NEWS NOTES HERE AND THERE

Condensed Items of Interest from County, State and Our Exchanges.

There is nothing, in this country, so much out of date on the day after election, as yesterday's newspaper.

On Monday the members of the Police Department will take a census of the residents in Baltimore. This was decided on Monday at the meeting of the Police Board, following a letter received by President John B. A. Wheltle from Mayor Mahool, which requested him to take this action for the purpose of com paring the result with that of the Federal census of 1910.

John A. Johnston, of near Rouzerville, Washington county who recently sold two of his farms and reduced his future supply of fruit, put some of his land in buckwheat this year and now has about a hundred bushels of the grain. He was advised that he would find it hard to grow buckwheat but he followed his own ideas about the matter and with his indomitable energy made the venture a profitable one.

Charles A. Smith, for a number of years proprietor of Smith's Hotel at Ridgeville, was found dead near his stable, where he had been at work. He left the house several hours before his death, and while sorting potatoes was stricken with appoplexy. He was 77 years old and had retired about a year ago from hotel work. He was well-known to tourists and is survived by a widow and one daughter.

The city of Auburn, Washington, voted "wet" Tuesday despite the exhibition of two corpses near the polls as example of death wrought by drink. Undertaker Collins, an ardent Prohibitionist, set corpses in coffins in his display window just opposite the voting place. Above them was tacked the sign: "They died of drink." The voters gazed in horror, crossed the street and voted "wet." Both bodies were found on the railroad tracks with which bottles. tracks with whisky bottles.

Ex-United States Senator and Mrs. George L. Wellington have issued invitations to the marriage of their eldest daughter, Miss Gretchen Wellington, to Mr. James Elder Humbird, the only son of Mr. and Mrs. J. Wilson Humbird, Wednesday evening, November 23, at St. Paul's Lutheran Church, Cumberland. Rev. Martin I. Enders, pastor, will perform the ceremony. The bridal music will be played by Mrs. Jenny Lind Green, of Baltimore.

In this column, last week, reference was made to the "Reward" notice of a carriage manufacturer, which we erroneously sized up as an advertisement. We have since been positively informed that the surrey was actually stolen, and we gladly make the correction. As the notice was almost identical in terms with others of like character that are pure advertisements, we were misled. In any event, the wording of the notice is a splendid advertisement, and we congratulate the writer of it. We are impressed with the fact that our little effort at "smartness" was but another illustration that "appearances are often

Several days ago Mrs. Mary A. Atwood, of the vicinity of Beane, Montgomery county, visited the home of her pachelor brother, James T. Greenfield, who died several weeks ago, and, while looking over his effects, discovered a tin can full of greenbacks. She counted the money, which was in \$5 and \$10 bills principally, and found the amount to be \$410. Mrs. Atwood, who is the administratrix of her brother's estate, will distribute the money among the heirs. Mr. Greenfield lived alone, and since his death the house had been unprotected, no one supposing that it contained anything so valuable as the can of money.

The tramp nuisance in Carroll county would be greatly abated if the Franklin county, Pa., plan was tried here. The Waynesboro Gazette says: "Some years ago an attempt was made to put tramps to work in the jail yard. It proved a failure but it kept tramps out of Chambersburg for a while. They annoyed the farmers, however, and the farmers protested against this. This year a new method has been adopted. Magistrates all over the country have been directed to commit the tramps and vagrants to the work house and this will serve to keep them out of the county and prevent their annovance of the farmers constables will exercise vigilance in arresting them.

Treasury Clerks and Drinks.

Secretary of the Treasury, MacVeagh, has instituted a plan to prevent clerks in his department from going out, during work hours, and taking drinks. The employees in the treasury building have two coats and two hats. One coat and hat are kept on a hook in their rooms. If they happen to want a "smile" they leave their office and take a second coat and hat from a closet in a hall. If they are wanted while at the corner saloon their fellow clerks can say: "His hat and coat are here. I guess he has stepped into some other

Mr. MacVeagh tumbled to this trick, and now he is having steel lockers built. When an employee comes in he will put his coat and hat in the locker, and a special guard will lock them up. The coats can only be removed at the noon hour and in the evening. Owing to the many entrances to the treasury building, many steel lockers must be built, and six special guards will have to be employed, but Secretary MacVeagh says he is going to stop the drinking habit. To the layman it must be understood that it's rather a strenuous job firing an employee of the government, notwith-standing civil service rules.

The Vote in this County.

Counting the rejected ballots, 6218 votes were cast in the county, or 971 less than were cast for Comptroller last year. The two precincts of Manchester gave Talbott the small majority of 168, while Myers district gave him but 116. Two years ago these two districts gave Mr. Talbott 447, and even this was far short of the old-time normal Democratic vote.

Hampstead district, which gave Mr. Talbott 79 majority two years ago, gave Mr. Baker 9 majority this time. Evidently, there has been "Bright" work over in that neck of the woods, but just as evidently the same influence did not

work in Baltimore county.

Of the 101 ballots rejected, a large portion were marked in the square above Mr. Baker's name, while others seemed to have been spoiled purposely.

The Prohibition votes in the county

fell off about 50, the probability being that they were cast for Mr. Baker. The Socialist vote, which shows an increase of about 40, no doubt represented "disgruntled" votes of various kinds, from persons who did not want to be marked as "not voting."

The W. C. T. U. of Mt. Zion, (Haugh's church) will hold a contest Sunday evening, Nov. 13th. The delegate of the World's Temperance Convention will be present. All welcome,

Proceedings of the School Board.

A regular meeting of the Board of School Commissioners of Carroll County was held on Monday, November 7th., instant. Commissioners Jacob H. Blocher, Theo, F. Englar, Peter Buchman, Levi D. Reid, John O. Devries, and Dr. William E. Gaver were all

present.
The Secretary placed before the Board all the bills covering the transactions in building the two rooms at the West End in Westminster, including steam heating plant and the moving and rebuilding of the two out houses. The improvement cost \$3271.23. Also he reported the completion of the improve-ment at Sykesville, including the addition of two rooms, the re-arrangement of the rooms on first floor with hall, stairway and closets, and painting and penciling of the whole building. This improvement cost \$3489 00. The two buildings cost \$6760.23, and the County Commissioners have made a special appropriation of \$6500.00 for these two improvements; \$4000.00 of this was made last fiscal year, and \$2500 00 the current

The school interests of the county were discussed, and sundry bills were passed and ordered paid. The Superin-tendent reported that notwithstanding the sudden and unexpected occurrence of vacancies, all the rooms in the county are supplied with teachers, and that Mr. Emory Houseman, who has been teaching in place of Miss Shower, at Manchester, would take the school at Wisner's, on the 14th., instant. On the same date Mr. Thomas will take Meadow Branch and Miss Eva Herr will take the fourth room in the Westminster High

S. SIMPSON, Secretary.

Mr. B. Frank Crouse, State Insurance Commissioner, died at his home in West-minster, on Tuesday afternoon, at the age of 56 years, following an illness of more than a year. Mr. Crouse had been prominent as a lawyer, early in his cang the acknowledged Democratic leader in Carroll County. He served as a member of the House of Representatives, Clerk of the Court, Clerk to the Comp troller, and Insurance Commissioner.

Mr. B. Frank Crouse Dead.

Politically, because of his enthusiasm and partisan activity, Mr. Crouse had a number of cordial enemies, but even these admitted his personal attractions and his charming social side; indeed, it was to these pronounced qualities that much of his political success was due, which is largely true of the success of most men in public life. As a friend and advocate, Mr. Crouse was close to the ideal, and those who knew him best were always ready to praise his virtues and excuse his faults.

Mr. Crouse was twice married. His first wife died about 14 years ago, leaving three children, Ira E Crouse, Benjamin Franklin Crouse, Jr., of Westminster, and Miss Helen Crouse, now of Philadelphia. His second wife survives him, but has no children. He is also survived by two sisters and one brother, Misses Laura and Ella N. Crouse and Oliver P. Crouse, of Philadelphia. He was a son of the late Ira E. Crouse, of Westminster. His grandfather was the late William Crouse, and the late Rev. William A. Crouse was his uncle. liam S. Crouse, former superintendent of the schools of Caroline county, and Rev. Dr. Thomas O. Crouse, a prominent clergyman of the Methodist Protestant church, are his cousins.

Funeral services were held this Friday morning, the Masonic order assisting.

Two Wedding Events.

