THE CARROLL RECORD

is the best helper that any community can possibly have.

VOL. 24.

Chesapeake & Potomac Telephone, 3-R. TANEYTOWN, MARYLAND. FRIDAY, OCTOBER 5, 1917.

Please watch the Date on your Paper.

No. 14

BRIEF NEWS NOTES OF GENERAL INTEREST.

Gleaned from the County and State and our Exchanges.

At the meeting of the National Camp of the P. O. S. of A., held in Chicago, last week, Prof. William James Heaps, of Baltimore, was elected National President, for the next two years, without opposition, The next meeting of the National Camp will be held in Jacksonville, Florida, in 1919.

William Stine, 26 years old, died on Sunday at the home of his mother, Mrs. Julia Stine, in Shippensburg, from hydrophobia. Mr. Stine, on August 19th went to the home of a man in Southampton township, to purchase a pup and while he was examining it the animal bit him. He continued at work and didn't give the wound medical attention.

There prevails in some sections a popular belief that in the season when frost may be expected, its occurrence is largely influenced by the phase of the moon or other periodical phenomena. Careful tabulation of frost data and its comparison with moon phases fails to disclose any such relation. All persons interested are therefore cautioned to watch, not the moon, but the forecasts issued by the Weather Bureau

Eating wheat that had been threshed, proved fatal for four horses owned by John C. Moore, on the Ballinger pike, near Frederick, and as a result his stable has been reduced from nine animals to five. Last week, wheat raised on the Moore farm, this past summer, was threshed and in some manner the horses got into the barn where the wheat was kept. It is thought they ate about a bushel and a half of grain each.

Acting on instructions from Washington which designated as a military camp the Gettysburg National Park, United States Attorney Rogers L. Burnett, on Tuesday, issued an order for the closing of all saloons in Gettysburg within half a mile of the camp. The execution of the order will put Gettysburg in the "dry" column, as all the saloons there and at least one wholesale house are within the prescribed zone. Eight bars will be put out of business.

One farmer in Harnette County, N. C., who has just threshed his wheat crop, got 14 bushels to the acre without the use of commercial fertilizer by turning pea vines under last year. Another used soda and grew 26 bushels to the acre, while a third, with especially good land and extra preparation, made 36 bushels to the acre. Such a yield, at this time, when the cry is for wheat, means 8 barrels of flour from each acre, besides the other wheat products from the same material.

Gettysburg will soon be getting all its electric power and light from Hanover. The new transmission line being constructed between Hanover and Gettysburg to furnish electric power and light from the plant of the Hanover Heat, Light & Power Co., is expected to be in such condition that a test may be made on Sunday, Oct. 7, according to a statement made by E. H. Ramsbotham, manager of the Company. The new line is being built so as to give Gettysburg satisfactory electric service.

The radical changes in the future policies of the Prohibition party, which it was predicted, would take place at the Prohibition State Convention, Friday, in Odd Fellows Temple, Baltimore, failed to materialize, and party platform, which was agreed upon, made prohibition the paramount issue, with no side-issue planks included. The platform simply declared the fidelity of the state organization to the national Prohibition party, together with the absolute prohibition of the manufacture, sale, exportation, importation, transportation and traffic of alcoholic beverages as the paramount issue in American politics.

Through co-operation of shippers and the traveling public, the railroads of the country have been able to reduce their passenger service by approximately 25,000,000 miles since May 1, says the announcement made by the American Railway Association's Committee on National Defense. This has released thousands of train crews and locomotives for freight service, facilitating the movement of coal, food products, and other war supplies. The campaign to "make one car do the work of two" has resulted in the saving of nearly a half million freight cars, the statement adds, enabling the roads to move approximately 25 percent. more freight since war was declared than during the same period last year.

"Broomstick Preparedness."

Col. Roosevelt, who is touring the country making speeches to stir up patriotic sentiment, continues to rap our condition of unpreparedness. According to his statements, the ordinance department admits that we have no rifles for our National Army, and no guns for our artillery. He calls this "broomstick preparedness," as many of the men are trained with broomsticks, or antiquated guns. He say it will be at least a year after our declaration of war before weapons

Information About Camp Meade.

