE OF THE DAY

The New French Premier.

Aristide Briand, the new French premier, is a brilliant scholar, orator. avowed Socialist and was the author of the final chapters of the separation law that divided church and state in France. Before his recent elevation

M. Briand was minister of justice and worship in the Clemenceau cabinet. M. Briand was born in Nantes on

March 28, 1862, attended school in that city and finally became a lawyer. He was elected to represent the Loire in the chamber of deputies. Five years ago he was known only among his own party, the Socialists.

He was appointed reporter of the church and state separation bill and soon became recognized as a high an-

thority on the subject. He aimed to draw up a bill broadly liberal in spirit. but devoid of fanaticism and designed to assure freedom of worship and conscience. For his work on that bill he was elevated to the post of minister of public instruction and worship.

During the church and state troubles he acted with firmness and moderation, and after the death of M. Guyot-Dessaigne on Dec. 31, 1907, he was appointed minister of justice, retaining also the ministry of worship.

The Can Opener. Speaker Cannon at Valley Forge defended the milder forms of profanity wittily.

"These not irreverent cuss words," said he, "act as a safety valve. A man but for them might do shocking things-smash the piano, scissor the portieres."

Speaker Cannon lighted a fresh cigar.

"So many things in the home," he said, "incite a man to-er-let off steam. There's opening cans, for instance-opening these newfangled cans with patent openers that are always getting lost.

"A Danville man was letting off steam terribly the other day as he opened one of these patent cans. His wife, tired of the noise, called from the next room:

"'What are you opening that can with, dear?'

"'The can opener, of course,' he replied.

Drawing Inferences.

President Lincoln once told the following story to D. H. Bates, manager of the war department telegraph office: "I'm like an old colored man I knew. He spent so much of his time preaching to the other slaves it kept him and them from their labors. His master told him he would punish him the next time he was caught preaching.

"'But, marsa,' said the old man, with tears in his eyes, 'I always has to draw infruences from Bible texts when dey comes in ma haid. I jes' cain't help it. Can you, marsa?'

"'Well,' said his master, 'I suspect I do sometimes draw inferences. But there is one text I never could understand, and if you can draw the right inference from it I'll let you preach to your heart's content.'

"'What is de text, marsa?' asked the colored man.

"." The ass snuffeth up the east wind." Now, what inference do you draw from that?'

"'Well, marsa, I's neber heard dat text befo' nohow, but I 'spects de infruence am she got to snuff a long time befo' she get fat.' "-Pittsburg Chronicle-Telegraph.

Trapping a Tiger.

The tiger is possessed at times of an almost supernatural cunning, a wonderful sense of smell and a fine instinct with regard to traps and the like, which make him as difficult au animal to take alive as any existing. Sometimes he can be snared, but not often. On one occasion the writer's native Indian servant ran in in a great state of excitement to say a tiger was trapped in the jungle half a mile away, and the entire camp, cf course, at once flocked over to see the prisoner. The trap was exactly on the principle of a humble mouse trap. with a falling door, and built of strong timbers laced together with rattans. The imprisoned tiger was a full grown mate, and it would be difficult to imagine anything wilder than his rage as he roared and stormed and hurled himself in futile fury on each part of the structure in turn. There he was to stay until hunger had rendered him manageable, the incident showing that the tiger can be trapped, although not often.-London Globe.

An Idol With Diamond Eyes.

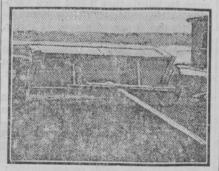

It is a curious fact and one scarcely known outside of Russia, and there hardly ever mentioned, that the famous Orloff diamond was once the right eye of the great idol Serringham in the temple of Brahma. This precious gem was stolen at about the beginning of the eighteenth century by a French soldier who had made a pretense of being converted to the Hindoo religion in order to gain the confidence of the priests and admission to the temple. The Frenchman first sold the diamond for £2,000. On the next turn it was bought by a banker of Constantinople for £12,000. The banker kept it until 1774 and then sold it to the Russian empress for £90,000 and a life pension. The gem has been in the Russion royal family ever since. As it is now set in the imperial scepter of Russia it presents a flattened, rose cut surface and weighs exactly 1941/2 carats.

Ancient Iceland.

Iceland was founded A. D. 874 by

Hay Consumed by Animals. The hay consumed by different animals does not vary greatly from three pounds daily for each hundred pound weight of the animals. The following table is the result of various experitheir hay will hold out for the winter: working borses, 3.08 pounds; milk cows, 2.40 pounds; young growing cattle, 3.08 pounds; steers, 2.84 pounds; dry cows, 2.42 pounds; sheep, 3 pounds. All the articles enumerated in this food table are estimated as of good quality. If the fodder be of poor quality more must be allowed.

through to prevent wearing. The inside of the hopper is made one-half inch longer than the force feed cylinder, so it will work easily. The ends and sides of hopper are made separately and put together on the machine. The whole bottom of the machine is then covered with heavy galvanized iron with a 1 by 2 inch

LIME DISTRIBUTER.

hole every six inches, and over this a false bottom is placed so it will slide toward either end to regulate the feed. This false bottom is held in place with three straps made of hoop iron, fastened to the sides of the hopper and worked with a lever at the back. The force feed must work very closely to the holes in the galvanized iron to prevent clogging. The pole is bolted to a 4 by 4 inch stick as long as the hopper. This stick is fastened eighteen inches in front of hopper by bolting it solidly to the two draft irons made of 2 by half inch iron at each end, through which the axle passes, and two heavy braces which hold the hopper in position.

New Variety of Fruit.

The pecott is the name given to a new variety of fruit that seems to have originated in the Yakima valley. near North Yakima, Wash. Two men working separately, each without the knowledge of the other, reached, the same results. The fruit is a cross bements by different persons and will be tween the peach and the apricot. It useful to farmers who wish to deter- is not so large as the peach, but is mine by calculation beforehand how earlier than either the peach or apricot. It will be valuable as an early rruit because it comes into bearing and ripens soon after strawberries are in the market. It is earlier than the earliest peaches and has a fine flavor. It has a beautiful yellow color, with a bright red cheek, making it an attractive fruit when nicely boxed and ready for the market.

Something New In Kitchen Ware The "1892" Pure Spun Aluminum Ware is rapidly coming into use for cooking purposes. It is taking the place of agate and enamel ware because while its first cost is a triffe more than ordinary ware, it is really much cheaper in the long run, as it is guaranteed for twenty-five years and will last practically a life time. The genuine "1892" Ware, made only from pure SPUN (not cast) Aluminum, will not crack, scale, peel, break, scorch or burn. It looks like silver but weighs only about one-quarter as much, is easily cleaned and handled, and will not rust, corrode or tarnish. Absolutely pure, non-poisonous and wholesome; saves money, time and doctor's bills. Be sure you get the original and gen-uine ware stamped with the Maltese Cross. At your dealers, JOHN S. BOWER, TANEYTOWN, MD.

"'Oh,' said she, 'I thought you were opening it with prayer.' "

A Master of Aviation. Orville Wright, who recently remained in the air at Fort Myer, Va., seventy-two minutes and forty seconds, carrying Lieutenant Lahm of the signal corps as a passenger, tacked a new record to his long string of aerial performances. The best previous record was made by Wilbur Wright last year at Le Mans, France, when he carried a passenger for 1 hour 9 minutes 31 seconds. Incidentally Orville more than met the government requirements for carrying power and in a later effort for speed in straightaway flight. Before his record breaking achievement the best that Orville Wright had been able to accomplish with a passenger aboard was 9 minutes 6 1-3 seconds. This was during a trial flight made over the Fort Myer drill ground

on Sept. 12, 1908, when he circled the field for a distance of 5.88 miles with Major George O. Squiere of the army as his passenger.

It was in attempting to better this flight that he met with the accident on Sept. 17, 1908, which resulted in the death of Lieutenant Thomas E. Selfridge of the signal corps and in serious injury to himself.

On this occasion the machine, after completing two circuits of the drill ground, was dashed to earth from a height of seventy-five feet by the breaking of one of the propeller blades.

men from Norway. In the words of John Fiske, "it was such a wholesale colonization of picked men as had not been seen since ancient Greek times and was not to be seen again until-Winthrop sailed into Massachusetts bay. It was not long before the population of Iceland was 50,000. Their sheep and cattle flourished, bay crops were heavy, a lively trade-with fish, oil, butter and skins in exchange for meal and malt-was kept up with Norway, Denmark and the British isles. Political freedom was unimpaired, justice was fairly well administered, naval superiority kept all foes at a distance, and under such conditions the growth of the new community in wealth and culture was surprisingly rapid."

His Compliment.

The governor of a western state was making inspection of certain state institutions when he made inquiry as to the progress of a chaplain by him appointed to an insane asylum.

"How is he getting on?" asked the governor, thinking to get an unprejudiced opinion from the official acting as his guide.

