TANEYTOWN, MARYLAND. FRIDAY, AUGUST 27, 1915.

No. 9

### **BRIEF NEWS NOTES** OF GENERAL INTEREST

Gleaned from the County and State and our Exchanges.

Hagerstown has a population of 24,000, according to a directory census just completed. At the present rate of growth of the city it is predicted that the population will be 30,000 when the next Federal census is taken.

---

Fourteen steamers, with a total gross tonnage of 47,698, were sunk by German submarines August 19 and 20. The largest of them was the Arabic. Ten of the vessels were British and four sailed under neutral flags.

One of the largest mortgages ever placed on record in the Frederick County Court House was reordered by Deputy Clerk Millard N. Nusz. This is the mortgage of the Pennsylvania Railroad Company to the Girard Trust Company and William N. Ely, trustees, for \$65,000,000. The recording fee for this mortgage was \$84.25. It is in printed booklet form and consists

Rev. George I. Uhler, of Wilmington, Del., has accepted a call to the Jefferson charge of the Lutheran church, composed of the Jefferson, Feagaville and Mt. Zion churches, which has been without a pastor for some time. He will take up his new work some time in September. Rev. Mr. Uhler is married and will move his wife and several children to Jefferson when he takes over the charge.

--After several months of idleness, the woolen mills at Oakland, Carroll county, resumed operations on Tuesday. About 150 employes are at work and this force will be increased. When in full operation 200 hands will be employed. The looms will turn out all-wool cloakings, as John Melville, who purchased the mill a short time ago, has a large order from the time ago, has a large order from the Italian Government for goods to make overcoats. This order will occupy the mills until the middle of October. As soon as it is completed the mills will manufacture blankets for the Allies.

---A reunion of those members of the Belt-Parrish family living in this section of the country was held at Emory Grove on Thursday. It is an annual affair and similar sessions have been held for the last 17 years. The family is so large that they have formed what is known as the Belt-Parrish Family Reunion Association and sessions are held at least once each year. John Dorsey Belt, of Westminster, is president of the association. The members of this family can trace their lineage back as far as the reign of King Richard II of England in 1387. Members of the family numbered among the first settlers in Maryland.

Notice was served this week, on certain Democratic leaders, that President Wilson will face a fight in the next National convention unless steps are taken to correct reports that Mr. Bryan was forced out of the cabinet. While former Secretary Bryan has consistently maintained that the sole reason for his resignation was his inability to subscribe to the course mapped out by the President in connection with the Lusitania affair, believing that this course would lead to war, certain newspaper writers and magazine editors, claiming to speak with authority, have declared that there were domestic Issues over which the two men were about to break or had broken.

---For more than thirty years the offices of clerk of the court and registration of wills of Washington county have been filled by Democrats. This record will continue for at least another six-year term, for the Republicans of that county have made no nominations against Edward Oswald, the present clerk of the court, and Thomas E. Hilliard, who for nearly forty years has served as register of wills of that county. This record of re-electing two Democratic officials to the best paying offices in the county without opposition is unique to say the least, especially in view of the fact that Washngton county is close politically, sometimes electing the entire Republican ticket by safe majorities.

Colonel Roosevelt in a recent open letter said he regarded the sinking of the Lusitania and the Arabic and the attack on the Gulflight and the Falaba as Germany's replies to our diplomatic notes of protest against her submarine warfare and the destruction of American life, He declared Germany has in this way "arrogantly answered" our protest, and said mere severance of diplomatic relations will make no difference to the German Government. He says, "The time for words on the part of this nation has long passed, and it is inconceivable to American citizens who claim to be the inherfors of the traditions of Washington and Lincoln that our governmental representa-Tives shall not see that the time for deeds has come.'

### -000 "Miracle" Wheat.

The Kansas State Board of Agriculture Protests against the use of the Board's name in connection with the sale of a variety of wheat called "Miracle." The Kansas Board disclaims any responsibility those who buy this wheat for seed They say they have never recommended it to anyone. Prof. L. A. Fitz of the Kansas Agricultural College made baking and mills and milling tests of this wheat, and re-Ported as follows: "The sample in question showed fair qualities for soft winter wheat. It milled very soft. find no reason for recommending it over

and above the average commercial lots of wheat purchased in southeastern Kansas. Possibly the miracle does not lie so much in the qualities of this variety as in other phases of its exploitation.

Carroll County Sunday School Day.

The eighth annual convention will be held Thursday, Sept. 2nd., under the auspices of the Carroll County Sunday School Association, in Dutch pic-nic grove, near Deer Park, on State Road, 4 miles south of Westminster.

It will be a convention and re-union of forty-three evangelical ministers in active service in the county, 106 evangelical Sunday schools with a membership in all departments of about 14,000, population of county being 33,934.

An excellent program has been arranged. Singing will be under the leadership of an efficient chorister.

The morning session will begin promptly at 9.30 a. m. Among the speakers will be Mr. Robert L. Hooper, Acting Secretary of the Md. S. S. Ass'n, and Miss Maggie S. Wilson, Field Worker of the same association, both of Baltimore.

Among the subjects that will be pre-Among the subjects that will be presented will be "The Superintendent and his program," by Robert L. Hooper. "A Teacher Training Lesson Taught," all the convention a class, and Miss Maggie S. Wilson the teacher. Does it pay: The Cradle Roll; the Home Deservers the Teacher Training Lesson and Miss Maggie S. Wilson the teacher. partment; the Teacher Training Department; the Adult Organized Class Department. These subjects will be presented by the department superintendents of the county association. Making Temperance Teaching Attractive, will be presented by Rev. S. C. Hoover, of Silver Run. Par-liament: Reaching Men and Women Through the Sunday School.

The ladies of Trinity Lutheran church will serve hot coffee, sandwiches, etc., from 12 m. to 1.30 p. m., or a lunch as a whole, for 15c.

Prof. J. G. Dailey, of Philadelphia, author of the song, "A Saloonless Nation in 1920." "I'll be there"; "The Hero of the Cross' and other songs, will be at the Convention. Being a chorister of national repute, it will be a rare treat for the people of Carroll County to have him present. "Saloonless Nation Songs" will be furnished by the Association, and hundreds will sing the great national song,

Every Sunday school in the county has been requested to send delegates, and this being an age of auto travel, if the day is fair it will do doubt be the largest and most representative gathering of its kind ever convened in the county. Should the day be inclement, the convention will be held in Trinity Lutheran church. Elect officers for the ensuing year, etc. G. W. Yeiser, Pres. Co. Ass'n.

> ----Littlestown Water Impure.

The source of the water supply at Littlestown has been condemned by the state authorities. Two wells in the outer part of the town furish the water, and upon examination by the state chemists it was found that this was not fit for drinking purposes, Dr. Samuel Dixon, of the health department of the commonwealth has condemned the water.

It was found by tests that one of the wells from which the supply comes was polluted by surface waters that found their way into the cistern.

At the meeting of the town's health board Wednesday evening it was decided to want the residents that the water must be residents that the water must

to warn the residents that the water must Clinton Thomas be boiled for drinking purposes until the J. F. Utermahle wells can be so repaired that the waters will no longer contain impurities that endanger the health of the citizens.

### -000 An Eighty-two Year Old Poet.

The RECORD has received from Mr. J. R. Miller, of Harrisburg, Pa., grand-father of Rev. Seth Russell Downie, a lengthy but interesting communication from which we separate the subjoined poem. Mr. Miller is past 82 years but is still active in a literary way, furnishing articles, both prose and poetry, for the press, applying to himself the title "Foxy Grandpa, the old poet of the Susquehanna." He is evidently very fond of his "little preacher grandson" as well as

justifiably proud. The following production, he says, was written on the spur of the moment.

I have visited your grand old State, Maryland, my Maryland,
I have seen some great high monuments—none finer in our land.
I have stood and gazed in wonder, at a marble shaft so tall,
There stands the immortal Francis Key, the hero of them all.

He wrote "Star Spangled Banner," the emblem of the free,
And today it waves triumphant, far out o'er
land and sea.
It guards the bold mariner, wherever he may Whether in a foreign land, or in his peaceful home

You dear old Flag of Freedom, from whence You dear old Flag of Freedom, from whence derive your name
That you should stand so proudly, in all our Halls of Fame?
Because, I formed the neuclus, of millions brave and true
Who rallied around our standard, that Flag, red, white and blue.

Once! I waved so fearless, on old Fort Sumpter's wall,
I was assailed by treacherous hands, and
pierced by rebel ball.
Rob't Anderson surrendered, but Old Glory
never fell

And again it waved triumphant, on the ramparts of Fort Hell. Then carried step by step, all through the burning pines,
You could see its bright stars floating, all along
the battle lines.
Then forward it was carried, to court house
Apportantox
Where Robert Lee surrendered, and dropped
his battle ax.

Today we stand united, with no internal strife— We must ever be united, to save a Nation's We know no North, we know no South, no East or isolated West;
Of all great lands upon this earth, we are the very best.

We are not a warlike people, of this we sure can boast;
Just keep away your dynamite, and don't blow up our coast.
Be careful Woodrow Wilson, Just keep a level

How can we stop this cruel war, and then have peace instead. 'Let no more the war cry sever, nor rivers with

blood be red;
We have banished our anger forever, when we laureled the graves of our dead.
Under the sod and the dew, waiting the judgment day,
Tears and love for the Blue, Love and tears for the Gray."

### CANDIDATES FILED FOR THE PRIMARY ELECTION

Now Up to the Voters to Name Candidates for Election.

The Board of Election Supervisors sat, on Tuesday, for the purpose of receiving final applications for place on the primary law ballot, the last date named in the law. There were a number of late applicants, chiefly for place on the State Central Committees, and several with-drawals for other nominations. These candidates have until within ten days before the election to decide whether they will have their names placed on the ballot; but no other names can be placed on the ballots, except in cases in which not a sufficient number of candidates have ap-

The following is a complete list of the candidates of both parties, except candidates for County Central Committee: DEMOCRATS REPUBLICANS

For Governor Blair Lee
C. Harrington
O. E. Weller
Wm. T. Warburton For Comptroller Hugh A. McMullen Chas. F. Macklin Wm. B. Copper Robert F. Duer

For Attorney General Wm. M. Maloy Albert C. Ritchie Albert A. Doub

For State Senator W. H. D. Warfield R. Smith Snader For Clerk of Court Chas. H. Diller Oscar D. Gilbert

Jos. B. Boyle Edward O. Cash F. A. Crawford Michael A. Doyle N. A. Hitchcock Geo. W. Motter Wm. T. Wilson

For Register of Wills Samuel Miller William Arthur Chas. C. Gorsuch Percy H. Shriver

Geo. L. Stocksdale

For House of Delegates (Four to be chosen) John B. Baker

E. Frank Ely Chas. B. Kephart Jesse Leatherwood Nathan G. Dorsey J. A. Frederick (One to be supplied) G. Fielder Gilbert T. M. Kimmel Ivan H. Sayers Walter I. Wells

For Sheriff

John L. Freyman Edw. M. Mellor Harry K. Oursler Jas. M. Stoner Jesse F. Stem

For States Attorney Chas. O. Clemson Theo. F. Brown Michael E. Walsh Wm. L. Seabrook For Judges of Orphans' Court (Three to be chosen)

R. Norris Caple Solomon Myers Harry K. Shaeffer M. J. M. Troxell

F. Utermahlen

For County Commissioner F. J. Brandenburg B. F. Stansbury James D. Haines Wm. N. Yingling

For County Treasurer O. Edward Dodrer Martin D. Hess Wm. W. Shamer

For State Central Committee (Three to be chosen) Arthur W. Feeser (Five to be chosen S. Luther Bare W. Hoffacker Wm. H. Bowers John Klee Thos. J. Coonan J. H. Cunningham

Wm. K. Eckert . B. Englar W. E. Kolb A. E. Lambert C. E. Nicodemus Walter R. Rudy Jas. L. Unger Arthur M. Zile

There will be a very hot fight in both parties for the nominations, especially for County Clerk and Register of Wills, while more than the usual interest in attaching to the election of the State County Central Committees, or for the so-called party "organization."

There is but one vacancy to be filled, that of an additional candidate on the Republican ticket for House of Delegates an office that is not largely aspired to, because of the arduous character of the duties of the office, and the small pay

onnected therewith. Many Republicans are of the opinion rhat Herbert R. Wooden, who in the interest of party harmony, withdrew from the contest for the Senatorship, should agree to accept, and be named to, this

In the Democratic camp there is a pretty general line-up of forces, involving the state nominees as well as the county, and walk-overs are not in evidence anywhere. There will also be a fight in many districts over the local committees.

### Your Watch Is A Compass.

Most men who own a watch, think they know all about it. They have the number fixed in their memory in case it is stolen. They could probably pick it out from five other watches with their eyes shut. But how many men know that their watch is a compass and will tell north from south as accurately as it will tell the time of day? Stanley, the exgroped his way through the dark continent and met a Belgian sailor on the

Every watch is a compass. If you point the hour hand to the sun south is exactly half way between the hour and the figure XII on the dial. Suppose for instance, it is 4 o'clock. Point the hand indicating 4 to the sun and the II on the watch is exactly south. If it is 8 o'clock point the hand indicating 8 to the sun and the figure X on the dial is due south. No man need get lost if he carries a watch.

To California and the Expositions.

(For the RECORD.)
Miss Annie Mehring, of Keymar, has Miss Annie Mehring, of Keymar, has recently returned from a most interesting and enjoyable trip to California and the Expositions. She was accompanied by her sister, from Crawfordsville, Indiana. During the itinerary they crossed over portions of the following states: Maryland, Pennsylvania, Ohio, Indiana, Illinois, Missouri, Kansas, Oklahoma, Texas, New Mexico, Arizona, California, Nevada, Utah and Colorado.

da, Utah and Colorado.
Some of the most notable side trips that may be mentioned was a visit to the may be mentioned was a visit to the grand Camyon of Arizona; an auto ride from San Diego, California, to Finana, Mexico; a trip to Catalina Islands in the Pacific; ascension of Mt. Ptalynia by steam and gravity trains, over the most crooked railroad in the world; Muir woods celebrated for its large trees; Burch's Sunken Gardens; San Gabriel Mission, Cranston Ostrich farm, orange, lemon. Cranston Ostrich farm, orange, lemon, walnut groves and vineyards galore, and on the homeward journey a stop off at Salt Iake City, Utah, Colorado Springs, and Denver Colorado, with all their at-

They traveled over six thousand miles by train, trolley, boat, auto and carriage drives, and had some thrilling experiences, as a slight earthquake at San Diego, a terrific electric and hail storm in Colorado that caused the train to stall on account of slippery rails and had to be taken over the mountain in sections, necessitating a delay of several hours. Near Fort Riley, Kansas, flood conditions existed, the tracks being covered for some distance to a death of about two feet and distance to a depth of about two feet, and yet, they neither saw nor met with a sin-

gle accident.