Reports of visitors to Camp Meade, where most of the Maryland boys are, appear to show that everything either is, or soon will be, in good shape, and that the boys are well cared for in every way. The dinner menu, last Sunday, consisted of vegetable soup, roast beef, sweet and Irish potatoes, peas and stewed onions, and the men were not restricted to one helping,

but in many cases received a second Camp Meade is situated about half way between Baltimore and Washington within easy access of the Baltimore and Ohio and the Pennsylvania railroads. The location of the camp is ideal, both as to soil and drainage conditions, as might be expected in an operation of such magnitude. Many practical difficulties have been en-countered which will take some time to overcome. The buildings in which the men are to be housed are not completed. The connecting streets of the camp are not yet in first-class order, and there is considerable confusion there owing to the enormous amount of work yet to be done. However, the work that has been done and the rapidity with which the government is pushing the camp to completion, is really marvelous. All the men whom one meets are in exceptionally good spirits and all say they are pleased with the conditions at the camp. Their food is good and plentiful. Their sleeping accommodations are comfortable and the men all speak

comfortable and the first and consideration of their officers.

"Let music swell the breeze," is a bit of patriotic advice that is now being carried out in many ways at Camp Meade. Almost every day sees another band started, and there is no end of singing organizations. At the Young Men's Christian Association certain songs are sung and in the barracks uncertain ones are rendered. The uncertain ones include those that are in process of development. Kenneth S. Clark, the leader, never misses a chance to urge the men to think out parodies of their own, to work in a little glory for their own units as

out parodies of their own, to work in a little glory for their own units as well as for the whole organization.

A big football game will be held on Thanksgiving Day, between the team from Camp Meade and that of Camp Dix, Wrightstown, N. J. Harry Dean of the Baltimore Young Men's Christian Association, is looking over candidates for the Camp Meade team. Indications are that enormous crowds will see the contest, which will be played at Camp Meade.

What a man most misses at Camp Meade is mail from home. The post-office is filled all the time. The statistics are not available, but it seems to be a fact that more mail is sent out than comes in. Colonel Swann's men have a real rush all day long. The postoffice is the busiest place in the whole camp. Either a lot of mail goes astray or a lot of folks back home have forgotten in a hurry about the fellows who are at Camp Meade.

The Record has not the slightest doubt but that the soldiers are being well fed with an abundance of everything they need; and while we are in favor of all worthy charities, we do not see the necessity for sending them jarred fruits, jellies, or anything else from the family stores. The probability is that before the winter is over, many others nearer home will be in need of food to a much greater extent than the soldier boys, and it will be much more benevolent to save up and care for these.

Cast-off Clothing Wanted.

All who have discarded clothing of any kind, for men, women, or children, that they are willing to have sent to the poor in Belgium and France, are requested to leave them at Mrs. Lavina Fringer's, Taneytown, not later than Wednesday evening; or at Red Cross headquarters in Westminster, at Main and Court Sts. The clothing, of course, should still be serviceable, and a protection against cold.

Dresses, shoes, underwear, stockings, odd coats or trousers, of all sizes, will be very acceptable. It is important that all such donations be made not later than the time stated, in order to be in time for the shipment.

The Right Spirit.

We had a letter from a lady at Motters, Md., this week, who does not care for her name to be known, enclosing \$1.00 for the Record for a "soldier boy" of our own selection, and Jesse Slick will be the beneficiary. She also made an offer of clothing for the use of the Red Cross. As she had previously made a liberal cash contribution through the Record to the Red Cross, we feel that here is one whose benevolent impulses are alive, and properly directed.

U. B. Conference to Meet.

The one hundred and twenty-eighth session of the Pennsylvania annual conference of the United Brethren Church will be held October 10-14 in the First United Brethren Church, Waynesboro. The local congregation is hard at work completing preparations for the entertainment of the 200 or more ministers and lay delegates who will attend the conference. Bishop William M. Bell, Washington,

will preside.