"Fine!" exclaimed the man. "His preachin' is very successful, governor. The idiots enjoys it especially."-Cincinnati Commercial Tribune.

No Apology to Offer.

"Why spend three years cultivating your voice if you don't intend to go on the operatic stage?"

"For the same reason, I suppose, that you've spent fifteen or twenty years in cultivating a discriminating taste for alcoholic beverages and yet don't intend to go into the saloon business."-Chicago Tribune.

Assembling Herself.

"Hubby, did you bring home my new switch?"

"Yep."

"And my puffs?" "I did."

"How about my face powder?" "Here's your complexion. Now get busy and assemble yourself."-Louisville Courier-Journal.

and readings will be rendered. Middleburg.

On Tuesday, Mr. and Mrs. David Mackley and daughter, Clara, attended the funeral of Mr. Emanuel Mackley, in Westminster. Mr. Mackley was born in Middleburg, April 30, 1837. He follow-ed milling for a number of years. About 35 years ago he moved to Westminster and opened a feed and grocery store, in which business he was engaged until years ago, when failing health compelled him to sell out and lead a retired life. He was a devoted member of Centenary M. E. church, and his place there was seldom vacant. Having lived a righteous life, he died in the full triumph of faith. The large number that attended the funeral in spite of the down-pouring rain, spoke well of the high regard in

which the people of Westminster held him. He will be greatly missed both in the home and church. His pastor, Rev. Bennett, had charge of the service, assisted by Rev. Dr. Miller, of the Lutheran church, and Rev. Harold Rider, of Bal-timore. The pallbearers were, Messrs Atlee Wampler, Charles Hesson, Henry Butler, Joseph Castle, Webster Ebaugh

and U. L. Reaver. He is survived by a widow and three brothers, David, of Middleburg; Harrison and James, of Miss Carrie Clifton and friend, Wm. caf, of Baltimore, visited Mrs. Eliza

Chamberlain's Stomach and Liver Tablets assist nature in driving all impurities out of the system, insuring a free and regular condition and restoring the organs of the body to health and strength. Sold by all dealers.

Fire. Max Beerbohm's book "Yet Again" opens with the essay on "Fire."

"Fire in my grate," he writes, "is as terrible a thing as when it was lit by my ancestors night after night at the mouths of their caves to scare away the ancestors of my dog. And my dog regards it with the old wonder and misgiving. Even in his sleep he opens ever and again one eye to see that we are in no danger.' And the fire glowers and roars through its bars at him with the scorn that a wild beast must of him.' And, gazing at me, it licks its red lips, and I, laughing good Misses Emma and Cora Motter, of humoredly, rise and give the monster

Is Persia Doomed?

In a great yellow palace in Teheran a small boy sits on a peacock throne. He is a very unhappy little boy, and when they put him on the throne he cried as though his heart would break. His people call him king of kings for short, for he has so many names and titles that it would take a strong man from breakfast until tiffin to repeat them. And the throne on which he sits is shaky-yes, rickety. in fact. But one of these days he will London and St. Petersburg and Berlin are calmly planning to cut his country into portions, very much as a pastry cook cuts pie. The little boy's country, you see, kappens to block up a road which one of his grownup neighbors wishes to have open, and so it will disappear just as other children's mud forts disappear when the street sweeper comes along. I feel sorry for that little boy .- Everybody's.

HANS WAGNER.

The Way the Great Star Got His First Baseball Job.

"The career of Wagner in baseball has been interesting," says High S. Fullerton in the American Magazine. "He was reared in Carnegie, Pa., before it was Carnegie, and he and his brothers played the game there. John -1 wonder how many admirers of Honus, or Haus, know his name is John P.-was not a good player as a boy. The brothers thought he was a bit too awkward and barred him except when he wanted to pitch. His arms were tremendously long, and they assert around his home that when he was a 'kid' and his legs were even more bowed than they are new he could walk along and pick up apples without stooping. That immense length of arm has been one of the physical advantages that have gone to make him the greatest of all players. Besides, he has shoulders almost as wide as his arms are long. and he could throw a ball with terrific speed. Because he could throw so hard all the other boys boasted no catcher could hold John and thereupon made him pitcher.

"Presently Al, who was .lohn's older brother, became a professional player and got a job playing third base for a team at Steubenville, O. George Moreland, who now is the chief baseball statistician of the country, was seized with a mania for owning and managing teams, and he had bought the Steubenville club and hired Al Wagner. Moreland needed a pitcher in the summer of 1895 and could not find one to complete his pitching staff until Al Wagner came to him and said. 'Why don't you give my brother John a chance?" 'Can he pitch?' asked Moreland. 'I don't know,' replied AL 'But it won't cost much for you to find out.'

"Honus was playing on the lots around Carnegie, and Moreland wrote, asking him if he would sign a contract to pitch for Steubenville, and the second day thereafter there came a postal card on which was written: "Yes. When do you want me?"

"Wagner ignored the salary question" entirely, and Moreland called Al into consultation. 'What will your brother want?' he asked. 'Oh, anything will suit him,' replied Al.

"The salary limit of the Steubenville. team was \$800 a month, and Moreland was within \$35 of the limit set by the league, so he wrote offering John Wagner \$35 a month to pitch for him. The following day came another laconic card: 'All right. Will accept.'

"Moreland telegraphed Wagner to report immediately and wired a railroad order for transportation. The telegram was sent at 8 o'clock in the morning, and the first train leaving Pittsburg for Steubenville started at noon, reaching Steubenville at about 1:30. Shortly before 1 o'clock Claude Ritchey, who was playing his first professional engagement, said, 'Here comes the big Dutchman,' and Hans Wagner, covered with cinders, sauntered up to begin his baseball career."

Goethe and the Canals.

"Among all the anecdotes and stories which the fortieth anniversary of the completion of the Suez canal has called forth no mention seems to have been made of Goethe's prophetic words on the subject," says a writer in

MARCH.

Cometh March, with wind and rain, 8mashing on the window pane. Little zephyrs here and there Lifting roofs high in the air, Blowing hats from A to Z, Raising thunder on the sea, Filling all the air with dust On their mad boreal bust. Now and then we hear the hum Of the blizzards frolicsome As about the land they tack, Giving early spring a whack, Filling all the ways with snow, Setting plumbers' hearts aglow, Raising thunder with the car Of the trolleys near and far. Now and then a robin's peep Tells us somewhere life is "cheep," And the rose gives us the laugh At nine dollars and a half, For it knows that Easter's moon Will be shining very soon. And amid this wintry scene Cometh March the seventeen. Marvel month this month of March, Marvel month this month of Mar Filling up our souls with starch. Now a lion, now a lamb. Now a blat and now a slam— How it fills the soul with cheer That it comes but once a year!

-Judge.

Visitor-You have a fine climate here-such bracing air. Resident (gloomily)-Yes, but those automobilists come here and pump all the bracing air into their tires.

Nearly a Draw.

In the rough part of Minnesota there were two camps comparatively near to each other, and much rivalry existed. The rivalry took on all forms, but principally one of prowess. This was occasionally decided by rough and tumble bouts between the champion or most able representative of each.

On one occasion an Irishman was picked from the camp in the hollow, and from the one on the hillside, a Swede, lately come into camp, was selected. He was a brawny person, who commanded respect on sight, but he had no more knowledge of English than he had picked up in the short time he had been in the United States. Before the mill began it was agreed that when one or the other was willing to cede the victory he should say "Sufficient." It was a hard word for the Swede, and he repeated it over to himself before the signal to start was given.

For a long time the two fought, each gradually losing his strength and growing weak and floppy. Yet the Swede looked as if he might keep up the tussle for hours despite his dejected appearance, and on the Irishman's face was agonized determination.

But finally the Irishman succumbed and said "Sufficient."

"That's it! That's it!" shouted the big Swede. "Oh, so long I try to remember!"-Columbus Dispatch.

JUVENILE COURTS.

Modern Methods of Dealing With Delinquent Youngsters.

Before the days of the juvenile court the youngster arrested for ball playing or shooting craps was taken before a judge and tried in much the same way as the burglar or sneak thief who was perhaps arrested at the same time and carried to the court in the same patrol wagon. The procedure today, described by Judge Baker of Boston in the Survey, is entirely different. Here is a case which Judge Baker cites as typical. There is no pretentious bar of justice, no frowning judge, just the boy and the man.

"John, do you know what you have been brought to court for?" "I suppose it is about Mrs. Doe's money.

"What have you got to say about it?" "I took it, but it was the first time," etc.

The attendance of at least one parent at court at the beginning of the case is of course always insisted on, and after the above conversation the parents and the police officer in charge of the case and sometimes the aggrieved parties are brought into the room, if they were not admitted with the boy, and the judge says:

"John says it is true that he took Mrs. Doe's money, and I adjudge him delinquent, and he has the right to ap-

The police officer is then dismissed. the child sent out of the room, and the judge talks over the case with the parents and the probation officer, and the parents can thus be admonished. if admonishment is necessary, without the risk of lowering them in the estimation of the child and thereby further impairing their already insufiicient control. Then the child is brought back and informed of the disposition of his case, with such comments on his past behavior and such admonition or encouragement as seem appropriate.