On five different occasions they met ladies touring alone. One from Holland has been  $2\frac{1}{2}$  years leisurely travelling around the Globe, and has not nearly completed her journey. They think California has not been over-rated as to its beauty, and conclude that the Expositions alone are worth a trip across the con-

72 Candidates in Frederick.

Frederick, Md., Aug. 24.—Seventy-two candidates have filed certificates for 17

county offices, as follows: Clerk of the Court—Republicans—John P. T. Mathias, Thurmont, and Eli G. Haugh, Frederick. Democrats—Lorenzo E. Mullinix and Frederick W. Cramer,

E. Mullinix and Frederick W. Cramer, both of this city.

Buckeystown.
State's Attorney—Republicans—Aaron
R. Anders and Fabian Posey, Frederick,
and Dr. A. A. Lamar, Middletown. Democrats—Samuel J. Lewis and Edward J. Smith, Frederick, and H. Kieffer De

Smith, Frederick, and H. Kleher De Lauter, Braddock.
Sheriff—Republicans—Casper Ramsburg, Harmony Grove; Harry Tripatoe, George W. Shoemaker, William C. Rhoderick and Charles H. Klipp, Frederick, and Marion C. Miller, Woodsboro. Demonstrate Largest A. Loves Engloyees. ocrats—James A. Jones, Frederick; Roy E. Leatherman and Robert E. Cromwell, both of Walkersville.

Republicans—Eugen Harrison, Brunswick, and George L. Kaufman, Frederick. Democrats—H. Dorsey Etchison, Frederick, and McGill

Belt, Dickerson.

Judge of the Orphans' Court—Republicans—David M. Whipp, Luther Guyton and Charles H. Butts, Burkittsville; Jeremian Dutrow, Thurmont; George T. Rhoderick, Frederick, and John L. S. Aldridge, Woodville. Democrats—Howard Magruder and Prof. George Edward Smith, Frederick; Louis C. Etchison, Jefferson; William A. Barton, Johnsville, and John T. Joy, Graceham.

County Treasurer—Republicans—Chas. Ogle, Monrovia; Lloyd M. Koogle, Myersville, and Roger G. Harley, Yellow Springs. Democrats—Charles Harper, Lewistown, and Alfred W. Gaver, Middle-

County Commissioners-Republicans-George C. Huffer, Middletown; Thomas Haugh,near Frederick; Frank Hightman, Petersville; Charles J. Angleberger, Mount Pleasant, and Harry Witter, Frederick. Democrats-William H. Van Meter, Brunswick; Granville L. Wachter, Mount Pleasant; Calvin R. Coblentz, Middletown; Harry Wood, New Market,

and A. Windsor Davis, Urbana.
House of Delegates—Republicans—Edward S. Delaplane and Millard F. Perry,
Frederick; Howard D. Kefauver, Burkittsville; Richard G. Molesworth, Mount Airy; William P. Mohler, Lewistown; D. Charles Flook, Petersville; M. F. Rice Jefferson, and C. L. Smith, Walkersville. Democrats—August T. Brust, Frederick; Calvin H. Stull, Buckeystown; Eugene Wachter, Adamstown; J. England, Urbana; Thomas S. Lee Horsey, Petersville; Harold D. Hammond, Woodsboro, and A. C. Compton, Bruns-

County Surveyor-E. C. Crum, Rep. -000 Thinning Fruit Pays.

The man who puts on the market inferior fruit does an injury to both himself and the fruit business.

Fruit can be too large for the market, but it seldom is; and the apple is perhaps the only one which can be grown too

Thinning is the only recipe for large, plump, high-colored, juicy fruit. It pays. Nobody wants undersized or misshapen fruit. A crate of little peaches never brings as much as a crate of big ones. So it pays to reduce the number of crates by thinning if the quality is thereby much improved. Often, however, there will be just as many crates as there would have been if no thinning had been done. Sometimes there will actually be more. The large fruits are more cheaply picked,

packed, and handled. Thinning saves the fertility of the orchard. Not very much fertility is taken away in the pulp, but the seeds draw heavily on it. In other words, the man who thins takes off more good fruit, gets from exhaustion.—Farm and Fireside.

### HANOVER HIT HARD BY A BIG CYCLONE

The Damage of a Minute Runs Into Many Thousands.

A terrific cyclone devastated Hanover, Pa., last Saturday evening, but fortunately without the loss of a single life. A description of the destruction in a short newspaper article would be impossible, for a great part of the city was wrecked, only as a cyclone can do it, by unroofing, and in some cases dismembering, buildings, uprooting trees, and in lifting up and throwing down objects of all kinds in a very incomprehensible way.

The total loss is variously estimated, but will likely reach \$200,000, or over, on which very little insurance was carried, as the Hanover section had heretofore been immune from storm losses. violence of the storm can be better imagined through the statement of fact that in its greatest force it lasted less than a minute

The storm centred in the small area between the west side of Baltimore St., and Frederick St., but extended with varying violence to the whole city.

The Hanover Glove Co. building is a total wreck, its contents being scattered far and wide.

The store of Wentz Bros. & Frey was partly unroofed and the rear walls blown in. Loss up in the thousands. The walls and roof of the Adans Garage were shattered.

The Hanover Heating Plant was leveled to the ground. The Keystone Variety Works had part of the second story blown away, and

stock damaged.

The J. W. Gitt store had broken windows, part of roof blown off, and walls

bulged inwards.

The Elk's Home was damaged from \$1500 to \$2000. The Hotel O'Bold generally damaged, perhaps to the extent of \$5000 or \$6000.

The N. B. Carver & Son store building

had part of roof torn off. The residential section was also hard hit, there being hundreds of cases of damage ranging from \$5.00 to \$1000.00

> -000 Select the Pure and Faithful.

In the RECORD of Aug. 20th we found a reminder that we have many law-breakers in Union Bridge, who are openly defying the Local Option law, and we know that the Local Option law, and we know that this is the experience at many places. People talk of "personal liberty!" Yes, we have personal liberty as long as we do right. Why is it that this law is broken as it is? Who is responsible to see that

it is enforced? Shall we allow the enemy to openly violate the law that went into effect May 1st? Something must be wrong, or we would have our laws effective, and have these violations of them brought to a stop. If it is the fault of our officers, let pledge themselves to enforce the law to the letter.

Let us not have Carroll county a laugh ing stock for our "wet" counties. Don't let us have any half-way measures. We know some who feel that such things will be, but why should it be so? misdemeanors are punished, why not this? We are only playing at local option, if we leave the laws be broken openly thus.

Are the officials waiting until after the election? We hope that men will go into office who will enforce any and all laws, and especially the one that will banish John Barley-corn and all his allies from our county and state. Look up the teams that are going to Woodsboro, Littlestown, Reisterstown, and other places? Will it be necessary to have a Custom House official to inspect the baggage of the gentleman booze drinker?

16-in. Guns to Guard Bay.

Washington, Aug. 24.—The Chesapeake Bay, which will be developed as the "American Kiel" for the United States Navy, will be guarded by 16-inch guns, throwing projectiles that weigh 2,200 pounds, according to the plans which have been finally approved for the mammoth fortress to be erected at Cape

The new 16-inch guns will be more powerful than the 16-inch rifles which will be shortly placed in the Panama Canal fortification. They will be 60 feet long, while the Panama guns will have a length of 45 feet. In addition, they will be mounted on disappearing carriages of the most modern type, and their power will exceed that of the guns of any fortification of the world.

For a long time War Department experts could not get together on the type of guns to be mounted at Cape Henry. Some members of the special committee on fortifications favored the 14-inch gun. The European war, however, had the effect of developing sentiment for the most powerful guns that can be built for fortification work. The new rifle will be placed in all the American coast fortifi-

As a result of the activity for national defense, it is now expected that Congress will at its next session authorize active steps toward the construction of the Cape Henry fortress, which is counted upon to make the Chesapeake Bay immune from attack by a hostile foe.

Growing out of the collision near Thurmont on June 24, a suit was filed in the Baltimore courts on Tuesday against the Western Maryland Railway Company, through Attorney Straus for the death of Frederick L. Hayes, whose wife and children claim \$100,000 damages. The suit was brought under the act of Congress of April 22, 1908. Mr. Hayes, the husband and father, according to the bill, was a more money, and removes less fertility fireman on a train which had a head-on from the orchard. He also saves his trees collision with another train. Hayes was

### Orphans' Court Proceedings.

Monday, August 23rd., 1915.—G. Cleveland Taylor and Howard H. Taylor, administrators of Frances Amanda Taylor, deceased, returned inventory of personal property and received order to sell same. . Edgar M. Bush and J. Arthur D. Bush, executors of John M. Bush, deceased, settled their first and final account.

Letters of administration on the estate of Elizabeth Lippy, deceased, were granted unto Granville Lippy, who received order to notify creditors.

John E. Drach, executor of Peter E.

Drach, deceased, settled his first and

The Court issued order for Ornan

Moore to draw funds. Tuesday, August 24th., 1915.—Norman R. Hess and Norville P. Shoemaker, administrators of Harriet Bollinger, de-

ceased, reported sale of stocks, returned inventory of real estate and settled their second and final account. Samuel C. Stoner and John T. Stoner, executors of David Stoner, deceased, reported sale of real estate on which the

Court issued order ni si.

Letters of administration on the estate of Casper H. Millender, late of Carroll county, deceased, were granted unto Nicholas J. Walsh and D. H. Millender, who received warrant to appraise and or-

der to notify creditors.

Oliver T. Shoemaker, administrator

w. a. of Samuel C. Shoemaker, deceased, returned inventory of personal property and received order to sell same.

Andrew B. McKinney, administrator w. a. of Mary M. Shoemaker, deceased, returned inventories of debts due, personal property and money, receiving order to sell personal property.

---Maryland Postmasters Removed.

Washington, Aug. 25.-Two Maryland postmasters were removed from office this afternoon, when Postmaster-General Burleson signed orders directing the dismissal of W. E. Berry, postmaster at Rockville, and Oliver H. P. Clark, postmaster at Silver Spring, in Montgomery County, Md. Bondsmen of the two officials were directed to take charge of the postoffices and designate some one to run them until

new postmasters can be selected.

At the office of Postmaster-General Burleson the statement was made that Berry and Clark were removed upon "charges of embezzlement." The Postoffice Department declined to make any other statement or give out any details of the misconduct of the two men. It was definitely learned later that both men have made good the missing funds, and therefore it is dcubtful if further action against them will be taken by the Federal Government.

Berry was named postmaster at Rockville on February 21, 1914, and Clark received his appointment on February 2, 1914. Both men are regarded as political friends of Senator Blair Lee. Silver Spring is the home of Senator Lee, and it was learned from friends of Representative David J. Lewis, in whose district Rock-ville and Silver Spring are located, that Mr. Lewis stepped aside and allowed Sen-

No material changes took place during the past week in the European war situa-tion, but big events are looked for within the next two weeks, on both fronts.

Obituaries, poetry and resolutions, charged for at the rate of five cenus per line. The regluar death notices published free.

CROUSE.-Mrs. David Crouse died at her home in Taneytown, on Thursday morning, after an extended illness, aged 59 years. She leaves her husband, and the following children by first marriage: Mrs. Michael Fringer, of Taneytown; Mrs. Stear, of Littlestown; Mrs. Harner, of Kingsdale; Claude Reifsnider, of this county, and Harry Reifsnider. Mrs. Crouse's maiden name was Brown, and she was a sister of Samuel Brown, of Funeral service and interment will be held at the Reformed church, this Saturday morning at 10 o'clock, in charge of her pastor, Rev. Guy P. Bready.

Davis.—George Allen Davis, died at the home of a son-in-law, Ephraim Bowersox, near Uniontown, Saturday, Aug. 21, '15, in his 71st. year, after a lingering illness. He was a Civil War Veteran, having enlisted in the army at the age of 16, was a member of the Md. Patapsco Guards.

He is survived by two daughters, Mary Bowersox, with whom he had his home, and Miss Nora Davis; four sons, William, of near Linwood; Thomas, of Waynesboro; Edward and George, in Uniontown. His funeral was held at the Church of God, Uniontown, Monday morning, by his pastor, Rev. L. F. Mur-ray. The Wyoming Tribe R. M. of which was a member had services at the grave in the hill cemetery. Pall-bearers John Stone, John Waltz, John Heck, George Lambert, George Slonaker and Frank Romspert.

WEAVER. - Dr. Sylvester B. Weaver, aged 69 years, a prominent physician of Littlestown, died suddenly Friday, Aug. 20, at 4 p. m., of an affection of the heart. Dr. Weaver had been in his usual good health during the day and attended a meeting of the directors of the Littlestown Savings Institution. Upon his return home, just as he entered the door, he was stricken and died ten minutes

Dr. Weaver was born in Manchester, Md., and spent his early days there. He attended Hahnemann Medical College, Philadelphia, from which he was graduated in 1872. A year later he went to Littlestown and has practiced there ever since. He was a director of the Littlestown Savings Institution, an officer of the Lutheran church, and had been a school

director for a number of years. He is survived by his widow and two children, Mrs. Naomi Ott, wife of Rev. J. Wm. Ott, of Hagerstown, and Malcolm Weaver, of Frederick, Md. He also leaves a brother and two sisters in Manchester, Md.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this office, and we suggest the adoption of it by our exchanges.

### Secret Manufacture of Public Sentiment

Bureaus intended to shape public opinion through ready-made articles sent gratuitously to the country press, continue to ply their business, and, it must be admitted, more or less successfully. Country editors "fall for" the schemes entirely too frequently, either because of lack of ally come to Baltimore. In fact, the ability to originate intelligent opinions of time-tables and facilities offered by the their own, or because they are too dense | railroad company have had the effect of to realize how they are being "used" in diverting from Baltimore much of its the promotion of various schemes and trade. The trade of the Chesapeake Bay

country editors to look out for traps, are always jealous in maintaining it. some of which are very cunningly baited, even to the extent of free plate matter, which, if used, naturally cuts down the by the country office. In other ways, fine which connect the railroads ending at write-ups are made attractive and very convenient for the busy country editor, and very often so interwoven with really between Baltimore and the western side valuable information that the bait is used, more or less willingly and innocently.

This wholesale campaign of promotion, however, is very plain, as well as very be palmed off as local editorial research and opinion; or if not that, that the general tone of the stuff is approved by the pany, except at Washington. local publisher, which is exactly what the

lic sentiment, and this is especially true

using this sort of carefully prepared am- does not get the boats, they should be munition, are unfair to their readers, owned in Baltimore and operated in the even when not knowingly dishonest. The interest of Baltimore and the Eastern liquor business is back of a lot of "edu- Shore. They should not be permitted by cational" stuff, exceedingly well prepared, our business people to be bought up and which contains just enough truth so by outside capitalists to be operated in carefully presented-as well as carefully the interest of Philadelphia and the Pennsuppressed-as to exert a quiet influence sylvania Railroad as heretofore. -Balt. against anti-liquor legislation.

When it would be too plainly observed to strongly indorse a movement, or policy, the same end is sought by antagonizing and belittling good results from opposing movements and policies. Positive results are advanced through negative methods. Little defects are held up as proof of the failure of the complete organization. Men are discredited because of the bad reputation of a few of their associates. In fact, "molehills into mountains" is the object of the manufacture of skilled writers, who make big money at the job, taking the place of like talent operating on Chautauqua circuits. Some talk, with the secret object of creating and spreading certain sentiment, while others write for the same object.