The members of the conference will be entertained by members of the church at their homes, dinner and supper being served in the dining room of the church by the women of the congregation. A special feature of the services during the conference will be the music by the choir of 67 voices under the directorship of the pastor, Rev. C. C. Miller.

THE FREIGHT OUTLOOK A SERIOUS QUESTION.

Farmers Urged to Market Their Wheat and Produce.

A circular letter of evident importance has reached our office, urging all persons interested in freight shipments to place orders immediately, for the wants of the winter. We give a portion of the circular, as follows, the last paragraph being of special interest to farmers. The circular was issued by the International Harvester Co., of Chicago.

"Great armies will be transported to and from widely-separated training camps; enormous quantities of military supplies must be kept constantly moving to these armies, at home and abroad, and will necessarily have the right of way. Cold weather inevitably reduces the effectiveness of motive power and, therefore, railroad hauling capacity. Last winter, with no military movements, the freight congestion was serious. This winter, with the country engaged in

a great war, it promises to be worse.
At present the railroad situation is not congested, but even before the coming of cold weather the increasing movements of troops and military supplies will end this condition. It is the duty, therefore, of all business men citizens and shippers generally, to order at once all necessaries that must come by rail and to ship all freight without delay, anticipating

deliveries wherever possible.

Manifestly, this is the only way the people can help to relieve the impending situation. Since any severe and continued freight tie-up cannot help affecting the welfare of the individual as well as the country, this is the course of business prudence as well as of patriotism.

Your customers generally do not come in contact with traffic problems as soon or as intimately as you do. The farmer probably will not realize what this tie-up means until he seeks cars for his corn, hogs and other products, and can get none, or until he comes to town for coal or other supplies and finds the local markets empty because of the traffic congestion. Then it will be too late; both he and the public he feeds must suffer. You will serve your customers, yourself and your country by showing all you can reach what is coming and

inducing them to act accordingly.

For example, you can help by showing your farmer customers the advisability of getting their wheat to mill or elevator now. Threshing is well advanced in most sections. As the Government has fixed the price of wheat, much may be lost by deferring shipment of the crop. If it is not shipped soon, the farmers may find difficulty later on in moving it when they desire to do so. Every car of wheat or any other commodity shipped now will lessen by that much the ill effects of the congestion."

More Money for Schools.

In a letter to county boards of education, M. Bates Stephens, State Superintendent of Schools, announces that the State Department of Education closed its fiscal year with a balance sufficient to enable him to waive his right to draw on the Comptroller for his next quarterly installment, and as a result \$6,250.00 appropriated for the maintenance of the State Department of Education will go into the general school fund and be distributed to the elementary schools of the State.

The State Superintendent, acting under the direction of the State Board of Education, has now completed the reorganization of his Department as provided by the Legislature of 1916. Under his direction he has three professional assistants spending their full time in the field studying the needs and conditions of the schools, and advising with school officials and teachers in regard to the improvement of the schools.

Samuel M. North, Supervisor of High Schools, was formerly the principal of a high school in Baltimore county. He examines the organization, equipment, and the quality of teaching, and has general supervision of all state-aided high schools. During the year he visits each of these schools at least once and most of them twice. This year he is also inspecting other schools that have the ninth grade or second year high school class.

William J. Holloway, Supervisor of Rural Schools, was formerly county superintendent of schools in Wicomico county. He is working directly with the elementary school supervisors in each county, and also helps county superintendents devise ways and means of improving teachers already in service.

J. Walter Huffington, Supervisor of Colored Schools, was formerly teacher of pedagogy in the Maryland State Normal School. He directs the industrial schools for colored children, visits other colored schools, and advises with colored school supervisors, principals, and teachers. He also devotes some time to the Maryland Normal and Industrial School for colored students at Bowie.

There is also an assistant superintendent, a clerk, and a stenographer to assist in keeping up the work of the Department. While his staff is smaller than is usually employed to direct the educational interests of a State, Superintendent Stephens believes that through it the State Board of Education will continue to render better service to the cause of education in Maryland.

Object to Military Service.

Camp Meade, Oct. 2.—Twenty-one men from Maryland, members of the Three Hundred and Thirteenth Regiment formally made protest this afternoon as "conscientious objectors" against serving in the United States Army.

