TANEYTOWN, MARYLAND. FRIDAY, MAY 18, 1917.

No. 46

BRIEF NEWS NOTES OF GENERAL INTEREST.

Gleaned from the County and State and our Exchanges.

No more tin cans are to be sold this year, for packing beans and soups, but all cans are to be saved for per-ishables, and for foods absolutely nec-

Congressman Gardner, of Massa-chusetts, has resigned his seat in Congres to enter the military service. Gardner holds the rank of Colonel in the Officers Reserve Corps, and will report next week to General Wood, at Charleston, S. C.

Dr. Hugh H. Young, one of Baltimore's most noted surgeons, has been appointed Major in the Medical Reserve Corps, and will shortly leave for England. Several other surgeons will go, as well as a corps of nurses, and form a complete hospital unit under Dr. Young.

Taken ill with pneumonia on the same day that her husband had an attack of acute Bright's disease, Mrs. Sarah E. White, 73 years old, of Thurmont, died Saturday, four days after the death of her husband, Jos. White. Mrs. White is survived by two step-children, Archie White, of Hartford, Con., and Mrs. Catherine Roddy, of Thurmont, and one sister, Mrs. Margaret Foreman, of Thur-

A large force of employes of the A large force of employes of the Western Maryland Railway Company began work Tuesday morning cleaning up Pen-Mar Park, preparatory to the opening of the Park in June. The walks and mounds are inpretty good shape, but there are many dead chestnut trees that were killed by the blight, that will have to be cut down and removed. Every year a number and removed. Every year a number of these die and the removal of them is doing away with some of the shade in the Park proper.

The enactment of prohibition legislation, under the guise of food con-servation, before the adjournment of servation, before the adjournment of Congress, was predicted at the Capitol. Prohibition Senators, such as Kenyon, Republican, Iowa, and Sheppard, Democrat, Texas, make no attempt to hide their satisfaction that prohibition may be brought to conserve the food supply during the war. The Committee on Agriculture war. The Committee on Agriculture is the centre of the prohibition activity in the Senate.

Because of the shortage of labor, the State Roads Commission is facing a serious situation in regard to maintenance work for the summer. The oiling of the macadam roads has just begun, and it has been found difficult stone chips behind the oil spreaders. In order to get enough men so that the work can be finished in time, application has been made to the State Board of Prison Control for convicts from either the House of Correction or the Penitentiary.

A very strong appeal was made to Governor Harrington, Friday, to use his influence to have the special session of the Legislature, which will meet shortly, make provision for a temporary increase, during the war period, of the salaries of teachers of the state earning less than \$900 a year. It is almost impossible for some teachers to support themselves upon their salaries, with prices higher than ever before. Some of themwho have dependents, are said to be confronted with the problem of being able to live decently, unless they are naid more.

A squadron of American torpedo boat destroyers has safely crossed the Atlantic and is patroling the seas in war service. The American navy's actual entry into the war zone has already been productive of a brush between a destroyer and German underwater boat, according to an announcement by British admiralty, but the result of it has not been made public. The destroyer squadron arrived in Queenstown after an uneventful voyage across the Atlantic, but almost immediately, after a formal exchange of greetings with the British naval officials, put to sea again for the hard work that is before it.

From Patriotic Rev. Bateman.

(For the RECORD). Please find enclosed subscription to your valuable paper for another year. I should have sent this in March, but I simply overlooked it, as

one too often does.

Well, flag raising is the order of the day in this community. Large flags are flung to the breeze from many large manufacturing concerns and brick works. Within one week I had been invited to speak at five such plants; have just returned from one such flag raising, and I have one or two more within a week to address so I guess that is enough. If they won't let me go to the blood-stained battlefields of France, they seem around here to want me to make most of the addresses to keep the

fires of patriotism burning.

We all hope this awful crisis will soon end, for it is a war of democracy against autocracy, and our flag which has led every charge in battle in the past, will do so again, so three cheers for the "Red, White, and Blue.

A. D. BATEMAN.

As to Various School Questions.

We have been asked to publish several articles on Education Work and School Improvement, but we think best to decline them, as we are not sure that we care to give them in-dorsement at this particular time when taxes are soaring, and the country is beset with various serious problems growing out of the war situation. We believe thoroughly in good comfortable schools, and all that, as well as in reasonable compulsory attendance law, but the times and the burdens and but the times. and the burdens and obligations of the times, must be considered in our public expenditures and public practices, even in such an important mat-ter as public education.

We think that there are features in

our present school law that are impractical, and that there is a tendency toward too much formality and system, both as they relate to teacher and pupil, and not enough adher-ence to the fundamentals of a practical education, such as the taxpayers ought to pay for. We do not want any lowering of efficiency in our schools, even during war times, but the definition of "efficiency" should be a reasonable one and not be in the definition of "efficiency" should be a reasonable one and not be in the definition of "efficiency" should be a reasonable one and not be in the definition of the control of the c a reasonable one, and not be imposed as a burden, just now, when burdens are coming rather thick on taxpayers and workers, but rather that we can await a more favorable time for school luxuries.

As the matter will come before the special session of the legislature, we have no doubt that it and the Governor will give the question full and intelligent consideration.

Rededication of Winter's Church.

The old historic church (St. Luke) more commonly known as Winter's church, located about 1½ miles west of New Windsor, Md., Rev. W. E. Saltzgiver, Pastor, was rededicated Sunday, May 6th, 1917. It was a day that will be long remembered by the members of the above remediates. the members of the above named church, because the entire indebtedness of \$2500 was cancelled.

The morning sermon was preached by Dr. H. H. Weber, of York, Pa., Secretary of the Board of Home Missecretary of the Board of Home Bissions and Church Extension of the General Synod of the Evangelical Lutheran Church of the U.S. In Lutheran Church of the U. S. In the afternoon, addresses were deliv-ered by Mr. J. P. Garner, of Linwood, Md.; Rev. L. B. Hafer, of Taneytown, and Rev. W. H. Hetrick, of Westmin-ster. The choir of Grace Lutheran church, Westminster, furnished the music for the afternoon service.
Rev. W. O. Ibach, of Union Bridge,

reached the evening sermon

The renovation consisted of a new metallic ceiling, octagon style, trimmed in gold, blue green with ivory background. Walls refrescoed in a rich tint of pink, with a bronze border. There is also a large painting of Christ's Ascension, on the front wall. The woodwork is painted in dark oak. The carpet is a serviceable and beautiful ten-wire Brussels, and was presented by the Ladies' Aid. The curtain around the chair railing was curtain around the choir railing was presented by the same organization get enough men to spread the A Caloric furnace was installed. The pews are dark oak and were purchased from the Dittmar Co., of Williamsport, Pa. The pulpit was presented in memory of Geo. O. Brilhart, by his mother, Mrs. Maria Brilhart. The organ was also presented by Mrs. Brilhart. The Bible was presented by Mrs. Ella Martin and her son, Ralph, in memory of Chas. E.

A bountiful lunch was served in the pavilion adjoining the church. About 1500 people were present during the day.

As to Calendars for 1918.

Don't forget that we are taking orders for 1918 Calendars, now, at prices about the same as last year, out we do not guarantee our present prices to last during the season. Last year, prices were advanced in the Fall, and may be advanced again this year, so the safe thing to do is place orders now and be sure of getting not only the designs now to be had, but the present prices. Our patrons should call at our office, now, and make their selections. Of course, delivery will not be made until nearer the time of

Court Proceedings.

On Monday the May term of the Circuit Court convened with Chief Judge William H. Thomas on the

THE SPECIAL SESSION CALL NOT YET MADE.

Governor Waiting for Congress to

Act on Questions.

Governor Harrington has not yet made the call for the special session of the legislature, for until Congress of the legislature, for until congress acts on certain questions it will not be known what legislattion will be necessary for states to pass to fill up the gaps left by Congress; and it is not desirable to hold a long, or waiting session, as it should be held with as little expense as possible.

A pamphlet has been issued this week by the Maryland Preparedness

week by the Maryland Preparedness and Survey Commission, outlining a number of measures to come before the special session of the legislature, as war measures, as follows:

1. Authorizing the Governor to appoint a State Council of defense to co-operate with the national government and other States.

2. Empowering the Governor to organize the Maryland State Guard, not to form part of the National Guard, but service in it no exemption to National Guard service. 3. A State Constabulary—much on the order of a state police.

4. Bill authorizing town firemen to organize themselves into county or town guards.
5. A number of amendments to the militia law. 6. Requiring the registration of

alien enemies. Suspension or modification of school attendance, hours of labor and employment laws, if National or State interests require.

8. Relating to successive legal

9. Provides for the suspension of legal proceedings against persons in the military or naval service, providing such persons are unable to defend themselves by reason of their government service. 10. Provides for the suspension

of judgments on account of the war, against persons engaged in the military, or other government service. Statutes of limitation may be

suspended against certain persons.

12. Relates to the question of soldiers' voting, while on duty and in

13. Authority to acquire a state farm for prison labor, and to put to work thereon such prisoners in the Penitentiary and House of Correction as may be fit and available.

14. A bill authorizing various state institutions to acquire additional land for farm purposes.

15. Authorizing the Governor to complex correin prison labor on public

employ certain prison labor on public road or street work.

16. Extends the power of the Governor and the Courts over vagrants and tramps, and to put them to work.
17. Makes regulations attaching to the sale of explosives.

18. Makes it a felony to destroy

property by dynamite, etc.

19. Authorizes Governor to appoint special policemen for railroads, manufacturing establishments, etc.

20. Provides for a Military Training Commission and for

ing Commission, and for military training in the schools of the state.

21. Relates to the pay of state, county and city employees who may be drafted into the defense service.

22. Relief of soldiers' dependent relatives, providing the general gov-

ernment does not do so. 23. Refers to agricultural and food production measures. Refers to the conservation of

oysters, crabs and fish. Authorizes a state loan for various war expenses.

The High Cost of Speed.

"The driver who persists in operating his motor car at high speeds may elude constables and police," says a writer in Farm and Fireside, "but he cannot escape from the penalties which natural mechanical laws levy upon his car. Here are ten reasons why it is expensive, dangerous, and inconsiderate of others to speed.

"Tires last about twice as long on a car that is driven at 15 miles an hour as upon cars driven at 30 miles an hour. Speeding generates heat, which s an enemy to rubber.

"Driving a car around a sharp corner at 25 miles an hour does more damage to the tire than 200 miles of straight road work. Excessive side pressure on tires may pinch the tubes, and it always strains the side walls of the casing.

"High speeds are likely to cause skidding and breakage of springs and steering gear, any of which are dangerous when speeding. 'In proportion to the mileage ob-

tained, high speeds require more gasoline and oil than a moderate rate of "Driving a car at excessive speed,

especially over rough roads, subjects the bearings to enormous strains. "High speeds may cause crystallization of rapidly moving metal parts that are subject to strain, and these may break at any time without warn-

"High speeds interfere with the accuracy of steering, as is shown by the number of reckless drivers who have gone over banks and into ditches, ecpecially on curves.

"It is a strain on the eyes and the nerves of the driver and also of the

other passengers in the car "Finally it is a menace to the pleasure and safety of others whouse the

"The majority of modern motor cars develop their maximum effi-ciency with lowest expense at speeds ranging from 15 to 25 miles an hour, depending on the make of the car and condition of the road."

The New State Assessment.

Secretary Allan C. Girdwod, of the State Tax Commission, on Friday made public a tabulation of the tax assessments of the State, which showed the total to be \$1,347,313,678,78,of which \$875,903,578.47 is in real and tangible personal property; \$40,900, 430.14 in ordinary business corpora-430.14 in ordinary business corporations; \$44,881,292.18 in domestic corporate shares; \$3,403,650.75 in distilled spirits; \$32,553,728.22 in bank shares; \$245,897,346 in securities, and \$103,773,667.02 in savings deposits.

The total assessment in the several continues of the political statement of the several securities.

counties and in Baltimore city were: Calvert 3,004,602.23 Caroline 11,530,874.42 25,622,724.20 16,611,032.56 Carroll Cecil Charles
Dorchester 6,268,714.08 38,187,880.55 Garrett 12,389,341.56 Harford 18,571,355.02 Howard 13,664,614.06 Kent 10,392,430.46 Montgomery Prince George's... 24,261,685.41 18,139,799.70 Queen Anne's.... St. Mary's..... 10,376,475.44 5,009,989.51 Somerset Talbot 8,485,929.03 12,680,545.04 Washington 37,807,161.09 Wicomico Worceester 14,865,673.46 10,231,505.04

Total\$1,347,313,678.78
The above seems to show an increase in the basis in Carroll County of about \$4,000,000, making it stand fifth among the counties of the state.

Western Maryland College.

Western Maryland College at Westminster, Md., is celebrating its 50th Anniversary at the coming Commencement, June 8th to 13th.