### 400 How About Governor Brumbaugh?

Is Governor Brumbaugh, of Pennsylvania, in the running for the Presidency? Before you say "No," consider the matter. Governors have heretofore done some stepping into the Presidency; for instance: Cleveland, McKinley, Roosevelt, Hayes, Johnson and Wilson.

Then, Gov. Brumbaugh is a schoolteacher-an educator-perhaps not in the Wilson class, but he is in that line. nevertheless. He stands for prohibition -at least of the local option stripe-and that is a growing popular stand. He also has the nerve to stand for progressive measures in legislation, and to veto the "pie" brand.

Senator Penrose is said to be for Root, but that fact is apt to help, rather than hurt, the Brumbaugh possibility. The Republicans can't win with a Penrose suggested candidate.

Some say he is yet to be tried-that he hasn't had the "experience." Well, experience is sometimes a drawback and a News Bureau. hindrance. After all, a President of the United States needs, primarily, a high standard of intelligence, and political

what is the matter with him, really. He ooks to us very much like a promising 'dark horse'' for the nominationbarring only the control, against him, of the Pennsylvania delegation.

### Chesapeake Bay Steamers.

The order of the Interstate Commerce Commission, which will require the Pennsylvania Railroad Company to relinquish its ownership of the greater part of its steamboat lines on the Chesapeake Bay, is of importance to Baltimore. The act of Congress, known as the Panama Canal Act, forbids railroad companies to own and operate steamers upon routes which should compete with their railroad lines. The Interstate Commission finds that the lines plying upon the Chester, Wicomico, Pocomoke, Choptank and Occohannock rivers come within the act of Congress and must be sold by the railroad com-

The reason for this law is manifest. It is for the public interest that there should be competition in the transportation business between land and water routes where that is practicable. The Pennsylvania Railroad Company ownsor controls railroads reaching through the territory penetrated by the rivers above named. Thus having control of both land and water routes, competition has been shut great wealth and power of the railroad

It has long been complained in Baltimore that the effect of this monopoly of routes and the manner in which the steamboat lines have been operated has ican. been to divert to Philadelphia a large part of the bay trade which should naturhas long been one of the greatest of this It is a pretty wise habit, nowadays, for city's commercial assets and our people

The Panama Act permits railroads to own water lines which are in effect continuations of their roads. Therefore, amount that must be paid for that item the continued ownership of the lines Claiborne and Love Point with Baltimore is permitted. As to the steamers plying of the bay, which are owned by the Pennsylvania Company, their continued operation by the company is permitted until a further decision. It does not appear valuable, advertising, even though it may clear that these water routes are directly competing routes with any railroads entirely owned by the Pennsylvania Com-

Baltimore is greatly concerned in the future ownership of the steamers which Even the selections from popular mag- the railroad company must now dispose azines which are furnished to editors in of. There are rumors that the Western "copy" form, for use in exchange for Maryland Railway Company may try to magazines, may be for the very direct get them. The ownership by this compurpose of creating, or developing, a pub- pany would not be in violation of the Panama Act, as it has no railroad lines of the magazines that make a specialty of on the Eastern Shore and would only ex-"progressive" political doctrines, and tend its present lines to that fertile secwhich in a cunning and plausible way tion of Maryland. It would doubtless be are really attempting to enliven, and of advantage to Baltimore that the Westmake easy, certain Presidential "booms." ern Maryland should own these steam-Newspapers that make a practice of boat lines. If the Western Maryland Sun.

### -The Country Editorial.

Many editors of small papers refuse to that editorials are for the large city paviews of the country editor. As a matter of fact, the views of the rural population are really reflected by the editorials of the large city papers, which glean them from the country papers which run editorials. The sound thought of the country is to be found in the rural districts. Here, in the more or less quiet of the country, men and women read and study and gather data which results in conclusions founded on a solid basis.

Sometimes this thought may be biased by the enthusiasm aroused by the impractical reformer or selfish politician who runs off at a tangent with some new fad or "ism," but generally such fads are short lived and the sensible thinker of the country districts returns to the sane and solid and conservative attitude which has always distinguished him. The editor of the country paper, therefore, has a duty to perform in crystallizing this thought and sending it out to the world as the contribution of his section of the country to the agitation of the day.

The country editor, usually is a comparatively poor man, but he has sand and independence and a pride of work rarely found in other professions. Moreover he is brought into closer personal contact with his constituency than the editor of the big city paper. It is safe to say that never before in the history of journalism have editorials been more widely or more carefully read, not, perhaps as in the old days, to base an opinion on the views of the editor, but for the purpose of getting all sides of every question. - National

### German Descent Americans.

With one accord Americans of German descent and most of those born abroad, declare that if the country of their sentimental attachment persists in dragging the country of their birth or adoption, as the case may be, into war, then they will cry down with Germany, and use every patriotic endeavor to support the United States in making good its belligerency. It is well that the merely sentimental preferences of this element of the American population shall be properly gauged. As between the Teutons and the Allies, most of those of Teuton derivity uphold the German side. As between the Teutons and the Americans there is only one side for them and that is the side of the Stars and Stripes.

By most Americans the idea is not yet accepted that the United States will become involved in the war even to the extent of breach of relations, that under existing conditions would be a sure preliminary to hostilities. But in case war should arise, no American of German offense in this torpedo. descent or German born should be placed at a disadvantage because, as between the major contestants, he upholds the German position. This is his right and it is a natural one. But when the lodestone of American loyalty is placed before him he is quickest to give the sign of unalterthemselves into trouble. But these are under any circumstances. -Balt. Amer-

### -000 How Long Can This Death Harvest Keep Up?

According to figures submitted to the French senate, the total number of men killed in the great war is 5,089,000; wounded, 6,474,000; prisoners, 2,930,000, making a grand total of 14,493,000 men who have been rendered hors de combat. Of this enormous number the allies have lost 1,739,000 killed, 2,589,000 wounded and 1,135,000 prisoners, making a total of 5,463,000. The Teutonic allies have lost 3,350,000 killed, 3,885,000 wounded total of 9,030,000 rendered hors de com-

How long can this fearful drain on the supply of human lives keep up? How guns, on the ships and in the aeroplanes and the submarines withstand the tension breaking point one of these days, for with the future lecturer. with the possible exception of members of one or two phlegmatic races the men in the ranks can't stand the strain.

With the Russians there is a certain all-pervading belief in fatalism that dulls their sensitiveness. Whenever the young men are drawn into the army the village where the draft has been laid holds its ceremony for the dead previous to the departure of the lads and the goodbye kisses and farewells. That is part of the Russian temperament. It is not distinctive of the volatile Frenchman, the stubborn Saxon or the stolid Teuton. The Russian may stand this toll of death for a long time, but the others will break | panion Anna Steese Richardson, writing under the demand. ### Aerial Torpedo New Weapon of Defense

The fear of overwhelming attacks from the air, which prevailed among the allied Meat Trust beaten a thousand miles. nations at the outbreak of the war and until recently, when the comparative ineffectiveness of the Zeppelins seemed who never handled or saw the goods demonstrated, is likely to be revived and the terrifying power of these monster airships fully realized if the reports relating our produce to the greengrocers through to the new aerial torpedo perfected by the Germans prove to be true. The Septem-other his nine-year-old son. You see, in Germans prove to be true. The September Popular Mechanics Magazine, in an

illustrated article, says: "The accounts of the operation of these torpedoes read like the fantastic tales with which readers were regaled before the great war became a reality. In many respects the torpedo resembles a submarine torpedo and is said to possess all its destructive power. It is equipped its destructive power. It is equipped with a delicate wireless apparatus that of New York City, in which he did his controls its propelling and steering business, nor to New York State. He mechanism, and through this every movement of the torpedo is controlled by the powerful wireless waves sent out from | financial returns with the state treasurer, the Zeppelin. As it speeds toward the as other business concerns do-yet he was target the torpedo can be steered up or getting enormously rich on his commisdown or horizontally at the will of the operator. In practice it is simply pro- which grocers were paying, minus the pelled to a point directly above the object commission. And our returns were six to be destroyed and is then turned vertito be destroyed and is then turned vertically downward and dropped like an ordinary bomb.

"The new torpedo is said to be about 7 that of a submarine torpedo. In order to allow it to penetrate a roof or other obft. in length and to have a war head like struction before exploding, the war head and Diarrhoea Remedy, and said to him, struction before exploding, the war head is equipped with a time fuse that delays the explosion for a few seconds after the impact. Carried in the body of the torpedo is from 100 to 150 lbs. of high explosives, enough to cause great havoc,

especially when exploded within an inclosure such as a building. The torpedo is driven by two propellers at the stern and is sustained in the air by two propellers working on vertical axes and placed fore and aft under the body. By means of an arrangement of fins and rudders it is kept from capsizing in the heaviest winds. It is believed that the propellers and other mechanism are operated by compressed air.

"While this torpedo can doubtless be made enormously more effective than a bomb that is simply dropped, it has one serious limitation when launched from an airship against fortifications or warships. To be safe from the fire of antiaircraft guns the airship must either be at a considerable distance from the target or at a great height above the ground. In either case it would be extremely difficult to determine when the torpedo was anywhere near a point directly above the target. In spite of this, however, the Germans have apparently provided themselves with an exceedingly effective weapon of

### Has Delivered One Lecture Over 5,000 Times.

In the "Interesting People" department of the September American Magazine appears an article about Russell H. off and rendered impracticable by the able allegiance. Of course there are some Conwell, the famous Philadelphia preachrabid German-Americans who would get er and educator who has delivered one lecture, "Acres of Diamonds," over five not to be confused with the mass of citi- thousand times. He has appeared all zens of German blood. Nor will they be over the world. The proceeds from his lectures he devotes to sending poor boys through college. Following is an extract from the article about him:

"Doctor Conwell has delivered this lecture over five thousand times. All the way from the Dardanelles to the Yangtze, from Cairo to Saginaw, he has been flinging out its optimistic philosophy as prodigally as the harvest moon pours down her silver flood. One year he delivered it two hundred times; another, he filled half a hundred dates so near to Philadelphia that he returned home each night.

"The remuneration for his famous lecture has varied greatly. A Virginia committee once recompensed him with a smoked ham. (This occurred before the and 1,795,000 taken prisoners, with a pork trust had put hams on a diamond basis.) At another time a preacher gave him a promissory note for \$4.50-Conwell still has it.

"He devotes all of his lecture proceeds long can the men who are doing the to assisting poor students through colfighting in the trenches, back of the big lege. Usually one delivery of the lecture will pay a student's expenses for a year.

"He has known many literary and hisof knowing that the percentage of deaths toric men. John Brown, when about 50 is so enormous and that the number of years of age, used to visit his boyhood wounded is so great? It will reach the home, milk the cows, and play in the hay

### LIVE STOCK HUSBANDRY

BEEF IN THE OZARKS.

Arkansas Farmers Waking Up to the Value of Pure Bred Stock.

Recently 224 pure bred cattle have been shipped into Washington county. Ark., writes a correspondent in the Country Gentleman. About half of this number were Shorthorn bulls of serviceable age, the remainder consisting of Shorthorn heifers and a car each of Herefords and Angus bulls. This awakening is largely due to the work of the bureau of animal industry at Washington through its Arkansas representative, Dr. C. M. Morgan, in co-operation with the county dem-

The Shorthorn breed of beef cattle are red, white and roan, the mixture of the red and the white forming the roan. Wherever roan cattle are seen there of a certainty has a Shorthorn been also, because there is no other breed in which this peculiar blending of the red and white prevails. There is a peculiar richness about the roan tinge that bespeaks a mellow hide underneath, and that, too, is peculiar to the Shorthorn. The picture shows a Shorthorn of beef type.

onstration agent and the Fayetteville National bank, which financed farmers and stockmen who needed money with which to purchase sires for improving their native stock.

Teamwork has accomplished all this in a short time in one county. The agents, both federal and state, are working together to get the farmers to co-operate in buying bulls. County and community organizations are being formed for mutual benefit. The persistent campaign for diversification is bearing fruit, and the farmers' organizations hold frequent meetings where live stock and general farm topics are discussed.

A few years ago Washington county cleaned up the ticks. At that time a good many farmers rather than comply with the dipping regulations sold out their entire herds of cattle, and until very recently no improvement has

been made with beef cattle. The region is in the Ozarks ideal cattle country. Within a year or two after clearing out the underbrush, blue grass, orchard grass, Japan clover and hop clover appear and claim the land, producing strong and luxurious feed for grazing. The valleys produce excellent crops of corn, alfalfa and cowpeas. With the intelligent interest that has been aroused, coupled with the liberal backing of the bankers, it is safe to assume that at least one spot in Arkansas will be heard from in the cattle markets before long. Washing. ton county is interesting itself in the most up to date methods for the eradication of hog cholera and has determined that this scourge, like the tick,

### WINTERING STOCKERS.

shall have no place there.

Silage and Cottonseed Meal an Economical Ration For Cattle.

For wintering stocker cattle a ration of corn silage and cottonseed meal has proved very economical. Two pounds of the meal combined with as much corn silage as the cattle will eat will give a small gain in weight. Straw and other roughage which cannot otherwise be used advantageously may be fed with the silage and cottonseed meal. When the cattle are put on Pasture cottonseed cake, which is the same as the meal in substance, can be used profitably as a supplementary

Cottonseed meal is also recommended as a winter ration for the breeding About two pounds of the meal should be given to the breeding cows Der day, together with some silage, stover and other roughage. This will Prove an economical ration and one which will leave the cows in good condition in the spring. The bull also may be fed from two to three pounds of cottonseed meal combined with Some other concentrated feed, but some authorities hold that it is not Well to continue this feed too long, as It is believed to have injurious effects upon the breeding powers.-United States Department of Agriculture.

Beet Pulp For Lambs.

Beet pulp as feed for lambs has been a subject of some discussion in reference to the quality of the meat it produces. A buyer for one of the big Dacking bouses, referring to a bunch of beet pulp fed lambs, said, "This band of Idaho pulp fed lambs when dressed and hung on the hooks showed up as well as any grain fed lambs I have ever seen."

### 20000000000000000000000000000000000 LIVE STOCK NOTES.

A hog in a good pasture or one that is fed regularly seldom does much damage by rooting. Are your lambs putting on two or three pounds a week? That's the kind! Keep them coming.

When you are buying a horse, remember that a gray horse when c he gets older will most likely be

Warm weather is the time to make growth in the hogs. Push the shotes along, giving them good pasture range and feeding all they will eat up clean.

be dense, even in quality, and of a strong, clear white fiber throughout.

The stomach of the horse is small, and he should have water often and little at a time.

### SHEEP GROW GRASS AND IMPROVE SOIL

We believe that every average eastern farm should carry from twenty to forty sheep without displacing any other stock, writes a Virginia correspondent of the National Stockman. Of course some judgment must be used by the individual, and the number kept determined by the character and amount of land under control.