Of the 21, 19 carried their protests

so far as to refuse to put on the uniforms when they were distributed to their companies. These 19, most of whom were Dunkards, were placed in the detention camp here with 24 other objectors, Mennonites from Pennsylvania. The 19 said that they felt they could not countenance warfare in any way, and were opposed to serving in any branch of the service, even as stretcher-bearers. They said that such service would make them feel that they were helping to support a military system which their consciences would refuse to indorse. The other two men seemed willing to take part in non-combatant service and expressed a willingness to wear their uniforms, to drill, hike and do other military duties until President Wilson decided the status of their case. They returned to their companies

When the 21 lodged their protests, their captains submitted their cases to Col. Claude D. Sweezey. The protestants included one man from Frederick county, one from Prince George's and the rest from Carroll and Washington counties. Colonel Sweezey interviewed each of the objectors and then made disposition of their cases.

The status of these objectors has been one of the most interesting problems of the camp. The President and Secretary of War Baker have been appealed to by the authorities here to give a decision in the case. In the meantime the objectors in the detention camp are carrying on Bible and prayer meetings.—Balto. Sun.

The Injury From Cigarettes.

Thomas A. Edison, some years ago, sent to his friend, Henry Ford, his expert opinion on cigarettes; and this, in facsimile letter form, is given to every visitor to the great Ford plant, in Detroit, who cares to have it. The letter is as follows:

"The injurious agent in cigarettes comes principally from the burning paper wrapper. The substance thereby formed is called 'Acrolein.' It has violent action on the nerve centers, producing degeneration of the cells of the brain, which is quite rapid among boys. Unlike most narcotics this degeneration is permanent and uncontrollable. I employ no person who smokes cigarettes."

A Hot Fight for the Senate.

There will be a hot fight, this year, for the control of the State Senate, between the annexationists and antiannexationists. Even if the House becomes Republican, which now seems probable, the anti-annexationists claim they will control 15 votes in the Senate, which will give a majority of

The counties in which Senators are to be elected this fall are as follows: Garrett, Allegany, Montgomery, Harford, Prince George's, Charles, St. Mary's, Cecil, Caroline, Talbot, Dorchester and Worcester. There also is one Senator to be elected in Baltimore city, in the Fourth legislative district. The total is 13.

The hold-over Senators are as follows: Democrats—Campbell, Frick, and Norris, of Baltimore city; Duvall, of Anne Arundel; Johnson, of Howard; Warfield, of Carroll; Legg, of Queen Anne's, and Bailey, of Wicomico. Republicans—Bomberger, of Washington; Kaufman, of Frederick; Joy, of Calvert; Allen, of Baltimore county; Brown, of Kent, and Parsons, of Somerset. The total is 14.

Transfers of Real Estate.

James M. Stoner, Sheriff, to Wm. Wilson, conveys 1121/4 acres, for \$1,-157.50.

Henry Becraft et al, to Edward D.

Brown and wife, convey 35 acres, for \$1,752.91.

John H. Crowl to Franklin H. Leppo and wife, convey 8 acres, for

Lucinda Rinehart to Elizabeth L. Rinehart, conveys 1570 square feet, for \$10.

William Landes, executor, to Thos. H. Smith, conveys 7 tracts of land, for \$3,025. Elmer E. Jenkins and wife to Jas.

B. George, convey 2 lots of land, for \$10.00.

Emanuel Schaeffer to Chas. Slagle and wife, conveys 2 acres, for \$5.

Chas. M. Ridgely and wife to J.

Frank Warner and wife, convey a lot

of land, for \$2,880.

George A. Graw and wife to Jesse W. Shipley and wife, convey ¾ acre, for \$5.

Discharged by the Board.

Following is the list of names of persons discharged by the District Board for the Second District of the State of Maryland, on industrial or agricultural grounds:
Chester N. Nusbaum, New Windsor.
Claude C. Armacost, Finksburg.
Ralph E. Bennett, Sykesville.
Robert E. Shipley, Westminster.
Frank C. Poole, Finksburg.
Robert T. Shriver, Union Mills.
Alton G. Wilson, Sykesville.