TheGovernor, President Goodnow, and other distinguished speakers will be present on Commencement Day, June 13th, when the most interesting of the celebration exercises will be

A great company of former students will attend and it is expected that one of the most remarkable gatherings of the year will be seen. This institution, organized fifty years ago, has made an unusual success. It now has a fully equipped plant representing an outlay of more than four hundred thousand dollars. and has a student attendance of about two hundred and thirty. The school has become well known in our State, and represents the best type

of conservative, thorough work. The graduates are: John Alco Alexander, Keymar; Franklin Murray Benson, Crisfield; James Irwin Billmyer, Union Bridge; John Russell Blades, Pocomoke City; John Russell Blades, Focomoke City, Levi Bowen Burdette, Hobbs; Hugh Latimer Elderdice, Jr., Westminster; James Wallace Engle, Ellicott City; Joshua Tracey Fenby, Woodensburg; Thomas Edgar Grace, St. Michaels; Thomas Leroy Hooper, Manasquan, N. J.; Paul Jacob Horick, Westminster; Jarold Kemp, Bloomington; Hirl Adelbert Kester, Shickshinny, Pa.; John William Lease, Baltimore; Charles Ellsworth Guthrie Moylan, Ijamsville; Earl William Roop, West-minster; Worthington Johnson minster; Worthington Johnson Stultz, Catonsville; John Benjamin

Thomas, Delta, Pa. Misses Emily Kathryn Dryden, Snow Hill; Helen Carter Etzler, Lin-wood; Ellen Madge Hayman, Rockawalking; Dorothy Leah Jones, Baltimore; Madeline Jones, Temperance-ville, Va.; Mary Lee Melville, Sykes-ville; Hilda Rachel Ostrom, Cecilton; Ruth Huffer Renecke, Westminster; Nellie Elizabeth Royer, Westminster; Helen Marie Simpers, Germantown; Marion Gill Smith, Baltimore; Eloise Somerlatt, Cumberland.

Gettysburg to Get Camp.

Announcement was made Monday by the war department of United States, that Gettysburg National Park has been selected as a point for expanding two regiments of the regular army, infantry, now on duty at the Mexican border, into four regiments of the regular army. The reg-iments will be known as the Fiftyninth, Sixtieth and Sixty-first regi-

Last week Congressman Brodbeck went to the war department and took up the matter with the officials relative to the establishment of a mobilization camp at Gettysburg for the men who will be called to the colors. He urged that Gettysburg be used for this purpose, because of the fitness of thesite. It has been customary for the graduating classes of West Point Academy to go there each year for some time past and make a study of this historic battlefield. For several years past a training school has been naintained there for officers of the Marine corps, during the summer

Men who are now enlisting for service in the United States Army will be sent to Gettysburg to help expand the regiments which are to be ordered to Gettysburg to four regiments of full war strength, which means that at least 6,000 soldiers will soon be encamped there

A camp site for the training of 40.-000 men for the United States army can be established at Gettysburg, and it is possible that permanent barracks may be established there. Twenty million dollars have been appropriated for the establishment of such camps and if Congressman Brodbeck succeeds in having the government establish a permanent camp at Get tysburg, it will mean that many thousands of dollars will be spent for the erection of concrete buildings at this

ARMY BILL PASSED AND READY FOR PRESIDENT.

Provision for Roosevelt Division Was Retained.

Washington, May 17.—The Senate passed the Conscription Bill providpassed the Conscription Bill providing an army of approximately 1,600,000 men, by a vote of 65 to 8, late this afternoon after a day of acrimonious debate. The measure was sent at once to the White House for the President's signature. The War Department will set into action immediately the machinery for nation-wide registration of all men between 21 and 30 years of age, inclusive, for the selections. years of age, inclusive, for the selec-

tive draft. TheSenate's action this afternoon The Senate's action this afternoon closed a parliamentary struggle of more than a month and disposed of one of the biggest war problems yet laid before Congress. The measure was sent to conference three times. For awhile during today's debate it seemed in imminious danger of being For awhile during today's debate it seemed in imminent danger of being recommitted again for modification. When the conference agreement bill was submitted to the Senate for ratification shortly after the upper House convened this morning, it ran against unexpected opposition, based on the omission from the bill of the Senate provision limiting conscription to the period of thewar with Germany. period of thewar with Germany.

Charges of improper motives on the part of the conferees and insinuations of a deep-laid scheme by the war Department to use the bill to fasten permanent universal military service upon the country flew thick and fast. The controversy was finall smoothed out by an unanimous consent agreement to incorporate theomitted pro-vision in the Army and Navy war budget now pending before the Sen-

A spectacular tilt between Senator Stone,of Missouri, and Senator Hiram Johnson, of California, marked the closing hour of the debate on the conference report. Senator Stone assailed the Harding amendment authorizing acceptance of Col. Roosethorizing acceptance of Col. Roosevelt's offer to raise a division of volunteers for service in France. He charged the Colonel with unfitness to command and declared the amendment was "smeared all over with politics." This drew vigorous fire from Senator Johnson, one of the Colonel's Senator Johnson, one of the Colonel's closest friends. Senator Johnson plaeded for "more Roosevelts and more divisions to follow him."

"This movement was an outrageous thing to put into the bill," declared Senator Stone. "I am going to talk about this as the Roosevelt amendment, because it is Roosevelt's law. I don't question Roosevelt's courage, but I do question his judgment in commanding men. He is unfit, he has no respect for authority and he is incapable of subordination. He has not the military experience, training or temperament.

As finally approved the bill prorides for raising by selective conscription a war army in increments of 500,000 men from 21 to 30 years of age. It also authorizes without directing the President to raise volunteer forces which Colonel Roosevelt desires to take to France and greatly increases the pay of all enlisted

Proceedings of the Orphans' Court.

Monday, May 14th, 1917.—Fannie Thompson, executrix of Martha Alice Baile, deceased, settled her first and final account.

Ageline Bosley, administratrix of David F. Bosley, deceased, returned an inventory of personal property The last will and testament of James Shildt, deceased, admitted to probate and letters testamentary thereon were granted unto Gideon T. Hockensmith and Carrie G. Shreeve who received warrant to appraiseand and an order to notify creditors.

H. Grof, ward, settled her first and final account.
Charles J. Smith and Royal Smith, executors of William E. T. Smith, deceaced, returned an inventory of debts and reported sale of personal property.

Ida Belle Shipley, executrix of Thomas E. Shipley, deceased, report-ed sale of personal property and settled her first account.

Tuesday, May 15, 1917—Gideon T. Hockensmith and Carrie G. Shreeve, executors of James Shildt, deceased, returned inventories of property, debts, real state and received an order to sell personal property. The last will and testament of James C. Tawney, deceased, was admitted to probate and letters testa mentary thereon were granted unto Austin D. Stonesifer, who recived warrant to appraise and an order to

notify creditors.

Delia V. Basler, executrix of John
C. Harman, deceased, reported sale
of real estate on which the Court

granted an order nisi.
William Galloway, executor of Laura V. Galloway, deceased, returned inventories of leasehold property and debts and settled his first and

Russia Weakening As An Ally.

The all-important side of the European war still continues to be the attitude of Russia. If the army refuses titude of Russia. If the army refuses the authority of the new government, and if the factions in the government fail to act strongly in unison in favor of continuing the war, and work strenuously to bring the army under control and effective as one of the aggressive allies, it will be greatly to the advantage of Germany.

The demonstration of the Russian army and the consequent withdrawal

army and the consequent withdrawal army and the consequent withdrawal of German forces from the eastern front are having their effect in France. The heavy reinforcement of men and gunswhich Field Marshal von Hindenburg has been able to throw into the defense of his sorely bettered lines have for the time bebattered lines have, for the time being at least, caused a deadlock. This the most furious efforts of the British

and French have failed to break.

The first fruits of the chaos in Russia are the more ominous in the hints they offer of possibilities. The Council of Soldiers' and Workmen's delegates seems to have been aroused at last to the perils of its course. It is a question if its awakening has not come toolate. The soldiers in the ranks evidently have the bit in their teeth. It remains to be seen if there is a hand strong enough to check them from bringing about 10 hand them from bringing about vital anarchy

The hopeful side is the multiplying signs that the political and economic crisis in Germany is as acute as ever. Possibly for the first time in histroy revolution and a German republic have been openly talked about in the Reichtag. Most significant of all ap-parently the authorities do not dare to check the growing audacity of the Radicals.

Stops Price Inflation.

Chicago, May 16th.—The Chicago Board of Trade opened today upon a condition unprecedented in its history as a result of the action prohibiting the trading in wheat futures taken at a joint conference for uniformity by representatives of all important grain exchanges in the United States

Briefly stated, the ruling limits the buying of wheat, but leaves selling unrestricted. Leading grain operators said today it would not pull the prices down to those of normal times; the abnormal demand for grains and the short crop prevent that, but that all inflation in prices resulting from speculation and "food famine hys-teria" will be eliminated.

The action prohibits trading in all wheat futures "until further notice," except to close existing contracts. The warning was given that the exchanges are ready totake similar steps with regard to July and September oats and corn, should the necessity arise, trading in May options in corn and oats being under the ban with

Representatives of the exchanges indorsed unanimously the fixing of prices for wheat and agreed to declare all weekly wheat indemnities (puts and calls) in May corn and oats void and to prohibit transfer of grades on the same day they aremade.

Transfers of Real Estate.

Belle W. Runkles, executrix, to Oliver T. Davis, conveys land in Mt. Nelson Hawk and wife to Harry B.

Ohler, convey 60 acres for \$2500. Edward O. Geiman et al, trustees, to John E. Roser, convey 2 tracts of land, for \$2850. John E. Roser and wife to Emory

cels of land, for \$1000.

Thomas & Co., to Western Maryland Railway Co., conveys land, for \$10 a month rental.

Sunday School Institute.

Every member of Sunday School in Taneytown district is most urgently and cordially invited to attend the Sunday School Institute, held on this coming Sabbath afternoon in the Reformed church (town) at 2 o'clock. The president, secretary and the officers of the several departments of the County Association will discuss various phases of the work. Conferences will be conducted to clear up any problems that may be vexing you. An offering for our County work will be received. This meeting ought to find hearty support on the part of all interested in the highest development of the Sunday School. An-nouncement should be made in all churches and their schools.

Rev. Ralph H. Burgstresser, of Altoona, who has accepted a call to St. Mathew's Lutheran, Hanover, will assume the pastorate June 1st.

"'Tis the Star-Spangled Banner Oh, long may it wave O'er the land of the free, and the home of the brave."

Anybody who speculates with food, and forces up prices for the sake of gain, should be treated as a criminal equal to a thief, or worse. Let us have government regulation, by all means, if that will bring relief to the suffering consumers of the coun-

Both Baltimore City, and the opposing county units, have established argument factories on the annexation question, and are sending out their product to influence the voters of the state who will eventually, perhaps, have an indirect voice in the settlement of the question. We may be wrong about it, but we do not care to give either side much space, especially if it is proposed to keep up the debate all summer.

WHY?

The question can be asked, but not answered, in a good many ways, all showing; as never before, the limitations of human knowledge, and hunan helplessness, and indicating a and combined human effort to compel a return to normal conditions of peace, happiness and business.

Why this fearful war, that appears never-ending and limitless in its scope ?

Why can not war-sick men of all nations get together, arbitrate and settle, even the big questions of the war?

Why must death, destruction and debt, overwhelm the world, and apparently no effort be made to stop

Why should the quarrel between nations reach and disastrously affect nations having no part nor interest in the quarrel?

Why should the poor people of the world, and those depending on modest investments for a living, be made suffer because of the sins of others thousands of miles away?

Why should heavy burdens of taxation be placed on those who are not only not making money out of the war, but are being made poorer by

Why should not this county, even now, be making efforts to stop the war, through intercession, as well as by participation?

These are only a few of the whys? that are being asked every day by cause they are able to bring pressure millions of people-by people who seem to have wholly lost control of their own destiny, and are being helplessly buffeted about by a tempest of hate-by the failure of govern- withheld in the light of many things ments to be based on love, and jus- which every intelligent person knows tice, and righteousness.

Too Much Criticism.

Calling public men by opprobrious names, because they do not fall in line with what some of our news papers consider to be patriotic public spirit,is a new disease that is not only catching, but it is another evidence that some of our public trumpets are inclined to blow themselves to the point of showing that they have more wind than good sense.

It is all right to show how public men stand on public questions, but it is quite another thing, and gratuitously blatherskitish, to class men as Judases and Benedict Arnolds because they see proper to follow their own ideas--which may not be popular ideas ' Republican.

-on puble questions, rather than the ideas of their critics.

Rushing into print with extreme opinions about other peoples' opinions handling such serious questions as how to raise double crops, advising the President and Congress how to run the government, are all in the day's work in many of our newspaper offices, and all this serious as well as varied advice is reeled off as fast as the keys can be fingered, very often with

greater facility than real worth. It is quite true of the press, very often, "that fools rush in where angels fear to tread," and the country would be the better off, perhaps, for a lot less editorial writing in these troubles times.

No Reality in German Peace

Whatever new proposition for peace Germany makes today will be made by the same people who made the last. It will have the same underlying purpose, and it will be a fraud and a sham. There is just one peace which follows the defeat of the German armies now in the field. When they have been defeated, then it will be demonstrated to the German people that the conquest of the world is impossible, and that the doctrines which they have accepted through their rulers are altogether false and lead only to disaster.

There will be no peace in the world as long as Germany holds the doctrine that the necessities of the German state are above humanity and that there is no moral law where the man appetite is concerned.

We have got to face that fact once for all, that we must break the German system or it will break all that we care for or believe in. Let us recognize that until the German armies have been defeated in the field all talk about peace is a sham, unless the Germans are willing to accept a peace on conditions which concede their own defeat. The end of this war is in sight, but it is not at hand. The principles for which Europe fought and for which we are now to fight have been only partially vindicated. They have not been re-established. If this war is to have any harvest of gain to mankind measurably commensurate with its harvest of sorrow and suffering and destruction, it will be only through a complete German

German proposals for peace will be honest only when they contain that confession of defeat which concedes to the people of the rest of the world the right to live their lives without regard to German ambition or German purpose. German propasal for peace will be honest only when they admit on their face the complete failure of the German ambition to dominate the world and to shepherd the "inferior peoples under the iron rule of the Prussian drillmaster.

