### BRIEF NEWS NOTES OF GENERAL INTEREST.

Gleaned from the County and State and our Exchanges.

The weather prophets are generally predicting a cold winter, as all of the "signs" point that way. ---

Two cases of diphtheria are reported at the Loysville, Pa., (Lutheran) Orphans' Home. Measures have been taken to prevent the spread of the disease. -000

Liquor dealers in York and vicinity are already getting signers for license, though they will not be needed until January 1. It is said that they fear the effect of the Biederwolf evangelistic engagement, in York, and think it wise to get signers

A large number of automobile accidents are reported from various sections, this week, resulting in deaths and severe in-It is becoming a serious question as to what the country will eventually come to, financially and otherwise, if automobiles continue to increase in use, in the next five years, as they have in the

---Because of extensive improvements to be made to the Chesapeake and Ohio canal, it will be closed during the earlier part of December. Necessary repairs are needed during the winter to the waterway because of heavy pressure of business. More coal was shipped through the waterway during the past season than ever before. The miscellaneous tonnage was unusually heavy.

---The Lutheran Observer ceased publication with its issue of last week, after a life of eighty-four years. It will appear hereafter under new control, as the Lutheran Church Work and Observer; being practically the merger of two papers. Rev. M. H. Valentine, editor of the Observer, will not be connected with the new paper, but will retire with the credit of having published one of the best and ablest church papers in the whole country. ---

Miss Margaret B. Owen, of New York, has again won the world's championship as a typewriter operator, and the \$1,000 trophy which goes with the title. In a contest on Wednesday Miss Owen maintained for an hour an average of 136 words a minute. Her previous record was 132 words a minute. William F. Oswald, of New York, won the amateur half-hour contest with an average of 137 words a minute. Miss Hortense Stollmitz won in the novice class by writing an average of 114 words for 15 minutes. ---

Dr. Clifford T. Sappington, United States Army surgeon, now stationed at Texas City, Texas, has been made deendant in a suit for divorce instituted in Portland, Ore., according to a dispatch received in Frederick. Mrs. Sappington, who came to Frederick as a student at Hood College, was married to Dr. Sappington in the spring of 1914. She claims that her husband's salary is \$2,000 a year and in addition that he has an income of \$75 a month from an estate in Maryland.

John S. Ensor, Republican candidate for State Senator from Baltimore county, was instantly killed, on Tuesday night by being run down by an electric car on Park Heights Avenue, Baltimore. Ensor had been in an auto, with others, going to a political meeting at which he be the chief speaker, and which had knocked down and injured a pedestrian. In his anxiety to see that the injured man was properly cared for, he nurried across the car tracks without observing an electric car, which caught him and crushed him to death.

Unanimous authorization for a petition to Congress to submit to the states a national prohibition amendment was voted on Thursday, by the Presbyterian Synod of Baltimore, in annual session in Washington. Petitions also were approved asking for a federal censorship of moving picture films, a Sunday rest law in the District of Columbia and a prohibition against the exportation from the United States of intoxicating liquors to Africa. Each of the petitions, it was said, would be supported by a national movement of churches to be initiated by the Synod.

Fund For Destitute Belgians.

What is known as the "Dollar Christmas Fund" operated by Henry Clews, the N. Y. banker, is again soliciting funds for destitute Belgians. The Record, last year, received a number of subscriptions for this Fund, and again announces that it will receive and forward all subscrip-tions, large or small. A portion of the announcement made by the Fund, is as

"The task now is to collect money for shoes and clothes which are most urgently needed, and for which money must be provided. The necessity is appalling at the present time for there are roughly 3,500,000 destitute people in Belgium and the number increases as winter approaches. The Belgians are unable to buy shoes and clothes—many, eyen of the former wealthy, are now in the daily bread line.'

"Let a special contribution be made from the people of this country to the destitute people of Belgium, as an ex-pression of sympathy with sorrow from one people to another, and a tangible proof that Christmas good-will, even in these days of strife and bloodshed, has not disappeared from earth."

Let all who feel so disposed, hand in

their subscriptions, at once, and the RECORD will forward the same.

-000 The Anti-Saloon League's Advice.

Very many of the "dry" voters of this county are outspoken against the Anti-Saloon League, and against the advisers of the League, for issuing instructions to all voters to mark their ballots for four designated candidates—two Democrats and two Republicans-thereby directly and two Republicans—thereby directly discriminating against two other Republican candidates whom the League admits to be 'satisfactory. These 'dry' voters declare that hereafter the League will cut but little figure in influencing nominations, as it has made it clear that it will not fairly treat its own friends when not fairly treat its own friends when nominated.

Heretofore the League has assured voters that it was strictly non-partisan; that it was interested solely in having men favorable to its projects nominated and elected, and that as between candi-dates "equally satisfactory," the League made no distinction, that being a question for the voters to decide. This year, that plan has been departed from, and in various ways distinctions have been made not in conformity with former League

What effect the instructions of the League may have on the present contest, remains to be seen; but even though its plans may represent entire absence of desire to deal unfairly with the two Republican candidates, the opinion prevails that the League has made a big mistake, the full evidence of which will be demonstrated at future like elections.

#### -000 The Constitutional Amendments.

The Constitutional amendments to be voted on, will be declared adopted if the majority of the votes cast on the proposi-tions are "for" them. In some states, amendments must have a majority of the number of votes cast for *state officers*— all votes not "for" the amendments being counted "against" them.

There is great danger, therefore, of objectionable amendments becoming law, because those who favor the amendments are working for them. In this state, a great deal of quiet work is being bone for both the "Home Rule" and the "Referendum" amendments, and it is quite possible for them to win on a very small vote, unless those opposed to these amendments vote "against." ----

### Place Orders for Forest Trees.

A comparatively short time remains for making application to the State Forester for forest planting stock to use this season. Fall planting may be successfully under taken in the greater part of Maryland, and since the season for this work is naturally somewhat restricted, the local landowner is urged to place his order for the required stock immediately.

There is for sale at the State Nursery a considerable selection of different-aged conifers and hardwoods, including such valuable and attractive trees as White Pine and Norway Spruce, Red Oak, Black Locust, White Ash, Honey Locust, American Elm and Black Walnut. They are offered at prices ranging from \$3 to \$30 per thousand, but the greater number are priced at from \$5 to \$6. All are for sale at actual cost, and the purchaser is given the advantage of the low, thousand rate on any smaller lots. The trees themselves are obtainable in seedling and transplant size, from a few inches to a oot tall, for reforestation and commercial planting on a large scale, their being in addition larger sizes adapted for roadside and ornamental work. Prices have been kept as low as is consistent with well-grown, standard stock, and the State Forester is particularly anxious to have local landowners avail themselves of these trees for planting up unprofitable fields and

Reforestation of waste lands is relatively inexpensive and quite productive, and the Forester's Office is glad to co-operate with any interested parties in formulating plans of planting and conducting the actual operations where it is desired. plications for stock and price lists of trees are sent to all who request them by the State Forester, whose address is Johns Hopkins University, Baltimore, and all orders for forest planting stock should be filled with him at once.-Md. Board Forestry.

President Wilson and his finance, Mrs. Norman Galt, quietly slipped away from Washington, last Saturday morning, and motored to Emmitsburg, where they lunched with Mrs. Galt's brother-in-law, Sterling Galt, editor of the Chronicle They were accompanied by Miss Margaret Wilson, the President's eldest daughter, also by a car of Secret Service men. They returned to Washington in the evening in time for dinner.

### THE OFFICIAL BALLOT AND HOW TO MARK IT.

Care will be Required in Order to Avoid Mistakes.

The first thing of all to be sure about, is to go to the polls. Don't let anything

but sickness keep you away.

Handling and marking the big ballot will be a job requiring great care, if the act is to be fully and properly done, as the ballot will be about 18x32 inches in size, which is to be unfolded, marked and refolded, in a dark little booth hardly big enough for a large man to get into,

let alone work satisfactorily in.

Fix in mind that 18 × marks are needed the mark for the full list of candidates, all of these to be made in the first two columns. The last and third column is taken up with the four proposed amendments, voting on which will require 4 more marks, but it is not essential that they be marked either for or against.

Eight of the × marks will be made in the first column, or group, and ten in the second column. Remembering this will help one to be sure of having marked a full ballot. A complete and corrected list of all candidates, pages as they will list of all candidates naroes, as they will appear on the ballot, will be found on the second page of this issue.