Two pretty wedding events took place at the Reformed Parsonage, Silver Run, Md., this week, on Tuesday evening, Nov. 8, Mr. Earnest W. Stewart and Miss Elvira V. Baumgartner were joined together in holy wedlock, and Mr. Clemington G. Reese and Miss Elda J. Baumgartner, on Wednesday evening Nov. 9th. These young people are all well and favorably known by a large circle of friends. The brides are sisters and both members of the choir of St. Mary's Reformed church. Rev. S. C. Hoover, pastor of St. Mary's church, officiated at both ceremonies. Heartiest congratulations and best wishes are being extended to these happy couples.

The other day a merchant in a nearby town saw a farmer receiving goods at a station from a mail order house. The goods were in his line and the same had been carried in his store for years. He approached the farmer and said: could have sold you every article you have here for less money than you paid

Gosnell-Fowble.

The home of Mr. and Mrs. William Fowble, of Woodbine, this county, was the scene of a beautiful wedding, on Thursday, October 20th., 1910, when their youngest daughter, Miss Elsie M., became the bride of Mr. Robert F. Gosnell, son of Mr. and Mrs. Abner Gosnell, also of Woodbine. The parlor was beautifully decreted with autumn leaves beautifully decorated with autumn leaves and chrysanthemums. The ceremony was performed by Rev. E. B. Boyer, pastor of the Lutheran church, of Confluence, Pa., in the presence of a large number of friends and relatives of the bride and groom. The bride was at-tired in white persian lawn, tastefully trimmed, and carried a shower bouquet of pink carnations. Miss Mattie Fow-ble, cousin of the bride, of Sykesville, was bridesmaid, and was attired in messaline; and Mr. Burgess Gosnell, brother of the groom was best man.

After the ceremony elaborate refreshments were served. The bride received many valuable gifts of silver, glass and chinaware, linen, furniture, and pic-

tures, also a snug some of money. Those present were: William Fowble and wife, Abner Gosnell, and wife, Ernest Fowble and wife, B. S. Flohr and wife, Howard Leatherwood and wife, Rev. E. B. Judge Motter gets Cold Bath.

Judge John C. Motter of Frederick, had a narrow escape from drowning in Hunting creek Saturday afternoon. As a result of his experience he is home suffering from shock and nursing, a badly cut knee and a lacerated hand. The accident happened near Lewistewn about 10 miles from Frederick, and was a severe strain on his strength. being brought home, the Judge developed a feverish condition, which on account of his age, alarmed his family and

With Mr. D. Princeton Buckey and Edward Sharpe he went hunting Saturday morning near Lewistown, along Hunting creek. Toward noon he decided to cross the stream in search of a covey of birds and selected a fording place where several large rocks projected above the water. When about midway of the stream his foot slipped on the smooth surface of a rock and he pitched forward into the water.

He disappeared beneath the surface of the stream, but regained his footing and in a dazed state waded to land. In the meantime his companions saw him in the water and assisted him to the bank. One of them ran half a mile to a farmhouse and secured a team in which the Judge was conveyed to the home of a friend, wet to the skin and shivering from cold, and several hours later he

was brought home. He was in bed a day or two, but on Tuesday was out to vote.

Undertakers' Law Invalid.

Frederick, Md., Nov. 5.-In an opinion written by Chief Judge Hamm Urner, and concurred in by Judge Motter and Henderson, filed in the clerk's office this morning, the State Undertakers, law requiring those in the business outside of Baltimore to take out a license was declared unconstitutional.

About a year ago Charles J. Smith, an undertaker, was indicted by the grand jury for "practicing" without a license. He pleaded guilty, submitted to the penalty prescribed by the law, and was put out of business. Sympathy was manifested for him and it was decided to test the validity of the law. At the September term of court Marion C. Rice and William E. Stockman were indicted, as had been Smith. Undertakers of the city employed H. Dorsey Etchison to represent the accused, and he demurred to the indictments, raising the question of constitutionality.

The Court held that Section 8 of Chapthe mail order house and saved you the ter 160 of the Acts of 1902, as amended by later acts, is in violation of the Four-tenth Amendment to the Federal Consers, and payer have seen a line about tending the Linderthese at the Linderthese. years and never have seen a line about tending the Undertakers' act beyond your selling these goods. A DEMOCRATIC VICTORY.

Republicans Lose Congress and Governors in Several

The result of the election in general was not much of a surprise to anybody, as it was generally conceded that the Democratic party, this year, would profit from Republican division and dissension, and from the fact that the increased price of farm produce has added heavily to the cost of living in cities and manufacturing centres. These facts, in addition to various local issues, and general apathy among those, most benefitted by present high prices, conspired to bring about the natural result.

The Democrats were also wise in

taking full advantage of the situation by nominating, in the doubtful states, ex-ceptionally strong candidates, and making use of all the arguments that might be brought to bear on discontented voters. In New York, and in centres where the Republican party has hereto-fore been liberally helped with capital from monied interests, their plan of campaign this year was such as to lose this support. The constant agitation for anti-railroad and anti-trust legislation, naturally caused those interested in large business affairs to refrain from giving Republican candidate support, while in some sections Cannonism and Aldrichism in their relation to the tariff, and what is known as "stand-pat-ism," unquestionably had the effect of causing many Republicans to conclude that it would be best for the party to be rebuked by defeat at the polls.

As a result of the election, especially in the East, Col. Roosevelt will likely be discounted as a political leader and prophet, and President Taft and his more conservative course and methods, will take the ascendency, and eventually cause him to be regarded as his party's leader in 1912.

Senator Beveridge (Rep.) of Indiana will be replaced by a Democrat, notwithstanding the efforts of Roosevelt and the insurgents. Apparently, wherever Col. Roosevelt

made his strongest efforts, there the Democrats won most decisively. While the Republicans control the Senate, on party lines, the "insurgent" Republicans can control legislation, as their voting with the Democrats will con-

stitute a majority.

The legislature of New York being Democratic, will retire Senator Depew. In Washington, the woman suffrage amendment to the State constitution

was ratified, and will become a law by proclamation of the Governor. In Oklahoma, the woman suffrage and local option amendments were defeated. The defeat of the latter still leaves the

state under total prohibition.

It is said that Col. Roosevelt has shut himself off from the outside world, and will say nothing on the result of the elec-

A Republican of National reputation gives the following opinion on the result, an opinion which has many indorsers: 'To my mind the results certainly do not mean, beneath the surface, that the people have turned away from the Reiblican party to the Democratic party But it does show that they are heartily tired of the unrest and the agitations and the disturbances to which business has been subjected to years. Conditions were such that no business man would expand or would plan for the future. It was too uncertain. He would not go further than immediate requirements because he had no means of what the uncertain future would bring. There was doubt and distrust. And Theodore Roosevelt was not the only man who was reponsible for these disturbed conditions. He was merely one of the number. But the people rose up and gave all of them some mighty good

The outcome of the United States Senate is definitely settled. The Republicans are assured of 16 new senators, which, with 34 holdover senators, gives them a total of 50. The Democrats are assured of 15 new senators, which, with 25 holdovers, gives them a total of Two senatorships are still in doubt-namely, the successor of the late Mr. Dolliver in Iowa and of Mr. Carter in Montana, where there is prospect of a

The N. Y. World says; "This is no partisan Democratic victory in the or-dinary sense of that term. While it is a defeat for the Taft administration and for the Republican party, it is peculiarly a defeat for Tneodore Roosevelt and his 1912 ambitions. It was brought about by the help of Republicans who were dissatisfied with the record of the Taft administration and the Aldrich-Cannon revision of the tariff. But it was also brought about by hundreds of thousands of patriotic Republicans who still believe in the Constitution of the United States, who still uphold the Supreme Court, and who will tolerate no third-term ambitions in any man, whatever the party name that masks his pretensions.

Mr. Hearst, in his N. Y. Journal, says of the result: "Here in the state of New York we hope for the best without really and truly expecting it. The people of the state have voted to make Mr. Murphy, of Tammany Hall, boss of the whole state. We shall do what we can to make this as barmless an incident in politics as possible. Watchfulness will do some good. But the fact remains that Mr. Murphy and Tammany Hall have spread from Fourteenth street to the extreme limits of the state of New York-and Murphy is the boss. Let us hope for the best, keep a keen eye out for the worst, and proceed about our business in the usual way." On the general result, the same au-

thority says: "The people get tired of conditions—with good reasons—they think that a change will help them, and they make a change. They have voted now to punish the Republican party. They put the Democratic party in power, hoping, and a few of them believing, will get tired again of the same old

story with a different name. And then they will punish the Democratic party and put the Republican party in power, hoping—and a few of the young and in-experienced believing—that it will cor-rect the evils of the Democratic party. And so it goes. The good, solemn, simple voter finds he is pretty hot in the Republican frying pan, and he jumps out into the Democratic fire. By and by he gets his cunning little toes burned in the Democratic fire, and he jumps back into the Republican frying pan. He gets pretty hot there, and out he jumps, and so on. And old Mr. Trust, who bolds the frying in one hand while he pokes the fire with the other, smiles grinly. No matter where the little veter

grimly. No matter where the little voter is, Mr. Trust has got him."