No American should be deceived by reign of paralysis of both individual any proposal of peace that comes from a German still engaged in the work of murder, rapine and ruin in Northern France and upon the high seas. It is a hopeful sign when Germany talks peace; but it is only a hopeful sign for those who are fighting her, and they will interpret it as a promise of victory and an incentive to fight harder.—Christian Work.

A Great Responsibility.

It is stated that the administration of the "selective draft" will be in the hands of local authorities. This does not mean that any discretion as to who will serve and who will not, will be vested in local bodies, but local people will be charged with the duty of carrying out the law, and giving force to the regulations which Congress will make.

This imposes a duty of much seriousness on the local officials, and cannot to cause serious questioning as to whether this tremendously important duty will be carried out honorably and patriotically or in a similar manner to that in which many of our public affairs are administered. Will favor and influence count when this high duty is to be performed? Will some be allowed to evade their duty beto bear upon those who administer the law or hold out favors to them?

It seems an awful thing to even raise these questions, but can they be have taken place both in our commumunity and many others. Can it be denied that many public officials have so low a sense of their duty that they are actually abettors and beneficiaries of those who are deliberately breaking laws which should be upheld by the men charged with the duty? If this is true, certainly it is not a long

step to a failure in the present case. Let every man who may have a part in the performance of this work, engage in it with a most profound sense of the responsibility which has been placed upon him, and with a full realization of the villainy of the slightest unfairness. He should regard as an atrocious insult the merest suggestion that the slightest favor should be shown anyone.-Annapolis

What Is Obedience?

If the average parent were asked what single principle he is seeking to inculcate in his child, I think he would answer obedience. Now, obedience I believe to be the highest law of God, but obedience to what? Not surely to the whims of the parent, but obedience to law, universal law-intelligent obedience. Arbitrary punishments alone are necessary to ensure a blind obedience to the parent. Children soon learn to dread the lash and like well-broken horses, they will slavishly obey the hand that guides. them. But, says the great Herbert Spenser, such children throughout life regard parental displeasure as the sole result of a forbidden action.

They gain an established association of ideas between such action and such displeasure as cause and effect, and consequently when they are grown, such displeasure has no longer power over them. Restraint to a forbidden action is in a great measure removed also. Until they have learned obedience to real law, the inevitable course of cause and effect, and have been severely disciplined by the world in acquiring this knowledge, they are apt to be extremely dangerous members of society. - Mary Breckinridge Thomson, in Southern This is particularly true in regard to Women's Magazine.

The Able-Bodied Beggar.

Superintendent Robinson's order to the police to gather in the professional beggars and send them to the House of Correction, where useful work awaits them, is a timely mandate and will rid the streets of many undesirable citizens who now subsist on the bread of idleness and revile as 'easy marks" those who gratify their importunities. The only course to take with the hardened chronic loafer is to turn a deaf ear to his whining protestations and his curses and insist that he shall pay in honest toil for what he gets.

It is certainly a social anomaly that we should coddle and reward some husky hobo who is laughing in his sleeve at his easy prey, while we instrictly to the stipulated wages. It would seem that the largest ought to go to the sober, the thrifty, the industrious, not to those who steal when they cannot beg and beg when they cannot steal. By promiscuous giving in the name of "philanthropy" society undermines its own structure, and only a mawkish sentimentalist who does not stop to think will object to a policy that enforces on men perfectly able to work for a living the ancient doctrine of the sweat of the

Road to Happiness

Be amiable, cheerful and good natured and you are much more likely to be happy. You will find this difficult, if not imossible, however, when you are constantly troubled with constipation. Take Chamberlain's Tab-lets and get rid of that and itwill be These tablets not only move the bowels, but improve the appetite and strengthen the digestion.

Railroad Passenger Service.

It is announced at Washington that railroad passenger train service will be generally curtailed during the war, so as to ship a surplus of locomotives and cars to the allies in Europe. Also it is desired to release locomotives for use in drawing freight trains as far as possible.

Salesmen and others whose business requires a constant succession of railroad journeys will feel the change a good deal. They will wind up their business in one town and find they have several hours of fruitless waiting before the next train comes along. But inconveniences of this kind must and will be cheerfuly borne for the sake of promoting national efficiency. If we are to make a good showing in this war, we must adjust ourselves to changes in our plans in a chousand

Pleasure travellers are fussy about their trains. Many such are run at a loss, and the cost is paid by the great mass of the public in freight rates. The public would hardly be satisfied with a cutting down of passenger trains for the purpose of saving money for the stockholders. But if some of the locomotives and train crews could be shifted over to the freight business so as to stop the congestion that has added to cost of living, the public would often be the

In thickly settled sections where there are many trains, many persons never bother to look at a time-table. They just go to the station thinking that a train will come along, and they are angry if they have to wait. Here is where the railroads make a mistake when they cut out their advertising of train schedules in the newspapers. If they constantly inform the public through the newspapers when their trains run, people can look up the schedule without going to the station for a time-table. Thickly settled districts, where train service is abundant could often get along with less trains, if these were thoroughly advertised, and a well advertised train service in any locality may make a scanty service tolerable.-Frederick News.

POTATO GROP MUST BE PROTECTED

SPRAYING FOR THE HARMFUL INSECTS AND DISEASES RECOMMENDED.

IS INEXPENSIVE INSURANCE

County Demonstration Agents Should Be Consulted In Preparing Mixtures.

College Park, May 24.—Since many Maryland farmers are responding to the call for more food by planting large fields of Irish potatoes, it is most important that protection against insects and diseases be insured. In instructions furnished to the members of the boys' agricultural clubs who are growing potatoes, S. B. Shaw, specialist in horticulture for the Maryland Agricultural Extension Service, urges them to protect their crops against disease and insect attack. He

"The careful selection of healthy seed potatoes will aid materially in the control of diseases, but spraying is necessary as a preventive measure. the control of Late Blight, which so seriously affects not only the plants, but also the tubers. Since this disease develops rapidly, under favorable weather conditions, it is advisable to begin spraying before it begins to appear. The lower leaves of the plants are first infected and from them the disease gradually spreads over the foliage until the tops are killed.

Preventing Late Blight. "A combination of copper sulphate (blue stone), stone lime and water, commonly called Bordeaux Mixture, can best be used in spraying potato plants for the prevention of disease. Use in the proportions of four pounds of copper sulphate, four pounds of lime and fifty gallons of water. To dissolve the copper sulphate, place the crystals in a cloth sack and suspend it in a wooden or earthen vessel filled with water. The crystals will not dissolve quickly if put in the bottom sist on holding the honest laborer of the vessel. Slake the lime and add enough water to equal the blue stone

solution "A convenient way to prepare Bordeaux Mixture in small quantities is to dissolve the four pounds of blue stone in five gallons of water. Slake the four pounds of lime and add an equal amount of water. When ready to apply the material take one gallon of the blue stone solution and one gallon of the lime solution and strain them together into a convenient vessel holding at least ten gallons. Add to this combination eight gallons of water, thus making ten gallons of spray solution. This amount should be enough for one-tenth of an acre.

Killing Potato Bugs.

"The Colorado potato beetle and the flea beetle are perhaps the most injurious insects affecting the potato crop. These beetles appear when the are quite small and unless proper means are taken for their control, they entirely destroy the foliage of the young, tender plants. Fortunately for the potato grower, both insects and disease may be controlled by a combination spray. This is made by adding Arsenate of Lead to the Bordeaux Mixture. Use this material at the rate of one and one-half pounds of Arsenate of Lead Powder or three pounds of Arsenate of Lead Paste to the fifty gallons of Bordeaux. This would be about five ounces of the powder or ten ounces of the paste to ten gallons of solution. On account of unusual war conditions it may be hard to secure copper sulphate at a reasonable price. Several Bordeaux Arsenate spray compounds are being manufactured by different firms under various trade names. These preparations can be used to good advantage in spraying potatoes. It is suggested that the County Demonstration Agents consulted in regard to securing and applying spray materials, not only for potatoes, but for other fruit and vegetable crops. They can give valuable information that may save money for the grower and be a means for securing larger yields."

OPPORTUNITY FOR BEEKEEPERS.

College Park, May 24.-In a letter to Maryland beekeepers, G. H. Cale, of the Maryland Agricultural Extension Service, calls attention to the importance of the production of honey in view of the threatened shortage of our sugar supply. Mr. Cale says:

'In spite of favorable factors, only a small fraction of the honey consumed in the State, even in normal times, is produced by Maryland beekeepers. In fact the condition of the beekeeping industry in the State, as a whole, is latent and capable of a great development.

"With a little advertising most of the honey produced can be easily sold on home markets, and there is consequently small need to sell the crop to wholesalers. The larger producers, however, by application to the to the Office of Markets of the United States Department of Agriculture may this year secure honey market reports to be issued in May, July, September and November, upon which they may rely for prices and markets.

"Here, then, is an opportunty for the beekeeper to do his bit for his country and at the same time increase his business in such a way as to make it of lasting benefit to himself.

HESSON'S

DEPARTMENT STORE

A Fine Assortment of Goods to meet the demands of the Spring Season.

E HAVE on display a very fine stock of goods, in every Department, to meet the demands of the season and feel sure you will be repaid if you call here for your Spring needs.

Dress Goods.

This Department is filled with choice lct of the seasons latest productions as Taffetta and Messaline Silk, Crepe-de-chines, Tub Silks, plain and striped Voiles, Chiffon Silks and Linens, etc.

Ladies' Waists.

We are showing a very nice lot of Ladies' Waists in Lawns, Silks, etc. made from good quality material and of good workmanship. Our prices range from 50c to \$4.00.

Ladies' Shoes for Spring.

We have a very pretty line of these

Rugs.

We have for your inspection a com-plete line of Rugs of very pretty de-signs in the Brussels, Crex, Fiber and Matting, sizes up to 8x10 and 9x12 ft.

Linoleum.

A very beautiful assortment of patterns of these in best quality 2 yd and 4 yd wide to select from. Our prices are right. Give us a call and let us estimate what it will cost to cover your recommend.

Men's Dress Shirts.

A complete line of Men's Dress Shirts in beautiful patterns, Coat Style, of Tub Silk, Madras, Percales to select

Ladies' Collars.

A very pretty assortment of these in We have a very pretty line of these the different designs made from Chif-in the late styles in White, Black and fon, Organdie, Voile, Crepe-de chine, trimmed with lace has just arrived.

Men's Suits.

Don't fail to visit our Clothing Department and get acquainted with the latest styles in Clothing.

We have just received another shipment of suits which makes our line about complete in all respects.

Store Closes at 6 p. m., Monday, Wednesday and Friday

Making the Farm Pay

POTATO CULTIVATION.

Same Land Should Not Be Used Oftener Than Once In Three Years.

Potatoes are commonly grown in this state on farms where hay crops, corn and root crops are produced in abundance, says J. G. Milward, Wisconsin College of Agriculture. As a rule, either dairying or some other form of the live stock industry is practiced on | # est in April, and did so last year, #

same land more frequently than one year in three, and in some cases one year in four is preferable. On the farm system mentioned this rotation is easily provided.

Under these systems of farming high grade feeds are supplied to the live stock, thus making valuable manure available for soil fertility. This source of fertility is one of the foundations for success in commercial potato growing.

Many successful growers on the better kinds of soil plow under the second crop of clover in the fall. In addition, an application of stable manure is made before plowing. With this plan the clover sod and stable manure partly decompose during the winter, and in the spring this sod can be thoroughly pulverized and fitted by the use of disks and harrows just previous to

On the light sandy soils of Wisconsin many growers prefer to postpone plowing and fitting the land until the approach of the potato planting season. In some cases a good growth of clover has started at this time, and to this stable manure is applied in a comparatively fresh condition. Intensive fitting is given the soil immediately before planting. Thorough ventilation and a good seed bed are essential to a better crop of potatoes.

Both of these methods have proved successful in Wisconsin, and the application of manure varies as to time in the same manner. In any event practical growers find that the intensive fitting of the land just before planting is more important than the sole ques tion of fall or spring plowing.

WINTER KILLED WHEAT.

Course For the Farmer to Pursue When Damage Is Extensive.

Reports from different sources indicate that there is some winter killing of winter wheat in many sections of Kentucky, Tennessee, Illinois, Indiana, Ohio, Missouri, Oklahoma, Kansas and Texas, although whether the extent of the damage is more than the average is uncertain.

Where there has been winter killing the question arises as to the best course for the farmer to pursue. The following procedure is recommended by the cereal specialists of the United States department of agriculture:

If the crop is not more than half killed it may be advisable to let it grow and depend upon natural stooling or tillering of the remaining plants to produce a crop. Even fields in which a majority of the plants have been killed may give a profitable yield. In other fields the stand may be so thin that it is not advisable to depend upon the few surviving plants for a crop, while in still other cases all the plants may be killed. The question is, then, whether or not to sow spring wheat either with or without plowing. If the farmer is in a locality where he knows spring wheat is sometimes grown and he can get good seed of an adapted variety it may be well for him to sow this. The seed can be sown sometimes in the winter wheat field without plowing, thus adding to the plants of winter wheat that remain. However, if the winter wheat is almost or entirely killed the land should be at least disked or perhaps plowed before seeding.

Seeding of spring wheat at all is recommended only for the northern part of the winter wheat belt. Therefore spring wheat should not be sown in Missouri, Kentucky, Tennessee, West Virginia or Maryland, or anywhere farther south, and probably not in any portion of Illinois, Indiana, Ohio or Pennsylvania. Other crops probably would be better in these states.

Where winter wheat is killed and spring wheat seeding is not advisable corn would usually be the crop to be planted, though soy beans, potatoes or such small grain crops as barley or oats may be given preference, depending on the locality and on the possibility of procuring good seed and the proportional return per acre that may be obtained by using these crops.