The Purification of Paris.

The purification of Paris after the floods has been carried out so thoroughly that it is now believed that the danger of an epidemic has been overcome. M. Briand, the premier, adopted a novel method of making his "health commandments" known in every household, and this more than any other one act has impressed the people with the importance of observing the official warnings. The premier not only had the "health commandments" placarded throughout the country and advertised in the newspapers, but he ordered that they be telegraphed to every high and elementary school in the country, with instructions that the regulations were to be given out as a dictation lesson to the pupils and that every child was to take his copy of the dictation home to his parents. In this way every home was reached, the children helping to insist on the importance of the documents which they delivered.

When Gas Was Really Dear.

"Talking of eighty cent gas with bills no lower than they were with dollar gas," said an old New Yorker, "whenever I feel like lynching a gas official I go to my desk at home and take out several old bits of paper for

Washing-day has always been "Blue Monday," week in and week out. But now all this is changed, and changed so thoroughly, that many a woman don't believe it. She can't realize that with a QUEEN WASHER, 'Blue Monday'' is a thing of the past and a joke. How does the Queen Washer do all this? The simplest sort of a way. You turn a light, ball-bearing crank-the Queen Washer does the rest. It's as easy as beating eggs. A free trial will convince

PUBLIC SALE OF ----

BUGGIES AND FINE HARNESS

I will sell at Public Sale, at Harry Cover's Stock Yards, in Westminster, Maryland, on

SATURDAY, APRIL 23, 1910,

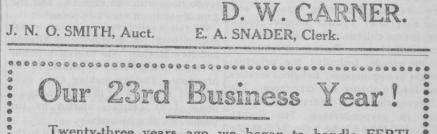

at 1 o'clock, p. m., sharp, the following goods, to-wit:

Two Carloads of Buggies,

of all kinds, new and up-to-date; Surreys, Dayton Wagons, Top Buggies and Runabouts, Steel and Rubber Tire, Auto Seats. Also Stick Wagons and Spring Wagons.

75 SETS OF SINGLE AND DOUBLE HARNESS,

all kinds of mounting and fair leather lines. In case of bad roads Buggies can be left till Monday, April 25. Sale called rain or shine.

Twenty-three years ago we began to handle FERTI-LIZERS in a small way. During all these years we have eneavored to give our trade the best goods on the market, full value for their money, with the result that each year has brought us increased orders with larger sales. At the beginning of this season, (1910) we find ourselves in better shape than ever before to handle this branch of our business, and we hope with the facilities we now have to make this the banner year for our Company. Our new Fertilizer House, 36x80, just completed, and fully equipped with modern machinery, enables us to mix, bag, and deliver 30 to 40 tons per day.

WE MIX IT WHILE YOU WAIT !

The advantages of our present method over the old (Shovels and Screens) are in evidence on every side. Cannot explain on paper, just take time enough to come and see for yourself, and be convinced that we are in a position to satisfy your wants along this line, and do it satisfactorily, as we have once of the best plants in Western Maryland. You will see the different ingredients in bulk, and you will see them go through the mixer, over the screens, into the bag, ready for delivery. What you see you must believe, and you will find our goods in better condition than ever before. We offer Two Specials,

1/2 - 8 - and 1, For General Purposes.

1 - 8 - and 4, Specially for Corn and Wheat.

These goods will be sold at attractive prices, and guaranteed to be equal to any on the market of the same Analysis.

Buyers who furnish sacks get a reduction of \$1.00 per ton, but empty sacks cannot be returned for credit.

We want your trade for Spring and Fall. Come and see us, or our Agents; if we do not have what you want, will be glad to quote you prices on any formula you may suggest.

Very Truly,

Vienna paper. "On July 21, 1827 Goethe said to Eckermann: 'So muc! is certain: If a channel could be cu through the isthmus of Panama broad enough and deep enough to allow the passage of ships from the Mexican waters to the Pacific the whole world would be greatly benefited. I should like to see this, but fear I shall not live long enough. I should like also to see the English build a canal at Suez, but would probably have to live another fifty years." The canal became a fact forty-two years after Goetne prophesied it.-Exchange.

Animal Immigrant Disliked.

If the English sparrow could read what is now said against him the retort that the American gray squirrel is the object of quite as much protest in England would be in order. A few years ago a titled Englishman imported several pairs of gray squirrels from this country to give more animation to his woodlands. The American squirrel became fashionable, and the first colony was succeeded by many others. Now the complaint is heard that the gray coats are driving out the good old fashioned British brown squirrel and altogether deporting themselves with a strenuousness shocking to the best traditions. They are declared to be more belligerent than their British kin, fiercer and more impudent, though admittedly intelligent. -Boston Transcript.

Alexander's Airship.

At the museum at Innsbruck, in Austria, there has been for a number of years a piece of pottery in the form of a basin which experts were unable to locate as to age. It has now been determined that it was made in the twelfth century, and the great bowl is remarkable more for the design which it bears on the inner side than for its age. It shows Alexander the Great riding in an airship which is propelled by griffins. Alexander stands holding with a great rod food over the heads of the griffins.

American News Via England.

We must go to Europe to get accurate news about sport in America. For example, read the following from the London Sphere:

"Football in Great Britain is a fairly popular game among spectators, but it is nothing to the American variety. At the match between Yale and Harvard there were 400,000 people, and \$250 per seat was cheerfully given by the rich."

A Good Head For Business. "I want a hatpin," said little Mary

of four years as she gazed eagerly at the cushion full of sparkling ornaments on the milliner's showcase. "How much is it?" she asked after making a very deliberate choice and laying her purchase money, a bright penny, on the counter. "Oh, nothing," returned the kind hearted Mrs. Briggs, as Mary's mother was one of her regular customers. Imagine her amuse ment as the little "bargain hunter" said most eagerly, "I'll take two. then."-Delineator.

How to Spot 'Em.

"I shall not wed until I can marry a hero.'

"Well, you show the first man who proposes to you a schedule of the cost of living and if he still asks you to take him for your meal ticket he is a hero."-Houston Post.

They Don't Hang Together.

The first thing a man's second wife does after she takes possession of his home is to change all the pictures. No woman will stand for the way another woman hangs pictures. - Atchison Globe.

At Last.

Mrs. Enpeque-O-oh, John! I believe there is a man in the house! Mr. Enpeque-Well, this is the first time I've ever heard you admit it .--Pittsburg Press.

His Kind.

De Style-You say he uses no judgment in buying presents?

Gunbusta-No; he's the kind of fellow that would buy a pair of kid gloves for the Venus of Milo .- New York Times.

"Nobody Loves a Fat Man." Visitor-Fat men, 1 notice, are quite thick in Boston. Hubbie-Fat men are quite thick wherever you find them.-Boston Transcript.

Careful of Others' Feelings. "Why don't you set the date of our wedding?" "Because I have other fiances to con-

sider."-Pittsburg Post.

Bright Boy. The Teacher-What are revenue cutters? Tommy-Sugar weighers. - Town Topics.

perusal. They came down to me from my grandfather and are receipted gas bills.

"There is a receipt, for example, dated in 1827, which shows the price of gas in New York then was \$1 per hundred cubic feet, or \$10 per thousand. as against 80 cents today. In 1838 and 1842 it was 70 cents per hundred, or \$7 per thousand. Not only that, but rental was charged for the meter and for the use of gas fixtures as well. "Of course these facts don't tend to reduce my present bill at all, but don't

you know bow comforting it is to feel that others have been so much worse off than you are?"-New York Globe.

Kocher and Goiter.

One of the Nobel prizes recently awarded at Stockholm, that for the most important discovery in medicine, went to Professor Theodore Kocher of Berne, Switzerland, who is now sixtyeight years old. Before Dr. Kocher goiter was considered incurable. He was the first, about 1880, to attack this plague in the Valais canton, and to deny that the taking away of the goiter at first provoked cretinism and then ied to death. He discovered the causes of these phenomena. At the surgical congress of Berlin he communicated the results of his researches. He showed that the goiter could be removed, but that it was necessary to guard against the extirpation of the gland to which it was attached.

Engraver's Name on Hungarian Coin. It is reported from Budapest that 150,000 five-kronen pieces have been called in by the Kormozer mint to be remelted owing to the fact that the engraver had placed his own name beneath the effigy of the sovereign in stead of the monarch's initials. The name had been impressed in such small characters that it was not noticed until the coins had been issued. The man was under the delusion that he was the monarch and shortly after ward, owing to an acute attack of insanity, was sent to an asylum.-Berliner Morgenpost.

Bavarian Black Bread.