The total vote in Pennsylvania, except four counties, was as follows; Tener, Rep. 400,575; Berry, Fusion, 360,537; Grim, Democrat, 119,305.

The Result in Maryland.

The Democrats carried five out of the six districts in the state, a gain of two, the Republicans electing only Mr. Par-ran, in the Fifth district. The Third district was lost by a slim margin, while the Sixth district, usually safely Republican, was lost because of the weakness of the Republican candidate, Mr. Warner, who failed to enthuse his party voters, and his defeat was chargable to the extremely large stay-at-home Republican vote, rather than to the popularity of his opponent, Mr. Lewis; while the disaffection of the friends of Mr. Pearre, the present representative of the District, had much to do with the result.

In the Second District, Talbott owes his election to Baltimore County. The very complimentary vote received by Mr. Baker, in Carroll, was no doubt due, in large part, to the strong Antisaloon sentiment in the county, which gave him liberal support. His majority in the district, over Talbott, outside of

Baltimore county, was 1025.

The variation in the vote of Baltimore County has been rather remarkable, as the following figures show-

The vote in the state was about 82,000 short of the registered vote. The Democratic majority in the state was 6344.

BALTIMORE'S agitation for a recount of population is largely due to the fact that Cleveland slipped in ahead of it, by about 3000, when nobody was looking. Pittsburg was the only city feared, and, as that was beaten, the "butting in' of Cleveland was a direct insult. Let Baltimore extend its limits, as it should, and beat Cleveland that way, for once open up the recounting game, and all the cities of the country will want to engage in it-Cleveland and Pittsburg along with the rest.

THIS YEAR, the Republicans were on the wrong side of Wall street. The money interests were for Dix, in New York, and against Stimson and Roosevelt, the Republican appeals being made to the people and not to the Capitalists. It has been a long-standing charge that the Republican party represents capitalists and trusts-the money power. According to the Roosevelt doctrine, a decided change of base is hereafter to be the rule, but it is not yet sure that Roosevelt is to dictate the policy of the party two years hence.

THE OULOOK for farm sales, next Spring, is very much as it was a year ago-a smaller number as compared with a few years ago. The sales, now, are largely those which must come about, naturally, and not from choice. There is not that exodus from farming, which was once so apparent, but the tendency is in the opposite direction, and there are most excellent reasons why this should be true, all of which may be summed up in one-farming pays better than anything else one can get at, involving the same investment and risk.

THERE IS NO evidence that interest in Local Option is dying out, as many so confidently predicted; rather, we are inclined to believe that the liquor business is on the run, and that it will have a hard and regular fight for life, everywhere, for years to come. The chief reason for this is that anti-liquor forces are organized, as never before, and are no longer afraid to try their strength against the strongly intrenched liquor interests, nor are they discouraged because success does not come with first efforts. If all the so-called temperance people ever get together, and agree to fight side by side at the polls, they will win, sure as death.

Should the tariff commission plan be worked out, and actually prove popular, it would be almost a National misfortune, unless it left a worthy successor as a dividing issue. At any rate, we are likely to have a rest-except perhaps in Congress-for a good long time, so far as trying to convince the dear people that they are being robbed, is concerned.

Printers' Charges too Low.

We have been reading so much, recently, in printers' journals, about how to estimate the cost of printing, that the conclusion is strong upon us that most charges should be doubled, in order to come out ahead. Indeed, the facts are all against such charges as prevail in the average country shop, and the annual balance sheet shows it without the reading of expert testimony. The trouble is that country managers fail to take anything like proper account of "overhead" charges, actual cost of management, and depreciation in machinery-Tener, Berry and Grim-but it looks an item, by the way, very expensive, differently now, and it seems strange and which one only realizes when a worn

> When an office is new in equipment, the first few years seem to show that there is plenty of profit in the business; but, unless there is a good big surplus carefully banked away, the second period, when depreciation shows up, will swamp the unwise manager who has been beguiled into the "come easy, go easy" delusion. At least ten years experience is needed to show whether a printing business pays, or not.

The Hunting of Game.

Public sentiment has greatly changed, with the lapse of years, with reference to the "hunting" of game, and largely because the face of the country itself has changed, and individual property rights more clearly defined by improvements and boundary lines.

In the old days, when large stretches upland and lowland were in their wild state, and when farming was restricted to small areas, hunting was less a matter of trespassing than now, especially because the rifle and muzzleloading shot gun in comparatively few hands, made the killing of game a rather trifling matter.

The natural cover for game, however, has been so greatly reduced in area, and property lines so generally known and marked, that the situation has materially changed. There has also come about a marked change in the bunter, as he now has a breech-loader, or magazine gun, and is prepared to play havoc with the little game that exists. Besides, the "hunter" is very apt to be a boy, more or less careless in his use of arms, and not the man and neighbor of years ago, or perhaps an entire stranger.

There is also a change in the land owner himself, and in his natural relation with hunters. There was a time when hunting was a more or less neighborly pastime, engaged in when the season's work was over. Now, the land owner and his family are kept hard at work until late in the season, with but little time for hunting, even for the small amount of game on their own land, which makes the hunting of work for farmers when asked-a matter of objectionable trespassing.

A Troublesome River.

The Colorado River which the late Mr. Harriman got under control several years ago at the request of President Roosevelt, using the resources of the Southern Pacific Railroad for that purpose, is again getting dangerous. No other river of its size carries so much silt in its turbulent current. It brings down every year 387 tons for each Square mile of its long and wide drainage basin.

So great is its fall and so swift is the current that the river gets no chance to clarify itself by settlement until it gets near to the Gulf of California. There past year great progress has been in Mexican territory its bed is filling up and it is feared that another crest of very high water will break over the Harriman embankments and allow the stream once more to plow out a channel into its old-time possessor, the Salton desert in California.

> Congress refused to reimburse the Southern Pacific the \$1,000,000 which Mr. Harriman spent to stop the flow into the Salton desert several years ago, but it did appropriate \$1,000,000 to prevent a second overflow. This has not been expended as the point of attack is in Mexico and that Power has not vet consented to have its territory invaded by the engineers of the American War Department for the purpose of facilitating the discharge of the waters of the Colorado River into the Gulf of California, instead of their taking the back track and overflowing American

Pitcher Attachment For Milk Bottles.

An inventor who hails from Alabama has conceived a very unique attachment for milk bottles, consisting in a pitcher-like mouthpiece which enables the milk to be poured out without spilling or running down the outside of the bottle. The mouthpiece is made fast by means of a rubber sleeve and a collar. The mouthpiece is also fitted with a spring pressed cover of the type usually found on sirup pitchers, and this may be opened by operating a finger piece, as indicated in the illustration.

Mustard Pickles.

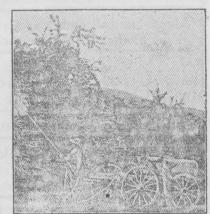

Two quarts of cauliflower cut in small pieces, two quarts of green to-matoes sliced, one quart of cabbage cut in small pieces, two quarts of small cucumbers sliced, two quarts of small onions sliced, six green peppers. Let stand in a brine overnight. In the morning let boil ten minutes in the brine, then drain through colander.

The Paste.—Six tablespoonfuls mustard, one tablespoonful tumeric, two cupfuls white sugar, one pint boiling water, three quarts cider vinegar and one cupful flour. Mix flour with water to form a paste. Take three

quarts of vinegar, act one pint of water and let come to a boil. Add mustard, tumeric and sugar to paste and pour into the boiling water and vinegar and let boil. When it thickens add the pickles. Stir well and seal in jars.

How to Spray Trees.

Assuming that the fruit grower is properly equipped with apparatus and material and ready to apply the spray to the trees, the next question is how to do it. If the day is calm spraying can be done in any direction most convenient. If the wind is light spray so that the wind blows nearly as pos-

sible across or at right angles to the rows to be treated. By so doing and working from windward the trees are easily and wholly covered when sprayed on opposite sides.