AGRICULTURAL NOTES.

One-half to one pound of acid phosphate to every sixteen square yards of soil in addition to manure is often advisable for the home garden.

Crop yields may be increased sufficiently by tile drainage in soils not naturally well drained to pay for the cost of tiling within a short time, according to the Ohio experiment station.

Potato seed is likely to rot before germinating because of cold wet soil if planted too early. Usually potatoes may be planted earliest on the lighter soils and at the lower elevations.

A common cause of poor results in vegetable gardening is too deep planting of the seeds. Germination will be much better in the spring when the plan of shallow planting is adopted.

痛痛液液液流流流流流流流流流流流流流流流流

SOWING CLOVER.

For the benefit of others I will # give my method of growing clover. I have no trouble getting it 12 started, but of late years it has % 雙 been so hot and dry after grain 幾 was cut that it would be killed # 獎 in that way, writes a corre- 墁 spondent of the Iowa Home- 12 stead.

When we are getting the seed 12 型 bed ready for small grain we 鬼 哭 prepare the ground well. Then 鬼 we sow the grain, and in the 12 爱 spring when the weather is 类 幾 warm enough so the clover will 类 12 not kill by freezing we sow the 12 雙 seed when the nights are dark- 點 獎 putting one bushel of clover seed 埃 Potatoes should not be raised on the 1 to about seven acres of ground. 1 to 塔 The weather being favorable, 塔 獎 the yield was good, and we cut 獎 獎 twenty-eight big loads of hay 獎 獎 from this ground and in the fall % thrashed two bushels of seed per # 煜 acre. We sowed the seed among 埃 度 rye last year, but I think wheat 獎 炒 or oats would be just as good.

PEACH SCAB CONTROL.

Disease May Be Overcome by Proper Treatment With Sprays. [Prepared by United States department of

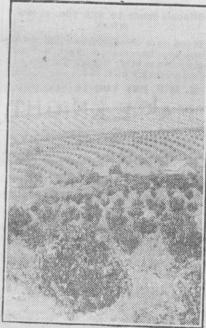

agriculture.] The peach scab, which at one time seriously menaced the commercial success of peach orchards east of the Rocky mountains, can be successfully controlled at a small cost by spraying.

The spraying for scab may be combined advantageously with treatment for other diseases, such as brown rot, and insect pests such as the plum curculio. If this plan is adopted the following spraying schedule is suggested: Early Varieties.—The early varieties, such as the Greensboro, Carman, Hiley and those with similar ripening peri-

ods, should be sprayed as follows: (1) With arsenate of lead and lime about ten days after the petals fall. (2) With arsenate of lead and self

boiled lime-sulphur or finely divided wettable sulphur about a month after the petals fall.

(3) With finely divided wettable sulphur or self boiled lime-sulphur three to four weeks before the fruit ripens,

A FAIRLY TYPICAL PEACH ORCHARD.

but not less than four weeks before harvest if self boiled lime-sulphur is used.

Late Varieties.-The Salway, Heath, Bilyeu and varieties with similar ripening periods should be treated as midseason varieties, with the addition of an application of the fungicide alone about a month after the second treat-

The following concentrations of spray preparations are recommended: Arse nate of lead paste, one and one-half pounds (powder, three-fourths pound) in fifty gallons; stone lime, two to three pounds in fifty gallons; self boiled lime-sulphur, eight pounds of lime and eight pounds of flour of sulphur in fifty gallons, and finely divided wettable sulphur, five pounds in fifty gallons in the case of the paste (approximately 50 per cent sulphur) used in the foregoing experiments.

Cost of Renovating Orchards. Figures from two state college demenstration orchards show costs of \$0.934 and \$1.635 per tree respectively for renovating old orchards. These figures represent not only the cost of one dormant spray for scale, but in addition three summer sprays which controlled insects and fungous diseases. They include also pruning and fertilizing-two items as important in neglected orchards as the entire spraying program. These figures will bear investigation by some who pay big sums to professional spray men for a single spraying.

Bordeaux For Potatoes.

The Geneva (N. Y.) experiment station has shown that bordeaux is an important spray for potatoes. The station authorities claim it prevents tip burn. prolongs the life of the plants and helps to increase the yield in dry seasons while in wet seasons the protection against late blight may result in marked

Yarding the Chicks.

Try keeping your youngsters in small flocks; they will do much better than if kept in large flocks. Also, do not attempt to keep chicks of different ages in the same coops, the needs of one are not the needs of the other. WILL PLANT CORN TO FILL SILOS

MARYLAND DAIRYMEN CONSIDER SILAGE MOST ECONOMICAL FEED.

MORE MILK

Farmers Are Urged To Plant More Corn and Build Silos.

College Park, May 17.-Members of the State Dairymen's Association are urging on Maryland consumers the fact that the wider use of dairy products will insure a healthier and cheaper fed people. In connection with this campaign for the greater consumption of dairy products they are also seeking in every way possible to keep down the cost of production. With feed at \$50 a ton they realize the great need for producing more silage and forage crops. The planting of larger acreages of corn for silage purposes is especially recommended. G. E. Wolcott, dairy specialist for the Maryland Agricultural Extension Service, states that any farmer keeping as many as ten cows should build a silo to enable him to feed his herd economically. At the present time it is most important that the farmer who has in mind the building of a silo, should plow and prepare additional land for corn so that he will have an ample supply for silage purposes. Any surplus that has to be harvested as field corn should bring ample returns at present prices.

According to Mr. Wolcott, 3 to 4 tons of silage can be profitably fed per cow a year. The yield of silage varies from 4 to 20 tons to the acre, land yielding 50 bushels per acre making about 10 tons to silage. Corn in the form of silage will produce more milk than the same amount shocked and dried. There is also considerable less waste in feeding silage than in feeding fodder. Where properly fed, silage is entirely consumed by the cow and aids as well in keeping the digestion in good shape. On account of the smaller cost of handling silage as compared to soiling crops, it can be used to advantage in supplementing pasture land as well as providing a succulent feed in winter. Using corn as silage makes it possible to clear the land much quicker than if the corn were cut and shocked, thus preparing the land for wheat or some other money crop early in the fall.

Corn grown for silage is usually drilled, which permits of closer planting. The ground should be harrowed as soon as the spring drying begins on winter plowed land or as soon as spring plowing is done to prevent loss of moisture. This harrowing will also prevent the forming of clods. The grower must use his own judgment as to how much further harrowing or rolling he should do, bearing in mind that his yield depends largely on having a firm, moist seed bed with one or two inches of loose soil to cover the seed and prevent further evaporation Cultivation must be frequent enough to maintain a dust mulch and keep the weeds out of the corn as they will injure the quality of silage if allowed to make any growth.

Farmers growing corn for silage should consult their County Demonstration Agent regarding the cost and type of silo suited to their conditions.

SOY BEANS A VALUABLE FEED.

College Park, May 17.-In view of the high prices of feed for cattle, Maryland farmers are becoming daily more anxious to find substitutes that can be grown on their own land. As a result County Demonstration Agents find demonstrations in growing alfalfa and soy beans very popular in counties where any quantity of live stock is being grown. Seed for trial fields or acres of soy beans can be obtained at cost from the Maryland Agricultural Extension Service through County Demonstration Agents as long as the supply reserved at the beginning of the war lasts. Soy beans have been thoroughly tested out at the State Experiment Station and in demonstration fields in nearly every county in the State. As result, Nickolas Schmitz, formerly of the Maryland Experiment Station, says:

"Soy beans are well adapted to Maryland, and, like corn, thrive best on rich loam soils. It is, however, on soils too poor to grow corn profitably that soy beans will bring the greatest net profit. On such soils, when inoculated and fertilized with a little inexpensive fertilizer, they will produce nearly as much forage and seed as when grown on rich land. They will not grow as well as cow peas on poor, sandy soils, but far better than cow peas on stiff, clay soils. They will low, stand poor drainage better than either cow peas or corn.

days, making it possible to select varieties to fit any length of growing season found in Maryland.

Time To Plant.

"Soy beans may be planted from any time after corn planting is finished until July 15th, depending upon variety, location, and for the purpose planted. For hay and seed it is best to plant the fore part of June, to insure good curing weather for the hay and time for late varieties to mature seed before frost. For fall hog pasture, and for turning down as a green manure, they may be planted up until July 15th if an early variety is used.

PUNNING COMPLIMENTS.

Witty Tributes to a Pair of Famous English Belles.

A recent writer, recalling famous compliments to famous beauties, included two punning tributes to distinguished British belles. It was Sheridan who, when the charming Miss Payne inquired solicitously concerning his health, replied with the gallant couplet:

'Tis true I am ill, but I cannot complain, For he never knew pleasure who never knew Payne!

The author of the other verse is unknown, but it was addressed to Miss Isabella Poyntz, a lady so beautiful and popular that it was a standing joke in her family to inquire when the mail was delivered, "Where is Isabella's proposal?" If Isabella repudiated the receipt of any such interesting missive her brothers feigned the greatest astonishment; if, as frequently happened, she maintained a blushing silence they did not miss the opportunity for teasing.

She finally married the Earl of Exeter. It was a brilliant match for her and, in the social sense, a suitable one for him, but since he was the son of the artist earl who married a village girl it is probable the suitability he had in mind was of a better kind. His romantic father, who went a-wooing incognito, and his lovely mother, Sarah Hoggins, whose unpoetic name Tennyson was careful not to mention when he celebrated their courtship in his ballad "The Lord of Burleigh," must surely have transmitted to their heir their own unworldly tempera-

Miss Poyntz, an exquisite blond, was still young, fair and flower-like when she accepted the earl, but she had already rejected so many eligible suitors that some society versifier put a punning complaint into the mouth of Cupid himself:

Men arm against my shafts in vain That pierce all armor's joints, But Isabel with gay disdain Outdares them, Poyntz for points!

-Youth's Companion.

Two Mistakes.

He who imagines he can do without the world deceives himself much, but he who fancies the world cannot do without him is still more mistaken.-Rochefoucauld.

Not What It Seemed.

In the county of Somerset, England, there is a village called Hatch. The clergyman in an adjoining parish was named Duck. One Sunday morning, the congregation at the latter place being assembled, the curate did not appear. The clerk rose and said:

"I hereby give notice that there will be no service today, as Mr. Duck has gone to Hatch."

From the Inside Out. There is a restaurant in New York

that employs none but Irish waiters. A captain of waiters there rejoices in the name of Peter.

One night he was wrestling with the refractory stopper of a bottle of cham-"Say, Peter," stated a patron, "I

don't believe you can get that cork Peter raised a red and perspiring

"Mister Blank," he stated between gasps, "I'll get the infernal thing out if I have to shove it in!"-Saturday Evening Post.

His Disguise.

"I was preparing to shave a chap the other afternoon," said the head barber in one of the tonsorial parlors of a fashionable New York hotel. "I had trimmed his hair, and from such talk

"LATHER TO THE EYES."

as I had with him I judged him to be an easy going, unexcitable sort of fel-

"But suddenly his whole manner changed. Out of the corner of his eye "Soy beans mature in from 70 to 150 he had seen a man enter whose appearance upset him.

"Hurry, George!" he muttered to me. 'Lather to the eyes-quick! Here comes my tailor!" "-Everybody's Magazine.

Experienced.

They had been spooning a bit, and when she raised her face from his shoulder and they both observed the white streak on his coat he patted her affectionately and said:

"Never mind, dearie; it will all brush

At this the young thing began to sob. "Oh, Harry," she exclaimed, hiding her bead again on his shoulder, "how do you know?"-Everybody's.

feast, on Saturday and Sunday. Mrs. Milton Haley, of Hagrstown, and Mrs. Margaret Englar, of New Windsor, were guests of Mrs. Clara Englar, Friday night.

Best Remedy for Whooping Cough. "Last winter when my little boy had the whooping cough I gave him Chamberlain's Congh Remedy," writes Mrs. J. B. Roberts, East St. Louis, Ill. "It kept his cough loose and relieved him of those dreadful coughing spells. It is the only cough medicine I keep in the house because I have the most confidence

LITTLESTOWN.

At the request of the Board of Health, the Burgess and Council, the people are asked to clean up and gather together all rubbish and, where possible, place same in boxes or barrel or bags, in the alleys at the rear of the lots, on or before Friday, May 18th, when teams will be provided to remove the same. Where there is no alley at the rear, the persons living on the premises are asked to place the rubbish in neat piles along the streets. This the gutters on the streets. This should be done not later than noon of Saturday, 19th.

Saturday, 19th.

Master Fred. Staley fell and broke
his leg, Monday evening.

Stanley Zecher, of the Phila. College of Pharmacy, spent the weekend with his parents, Mr. Mrs. Chas.

Mr. and Mrs. Homer Hill and

daughter, Kathryn, and Janet Shoe-maker, of Gettysburg, spent Sunday with the former's sister, Mrs. Margaret Hilterbrick. Rev. Milton Whitmer and Elmer

Buckey, are attending the General Synod of the Reformed Church, at Dayton, Ohio. Mr. Buckey is the lay delegate from Gettysburg Classis. Mrs. Samuel Rebert attended a play given by the Third Year Dra-matic Society of Hood College, on Monday evening. Miss Lydia Rebert was the heroine.

Mrs. Chas. Nau and son, Edwin,returned home, after spending a week with relatives in Camp Hill.