It will be a good plan to become familiar with the ballot, on the outside, be-fore going inside of the room to vote. If you mark too many names, tear your ballot, or in any way make a mistake, do not try to fix it up, but ask for another ballot. Take your time and try to be sure you are right, for even then a lot of ballots will not be counted, because of

On receiving your ballot, press down its folds as flat as possible, so that it will fold up easily. Open carefully so as to observe how to fold it again exactly as it was. Don't handle the ballot more than

necessary to mark it. Do not use any pencil other than the one found in the booth, and make no

kind of mark but a cross mark.

The last thing to do, before folding your ballot—according to our judgment —is to make an × mark in the last square, third column, of the ballot, as so doing will vote against the "Referendum" Amendment.

### New Windsor Postoffice Robbed.

The postoffice at New Windsor was robbed this Friday morning between 1.00 and 2.00 o'clock. The safe was blown,

and its contents of stamps and cash stolen. As the main supply of stamps was kept in the vault of the bank, the haul was not a large one. We have not been able to learn the approximate amount of cash taken. As the explosion wakened residents in the vicinity of the building, the robbers made a quick get day of next week; no Court on election

Maryland Lutheran Synod.

The Maryland Lutheran Synod met in Middletown, Frederick county, on Mon-day night, with most of the 175 pastors and delegates present. There are 129 churches in the Synod, with a communicant membership of 24,500. The address of welcome was made by the pastor of the Middletown church, Rev. W. A. Hart-man, and the synodical sermon was de-

livered by Rev. Ezra K. Bell, D. D., of Baltimore, president of the Synod.

At Tuesday's session Rev. Dr. A. Stewart Hartman, of Baltimore, presented the plan of the consolidated Board of Home Missions and Church Extension for the work heretofore carried on by the for the work heretofore carried on by the separate boards. The Rev. David N. Dittmar spoke of the work of ministerial relief and said that while insufficient support was given to ministers and their widows the indifference of early years had given way to greater interest. The synod was told that the Reformed Church made greater progress in temperance last year than in any former year.

### HOW THE FURNITURE EXEMPTION LAW PASSED.

A Story Purporting to Give the Facts as they Occurred.

The Hampstead Enterprise gave, last week, an explanation purporting to show how the Furniture Exemption law was passed. The Enterprise says two of the present candidates for the House—Wooden and Baker-are being blamed for the passage of this unpopular law, and that such blame and statement is a lie for the purpose of defeating them for re-election. The story of the bill is told by the Enterprise as follows:

"When the bill was introduced at Annapolis it was referred to a committee. Opposition developed and it remained in committee. Both Mr. Wooden and Mr. Baker studied the bill and determined that it ought not to become a law. was brought forward by the Democratic machine in Baltimore City for a political purpose and it has now served its pur-

The purpose was this: The administration in Baltimore City had been speuding the people's money with a lavish hand. Great improvements had been made in the construction of streets and sewers and taxes were bound to go up. It was reasoned and shrewedly, that by taking the tax off furniture, thousands of voters in the city, who rent their homes, would be left without any taxes to pay whatever and thus relieved of all to pay whatever and thus relieved of all burdens for the city improvements. They would naturally give the Democrats credit for this relief and in turn would give the administration a vote of confidence, which they did, re-electing Mayor Preston by an immense majority. The bill exempting furniture was purely a Democratic expediency measure. Its promoters cared nothing for the farmer whose lands nothing for the farmer, whose lands would be taxed to make up the lost revenue. They wanted to save their bacon in the city. And so the bill was allowed to slumber until the midnight hour, of the last session of the Legislature.

Messrs. Wooden and Baker and a score of others, both Democrats and Republicans, watched for it, iu the hope of mustering enough votes to defeat it. We turn back to the Baltimore papers to see what happened. This bill with scores of others lay upon the Clerk's desk and amid confusion and babble indescribable, it was called by number only, a roll call prepared in advance was pinned to it, and it was passed along, the whole operation consuming but two orthree seconds. The roll was never called. But men were recorded as voting for it who never saw it or heard a line of it read. It never was read. In this list appeared the names of Wooden and Baker. Our readers will remember reading of that eventful night, the scenes of which were declared, even by the Baltimore Sun, to have been an everlasting disgrace to the State.

Scores of other bills were railroaded

through in the same way, without roll calls, but a prepared roll being pinned to them. There was no relief from this disgraceful procedure, and all the responsibility for the onerous burdens laid upon the taxpayers of the counties, as a result of the furniture exemption and the shameful voting away of thousands of dollars that night, belongs on the machine in control of the Legislature, and to that

institution alone. Because the bill is unpopular and deservedly so, the wet forces think they see an opportunity to blame Messrs. Wooden and Baker, one a Republican and the other a Democrat, and they are charging that they are responsible for it. It is an outrage and a disgrace. If Mr. Wooden is returned to the House, as he assuredly was filled with an expectant crowd, deserves to be, he will do all in his power cluding guests from Washington, deserves to be, he will do all in his power to have the obnoxious law repealed, or at least that Carroll County shall be relieved from its provisions and operation.'

### Election Day as Pay Day.

Quite a number of our patrons make it ening to the needs of the home field.

In the church at large \$25,000 has been given through the Sunday School for remember date on which to do this necessary annual act. We will be glad to have more adopt the same rule, so come around, next Tuesday!

Weller-Haines. -On Oct. 24, 1915, at the Lutheran parsonage, Uniontown, by Rev. W. E. Saltzgiver, Mr. S. Philip Weller and Miss A. Estelle Haines, both of New Windsor.

Ross-Trump.—On Oct. 26, 1915, in Martinsburg, W. Va., Mr. John B. Ross, of Baltimore, and Miss Mary Bixler Trump, daughter of Rev. and Mrs. C. S. Trump. The ceremony was held in St. John's Lutheran church, the bride's

FINK—SIDES.—Clarence J. Fink, son of Mr. and Mrs. Pius Fink, of Palmyra, Pa., formerly of Taneytown, and Miss Margaret Elizabeth Sides, were married, on Tuesday morning, at a nuptial mass in St. Mary's church, Lebanon, by Rev. Francis McHugh.

SAUERHAMMER-MACKERT.-On Oct. 21, 1915, at the home of the bride, at Irvington, Baltimore, Mr. Luther C. Sauerhammer, son of Mr. and Mrs. Clifton Sauerhammer, of Annapolis Junction, Md., and Miss Lillie M. Mackert, of Irvington. Mr. and Mrs. Sauerhammer will reside at Relay, Md.

Cox—Crapster.—At high noon Wednesday, October 27, at the bride's home, 38 Rhode Island Ave., N. E., Washington, D. C., Mr. John A. Cox, of Gettysburg, Pa., and Miss Alice Patterson Crapster, daughter of the late Woods Crapster, of Taneytown, were united in marriage by the Rev. Seth Russell Downie in the presence of a few relatives and friends.

The bride wore a beautiful imported cream net gown and carried valley lillies. On their return from their trip, Mr. and Mrs. Cox will take up their residence at Carlisle and Water St., Gettysburg. Their many friends here, and elsewhere with many friends here and elsewhere wish them completest happiness.

HARR—SITTIG.—A very pretty wedding was solemnized at the home of the bride's Kas Soleminized at the home of the bride's father, Charles H. Sittig, near Uniontown, on Oct. 23, 1915, at noon, when Rev. The groom is a successful business man in the city, and the bride has been a trained nurse there for some years.

They left in the evening for a trip to New York City, Buffalo, Niagara Falls, and some points farther west. After their return they will be at home in apartments at 208 McMechen St., Baltimore. The happy couple have the best wishes of their many friends, who hope life's voyage may be smooth sailing.

SMELTZER—CRAPSTER. — Although the Presbyterian church in Taneytown was built over thirty years ago, there has never been a wedding in it, so that the marriage there last Saturday afternoon, of Miss Anna Porter Crapster to Mr. John Smeltzer, was quite an eyent in the history of the church, and the young friends of the bride took great pleasure in making the church beautiful for the occasion. The chandelier over the desk was wreathed with honeysuckle vines while a rope of the same vines, outlined the arch of the pulpit recess. The walls of the chancel were decorated with autumn leaves and on the floor were banked potted ferns, and large bunches of white

cosmos, with a background of cannas.