It should be noted that it is impossible to spray a tree of any size effectively and completely from one side only. In a brisk wind the same rule applies except that only one side of the trees is sprayed, and then watch opportunity and with a changed wind spray the opposite side. By this method the spray will not fall on men or animals, but will be blown through the trees. By the exercise of a little thought and foresight the wind can be made a serviceable ally in spraying It is quite essential that every part of the tree, trunk, branches, twigs and leaves (if tree is in foliage), should be covered with the solution or mixture.

GARDEN PARTY GOWN.

It's a Cool and Dainty Creation For Midsummer.

IN LACE AND BRODERIE.

Quite the smartest and most successful of the white frocks for afternoon wear are the simplest. The great fashion authorities are everywhere emphasizing the charm of the graceful outline and attaching the greatest possible importance to bring this result about without any extraneous help from furbelows.

The dominant white frock is made over a one piece lining that is cut on the simplest lines and has no bones

m it. The skirts are of three styles, the flounced, the puffed and the straight and scant model finished with a four inch hem. At first glance the voluminous skirt appears to be of endless width and fullness; but, although a great deal of material goes into its makeup, it is invariably mounted over the closest fitting and narrowest of foundations, so narrow that it seems at times unsafe to take a step in it.

The garden party gown pictured is a charming affair, a simple but exclusive creation of lace and broderie.

Veils as Cause of Red Noses.

A prominent physician has given voice to a definite protest against women wearing veils. This authority asserts it is one of the most injurious practices of which he has knowledge and insists red noses are the result of veils and nothing else. If there is anything a woman objects to it is a red or greasy nose, and these troubles, according to this physician, find their origin in the wearing of a veil on almost every occasion. The veil prevents the air striking the face as it would if the veil was off, and when the face is heated the nose becomes greasy and almost invariably has a reddish appearance. This doctor would not even advise a veil to be worn on automobile rides, asserting a pair of "goggles," merely to protect the eyes from dust and insects, is all that is required for a woman who cares about her complexion and general facial appearance, and what woman does not?

Peach Pudding.

A delicious pudding is made by covering the bottom of a baking dish with ripe peaches that have been peeled and cut in half and the hollows left by the stones filled with chopped nuts. Over the whole turn a custard made in the proportion of a cupful of milk to half a cupful of sugar and three eggs. Bake slowly and serve cold. A meringue may be added to the top after it comes from the oven or it may be piled with whipped cream. Some persons sprinkle the fruit with cinnamon or cloves, but lovers of fruit resent detracting from the natural flavor.

We Give 'S. & H.' Green Trading Stamps.

They Furnish Your Home Free of Cost.

Following the lead of the most Successful Merchants in the United States we have adopted the World famous "S. & H." Green Trading Stamp system of sharing profits with our customers.

The giving of "S. & H." Green Trading Stamps by any store is a simple and direct form of profit-sharing with customers. The share in the profits on each sale which in this way is returned to the customer is paid in "S. & H." stamps instead of cash. But the stamps are themselves exchangeable for articles of use and value. The system is easy to understand. With every ten cent cash purchase made here the purchaser receives one "S. & H." stamp. That is, if the purchase amounted to 50 cents you would receive five stamps, with purchases of one dollar ten stamps, and so on, one stamp with each ten cents in the amount of your cash purchases.

These stamps, as they are thus collected from this and other stores operating under the same plan, are pasted into little books, each holding 990 stamps. The filled books are exchangeable for any of the thousand-and-one articles of use and ornament pictured in the "Sperry & Hutchinson" Premium Catalog. We will gladly give you one of these catalogs.

HERE'S THE POINT:--No one will sell you better goods for less money than we. Hence the stamps we give you costs you nothing--absolutely nothing.

In brief the holder of "S. & H." stamps can exchange them for anything of her choice in---

The result of the elections should prove conclusively that man worship is not to be the shibboleth of the people of tue United State.

The remarkable calm that settled over Union Bridge, on election day, the one Prohibition week day that we have during the year, should be an object lesson to all as to the advantage of prohibiting. A few "wets" in the morning quickly became "dry" and lacking the spirit

could not raise a disturbance.

While driving along the Buffalo road, on Wednesday, four snow drifts were encountered-the remains of last week's storm. Much corn remained to be husked. What was seen husked was good. Not for a dry season, but for any season. On the Oak Orchard road the wheat fields were green with growing grain and appeared to be in good condition for winter. On the Sam's Creek road they were looking badly and much of the grain appeared to be just

An Epidemic of Strikes.

From all over the country comes news of impending strikes. Union labor is discontented, not because of no work, nor solely because of low pay, but because of the ownership of force to compel more pay. In the west, the enginemen of sixty-one railroads are in favor of a strike, the object of which is to tie-up the business of these roads until the demands of the strikers are met, during which period, not only the business of the companies, but the business and conveniences of the public in general, is to be sacrificed to the demands of union-

In a large number of cases the employees of certain railroads have no actual grievance. They do not want to quit work. But, as members of a general union, they will strike to try to help those who have, or claim to have a proper grievance. Suppose all had proper grounds for a strike, and succeeded in their demands? What would prevent them from striking again and when they had no proper grounds?

Sooner or later, the general government must absolutely fix wages, make it a criminal offense, followed by quick prosecution, for any body of men to conduct strikes along the lines on which they are at present conducted. Men at all times should have the liberty to quit work when terms do not suit them, but they should never be permitted to use force, or to in any way interfere with the working of others, or with the plans of labor employers.

THE FRUGAL DUTCH

Economical In Their Use of the Daily Papers.

ONE JOURNAL READ BY MANY

A Number of Families Will Subscribe For a Single Paper, Which Goes the Rounds-Some Thrifty Souls Will Only Rent Their Newspapers.

One thing visitors to Holland notice, and that is that no one on the streets or in the cars is seen reading a newspaper. Papers are not sold or hawked as they are in England and America. It is only when extremely important events take place and the papers print special "bulletins" that these are sometimes bought in the street. Usually the people content themselves by reading these same bulletins when they are displayed in the windows of cigar shops, booksellers' shops or at the offices of the newspapers, for the Dutch people economize in their reading matter. Many curious ways have been devised to reconcile economy with a

plentiful supply of news and informa-

Two, three or more families will combine to subscribe for one paper, which is then read by each in turn. The one who gets it first pays a little more than the later readers, and each may keep it for a stipulated time-an hour or perhaps two or three hours or half a day. In this way it is generally only the "head of the house" who gathers in any information. He monopolizes the paper as soon as it comes and keeps it as long as he can. The other members of the family then go without news or are only enriched by the crumbs of knowledge that now and then drop from the lips of paterfamil-

Most of the daily papers in Holland are issued in the evening, but some of the more important ones publish morning editions as well. To subscribe for more than one paper is considered a terrible extravagance, and even a 'whole" subscription for one family alone is looked upon as a luxury. At the clubs and the "coffee houses." the Dutch equivalent of the American saloon, there are always newspapers in profusion, and very many men do all their reading there and so save the subscription fees, for they don't count the cost of what they imbibe.

Many cigar shops and sometimes other stores have what they call "depots" of newspapers, and there you can also "rent" a paper and take it home with you for a certain length of time for very little money indeed.

But the longing for information of the average Dutchman of the middle classes extends far beyond the daily papers. He wishes to know all about his neighbors far and near, and at the same time he wants to keep up his knowledge of the languages learned at school. For these purposes reading societies are formed either among friends or people living in the same neighborhood, or perhaps all the officers of a certain regiment will combine; then a committee will be selected from among the members on which will devolve the task of selecting suitable weekly papers or monthly magazines in English, French, German and Dutch and to circulate these among the members of the society. These books and papers are sent round in large portfolios either once or twice a week, as may have been agreed upon. So those joining such a society can read all the best English, American, German and Dutch periodicals at a

slight cost. Of course you don't always get the magazines as soon as they come out. This is carefully regulated according to the size of your contribution, and many people read their Christmas stories in June. Still, it keeps up an interest in the world at large and helps to keep fresh in the mind all that has been learned in youth

If the head of the house gets most of the daily papers it is with the periodicals that the other members of the household have their innings. They can read them while father is at his bureau or at his office. Sometimes an enterprising bookseller starts one or more circulating portfolios in his neighborhood, and this is managed on the same lines as the private reading

At the end of the year the old periodicals and books that have been the round of all the subscribers are sold by auction among the members of the association.