Where fencing is good so sheep may be made to follow cattle, grazing for the latter will be improved, in that sheep eat eight or ten times as many kinds of plants as do other and larger

Another point in favor of sheep keeping is that they do not require special attention during the busy season of cropping and harvesting-as will a dairy herd or hogs, for instance -and, best of all, they furnish an income in spring and early summer when the average farmer has little else to sell. Not only this, but sheep suit most every farm, and they will live on growths where other animals would starve.

Recently we have watched with interest the outcome of a small bunch of sheep in the neighborhood. The couple had just taken possession of a run down farm, and. fences being bad,

The Romney Marsh is an English breed of sheep that has not been bred extensively in this country. The Romney Marsh is a large sheep, ranking with the Lincolns in size, and its fleece is medium in fineness and has good length. It produces a fine quality of mutton, is hornless, and the hair on face and legs is white. It is a hardy animal and is able to withstand rigorous weather. The sheep shown is a Romney Marsh.

the sheep had to live in an old field overgrown with pine bushes and weedy growths. Yet, in spite of disadvantages, the increase was a lamb per ewe, and the field shows marked improvement over one where \$50 was spent for liming, etc.

The idea our eastern farmer must get is that sheep are soil improvers and grass growers. Just think what this carried out would mean-not only for the land, but for the bank account. Of course one cannot expect profit from a flock confined where they will starve or famish.

The main point I would emphasize is that a certain number of sheep should not be considered a fixed charge, but are justly entitled to credit as actual money earners-for while growing wool and mutton they undoubtedly improve the land by packing the sod with cloven hoof and the uniform distribution of manure.

Colt's Feet In Summer.

Aside from feeding, probably the most important consideration in developing growing horses is the care of the feet, says Dr. C. W. McCampbell of the Kansas Agricultural college. Many of the poor feet seen in horses are the result of neglect of the feet while these horses were young. The toes should not be allowed to grow abnormally long and ill shaped, as serious trouble may result from cracking or breaking of the hoof. Neither should the heels be allowed to become high, narrow, or rolled. If these ill shapes are not corrected the feet, and, to some extent, the legs, respond to these influences, and the horse matures with poorly shaped feet and often poorly set legs. Beware of thrush and kindred troubles. If the stables are kept clean and sanitary there will be very little trouble from this source. Careful attention to these details will help greatly in developing big, well shaped, strong, healthy feet.

### FOR BALANCED RATION

WELL TO DECIDE ON AND PRO-VIDE WEEK'S SUPPLY.

By Arranging Menus a Few Days Ahead, Variety of Suitable Meals May Be Supplied With Little Trouble-Points to Consider.

Food is necessary to build tissue, replenish waste, create heat and energy and satisfy appetite. In order to be perfect food, it must contain sufficient protein or tissue-bulding elements to cause a continual and gradual growth, and to overcome fatigue; sufficient starch and sugar to give an abundance of energy and body heat; fat in sufficient quantity to replace loss in illness or great mental or muscular exertion, and ash or mineral salts for feeding bones and tissues.

The balanced ration may be obtained in several ways and without variety. For instance, we may eat meat, bread and butter and potatoes, but a continuation of this diet, while it may cost a great deal for meat and butter, would not give good results, as the diet would be too concentrated, and constipation and its attendant ills would follow. Or, one might eat entirely of vegetables, such as beans and potatoes, and the quantity necessary to supply the required amount of protein would give too much bulk and often tissue starvation will occur.

In providing food for a normal family the housekeeper will find it provident to decide upon and put in a week's supplies, thereby insuring a variety of well-balanced meals at less There is no more extravagant habit than buying a meal at a time. The housekeeper will find that arranging her menus a few days ahead, until three meals a day are provided for, allowing some variation for vegetables, meats and desserts, and providing against the embarrassment of a quick meal, will give her a feeling of security never possible where only one meal is taken care of at a time.

We should decide on the menus after we have proportioned our income, pro-rating the percentage of food so that only one-fourth of the income is used for this purpose. The occupation of the different members of the family, climate, temperament, sex, individual health, all must be taken into consideration, and then such foods as we can afford with due regard given to their caloric value will be determined upon.

The mother will remember that whether the children acquire full size and strength depends more on their food than upon anything else. A child from three to five years old requires four-tenths as much food as a man at moderate work; from six to nine years one-half as much, while a boy fifteen years old requires as large a quantity of foods as his father engaged at moderate labor.

In a cold climate more is needed, and this fact is not due to the temperature, but to the greater activity of the people, and it will be noticed that fat forms a large proportion of the northern diet, as it is oxidized slowly in the body. A tall, thin person conperson, for the reason that a large surface is exposed and is the cause of greater loss of heat.

Personal idiosyncrasies must be considered. It is a homely, but true, saying that "one man's meat is another man's poison."

Ham Supreme.

Soak the ham over night and thoroughly wash and scrape it. Slice one onion, one carrot and one turnip and put them in a kettle, add half a dozen cloves, eight peppercorns and one bay leaf; put in the ham, cover with cold water and let simmer four hours, then add one pint of cider or two tablespoonfuls of strong vinegar and cook until very tender. Take out the ham when partly cooled, remove the erumbs and brown sugar and brown in the oven. Boil the liquor until reduced to one pint, then strain, cool and remove the fat. Cook one tablespoonful of flour in one tablespoonful of butter, add the strained liquor, stir and cook until perfectly smooth and serve as a sauce for the meat.

Cucumber Jelly Salad,

Pare and grate four large cucumbers, add one and one-half cupfuls of boiling water, twelve peppercorns, one teaspoonful of chopped onion and scant one-half teaspoonful of salt; let simmer 20 minutes, add one-half box gelatin softened in one-half cup of cold water; stir until dissolved, then strain through a double thickness of cheesecloth. Line a mold with slices of fresh cucumber, fill with the jelly harden on ice. Unmold and serve on a bed of watercress.

Bright Shades.

For brightening a large living room with a dark wall covering one might select window shades with gorgeous redbirds perched on greenish brown branches or just large, conventionalized red or mulberry flowers, with ample foliage. For a brown room shades with long sprays of the rich golden glow as a decoration would be

Washable Paper.

Washable paper, such as is used to paper the walls of bathrooms, is an excellent substitute for oilcloth for covering pantry or other shelves, and is much cheaper. It may be held in place by thumb tacks, or cut wide enough to come over the edge of the shelf and be pasted down.

### MUCH DEPENDS ON COOKING

Use Quantities of Water in Preparing Strong-Flavored Vegetables for the Table.

The many people who believe they cannot eat cabbage, cauliflower, onions and turnips without suffering from indigestion, and the many others who do not like these strong-flavored vegetables, which are very valuable in the diet, should change their method of cooking them, suggests Miss Oberlin of Colorado Agricultural college.

Use a large quantity of water in proportion to the quantity of vegetable to be cooked. To prepare creamed cabbage cut the cabbage, not too fine, with a knife. Have two quarts of slightly salted water boiling rapidly, add one quart of coarsely cut cabbage. Boil, uncovered, until the cabbage is tender when tried with a fork. Drain at once and add one cupful of medium white sauce. The mixture may then be placed in a well buttered baking dish, covered with buttered crumbs, and browned in a moderate oven.

Onions, cauliflower and turnips may be prepared in the same way. Small onions should be boiled whole, larger ones cut in quarters; cauliflower may be left in the head or broken into smaller pieces; and turnips should be cut in cubes.

The advantage of this method of cooking are: The vegetable stays white or pale green in color, the odor in the house is not disagreeable, the flavor is much better, and the food more easily digested than when a covered kettle or fireless cooker is used.

### ECONOMY IN SIRUP MAKING

That Made From Cider and Ginger Is Pure and Simple-Imitation Maple Sirup.

The greatest of sugar economies is the making of sirups pure and simple. Cider sirup, for example, is an excellent relish for any meal, also a more than fair sauce for puddings, rolypolys and so on.

To make it, bruise well three full races of ginger, taking care the root is not worm-eaten. Boil the ginger ten minutes in half a gallon of cider and let stand overnight-or twelve hours at least. Strain. Add five pounds of sugar-more if you like a very rich sirup. Simmer gently, skimming clean, for half an hour. Cool and keep in glass or clean stoneware.

Water, instead of cider, makes an excellent sirup. Use six pounds of sugar to the half gallon. Skim clean and cook as thick as desired. Soft sugar, the coffee grade, so called, makes excellent sirup. If the almost black Porto Rico sugar is to be had, it makes a sirup that furnishes a close approach to maple sirup-so close as to warrant the suspicion that it is the first cause of a good deal that passes for maple.

Tuna Loaf. To one can of tuna fish add two well-beaten eggs, one teaspoonful of lemon juice, one teaspoonful of chopped parsley, one teaspoonful of teaspoonful of salt and one-eighth teasumes more food than a short, stout spoonful of pepper. Mold into loaf and bake in moderate oven one-half hour. Garnish with parsley and sliced stuffed olives. Serve lot with the following sauce: Melt two teaspoonfuls of butter and add two teaspoonfuls of flour, one-quarter teaspoonful of salt, one-eighth teaspoonful of paprika. When smooth add gradually one cupful of hot water. When thoroughly cooked add two tablespoonfuls of butter, a little at a time. Beat until thoroughly mixed and add two hardcooked eggs chopped fine. Serve this very hot on the tuna loaf.

Silence Cloth. Those of us who still cling to tablecloths instead of polished wood have often wondered at the exasperating qualities of the Canton flannel silence cloth. Almost every hot dish placed over it causes it to stick closer than a brother to the polished table and to leave white fuzzy rings on the wood. Instead, make a silence cloth out of cheesecloth or other washable matertal, with several layers of paper between the two folds. Overcast the edges and knot here and there as in a quilt.-Mother's Magazine.

Apple Tea Cake.

One pint flour, one-half teaspoonful salt, three teaspoonfuls baking powder, few grains cinnamon, two tablespoonfuls sugar. one tablespoonful butter, one egg, scant cupful of milk, five apples; mix and sift dry ingredients, work in butter, add milk gradually and egg (well beaten); spread in well-buttered baking pan; cut apples when it begins to thicken and let in eighths or sixteenths and stick in dough, sprinkle sugar and cinnamon over top, serve with butter.

Convenient Clothespin Bag.

This bag is made from a square bag just wide enough to have a clothes hanger sewed to the top. A slit is made down the middle to within four inches of each end, so that the pins may be put in and taken out easily. The advantage of this bag is that it can be hooked on the line and slid along as the clothes are hung up.

Strawberry Muffins.

One pint flour, two small teaspoonfuls baking powder, one-half cupful sugar, little calt sifted together. Add to one beaten egg and one cupful milk. Mix well and add one cupful mashed strawberries and two tablespoonfuls melted butter. Bake in muffin tins in quick oven.

### SMART TAILLEUR.

Belted Effect Makes Chic Suit For the Girl. 

The belted effect in misses' suit styles holds quite an important place among the autumn season's smart models. Here it is featured in navy mohair, show above and below the waist line. The high roll collar with metal embroidery lends a military note, and the oblong metal buttons afford a trim effect. Deep cuffs and an odd shaped yoke are interesting features. The flare skirt just escapes high button boots, and the trim faille sailor is very

### MIDSUMMER CLOTHES.

Autumn Presses Closely Upon the Heels of Summer.

Midsummer is usually the signal for changes and modifications in the sum- or six years so that the cost for lime mer fashions. Spring clothes begin to show wear, and to demand renewal, an acre per year. and our fickle minds begin to look for something different.

Does it not seem strange that Amerchopped green peppers, one-quarter no woman in the world indulges in vantage."

he American woman. The women of other nations from reasons connected with climate or temperament, or an inborn sense of economy, may wear silks or thin wool, but we insist upon our ephemeral materials, and every year produces new ones for us. This, of course, is a taffeta season, and we are all wearing it accordingly. In order to cater to both parties we combine it with net, lawn, muslin and organdie in the form of colored basques, coatees and the sleeveless jackets, which it is now possible to buy separately in the department stores. What are called "porch frocks" are sold in great variety.

It is a good thing for one of the principal products of our own country that we so generally adopt the cotton fabrics for summer wear. But regard we this, as the French say. Some months ago an active cotton crusade to "help the south" was inaugurated with great blowing of trumpets. It was demonstrated to us how many varied articles were made of cotton, and endless were that one's white "London ivory" comb was really made of southern cotton.

We were urged to give up linen bed coverings and take to the less frigid cotton ones; even the superior lightness and washableness of cotton blankets were pointed out to us. Ardent crusaders implored us to relinquish the silk petticoats, which widened skirts had just caused us to adopt, and take to cotton substitutes. Everybody talked cotton for a few weeks, and then the whole subject died a natural death until the Parisian designers, who know nothing about the south and care less, suddenly revived it with the decree of two washable petticoats under the summer's flounced gowns.

Care of the Stove.

To prevent your gas stove from rusting inside of your oven or outside surface use a few drops of linseed oil on a cloth and rub over thoroughly. This can also be used on coal ranges or other style iron stoves, after which you use stove paste to which a few drops of black coffee are added to moisten paste, and then brush over. It will nitrate of soda and the same amount polish up quickly and reward you with a brilliant luster.

Metal Polish. A high polish for metals is made by mixing two ounces of prepared chalk, three-quarters of an ounce of pipeclay, half an ounce of white lead, a quarter ounce of carbonate of magnesia and a

quarter onnce of jeweler's rouge.

FARMERS' CLUB HOLDS NEIGH-BORHOOD SHORT COURSE.

Value Of Lime And Legumes In Building Up The Soil Is Discussed.

The Progressive Farmers' Club of Prince Georges County held a most successful neighborhood short course at T. B., March 16-20, the subjects being "Farm Crops" and "Poultry Husbandry." This was the last of a series of such courses which the Extension Service of the Agricultural College has held in a number of neighborhoods

CLASS IN SOILS.

this winter in co-operation with local farm organizations such as Granges and clubs. It has enabled many to have the benefit of teaching that the Agricultural College has never before brought directly to them.

Those attending the sessions of the short course were members of the club and their families, as the women folks as well as the men are enthusiastic in their attendance at the lectures. Demonstrations were given in selecting eggs for market, operating an incubator, mixing poultry rations, testing soil for acidity, judging seed corn, and in comparing different kinds of lime. Especial interest was taken in what Prof. W. T. L. Taliaferro, of the Agricultural College, had to say of the value of legume crops and lime in building up the soil for better produc-

He said in part: "Nothing will help more in building up the yielding power of the soil than the use of legume crops, such as the clovers, alfalfa, cow peas, vetch and soy beans. These can be used for turning in as green crops or in growing a heavy sod as the case may be which fills the soil with humus and nitrogen plant food. It is not economy to buy commercial nitrogen with belt confining narrow plaits that | at 15 to 20 cents a pound when the same results can be gotten by the use of legume crops, at the same time improving the moisture-holding power of the soil. Any of these crops can be easily grown on our Maryland soils, and with frequent applications of lime will give most of the plant food that our farm crops require.