The ceremony took place at 2 o'clock, and before the appointed hour, the church over, Gettysburg and other places. While Miss Anna Galt played the wedding march, the bridal party entered the church, the ushers—Messrs. Fern Weaver, Rein Motter, Whitfield Buffington and Clotworthy Birnie — preceding Miss Elizabeth Crapster, the bride's sister, who was maid of honor, up the left aisle the bride following with her uncle, Dr Walter H. O'Neal, of Gettysburg. They were met at the altar by the groom, with his best man—Mr. Jack Crapster—who

had come up the right aisle.

The marriage prayer, "O! Perfect Love," was softly played, while the ceremony was performed by the pastor of the church, Rev. S. R. Downie, assisted by the bride's uncle, Dr. J. T. Huddle, of Washington, the bride being given away by Dr. O'Neal. Passing out through the right aisle, the bride and groom, returned to the home of her mother, on street, where they held a reception, re-ceiving the congratulations of their many friends in this pleasant home, which was also decorated with flowers.

About half past four o'clock, after all had been bountifully served to refreshments, Mr. and Mrs. Smeltzer—in a shower of rice-left for Keymar, where they took the train for Frederick, a string of tin pans and old shoes, tied to the back of the automobile, making music as

they drove through town.

If there is any good omen in the weather, or truth in the proverb, "Happy is the bride that the sun shines on," this couple have the best of prospects that the good wishes of their many friends will be fulfilled, for the weather man handed out one of his perfect samples for the occasion, and the whole affair passed off in the happiest possible manner. The bride's bouquet was of white rose

buds and lillies-of-the-valley, and her gown of white crepe de chene, trimmed with rose point lace, with satin train and girdle, and with her veil, was most becoming, as was also her travelling suit of blue broadcloth, with white fur collar, and hat of white velvet, crown trimmed with fur, and faced with black velvet.

Miss Elizabeth Crapster's gown was of rose pink crepe de chene and her bouquet of roses matched the dress in color, and wore a large black hat.

The gifts of linen, silver, glass and many other things useful and ornnmental were enough to delight the heart of this young matron, and in her new home at Yellow Springs, Berkshire Co., W. Ya., will be a pleasant remainder of her (NON-PARTISAN.)

PITY THE POOR election officials, next ballot, to be counted right. Some job! -000

THOUSANDS of Englishmen, of war service age, are reported to be leaving England in order to escape compulsory war service. At this distance such actions look very much like specimens of pure cowardice.

A NEWSPAPER OPINION, given before the recent election in Jersey, was as follows: "With the announced support by the President and his various cabinet officers, the woman's suffrage cause has been given a decided impetus."

Now, we wonder what the writer of that meant? "Impetus" which way?

### VOTE AGAINST THIS ONE!

Of the four Amendments to be voted on, this year, the RECORD has no hesitancy in advising voters to vote against the "Referendum" Amendment (Chapter 673) which will appear as the last of the four amendments in the third column of the ballot. We gave our reasons for this advice two weeks ago, in brief, as follows:

1-That the law, if passed, would empower 10,000 yoters in the state (less than 5 per cent) to hold up any law passed by the legislature and approved by the Gov- sent by parcel post from Salt Lake City murder, to be sure, like the sinking of ernor, and compel its submission to all of to San Diego. #### Are You Going to Vote?

Each year, in country districts, there seems to be an increased disinclination among men to go to the polls on election day, and vote. This may be very slightly, All articles on this page are either original, or properly credited. This has always been a fixed rule with this office, and we suggest the adoption of it by our exchanges. least, this excuse is sometimes givenbut the real reason must be much deeper, for hardly any voter need spend over two hours of time going to the polls, and Fall work of all kinds, is of the class that will wait.

We fear that a good many more voters than we imagine, would like to be paid for voting, or at least begged pretty hard to do so; while a good many merely lack interest because they do not feel that voting will do them any particular good, especially in a county election. Strange to say, men will vote at a Presidential election more readily than at any other time, notwithstanding that their vote then actually counts less than in any other election.

This, of course, ought not be so. Wheter farmer, mechanic or laborer, every man should vote, eagerly, without persuasion, and most certainly without offer of money or gift. If there is any one thing that establishes a man's status as a true citizen, it is the plain fact that he takes active, intelligent interest, in public local, as well as in public general affairs. Every man ought to know enough to have a preference as to men who shall adminter governmental affairs, and that preference should be exercised, not only willingly, but eagerly.

There is always more or less concern among candidates for fear "the vote won't come out." The concern should more rightfully be among the voters themselves. that nothing should happen to prevent them from coming out. The voters, as a matter of fact, ought to be more interested in results, than are the candidates—the latter get the offices, while the former pay the bills and suffer for the mistakes-or worse-of the men who are elected.

#### ---War Gives A Good Protective Tariff Illustration.

After the outbreak of the European war, the manufacturers of this country were greatly concerned as to what they would do for good aniline dyes, the most of which were imported, due to the fact that there was no inducement for American capital to invest itself in a non-paying enterprise. As the war shut off importations from Germany, capital went supplying dyestuffs in abundance at slightly above the foreign price.

Just what will happen to this investseen, as the business can not be conducted without a protective duty. A correspondent of the American Economist, writing on the subject, says:

"Since 1883 the dyestuffs manufacturers have not been able to get sufficient Protection. In 1883 there were about ten factories in the country, and all were Tuesday night—and Wednesday morning doing well, but the duty was taken off too. About 8000 hallots, 56 names to the and as a consequence six of the factories went out of business, and the others, although they have held on, have done so under discouraging conditions. On July 1, 1883, the specific duty of 50 cents a pound was abolished, leaving only the ad valorem rate of 35 per cent. and fixing a 20 per cent. duty on the intermediate products, which left only a net Protection of 15 per cent. About the same average duty has been continued since that time, more than thirty years. This duty is not sufficient, as statistics have shown, for the difference in the cost of manufacturing in this country and

### POULTRY and EGGS

#### PROFIT IN TURKEYS.

Poultry Gives Better Returns Than Any Other Kind of Live Stock.

[Prepared by United States department of

When properly handled there is no other kind of live stock which will return so large a profit to the successful producer as poultry, and no other kind of poultry is so profitable as turkeys. Turkeys pick up much of their food on the range from the time they are six weeks old until winter sets in and during this period are kept at little or no cost to the grower. They may almost be termed self sustaining foragers when they have sufficient range.

The chance for profit in the production of turkeys is gradually improving as a result of a more general use of the flesh. They are now used not only

WHITE TURKEY.

for roasting, but to an increasing extent as cold cuts for sandwiches and for salads, and large numbers of poults are used for broilers. Late hatched poults do well for this purpose, and, while there cannot be much opportunity for growing poults to maturity when they are hatched late in the season, they may be sold for broilers at a good profit. No dish is more valued in our large cities at the present time than the broiled poult.

Turkeys that are hatched early in the spring should grow to weigh from fourteen to twenty pounds by Thanks. giving week. These weights are often exceeded by the best growers, but, as they are the most popular and most readily produced, they are suggested as the most advisable. The average yield of turkey hens is from eighteen to thirty eggs, each of which can usually be counted on to produce a living poult. The question of profit from keeping turkeys simply resolves itself into the ability of the grower to bring them to a marketable size. This can readily be done if care and attention be given to all the requirements for

more or less grown in this countryviz, Bronze, Narragansett, Buff, Slate, White and Black. The main differences are in size and color of plumage. The Bronze and the Narragansett are the largest, the Buff and Slate are the medium and the Black and White the smallest. Of late so much improvement in size has been made in the Whites that they have moved up to contend for third position, some of them having passed the thirty pound mark. The same statement may soon be made of the Blacks, as they have greatly improved during the last five

In addition to the foregoing there is Bourbon Reds. They might well claim the position now held by the Buff turkeys, being quite like them and more largely grown for market than are the any one of these varieties for table use to cause it to be favored in production of turkeys for market. There is. however, a strong preference at all times for the best grown and best finished specimens of all varieties. Rhode Island, where the highest quality is produced, there does not seem to be much preference for any particular

Care of Spring Pullets.

The early hatched pullets should be laying in October and maybe some of them earlier than that. If they have been handled properly they will be full sized and in the pink of condition by that time. Remember that all pullets should be full grown and matured before they commence to lay. If you try to get pullets to lay before they have attained proper size they will lay, but never get the size and weight you wish. Laying stops their growth to a certain extent. When the pullets are of good size then begin to feed material that will make eggs and do it rapidly. Stimulating foods should not be given, but good, sound grain, with a ly under 242 eggs per hen. mash once a day, and plenty of bran and alfalfa in the mash. These pullets should be housed together and without a male bird till the eggs are needed for breeding purposes.-Kansas Farmer.