People visiting Holland are often surprised to find how well nearly every one in the country speaks foreign languages and bow much he knows of the literature of other lands. If we take the above facts into consideration it will no longer seem so astonishing.-W. J. L. Kiehl in Chicago

The Right Flavor.

The oxen had belonged to an old sea captain, and their new owner was unable to back the animals round in a marrow street despite all efforts with voice and ox goad.

The old captain appeared on the scene. "Hard aground, are ye?" he called. Then, seizing the ox goad, he raised the old boat steerer's cry, "Starn all!" The huge hulks slowly backed at the familiar call. "Larboard all." The beasts swayed sideways, turned to the right, and the thing was done.-Success Magazine.

Success is not in an endeavor to do a great thing, but in repeated endeav. ors to do greater things.-Henry F. Cone.

THE QUIVERING EARTH.

Our Globe Frequently Trembles Like a Mass of Jelly.

Among the astonishing discoveries that have recently been made by means of the delicate instruments contrived primarily for the investigation of earthquakes none is more surprising than that of the existence of vast quiverings of the earth's crust which affect tens of thousands of square miles of surface and sometimes continue for weeks on end. These strange pulsations, which are called "microseisms," are due, incredible though it may seem, to nothing else than the varying pressure of the air!

Who could have believed that the seemingly solid globe could be thus shaken by the soft tread of the invisible powers of the atmosphere?

But the mystery is deepened by the fact, which stands out clearly from the investigations of Dr. Otto Klotz, that the ocean plays a master part in the phenomenon. When an area of low barometric pressure passes across the United States no microseisms are produced as long as the cyclone remains distinctly over the continent, but when it rushes out upon the surface of the ocean the needles of the seismographs begin to tremble.

These strange movements affect blocks of the earth's crust so large that their surface, as already remarked, covers tens of thousands of square miles. Over these immense areas the solid earth trembles like a jelly, and the motion, instead of passing away rapidly, as in an earthquake, continues day after day and week after week. Microseisms are most common in winter. But whenever a well marked low pressure area-in other words, a storm center-sweeps up the Atlantic coast from Florida to the gulf of St. Lawrence the tremblings begin. Dr. Klotz has shown that it is not the surface wind that produces these disturbances, but the change of pressure. Yet the winds and the tides, too, have their effects, which can be clearly distinguished from the true microseisms.

This adds another to the many sources of disturbances which affect the stability of the earth. Every fresh investigation brings new proof that the earth is an astonishingly high strung organism, its ribs of rock, as rigid as steel in the interior, responding like the strings of a harp to the slightest touch. And we, microscopic creatures, dwell upon this globe of stretched and living strings .- Garrett P. Serviss in New York American.

Selling a Book.

At the last dinner of the American Booksellers' association one of the contained this rubricated text: "To right in price, at write a book is an easy task; it requires only pen and ink and some patient paper. To print a book is slightly more difficult, because genius often expresses itself in illegible manuscript. To read a book is still more difficult, as one must struggle against sleep. But the most difficult task that any one may attempt is to sell a book." The Harpers presented the paperweights, but the sentiment belongs to one of the most prolific modern writers Felix Dahn, a man who, mor never sold a book in his life. He is a German novelist, historian, jurist and playwright and has written half a hundred works of all sorts.-Argonaut.

A New Death Daaler. The recently invented Benet-Mercier gun combines the rapidity of fire, range and effectiveness of a machine gun with the lightness and ease of action of a magazine rifle. The gun is fired from a rest and is held against the shoulder of its operator, who can either fire from a sitting position or lying prone. The regulation cartridge is used in clips that hold fifty. A good rifleman can discharge from 300 to 500 shots per minute if assisted in feeding by a man to fill the clips. The gun is at present undergoing a series of tests by army officers with a view to its adoption by the government.-Popular Mechanics.

Horses and the British Army.

The British army on mobilization will require 132,000 horses, and no one has the slightest idea where they can be found. Good authorities tell us that this number of animals of the military age does not exist in the country. With the growth of mechanical transport the necessity of taking steps to secure a supply of horses in war grows more and more urgent. We can not, unfortunately, mount our cavalry on taxicabs. We still breed the best horses in the world, but they are bought up for the use of foreign armies while the British war office is counting its pence.-London Mail.

Making Himself Useful.

Persia's former shah appears to be supporting his exile more philosophically than Abdul Hamid. According to the Cri de Paris, he has learned Russian and reads Tolstoy, Dostoievsky and Gorki in the original. He attends some of the lectures at the University of Odessa and has paid his entrance fees to the school of medicine. This branch of s'udy appeals to him most strongly, and he hopes in due course to take a medical degree and even to practice as a doctor should his subjects not recall him to the throne.

Contracting the World.

The world is growing too small. One can go to Deking in a fortnight; an aeroplane service is to be run from Algiers to Timbuktu, and a wireless station is being installed on Crusoe's island. Farewell to mystery!-Paris

MADE GOOD AS A COOK.

Old Lumberman Got Supper The Without the Least Effort.

"Nowadays a cook is provided for each camp," said the old lumberman that it will not rid of lice, when who has worked on the St. Croix, the Penobscot and the St. John, "but in my days of lumbering we took turns, a week at a time, or one man would has always been one of my make all the bread, another the tea and coffee, and so on through the bill of fare. Once in awhile-generally before they'd got licked into their reg'lar winter mold-some fellow would kick against the routine; 'he's been hired to do something else,' or 'he'd be hanged if he'd cook, anyhow.' Then

"We got back to camp one night to find the fire nearly out and nothing ready for supper. We were all hungry -and grouty, as sometimes happens in the best regulated crews. Each in turn declared he wouldn't be cook, and it looked like a supperless night till Uncle Ned spoke up in his quiet way.

"'Dear me,' says he, 'what a time about cooking! Why, it's the easiest thing in nature to get supper. Now, boys, if you'll all wait on me I'll be cook.

"They all agreed. This being settled. Uncle Ned sat down on a spruce chair and let his assistants have it. " 'Now, Dick.' said he, 'the first thing

"'Dear me, dear me,' said he, 'here I have got supper, and 'twas one o' the easiest things in the world.'

"We were 'caught,' " smiled the old lumberman, "and we sat down to supper in good temper, and ever afterward we had Uncle Ned's proposition for a byword; we'd agree to do any living thing provided we could be 'waited upon."-Youth's Companion.

An Indian's Joke.

Indians extract no little quiet enjoyment from what seem to them to be oddities in the speech, manners and customs of white people. An Arapahoe stepped into the store of a trader one day to purchase some tobacco. The trader's son was in charge of the place. Now, this son was at that embarrassing stage of growth when the voice is changing, so that he never could tell whether tenor tones would issue from his lips or babylike falsetto or de profundis bass. On this occasion when the Indian asked for tobacco the youth's bass notes held the right of way, though they were speedily followed by ascending tones up to a squeaky falsetto.

He asked the Indian, "Will you have fine cut tobacco or a plug?" beginning in a growl and ending in birdlike soprano.

The Arapahoe listened gravely to this vocal variety and then without a smile reversed the process and, beginning with the youth's highest note and ending with his lowest, scaled, "I think I'll take some plug."-Southern Workman.

"Exercise and Rest."

What is the relation between exercise and rest? Work is that at which we must continue, whether interesting or not, whether we are tired or not. It used to be thought that the prime requisite of rest was the use of faculties other than whose involved in the labor of the day. But there is such a thing as fatigue which goes deeper than daily work. We can work so hard as to become exhausted-too exhausted for any kind of work. Perhaps this is will fatigue. It is coming to be regarded as fundamentally true that rest from such fatigue demands continuity; that, for example, four periods of fifteen minutes each of rest is not the equivalent of one hour's rest; that a man who goes on a vacation and takes half an hour of his business work every day is doing the same thing as the man who had a horse with a sore back. He kept the saddle on only a few minutes each day, but the sore did not have a chance to heal. Rest periods must be sufficiently consecutive to overcome consecutive fatigue.-Luther H. Gulick in North American Review.