The mistake, however, is often made of using too light an application. Not less than a ton of burned lime or two tons of ground lime stone or oyster chells should be used per acre. Such an application as this need not be given oftener than every once in five would not be more than 50 to 60 cents

"In buying lime it has been found that if pure burned lime costs \$2.75 per ton at the kiln, then hydrated ican men should not have adopted long lime or slacked lime should be \$2.10 since a more suitable August attire and ground limestone \$1.50 per ton. than blue serge and tan shoes? How- What kind you should use depends ever, if men persist in conservatism in entirely upon its quality, price, and this respect, women make up for it, for the distance it can be hauled to ad-

DO YOUR HENS LAY IN WINTER?

ROY H. WAITE, Maryland Agricultural Experiment Station.

When eggs are high in price, during the winter, do your hens lay? If they do, wouldn't you like to be able to sell most of them? If they don't, wouldn't you like to have eggs to use without paying a high price for them? You can keep the eggs laid by your hens in the spring, when eggs are cheap, until winter if you wish. Of course, these eggs cannot be sold as fresh egs, but you can use them yourself, for they are perfectly good for cooking purposes. Then you can sell the fresh eggs at the advanced prices.

The best method of keeping eggs is by cold-storage, but this is not available to most poultry raisers. There is a method, however, that can be used by anyone—the waterglass method. The directions are as follows: Make up a solution using one part, by measthe surprises of finding, for example, ure, of waterglass (sodium silicate) and nine parts of ordinary water which has been boiled and allowed to cool. An earthenware jar is usually considered best to keep the solution in. The eggs are put into the solution in as fresh a condition as possible.

It is best, where possible, to put the eggs in the day they are laid. It is also better to have them clean so that washing is unnecessary. They will also keep longer if they are sterile; no male birds running with the flock. Keep at least two inches of the fluid above the eggs, cover the receptacle to prevent evaporation and store in a cool place. Waterglass can be obtained either as a liquid or dry powder. The powdered preservative was put on the market the past year.

TOPDRESSING WHEAT WITH COM-MERCIAL FERTILIZER IN SPRING.

Where the soil is rather poor and deficient in nitrogen it will usually pay in a normal season to topdress wheat in the spring with 75 or 100 pounds of of acid rock per acre. If the soil is fertile so that there is no question of a good growth of straw being produced in a normal season, it is not worth while to fertilize. The fertilizer should be applied early in the season, the first part of April, in order that the early spring rains may dissolve it and carry it down to the roots, where it must go before it can be utilized by the plant.

Koontz, Mrs. Thomas Fox, Gregg Kiser; Misses Vergie and Vallie Kiser, Anna Ritter, Carrie and Vergie Fox, Mary Ellis and Master John

Rev. Charles Ritter, of York, Pa., visited his brother, W. E. Ritter this week. Prof. John J. John, of New Windsor, was in this vicinity one day last week looking after the interests of Blue Ridge

### Typographical Errors.

Every week this paper, and every other paper in the country, has a number of errors—typographical and otherwise. That's one of the reasons a good many people think the editor should have been a blacksmith. But what of the editor's viewpoint? If there's one thing better calculated to turn rosy youth to dodder-old age than, for instance, to get death notices and weather predictions mixed so that the thing the same agents in the transfer of the same agents. that the thing comes out in the paper 'Mrs. William Williams died last night. She has gone where it is-116 degrees in the shade and with rising temperature tomorrow," well—we'd like to know what

Maybe you think it pleasant to walk down the street and hear some grinning idiot with a head like a German pancake and a brain like an addled egg holding up the sheet to caustic criticism and the editor to consciousless scorn! Maybe you think it nice to hear some member of the vacuum family remark that the editor must make up his paper with a shovel! Or some Pinhead Percy wonder why the editor doesn't learn how to set

No doubt you think it excruciatingly delicious when an item announcing that Miss Mary Merryvale is to be led to the altar gets into the paper as 'led by a halter!' Funny, isn't it? Yes it is! It depends on the point of view. Some people may think a paralyzed man with the itch is the height of the ridiculous,

What would you think if the editor put some of your mistakes into the paper? Remember when Mr. ——, who shaves himself, came to church with a fine patch the shoe string on her switch hang down her back? And how Elder —— caught the tail of his long coat over the neck of the bottle in his hind pocket and went down the street showing that sometimes the strongest in faith are weakest in the

But we have no intention of telling these things. As an editor we wouldn't be much of a hair-pin if we were bent that way. Just remember, though, that we are all prone to errors, and the next time you see something in the paper which you regard as a sure sign of the editor's feeble mindedness, just say the devil did it, and, by heck, we'll back you up.—Exchange.

### The Hams of Westphalia.

The famous Westphalian hams, which are eaten without cooking, are cured by an elaborate process that has been worked out patiently and skillfully by generations of expert workmen. A writer in the New York Sun thus describes the process:

After being rubbed thoroughly with a solution in which there are one hundred pounds of salt to one pound of saltpetre, the nams are placed on cement floors, or in vats, and thickly strewn with salt. They lie under salt for two weeks, and then pass to a vat that contains a twentytwo per cent. solution of brine. They remain in that solution for eighteen days. Every day they are shifted in the vat; the hams on the bottom are brought to the top, and vice versa.

At the end of the eighteen days the hams are packed, one upon another, in a cool, dry cellar, where they remain for four weeks, in order to ripen—that is, to take on color and become tender. Then the salt is washed off with a stiff brush dipped in lukewarm water, and the hams are put to soak for twelve hours in fresh After that they are ready for the smokehouse.

The smokehouses are two or three stories high, with holes bored in the flooring. The fires are kindled on the ground floor, and the meat is hung on the second and third floors. The fires are made entirely of beech wood, but the workmen constantly throw juniper berries and juniper twigs on the embers. The fire burns brightly; it is checked with beech wood sawdust whenever it burns

The smoking continues for about eight days. Under the ancient curing methods, nowever, the hams were often kept in the smoke rooms for six weeks, and it is by this latter method that the best hams still made by the country folk of Westphalia.

The True Philosopher.

The true philosopher makes a considerable to do over his love of and his search for knowledge. But if he is a truly wise philosopher and if he values his reputation he will stop safely short of ever acquiring exact information. Exact information is fatal to the philosophical temperament. A philosopher is a man who can make solemn and profound remarks about any matter whatsoever without knowing anything about it. As soon as he learns something about a matter he is to that extent excluded from philosophizing about it. He is no longer a pure philosopher; he is now part scientist. This explains why there are so few prominent and prosperous philosophers these days. With the vast development of our means of communication, the muitiplication of books and newspapers and the obtrusiveness of reformers, it is almost impossible to get through the world without picking up a great deal of correct information, and consequently it is well nigh impossible to be a philosopher.—Life.

Stevenson's immortal song as "Fifteen men on a dead man's chest" spoils the significance of the phrase, writes a correspondent. License is permitted to poets, but no fifteen men could ever find room on the chest of any man, dead or alive, unless they were Lilliputians on the top of a Gulliver. The actual phrase is "the Dead Man's Chest," which is the name of one of the Virgin islands, lying to the east of Porto Rico. It is said that when Columbus discovered the group he named them after St. Ursula and some of her mythical virgins, but the English buccaneers rechristened them in homelier terms, such as "Dutchman's Cap," "Broken Jerusalem," "Rum island" and "The Dead Man's Chest." Kingsley refers to the matter in the first volume of "At Last," and Stevenson acknowledged, in his account of "Treasure Island," that he had lifted the phrase from the older novelist's pages. -Manchester Guardian.

MARYLAND AGRICULTURAL COLLEGE

COLLEGE PARK, MD. "STRAGGLERS" A QUEER CLUB

Only Friends of Juanita Wilson Are Members of the New York Institution.

One of the queerest clubs in New York is called "The Stragglers," in West Forty-ninth street. It is not like an ordinary club; you just go there for the eats. There are no dues and its members only pay for their repasts when they have the coin. To become a member it is necessary to be a friend of Juanita Elizabeth Cecilia St. Clair Redant Wilson. She is the president, chairman, board of managers and everything else connected with the Stragglers. She would never have started the club hadn't her friends been so fond of her. They used to drop in and eat her out of house and home.

Then she hired the house in Fortyninth street and informed all her friends that they could have the privilege of dining with her nightly for a fixed price. Her friends accepted. And so the Stragglers came into existence. When you become a member of the club you have the freedom of the place. You can mix your own Bronx and watch the chef cook your steak and chops. Everybody who is anybody in the spotlight drops in and between the soup and fish you will be favored with a song by some musical show star. In fact, as Juanita Elizabeth, etc., explains it, you are likely to meet anyone from your ashman to your landford at the club dinners.

## DEATH IN 'THE BUSH'

Ballad of the Dread Australian Desert.

The Looked-For Tank Hard and Dry-"It's a Terrible Thing to Die of Thirst in the Scrub, Out Back."

The old year went, and the new returned, in the withering weeks of drought; The check was spent that the shearer earned and the sheds were all cut

The saloon man's words were short and few, and the saloon man's looks were And the time had come, as the shearer knew, to carry his swag Out Back.

For time means food, and tramp you must, where scrubs and plains are With seldom a track that a man can

trust, or a mountain peak to guide;
All day long in the dust and heat—when
summer is on the track—
With stinted stomachs and blistered feet,
they carry their swags Out Back.

He tramped away from the shanty there, when the days were long and hot.
With never a soul to know or care if he died on the track or not, The poor of the city have friends in woe, no matter how much they lack.
But only God and the swagmen know how

a poor man fares Out Back. He begged his way on the parched Paroo and the Warrago tracks once more, And lived like a dog, as the swagmen do,

But men were many, and sheds were full, for work in the town was slack— The traveler never got hands in wool, though he tramped for a year Out

In stifling noons when his back was wrung by its load, and the air seemed dead,

And the water warmed in the bag that hung to his aching arms like lead,

Or in times of flood, when plains were seas, and the scrubs were cold and He plowed in mud to his trembling knees

and paid for his sins Out Back. He blamed himself in the year "Too Late"—in the heaviest hours of life-"Twas little he dreamed that a shearing-

mate had care of his home and wife There are times when wrongs from your kindred come and treacherous tongues attack,
When a man is better away from home,
and dead to the world, Out Back,

And dirty and careless and old he wore. And dirty and careless and old he wore, as his lamp of hope grew dim;
He tramped for years till the swag he bore seemed part of himself to him.
As a bullock drags in the sandy ruts, he followed the dreary track,
With never a thought but to reach the huts when the sun went down Out

It chanced one day, when the north wind blew in his face like a furnace breath,

He left the track for a tank—he knew 'twas a short cut to his death— For the bed of the tank was hard and dry, and crossed with many a crack, oh, it's a terrible thing to die of And, oh thirst in the scrub, Out Back.

A drover came, but the fringe of law was eastward many a mile:
He never reported the thing he saw, for

it was not worth his while.

The tanks are full and the grass is high in the mulga off the track,

Where the bleaching bones of a white man lie by his moldering swag Out Back.

For time means food and tramp they must, where the plains and scrubs are wide, With seldom a track that a man can

trust, or a mountain peak to guide; All day long in the flies and heat the men of the outside track
With stinted stomachs and blistered feet must carry their swags Out Back.

Seek Native Supply.

The adoption of oil fuel by the British admiralty in its fastest battleship, the Queen Elizabeth, may be said to mark a definite epoch in maritime industry, and the problem now arises as to the possibility of the home production of oil in sufficient quantities for naval requirements. It is manifestly an unsatisfactory and possibly a dangerous position for any country to be dependent on overseas supplies for the motive force with which to drive battleships. Attention is, therefore, being turned in many directions to the provision of a native supply of this prime necessity of modern engineering practice.

Small-Farming Countries. American farmers will have to yield the palm to the small countries of Europe, such as Holland and Den-The results there are almost mark. incredible. People can hardly comprehend what intensive farming amounts to until they visit those countries, or at least read the reports of men like Rider Haggard, who went there in an official way.

### SAME OLD HEN EVERYWHERE

Roosters Have Often Saved the Traveler in Foreign Lands From Homesickness.

The efforts of the California poultrymen to prove that eggs laid by Chinese hens are not sanitary are amusing. If these California hen owners had ever traveled a bit they would have found out that the hen is the same old hen wherever it scratches

and cackles. It is a homesick feeling that comes over the sojourner in a foreign land, who does not understand a word of the language spoken around him, to hear a rooster crow, says the Hartford Courant. It is the same old crow and is like a voice from home. So of the dog's bark, the horse's neigh, the mosquito's hum, the fly's buzz, the pig's squeal. They are the same thing in every land and in all

climates. The birds in different lands vary somewhat in what they have to say, but the barnyard and household creatures speak their same old language everywhere and at all times. They are the true world inhabitants; and the notion that an egg laid in China is any different from an egg laid by a hen in Connecticut or in California is the fanciful and selfish production of those who have never heard the friendly greeting of the hen in strange

## RADIUM AS CANCER CURE

Is Especially Useful in Healing Superficial Cancers of Skin and Other Cases.

stage to be remedied.

dealt with by radium. fectively treated with radium. A por- zine. ter suffering from this disfigurement had repeatedly been refused employment. He went to the institute and after a time the mark was entirely eradicated

Plymouth Rock Wonder. Dexter, Me.—Ralph C. Blethen claims the New England record for hatching chickens. Three weeks ago he placed thirteen eggs beneath one of his prize Plymouth Rock hens. When he inspected the nest he discovered eighteen chicks. His only explanation is that some of the eggs must have been double yolked.

### FACTOR IN MODERN WARFARE

Commanding Generals Could Not Handle Present Enormous Armies Without the Motor.

With millions of men drawn up in battle array at one and the same time, to handle them effectively by old-time methods would have been impossible. Even before the opposing fronts were extended to their fullest degree in France alone, they were officially declared to have attained a length of 300 miles, and one of 270 miles in the east-figures which not only convey some indication of the stupendous size of the engaging forces, but even more emphatically suggest the tremendous responsibilities of the com-

manders in chief. Nevertheless, although they have to deal with millions instead of tens of thousands, the commanders concerned have never had their forces so completely under control; in every phase of the warfare, whether of transport, attack, defense or supply, the keynote of the operation has been effectiveness of the completest kind.

The motor, in short, has "speeded up" the war in a way that could never have been dreamed of by former generations. Never have the movements of troops been so rapid; for, instead of men having to wait for ammunition and food supplies, these have been conveyed by motor wagons which can travel, if need be, much faster than the armies themselves.-Charles L. Freeston in Scribner's Magazine.

Vogue of White Paint.

A clever decorator who remodeled the dining room in a New England farm house has even gone so far in her use of white paint as to finish the Of 746 cases of cancer treated in floors with it. > Chinese Currency. Currency in China has had all sorts of surprises for the layman, but the present situation is simply extraordinary. There is now found to be an actual plethora of dollars and small coins, and since last August the Chinese have been melting them and converting them into sycee. The reason why dollars are being melted is that large issues of the provincial mints have found no use in the market, and as all Chinese accounts are in taels the present price of the dollar is not very conducive to its existence and eirculation.