Proper Food for Weak Stomachs. The proper food for one man may be all wrong for another. Every one should adopt a diet suited to his age and occupation. Those who have weak stomachs need to be especially careful and should eat slowly and masticate their food thoroughly. It is also important that they keep their bowels regular. When they become constipated or when they feel dull and stupid after eating, they should take Chamberlain's Tablets to strengthen the stomach and move the bowels. They are easy to take and pleasant in effect.

DETOUR.

Milton Troxell, wife and child, of Westminster, visited John Bruser and

wife, over Sunday. Edith Miller, of Union Bridge, visited at Thomas Hahn's, on Sunday. E. O. Weant, wife and daughter, Mabel, of Westminster, and M. A. Koons and wife, of Taneytown, visited Mrs. Hannah Weant and daughter. on Sunday.

Mrs. H. H. Boyer, who has been ill, seems slowly improving.
Jacob Myerly, wife and children, visited Russell Dorsey and wife, of

Motter's, Sunday. i C. A. Six, Guy Warner and daugh ter, and Mrs. James Warner, visited in Waynesboro, Saturday.

Mrs. George W. Byers, Tuesday even-Earle Rollar has gone to a Baltimore hospital to have his tonsils and

adnoids removed. Little Grover Fogle, who was taken to a hospital in Baltimore several weeks ago to have a deformed foot treated, was brought home, Tuesday, with bright prospects that the treat-

ment has been successful.

Patrick O'Connell, Superintendant at the Tidewater Co's quarries, has resigned and left, Wednesday morn-

ing, for his home in Chicago Work which was begun on Main St. last Fall, with the object of straightening the west sideof the street, has been continued this Spring. A lot of old trees that obstructed the work Then a were entirely removed. Then a straight curb and gutter was completed to where work was suspended in the Fall. In doing this, several stairways were removed, and will be placed further back. An even grade has also been given to the pavements on that side, which will improve the walking. On the east side of the street, concrete pavements have been laid in front of Mrs. Walden's and Dr. Legg's properties, and a concrete gutter infront of all except twoproperties. The cost of making these im provements wil be considerable, but the improved appearance of the street and the added safety to travel in the removal of obstructions, will fully

justify the expenditure. Bad Cough? Feverish? Grippy? You need Dr. King's New Discovery to stop that cold, the soothing balsam ingredients heal the irritated membranes, soothe the sore throat, the antiseptic qualities kill the germ and your cold is quickly relieved. Dr. King's New Discovery has for 48 years been the standard remedy for coughs and colds in thousands of homes. Get a bottle today and have

Potatoes For Victory.

"Raise Potatoes and Help to Win the War," is the title of a booklet which the Pennsylvania Railroad has had printed and is about to distribute farmers and residents in towns and suburbs along its lines. The book is a condensation of a Special Bulletin upon potato culture, issued by the Department of Agriculture of the Commonwealth of Pennsylvania, and sets forth the most approved method followed by scientists and practical growers in successfully producing

this crop. The purpose of issuing the booklet is explained in an introduction, which

says, in part: "One of the most important military duties that will rest upon the people of the United States, in the conduct of the war, will be to produce a surplus of food. We must have enough not only to meet our own proper needs at home, but also to aid in feeding the armies and the civil populations of the countries Europe with whom we have cast our

"Potatoes are eaten universally. They are healthful, sustaining and satisfying, and they have the very great advantage that, if proper methods of cultivating are followed, enormous yields are obtainable from a given area of ground. From 300 to 500 bushels can be raised from a single acre by care and skill.

"Potatoes are, therefore, particularly adapted to meeting the emergency created by the scarcity of food

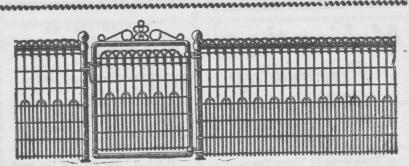

resultant upon the war.
"All Americans who can, should raise potatoes this summer. Every potato produced before next Fall will be more effective, in the cause of the United States and the Allies than a

FOR WORKERS WITH NEEDLE

Most Effective Way of Attaching Lace to Edge of Centerplece-Use for Old Yokes and Sleeves.

To attach lace to the edge of a centerpiece, roll lace very closely, keeping edge to be sewed on very even. Have a pan of boiling water ready, and dip edge to be sewed on in this water two or three times, being careful not to Squeeze the water out as dry as possible, then lay away to dry in the roll for a while.

Carefully unroll it on the top of a flat surface letting it unroll in a circle, and then let it dry thoroughly. Be careful not to stretch the edge to be whipped on, and you will find the lace will have a circular edge. Whip on flat without having to pull or gather it.

Cut the yokes and sleeves from old nightgowns and make bodies into protectors for your suits and dresses by sewing the tops together, leaving a small hole for the coat-hanger hook. Cotton dress skirts could be used in the same way.

When the little cloth center or inner side of buttons has either pulled out, or worn, make a network by criss-crossing your threads, in inner part where cloth was to make said part-solid; from here then catch threads out to edge of button.

Doll's House.

Mothers who have little girls might profit by this recommendation: Buy a large box from your grocer, put legs under it and nail three shelves inside. Use the first shelf as a kitchen, the second as a dining room and the third as a bedroom. Then furnish the little rooms after a visit to the 5 and 10 cent store. The doll's house can be kept out of the way in a corner of a

BRITISH EXPERT LAUDS RAILROADS OF UNITED STATES

They Lead World.

NO GOVERNMENT OWNERSHIP

It Would Mean Political Control and Loss of Efficiency-Declares That Crisis Confronts Country on Account of Transportation Situation-Lowest Freight Rates to Be Found In United

Washington, May 14.-That the United States is face to face with a serious crisis in its commercial affairs, due to the conditions by which its transportation system is confronted, was the opinion expressed by W. M. Acworth, England's leading authority on railways, before the Newlands joint committee on interstate commerce at a special session held here to enable the committee to hear his views before his departure for London this week. Two steps are necessary, according to Mr. Aeworth, to avert this crisis and to solve the threatening railroad problem confronting the country.

The first is to allow the railroads to charge freight rates sufficient to meet the great advance in operating expenses which is taking place and to are threaded upon a piece of silk cord enable them to command the credit and attached to the back of the book. necessary to provide the extensions and improvements needed to meet the growing demands of business. The second is to do away with the multiple and conflicting systems of regulation that now hamper railway operation and to provide one centralized regulatory agency with such local subdivisions as may be necessary.

Higher Rates a Public Necessity.

Mr. Acworth's views on the transportation situation in the United States were expressed in answer to questions by members of the committee, who asked him to apply his knowledge of railway conditions throughout the world and of the experience of other countries with government ownership to the present problem before the United States.

"The fundamentaal factor in the situation is very simple," said Mr. Acworth. "It lies in the fact that you cannot get three-quarters of a cent's worth of work done for less than threequarters of a cent, no matter whether the agency performing it is a government or private enterprise. Freight rates must advance when the cost of performing the service advances as it is doing at present, just as the price of bread or meat or any other commodity increases with increased cost of production."

In answer to a question Mr. Acworth said that he thought American freight rates had been at much too low a level for several years past, that they had reached this low point during the period of cutthroat competition among the roads and had since been held there by regulating bodies. Unless re lief were afforded to the carriers very promptly, he said, the result would be a tremendous loss to the people of the whole country through insufficiency of transportation facilities.

Weakness of Government Ownership. On the subject of government owner ship of railways Mr. Acworth said:

"It is impossible to obtain satisfac tory results on government railways in a democratic state unless the man agement is cut loose from direct polit ical control. Neither Australia nor any other country with a democratic constitution—perhaps an exception ought to be made of Switzerland-has succeeded in maintaining a permanent severance. In France, in Belgium, in Italy, parliamentary interference never has been abandoned for a moment. The facts show that government interference has meant running the rail ways not for the benefit of the people at large, but to satisfy local and sectional and even personal interests.

Prussia, Mr. Acworth said, was the best example of an efficient government railway system, and he pointed out that military considerations were treated as of paramount importance in the Prussian railway system. While American freight rates had been reduced nearly 40 per cent in thirty years, rates in Prussia were nearly as high as at the beginning of the period While the charge for moving a ton of freight one mile in the United States was a trifle over three-quarters of a cent, the rate in Prussia was 1.41

As illustrating the difference in rates between government and private roads Mr. Acworth compared the railways of New South Wales, Australia, with those of Texas. While the amount of traffic to each mile of line was about the same in both cases, he pointed out. the Texas railways performed for the public four times as much service as the government owned roads of New South Wales. The charge in Texas for hauling a ton of freight one mile was less than 1 cent, while in the Aus tralian state it was well over 2 cents.

"American railways lead the world," said Mr. Acworth. "Nowadays when men in any other part of the world want to know how to run a railway they come to the United States and study your railways here. The Amer ican railways are entirely the result of private enterprise, and I think they go a long way toward proving the case against government ownership."

HERE IS A USEFUL ARTICLE

Needlework, Pincushion and Cotton Holder Is Easily Made and Very Convenient.

Our sketch shows a useful little article for suspending from the post of a looking-glass or from a nail in the wall, in the shape of a combined Tells Congress Committee That needlebook, pincushion and cotton-holder. It is made of pale blue quilted needlebook, pincushion and cottonsatin and lined with soft white silk and edged with a cord of a fancy pat-

The small sketch on the right of the illustration shows the way in which the interior is arranged and it is fit-

ted with four leaves of flannel, cut into points at the edges for the needles. Pins of various kinds can be inserted in the cover and three reels of cotton

For hanging the whole thing up, a loop of cord with three little loops at the top is sewn on on either side of the back of the book.

FORGET IDEA OF BUSINESS

Principal Fault With Young Women Who Have Determined to Enter Into Commercial Life.

"I think that the best advice any young woman can get when she goes into business life is contained in three words, 'Do it now,'" said the woman manager of an interior decorating establishment. "I have more trouble in my business over that one sin of procrastination than all the rest put together. It's incredible the amount of 'follow up' I have to do, and it takes time that I ought to give to important

"For instance: One young woman here who has taste and a sound training in the principles of decoration, could be invaluable to me. I would give her a position that any girl could be proud of, except for the fact that I cannot depend on her.

"She had some special velvet hangings to make up last week. They were to be trimmed in one place. It was her job to get this, to have the velvet ready for the worker, properly measured, to make a visit to the house where the hangings were to be put up and to get the final word from the owner as to which of three different linings was to be used.

"She should have done all these things in one morning. Well, it took her four days and then she hadn't seen the owner about the linings, and the work had to be stopped. While the worker's time had to be paid for, she wasn't up there. She hadn't learned the simple little rule that you cannot put tomorrow in the place of today with success. I shall have to ask her

One procrastinating, behind-the-hour employee can play havoc with an office or a business. Things are so closely fitted together, one bit of work depending for its accomplishment on the fact that another bit has been done promptly, and the lagger and the time waster will not long be tolerated in an up-todate concern. Not tomorrow, but today, is the rule of the successful.

SKIRT AND GAITERS IN ONE

Designer for French Dressmaker Springs Original Sensation in New Model.

Erte, who was the designer for Paul Poiret, has invented a skirt and high gaiters cut in one piece. The manufacturers are trying to introduce this model. Poiret himself could not have designed a more original sensation. The idea was suggested to Erte by the strong return of the mannish costumes of 1830, which the staging of Langdon Mitchell's new play, "Major Pendennis," with John Drew in the title role, has brought so brilliantly before New York audiences. These have been copied for women, with a narrow skirt substituted for the trousers which spread over the instep and have a strap underneath.

It may be that this new skirt by Erte will be adopted by the smart set for riding. It is not at all probable that it will be adopted for walking, but it is highly suggestive of a strong, new influence that is at work in fash-

Women have not advanced far enough to wear the peg-top trousers of 1830, but the insistence upon the skirt that is slightly full from waist to knees and tight from there to ankles, surely found its source in the men's fashions of the early nineteenth century.

To Keep Mittens On.

Measure off pieces of hat rubber, or the first size rubber elastic, to fit the little wrists (not tight) and sew to laside of wrists of mittens.

RUSH THE SEASONS

Women Are Turning the Calendar Upside Down.

Straw Hats in the First Month of the Year One of the Idiosyncrasies That No Preaching Will Touch.

Much of the preaching that is hurled against women today in the matter of choosing clothes is their erverse habit of turning the calendar upside down. This was consider ered rather abusing when it began about a dozen years ago. Straw hata in February were rarely worn at that time, but the individuals asked for them and the milliners heeded the request. After a few experiments, what had been a caprice, a fantastic conception of clothes, turned into a practice aided and furthered by commerce for its own dark reasons.

If one is going south from any point of the compass on this planet, whether it means Italy, Egypt, Panama or Florida, there is every reason to want a straw hat in January, and it is to beguile the people who are running away from the snow into spending their pennies on new hats that the windows blossom out with straw hats on the day after the new calendars are hung on the wall.

All of this is sane behavior; but when the women who remained in the snow took it into their heads to adopt the head covering of June, and the milliners, seeing in this caprice a chance to make hundreds of dollars in a dull month, imported from Paris every manner of hot-weather hat, then the whole world suddenly took it into its head that this was the right thing

Actually, there is no sense whatever in rushing the season like this, by the time May arrives, with its sunshine in climates that are given over to cold winters, there is nothing left that is new or enticing in the way of hats, and one has the consciousness of exploiting straw and roses during the days when every change in the skies meant weather that made such a hat ridiculous.

But-preachings are of no avail. If women want straw hats in the first month of the new year, they're going to have them, and if they feel that they would rather wear summer hats for nine months in . the year, though they are the most perishable form of headgear, nothing will stop them from doing it. Theirs is the will and theirs is the purse, and they find hundreds of merchants who will encourage them in this caprice to the extent of bank-

DRESS FOR GIRL OF TEN

Brown shantung always looks nice for little girls' dresses. The model we show here is made in it.