A Bavarian baker ships 5.000 to 10,-000 loaves of black bread weekly to all parts of Europe. It is three parts rye and one part wheat and made by the old folk recipe. He says black bread is more nutritious and satisfying and quite as palatable as white bread, and many prefer it to all others. Black bread bakers in Bavaria make \$10 tc \$12 a week, white bread bakers only \$5 to \$7.

The Crush.

2-12-3m

It was at an afternoon tea, with the usual musical accompaniment. The man's man had been literally dragged there, an unwilling victim, by a zealous friend who liked afternoon teas with a musical accompaniment. Needless to say, the zealous friend was a

ladies' man. The man's man was very unhappy. He had sulked and had positively refused to be introduced to the bevy of charming girls presiding at the tea tables, much to the chagrin of the ladies' man, who naturally couldn't understand the attitude of the man's man. It was inexorable, from his point of view. But a ray of hope glimmered in his breast when the man's man rushed up to him, exclaiming: "I say, old fellow, introduce me to

the fat lady sitting over in the corner, will you?" The eyes of the ladies' man glis-

tened.

"With the greatest of pleasure," he cried. "Have you got a crush on her?" "No," replied the man's man savage-"I should say it was quite the other way. She's sitting on my hat!"-Philadelphia Ledger.

He Saw More Lights.

In one of the hotels recently some new electric lights were put in use in a decorative way. A young man who lives on the hill happened in during the evening and noticed the lights. "They're very nice," he said to the head waiter, "but why didn't you put up more?"

The head waiter, knowing the young man's fondness for articles enumerated on the wine list, replied, "I think you'll see more of them before you leave, Mr. So-and-so."

The young man remained in the cafe a couple of hours and imbibed rather freely of liquid refreshments. When he got ready to leave he sought the head waiter.

"Much obliged to you," he said. "Did you put the extra ones in f'r me?'

"Certainly," replied the head waiter, bowing.

The young man left the hotel feeling greatly honored.-Denver Post.

Original and Selected Articles of Interest to the Home.

We invite contributions to this department from all readers who have something to say on topics which relate especially to home im-provement, social conditions, or moral issues. While we disclaim all indorsement of senti-ments which may be expressed by contribu-tors, and desire to be as liberal as possible, we at the same time request all to avoid person-alities, and stick to proper expressions of opinion.

All articles for this department must be in opinion. All articles for this department must be in our office not later than Monday morning, of each week, to be guaranteed insertion the same week, and all articles must be signed with the name of the author, even when a nom de plume is given.

LETTER FROM HAWAII.

By Dr. S. G. A. BROWN.

Leading fraternal orders have always had a strong hold in Hawaii. Of Masons there are a number of lodges; the Odd Fellows have flourishing branches and the Knights of Pythias number many prominent citizens. The Elks have two influential lodges. There are 200 churches in the islands, including the principal world denominations. Religious services are held in almost all languages. The Congregationalists (the first missionaries) are in preponderance. The Roman Catholics have a large body, as has the Episcopal church. There are many Mormons, Buddhists and Confucians worship in temples dedicated to their faiths. Mission work among Hawaiians, Japanese, Chinese, Portuguese and Koreans is prosecuted. There are three English daily papers in Honolulu. Many other publications include religious journals in several languages, high class weeklies in Hawaiian, one Chinese and four Japanese dailies, weekly and semiweekly Chinese and Portuguese papers. The people are exceptionally honest and locked doors are unknown.

As in Nature's country the climate was made close to perfection, so the Good Dame continued her work, and gave to the land such features as would make it not alone a happy home for man, but as well a pleasure ground. For there are mountains and villages, plains and crags, laughing cataracts and smiling seas. To fit this paradise was sent a race of people, stalwart in size, hospitable, merry and music-loving. The door is always open and over the lintel is the word "Aloha," which means "Welcome."

Honolulu has the most perfect bathing resort in the world. This is a broad statement, but none of the thousands of visitors who see Waikiki beach ever go away disputing the claim. The fame of Waikiki has spread everywhere. Situated in a great curve in the shore, there is no under-tow, and the beach is smooth and sandy. Only at Waikiki beach may one witness the remarkable sports of surf-canoeing and surf-board riding, at which the natives are past masters. In canoeing we enter one of the graceful outrigger cances and are taken out to the edge of a reef, where the frail craft is nearly turned before an incoming breaker and hustled shoreward in a cloud of pray at express train speed. In surfboard riding considerable skill is required, but the native Hawaiians have practiced surfing since prehistoric times and are adepts. There is a history of a long line of kings which we shall not annoy you with at present. The Royal Hawaiian Hotel at which we lunched is a historic building in the down town section. It was built by King Kalakaua and still has a strong sentimental hold upon the people. In language and customs Honolulu has been dominated over by American ideas and ideals since early in the Nineteenth century. It has been described as an American city in an Oriental setting. This last being supplied by the Chinese and Japanese portion of the city. Hawaii is noted for its good roads. There are many miles of perfect macadam through delightful country and with grade of 6 or 8 per-cent. at most. Hawaii lies about 2,080 miles southwest of San Francisco in the Pacific Ocean, eight of the islands being inhabited. They extend from northeast toward southwest between the latitude of 18 and 22 degrees north and longitudes 154 and 160 degrees west. They are about the same distance north of the equator as Cuba. There were probably 250,000 full blooded Hawaiians in the islands in 1800; now there are between 25,000 and 30,000, owing to the devastating effect of the diseases of civilization. Hawaiians now number about 15%, Chinese 11%. A few years ago the population was largely Christian, while to-day because of the influx of Japanese, Chi-Protestants. The sugar industry of Hawaii overand nine-tenths of the people would have are over 213,000 acres in sugar cane, which average 5 tons per acre. All manual labor is done by Chinese, Japanese, etc., as farmers deem it below them of Paganism. Pineapples are grown

\$50 per acre. They grow two crops a year from same, having a total value of on the islands, hence Hawaii's prosperity must always largely be on an agricultural basis. Investments yield from 6% to 8%.

The system of taxation is simple, all taxes being levied and collected by the territorial government. The rate is 1% on real and personal property and 2% on excess of incomes over \$1,500 per annum. Office workers, mechanics, etc., are paid about 25 per cent. more than in the states. Land values vary, some cane lands being appraised at \$100 per acre. Education is compulsory and the percentage of illiteracy is as low as that in any state or territory of the mainland. There are 25,000 pupils, 700 teachers and 154 public and 51 private schools. Honolulu has a railway line of the island of Oahu. It has direct cable connections with San Francisco and the Asiatic continent via Philippines.

Hawaii is self-governing in an equal degree with the territories of Arizona and New Mexico. The executive power is vested in a governor appointed by the president. The law-making body consists of a senate of 15 members and a house of 30 members elected by the people, meeting bi-ennially.

Civilization was first introduced to the Hawaiian islands by Captain Cook in 1778. It would no doubt be irksome to you to be given the history of the islands complete, suffice it to say that during the reign of Kalakana in the 80's there were two notable events-the making of a treaty of reciprocity with

the United States, and the coercion of the king by an armed demonstration of foreign residents, to promulgate a new constitution materially limiting the prerogatives of the sovereign. Princess Liliuokalani, sister of the king, became queen in January, 1891, and following a revolution in 1893, by a joint resolution of the congress of the United States passed July 7th., 1898, the islands came under our own sovereignty.

As regards the problem whether Hawaii is a financial burden to us or not, each must decide for himself. During the fiscal year ending -- 30. 1908, the Honolulu custom house collected \$1,550,000; the postoffice, \$75,800; the internal revenue office, \$56,800; total \$1,682,600 going into the national treasury. But to offset this the Federal goverment during the same period spent in maintenance approximately \$380,000. However, millions of dollars are being is almost endless. Undoubtedly more spent in defenses, which viewed from the surface seems utterly useless. In conversation with the white residents of Honolulu concerning the sentiment of time and skill are required for careful, the ultimate invasion of the islands by the Japanese, we found there was no ap- ordering; but the real superiority of a prehension whatever. It is their opinion that all war talk by the yellow journals is brought about by pressure upon in the attractive preparation of inexpencongress from the trusts-the steel trust sive dishes for every day and in the skilthat the navy may be increased; the ful combination of flavors. beef, leather, furniture and other trusts, that their avenues of trade may be prejudice against economizing in such widened. Japan cannot afford to attack

THE CARROLL RECORD plantations are usually leased by Chi- such a proceeding would be either desirnese, who usually pay a rental of \$25 to able or agreeable for the average person. Exactly how much meat should be eaten is a difficult matter to determine; proba-\$200 to \$250 per acre. There is no coal bly if one meat dish is served a day, and other materials supplying protein, such as milk, eggs, beans, or similar foods, are also used, there is little danger of getting too much meat or too little protein. It is, of course, possible to eat meat dishes less frequently, or omit meat from the diet altogether, if one so desires and the diet is so arranged that it remains well balanced.