### AN ESCAPE AT SEA

A Yankee Prisoner Takes to the Water

By WILLARD BLAKEMAN 

In the autumn of 1914 when the German cruisers were destroying British commerce on the high seas Jack Marston, an American boy, was an ordinary seaman aboard the English ship Sea Gull. That wasn't the real name of the vessel, but there are reasons why it should be fictitious. Jack had been brought up on the Maine coast and was as much at home in the water as on shore and nearly as much at home in it as out of it. At any rate, he preferred to be in it.

Just why he shipped aboard a British vessel instead of an American does not appear, though American ships being few and far between it is probable that he would have been obliged to look for some time in order to get a berth on one. He was in Portland one day and, finding the Sea Gull there | man was gaining; then for an hour and about to make a trip to Valparaiso she neither lost nor gained. Jack, who and return, concluded to sign for the

One morning when the Sea Gull was not a hundred miles from the port of her destination her captain espied on her port quarter a war vessel too far distant to make out to what nation she belonged. He was not long in doubt, for the ship headed for the Sea Gull, and when she came near enough the German flag was seen flying from her stern. She proved to be the Emden, one of the most remarkable of the commerce destroying cruisers of that period.

The Sea Gull being defenseless, her captain and crew realized that her sailing days were ended. They were taken aboard the Emden, and their ship was scuttled and sunk. That Jack Marston was a United States citizen was no especial advantage to him, for, being a member of the crew of a British ship, he was subject to the same terms as the others. However, there was nothing to be done with the captives until the Emden's commander could find some way of getting rid of them, and they were all kept aboard the Emden. They were considered prisoners of war, but not placed in confinement. Indeed, there were crews of two other captured ships aboard, besides a number of passengers.

Jack had not shipped to be kept aboard a German cruiser, darting hither and thither hunting for the merchant marine of Germany's enemies, and was much disgruntled. He told the captain of the Emden that he was an American citizen and asked to be furnished the means of getting ashore. But he had no proofs of his citizenship and even if he had would probably not have been entitled to different treatment from the other captives.

Jack having nothing to do, his mind turned on the problem of regaining his liberty. He did a great deal of thinking, with no practical result. There may be regularly planned escapes, but Jack, being out on the ocean, usually hundreds of miles from shore, might plan till the crack of doom without hitting upon any way of getting ashore even if he could elude the officers and crew of the Emden. If the cruiser had put into port the matter might have been feasible. But this she dared not do for British warships were watchplace for the Emden was far out at she was not likely to be found, and if her she would have plenty of room for

Such being the case, Jack soon made up his mind that he must wait for an not likely arise unless the Emden and he was being rapidly left astern. found it essential to approach the coast, either for supplies or to get rid of her prisoners, who were making great inroads into her stock of provi-

Jack one morning on awakening was surprised to see land not two miles from the ship. The Emden was steaming northward, skirting the shore. The reason for this was soon apparent. Jack saw seaward a British man-ofwar, cruising along in the same direction as the Emden. It was evident that the latter was keeping within the limit of three miles from shore, which by international law is neutral waters. Jack looked at the shore longingly. He would have undertaken to swim to it. but in broad daylight it would be impossible for him to leave the ship without being seen. He resolved to wait till night. But when night came the idea of committing himself to the black, inhospitable waters to swim between two or three miles to a shore he could not see was too much for even his water pluck, and he dared not try it. He hoped for an opportunity just before dawn.

But during the midwatch a fog rolled in, and the captain of the Emden, taking advantage of it, ran out to sea, and when the next day the fog lifted she was out of sight of land. Jack ground his teeth, for he feared that he

would not again get so near the shore. That day one of the Sea Gull's crew died. The sailmaker of the Emden was engaged in making a bag in which to give the corpse a sea burial, and as Jack sat watching him at work an idea entered his head. One might put him | vire for any more of it.

be thrown overboard and thus escape. Escape where? Swimming on the bosom of an ocean unless there is a vessel near or land within reach is an undesirable change even from captivity. No; there was nothing in that

idea and it was banished.

That afternoon a cloud of smoke appeared on the horizon, and soon the black hull of a war vessel loomed up.
There was a commotion on board the Emden, for the vessel might be a Brit-ish warship. The captain permitted her to come close enough to see that she flew the union jack of Great Britain and that she was a much larger craft than the Emden. Then he began to show his heels.

That night the lights on the Emden were darkened, and she changed her course several times. Quite likely the British ship also covered her lights. At any rate, she was not to be seen. The Emden's captain hoped that when daylight came again he would be rid of her. Unfortunately for the Emden the night was bright by the light of a full moon, so that she could be seen by her pursuers.

The next morning at dawn Jack Marston went on deck and at the first break of day descried the British ship somewhat nearer than the night before. The Britisher must have discovered the Emden at the same time, for a dense cloud of smoke issuing from her stacks indicated that she was putting fuel on her fires. The Emden followed suit and made every effort to escape. For a time it seemed that the Englishwas watching her closely, made up his mind that she was slowly losing.

Now, the crew of the Sea Gull were hoping that they would be rescued, and when Jack told them that the Britisher was slowly losing ground they were much disappointed. Jack determined to take an awful risk. That was to get himself sewed up in the burial bag and thrown overboard, with the hope of being picked up by the pursuing ship. He told his mates of his plan and asked them to help him. They looked upon his scheme as foolhardy and tried to dissuade him from it. But when they found that this was impossible they offered to do anything he suggested in their power.

Jack's plan was this: The attention of the officers and crew of the Emden was confined to getting away from the pursuing ship. The Sea Gull's men might steal the body of their dead comrade and hide it. They might then sew Jack up in the burial bag and heave him overboard without permission. They might omit the shot usually tied to the ankles for sinking purposes, and Jack would not remain long under water. On rising he would endeavor to attract the attention of the

The crew of the Sea Gull agreed to do their part in the matter. If Jack wished to commit suicide he might do so. That was his lookout, not theirs. So when every one of the Emden's crew was intent on the pursuer they took the body out of the burial bag, and Jack got into it with pieces of cork tied under his shoulders, some provisions in a rubber bag, a bottle of water, a knife and a piece of white cotton cloth attached to a stick for a little basket would make a most wel-

It was decided to ask the captain of the Emden for permission to bury their dead companion. He was too busy at the time to give any thought to their request and granted it with a nod of the head. Then the sailors carried Jack to the side of the ship and, standing about him uncovered, slid him overboard.

Jack did not mind being discovered in the water by the Germans, for he knew they would not think of stopping to pick him up. He was not below the surface more than twenty seconds, but ing the harbors. Indeed, the safest when he reappeared the cruiser was going so fast that she was already sea, where the area was so large that | quite a distance from him. The gaze of most of them was in his direction, sighted by an enemy too strong for but was fixed on the pursuing ship. One man caught sight of him, but Jack simply floated on the surface and was probably supposed to be the corpse that had been given burial. At any rate, opportunity, and an opportunity would no especial attention was paid to him,

Jack's main fear was that the Britisher, being in a hurry, would fail to pick him up even if he succeeded in attracting her attention. He was directly in her line and with his white flag would likely succeed in making himself seen. She was nearly half an hour behind the Emden and losing. When a few hundred yards from him he waved his flag. He knew that he was seen, for he saw several persons pointing at him and evidently discuss-

But Jack was horrified to see the ship proceed on her way without stopping for him. She had gone nearly a mile beyond him when a gladdening sight met his view. There was a boat being lowered. There were men in it, and when in the water and loosened

from the ship they pulled toward him. Jack was picked up, and the ship waited for the return of her boat. Her commander was conscious of losing on the Emden and had decided to save the man in the water. When Jack was taken aboard he was plied with questions as to the German cruiser, but could only say that she was the Emden and had aboard the crews of sev-

eral vessels she had sunk. Jack was put ashore at a South American port and determined that when he committed himself again to the deep he would go under the Amer-Ican flag. After waiting some time he found a berth on a United States vessel and in due time turned up on his native shore. He says he is quite content with his experience as a sailor en the ocean in wartime and has no deAUTUMN HAT.

White Heckle Makes a Smart Chapeau For Fall. 

AN ADVANCE MODEL.

Featured is the latest creation in feather turbans. It is a smart winged affair of pure white heckle and may be appropriately worn with a suit or frock.

### VACATION TIME FUN.

Why Don't You Begin Gathering Christmas Gifts Now?

The "Do Your Christmas Shopping Early" signs, which make their appearance between four and five months from now, really ought to be tacked up in the summer, for that is the very best time to shop as far as the comfort that comes from uncrowded stores is concerned.

So why don't you do your Christmas shopping now? If you are in the city look about the shops at your leisure and choose your gifts carefully. You will find uncrowded aisles and experienced and rested salesmen and saleswomen, a far different condition from that which prevails after the 1st of December.

If you are traveling about the United States this summer buy your gifts on your travels. Make out a list of such friends as you wish to remember with gifts at Christmas, and whenever you find anything that would make a particular appeal to one of them buy it and make note of it.

If you are spending the summer at the shore or in the country or in the mountains you can still do much toward getting your Christmas gifts together. Even if there are no shops near at hand there are lovely things to be had for a little pleasure giving exertion on your part.

Suppose you have a summer home in the country. Why not make jams and jellies of the wild fruits in your neighborhood? Wild plum conserve, wild grape jelly, wild blackberry jam-all these have a delicious flavor if properly made. At the nearest country store you can probably get attractive little jam pots in which these preserves, jams and jellies can be packed. If not, you can send to the nearest city for a consignment of the right sort of glasses

Half a dozen jars of jam packed into ome gift to a young girl at college next Christmas. Four jars of assorted jelly daintily tied with holly and ribbons would be welcomed by an invalid friend, and the fact that they were made from wild fruits would carry a suggestion of freshness and health.

If you cannot make these preserves yourself perhaps you can buy them at some farmhouse. And perhaps there will be jars of extracted honey for sale and cakes of maple sugar. Or perhaps you can make little net bags to fill with sweet lavender blossoms, first put in colored silk bags.

Pillows filled with pine needles and covered with linen covers that may be appropriately embroidered or stenciled with cones are another dainty gift from the country.

For a child in school a scrapbook filled with carefully mounted specimens of wild flowers would prove use ful and interesting. And you might dig up some small ferns in the woods and start them growing in pots. Later they could be put in pretty basket holders for gifts.

From the seashore bayberry candies, hand dipped, of course, are an appropriate gift. They can be given in sets of four or six, or one can be set in a candlestick of brass or pottery.

Bundles of driftwood, too, are welcomed by the woman with a fireplace. And bags or boxes or unusual shells are liked by small children.

### SOME SANDWICHES.

Pumpernickel Sandwiches. Slice thin, butter, cover with slices of bologna and a little chopped dill pickle.

Rye Bread Sandwiches. Between well buttered slices of rye bread spread a layer each of wafer thin slices of Bermuda onions, lightly salted, and bologna sausage.

Cheese and Anchovy Sandwiches. Blend well together Parmesan cheese and anchovy, one part of the fish to two of cheese. Add a little dill and spread between slices of zwieback.

Honey Sandwiches. Spread honey between slices of bread and butter, taking care that it does not run over the edges.

Fig Sandwiches. Chop figs fine, add a little water and cook slowly until the right consistency for spreading. Add a few chopped nut meats and a little finely shredded orange peel and spread between thin slices of brown bread.

## PLAN LIKE BUILDER

Germans Prepare for Battle With Great Precision.

Decide on Certain Plan, Provide Necessary Soldiers and Equipment With Margin for Miscalculation, but No More, Never Less. Separation .

Petrograd.-In an interview with a correspondent a Russian general who fought in the Galician battles has just explained the German plan of campaign which has resulted so successfully this summer.

He said the Germans plan battles as builders plan houses. A builder gets together his blue prints and his estimates, engages a sufficient number of workmen and a certain quantity of material and sets to work. He doesn't try to build a bigger house than he has materials or labor for. Of course, accidents or bankruptcy may prevent the execution of the plan.

Similarly the Germans plan that a certain thing shall be done; they bring up the necessary soldiers and the necessary guns, shells and bullets, with a margin for miscalculation, but no more and never less.

They may, through accident or miscalculation, fail. But they never start fighting on the principle of doing the best with the men and shells they have.

To revert to the house parallel: The house may collapse during construction, owing to a mistake. But the builders will not decide suddenly that they have not enough material and dock the house off one story, nor will they abandon the house half built, because of lack of workmen or material. They know what they want to do. The battle planned and prepared for months in advance is a precise work.

The whole eastern campaign shows this. When the Germans won at Tannenberg they planned the march on the Lower Vistula, which ended near Warsaw. Hardly had they retreated when they tried a new vast and clearcut operation from Thorn. When that stagnated on the Bzura they were preparing the battle of the Masurian lakes, which was a great victory, and hardly was over when they were sending their armies south to assault the Dunajec:

"The Germans, in short," said the general, "never start fighting on the principle that would make them say we have so many men, so many guns -let us have a shot at the foe and do him as much harm as we can with these men and guns. They plan the shot first, see that they have the men and guns to execute the plan, and do not touch a plan which is from the

first plainly beyond their strength. "Thus, they never once tried to crush our army as a whole. That is beyond them. Even admitting their technical superiority and good munition supply, they would want, in order to crush us by one operation, at least as many men as we have. Their way is to plan relatively small operations, which attack only one section of our front, in the hope of destroying this section before we can strengthen it.

"The battle of the Dunajec shows that the enemy planned to take these lines and to reach the San. He prepared everything for this, and something over, but did not intend to march straight to Lemberg. When he reached the San he had to stopapart from our attempts to counterattack.

"Then he brought up, no doubt, shells, food and men for his next operation. He treated the next operation as a self-contained thing, and until it succeeded or failed he would attempt no more. Also he will not attempt a modified plan. If he feels too weak he will try something new, which, according to his judgment, is within his strength."

### EAGLE FIGHTS FOR YOUNG

Superior Deadliness of the "Female of the Species" Is Demonstrated in California.

Merced, Cal.-William Barcroft and Manuel Thomas returned from Pleasant Valley converted to Kipling's theory of the superior deadliness of "the female of the species," after having a terrific fight with a mother eagle for an hour and a half.

The two men scaled an oak tree to examine an aerie and found the whole family, father and mother eagle and two eaglets, at home. After shooting and killing the male in self-protection, Thomas joined forces with Barcroft against the beak and talon attack of the infuriated mother bird.

After an exhausting conflict they managed to grab her by the neck and pull her talons from the flesh of Barcroft's arms, which are very much cut and scratched.

Fearing to release the bird and risk another encounter, the men brought the eagle and her young ones to town for exhibition.

Band Leader at Seven.

Muncie, Ind.—At the concert given in the town hall at Eaton a few nights ago by the Garrett Boys' band, which is to play at the National G. A. R. encampment in Washington, D. C., in September, the director was Paul Garrett, seven years old. The boy, who is a son of E. W. Garrett, organizer and general manager of the band, is an accomplished musician and director notwithstanding he is in years little more than a baby.

### DOCTOR HERO RETURNS

Dr. Samuel W. Hodge of Knoxville, Tenn., one of the original Red Cross contingent to go to Serbia, returned recently to the United States.