The full skirt is joined to bodice under a straight band which is lightly embroidered in front with green and blue silk. The square yoke, cuffs and top of pocket are embroidered to match; buttons further trim yoke and band; fastening is at back.

Material required: Three and onehalf yards 34 inches wide.

A Useful Bag of Strings.

A bag of pretty, sturdy cretonne divided inside into four generous sized pockets. Four balls of different kinds of string, commencing with the thin but strong and growing heavier and stronger ball by ball until the fourth is a near-cable. Four eyelets in the bottom of the bag-one from each pocket and each eyelet duly buttonholed-to let the strings pull through more easily. And a small pair of strong scissors fastened on "for keeps" to the side of the bag. You don't know the helpfulness of such a bag unless you have owned one.

Darning Underwear.

Never darn fine woolen underwear with wool. It will shrink and pull out a hole larger than the original. A loosely twisted knitting silk is excellent for the purpose. When washed the darn will have almost the same thickness as the knitted goods.

STORY OF A GHOST

The Scene Is Laid In Germany During the Pan-European War

By PAULINE D. EDWARDS

The German people are supposed to be phlegmatic. On the contrary, they are very emotional.

The Germans are especially fond of what is mystical. Young persons of all climes are given that way, but Germany is the home of secret societies composed not only of young men, but of those who are older.

Heinrich Borngesser and Carl Freiberg were regular students at the University of Heidelberg. Borngesser was a merry chap, always ready for a joke, while Freiberg was of a serious cast. Borngesser was a member of a corps whose business it was to practice on one another with the short sword. Freiberg was a member of the society for psychical research, whose object it was to discover some tangible link between the material and the spiritual world.

The students of the university frequented a wine and beer house presided over by a man named Becker. His daughter Bertha, a girl of seventeen, was accustomed to wait on those who gathered there. She was a Madonnalike creature, with large, serious eyes, and there was a reserve about her that prevented those she served from the usual jollying that young men are apt to give a waitress. The only person who ever tried it was Borngesser, and he called to her face a look so pained, so entirely out of keeping with his banter, that he never tried it again.

Freiberg occasionally went to Beck er's place for his beer. It was soon noticed that he was the only man who frequented the place with whom Bertha would converse. What the secret of this willingness was no one could tell. All were equally respectful to her, but if after she had set down their wine or beer they tried to detain her by a bit of chat she would invariably bring it to a halt and leave them. In time she received a nickname from the students. It was Lady Purity.

Neither Borngesser nor Freiberg was of the nobility, but Borngesser aspired to be an officer in the army. Both young men served their term in the military service, but Borngesser was doomed to disappointment in se curing a commission. The officers were appointed from the ruling class.

About the time these two young men were leaving the university the pan-European war broke out. Borngesser's attempt to rally Bertha Becker had affected her so much that it sank into her heart. It was as if he had broken a fragile vase. There was no anger in her manner toward him. It was simply that she had been hurt. him. He was ignorant of what this irritation meant, but it was plain to others that it was the awakening of a now that a test was put on his credupassion for the girl. When he was lity Carl doubted. hurrying away to the war he found time to stop at the wine house to say said goodby to a stone.

But when Freiberg bade her goodby it was very different. There were few words spoken between them. Indeed, Bertha spoke not at all. Carl simply said goodby, with a pressure of the hand, while she said goodby with her whole soul through her eyes, and when he hurried away to the rendezvous she followed him with those same eyes while he was in sight.

Borngesser and Freiberg were in different regiments, but hard fighting commenced at once between the Germans and the Belgians, and the corps to which they belonged, being deci mated, were joined in one, and thus the two young men were thrown to gether. Borngesser seemed to know that Freiberg had obtained a success with Bertha Becker, which was denied to himself. Nevertheless he maintained the same friendly treatment of Carl that he had borne toward him at the university. Heinrich had often rallied Carl upon his predilection for "ghosts," as he called it and on one occasion changing from banter to a serious mein, had said:

"Carl, suppose we make an agree ment."

"What agreement?"

"One which will satisfy either you or me of your belief in a hereafter and its connection with mortals still on earth. I propose that whichever dies first shall appear to the other."

"I have no objection to that," replied

"Very well. It is understood and agreed that if I, Heinrich Borngesser. die before you I will in some way make you sensible of my existence."

"And I will do the same by you." When the two men were in Belgium Heinrich reminded Carl of their agreement and added: "This fighting is getting thicker every day. I have a feeling in me that I'm going to be downed, and that before long. So you may expect to see me, my boy, for I shall certainly keep my pledge if I pass into another existence and an able to excite the senses of a mortal. My own theory is that I cannot; that you have no sense that will enable you

to be cognizant of me, a spirit." "That is what we men of psychical research are endeavoring to deter

mine," replied Carl. Immediately after this dialogue there began that sacrifice of life, the like of berg as a tutor.

which was never seen before in war. Trains loaded with wounded began to leave the front for Paris and for Berlin, while thousands of dead bodies were thrown into trenches or buried separately as those attending to the dead and wounded found time. Heinrich Borngesser was reported among the missing, which meant that he had been either killed or taken prisoner. But the Germans were at that time driving the French back on Paris and were themselves losing few, if any, prisoners. It was they who were taking prisoners. Borngesser's friends therefore gave him up for dead.

Carl Freiberg was badly wounded, and with many hundreds of others was sent eastward. His home was at a little town near Heidelberg, and after a few months in hospital he received permission to go home till he was ready to return to the front. After regaining his strength he concluded to go over to Heidelberg and enjoy a glass of wine served by Bertha Becker. He found few persons in the place, and, as for Bertha, she was working in an ammunition factory.

But Bertha came home at night, and a few days later Carl went to Heidelberg again. Bertha had returned and, seeing the soldier limping up the walk, ran out to meet him. There had been no lovemaking between the two, but now, meeting after all that had happened, what was in both drew them together. They flew to each other's

It was now autumn, and the summer was dying by gasps, as it usually does. There would come a cool snap-a winter skirmish line-followed by a return of warm weather, then another colder period, which would after a few days give ground before another warm invasion. Carl and Bertha, when the evening was not too cold, would sit out on a bench in the Beckers' private garden, as lovers have sat on garden benches from time immemorial, locked in each other's arms.

The time was approaching when Carl would have to go back to the front. His first departure had not troubled him, for he had not then been aware of his love for Bertha; but now a return to that which was almost certain death or maining was awful. He was not thinking of his own sacrifice, but of Bertha's. Whenever he spoke to her of re-entering those dreadful scenes she would cling to him as if he were about to be dragged away to execu-

One night they were sitting in the garden together when they received a shock. The darkness was relieved by a moon nearly full shining out of a clear sky. The lovers were sitting in a bower open only to the front. Suddenly a figure appeared at this opening. "Heavens!" exclaimed Bertha. "It is

Heinrich Borngesser!" There was just enough light of the moon shining full upon the figure to show the features. The face was deadly pale, there was a horrible red gash in the cheek and a bandage across

Carl was visibly affected. Was this really the man who had promised if it were possible to prove to him that the dead may communicate with the living and had now come back to keep his agreement? One would suppose that a Strange as it may appear, it irritated mind leaning toward a belief in ghosts would accept the figure as the spiritual body of his returned comrade. But

The ghost stood for a moment facing the couple, then resumed its pace goodby to her. He might as well have across the opening. As it passed out of sight something fluttered from it to the ground. Carl ran to it and picked it up. Holding it in the moonlight, he

read with difficulty: "I forbid the banns."

Bertha was near a state of collapse. Carl turned to her and, taking her in his arms, endeavored to reassure her. "What is on the paper?" she asked

faintly.

"Nothing of moment," replied Carl. But she insisted, and he was obliged to tell her. She sank back on the bench and covered her face with her hands.

"We must part," she moaned. "Not by this command."

"He has come back from the other that we should live for each other."

"Sweetheart," said Carl, "there is something wrong here. If he had really come back from the dead I would have felt the presence of a spirit. On purples that are almost on blue and the contrary, I felt the spirit of a living man."

"How do you explain his coming? Did he not perish on the battle field?" no long-disguised secrets on the part ported among the missing. I believe in its original form is abandoned, but that he was made a prisoner and es- there is an undoubted suggestion from caped. I am sure it was he in the the Muscovite turban in the new hat

Time proved that Carl was right, was explained. Borngesser had been his captors, had hidden in a wood and burrowed into the ground. After many efforts to return to his own lines, from which he had been driven, he had been worn a bit threadbare in some finally succeeded. He had sought of the cheaper hats, but its original Bertha and found Carl in possession. Taking advantage of this agreement. he had yielded to a temptation to sep-

arate Carl from her. Borngesser returned to the front, and neither Carl nor Bertha ever saw him again, for he was killed in one of the attacks the Germans made to possess themselves of Calais. But before this fatal ending he wrote Carl, confessing the deception.

Before Carl went back to the front he married Bertha. His experience with a spurious ghost turned him from his disposition to dwell upon the marvelous. Carl was so badly wounded as to unfit him for active service, so he was discharged. Then he married Bertha and settled down in Heide!-

SATIN IS USED IN WINTER HATS

More Seasonableness in Headgear Is Shown This Season Than Last.

EVENING HAT WITH LOW GOWN

New Ones Are Made of Cloth of Silver and Gold Metallic Net and Lace, the Brims Transparent-Russian Headgear Reversed.

The fact that the milliners have taken up satin for several shapes in the new millinery will contribute toward more seasonableness of headgear this winter than last. No one objects to satin, especially if it is in black or in a dark color, as a relief and offset to the black velvet hats that have been worn so unremittingly that one began to think that the milliners had lost all power of originality in choosing fabrics.

There have been several seasons in which black velvet dominated, but there has never been anything to equal the last six months. At any forgathering of women, the black velvet hat was as seemingly necessary to the costume as the steel helmet to the soldier. Shapes differed, ornamentation varied, but the hat was black velvet, and on this fabric were rung the slight changes that the milliners invented.

Women do not tire of black velvet hats any more than they tire of blue serge suits and frocks. They are the bread and water of fashions. The only time that the velvet hat grows wearisome in the eyes of the average woman is when the first snows fall and the fashionables turn their atten-

tion to the pines. Then the average oman wants to discard velvet and get anything she can as a substitute; and today, satin is wisely offered as a up the brim, she can frankly line a compromise between winter and summer millinery.

There are also satin hats in all the shades that nature gives to a dahlia, | ing and effective than if the harshness for America, as well as France, has decided that these purplish tones are excessively good-looking and is reworld to warn us. It is not God's will peating them throughout costumery with excellent effect.

The brilliant purple that was advohas been coldly greeted, but the deep black are found to agree with every

kind of gown and coat worn. The shapes of the new hats reveal "I don't believe he did. He was re- of the millinery. The Russian turban that is a reversal of the old-meaning that the high point of the brim in but months passed before the matter | front is now turned to the back, and instead of the ornament being placed taken prisoner, but had got away from against this part of the brim, it is kept in front.

Russian Style Passe.

The national Russian headdress has glory is retained by the brides who are arranging these crowns with the point in front, as a setting for the tulle

There is another influence at work among some of the milliners, which suggests the field hats worn by the European armies in the early part of the nineteenth century. These turbans are of satin, with the brim turned so high that the crown vanishes, and elongated at the sides and flattened at the back. One of the best of these French shapes is made of black satin, the top of the extra high, upturned brim edged with a

fringe of aigrettes. The main points to remember in adband in all turbans, the even line camisole.

which is carried out around the head, the elimination of more than one ornament and the tendency to hold to Slavic ornamentation instead of any

Chinese mandarin turban which has come into first fashion along with the Chinese fabrics and ornaments imported to this country to fill the place of the European importations, is strangely in keeping with some of the Russian shapes, and even the colors of the Chinese ornament which hangs from the button at the top, closely resemble those used by the Slavs. Well, there were days in the formation of the races on this planet when the Mongolian and the Russian were closely mingled. Genghis Khan left many Mongolian traces in that vast bit of territory known as Russia, and it may be that the hat was one.

The Transparent Brim. Since the advent of the evening hat as an adjunct to the low gown when one is dining in restaurants, there has come into the fashions an entirely new kind of millinery. These new things are afternoon hats de luxe. All that the milliners wanted a woman to wear in the afternoon, and against which she rebelled for many reasons, she is happy to wear at night. It has given her a good opportunity to exploit the wide brim, which motoring, dancing and skating have put somewhat in the background.

These brims are transparent. Cartoonists used to draw amusing pictures of women using brims of hats as a substitute for veils, and the idea was considered capricious and attractive; and, suddenly, it is taken seriously. Metallic net and bullion lace are used for these wide brims, and the hat is tilted so far forward over the eyebrows that it is an easy matter to look upward through the fabric. The fashion has also led to women doing up their eyes a bit in the Oriental manner, so as to make them more significant and expressive under the half-concealing metal tissue.

The crowns of these large evening hats are made of crystals, of closely crushed roses and of heavy metal embroidery on tulle or satin, but there are no feathers. The much-vaunted ostrich feather, which was taken up by the best of the French designers in September, did not gain a place in the affections of the public, and the musketeer hat that Talbot revived, with its sweeping plumes and its likeness to those worn by the women of the eighteeenth century in England, was taken up only by the individual who wanted something different from

her neighbor. It may be safely said that in choosing an evening hat or one for the afternoon, if you have the social opportunity to exploit so ornamental an article, it is wise to just look into the metallic fabrics and go no further. The straight sailor of cloth of silver or gold is not used for the evening, but is kept for the street, strangely enough, and is sometimes worn with severe black velvet gowns in the aft-

Makes Alluring Picture.