## SUGGESTIONS FOR **CULLING POULTRY**

I have personally inspected, judged and mated a good many farm flocks of poultry, and it is surprising what a large number of fowls one is apt to find that are decidedly unprofitable writes a correspondent of the National Stockman. It is my honest opinion that if all poultry raisers and farmers would cull their flocks more closely in late summer and fall there would not be a single flock that would not be profitable. Cull the flock, fatten and sell the weak sisters.

Here are some points to remember when culling: Cull out all those that when through molting are noted to be hanging around the roosting room in the morning and all day long. Cull out all with weak constitution, sickly appearing. A hen with pale colored legs and worn toenails has been # good layer and will be profitable for at least another year. Keep her not only as a layer, but as a breeder. Cull out all early molters and send to the market. The latest and quickest molting hens are the best layers.

The best appearing individuals of the flock in the fall have not been laying anything worth while previous.

A constitutionally weak fowl is slow and inactive; she has a so called crow or pinched head; her plumage is rough

The Black Leghorns are not lost to sight, though the White Leg-horns in recent years have achieved such prominence as layers that they have somewhat overshadowed their brown sisters. It is unfortutunate that breeders of the black birds have not entered the official contests more freely and demonstrated what their favorites are capable of. Pure bred Black Leghorns are beautiful birds, and if they had had the same attention that the Whites have had it is deathful if the latter could have doubtful if the latter could have demonstrated any superiority as layers. The picture shows a Black

> Sore eyes in chicks are sometimes caused by a slight cold. In this case spray with a fine mist sprayer filled with a strong solution of zenoleum. At times the eyelids of young chicks become stuck together with a thick, dark colored secretion. This condition need cause no alarm because as a rule it is not fatal, and the chicks recover untreated. However, a very simple and dependable remedy is to bathe the head in a weak solution (1 to 75) of zenoleum or a solution (1 to 25) of peroxide of hydrogen.

High Egg Production. A White Leghorn hen in the egg laying contest just closed at Hawkesburg Agricultural college in Australia made a record of 288 eggs for the year. She was one of a pen of six hens that captured first prize, the lowest individual score being 212 eggs, while the pen total was 1.451, or an average of slight-

for the evangelization of the world in this generation; to send a commission of laymen to the mission fields and report their findings to the church at home. These proposals were endorsed by the conference of foreign mission boards of the United States and

Convention Campaign

The plan of the movement is to cooperate in the enlargement of the missionary work carried on by the lar agencies.

In 1908-09 a campaign was conducted in Canada. In 1909, a Canadian missionary congress, attended by over 4000 commissioners, representing all Protestant churches, was held in Toronto.

This congress adopted a national missionary policy, the first of its kind adopted by the representatives of all the churches of a nation. It has been ratified by all church courts in Can-

A similar national missionary campaign was conducted in the United States in 1909-10, including conventions in seventy-five cities. These conventions were attended by 75,000 delegates. The culminating feature used in connection with the nicotine exwas a national missionary congress at tract, acting as a sticker for the latter. FALL SEEDING WILL IMPROVE HAY CROP

Is Recommended To Farmers Desiring a Good Stand Of Grass Next Year.

NICHOLAS SCHMITZ, Maryland Agricultural Experiment Station.

Owing to the dry spring and owing to the severe heaving and thawing late last winter and the dry season early in the spring, many farmers find that they have a very poor stand of both timothy and clover in their wheat The Maryland convention of the stubble. The question in many cases is how to provide for a profitable hay crop next season. Under such conditions the best way to provide for a hay crop next spring is to plow the wheat stubble down and prepare a very firm, finely pulverized seedbed. This, of course, will involve extra labor but the increased yield and quality of hay next year will more than pay for the extra labor. A full crop will be ready for cutting next June or early July, which will be the same time as if the stand seeded in the wheat had been successful.

FALL SEEDING PAYS.

The best time of seeding in Western Maryland, except the mountainous sections, will be from August 1st to September 1st, the best time being between August 15th and September 1st. On the Eastern Shore and in Southern Maryland the seeding may be done between August 15th and October 1st, or perhaps even a little later in the extreme southern water-front portions. The most favorable time is from August 15th to September 25th.

Owing to the danger of winter-killing, clover should not be seeded in the mountainous section later than September 1st; in Western Maryland, not later than September 15th; and on the Eastern Shore and in Southern Maryland, not later than October 1st.

Timothy alone is seeded, 15 pounds or more per acre should be used. When sowing with redtop, 12 pounds of timothy and 3 or 4 pounds of redtop. When seeding with red clover, 10 pounds of timothy and 6 to 8 pounds of red clover is sufficient. If red clover has not been succeeding well, 4 timore convention of the Laymen's to 6 pounds of alsike clover to the acre should be substituted for the red

> SEASONABLE HINTS FOR THE FLOWER GARDEN.

B. W. ANSPON, Maryland Agricultural College.

At this season of the year one finds many insects infesting the flower garden. The rose is frequently attacked by the rose slug, a small green worm which chews holes in the leaves. To ontrol this pest spray the plants thoroughly with arsenate of lead at the various churches through their regu- rate of one ounce to two gallons of

Plant lice of various kinds are frequently found on a number of plants. These are sucking insects that infest the young shoots of many flowers. On nasturtiums and chrysanthemums they may be found on the young shoots. On these plants the black forms are found. On sweet peas and roses we find the green forms. A red form is generally found on the golden glow. To control these insects spray the plants infested with a nicotine solution, of which there are many brands on the market. A very simple remedy that has given good results is a soap solution. This can be made by dissolving a quarter pound of laundry soap in a gallon of water. This solution can be

Go over he flower borders and remove all faded flowers since these left go to seed and will impair the flowering of the plants. Where one wishes to save the seed of certain plants select only the best flowers and allow them to go to seed. In cutting the blown flowers on roses cut the shoot back to within two to three buds or eyes from the main stalk.

Plants that have made a strong growth and need support should be staked. Sow seed of pansy now.

Many of the quick germinating hardy perennials may be sown now. Among this class are larkspurs, calumbines, hollyhocks, sweet williams, foxglove, etc. These will make a good growth by fall so that they can be transplanted into the cold frame. The following year they will be ready to bloom.

Select a sheltered spot in the flower garden and thoroughly prepare it for the seed bed. Sow the seed in drills and when large enough transplant to the cold frame.

Write to the seedsmen now for their fall bulb catalogues. Select your bulbs and place order early for bulbs for fall planting.

The sensible thing for each farmer to do is to practice a rotation of crops, including leguminous crops, raise mules, horses. hogs, poultry and other live stock, and grow plenty of fruits and vegetables. Under these advanced methods the soil will rapidly increase in fertility, the money obtained for cash crops will be kept at home, it will not be necessary to borrow money, or buy on credit, and we can then hold our wheat, potatoes, tobacco, corn and other crops until we are ready to sell.-G. H. Alford, Farmers' Co-Operative Demonstration Work.

Emmitsburg was highly honored on last Saturday by having the President of the United States as one of its visitors. He with his fiancee Mrs. Norman Galt, and his daughter, Miss Margaret Wilson, motored from Washington, arriving at the home of Mr. Sterling Galt, where they remained for luncheon. Mr. Galt has been a resident of this place for the past nine years, and is a brother of the late Norman Galt. The White House car was followed by the Secret Service car. As saon as it was known the President was here, the news spread rapidly. When the party left Mr. Galt's residence at 3.15, there was a large and orderly crowd awaiting his appearance, who applauded the Chief Executive who bowed his acknowledgement, and Mrs. Galt smiled benignly on all. #### Perception Outruns Talent.

Our perception far outruns our take ent. We bring a welcome to the highest lessons of religion and poetry out of all proportion beyond our skill to teach, and, further, the great hearing and sympathy of men is more true and wise than their speaking is wont to be. A deep sympathy is what we require for any student of the mind, for the chief difference between man and man is a difference of impressionability. Aristotle or Bacon or Kant propound some maxim which is the keynote of philosophy thenceforward. But I am more interested to know that, when at last they have hurled out their grand word, it is only some familiar experience of every man on the street. If it be not it will never be heard of again.-Emerson.