> "Meat is, in general, one of the most digestible of food materials. Recent experiments indicate that all kinds are thoroughly digested, less expensive cuts as well as the more costly. The higherpriced ones contain more of the so-called extractives or extractives of more pleasing quality, and it is the extractives which not only give the meat its agreeable flavor, but also actually stimulate 72 miles, more than half way around the digestive processes. They have, however, little if any nutritive value, and for persons with normal digestion the less expensive cuts, even if less rich in extractives, cocked and flavored in an appetizing way, may certainly be used to replace the more costly cuts. * *

'It is important to reduce waste by using as much as possible of the bone, fat, and trimmings, not usually served with the meat itself. If nothing better can be done with them, the bones and trimmings can almost always be profitably used in the soup-kettle and the fat can be saved for cooking, thus saving the more expensive butter and lard. The bits of meat not served with the main dish or remaining after the first serving can be seasoned and recooked in many palatable ways, or can be combined with vegetables, pie-crust, or other materials, and thus the meat flavor may be extended over a large quantity of less expensive food with such combinations. Moreover, smaller quantities o. meat can often be bought than would be necessary were the meat served alone."

Cheapness in meat, the authors go on to tell us, is often more apparent than real, a very large part of some cheap cuts being refuse. Aside from this, the advantage of expensive cuts lies in tenderness and flavor rather than in nutritive value. Now tenderness may be given by long cooking, which softens the connective tissues; and flavor, when inferior or absent, may be imparted by using sauces or vegetables such as onions or celery. The writers conclude:

"In fact, the number of 'tasty' dishes which a good cook can make out of the cheaper cuts of meat or meat 'left over' time and skill are required in their preparation than in the simple cooking of the more expensive cuts, just as more intelligent marketing than for haphazard good cook lies not so much in the preparation of expensive or fancy dishes as

Good Humor and Health.

If it were generally understood how salutary the act of laughing is to the bodily health says a physician in the London "Chronicle." there might be more laughter than lamentation in the world, and farcical comedies prove more attractive to the invalid than physicians. The old adage, 'Laugh and grow fat,'' is founded on a sound physiological basis. It is commonly observed that fat men laugh with considerable facility. But they do not laugh because they are fat. They are fat because they laugh, the act of cachinnation having a profound influence in promoting appetite, oxidation of the blood, digestion-indeed, the entire and complex process of nutrition. Good nourishment produces the contented body, the fit temple of the contented mind, which is, we know on excellent authority, a perpetual feast. The immediate physical results of indulgence in laughter are numerous. In the first place the act of laughing involves the exercise of a large number of muscles including many of those of the face, neck, chest and abdomen, which, if they are exercised sufficiently, often become correspondingly well developed,

as do also all those glands, blood vessels, nerves and other tissues in intimate connection with them. The facial muscles, for example, of the man who laughs often and easily are generally developed to a degree which gives him the facial rotundity of a contented child. But laughter accomplishes much more than the production of this mere outward appearance of well-being. It has a highly beneficial influence on those two vital organs-the heart and the lungs.

During what is called a "fit" of laughter the lungs may be almost completely emptied of their contained air. Fresh air is then drawn in to the fullest extent of their capacity, inflating, perhaps, those little-used air cells which contained previously only stagnant air and bacilli -for in the shallow breathing we ordinarily practice, comparative large tracts of air cells are not used. During this process the general circulation is accelerated, impure air is hurried out of the system and fresh air hurried in. With the forcible ascent and descent of the diaphragm during inspiration and expiration, the liver and other abdominal organs undergo a kind of kneading not unlike that undergone during massage and this is of great benefit in rousing them from that torpor to which they are liable. The heart is also stimulated to more vigorous contraction during the active cachinnatory process. Persons who, so to speak, let themselves go, and laugh with a will, sometimes bring al-

most all the principal muscles of their body into play, twisting, turning and bending themselves almost double in sheer muscle exhilaration. "Low spirits," or what is popularly termed "a fit of the blues," is a mental state often caused by a poisoning of the nervous system with one of those curious

toxins which the body occasionally elaborates from the food supplied to it, and which perhaps a sluggish liver (whose duty it is to guard the portals of the system and prevent the entrance of

Tonic or Stimulant?

There is an immense difference between a tonic and a stimulant. Up one day, way back the next; that's a stimulant. Steady progress day by day toward perfect health; that's a tonic. Ayer's Sarsaparilla is a tonic, a strong tonic. The only Sarsaparilla entirely free from alcohol. Do not stimulate unless your doctor says so. He knows. Ask him. Do as he says. J.C. Ayer Co., Lowell, Mass.

Constipation is the one great cause of sick-headache, biliousness, indigestion, bad breath, debility, nervousness. Has your doctor ever recommended Ayer's Pills to you?

records by the rubber-tired car that has no rails at all to run on. Says the paper just named:

"It is casually worth noting that the automobile speed record, which has remained for fours years at a rate of 127.6 miles per hour over the measured mile, has again been raised, this time by a gasoline automobile of 200 rated horse-power. The figure touched is 131.72 miles per hour, the measured mile being covered in 27.33 seconds. This puts the locomotive record of 120 miles per hour quite in the shade and passes even the top speed obtained in the Zossen eletricocomotive tests of 1903. Thus the general speed-record passes into the hands of the automobile in spite of the fact that it does not have the advantage of a smooth track on which to run.

"The long-threatened increase in railway speeds to sensational figures is yet far from coming to pass, and the 100an-hour train seriously projected nearly 20 years ago is still in the dim distance. The stern chase of the automobile is likely to be, as usual, a long chase. These transcendental speeds are perhaps likely to be long in coming as a matter of common transportation, but every raising of the record ought to be a stimulus toward faster trains in those cases where speed really becomes of practical importance. The mechanical possibilities are still very far ahead of practise and the tundamental quesstion has become merely one of commercial desirability."

A Mean Thrust.

"Ten thousand dollars for a dog!" he exclaimed as he looked up from his newspaper. "Do you believe any one ever paid any such price, Maria?"

"I'm sure I don't know, James," she returned without stopping her needle work even for a moment. "Does the paper say that much was paid?"

"Yes. There's an article on valuable dogs, and it's speaking of one that was sold for \$10,000. I don't believe it.'

"It may be true, James," she said quietly. "Some of those high bred animals bring fancy prices, and there's no particular reason why the paper should lie about it."

"I know that, Maria, but just think of it, just try to grasp the magnitude of that sum in your weak femining mind. You don't seem to realize it-\$10,000 for a dog! Why, hang it. Maria, that's more than I'm worth." "I know that, James, but some are

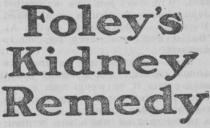

worth more than others." She went on calmly with her sewing. while he fumed and spluttered for a moment and then dropped the subject. especially the weak feminine part of The First Pantomime.

The first pantomime introduced to the English stage was "Tavern Bilkers" and was by John Weaver. This was in the year 1702. It was produced at Drury Lane. The great institutor of pantomime in England was, however, John Rice, who devised this form of entertainment in 1717. His first emphatic success was in 1724, when he produced "The Necromancer; or, History of Dr. Faustus." So successful was Rich with his pantomimes that Garrick, Quin and others became exasperated. Rich lived to see pantomimes firmly established at Drury Lane and Covent Garden. He died in 1761.-London Stage.

Not a Bouncer.

"Mother," said a six-year-old hopeful, "isn't it funny that everybody calls little brother a bouncing baby?" "Why do you think it's funny, Wil-

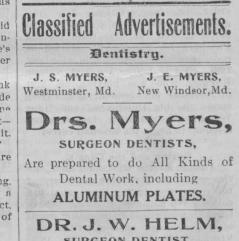

lie?" remarked his mother. "Because when I dropped him on the floor this morning he didn't bounce a bit. He only hollered.'

Economy in use of Meat.