It is at its very best in the latter setting. The woman who can wear a simply cut, medieval freck of black chiffon velvet, with its slightly open neck, absence of collar and fullsleeves caught in with an embroidered band at the wrist, and a straight Reboux sailor of oxidized cloth of silver, is sure of turning herself into an alluring picture.

It is not within the power of every woman to look well in a metallic hat. If she will be fashionable at the cost of her appearance, let her take her courage in both hands and defy opinion; but if she will compromise with fashion and her appearance and will see to it that flesh pink tulle is laid somewhere in the intricacies of the metallic lace or embroidery that makes wide, transparent brim with a double thickness or plaiting of flesh pink tulle. This will make a hat more strikof its metallic threads is left untouched by a softening veil.

Probably the best of these models is one that has a crown entirely of faint blush roses mounted on gold net which is pulled in and out of the flowmade of fine gold lace mounted on flesh pink tulle. Across the back of the brim there is a wide, eighteenth-

century bow of blush pink velvet. All of these evening hats are worn with low gowns more often than with half-high ones, but so far they have not been adopted at the theater, for few women are willing to go back to the inconvenient days of holding a large hat on their laps, or, failing in the attempt to hold it, spend most of their time frantically grabbing it to keep it from slipping, or picking it up from under the heels of the man who goes out between the acts.

(Copyright, 1917, by the McClure Newspaper Syndicate.)

A Sofa Pillow for Nothing. Make a bag of scrim or unbleached cotton the size you wish the pillow to be and hang it in a convenient closet. Put into the bag from time to time every scrap of waste silk that is too small for other uses. When the bag is full, sew up the open end, cover and you will have a new cushion. Don't forget to start a new bag when you sew up the old one.

Silk Underwear.

One of the new Jersey silks is as light and dainty as a glove silk, but has the elasticity of the jersey weaves, which makes it admirable for lingerie. There is flesh color, pink or pale white, made up into vests with bodice tops or the new hats are the tightness of the ribbon straps, suits, bloomers and

When Pattens Were Worn.

Americans find it more difficult than the English to understand what Dickens means when he says in "David Copperfield," "Women went clicking along the pavements in pattens." Pattens were an abbreviated form of stilts. The word is also used by builders as the name of the base of a column or pillar, and so architecturally the patten is the support used by a woman to keep her out of the water and mud. From this architectural use has come the secondary application of the word, meaning an arrangement attached to the shoe so that the walker is raised three or four inches above the solid earth, says Popular Science Monthly. If the mud and water did not exceed that depth the shoes were thus kept fairly dry.

It appears that pattens were not worn solely by the rich, but were luxuries indulged in by the very poor. In speaking of a person who was not especially speedy Ben Jonson uses the comparison, "You make no more haste than a beggar upon pattens."

Wrecked by a Knife Blade.

A ship was once wrecked on the Irish coast. The captain was a careful one. Nor had the weather been of so severe a kind as to explain the wide distance which the vessel had swerved from her proper course. The ship went down, but so much interest attached to the disaster that a diving bell was sunk. Among other portions of the vessel that were examined was the compass that was swung on the deck, and inside the compass box was detected a bit of steel, which appeared to be the small point of a pocketknife blade. It was learned that the day before the wreck a sailor who had been set cleaning the compass had used his pocketknife in the process and had unceremoniously broken off the point and left it remaining in the box. That bit of knife blade exerted its influence on the compass and to a degree that deflected the needle from its proper bent and vitiated it as an index of the ship's direction. That bit of knife blade wrecked the vessel.

Coming In Out of the Wet. There is an amusing story by Athenaeus which suggests the possible origin of the phrase "He does not know enough to come in out of the wet," According to the entertaining grammarian referred to, a town in Greece under stress of evil circumstances borrowed money from a rich man, who took as security for the loan a mortgage on the handsome portico which surrounded the market place. He was not an ungenerous creditor, for when it rained he caused the town criers to announce that the citizens had permission to take refuge under the colonnade. Strangers visiting the town who fail ed to have the matter properly explained to them were so impressed by the extraordinary circumstances that they spread abroad the report that the people were so stupid that they had to be told when to come in out of the wet.

Early Insurance.

William Gibbons of London is said to have been the first man to have his life insured. On June 18, 1853, he signed a contract with eight men by the terms of which he was to have his life insured for £283 for one year for 8 per cent of this amount. In 1859 a resident of a Connecticut city was traveling in England and became in terested in the workings of accident insurance for travelers. So he came home and promoted the first accident insurance company in this country. His first client was a resident of Hart ford, whom he insured for \$5,000 against injury in his stroll from the postoffice to his home. Marine insurance goes back to the early part of the fourteenth century and comes from Belgium.

Curious Death Custom In Fiji.

The Fijians believe that in case a marriageable youth or maiden dies without having gone through with the elaborate nuptial knot tying ceremony of the islands his or her soul is doomof the islands his or her soul is doomed to wander about forever in an intermediate region between heaven and

The KITCHEN CABINETS

I wrestle and frown,

And topple down:
I wrench, I rend, I uproot;
Yet the violet

Is born where I set The sole of my flying foot.

GOOD COMPANY DISHES. When cooking peas always save the

the liquid, using it to cook the peas in, making a much finer flavored dish. For variety add a bunch of mint to green peas when cooking, this adds a delicate flavor. Always save the water in which vegetables are

to add to the soup stock, as valuable mineral salts are soluble in water and are lost if 'this is thrown

Walnut Ice .- Cook to a thread one cupful of granulated sugar, one cupful of water and pour it over three well-beaten egg whites. To this add one pint of whipped cream, one teaspoonful of vanilla, one cupful of chopped walnut meats, folding them into the cream with care. Pack in ice and salt and leave until frozen, then cut in squares to serve.

Hindu Salad.—Shred some crisp white lettuce leaves and arrange them upon salad plates. On these lay four slices of tomato, cover two with chopped celery and onion, the others with finely minced watercress. Pour over a plain French dressing.

Bishop's Bread.—Beat three eggs and add a cupful of sugar, beating until the sugar is well dissolved; add a pinch of salt and flavoring of lemon or vanilla. Then add two cupfuls of flour, sifted, with two teaspoonfuls of cream of tartar and a teaspoonful of soda; a little of the flour may be reserved to cover a cupful of raisins. Spread in a thin sheet in a buttered tin and cover with a cupful of unblanched almonds, carefully cut in strips or in halves. Cut in oblongs or squares before it is cold.

Rolled Beefsteak .- Beat a round steak well and spread with any wellliked stuffing used for fowl. Roll up neatly and tie to keep it in shape. Put it into a dripping pan with a little water and a teaspoonful of vinegar, basting it frequently. When ready to serve spread a tablespoonful of butter over it and make a thickened gravy with the liquor in the pan. Cut as jelly roll when serving.

--- IN THE ---CARROLL RECORD. Lesson IX.—Second Quarter, For May 27, 1917.

THE INTERNATIONAL SERIES.

Text of the Lesson, John xv, 26; xvi, 14. Memory Verses, 12, 13-Golden Text, John xiv, 26-Commentary Prepared by Rev. D. M. Stearns.

Our special topic for today is the work of the Holy Spirit, a full study of which would take us, even if we only noticed the references to Himself, from Gen. i, 2, to Rev. xxii, 17. As in Gen, i and ii, all the work was accomplished by the Spirit of God and the Word of God, for the Spirit moved, and God said, "So it has been ever since and in everything." Our Lord Himself said, "The words that I speak unto you, they are spirit, and they are life" (John vi, 63). At Pentecost the same Holy Spirit who had been working all through the Old Testament period came in a special way and to bear a testimony to a crucified, risen and ascended Christ, a thing He never could have done before, and to gather from all nations a bride for Him, His body, the church, which, being completed and caught up to meet Him in the air (I Thess. iv, 16-18; I Cor. xv, 51, 52), the same Holy Sr 'rit will continue to work according to the eternal purpose of the Father in the Son, through the great tribulation period and the thousands years, and on to the New Earth, when God shall be all in all. How wonderful to be indwelt by such a person and to be permitted to let Him have the right of way and full control in one's life that God may be glorified! In xiv, 16, 17, our Lord called Him another Comforter, one who would be to all believers all that Christ had been to His disciples while personally present with them, and He said that He would dwell in us and never leave us. In xiv, 26, He said that the Comforter would be our teacher and remembrancer, so that, however poor a memory one may have, a believer can always, at least in the things of God, count upon his friend the Comforter. According to I John ii, 27, the anointing which we have received abideth in us, and we need not that any man teach us. In xv, 16, He is again called the Spirit of Truth as well as the Comforter, and our Lord said, "He shall testify of Me," and ye also shall bear witness. One of the evidences that the Spirit is having His own way in us is that we love to honor Christ and speak of Him, for "to Him give all the prophets witness," and concerning Him Peter and John said, "We cannot but speak the things which we have seen and heard" (Acts iv, 20; X. 43).

In our lesson chapter xvi, 7-15, our Lord said that it was better that He should go and the Spirit come for His special work to convince the world of sin and of righteousness and of judgment. Be careful not to confuse this saying with Acts xxiv, 25, as many do. Note our Lord's comment on this threethe Spirit, that the great sin was unbelief, the great need righteousness, because of His finished work, and that the sure consummation would be the final overthrow of the prince of this world, the devil, who is already a judged and sentenced one waiting the execution of the sentence (Matt. xxv, 41; Rev. xx, 10). The Spirit will also tell us things as we are able to receive them. Concerning verse 12 Paul also said, "I have fed you with milk and not with meat, for hitherto ye were not able to bear it," and then he gave a reason why (I Cor. iii, 1-4). How we should desire to be able to receive all that the Lord would like to tell us and not be so preoccupied with other thoughts as to hinder Him! He will guide us into all truth and show us things to come, for he wrote the whole book from beginning to end, and He only can interpret His own writings. Verses 14, 15, make us think of Abraham's servant telling of the father's only son, to whom he gave all that he had and for whom the servant was seeking a wife, carrying with him samples of the father's wealth (Gen. xxiv,

The whole of this age is but a little while comparatively (xiv, 19; xvi, 16-22), and the sufferings of verse 33 of our lesson chapter are said to be but for a moment compared with the exceeding and eternal weight of glory (II Cor. iv, 17, 18). A thousand years are in His sight but as yesterday when it is past and as a watch in the night (Ps. xc, 4). The woman and child of verse 12 take us back to Isa. Ixvi, 7, 8, and onward to Rev. xii and the time of His coming again for Israel's new birth. Until then those who stand with Him and for Him must expect the treatment of xv, 18-21; xvi, 1-4, 33. But it will be well worth while, for all sorrow shall be turned into joy. In Him we may always have peace, and the assurance to the overcomer should lift us above all present things (verses 20-33; Rev. iii, 21). His "Be of good cheer," the fourth while in His mortal body (Matt. ix, 2-22; xiv. 27), should lead us to consider His own wonderful peace and joy of which He spoke on that last night as He drew near to Gethsemane and Calvary (xiv. 27; xv. 11). Note also that His first "Be of good cheer" was in connection with the forgiveness of sins, for without this we cannot be of good cheer. His second referred to a healed body, for forgiveness makes us sure of a glorified body in due time. His third covered all present perplexing circumstances, and this last was to sustain in real tribulation.

New York and Paris.

While I am well rooted in my French and Latin soil, I have traveled far through the world, and one may believe me when I say that I have found no city that more resembles Paris in its ways and the characteristics of its inhabitants than New York. Even London, admirable as it is, is more apart. This is not to say that New York is not profoundly original, but that between it and Paris there are parallel originalities. The gayety of the streets; already certain aspects of picturesque antiquity; the atmosphere of welcoming; the vivacious spirit, cordial hospitality and disinterested enthusiasm for talent, merit or novelty; a certain quickness to adopt and to discard ideas, art movements and people; a restlessness at times too feverish; a love of pleasure, elegance and luxury; a tendency to respond instantly and as one man to any great and international event-all this is what makes of Paris and New York, each in its own particular way, with its little faults and grand qualities, the two most sympathetic, the most "electric" cities of the civilized world.-Jules Bois in Century.

Immigrants and the Birth Rate.

The figures given out by the census bureau showing what is described as an astonishingly higher birth rate among foreign born Americans than among native Americans are perhaps not so astonishing after all.

It is common knowledge that the families of foreign born parents are larger than purely American families. It is safe to say that they have been for many years, though the figures now published are the first ever made by the national government, but persons who are distinctly American in their feeling, habits, prejudices, customs and thinking continue to govern America and lead the American people.

That the more rapid increase of the elements brought into the population by recent immigration will have a tendency to unamericanize America is an assumption that lacks support in national experience. Our experience is that America makes Americans of Europeans.-St. Louis Republic.

The Great Secret.

The regulation of our time is more important than the effort to get money. When we know how to regulate our time enough money will always come. Earning a living is only a matter of learning how to spend one's time. And singular as this may seem, it is not the time spent in earning a living that counts so much as the time spent when we are not earning it. It is what you do when you don't have to do anything that tells in the long

When, therefore, you are not busy trying to make both ends meet spend your time in associating with millionaires and people who have nothing to do but spend enormous incomes. You'll be a millionaire yourself before you know it. If you want to catch a disease always expose yourself to it .-

Justice White a Great Walker.

Chief Justice White could give the noted Edward Payson Weston a good handicap and beat him in a walking match. Mr. White brims over with good nature, says Elisha Hanson in toons Magazine, and he is a wel come visitor on any street which he picks for his rambles about Washington. He probably knows more women and children in the poorer sections, between the capitol and the exclusive northwest of the city, than any other Washingtonian. Frequently he is seen trudging along in the midst of a lot of urchins, none of whom shows the slightest regard for the great dignity of his office, but who bask equally under the radiance of his beaming smiles.