### Lincoln's Fees.

As a rule, Abraham Lincoln's fees were less than those of other lawyers of his circuit. Justice Davis once remonstrated with him and insisted that he was doing a grave injustice to his associates at the bar by charging so little for his services. From 1850 to 1860 his income varied from \$2,000 to \$3,000, and even when he was recog nized as one of the ablest lawyers of the state his fee book frequently shows charges of \$3, \$5 and \$1 for advice, although he never went into court for less than \$10. During that period he was at the height of his power and popularity, and lawyers of less standing and talent charged several times those amounts.-"The True Abraham

### Natural Pottery.

Excellent natural pottery is manufactured by nature in the case of a certain cactus. Woodpeckers are apt to excavate nests in the trunk and branches, and in order that it may protect itself against these incursions the plant exudes a sticky juice, which hardens, forming a woody lining to the hole made by the birds. Eventually the cactus dies and withers, but the wooden bowl remains.

at Meissen, Saxony, the work was formerly carried on with the utmost secrecy to prevent the processes from becoming known elsewhere. The establishment was a complete fortress, the pertcullis of which was not raised day or night, no stranger being permitted to enter for any purpose whatever. Every workman, even the chief inspector, was sworn to silence. This injunction was formally repeated every month to the superior officers employed, while the workmen had constantly before their eyes in large letters the warning motto, "Be Secret Unto Death." It was well known that any person divulging the process would be imprisoned for life in the castle of Koenigstein. Even the king himself when he took strangers of distinction to visit the works was enjoined to secrecy. One of the foremen, however, escaped and assisted in establishing a manufactory in Vienna, from which the secrets spread all over Germany.

#### Light and Sound and Glass.

Why doesn't the closed window shut out light just as much as it shuts out sound? Both light and sound travel through the air, and their waves come in contact with the glass. The light, after it has gone through the window. seems just as strong or stronger, while the sound seems ever so much weaker. Why is it? Many of us have wondered. The reason is that light is not a wave of air, while sound is. Light is a wave in the ether which is in the glass as well as in the air, so that light in passing through glass still has its natural path of ether. But when sound waves strike the window glass they must put the glass into vibration, and the glass in turn must make the air inside vibrate. All this lessens the strength of the sound waves, and they reach our ears capable of producing a less startling effect than are the light waves which reach our eyes.

Many an orator would have been upset by such an unfortunate beginning to the proceedings, but not so this one. "I am grieved to find," he said, with mock seriousness, "that your chairman is disappointed n my size, but this is owing to the Dr. Charles E. Burton, New York; Mr. way you have here of measuring a man. In my part of the kingdom we measure a man from his chin up, but you evidently measure him from from his chin down.'

### Feared Premature Burial.

The doctor who left instructions that a bell watch should be fixed to his wrist after death as a precaution against premature burial may have heard of the similar safeguards prescribed by Meyerbeer. Two men were to watch over him night and day for five days, he directed, and bells were to be hung from his hands and feet to give warning of the slightest movement. Finally, incisions were to be made in his throat.

Harriet Martineau also had a fear of burial alive and left directions for her body to be decapitated, while Lady Burton stipulated for a post mortem examination of her remains. Which, we may ask, is greater, the fear of death or the fear of life?-London Standard.

## A Halloween Scheme

It Was Well Planned and ? Worked Well

#### By F. A. MITCHEL \*\*\*\*\*\*\*\*\*\*\*\*\*\*

"I wish," said Mrs. Edgarton to her friend, Mrs. Tisdale, "that your Alice would fall in love with my Frank. A young bachelor is so beset by temptations. If Frank were married I should not have to keep worrying about him all the time. He is out every evening, sometimes till morning. I don't know where he goes or what he is doing. I never go to sleep till he comes in, and thus I spend hours worrying."

"You have no need to worry about your boy," said the other. "Frank is simply doing what most young men of fortune do at his age-he is enjoying the novelty of things. When that novelty wears off he will become engrossed in more serious matters."

"Would you object to a match between him and Alice?"

"On the contrary, I should welcome it. We have little or nothing to leave Alice, and I should be glad to see her married to a man whose income would preclude the probability of her coming to want."

"Suppose," rejoined Mrs. Edgarton thoughtfully, "we lay a trap to bring them together. It would be useless for me to say to Frank that I wished him to marry Alice, and even if he acceded to my desire it would be equally useless for you to try to force Alice to accept him. If we could contrive to throw them together I would have great hopes of Frank falling in love with her, she is so attractive in every way. But I have my doubts about Alice. It seems to me that she is too serious, too thoughtful, too good for a man of the world like Frank." .

"My daughter is very impressionable. There is also a good deal of romance in her nature. If we could bring about some episode by which Frank would appear to be a hero in her eyes we would win our point, or if it could be made to appear that fate intends him for her husband that would have the same effect.'

"I have it!" exclaimed the other, speaking suddenly a thought that flashed upon her. "Halloween will b€ here in another week. I will give a Halloween party. I will invite Alice, and you must come too. We will concoct some scheme to make it appear that fate intends her and Frank for each other."

Mrs. Tisdale made no objection to this, though she would have preferred that the scheme be worked out at her own home, since it would be more becoming that the man should come to the woman rather than the woman to the man. But Mrs. Edgarton possessed a country place especially suitable to a house party. It had been closed for the season, but could be re-

Mrs. Edgarton and Mrs. Tisdale were especially adapted to carry out such a had in mind. had been married very young and had jumped almost from girlhood into a gay world. Neither had yet passed out of the forties, nor had either lost her adaptation for playing a part.

"Mamma," said Alice Tisdale, look ing at her mother through a pair of eyes to remind one of a deep pool darkened by surrounding rocks and overhanging verdure, "do you really think there is anything in Halloween?' "Why do you ask, Alice?

"Well, we are going to Mrs. Edgarton's country place for a Halloween party, and I would like to know before we go whether the belief or fancy or whatever it is that one may see a future husband or wife is all rubbish or whether there is anything in it."

"We don't know, dear, where superstition ends and a legitimate faith begins. There are certainly many wonderful things in the world that we call supernatural. Some of them may be referable to natural laws of which we have no knowledge.

Mrs. Tisdale was well satisfied with herself at this method of answering her daughter's question. She would not intentionally deceive her child, and she felt that in her reply she had spoken nothing that was not true. What she said made a marked impression on Alice. She went to the library and, taking down a book on strange customs, turned to Halloween and read of girls seeing the faces of their future husbands in looking glasses, the setting afloat of candles on a river and other such methods of determining their future. If she did not believe in their efficacy she certainly did not disbelieve.

The house party at Mrs. Edgarton's country place assembled in the afternoon preceding Halloween. They dined and after dinner sat before the great fireplace in the hall telling ghost steries. At 10 o'clock the hostess announced to them that they were expected to scatter themselves over the large domain. There was room enough for all, she told them, and if it was fated that they should meet with any adventure to show them their future mates there was no reason why it

should not be done on this Halloween. The girls all obeyen the hostess, but some of the young men preferred a game of bridge or billiards and demurred to going out into a cool night under the stars to participate in what they considered a childish perform: ance. But Mrs. Edgarton told them

that they had not been invited to a oridge or a billiard party, but to a Halloween party, and they must accept the situation. With this they sallied forth, some to sit in a summer house and smoke, while others, respecting their hostess' wishes, wandered over the place. Lights were seen on the bosom of the river, indicating that some of the girls had brought candles and set them afloat.

Frank Edgarton had been requested by his mother to set an example to the other men guests by entering into the spirit of the affair and go forth in search of adventure. He strolled alone ed candles and lighted a cigar, resolving to smoke it to the end before returning to the house, for he was bent on pleasing his mother and feared that he would return too soon. The night was not cold, the stars were bright, and Frank was content to remain in the

open so long as the case required. Suddenly from bushes, perhaps a hundred yards from him, a light flashed. It was not the season for fireflies, and even if it had been no fireflies could give so great a light. It at once occurred to Frank that it had been set by a human being. Either some of the men or girl guests were seeking an adventure. If a girl Frank was ready to accommodate her. He walked toward the place where he had seen the light, but when he reached it found nothing but bushes. While looking about him the light flashed again, but from a different location. Frank went to the new spot with the same result as before.