Doctor Hodge was the roommate of Dr. James J. Donnelly, who died from typhus in Serbia, and was himself stricken with the dreaded disease and was ill for 26 days, part of the time being cared for on the yacht Erin by Sir Thomas Lipton. Afterward he took charge of the Tetova district, where he cared for 800 typhus patients. The young doctor has been decorated with the Serbian Red Cross medal for his work in that country.

### SHE TAUGHT 70 YEARS AGO

Oldest Among Teachers at Connecticut Is in Her Eighty-Fifth Year.

Franklin, Conn.-At the Old School week in Willimantic the oldest among the teachers who returned for the reunion was Mrs. Julia Ayer Verplanck, in her eighty-fifth year, mother of Superintendent of Schools Frederick A. Verplanck of South Manchester. She was a Franklin girl, who, nearly seventy years ago, taught in Windham, South Windham and Norwich. Her first salary was \$12 a month "and board around." She taught in all 13 years, her highest salary being \$325 a year. She thinks that teachers of today may well be content with comfortable school buildings and good

The first winter she taught, she says, the "ventilation was quite modern-air currents from the baseboard, under which one could pass a hand or

When she taught at Windham Center most boys as well as girls brought handiwork from the homes to do when not studying their books; it was the forerunner of the modern system of manual training.

It is believed that Mrs. Verplanck is the oldest living teacher in Con-

### CAUGHT POOR-BOX ROBBER

Caretaker of Catholic Church in Milwaukee Rigs Up His Own Alarm Device.

Milwaukee.-Louis Kowalski of Chicago, arraigned in district court on a charge of stealing 40 cents from the poor box of the Holy Trinity church, can trace his downfall to the inventive genius of George Miller, caretaker of the church.

For several weeks complaints of money being stolen from the poor box had been received. Tired of the many thefts, Miller rigged up an alarm, which he attached to the box and connected with his quarters.

He was sitting in his rooms the other afternoon when the alarm sounded. Rushing into the church, he came upon Kowalski, who was kneeling as if in prayer. An investigation by Miller brought to light a jimmy and a number of other burglar tools. He summoned a patrolman and Kowalski was arrested.

### GIRL OF 19 WEDS MAN OF 89

Then Happy Couple Start on Their Wedding Trip in an Automobile.

Greenfield, Mo .- "Uncle Matt" Mc-Pherson, eighty-nine years old and one of the pioneer citizens of Dade county, and Miss Clara Burns, nineteen years old, of Higginsville, Mo., were married at the courthouse here recently. The ceremony was performed by Rev. William Shaw of this city.

The young bride arrived at Lockwood, where the bridegroom lives, on a train. "Uncle Matt" was at the station to meet her. Within a few hours "Uncle Matt" had donned a new suit of clothes and, engaging an automobile, set out for Greenfield.

### Cannon Has New Job.

Pemeta, Okla.—An old army cannon which is said to have seen service during the Civil war, has been received here by express from Philadelphia by Glenn Green, tank farm foreman for the Quaker Oil company. Green is a veteran of the Spanish-American war. The Quaker company recently bought the cannon and shipped it to the oil field for use in shooting steel tanks in case of fire. This cannon was made in 1862.

### TOLD OF QUAINT COUNSELOR

Of Course It Will Be Recognized as a Fable, Since There Is None Like Him.

Once upon a time an unfortunate traveler fell off from the top shelf of a sleeping car and dented his left kneepan quite a good deal. He forthwith hied him, limping and lamenting, to a lawyer who was reputed to be so honest that he preferred to tell the truth even when a lie would do just as well, and would not accept a retainer from a client unless the latter had a just cause for action. He also had plenty of time to practice on the violin.

"I choose to sue the soulless corporation for \$10,000 damages," qouth the injured man, "both because I really am damaged fully \$16 worth and also because \$10,000 is the only sum for which anybody ever sues a corpora-

"Pish, likewish tush!" returned the attorney, reaching out for his faithful fiddle. "You would but waste your time and mine, for the counsel for the defense would make you a laughing stock and cause your dreams of avarice to turn to ashes in your mouth, by proving on your own testimony that you were lame from your berth.'

Ah, was he not a queer lawyer, thus to carelessly throw away an opportunity for a fee, merely to make a sad witticism?—Kansas City Star.

### PUBLIC SALE \_\_ OF \_\_\_

Three Valuable Farms In Uniontown Dist., Car-

roll County, Md. The undersigned will offer at public sale on the premises of Tract No. 1, on

TUESDAY, AUGUST 31, 1915, at 2 o'clock, p. m., all those three valuable farms located along the State highway running from Taneytown to Westminster, about three miles from the former place, in Uniontown District, Carroll county, Maryland, and which formerly belonged to the estate of Clotworthy Birnie, deceased.

Tract No. 1 contains 1731/2 ACRES AND 20 SQUARE PERCHES, nore or less, improved by a rough cast Stone Dwelling House, with 15 rooms, basement kitchen and linen room, with large Bank Barn, Hog Pens, Wagon Shed and other necessary outbuildings, with well of good water and cistern at house and barn.

Tract No. 2 contains 150 ACRES AND 67 SQUARE PERCHES, more or less, located contiguous to Tract No. 1, in said Uniontown District and improved by a Good Weatherboarded Dwelling House, 7 rooms, basement kitchen, Large Stable, Hog House and other necessary buildings, and a well of excellent water at the house. Bear Branch, a never-failing spream of water, runs through this tract and Tract No. 1.

Tract No. 3 contains 1141/2 ACRES AND 32 SQUARE PERCHES, more or less, and is located contiguous to Tract No. 1, in said Uniontown District, Carroll County, Maryland. This property is unim-proved, the land is in a high state of cultiva-tion, and adjoins the lands of Curtis Ecker and the late Colonel Goulden, et al.

the late Colonel Goulden, et al.

The above properties ofter opportunities to any person desiring to purchase valuable and productive farms, and the land is very fertile, located in the northern part of the County within a short distance of several markets and convenient to churches and schools.

The aforesaid tracts will be offered separately and then as a whole, and sold to the best advantage. This is the same property which was formerly known as the Clotworthy Birnie estate and is fully described in the deed from Clotworthy Birnie, Trustee, to Adam M. Kalbach, by deed dated September 20, 1907, and recorded among the Land Records of Carroll County in Liber D. P. S. No. 108, folio 97, was devised by the said Dr. A. M. Kalbach to the undersigned and now occupied by Mr. L. H. Winter.

Winter.

TERMS OF SALE: One third cash on the day of sale, one-third in six months, and one-third in twelve months, the deferred payments to be secured by the notes of the purchaser or purchasers, with approved security, bearing interest from the day of sale, or the whole of the purchase money may be paid in cash at the option of the purchaser.

J. N. O. Smith, Auctioneer. E. O. Weant, Attorney.

## SUNDAY SCHOOL.

Lesson X.—Third Quarter, For Sept. 5, 1915.

THE INTERNATIONAL SERIES.

Text of the Lesson, I Kings xviii, 30-Text, Prov. xv, 29-Commentary Prepared by Rev. D. M. Stearns.

Elijah had been so safely hidden by the Lord during the three years that though Abab had searched for him everywhere, in all lands, he could not be found (verse 10). How safe are those whom the Lord hides, and all His redeemed are hid with Christ in God (Col. iii, 3; Ex. xxxiii, 22; Isa. ii, 10; Zeph. ii, 3). As by the word of the Lord he was sent into hiding at Cherith and Sarepta, so by the same word he is now commanded to shew himself to Ahab (xvii, 2, 8; xviii, 1). He was indeed a man of God, God's representative, acting only for God and in His name, and, as in the resurrection of who is the resurrection and the life, so the words "shew thyself" remind us of Him who after His resurrection from the dead "shewed Himself alive" again and again during the forty days (John xxi, 1, 4; Acts i, 3).

We are glad to meet Obadiah, whose name means "servant of Jehovah," and to see him saving the life of and caring for a hundred of the Lord's prophets (xviii, 4, 13). As we see him the governor of Ahab's house we think of Joseph in Egypt overseer of Potiphar's house (Gen. xxxix, 1-6). Good men are often in difficult places for the glory of God. As Obadiah and Ahab went each his way to search for grass for the horses Elijah met Obadiah and thing, which is good enough for his told him to tell Ahab that he was on purposes where we would see nothing hand (xviii, 8, 11, 14). Obadiah was at all.--Philadelphia Record. at first afraid that Elijah might again disappear, but on being assured that he would surely shew himself to Ahab he went to meet Ahab and told him, 15, 16). Fearlessly Elijah accused Ahab and ordered him to gather all Israel and the prophets of Baal to Mount Carmel, and this Ahab did, for the word of the Lord in the mouth of Elijah was with power (xviii, 17-20).

Elijah boldly demanded of the people to decide whether they would follow Jehovah or Baal and not continue halting between two opinions. But the people were dumb. Then he said that, though he was but one against 450, he would suggest a test and that they should worship the God who answered by fire, and to this they agreed (21-24). He gave the prophets of Baal the first opportunity, and, following his instructions, they prepared their sacrifice and cried unto their god from morning un til noon, "O Baal, hear us!" But there was no answer. Elijah mocked them and urged them to cry louder, saying that he must be busy or on a journey or perhaps asleep. So they cried aloud, and leaped upon the altar, and cut themselves till the blood gushed out, evening sacrifice. But it was all in vain, for there was no answer of any kind, and no unseen power regarded their cries (25-29).

We may wonder why the devil missed such an opportunity to honor his worshippers, for the time will come when he will send fire from heaven (Rev. xiii, 13), but he can do nought without permission from God, and he was surely restrained this time. Now consider Elijah as he called the people to him, repaired the altar of the Lord and, taking twelve stones to represent the twelve tribes of Israel, built an altar in the name of the Lord, put the wood in order, prepared the sacrifice and drenched the whole with twelve barrels of water until the water ran about the altar and filled the trench (30-35). Listen now to Elijah talking to his God, not crying aloud nor with frenzy or demonstration of any kind, but calmly, with quietness and confidence. "Lord God of Abraham, of Isaac and of Israel, let it be known this day that thou art God in Israel, and that I am thy servant, and that I have done all these things at they word. Hear me, O Lord, hear me, that this people may know that Thou art the Lord God and that Thou hast turned their heart back

How the great multitude must have listened to this simple prayer and how intently they watched this lonely man of God! We, too, have been watching him and listening to him talking to his God, the God of Israel, the only living and true God, and now behold the answer, "Then the fire of the Lord fell and consumed the burned sacrifice and the wood and the stones and the dust and licked up the water that was in the trench." How can we refrain from shouting "Jehovah, He is the God?" (Verses 36-39.) And we must add: "Who is like unto Thee, O Lord, among the gods? Who is like Thee, glorious in holiness, fearful in praises, doing wonders?" (Ex. xv, 11.) Quickly were the prophets of Baal slain, and Elijah said to Ahab, "There is a sound of abundance of rain." Then Elijah went to the top of Carmel to pray, and it was patient, earnest, persevering prayer, for the servant went seven times to look before he saw the indication of the coming storm in the form of a cloud like a man's hand, suggestive of Elijah's hand taking hold of God (verses 40-46; Jas. v, 18). If our aim is simply to glorify God we may safely act upon Jer. xxxiii. 3. Consider David and Hezekiah in I Kings xvii, 45-47; II Kings xix, 19, and fear not to pray (Pa. cix, 21, 27).

A New York engineer was surveying the route of a branch line for a railway system. An old backwoodsman with whom he stopped for a file. with whom he stopped for a time admitted one day when he saw the engineer figuring in the field that mathematics always seemed a wonderful thing to him.

Being young and enthusiastic, the engineer began to enlarge upon its Carries 4-Inch Quick Firing Gun Which wonders, telling the farmer how we could measure the distances to different planets and even weigh the 39-Memory Verses, 36, 37-Golden planets; how we could foretell the coming of a comet or an eclipse years in advance of its actual occurrence, determine the velocity of the swiftest projectiles, ascertain the heights of mountains without scaling them, and many other things meant to astonish the old man.

"Yes, them things does seem kinder curious," said the old man, "but what always bothered me was to understand why you have to carry one for every ten. But if you don't," he continued with conviction, "the darned thing won't come out right."-Everybody's Magazine.

Seeing In the Dark.

Sir J. J. Thomson is authority for the statement that when a body is heated above the temperature of boilthe widow's son he foreshadowed Him | ing water it ordinarily begins to be faintly visible, especially by averted vision, but no definite color is discerned until the temperature has risen considerably higher. This suggests that the first effects are felt by the "rods" and not by the "cones," which together form the retina. The cones are specially concerned with the perception of color. From this one would infer that animals which see in the dark must have retinus particularly rich in rods, and physiology shows that this is notably true of the owl, whose retina is remarkable for the extremely great proportion of rods to cones. In a faint light, states Professor Thomson, the owl sees no color, but he sees some-

A Remarkable Toad.

The toad of Surinam, Dutch Guiana, is very remarkable in one respect. It and Ahab went to meet Eiljjah (xviii, | first awakes to life while on its mother's back. When the eggs are laid the of forsaking the Lord and serving Baal male takes them in his broad paws and contrives to place them on the back of its mate, where they adhere by means of glutinous secretion and by degrees become embedded in a series of curious cells formed for them in the skin. When the process is completed the cells are closed by a kind of membrane, and the back of the female toad bears a strong resemblance to a piece of dark honeycomb when the cells are filled and closed. Here the eggs are hatched, and in these strange receptacles the young pass through their first stages of life, not emerging until they have attained their limbs and can move about on the ground. Over 120 eggs have been counted upon the back of a single Surinam toad.

The Boy-Yes, sir; she has it now. The Employer-What do you mean?

The Boy-Why, she called up this morning and asked me if I was the new boy, and I said, "Yes, ma'am." And she said it was no place for a truthful boy. She said you had no use for a truthful boy. Then she said, "Did you ever tell a lie?" And I said,

"And what did she say?" "She said, 'You'll do!' "-Cleveland

Plain Dealer.

Porto Rico's Telephone Plant. Porto Rico has one very unique kind of "telephone plant," says the Western Electric News. It is an air plant something like an orchid. It has no roots, but derives its nourishment from the air, the seeds evidently being carried by the wind or birds and insects to some substance where they lodge and sprout. This growth is found most frequently on insulated wire, although it has been observed on bare iron wire that has rusted. It has never been seen on new bare iron, copper wire or cable and causes little trouble, as the mass is seldom large enough to cross two wires.

Way of a Woman.

"So he won her by fighting with his rival. I shouldn't think such a little shrimp of a fellow could put up much of a battle."

"Oh, he got licked; that's what made him solid with her-that's just like a woman, you know."-Florida Times-

Mines In Naval Warfare.

Floating mines, under various names, have figured in naval warfare for nearly 350 years, but they were first used with really deadly effect in the Russo-Japanese War of 1904-5.

Nettle Juice Dye.

A fine yellow dye is produced from the roots of nettles boiled in alum. The juice of the stalk and leaves is used to dye woolen stuffs a brilliant and permanent green.

Paper In Arabia.

Paper was made from rags in Arabia more than ten centuries ago, the art being brought to Europe in the Phirteenth century.