Just when there is most discussion about the increased cost of meat, appears Farmers' Bulletin 391 of the United States Department of Agriculture, entitled "Economical Use of Meat in the Home." There is nothing in the bulletin to explain its timeliness-no denunciation of the Meat Trust or intimations that Uncle Sam considers it his duty to come to the aid of the victims; but the farmer will doubtless draw his own conclusions. The bulletin was prepared by Miss Caroline L. Hunt and Dr. C. F. nese, Koreans, etc., over 50% are Budd- | Langworthy, experts in charge of nutrihists or other pagan faith. Of the tion investigations, and the lesson it Christian faith 24% are Catholics, 21% teaches is that the nutritive value of meat does not depend at all on the high

price of the cut or on its tenderness. shadows everything else in the industrial Practical recipes for economical meat way. Take away the sugar industries dishes are given. A cheap, tough piece of meat may be so treated as to furnish their means of living destroyed. There not only a wholesome, but also a toothsome article of food. We quote from the summary at the end of the bulletin:

"According to statistics compiled in the Office of Experiment Stations, meat at work, which accounts for the influx furnishes about 16 per-cent. of the total food consumed in the ordinary American successfully on the islands and there are family, about 30 per-cent. of the protein now ten large pineapple canning factor- desirable in the average diet, and 60 per ies in the territories with an output of cent. of the energy-producing fats. comfort of the family does not suffer and hurtful matters from the alimentary the meals are kept as varied and appecanal), has allowed to pass unchaltizing as when they cost more, little lenged. Laughter alone has been known

10-23-6mo

to dissipate this kind of mental depression, by mechanically rousing the system, increasing the rate of oxidation of the blood, indirectly stimulating the organs by which such poisons are eliminated and by its beneficial action on the liver, arresting the absorption into the system of any more poisons. To do

this, of course, the laughter must be hearty and prolonged-of that kind evoked by the well-played farcical comedy. It is a matter of common knowledge that a man laughs more heartily when in company with others than he does by himself; this is because most of our motional states are "catching" hence, in a theater, an audience is easily seized with uncontrollable panic. The most vigorous laughter, then, must be sought in company.

The spare, melancholy and miserablelooking man is thin because he seldom or never gives way to healthy laughter. Mental worries, real or imaginary, will so prevent nutrition through the influence of mind on body as to produce wasting of the muscular system and those other tissues which subserve it. If such a man would look on the ligher side of life and laugh a little more his appetite and digestion would improve, and he would be able to acquire that minimum amount of fat which is necessary to the well-being of the bodyfat being a necessary constituent of the healthy brain and nervous system. The laughing habit is one, therefore, that is worth cultivating. It is a matter of everyday experience that one feels the better for a good laugh, an explosion of laughter being, in truth, a nerve-storm, gist, Taneytown, Md. comparable in its effect to a thunder-

storm in nature (on a very small scale), doing good by dissipating those oppressive clouds of care which sometimes darken the metal horizon .-- Presbyterian Banner.

That this title now rightfully belongs to the automobile, we are reminded by the writer of a leading editorial in The Engineering Record (New York, March 26.) Motor-driven vehicles of all kinds, including steam and electric locomotives, are now led in the race for speed- ive. Sold by all dealers.

CHRISTIAN ENDEAVOR. THE SUNDAY SCHOOL

Lesson V.-Second Quarter, For May 1, 1910.

THE INTERNATIONAL SERIES.

Text of the Lesson, Matt. xii, 1-14. Memory Verses, 11, 12-Golden Text, by Rev. D. M. Stearns.

"At that time," when these blind hypocritical Pharisees were specially diligent in rejecting Jesus as their Messiah, notwithstanding all His mighty works and gracious words, binding upon people heavy burdens, grievous to be borne, Jesus taught the weary burdened ones that in Him they would find rest. "At that time" (xi, 25; xii, 1), when these grace-doubters (as a missionary recently writing from China called these seventh day people) were making an idol of their Sabbath, while rejecting the Lord of the Sabbath who was in their midst. Jesus wrought these good works of our lesson today to teach them that in their midst was one greater than the temple, greater than Solomon, greater than Jonah (verses 6, 41, 42). When the kingdom comes the Lord alone shall be exalted and all the loftiness and haughtiness of men shall be bowed down (Isa. ii, 11, 17). Earth's mighty ones shall then have learned that "those who walk in pride He is able to abase" (Dan. iv. 37).

As Jesus and His disciples walked through the cornfields on a Sabbath day His disciples plucked ears of corn and did eat, rubbing them in their hands (Luke vi, 1). Then the Pharisees accuse Him and His disciples as lawbreakers, evil doers, transgressors. It seems horrible that men should accuse their Maker, but they did not know Him, because they were blinded by the god of this world, as are all today who talk against God and His word. and there are many. They pretended to be very zealous for the law, so He said: "Have ye not read what David did?" "Have ye not read in the law?" (Verses 3, 5.) Dr. Scofield says "Jesus' action is highly significant." "What David did" refers to the time of His rejection and persecution by Saul (I Sam, xxi, 6). Jesus here is not so much the rejected Saviour as the rejected King-hence the reference to David Jesus continually referred them to their own Scriptures: "Have ye never read?" "Did ye never read in the Scriptures?" (Matt. xi, 16, 42.) Note that the Lord Jesus had full confidence in the authority of Scripture, the law, the prophets and the Psalms (Luke xxiv, 27, 44). These Pharisees professed to believe the Scriptures also, yet they fulfilled them in condemning Him. On one occasion Jesus asked not only "What is written in the law?" but "How readest thou?" (Luke x, 26.) We do well to consider whether we receive the Scriptures as they are in truth the word of God which effectually worketh in them that believe (I Thess. ii, 3). If we are wholly subject to God and to His word Jesus will not only be our Saviour, but our Lord, whom we will demay have mercy upon us, but because learned something of the meaning of verse 7. Even in the synagogue where the law, the prophets and the Psalms were read every Sabbath they sought to accuse Him who had given them these Scriptures and who had given to each of them life and breath and all things. yet He patiently bore with them and reasoned with them. He reminded them that they would not hesitate to save the life of a sheep, even on a Sabbath day, and asking. "How much then is a man better than a sheep?" He asserted, "It is lawful to do well on the Sabbath days." Commanding the man with the withered hand to "rise up and stand forth in the midst." He also commanded him to stretch forth his hand, which he did, and it was restored whole as the other (Luke vi. 8-1, 1). Then were they filled with madness and went out and held a council against Him, how they might destroy Him. Thus they prepare to seal His doom, as they think, but they are in reality sealing their own and fulfilling the Scriptures, which said, "They rewarded Me evil for good." "They hated Me without a cause." "They that sit in the gate speak against Me." "Many bulls have compassed Me-strong bulls of Bashan have beset me round" (Ps. xxxv, 12; lxix, 4, 12; xxii, 12). The time had not come for them to carry out their murderous thoughts, so Jesus simply withdrew from them and continued to heal the multitudes who followed Him-many who had plagues pressing upon Him to touch Him and unclean spirits falling down before Him and crying, "Thou art the Son of God" (Mark iii, 7,12.) Our lesson chapter says that He healed them all, but charged them that they should not make Him known (15, 16), this also that the Scripture might be fulfilled as it is written in Isa. xlii, 1, 4. That we who are His witnesses may apply many Scriptures concerning Him, at least in some measure to ourselves, see in Acts xiii, 47. Paul's use of Isa. xlii, 6. That we are His chosen ones see John xv, 16; Eph. 1, 4; I Pet. ii, 9. Since then, under the favoring provi-That we are in the world as lights for Him see Matt. v, 14; Phil. ii, 15. That we may manifest His life let us over behold Him as the perfect servant in whom the Father is well pleased and trust Him to fill us with His Spirit that we too may be well pleasing to Him, possessing the ornament of a meek and quiet spirit, which is in the sight of God of great price.

Prayer Meeting Topic For the Week Beginning May 1, 1910.

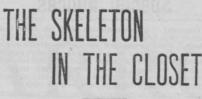

Topic. - Christ our King.-John xviii, \$3-40. (Consecration meeting.) Comment by Rev. Shwrman H. Doyle, D. D. The kingship of Christ is here sug-

gested in connection with the examination of Jesus by the Roman governor, Pilate, before whom the Jews had brought Him. The night before Jesus had been arrested. He had been several times before the high priests Matt. xii, 7-Commentary Prepared and the sanhedrin. But, while they found him guilty of blasphemy upon

false testimony and therefore worthy of death by the Jewish law, they could not execute Him, because the Roman conquerors of the Jews had deprived them of the right to take human life. Only the Romans could condemn to death; therefore it was necessary to take Christ before Pilate and get his consent to put Him to death. They had probably charged Him before Pilate with claiming to be the king of the Jews in order to arouse Pilate's jealousy and fear of losing his high position; hence Pilate questioned Him upon this point. But the answers of Jesus were incomprehensible to Pilate, though He did not deny His kingship. Yet Pilate found no fault in Him and so announced to the Jews. Finally he released Barabbas unto them and delivered Jesus to be crucified, the Roman method of execution, and this was done. King? Yes, Christ was a King-yea, King of kings-yet He died for those who belonged to His kingdom

Christ was and is today a King. His kingdom was prophesied in the Old Testament and declared in the New. On one occasion the people wanted to take Him by force and make Him their temporal king, but He left them and went out to be alone with God. On another occasion, as the shadow of the cross was falling upon Him, He did for once, at His triumphal entry into Jerusalem, allow Himself to receive the homage paid to kings alone. But this was for a short time only and was soon overshadowed by His death upon the cross. Christ's kingdom was not of this world, else His friends would have supported His claims to it. To Pilate's question He answered, "My kingdom is not of this world; if My kingdom were of this world then would My servants (officers) fight that I should not be delivered to the Jews, but now is My kingdom not from hence." Christ meant that His kingdom was a spiritual one; that He was to rule over the souls and hearts of His subjects. Neither the Jews nor the Roman governor could comprehend such a kingship or kingdom. The day had not yet dawned when the world would understand it. But it does understand it today, and in millions of hearts Christ reigns as a King, directs and defends the spiritual interests of His subjects, ruling in their hearts by love and not simply to a limited extent over their outward lives by force. No king in all the world today has so many loving and obedient subjects as King Jesus, and they will continue to increase in numbers until "Jesus shall reign where'er the sun doth his successive journeys run."