It was evident that some one, probably a girl, was bent on leading him a game of hide and seek. He mas quite ready to play it and waited for another flash. It came, and this time, instead of walking leisurely toward it, he ran. Nevertheless the result was the same as before. He found no one. For some time the light flashed from different points, and yet the trend was in one direction. Though Frank made violent dashes for it, when he reached the point where he had seen it he found only silence and a low growth of evergreens. Once, instead of seeing a flash, he heard a low laugh. This settled the was a woman's laugh. Frank ran toward the place from which it seemed to come, but one has no sense by which to judge of the direction of sound, and when he reached the illuminated place the light was flashed in an entirely different one.

though he found darkness he touched vicinity. something human. Resolving that whoand held it fast. That it was feminine was evident from the apparel.

"Let me go," said a girl, struggling. "Not until I have learned who you dance, and I must at least get a glimpse of your face before I will release you. Come, flash your light!"

"I have no light. It is you who have voice."

"Do you mean to tell me that you have not a flashlight?" "I have not."

Tisdale, are you not?" "I am." No one knows whether Frank Edgar-

ton during this dialogue continued to hold Alice Tisdale in his arms or released her. Alice at once became impressed with a fancy that on this Halloween a will-o'-the wisp had conducted her to her future husband, and, though she was a modest girl, it is quite possible that she did not continue her efforts to free herself.

Later the two walked into the house together. Most of the guests had returned. Some were telling stories they had invented of marvelous happenings, some admitting disappointments. Alice Tisdale said nothing. Perhaps she was waiting for Frank Edgarton to tell their experience. But Frank held his peace. He was puzzled. He believed that Alice told the truth when she denied having a flashlight. Alice was wondering if she had met a real Halloween experience.

Mrs. Edgarton and Mrs. Tisdale when their children entered were sitting together chatting apparently on commonplace topics, for they showed no animation. The others were interested in one another's stories of their experiences. Edgarton turned to Alice and looked at her inquiringly, as much as to say, "Is it possible that so retiring a girl could have led me such a dance?" She dropped her eyes under his gaze. He wished he was back in the dark place where he had seized her and was again holding her in his arms.

"Come out on the porch with me," he said, "and let us have a look at the

### WORLD WIDE THEMES

American's Duty Under the Present Day Conditions to be Considered.

Topics of world wide importance; subjects which concern every Christian American citizen; practical themes, every one of them, will be discussed by men of national reputation during the Maryland convention of the Laymen's Missionary Movement, in Baltimore. November 4 to 7. Some of the following subjects will be discussed:

What Must America Do Under the New World Conditions?

The Sort of Christianity Needed to Conquer the World.

The Call of God to the Church of Today.

Is a Victorious Christian Life Possible and Obligatory? Recent War Experiences in Turkey.

Is the Church Awakening to Her Missionary Duty? The Disintegration of Mohamme-

#### REQUEST FOR PRAYER

Intercession for Baltimore Laymen's Missionary Movement Convention.

The Following request has been issued by the committee on prayer for the coming Laymen's Missionary convention to be held in Baltimore, November 4 to 7.

"We would be reminded that the Maryland convention of the National Missionary campaign, to be held in Baltimore November 4, 5, 6, 7, will be an occasion of quickening and power only as Christ shall be felt in its fellowship and conduct. Let us acknowledge his Lordship in our preparations and confidently look for the manifestation of it in all sessions of the convention.

"To this end let us covenant to bear the convention in mind in our daily devotions and make it a prominent object of intercession in our mid-week and Sabbath services."

These subjects for prayer have been suggested:

For the Whole Undertaking. For the Mission Boards. For the Convention Cities.

For the Delegates. For the Epeakers. For the Churches.

For the Spread of the Spirit of

Those who are at the head of this great interdenominational movement feel that the opportunities and also the difficulties of so great an undertaking constitute an unusual challenge to faith and prayer. More important than all other means of preparation is the enlistment of a large number of intercessors, who with unclouded vision of Christ, unshakable faith in God and unwearied persistence, will unite in prayer that the campaign may help to inspire America to ful-

Prompt Registration for Laymen's Missionary Convention.

The Maryland convention of the Laymen's Missionary Movement will be held in Baltimore, November 4 to

The meetings will be for men. Every Protestant church in Maryland is invited to send representatives Church officials, Sunday school superintendents, men's Bible classes, young men's societies, men's missionary committees and kindred organizations should be represented.

To meet convention expenses there will be a registration fee of one dollar required from each delegate. These fees will meet the expenses of the cenvention without great expense to a few men or the churches It is hoped there will be an enroll-

ment of 3000 delegates. If the enrollment fees more than meet the convention expenses, the surplus will be used in the conservation and extension of the interest created by the convention.

Prompt Registration Urged Ministers and laymen are urred by the convention committee to fill out their application blanks at once and send them in through a member of the enrollment committee in their church, or mail them properly fil'ed out, with registration fee accompanying, to Mr. Carl M. Distler, chairman of registration committee, Room 1312 Fidelity building, Baltimore.

On receipt of applicant's applica tion with proper fee, credentals will be mailed from headquarters (or delivered by a member of enrollment committee).

Only registered delegates will be admitted to the convention, and as such they will be extended the privileges of the convention.

### HINTS FOR THE COOK

SOME BETTER WAYS OF DOING KITCHEN WORK.

How To Do Away With Lumps in Making Cocoa-To Keep Rice and Macaroni From Becoming Mushy.

Instead of mixing cocoa with boiling water to dissolve it before putting it into the cocoa pot, try mixing the dry cocoa with an equal amount of granulated sugar and then pouring it into the boiling water in the pot, stirring all the while. This does away with the lumps that usually have to be fussed over, and also a mussy cup.

The kettle should be given frequent baths, else lime and other salts will settle on the bottom, which may then be dissolved off into the boiling water, making it "hard."

To heat water very quickly set a broad, flat saucepan over the fire and cover to keep in steam.

A small zinc-covered board, about the size of a rolling board for pastry, is invaluable for setting hot dishes, pots, etc., upon. This preserves the kitchen table top, and leaves room on the stove for other things.

To prevent a roast from becoming fat soaked, set it upon a rack in the roasting pan. But keep the surface of the roasting pan covered with fat to prevent it from burning. Fat is better used here than water, as water utterly changes the character of the meat.

Cold meats may be attractively served by removing first all gristle, bones and skin and excess fat and then cutting into thin strips or slivers. Warm indirectly by pouring over the meat any desired hot sauce.

To keep every grain of rice separate and distinct, cook it in a pot of rapidly boiling water with the lid off. Cooked in a double boiler with the lid on makes the rice mushy. Macaroni should be cooked same as rice.

To soften hard tissue of dried vegetables like peas, beans and lentils, cook in soft water. Otherwise add baking soda to ordinary water in the proportion of one teaspoonful to two quarts of water. If string beans are not freshly gath-

ered from the garden, it will improve them to prepare them for cooking, then let them stand for an hour or more in cold water before applying heat. Dried apples, apricots, prunes, etc.,

should be soaked overnight in cold water before cooking, so as to "plump" them and soften the dried tissue. Try "caramel sugar" as a dressing for mush, griddle cakes, sauces for puddings, icing for cakes, etc. This is made by cooking the sugar in a

pan until it browns nicely or makes caramel. This may be made into a sirup by the addition of water and bottled for future use.

Baked Ham and Sweet Potatoes. A delicious meat dish can be made by baking ham and sweet poatoes together. Grease the bottom of a round baking dish, and place a slice of ham, about one-half inch thick, in it. Pepper the ham and sprinkle a few cloves over the meat. Then spread mashed sweet potatoes over meat, about an inch and a half in thickness. Put butter, salt and pepper on potatoes, add another slice of ham, another layer of potatoes, and top off with a third slice of ham. Bake in a rather hot oven for half an hour, or until the meat is tender. Serve hot, meat and potatoes together. This is an excellent dish for late summer and fall .-

Grape Pie.

Farm Life.

Remove the skins of the grapes, put the pulp in a stewpan and bring it to the boiling point; let it simmer for five minutes; force it through a strainer to remove the seeds and add the skins to the pulp. There should be one and one-half cupfuls. Mix two cupfuls of sugar, a few grains of salt and two tablespoonfuls of flour. When blended thoroughly add two eggs well beaten and one tablespoonful of melted butter. Put between crusts and bake.

Chronic Constipation.

"About two years ago when I began using Chamberlain's Tablets I had been suffering for some time with stomach trouble and chronic constipation. My condition improved rapidly through the use of these tablets. Since taking four or five bottles of them my health has been fine.' writes Mrs. John Newton, Irving, N. Y Obtainable everywhere.