Cheerfulness and Cholera. A cheerful disposition is held by some doctors to be the best protection against cholera. When this disease first visited Paris in 1832 a notice was issued advising the inhabitants "to avoid as far as possible all occasions of melancholy and all painful emotions and to seek plenty of distractions and amusements. Those with a bright and happy temperament are not likely to be stricken down." This advice was largely followed, and even when cholera was claiming over a thousand weekly victims the theaters and cafes were thronged. The epidemic was in some quarters treated as a huge joke, and plays and songs were written around it. Rochefort wrote a play, "Le Cholera Morbus," which proved a big success, and another production on the same lines, "Paris-malade," also had a long run.-London Chronicle.

KILLS PAIN

There may be seen along the roadsides in Central America a brown wren about the size of a canary which builds a nest out of all proportion to its apparent needs. It selects a small tree with horizontal branches growing close together. Across two of the branches it lays sticks fastened together with tough fiber until a platform about six feet long by two feet wide has been constructed. On the end of this platform nearest the tree trunk it then builds a huge dome shaped nest a foot or so high with thick sides of interwoven thorns. A covered passageway is then made from the nest to the end of the platform in as crooked a manner as possible. Across the outer end, as well as at short intervals along the inside of this tunnel, are placed cunning little fences of thorns with just space enough for the owners to pass through. On going out this opening is closed by the owner by placing The origin of this peculiar and limited | thorns across the gateway, and thus the safety of the eggs or young is assured.-Brooklyn Eagle.

THE MISSIONARY CHICKEN. By MRS. JOSEPH WAILES.

(Written for the RECORD.)

When Faith walked with her light springing step from her classroom into the main room of the Sunday School of which she is ever an inspiration, and began to speak, Jessica drew back in the shadow of the folding doors to watch her face, and caught her breath to listen-this fine lady who has so much self-command, and has crossed the ocean so many times, makes Jessica

The coin was dropped into the purse and forgotten until Jessica stepped into the car after church. As her fare slipped into the hand of the conductor she and boils. noticed the bright gleam of the new coin. Poor Jessica must needs stop the eyes. cold sores, cracked lips, chapped hands. Will he? Does he not remember this lady of small statue? He knows she is wont to alight from and board his car at this particular point, this fine Romanesque edifice of Port Deposit granite; for early in June as she was taking a handful of fragrant roses to this same Sunday school, she handed him several and said: "Sir, will you have a few of my

His adjectives tumbled out, as she placed them in his hands, and now he touched his cap and smiled as he handed back the new coin. It is she who in the quiet "thank you" almost caught up his self-same expression as he had said to her: "O! I am abundantly obliged!"

At the Sunday dinner table Jessica took the lord of the castle into her confidence, and counsel with advice was not slack. "How invest 5 cents for missions?" he said. "Why make caramels of course," with a vision of the many he had bought in the name of christianity. But not for Jessica was this plan good. "When do you set another hen, my dear? I'll raise a missionary chick and make a lot of money."

So Jessica buys two eggs, and that evening slipped one with the other fifteen under Mistress Rhode Island Red, as the lord of the castle stalked around the barn and said: "If one diesmight it not be the missionary chick?" But Jessica knows how to give it care. The other egg is to be hard-boiled and after a day and night of nourishment "under the wings" the yolk is fed to the little chick to give it a good start.

How many times, think you, a soft stroke was smoothed down the back with loving words, by Jessica to Mistress Rhode Island Red, during the three weeks of brooding? Only the pigeons overhead could tell you. With proper care and love the day arrived—when the mother with the flock did many things to bring delight to Jessica. About Shaving.

Shaving may seem a homely topic, lacking dignity, but on that very account it is important, for it is the common things which interest the mass of mankind and about which they know the least. We send our boys and girls to High Schools to learn a little Latin, algebra, geometry and mythology and never think of instructing them in such common things as the common air, common water, common sunshine and common life all about us-and all in the name of dignity. Let us, without more ado or apology, take the common act of staving as a text for a sort of lay ser-

Now nearly every man shaves and the majority of citizens don't remove the foliage from their faces with their own hands. They go to the barber and that is the end of the matter, except a little grumbling over a long wait, a too talkative workman and an occasionally bad razor. But when to shave, or how often, is not seriously considered by the avergae man. He solves the problem by shaving when he has time and as frequently as he feels his face presenting a stubble field appearance.

In that erudite paper, the New York Sun, a writer gives some sensible advice to the multitude who get shaved. As the masses wait some blessed Satarday night to hear the magic word 'next,' they can read with profit. and we trust with appreciation, the follow-

While it is generally admitted that tonsorialism of today is 'vastly superior to what it was at the beginning of the century, or even a quarter of a century ago, yet many erroneous ideas are still prevailling among the barbers, and especially so throughout the shaving community, as to the proper method of shaving. This lack of knowledge has caused much dissatisfaction and is also the result of so many ruined faces so apparent today. This annoyance is largely due to the fact that the custom of "twice-over shaving" is still persisted in. This is not necessary, as a clean shave can be secured just as good and with better results with the "once-over" method, providing it is done with precaution and with that aspect in view. This method permits the skin to retain its smooth and healthy condition and renders it less liable to the inoculation of germs or diseases. While the 'twice-over'' method is to the contrary for the reason that the first time over impression that the remainder will be gotten at the second time over, which usually is taken against the grain, and thus the natural oil is shaven out of the tated and inflamed to the extent that even a smooth shave is almost impossible without a renewed irritation. In spite of its inferiority it is commonly practiced. It should not be tolerated by the shaving public, and can only be overcome by them as it is universally practiced by the barbers. Our advice to the young man would be to enter the newspaper business if he likes it and has the proper spirit. There's plenty of room at the top, and we are not like the fox without the tail either.

True, we have great trouble in adding a column of figures. We don't blame any one for not being a bookkeeper, but that's because we can't add with any degree of accurateness. We know bookkeepers who can add six figures at once and play tricks with numbers that are marvelous. We have often wondered with admiration how a man can strike a trial balance with beautiful red lines running across his page.

We do not want to be a banker, because money bothers us.

We could not be a merchant, for if some one liked a piece of goods and wanted it badly the chances are we would give it away.

We would not be a lawyer, because from what we know of some corporations we have not much respect for lawyers, and we could not ask a jury to hang a man.

And, as we have had hard work cutting off a chicken's head, no doubt we would fail as a physician.

There is no use telling us we are not a litterateur, for we know that, but we modestly claim that we know something about the newspaper business, and we like it so well that we hope to die in the

Cy Milan, Who Is Playing Fine Game For Washington.

Washington baseball critics have been showering all kinds of praise on Clyde Milan, the star outfielder of the Senators, this season. Last year they were hammering him for his poor playing. Great things were expected of Clyde early last season, but as the campaign progressed be fell by the wayside, and last fall there was talk of the club parting with his services. But since the start of the 1910 campaign Milan has been playing grand ball. In fact, his all round playing has been the feature of many of the Senators' games. Manager Jimmy McAleer thinks that Milan is one of the most promising ball tossers in the country today. In another year he will make other crack outfielders sit up and take notice, says the Washington pilot.

Lesson VIII .-- Fourth Quarter, For Nov. 20, 1910.

THE INTERNATIONAL SERIES.

Text of the Lesson, Matt. xxvi, 36-56. Memory Verses, 38, 39-Golden Text, Matt. xxvi. 45 - Commentary Prepared by Rev. D. M. Stearns.

It may have been, as some think, not far from midnight when Jesus went forth with His disciples over the brook Kedron on His way to Gethsemane. We think of another night which in some small measure foreshadowed this one, when the king of Israel fled for his life across this same brook, accompanied by a few faithful followers, because of the rebellion of his son Absalom. In our lesson we see the true King of Israel about to be put to death by His firstborn (Ex. iv, 22) and about to enter into an agony the like of which was never before seen by men or angels on this earth. Possibly He had speken the words of John xv and xvi on His way to the garden and had prayed the prayer of chapter xvii after reaching the garden. Of this we cannot be certain. But now He leaves the eight disciples somewhere in the garden, and, taking Peter and James and John. He was withdrawn from the others about a stone's cast and began to be sorrowful and very heavy, saying unto them, "My soul is exceeding sorrowful even unto death; tarry ye here and watch with Me." Then, leaving the three. He went a little farther and kneeled down and fell on His face on the ground and prayed the prayer of verse 39. Luke says that an angel from heaven appeared to Him and strengthened Him, and, being in an agony, He prayed more earnestly, and His sweat was as it were great drops of blood falling down to the ground. He came to the disciples and found them asleep and said to Peter, "What, could ye not watch with Me one hour?" Watch and pray (verses 40, 41). He went away the second time and prayed the same prayer. Then He came again to them and found them asleep again and went away the third time and prayed the same words. Then He came the third time to His disciples and said unto them, "Sleep on now and take your rest; behold, the hour is at hand, and the Son of Man is betrayed into the hands of sinners." Luke xxii, 45, 46, looks as if when He returned to the eight He found them asleep also cheerfulness - "joyful," "gladness," and said to them: "Why sleep ye? Rise and pray lest ye enter into temptation." We can read it and write it and meditate upon it, but who can under-