As our King, Christ is ideal in His light to obey, not in order that He Kingship. The true king seeks only He has had mercy on us and we have is indeed no king who seeks only his own interests in ruling the lives and destinies of his subjects. But Christ is no such King. He even died for us, and what better proof can we demand to show that He reigns for our best interests alone? As His subjects

A Rattling of Its Bones That Terrified Its Keepers.

By GEORGE ETHELBERT WALSH. [Copyright, 1910. by American Press Association.]

Beverly Westlake drifted into Lakeville an obscure, poverty stricken man if"and by dint of hard work and shrewd business investments prospered until he was by common consent counted the leading citizen and merchant of that enterprising metropolis.

Jack Lecon entered Lakeville under a Pullman car. Jack was walking on Grand street when Beverly Westlake swung around the corner and walked eton kicked open the closet and fell toward him.

Jack's first impulse was to vanish, but on second thought he remained passive and motionless, staring in surprise and wonder at the approaching figure. His eyes were bulging, and his mouth stood agape. With the con-

THERE WAS A QUEER LIMPNESS TO THE NECK.

fident swing of the successful and well satisfied man, Beverly Westlake walked along, scarcely noticing the silent beggar on the street-not until the man's voice startled him violently from his mental repose.

"Hello, Peachy!" was the irreverent salute of Jack. "Why, you're some elegant! How'd ye get the lift?"

The leading merchant, philanthropist, financier and exponent of the higher success wheeled abruptly, stared at the questioner, turned red, then white, gripped his hands and moved forward as if to pass without a word, thought better of it, stopped and frowned and finally mopped his forehead with nervous agitation. Jack Lecon was all smiles and his manner

in a soft voice. "We must stay and bear our burden for the present. You have lived down your early disgrace and proved yourself a repentant man." "But the law doesn't recognize that," bitterly complained the broken down capitalist. "If I escaped from prison before my time expired I'm still a criminal in the eyes of the law. Oh, if I had been patient a little longer!" Alice comforted him with words of caressing affection, but the iron had entered his soul, and he continued to

cry out: "To think this drunken brute should have his freedom without fear of capture or exposure! I'll kill the wretch

"No, dear, you won't do any such thing-for my sake."

Jack's excesses became so disgusting in time that even sweet Alice's patience and endurance were sorely tried. Her faith in her sense of duty was showing signs of wavering when suddenly without warning Jack's skelsprawling on the floor.

The key was held by a quiet, thickset man of dark complexion, who called one evening to interview Mr. Westlake in the quiet of his study. Alice was there and hung over her husband as if to protect him.

"Mr. Westlake," announced the quiet stranger, "you have in your employ a man of the name of Jack Lecon, I believe?"

Beverly winced a little at the word "employ," and he was inclined to laugh at the irony of the thrust. Yes, he was in his employ, but a rather expensive employee. He nodded, with a smile, to indicate his comprehension.

"Well, sir," continued the stranger, "this man is a convict-escaped from the federal prison some months ago." Beverly Westlake saw all kinds of pink and white spots, and he glanced up to see if the electric lights had changed their colors. Incidentally he felt the straugulating constriction of his wife's arms around his neck. He realized that he was pale and that his heart had almost ceased to beat.

"There is nothing to fear, Mr. Westlake. The house is surrounded, and we will capture him without any outcry. He is a desperate characterkilled his guard when he escaped-and we have made special plans to capture him without danger to you or your household. I merely called on you to prepare your wife for any struggle that may follow. You understand?" Yes, Beverly understood, and Alice too. "Alice," he said slowly, "you had better retire to your room. I will go with-with this man to find Jack." Intuitively she caught his meaning. She besitated but a moment and then kissed him as if to withdraw.

"I don't think we shall need your services," the officer said, with a confident air. "Our plans are all carefully laid, and by this time Jack Lecon should be a prisoner. I came here partly to engage your attention while my men secured him. I think now," consulting his watch, "the struggle must be over. We will go and see."

They passed through the great hall in solemn procession and then turned to mount the broad stairs to Jack's room. He lived in comfort and luxury away from the servants as a man set apart for special favors.

But they did not ascend the stairs. A swift figure glided down the polish-

A RACE FOR FAME.

Now Robert Barr Managed to Get a Book to a Friend.

Pobert Barr, the novelist, was one day at Euston station, London, to say goodby to Dr. McKenzie of McGill university, who was taking the steamer train for Liverpool, thence to sail for the United States. As they walked up and down the long platform together, says a writer who tells the story in Leslie's, Dr. McKenzie said jocularly:

"Let us go to the bookstall and see if any of your immortal works are there. If they are I'll buy one to take across with me. If they are not I'll tell all your friends on the other side that your supposed British reputation is a sham."

The two walked to the bookstall and examined it carefully, but nothing with the name of Barr was found. The novelist was annoyed and would have entered a protest, but the doctor claimed that that was against the rules of the game. Time was short, and Dr. McKenzie took his place in the train. Mr. Barr bade him goodby and then made direct for the bookstall to give the dealer a piece of his mind, but as he glanced casually at the array of books in the most prominent place he saw a row of one of his

novels. The whistle had sounded. The train was in motion. There was no time for paying anything, so Mr. Barr grabbed his book and ran like mad up the long platform. The energetic railway officials thought he was a belated passenger and determined to throw him into the train. Doors in the moving carriages were flung open, and officials yelled frantically, "Jump in anywhere!"

It took great agility, but Mr. Barr succeeded. Dr. McKenzie was leaning out of his window, thinking from the outcry that some one had been killed, when Mr. Barr came alongside and said politely, if breathlessly, "Mac, allow me to present you with a token of esteem."

Panting, but triumphant, Mr. Barr strolled back to the bookstall. "Didn't some one steal a book from

you a moment ago?" he asked. "Yes," cried the indignant stall-

keeper, "and he's bolted off to America with it!" "Why don't you telegraph a descrip-

tion of him to Liverpool? It will be hours before the train is there," suggested Mr. Barr sympathetically. "Description! I didn't see anything

but his back and his legs." "Oh, well, let it go!" said Mr. Barr airily. "It was a good book, for I wrote it myself, so I'll pay for it." And he laid down the money.

Tong Gun Men.

The accuracy of aim among the gun men of the Chinese tongs was remarked on recently by a visitor to Chinatown, says a New York letter. "Yes," replied a man who knows his Chinatown, "there was a time when the Chinese gunner shut his eyes tight and blazed away. Likely as not he hit a bystander. But practice has changed that. If you were to walk over to the neutral territory of the Bowery you would find on almost any good day a Chinese or two practicing in the little shooting galleries over there. The chances are ten to one that they would be tong gunners keeping their

we should strive to be as ideal in our relation to Him as He is to us; therefore on this consecration evening let us dedicate our lives to a more loving and devoted service to our King.

BIBLE READINGS.

Isa. ix, 6, 7; Ps. ii, 24, 72; Matt. v, 1-16; xxviii, 19, 20; Luke xvii, 20, 21; Matt. xxi, 1-11; John xvii, 1-5; xix, 19; Acts v, 31; Rom. viii, 16-18; II Tim. ii, 12; Rev. xix, 11-16.

Christian Endeavor, a Vine.

Twenty-nine years ago, on Feb. 2, 1881, Dr. Francis E. Clark organized the first Christian Endeavor society in the Williston church of Portland, Me.

DR. CLARK STANDING UNDER A GRAPEVINE.

dence of God, the society has reached a worldwide usefulness.

A fitting symbol of the far outreach and blessed influence of Christian Endeavor is this picture of Dr. Clark standing beneath a mammoth grapevine at Carpenteria, Cal. As it was not then the season of grapes, Dr. Clark has in his hand a bunch of California oranges.

as affable as a man who had called a bluff and knew he was stalking big game.

"Ouite a bit of time since we met. Peachy." he continued, extending a hand, which Beverly ignored. "Some difference in us now, ain't there? You got the swell cut all right and the figger to carry it out, but I-why, I ain't good for much. I'm jest sick and down in luck."

The words trailed off into a whine. Then, with a sudden change of base, Jack added, with a little triumph in his voice:

"But I got my discharge all right, and you didn't."

There was a remarkable and pitiful transformation in Mr. Westlake. The skin wrinkled, and the complexion turned a sickly red, dotted with yellowish and purplish spots.