CARROLL RECORD.

THE INTERNATIONAL SERIES.

Lesson VI.-Fourth Quarter, For Nov. 7, 1915.

Text of the Lesson, Il Kings xii, 4-15. Memory Verse, 9-Golden Text, II Cor. ix, 7-Commentary Prepared by Rev. D. M. Stearns.

Among the many things I do not yet know there is this-why we should know the names or some mothers and not know the name of David's mother and some others. Both in our lesson chapter and in Chronicles we are told that the mother of Joash was Zibiah of Beersheba. Now, the meaning of Beersheba is "the well of the oath" and always suggests the faithfulness of God (Gen. xxi, 31, margin). It was at Beersheba that Abraham dwelt when he went to Moriah with Isaac to offer him up, and to that home he brought him back as alive from the dead (Gen. xxii, 1-19). So I am reminded that all blessing depends upon the death and resurrection of the Lord Jesus Christ. It was a good thing for Joash that he had such a friend as Jehoiada the priest, who must have been a remarkable man in many ways, living to be 130 years of age, so he must have been 100 or nearly so when he caused Joash to be proclaimed king, just about 100 years after the death of Solomor

Joash did right in the sight of the Lord as long as he had Jehoiada for counselor, but the people still sacrificed and burnt incense in high places (verses 2, 3; II Chron. xxiv, 2, 3). We cannot think of Israel (whether the ten tribes or the two or the twelve) being right with God apart from a right relation to the tabernacle or temple, for those buildings stood for God in their midst (Ex. xxv, 8; I Kings vi, 12, 13). So we read that Joash was minded to repair the house of the Lord, which Athaliah, that wicked woman, had broken up (II Chron. xxiv, 4, 7). . The great fact about the Lord Jesus, the true tabernacle and temple, was that He was God manifest in the flesh, God was in Christ. The church, the body of Christ now being builded, is wholly for God. Each individual believer is a temple and should be wholly for God, The repairs which Joash desired to

make, like all work today, needed funds, and he thought of the tabernacle of Moses and of the willing of ferings (II Chron. xxiv, 6), but he did not seem to remember that these willing offerings were brought in, not sent for. He sent the priests and Levites out to gather the necessary money, but the plan did not work, for after twenty-three years the funds had not been gathered and the repairs not made (verses 4-8; II Chron. xxiv, 5-7). Then Jehoiada the priest, the king agreeing, put a chest, with a hole in the lid of it, beside the altar as one cometh into the house of the Lord, and a proclamation was made through Judah and Jerusalem to bring in to the Lord the offering that Moses, the servant of God, had commanded Israel in the wilderness. Then the princes and the people rejoiced and brought in day by their own communions. Twenty secday, and thus money was gathered in abundance (verses 7-10; II Chron. xxiv, 8-11).

Notice that the chest to receive the offerings was placed beside the altar of burnt offering, the brazen altar, on which the lambs were offered morning and evening, typical of Golgotha and the one great sacrifice offered once for all. The one constraining motive in all offerings to the Lord must be the love of Christ, the Son of God, who loved the church and gave Himself for it: who loved me and give Himself for me; no duty about it, but just love constraining. Then notice that there was no further effort to raise the money-no personal appeals, no soliciting from individuals, but all was brought in joyfully and willingly. Note care fully Ex. xxxv, 21, 29; I Chron. xxix. 9, 17, and lay it to heart. On this principle I have received for home and for eign missions in the last twenty-five and a half years (up to July 1, 1914) over \$756,000 and in the same way have seen for thirty-four years all current expenses of a congregation easily

The Lord God of Israel still liveth and is ready to hold strongly with hearts that are whole toward Him as it is written in II Chron. xvi, 9, margin. The money was given to the overseers of the work, and they laid it out to the carpenters and builders that wrought upon the house of the Lord, but no reckoning was kept with the men to whom the money was given, for they dealt faithfully (verses 11-15; II Chron. xxiv, 12-14). This method of handling money could not be safely carried on in our day unless we could find some workmen as faithfully honest. There are such, but they are like whole hearted Christians-few and far between-or in very small bunches here and there. We would all do well to keep in mind the day when every one of us shall give account of himself to God (Rom. xiv, 12) and live now accordingly. The conduct, or, rather, the misconduct, of Joash after the death of Jehoiada in listening to the princes of Judah and in leaving the house of the Lord God and worshiping idols and in refusing to listen to the prophets who were sent unto him is a sad and almost unbelievable record, or would be if we did not know how desperately wicked the human heart is. But what shall we say when we see Joash commanding to stone to death the son of Jehoiada because he was reproved by him? (II Chron. xxiv, 20-22.) The Lord did look upon it (Matt. xxiii, 35).

## SUNDAY SCHOOL PURPOSES OF A

Laymen's Missionary Campaign Has World Wide End.

To consider new world conditions and America's enlarged responcibility.

To study the missionary progress of recent years To project plans looking toward

the accomplishment of our whole

To emphasize the adequacy of the Gospel to meet modern social conditions.

To increase the spiritual power and efficiency of the local church. the general use of the best mel ods of missionary educaion and finance.

To inspire laymen to take their part in the extension of the kingdom of Christ.

These are the objects of the great interdenominational campaign being conducted under the auspices of the Laymen's Missionary Movement. The Maryland convention will be held at the Mt. Vernon Place M. E. church, Baltimore, November 4 to 7, 1915.

Many denominations in the United States and Canada have organized committees to promote the spirit and methods of the general movement in

The Laymen's Missionary - Movement has no membership and no organization, apart from committees. There is a general committee of 100 laymen, which meets annually, giving general direction; an executive committee of twenty-five members, which meets monthly in New York city, and eight division committees are being developed in the United States. In each city, community or county where work is undertaken a co-operating committee is organized.

### The Last Five Years

The Laymen's Missionary Movement has been hewing along the lines of the national missionary policy adopted at the Chicago congress in 1910. In 1913 the movement took in all the missionary forces, both home and foreign and promoted during the last two years under the name of the United Missionary campaign over 625 conferences and conventions in as many places in an effort to reach with the message and the method of the movement every center of over 5000 people in the United States and

Canada. The foreign mission offerings of the Protestant churches of this country which, in 1906, the year of the organization of this movement, totalled about \$8,000,000, last year totalled \$17,250,000. About double that increase has been turned into the missionary and benevolent work of the church at home and a larger proportion goes to the work of local churches. This is due largely to the adoption of the methods of church finance, introduced by the movement, and to the increasing interest of men

#### in the church's great would work. World Wide

The movement has reached Great Britain, Australia and several countries of Europe till now its spirit has

attained a world-wide reach. The present world situation, in which great Protestant Christian powers are engaged in strife, places an unprecedented burden upon the Christian forces of this country to promote the world missionary enter

STANDS BETWEEN TWO FIRES

European Republic Declines to Be Overawed by Powerful Neighbors -Refuses to Starve or Be Driven Bankrupt-Would Fight for Rights.

By EDGAR ANSEL MOWRER, (Correspondent of the Chicago News.) Lausanne, Switzerland.—Seignobos, in his "Histoire Politique de l'Europe Contemporaine," begins his chapter

on Switzerland as follows: "The interest of Swiss history must not be measured by the size of the country. This little country holds a very important place in the history of contemporary European institutions. To whoever desires to understand the evolution of our modern democratic society, this history may be recommended as the most instructive selection of examples of the application of the principle of popular sovereignty."

Foreigners who know Switzerland. with or without having visited it, as a country of tourists, hotels, mountains, picturesque chalets, mountain railroads, glaciers, milk chocolate. St. Gall embroideries, cheese and refuges for revolutionists, may be pleased to know that of all the people of Europe the Swiss have, historically, been the most belligerently tenacious of their independence and that they are today the people who have gone farthest in the realm of popular government.

The "initiative" has been general since 1848, and the "referendum," considered a most radical, modernist measure, came in about the same time. Proportional representation was adopted by the Italian canton of

Ticino as far back as 1891. German Element Is Strong. The Swiss confederation counts today approximately 3,450,000 inhabi-

tants, of whom about 200,000 are Italian by race and language, 750,000 consider themselves French and the remaining 2,500,000 speak German. Thus the German element is by far the strongest numerically and the most important. It can control in federative political matters. The French cantons, with the important centers of Geneva and Lausanne and their excellent newspapers, play intellectually a role somewhat beyond that presumed by their numerical inferiority. The Italian element is relatively insignificant, although one of the most brilliant of the government ministers, Sig. Motta, comes from the Ticino.