What was the cup from which He asked if possible to be delivered and yet in the drinking of which He submitted wholly to the Father's will? Was it the same cup as that of John xviii, 11, concerning which He said, "The cup which my Father hath given me, shall I not drink it?" It looks as and His truth endureth to all generative did not know what he was tions." doing when he killed the Lord Jesus, for it is written in Heb. ii. 12, that Jesus took a body or flesh and blood that through death He might destroy him that had the power of death-that is, the devil. We know that he tried to kill him at His birth, and possibly he tried to drown Him in that storm on the sea. Perhaps he thought that if he could kill Him before he reached the cross he would frustrate the whole plan of redemption. If that be so and we can consider Gethsemane as the devil's attempt to kill Him in the garden, then the Saviour's prayer may have been a prayer that He might not die in the garden and leave His great work unfinished, but that He might have victory in the garden and go on to Golgotha and finish His work of atonement for sin. That would explain the reason why an angel strengthened Him. If we are right in this supposition, then His willingness to die in the garden, if His Father should so will it, and leave His work unfinished in very sight of the goal is the greatest instance of submission on record. To be willing not to succeed with success in sight-who ever heard of such a thing?

But the cup of dying in the garden passed from Him, and he was strengthened supernaturally and went on gladly to drink the cup which His Father had prepared for Him. In that light listen to Heb. v. 7, "Who in the days of His flesh, when He had offered up prayers and supplications, with strong crying and tears, unto Him that was able to save Him from death and was heard in that He feared." In I John v. 15, it is written, "If we know that He hear us whatsoever we ask we know that we have the petitions that we desired of Him." He prayed to Him who was able to save Him from death, and He was heard; therefore He was saved from death in the garden in order that He might finish His work of atonement by dying on the cross for our sins. If these thoughts are wrong may the Lord forgive us for daring to tolerate them, but if they are of Him may He bless them and grant us victory to do His will and perfect submission to it. Now see the agent of the devil daring to kiss our Lord, and behold our Lord submitting to it knowing him to be who and what he was. Simon Peter would have done better without a sword, but | young people usually outside the in how many blunders of his and ours has our blessed Lord remedied! CHRISTIAN ENDEAVOR.

Prayer Meeting Topic For the Week Beginning Nov. 20, 1910.

Topic. — How does God want to be thanked?—Ps. c. 1-5. (Thanksgiving meeting.) Edited by Rev. Sherman H. Doyle.

In selecting a portion of the Scripture upon the subject of thanksgiving we naturally turn to the Psalms. Here David and the other Hebrew song writers pour out their soul experiences. Moreover, David especially enumerates the blessings he has received from God and is constantly thanking and praising Him for them.

In this respect as in many others we should emulate the example of the great psalmist.

The One Hundredth Psalm is one of the most familiar of the Psalms, and its five verses are one continuous call to praise and thanksgiving.

In this respect it should be an inspiration and a companion to us in life. God is worthy of constant praise and thanksgiving. "It is a good thing to give thanks unto the Lord, * * * to remember His loving kindness in the morning and His faithfulness ev ery night.'

God wants all to praise Him. The psalmist writes under inspiration and thus speaks for God when he calls upon "all the land" to praise Him and be joyful before Him. "Make a joy ful noise unto the Lord, all ye lands.' This can only be done by the inhabitants of the lands who are here in cluded in the word "lands." The lands, the material earth, cannot praise God. but the people can, and all lands sug gests all peoples, nations, kindreds and tongues. In these we are included and should do our part in obeying this call to praise and thanksgiving to God.

God wants us to praise Him in serv "Serve the Lord with gladness." Thanksgiving of heart and tongue is an essential form of praise, but the true test of real gratitude is a life of serv ice for God. We must do what He wants us to do and be what He wants us to be. Thanksgiving must result in thanksgiving or it is plainly evident that it lacks sincerity and genuineness

God wants us to thank Him in the public congregation. "Enter into His gates with thanksgiving, and into His courts with praise; be thankful unto Him and bless His name." Publicly as well as privately we should praise God. This should be the regular prac tice of our life. The Lord's day should always mean public worship in His

God wants us to thank Him cheerfully. This idea is as a chain throughout this psalm. We are called upon "to make a 'joyful noise,' " "to serve the Lord with 'gladness'" and to "come before His presence with 'singing." How the changes are rung on "singing." The basest form of ingratitude is a begrudging and sulking thanksgiving. True thanksgiving must be cheerfully and joyously expressed or it will fall upon deaf ears and produce no joyous responsive notes in the heart of the one for whom it is in-

God wants us to thank Him for what He is and does. He is worthy of all our praise, for He the Lord is God. He is good. "This mercy is everlasting. tions.'

A Rise In Mission Gifts.

For some years the Dunmore, Mass., Presbyterian Christian Endeavorers gave \$25 a year for missions. The money was raised with difficulty by assessing each member \$1 a year. Two years ago a friend promised to subscribe \$25 to the missionary fund it the society would raise \$100 during the twelve months. The missionary committee got together and arranged to take pledges to be paid monthly. The society responded nobly, members pledging from 5 to 50 cents a month Under a portrait of Dr. Jessup of Syria, for whose support the society was working, a pledge chart was hung Opposite the names of the "pledgers' twelve divisions were marked off, and each month the treasurer placed a cross (not the amount of the pledge) opposite the names of those that paid At the end of the year the society had \$125, and the gifts for home work were larger too. The same plan was tried a second year. This time \$200 has been collected-\$175 more than two years ago. During the past twelve months, writes Mr. John G. Moffat, the society also raised \$197 for home work This is only the money side of the question. Rich spiritual blessing has come to the workers, and one young woman has decided to devote her life to missionary work.

A London President's Plans.

Rev. F. B. Meyer had not been bac in London after his trip to America four days when he met the executive of the Christian Endeavor council and planned with them for his work nex fall as president of the London Chris tian Endeavor union. He hopes to hold fifteen great conferences for young people on Saturday afternoons and evenings, and experts will speak on such subjects as "Living In and Living Out," "Employment and the Lack of It" and "The Use of Hall Holidays." These meetings will be thoroughly organized, and an attempt will be made to reach thousands of fluence of Christian Endeavor. Dr or can touch the life of young men a strate the truth of this.

MARNA'S MISTAKE

It Didn't Stand In the Way of a Happy Wedding.

By MARTHA M'C .- WILLIAMS.

"You old poke! Take that for being as Trevor went along an overgrown patch to reach his uncle's house. With the words came a handful of rose petals, crumpled, damp and deliciously fragrant. It had rained all day, clearing just before sundown. The rain had kept him prisoner at the inn three miles away. He had meant to reach Briarlaw early in the morning instead to lose everything." of thus upon the edge of dusk. The rain had sent the creek all out of its banks. Thus he was coming to his journey's end afoot rather than behind his prancing blacks. The footbridge defied the flood. That for carriages was swinging perilously in the rushing water. He could not rest until he had seen his uncle. Something had to be settled out of handsomething vital to his whole future.

He looked about him. The dusking greenery betrayed no human presence, but the mocking voice went on: "You're a fine fellow! Upon my word, if you had kept me waiting five minutes longer I should have marched straight back and said to my pastors and masters, 'Please, sirs I'm good now-quite ready to marry Mr. John Trevor' "-

"Oh, I say! Hold on! You-you must be Miss Lee-Marna-of whom I've heard, and I'm John Trevor," that gentleman interrupted, his face scarlet. The shrubbery at the right trembled violently; then out of it burst the very prettiest girl he had ever seen, who said, her eyes blazing: "And you have come here to marry me! Well, I can tell you now I had rather die than be your wife!"

"Let's shake hands," John said jovially. "It appears we're in exactly the same boat. I have got to see my Uncle John and be off, because the dearest girl in the world will be whisked away to Europe, clean out of reach, unless I can manage to marry her all in a wink."

"Oh, how jolly!" Marna cried, giving him both her hands. "If you'll only run away I can wait and have a church wedding, with bridesmaids and flower girls and everything. It would be horrible to miss them, but there seemed nothing else to do, so Billy Martin and I have everything all ready. Come! We won't wait for him any longer. I dare say he is water bound, but he ought to have swum the creek, considering. Don't you think so?"