Caught Him.

A small boy whose record for deportment at school had always stood at a hundred came home one day recently with his standing reduced to

"What have you been doing, my son?" asked his doting mother. "Been doing?" replied the young

hopeful. "Been doing just as I have been doing all along, only the teacher caught me this time."-Philadelphia Inquirer.

Times Change. "I see that Fifi Flubdub, the actress. is so temperamental that she swoons

FROCK FOR SPRING WEAR

A graceful afternoon frock made of pussy willow taffeta is one of the simplest dresses that has yet been seen among the spring fashions. The vest effect gives the bodice smart lines. Although its simplicity is extreme, the gown is natty and will no doubt be popular with the younger

WHITE BEST FOR BATHROOM

Should Be Absolutely No Pronounced Color in That One Particular Apartment of the House.

White paint and white woodwork are most attractive in the bathroomunless one is blessed with a luxurious white-tiled and white-enameled bathroom, such as the modern apartment houses provide for their occupants, There should always be a breeze blowing the white curtain at the bathroom window in summer time, and the shaded or an awning let down, is much more grateful to the warm and weary seeker of a cool plunge than a room into which the sun pours blindly.

A growing plant on the window sill will add to the cool suggestion of the bathroom, and in summer the floor covering may be taken up and a blue and white rag rug laid before the tub. Hand-drawn linen window shades

are charming in bathroom windows, Such windows are usually small and set rather high in the wall, so such a need not be very large. It may be hung with loops of tape to

an ordinary brass window rod and should hang flat against the window opening, the drawnwork or cutwork border running across the lower edge above a deep hem.

Hand-embroidered and initialed towels give a suggestion of luxury and distinction, and the housekeeper can do the simple embroidery very easily and quickly in odd moments. But whatever the kind of towels be sure there are always a-plenty. There are few things more maddening than to be all ready to step into a bath and to discover that one must dress and take a trip to the linen closet for towels and washcloth.

POPULAR FOR HOUSE WEAR

Charmeuse Ousted From Favor for Evening Wear, Is Now Used for House Frocks.

Charmeuse, somewhat ousted from favor for evening wear, has taken on a new lease of life for house frocks, and deservedly, for it is decorative in an extremely quiet way, and so very well in accord with prevailing feeling on the subject, while being light and thin enough to prove ideally comfortable under a fur or other heavy coat.

And charmeuse in a deep raven's wing blue was the material used for a charming frock of this persuasion seen the other day, with just that tint of greenish-black on the dull surface of the silk which no material save charmeuse could give without any suggestion of the shot effect, which was quite absent. It was more, indeed, like a bloom on the surface than a tangible color. Here that aluminum embroidery already mentioned, very dull and very heavy, entered prominently into the scheme of things. The panel-like side pieces, carried up to the armpits, were a smart feature of the frock. And very becoming they were, lending an appearance of height to the figure, which is welcome enough In these often "tubby" days. More of the embroidery surrounded the slightly rounded neck left hard and unbroken, and again bordered the wide sleeves, of bell-like proportions.

Preparing for Patches.

When making kitchen aprons leave the strings longer and wider than is necessary, then when a patch is needed cut off a piece of the apron string for this purpose. This is better than using a new piece as the string has faded with the apron.

$s_{A}^{0} \circ s_{A}^{0} \circ s_{A$ THE POULTRY SHOW.

How to Prepare Your Fowls Sc That They Will Take First Prizes.

About four days before the show give each fowl a warm bath. A thorough washing and careful drying will improve the appearance of almost every fowl, whether its color is white. black or intermediate shades. A hot room and the following utensils are essential: Wash boiler filled with boiling water (preferably rainwater), two large tubs for colored fowls and three tubs for white fowls, dipper, hand brush, large sponge, cake of good toilet soap and some towels.

The tub in which the fowl is first placed for washing is filled two-thirds with fairly hot water. The second tub is partly filled with moderately warm water to rinse out the soap, while the third tub for white fowls only (also partly filled with moderately warm water) is slightly colored with bluing, as for bluing white clothes.

Before the fowl is placed in the washing tub, its feet and legs should be thoroughly cleansed. Then stand the fowl in the water. Make an abundant lather with the soap and sponge, and work this stiff lather through all the plumage. Lather the back, sides of the body and the under plumage. Rub the feathers with the web, or diagonally, not against the web. Extend the wings and tail and wash each feather, using the palm of one hand for a support.

When the fowl has been washed, it is allowed to drain for a few seconds. and then immersed in the rinsing tub. Here the dipper and sponge are used to thoroughly remove all soap from the plumage. With white fowls, the birds are now dipped in the bluing water.

When the fowl is taken from the rinsing tub it is stood on a table and the superfluous water is removed with the sponge. The feathers are next "patted" with a towel to partly dry them, and the bird is placed in a clean coop near the stove to complete the drving.

Ordinary shipping coops have slatted tops and sides, and they are low. The coops for shipping show birds must be covered with muslin or have solid sides, and they must be high enough for the birds to stand upright. and wide enough for the birds to turn around without injuring their tails.

Why the Cord of Wood Shrinks So. Ralph Faulkner and Henry Sternberg, students in the College of Forestry at the University of Washington, have proved by experiment that a cord of full length wood when sawed and repiled in the ordinary stack shrinks on an average 24.76 per cent. As dealers buy wood in full lengths and usually measure it for delivery before sawing it, they are often accused of giving short measure.

A cord is the standard measurement of wood, and it is defined as 128 cubic feet of wood, measured by a pile four feet high and eight feet wide of logs four feet long.

The discrepancy between the cord as bought by the dealer and as delivered to the customer, according to Professor Hugo Winkenwerder, dean of the college, is not entirely explained by the sawdust. When wood is piled up in four foot lengths there are many spaces between sticks, caused by knots and curvatures. These spaces are eliminated when the wood is cut up small.

How to Remove Clothes From a Boiler With a Forked Stick.

It is much easier to take clothes out of a boiler if a forked stick is used instead of the usual round one. One can be whittled out at home. Take a piece of wood four inches wide and thirty inches long. That will make a handle twenty-four inches in length and fork of six inches. When shaped the handle should be two inches wile. If on, has access to trees such a stick cau be found ready made. All that you will have to do to prepare it will be to peel the bark off and clean it.

Soak three cupfuls of kidney beans over night; in the morning parboil with four large onions. Put into the bean pot with a pint of stewed tomatoes, a third of a teasponful of pepper, a tablespoonful each of sugar and salt and a half pound of salt pork. Bury the beans in the pork and add just enough water to cover the beans. Bake about five hours in a moderate oven. If the onions are not liked, they may be omitted and a teaspoonful of mustard added to the sugar and salt to season. For those who do not care for the salt pork use a cupful or less of olive oil, baking them as above.

Club Salad .- Take one and a half cupfuls of chicken (cold roasted), 12 slices of cooked bacon, three tomatoes and lettuce. Arrange the lettuce on individual plates, place on this a slice of peeled tomato, then a little of the diced bacon, and a spoonful of mayonnaise dressing; top with some of the chicken, more mayonnaise and a sprig of parsley. Around each, spoke-fashion, place four or six tiny toast points for a garnish.

Oatmeal Bread .- Pour a pint of soiling water over a cupful of rolled oats and set aside until the mixture is luke warm; add a half cupful of molasses, a half yeast cake, dissolved in a little lukewarm water, and a cupful and a half of bread flour. When this is light, add a teaspoonful of salt and enough flour to make a dough stiff enough to handle. Let it rise until double its bulk, cut down and turn into greased tins. Let rise again and bake threequarters of an hour. This makes two

ECONOMY - - of SILAGE SPACE, TIME and WORK

And of money, too. Here's a standard silo with many exclusive advantages. It saves your ensilage as it has double spline with joints sealed. It's so constructed that the preservation of your silage is insured. It saves space because the extension roof adds 5 ft and lets you pack tight to the top. You save time and work, as just a twist of the wrist oosens the door, no matoosens the door, no mat ter how badly pinched. You can tighten the hoops while standing on "handle ladder." All

TANEYTOWN LOCAL COLUMN

Brief Items of Local News of Special Interest to Our Home Readers.

C. L. Humer and U. S. Bowers made

a business trip to Washington, D. C., John A. Alexander is one of the

graduates at Western Maryland College, this year. Miss Pauline Brining paid her

home folks an unexpected visit this week, for a day. Mrs. TolbertShorb and Mrs. Wm. Ohler and daughter, Clara, spent

Wednesday in Union Bridge. Mr. and Mrs. J. T. Shriner spent the past week with Tolbert Shorb and family, and William Ohler and

Mervin Ashenfelter and Miss Ida Thomson, of Harrisburg, Pa., spent Saturday and Sunday with J. A.

Thomson and wife. The Tuesday Club, and other lady friends of Miss Margaret Englar, have sent her "showers" during the week. The wedding is to takeplace,

June 2nd. Edward Elliot, son of Mr. and Mrs. Chas. A. Elliot, left Hanover for Columbus, Ohio, on Monday, where he will take final examination for service in the signal corps.

We have learned that David G. Shildt, a brother of the late James Shildt, is living near Rocky Ridge. We had thought that James was the last member of the family.

Last week the Record bought several reams of wrapping paper, such as formerly cost about 4c a pound, and had to pay 12c for it-more, in fact, than for a good grade of white

Miss Clara Wilhide received a letter from a cousin of hers, in New Zealand, who is there preaching Divine Healing. It was mailed March 25th, and is stamped on the outside "Passed by Military Censor."

Owing to the fact that we are setting the type for a College Catalogue, along with the work on the Record, our operator, who is not yet an expert on the Linotype, may be unable to set all of the copy we otherwise would, for a few weeks.

E. L. Hess, of Frederick, a traveling salesman for the International Harvester Co., for the past 4 years, has been promoted to blockman, at Baltimore, and will have charge of Anne Arundel, Harford and Baltimore counties, and expects to move his family, in the near future.

least, has none to spare; in fact, we are one short for our own needs. Taneytown ought to have four active practitioners, considering population and scope of territory to serve, and has an opening, right now, for one more than it has.

The largestorage warehouse of the Taneytown cannery, as well as the husking shed, were practically erected and finished, this week. The former is a specially large and substantial building. Work on the whole plant is being pushed as rapidly as possible, and everything is of a permanent and first-class character-an industry here to stay.

"I am amazed at the typographical accuracy of the Record in its first issue after the installation of the Linotype. How did you do it ? Have the compositors become experts on the machine already? The general effectiveness of their work astonishes this old printer. Bravo, boys!"-Rev. P. S. Hooper, Bay Shore, Long Island.

The commencement exercises of the Taneytown High School will be held in the Opera House, May 29. There will be four graduates: Miss Anna Baile Chenowith, Eva Amandus Crebs, Clara Mary Hockensmith, and Norman Seiss Devilbiss. Dr. George A. Steele, of Baltimore City College, will deliver the address. On Sunday evening, May 27th, Rev. L. B. Hafer will preach a special sermon to the graduating class.

Union Bridge is progressive in at least one direction that we commend to the authoriteis of Taneytown. The Pilot of last week, states it as

will gather up the garbage which is ster High School building, Thursday placed in boxes or barrels in the alleys or some convenient place. As this system is often abused, the collector will be instructed what to gather. Tin roofs, brush, stumps, large pieces of tinware and the like will not be taken and the owner will be obliged to have it removed at his own expense. While ashes are not considered garbage, yet when conveniently placed inalleys or accessible places, the town will likely be able to use all, provided they are not mixed with tin cans, bottles and other trash."

Ephraim Faller, of Philadelphia, is visiting his uncle and aunt, Mr. and Mrs. N. B. Hagan.

Mrs. John Frock, Mrs. H. C. Stultz and daughter, MissBessie and Master Malcolm spent Tuesday in Hanover.

The patrons of Clear View school are cordially invited to be present at theclosing exercises, Thursday evening, May 24th.

Mr. and Mrs. George Hammond, of Baltimore, visited at the home of her sister, Mrs. Daniel Null, and other relatives here, the latter part of last

We acknowledge the receipt of a handsomely bound copy of the Memorial addresses delivered in House of Representatives, on the life and character of Hon. Joseph A. Goulden.

Frank Palmer's incubator house near Taneytown, burned, this Friday morning-and yet, some say there is ne danger of fire from incubators. Six incubators burned, three of which were filled with eggs.

At the regular monthly meeting of the Taneytown Fire Company, on Monday night of this week, R. S. Mc-Kinney, G. F. S. Gilds, Rev. Seth Russell Downie, A. G. Riffle and Robert Shriner were elected delegates to the State Firemen's Convention, which meets at Cumberland, June 13-15.

Littlestown has set a "clean up" day for the removal of all rubbish,tin cans, waste matter, etc. The authorities will haul away all such matter free of charge, when placed in barrels or boxes, in alley at rear of lots or along the gutters. The time set is this Friday and Saturday. The action was taken following an order from Dr. Dixon, State Health Com-

Carroll Koons, son of Mr. and Mrs. M. A. Koons, and Walter Fringer, son of Mr. and Mrs. Calvin T. Fringer, recently took the examination for Lieutenant in the Naval Reserves, and both passed, the former in "A" grade and the latter in "B" grade. Earl W. Koons also applied for examination, but as he is a medical student, he was not examined. Carroll is now at the Fort Niagara training camp, while Walter Fringer is at home because of the illness of his father. All are students at Franklin and Marshall