Love, like fortune, turns upon a wheel and is very much given to rising and falling.-Vanbrugh.

Latest German Submarine Is Formidable Fighter.

Fires 31-Pound Projectile Which Will Penetrate Ten Inches of Iron at Close Range.

London.-That the latest German submarines are practically submerged light cruisers and carry guns which make them fully as formidable in offensive as vessels of the latter class. is the statement made by a leading English authority on naval matters.

"When the war broke out," he said. 'Germany, like the other sea powers, had a certain number of submarines that carried guns. These, however, were small weapons. The caliber of the piece and the way in which it was mounted made it ineffective for such purposes as sinking a ship. Really, these submarine weapons, whether placed outside the boat or on a rising carriage, were little more than experiments.

"Germany is now using much larger submarines, and these are armed with four-inch quick-firing gun, which bears about the same relation to the earlier submarine weapons that the 17inch howitzer does to the ordinary field pieces.

"In addition to introducing this big gun into their submarines, the Germans have mounted it in a very ingenious manner. Gun, platform, etc., are carried snugly inside the boat while she is cruising, and the method of bringing it into action is very quick and efficient. Two men take their seats on the elevator platform beside the gun. A pull on a lever and the platform shoots up, carrying the gun with it.

"As it rises from the boat the gun lifts off a hatchway, which automatically forms a protective shield for the gun and the men who work it. One of these men trains the weapon around to whatever direction is required, while the other elevates or depresses, and also fires it. Another pull of the lever, and down drops the gun again, the hatchway closes automatically above it, and the submarine is ready to dive.

"For attacking merchant vessels this four-inch gun comes much cheaper than torpedoes would, and in some ways it is more effective. A torpedo costs thousands of dollars, and it may miss its mark. Scores of German torpedoes have done so. But a round for a four-inch gun costs little and if the first shot fails a second can be sent quickly after it.

"Besides this, the gun has a long range. It fires a 31-pound projectile with sufficient velocity to penetrate ten inches of iron at close range, which means that the shell will carry a long way, and it is more difficult for a ship to escape from a submarine thus armed than from one using torpedoes only, particularly so as the Germans have adopted for use in their submarines a torpedo that has a short range, but carries an unusually pow-

### COULDN'T SWEAR TO A LIE

So Indiana Woman Was Unable to Get a License to Get Married.

Columbus, Ind.—"I'll not swear to a lie," declared Mrs. Bertha M. Blume, who lives a short distance north of here, when her daughter, Miss Iona R. Blume, begged her to sign an affidavit that she (the girl) was old enough to get married. Mrs. Blume, her daughter, and Thomas V. Hobbs, a farmer, had gone to the county clerk's office to obtain a marriage license.

The girl appeared to be young and L. J. Cox, county clerk, asked her age. She replied that she was over sixteen. "The law is pretty strict about such

matters as this," the clerk said, "and I will just write out a blank affidavit here for Mrs. Blume to sign, showing that you are sixteen years old."

"I'm not going to swear to a lie about her age," the mother declared. "Please go on and sign it," the girl begged. But the mother would not do

The girl was sobbing when she left the clerk's office after a license was refused.

### FORCEPS SURGERY SAVES M. D

Dressing Operation Wound, Wife Finds Towel Sewed in Seven Months Previously.

Toms River, N. J.-Dr. J. Edgar Todd was operated on December 7 for kidney trouble at the Long Island Medical college.

The other day Mrs. Todd was dressing the wound, which had never healed, when she saw something white projecting. She took hold of it with a pair of forceps, and after an hour and a half extracted a surgeon's towel, about ten inches square. It had been left in the body at the time of the operation.

Since the removal of the towel Doctor Todd has shown improvement.

Veteran, 120, Wants Pension. Prankfort, Ky.-Alexander Bates of Bolivar, Mo., who alleges he is one hundred and twenty years old. His made application for a pension. His application states that he is a Mexican war veteran and that he enlisted in Lexington in 1845. He says he came to America in 1812.

in Europe.

History tells us that on Napoleon's fatal retreat from Moscow the wearied troop were constantly harassed by hungry wolf packs. Today it is said that the wolves have gathered from their fastnesses in the forests of Poland and South Russia to gorge upon the battlefields of the eastern front, London Tit-Bits remarks.

Some time ago an officer gave a graphic description of the long lines of wolves stealing from the coverts at nightfall, passing within a few feet of him as he lay wounded, and he stated that the sight of these gaunt forms, dimly limned against the dark sky, as they busied themselves with their ghostly feast, would never be effaced from his mind.

Referring to the movements of wild boars. M. Cunisset-Carnot states that by the middle of August, when heavy cannonading was proceeding along a vast front in northern France, rumors of strange occurrences began to come in. Foresters and woodmen reported that south of the lines of battle herds of wild boars began to invade country to which they were before entire strangers. So rapidly did their numbers increase that soon they were to be met with everywhere.

### PEER WHO SWAM NIAGARA

Skeptical American Not Satisfied With Desborough's Statement So His Lordship Does It Again.

Among the peerage a fine patriotism has been shown during the war, but no member of the nobility has interested himself more in patriotic causes than Lord Desborough.

He is known as one of the most remarkable sportsmen of the day, but very few people are aware that he has swum Niagara Falls on two separate occasions.

After accomplishing the feat once he was about to return to England, and before the boat sailed was discussing the subject with some friends.

An American, who was standing by skeptically at last broke in with: "Did I hear you say you had swum Niagara?"

"Yes, I have," answered his lord ship.

"That's not good enough!" laughed the Yankee. "No man could attempt it and come out alive."

Lord Desborough shrugged his shoulders

"Then I had better go back and swim it again," he said. So, to the amazement of the American, he calmly went back and swam Niagara for the second time.

Simple Life at St. Andrews.

The university of St. Andrews, where Professor Herkless is appointed principal in succession to Sir James Donaldson, formerly bore closer resemblance to our southern seats of learning than the other Scottish universities.

The practice of residing within the walls prevailed longer here than elsewhere, and ceased mainly because the rooms were allowed to become uninhabitable in the interest of the professors' Candlemas dividends. Andrew Lang once met an aged St. Andrews man who remembered the last undergraduate resident in college. He certainly lived "the simple life." because he cooked for himself and peeled his potatoes with a razor!

But the resident undergraduates must have been troublesome tenants, says the Westminster Gazette. They had a playful habit of breaking all the windows when they left, and one of them declared that if he did not get more drink he would burn down the college.

Defying the Stomach.

While trying to drink a quart of whisky without taking the bottle from his lips Isaac B. Pierson of Clarksville, N. J., recently succumbed to heart trouble. He had won the whisky on the Harvard-Yale football game, and was so elated that he insisted that his stomach was as good as his judgment. He had almost accomplished the task when he dropped to the floor.

More fortunate was Willis Hunting of Milwaukee, who took to himself a short time ago the title of champion almond eater of his city. He was very fond of burnt almonds and on a wager agreed to consume a five-pound box. He performed the feat, ate half a pound more to show that he had not won by a fluke and then-took to his bed. A doctor had to be called, but with the liberal use of the stomach pump Hunting pulled through.

Boy Sticks in Freezer.

While playing hide and seek with his companions, Rocco Masta, aged seven, crawled into a big ice cream freezer standing in front of a fruit store at Altoona. Pa. He became wedged in the can in such a way that he could not extricate himself, and his parents were notified of his plight.

The mother fainted. The father hastened to the store, and by the time Rocco was rescued he was almost frozen, for there were ice and brine in the tub. He will recover.

One She's Overlooked. "Mrs. Prebscomb is engaged in all kinds of charitable work."

"A busy woman, I dare say." "Yes, indeed. She's so busy finding homes for the homeless that Mr. Prebscomb, one of the most conspicuous examples of the sort I ever saw, spends most of the time at his club."

SEEKS FAME ON THE STAGE

Chinese Girl Aspires to Be the Sarah Bernhardt of the Oriental Race.

For all of her Irish name, Peggy O'Wing has never seen Ireland, nor, for that matter, have her father and mother had any Irish ancestry. Peg is the daughter of Mr. and Mrs. Wing Bock of Newark, N. J. Of course one wonders why, if her father's name is Bock, she is called O'Wing. The Chinese do things which we Americans seem to be puzzled over. It is because her father and mother are Chinese that her name is O'Wing. That signifies daughter of Wing, Wing being Mr. Bock's surname. Though she is thoroughly Americanized, some of the oriental ways which she has not forsaken added charm to the fair Celestial

### POLICE DOG MAKES ARREST

Gets Vagrant While on Nightly Stroll and Proves Right to Be on Payroll.

Detroit.-Franz, the police dog, earned his right to be on the payroll a few days ago when he arrested one Dave McCarthy, a vagrant, who sought alms from the traveling men emerging from the Pontchartrain hotel.

Dave's appearance and the smell of his breath did not appeal to Franz, so he backed the derelict up against the wall and barked for his attendant. Patrolman Thomas Hudson, who had Franz out for an airing.

On Franz's complaint Dave was taken to central headquarters, where he was registered as a vagrant.

### KIDS ROUT CATERPILLARS

Twenty Thousand Nests Are Destroyed by Fire and Acids in Washington.

Everett, Wash.-Fifteen hundred school children participated in organized warfare against tent caterpillars during the week past in Everett, with the result that about 20,000 nests were destroyed by fire and acids. Interest in destroying the pests was aroused by the principals of schools, and now that the children have learned to burn them it is believed the school youngsters will be an effective means of defeating the annual invasion of the caterpillars.

Where He Can Get Away With It. "He has an artistic temperament."

"What do you mean by that?" "He never abuses any but members of his own family."

A Possible Substitute.

"What have you in the shape of cucumbers this morning?" asked one of our newly weds of a trukster at Five Points.

"Nothing but bananas, ma'am," was the reply.

Appropriate Serving. "They say as dumb as an oyster, don't they?'

"Yes." "Do you suppose that is one reason why they serve with oysters a wine that's Munim?"

Quite Celestial. "Mabel said she had a heavenly

time." "No wonder. She had a sunburst, several moonstones, was presented

"some pippin." Peg O'Wing has other can husband, for she aspires to be the with a Skye terrier and was the star. Sarah Bernhardt of her own race. It of the occasion."

Miss Anna Galt returned home, last Friday, from the Panama-Pacific Expo- and thereafter each evening during the sition, and from a visit to her brother, Matt. H. Galt and other relatives in the West. She was away about two months.

The great peach crop has slaughtered prices. Good fruit has been sold on our streets as low as 15¢ per basket, while the best grades bring only about 25%. At the orchards it is said that the prices are with C. E. at 6.30 o'clock and preaching

The editor of the RECORD, and wife, returned home, on Monday evening, from a two weeks' visit to Mt. Lake Park. Miss Elizabeth Elliot, who accompanied them, is now visiting her sister, Mrs. Anna Criswell, and brother, Louis H. near York Springs.

Mrs. Eugene Miller and three children, of Hanover, Pa,, spent Saturday and Sunday with relatives in Taneytown. Master William Miller, who had been spending some time with Mr. and Mrs. Curtis Reid, returned home with them.

The Lutheran C. E. Society had a straw-ride, on Wednesday evening, to the home of Albert Ohler. The affair was a complete surprise for his son Merle, whose birthday it was. Including a few visitors, there were fifty or more present. Cake and lemonade were served.

Mr. and Mrs. Chas. A. Elliot gave a home-coming dinner to all of their children, their wives, husbands, and grandchildren, last Sunday, making quite a considerable gathering. Father Cuddy and nephew were invited guests. In the afternoon, all assembled on the lawn, at the Rectory, where a group picture was

Alexis B. Blanchard, of New York, son-in-law and close political adviser to the late Congressman Goulden, left "Glenburn" Farm for Pittsburg, Pa., Tuesday. He expects to visit Cresson, Lovetto, Ebensburg and other points on the Allegheny Mountains before returning to New York. Mrs. Blanchard and son, Joseph, will remain with her mother, Mrs. J. A. Goulden at their cottage for several weeks before returning home.

Miss Della Trimmer, of Taneytown, and William Cover, of Frederick, were injured on Monday, when a front tire of their automobile exploded on the Liberty pike, near Worman's Mill, and the machine turned turtle. Miss Trimmer sustained a fractured arm and bruises about the face and body. Mr. Cover was cut about the head and face, his arm sprained and was bruised about the body. They were taken to Frederick City Hospital were taken to Frederick City Hospital.

Sr. Lilly Belle Hess, of the Deaconess' Home, Baltimore, spent several days this week, with relatives and friends.

Many of our citizens visited Hanover, this week, to view the storm damage. The scenes there should warn all property owners here to protect their homes with a storm policy.

Mr. and Mrs. Jerre J. Garner, Mr. and Mrs. Wm. C. N. Myers and Harry Witherow were in Hanover, last Saturday evening, and during the big storm were in John Slagen, of Lancaster, Pa., is visit- Gitt's store, one of the damaged buildings. Mr. Witherow's auto narrowly eseaped being broken by the falling of a large stone.

What "Horsepower" Means.

The use of the "horsepower" as a measure of an engine's work came naturally from the fact that the first engines were built to do work which had formerly been performed by horses. John Smeaton, who built atmospheric engines before Bolton and Watt placed their more complete machine upon the market, had valued the work done by a strong horse as equal to lifting a weight of 22,000 pounds one foot high in a minute.

When Bolton and Watt began to bid Saturday, from visiting relatives and for public favor they agreed to place their friends in Baltimore. of the coals which are saved in its use.' The Presbyterian C. E. Society had a They also increased the value of the horse-pic-nic, on Wednesday afternoon, in power to 33,000 foot pounds, so that their engines were half again as powerful for their rated power as those of their com-petitors. In this way they established

the value of the horsepower.

The following are the various values of a horsepower: 33,000 foot pounds per minute, 550 foot pounds per second, 2,565 thermal units per hour, 42.75 thermal units per minute.

The horsepower of a boiler depends upon its capacity for evaporation. The evaporation of 30 pounds of water from ing several weeks in Philadelphia and New Jersey visiting relatives and friends.

New Jersey visiting relatives and friends. equivalent to a horsepower.

--Surprise Party.

(For the RECORD)
On the evening of August 23, the feminine occupants at the home of Mr. and Mrs. Jacob Bankard were startled by a jolly crowd bursting in on them, just as they were about to sail away in dreamland. The affair, given in honor of their daughter, Miss Ethel, was a complete surprise as no one had a whiff of it. Even the hostess had to be told it was a surprise to be convinced.

The evening was spent in pleasant conversation and games. Fine selections were rendered on the piano and violin. About 11 o'clock refreshments were served consisting of cakes, candies, bananas, lemonade, etc. When time came to depart all expressed themselves as having spent a delightful evening.

Those present were Jacob Bankard and wife, George Eckenrode and wife, Charles Blaxten and wife, Wm. W. Wright and wife, D. N. Frock and wife, Harry Fowler and wife, John T. Carroll and wife, of Baltimore, Cleveland Garber and wife, Edward Caylor and wife; Mesdames John C. Wright, Alda Stoner, Ernest E.