"I say, Jack-Mr. Lecon," he stammered when he could control his voice, "what do you want-money?"

"I ain't no bloated aristocrat that I refuses it." leered Jack, with an ingratiating grin.

Mr. Westlake fumbled in his coat pockets and produced a roll of bills that caused poor Jack to gasp.

"Take this," said the merchant, extending a generous wad of the freshly minted green, "and-and don't bother me again, Jack-Mr. Lecon, I meanthat is, if-if- Don't you want a ticket to the Pacific coast, where the climate is very agreeable at this season of the year? I'll furnish you with one."

But Jack Lecon was no quitter when on the easy trail of a victim. He was garrulous by turns and much addicted to the use of strong tonics. At such moments he tried to make love to Alice, Westlake's brave and devoted wife, and openly flouted his benefactor. The uneasy head which wore the crown of riches was bowed under the burden thus placed so suddenly upon his shoulders. But for Alice he would have quit and confessed all.

"I'll go away, my dear," he groaned in agony of spirit. "or I'll kill myselfno, kill him! He's the devil incarnate." But Alice soothed and cautioned him against rashness. Imagine the mortification of having a low down brute installing himself in your home, insulting your wife and making free with your money and servants and always holding the threat of an awful exposure over your head-a veritable sword of Damocles, but ten times keener of edge and suspended not by a thread, but by a tiny spider's web.

"No; we cannot go away," Alice said

ed marble and intercepted them-a figure that halted but an instant and then would have passed on with insistent purpose. The officer, startled by the movement, turned hurriedly

"What is it, Sheldon? Anything wrong?"

and asked:

The gliding figure came to a reluctant halt and replied respectfully: "Yes, sir; he escaped and jumped

out of the window. But Jansen and Holden must have him. They were below."

There was a hurried exit from the house, and Alice forgot her dignity and scant footgear. The moon was at its zenith outside, and the crisp wintry air made the blood tingle. The frozen ground was as hard as rock and little frost bulbs gathered on every tree and shrub.

A voice from out of the muffled silence of the night smote their ears as they turned a corner of the house. 'We have him, cir." it said calmly.

"He jumped and fell on his headhurt a little, I guess." They gathered around a dark heap

on the silver frosted ground where the twisted limbs of a man were sprawled like the four corners of a star. There was a queer limpness to the neck when the head was raised, and Alice covered her eyes and shuddered. If she divined the meaning of it she did not confess it even to herself. It was Jansen who pronounced the verdict.

"Neck broken. I guess." he said cool-"Yes, sir, and dead as a doornail." ly. The leader of the men knelt over the prostrate form of Jack Lecon, and after a close examination he said, with finality in his voice: "Yes, he's dead."

Turning toward the Westlakes, he said in way of explanation and apology: "I'm sorry we couldn't take him away without creating a scene. But I suppose now it must come out in the papers. The coroner must be summoned."

Alice drew a deep breath, and Beverly wiped the frost gathered on his mustache with a hand that trembled. His lips only mechanically muttered the commonplace words:

"You have only done your duty, offcer-only your duty-and I thank you."

They turned slowly and walked up the steps of the spacious piazza and entered their palatial home. Their family skeleton was back in the closet. and carefully nailed up and sealed. Would it ever break out again?

hands in. A Chinese who is not gun shy will almost invariably develop into a skilled marksman."

Brain of Humans and of Animals. Professor Ranke some time ago brought out a new fact concerning the brain of a man as compared with that of other animals. It has long been known that the brain of a man does not weigh as much as that of a whale or an elephant and that there are birds and apes whose brains are heavier than a man's in proportion to the weight of their bodies. But Professor Ranke showed that the way to reveal the actual superiority of the human brain is to compare its weight with that of the spinal cord. Measured in this way, man's brain is proportionately far heavier than that of any of the lower animals.-Harper's Weekly.

Some Maine Names.

If the youngsters of today succeed in mastering the spelling of some of the lakes and rivers of the state they will be fitted for any task. A recent lesson given by the principal of Bar Harbor high school included the following names: Androscoggin, Umbagog, Sagadahoc, Mooselookmeguntic, Mattawamkeag, Passadumkeag, Piscataquis, Katahdin, Chesuncook, Mattamiscontis, Pemadumcook, Sourdnahunk, Sisladobsis, Baskahegan, Moleahunkemunk, Cobosseecontee, Pecomsoonshine, Meddybemps, Norridgewock and Nahmakanta. Anything ought to be possible after that .- Kennebec Journal.

Grape Growing.

Growing of grapes in graperies furnishes an important source of revenue in some countries, notably Belgium and the channel islands, where large quantities are annually grown and exported. The United States is a good customer for them. Grape growing in pots is much practiced in parts of Europe and especially in France, where the vines are largely used for decorative purposes on festive occasions.

Patents Too Expensive.

"Patents cost too much." said an inventor. "It should be as cheap to patent an invention as to copyright a book. Many a man hits on a good in- all the news. vention and then is afraid to risk his money patenting it.

"Do you know what it costs to protect an invention-to protect it all over the world? It costs \$2,500, and it requires the taking out of no less than sixty-seven different patents."

The Leading Evening Paper of the South.

The Baltimore Star, established August 17, 1908, by the publisher of The Baltimore American, has won its place as the representative evening paper of the South. It gives more news and more reading matter than any other afternoon paper in Maryland. It is especially rich in departments-financial, sporting, society, children, women, and to these departments the best writers of America are regular contributors. The Star is the great home paper, with something for every member of the family. It is a cheerful newspaper, with plenty of entertainment. Those who try it keep on taking it.

The Star is elaborately illustrated. It has the first photographs of important events. Its portraits of leading men and women are unequaled.

The Star has two great news services. with wires direct to its offices from all parts of the world. The Star has a wireess equipment. It uses every modern invention and the best enterprise to get

The Star is different from other Southern papers. It has a quality of its own. ONE CENT A COPY. One month, 25 cents; three months, 75 cents; one year, \$3.00. Address-

A VISITOR. (For the RECORD.)

Sbe comes, a welcome visitor, My friend of Friday night; We call her little monitor, Sometimes, a satellite.

She is a most loquacious guest, Demanding close attention; No gossip—now and then a jest, On big hats, or legislation.

This friend of mine is youthful, Seldom touching on the past: She's concise and very truthful, Her patronage is growing fast.

She's plain as any "Quaker Lass," Of whom the poets write; She never gowns before a glass; Wears spotless black and white.

She meddles not with one's affairs, She keeps in touch with the world; For progress and betterment, she dares Her banner of light to unfurl.

She bows to the scribe and the artist, To the poet and writers of song, Who send her illegible manuscript, Which she gracefully passes along.

Her poets write on modern slang, On rumbles and retrospection; Accepting them all as best she can, Without a shadow of reflection.

She always leaves a budget of news, Of her wanderings up and down; On improvements, she is quite profuse, These are centered in Taneytown.

Of D. H. Fair's craftsmanship, And mechanical ingenuity; Of the many homes he planned and built, With no shade of incongruity.

Of Dr. McKinney's latest discovery, A sedative for all man's ills; A patient afilrms a complete recovery In one day, from these wonderful pills.

She carries an echo of wedding bells, And pictures the bridal gown; Of handsome presents she always tells, And of guests—those out of town.

When bells are tolling soft and low, Some child has fallen asleep; She stands by a little grave in the snow, She weeps with those who weep.

She travels in a parlor car, Goes North, East, South and West; Sometimes she autos to Keymar, To meet the Blue Mountain Express.

This friend was boin in Taneytown, Has strengthened under reform; Was christened in a paper gown, And was named, "THE CARROLL RECORD." HELEN ROOT LILLY.

THRONG OF BUYERS CONTINUE.

Saved From the Grave.

"I had about given up hope, after nearly four years of suffering from a severe lung trouble," writes Mrs. M. L. Dix, of Clarksville, Tenn. "Often the pain in my chest would be almost un-bearable and I could not do any work, but Dr. King's New Discovery has made me feel like a new person. Its the best medicine made for the throat and lungs." Obstinate coughs, stubborn colds, hay fever, la grippe, asthma, croup, bron chitis and hemorrhages, hoarseness and ten, while but one nomination was made for Burgess. Election, Monday, May, 2. The lecture by Mr. Geo. L. Jones, town, Md.

Suppressing Swearing. Profane as well as legal oaths have been the subject of many parliamentary measures in England. No fewer than five separate bills having the prevention of swearing for their object were presented during the reign of James I., but it was not until 1623 that an enactment was finally carried defining and controlling the offense. In 1635 a public department was established to collect the fines enforced by this law. The officials of this department, of whom one was appointed in every parish, were allowed 2s. 6d in the pound on the money thus collected, and the balance was paid over to the bishop for the benefit of the deserving poor. These penalties ceased to be enforced after the restoration, but were revived by a statute of William and Mary and still further increased under George II. - London Scraps.