So much by the way of prelude to a presentation of Switzerland's position during the present great war.

At the beginning of hostilities the French and Italian cantons manifested a sturdy but inoffensive sympathy for the allies. The German cantons, to the contrary, gave vent to a single strong burst of Germanophilia. I have not taken account of the individuals whose sympathies are always with the side uppermost.

Today, though by stages so imperceptible that they cannot be traced, the situation has become different. Here in Romansh Switzerland the population is still overwhelmingly proallies. There is little German in the streets or in the stores. As soon as Italy entered the war the Ticinese pronounced for Italy. It is not an exaggeration to say that, notwithstanding the German speaking majority, there are now in the country as many open adherents of the allies as of the Austro-Germans. This means that a large number of persons who speak German favor the nations of the quad-

ruple alliance, particularly France. Swiss Industry Badly Hurt. But a new economic problem has appeared and is forcing people to face it squarely. Switzerland, accustomed in time of peace to derive considerable profit from its fine scenery and its central position, now pays heavily for the latter. A large proportion of the national army has been mobilized at considerable expense and kept under arms since August, 1914. Industry is suffering. The foreigner comes but rarely to the countless hotels, which stand bleak and deserted like so many gigantic mausoleums. Only a few homeless individuals from foreign parts loiter in the streets-few by comparison with former years. Even the exiled revolutionary has quit the little country where he for so many years found sanctuary. A few frontier towns are centers of espionage and intrigue. That is all. The sun rises alone over the glaciers' fair desolation. There are no tourists shivering with cold and delight to welcome his upcoming or to turn away to hurry down the last slope homeward as he sets behind the purple mountains.

The country suffers from the loss of tourists. But most of all it suffers from the bonds and restrictions with which the warring nations, and chiefly those which command the sea, are endeavoring to correct it. During a year the strings have been drawn ever tighter and tighter. Because she lacks a seaport Switzerland can

breathe less easily even than Holland. Constant disputes are arising relative to contraband, conditional contraband, imports and their final

Is Between Two Fires. The situation finds adequate expression in the words of a contributor to the Gazette de Lausanne:

"Germany and Austria have said to Switzerland: 'We are perfectly willing to deliver you such raw materials as you lack. But you must give us in exchange not money but certain products of which the allies' blockade deprives us and which we need.' The allies object to this, saying to Switzerland: 'From the beginning of the war we have placed our ships and our trains at your service, and, unlike our enemies, we have never thought of imposing compensations in goods upon you. In the future, as in the past, we are quite willing to furnish you with raw materials as well as with foodstuffs. Only, desiring that our blockade be effective, we ask you to give your word not to pass on in any form whatever to our enemies that which we procure for you.

"Switzerland replies to the allies: 'I am grateful to you for supplying me with foodstuffs and raw materials without demanding compensation. Masters of the ocean, you have been able to do me this service, like good neighbors. Germany and Austria, although blockaded by your fleets, have also done what they could for me. Driven by need, they asked me to pay them in goods, while continuing to pay you in specie; and I have not refused, being myself hard pressed and neutral—that is, equally friendly to all and unwillingly to increase difficulties. In the meantime your fears are groundless, for I have taken care formally to forbid the exportation from my territories of a whole series of goods of urgent necessity. And I am always on the watch for smug-

Needs of Swiss Industry. "'On the other hand, my industries must live in spite of your war, on account of which I, though perfectly innocent, suffer more than you, perhaps, believe. And in order that my industries be not ruined they must be permitted to re-export to all countries the articles manufactured from raw materials furnished by no matter what belligerent. I am neutral of my own free will, but with your approbation. That is why, although I have obligations toward you (and I do not deny them), that you also have a few toward me, of which the first and essential is to let me live.

Here is the situation in a nutshell. The result of pressure from both sides, but principally from the side of the allies, has been to make the Swiss conscious of their nationality and to start a wave of patriotism. Negotiations are going on to regulate the matters of difference between the little mountain country and its powerful neighbors by establishing a Swiss conrol of all foreign trade with a view to doing away with chances for cheating. For the people will not listen to propositions from either side offering "compensation" after the war. They want the difficulty done away with now, immediately.

Would Fight for Rights.
The Swiss are aware of their force. The effect of 350,000 sturdy wellequipped and trained soldiers thrown into the balance today on either side would be considerable-might be de-

"We have been much too humble," men tell me here. "From now on we shall cease to supplicate and begin to demand, courteously but firmly." "Would you fight?"

"Certainly, if forced to it. We refuse to starve or be driven bankrupt. England and France and Italy must be brought to realize this fact or face the consequences.

"But your personal sympathies, as you have just told me, are with the

countries you mention." That is true. But you must realize that before we are German, French or Italian we are Swiss. We have our own country to look after. In any but an extreme case an attempt by the German-speaking majority to force the nation into war against the allies would mean an immediate rupture between us and them and so bring about the ruin of Switzerland. But if the present restrictions, already bad, grow heavier instead of lighter, if the allies cannot be persuaded by our diplomats that although we ask only to live we put our entire strength behind this demand, then, German, French or Italian-speaking though we be, we shall fight side by side like a single man, as we would do tomorrow at the slightest infraction of our territorial rights. And I-well, I should fight too, even against nearly everything in the world I hold dear."

Persimmon Recipes.

The only fruit, says a new publication of the department, Farmers' Bulletin No. 685, which equals the persimmon in its value as a food is the date. Never theless many persons with fine persimmon trees in their possession are allowing the fruit to go to waste either through ignorance of the many uses to which it may be put or through prejudice. There is a saying in the persimmon country that persimmons are "good for dogs, hogs, and 'possums." This, however, is declared to be a gross injustice to a very valuable product.

One reason for the neglect of this fruit is the mistaken idea that persimmons are anfit to eat until they have been touched by frost. As a matter of fact much of the best fruit is lost each year because it ripens and falls to the ground, where, not being touched by frost, it is left to rot. Such persimmons as are not edible before frost comes are a late variety of the fruit, and the reason that they pucker the mouth is because they have not yet ripened. In general the best fruit ripens

just before the leaves fall.

It can be made up into a large number of very palatable products for human consumption. To be on the safe side it is well to add a half teaspoonful of baking soda to each cupful of persimmon pulp whenever the fruit is subjected to heat. This does away with all risk of astringency, the quality in unripe persimmons which produces the well-known puckering of the mouth. If the fruit is perfectly ripe this precaution is not necessary, but as there is always the possibility of some green fruit finding its way into the pulp it is usually advisable.

The following recipes will be found simple and exceptles.

simple and agreeable:

PERSIMMON BREAD

1 Cup of persimmon pulp, 1 cup of water, ½ teaspoonful of soda, yeast, shortening, flour to make a stiff dough. Set to rise, mold, and bake like other bread.

PERSIMMON GRIDDLECAKES 1 Cup of persimmon pulp, 1 egg, 1 cup of flour, 1 teaspoonful of baking powder, ½ teaspoonful of soda, milk to make a thin batter. Bake and serve.

PERSIMMON CAKE 1 Cup of persimmon pulp, ½ cup of sugar, 1 egg, 1 cup of flour, 1 teaspoonful of baking powder, ½ teaspoonful of soda, butter of size of a walnut. Bake 40 minutes in a moderate oven. For a soft pudding leave out the eggs. For a custard leave out the flour and the baking

PRESERVED WHOLE PERSIMMONS

Put a thin layer of sugar in the bottom of a jar; then a layer of whole ripe persimmons, then a layer of sugar, and so on until the jar is full. The sugar will soon dissolve and form a sirup. Press the upper fruits down under the sirup or add more sirup to the jars. Seal and store until used. The sirup may be drained off and the fruits served like dates, which they will resemble very much in both appearance and flavor.

The great industry of Venice is that of meeting the demands of tourists The movements of the foreigner, as they are skillfully guided and directed by a host of competent experts, are not difficult to forecast. It is known that if the foreigner arrives at the railroad station he will take a gondola to his hotel. He may travel in the ferryboat or on foot all the rest of the time, to save money, but when he arrives he will take a gondola, so that he may casually mention in writing home that he stepped directly from the train into a luxurious gondola. Knowing this peculiarity, the municipality of Venice keeps tab on the gondola traffic from the milrord station as a sort of gauge of prosperty -Argonaut.