"Undoubtedly. I am sure he doesn't deserve you, letting such a little thing hinder him," Trevor said, still holding her hands. "You mistook me for him, so we must look a little bit alike. But I disown the likeness. You would not have had to wait for me, not if the stars had fallen."

"Ahem! Suppose that other girl heard you now," Marna said wickedly, her lids lowered, a naive smile lurking about her lips. John pressed her hand and drew it upon his arm, saying only: "Keep close to me. The path is narrow, and I mustn't let you get wet." But Marna appeared to feel sufficiently answered. She smiled more winsomely than ever at him and said as they came out in the clear lawn, "Cousin John-we are cousins, you know; your uncle is my stepfather as well as guardian-will you do something for my asking and not misunderstand?"

"Certainly," Trevor said, smiling himself. Marna was silent for three breaths, then said hurriedly: "Don't say anything about anything until morning. Poor Papa Trevor doesn't sleep well at the best of times. He has been worrying all day about your delayed arrival, and if you let him know the upsetting of his most cherished plans he won't get a wink tonight and will be crosser than two bears tomorrow."

"Does he know about Billy Martin?" Trevor demanded. Marna looked at him, amazed.

"Oh, dear, no!" she said. "If he had known, why, I shouldn't have been out there waiting. Papa Trevor has a hab-

it of having his own way' "It's a family trait," Trevor interrupted, stealing an arm about Marna and kissing her cheek. She brushed away the caress as though it were some slight annoying insect and went on: "He couldn't have known, because, you see, I did not really know myself until yesterday after your telegram came. Then-well, it was any port in a storm with me. I don't really, truly care about Billy, but I do love my own way as well as though my name were Trevor"-

"I see. But was Billy Hobson's choice?" Trevor interrupted wickedly. Marna frowned at him, saying: "The idea! Now you are horrid. I have a dozen beaus, but it happened Billy was the only one right on the spot. And you'll admit there wasn't much time for planning when Papa Trevor shouted out to me: 'Marna, telephone for the rector and the wedding cake day after tomorrow. Is there anything else needed? John gets here in the morning, and you had better go to packing your trunks. I mean he shall take you abroad. There you'll have a chance of getting fairly ac-

quainted with each other.' "H'm! That was a close call. Did you pack?" Trevor asked, his eyes twinkling. Marna tossed her head the least bit as she answered: "Of course; packed everything, just as if I knew I was going to die. Mamma would have trouble enough over my going without having that on her hands. Be-

sides, there are such loads of pretty things. Papa Trevor has been a real fairy godfather ever since he took a notion to marry us off this way. I knew if he didn't see them he wouldn't remember them. Mamma was safe to send the trunks after me. But if he čid see them he'd most likely make a bonfire of them, and that would be too

bad for anything.' "Quite too bad. You made me feel utterly conscience stricken. I didn't so horribly late." a girl's voice said dream his heart was so set on this plan," Trevor said. After a minute he burst out hotly: "But he has only himself to blame. He wouldn't let us meet. This used to be my home, and he has kept me in exile all the seven years since he married your mother. He has brought me up to regard myself as his son and heir, and now unless I marry whom he chooses I am

"You seem to think it would have been a case of 'I came, saw, conquered," Marna said, her eyes dancing. Trevor turned suddenly upon her. "If you could put up with a Billy Martin for the sake of your own way, I don't think you would be quite flint to me." he said almost angrily. He truly loved his uncle. He was, moreover, proud of his name and the consequence attaching to the big Trevor fortune. It hurt to have this adorable Marna flout him when he was thus at grips with hard fate. She was adorable; so adorable, in spite of fealty to the other girl, it gave a sharper edge to his perception of loss.

"Indeed, you are right. I might have chosen you if it had been made a matter of choice," Marna said pensively, her head a little aside. They were nearing the open hall door, through which there shot suddenly a broad stream of white light. It fell full upon them, throwing them up strongly against the background of leafy darkness. Somebody upon the piazza shouted with joy at sight of them. Under cover of the shouting Marna said, by this time plaintive, "If only it was not for that other girl, but I always play fair."

"So you've outwitted me, you young villain!" John Trevor. Sr., said, wringing his nephew's hand. "I never meant you to see that pretty baggage there until I was ready to give her to you for good and all. You know your way about. Trot along. You'll find your room exactly as you left it when you went away a boy.'

"Let me be still a boy for this one night, Uncle Jack," Trevor pleaded, keeping hold of a tremendous elderly hand. Papa Trevor wagged his head, saying: "Aye, aye, lad! But remember you must wake up, ready to play a man's part."

Trevor slept badly and woke late to find the world full of sunshine and singing birds, to hear his uncle shouting impatiently at the men mowing the lawn and across the blurred noises, high and clear, the silver tinkle of Marna's laughter. He went downstairs like one in a dream. There was a hideous black cloud over all the morning brightness. As he came out on the steps a messenger on a bicycle halted there and handed him a yellow envelope, saying apologetically, "Shure, sor-r, we thried to git ye this bit the night, but the divil was in the wather; hesides the h've that writ it out sid the news would kape.'

Mechanically Trevor opened it and

I sail today. Marry Paul in London. He did not deceive me. His fortune does not depend on anybody's whim. No longer yours, MARY.

Just then Marna danced up to him, her hands full of dewy roses. He caught both her wrists and said huskily: 'Marna, you mistook me for Billy Martin. Can't you do it again long enough to marry me?"

For a minute Marna did not answer. She looked down, her breast heaving, ber cheeks rivaling the richest among her roses, and said at last, shyly lifting her eyes: "You are not quite accurate, Cousin John. The fact is, Billy was my mistake."

Of course they were married, as Papa Trevor had ordained. They lived happy ever after, but they did not go abroad until they themselves chose.

In Cold Storage.

A cold storage room on board a steamer is a valuable adjunct to the housekeeping department, but no passenger would prefer such an apartment to his stateroom. Robert Woolward in "Nigh Sixty Years at Sea" tells of the experience of a ship's butcher which nearly ended in a trag-

"Wide Open" in Baltimore County.

The law was openly and daringly violated, in Baltimore county, last Sunday, notwithstanding the special order of the Governor that the Halethorpe aviation grounds should remain closed. A number of arrests have been made, but the whole affair is likely to result in the imposing of small fines. Nearby saloons also sold liquors, through open doors, to whoever desired them, evidently with-out any fear of the police. The concert halls had large fires in the stoves, and as long as the money lasted the patron could buy his fill of liquor, whether it was a lone girl or a group of men and women. There was no pretense of covering up the violations of the law.

On the Eastern Avenue road, almost within a stone's throw of the Canton Police Station, many saloons were open There was no need for anyone to go thirsty. It was rumored that "word was sent down the line" to the saloon-keepers to close up. If it was, little heed was paid to the warning. Many saloons were open in Highlandtown. The only obstruction to entrance was that patrons should go through the side

Pensioners Are Fast Dying Off.

Washington, Nov. 7.-The pension roll f the Government at the close of the ast year showed a decrease in the num r of pensioners of slightly more than 25,000, according to the annual report of the Commissioner of Pensions, just submitted to Sccretary Ballinger.

The same report shows that the total of the pension roll for the year amounted to \$158,332,391, a decrease from the pre-

vious year of \$2,350,478.

There still remain on the pension roll 921,083 wards of the Government despite the fact that during the year 51,000 pensioners died and nearly 3,000 more were stricken from the lists for other reasons. During the period 29,000 persons were added to the rolls.

The number of survivors of the Civil War on the pension roll at the close of the year was 562,615, a net reduction during the year of 31,345. The total number of survivors whose names were dropped from the roll on account of death was 35,312. The total number of soldiers and saliors of all the wars drawing pensions at the close of the year 602,180, and the number of wilows

and dependents was 318,461.

There is one daughter of the Revolutionary War still on the roll, but no other pensioner. There are 338 widows of the War of 1812; 1560 survivors and 2822 widows of the Indian wars; 2042 survivors and 6395 widows of the Mexican War, and 22,783 survivors of the Spanish-American War on the roll. Also there are 13,180 invalids of the regular army and navy drawing pensions.

Should no new pensions be enrolled and none drop out, \$158,332,391 will be required to pay all pensioners for the current year. This is a decrease from the previous year of \$2,350.478.