General Pershing has given his advice on European war tactics to this effect—"Don't chase the Germans; shoot 'em."

AN APPEAL TO PREVENT WASTE BY FIRE LOSS.

Let Everybody Read This and Help to Prevent Fires.

The Maryland Conservation Association to prevent waste by fire, has been organized with offices on the 6th floor of the Maryland Life Building, 10 South street, Baltimore. This is the working body of this State of the Committee of National Defense of the National Board of Fire Underwriters, through whom the services of thousands of expert inspectors all over the United States have been offered to the United States Government. In connection with this subject, President Wilson has this to say:

"This is the time for America to

"This is the time for America to correct her unpardonable fault of wastefulness and extravagance. Let every man and every woman assume the duty of careful, provident use and expenditure as a public duty, as a dictate of patriotism which no one can now expect ever to be excused or forgiven for ignoring.

forgiven for ignoring.

Preventable fire is more than a private misfortune. It is a public dereliction. At a time like this of emergency and of manifest necessity for the conservation of national resources, it is more than ever a matter of deep and pressing consequence that every means should be taken to prevent this evil."

The Association pays its own expenses, and its workers give their services without pay, many of them to the exclusion of their own work for the time being. It has on its staff for Maryland sixty trained inspectors and several hundred assistants who are grouped according to the counties of the State, under the direction of district chairmen. Each chairman of a district arranges meetings of the county and municipal officials, fire department officials, civic and trades podies, and explains the object and manner of carrying on the work. It goes without saying that everyone is ready and willing to co-operate. The great object is, of course, to reduce and prevent waste by fire, and this can only be accomplished by a united and co-operative effort on the part of all the people of the State.

In this no one can claim exemption; it is a work in which everyone can help, the housewife by care, the humblest employee by observing rules of safety, foremen, superintendents, owners, visitors, customers, in fact every one can help, and there should be no slackers.

Smokers and others who must carry matches, should carry only

safety matches. Self indulgence in smoking should be sacrificed while inside of business places. Cleanliness and good housekeeping, the care af ashes, waste, and sweepings, all tend to keep down the power of the moloch fire. Fire pails should be kept filled with water, fire extinguishers tested, refilled and tagged, to maintain their efficiency. Volatile oils should be kept in safe places and not used or handled by the aid of artificial light, and none used except from safety cans. Competent watchmen with clocks should be installed, and if necessary, guards placed at all important places. It was in a very small and unimportant place that the cow kicked over the lamp which started the big Chicago fire, and so a small fire in any unimportant place may start a conflagration that might reach an important warehouse or storage establishment which may contain thousands of tons of food stuffs that took months to

In ordinary times the loss by fire of merchandise is a commercial transaction affecting only the owner and perhaps his creditors, but now all this is changed. Private ownership is now a public trust. The war has made this nation and its allies for the time being, one great family, where the possessions of each, in a measure, belong to all, and no one can with justice or right waste anything which may be needed by the other, no matter how well he might do without it himself. To doubt this is to doubt the right of the Government to commandeer.

It is just as important to conserve our fertilizer works to raise crops as it is to have cans in which to preserve them, and just as important to have boxes in which to transport canned goods as it is to have the cans; so it is as necessary to have the wool and cotton and the mill in which to make cloth as it is to make clothes and other articles of wearing apparel out of it; in fact, no line exists where one can say here my responsibility ends and I affect no one else.

These experts are all qualified with letters from the Maryland Council of Defense, and it is under the authority of this body that this work is being carried on in Maryland. It is a part of the nation-wide effort that is being carried on in every State of the union and the results in each State are being collected bi-monthly and reports made to the Council of National Defense in Washington. It is considered so important that this work should accomplish effective results that appeals have been sent out to the people making it plain that it is their patriotic duty to respond, and as this is a subject that is not only near to but affects every one closely, little slacking is likely to be met with. If there is, the strong arm of the Government is sure to act, for if it is found that the efforts of the Maryland Conservation Association do not meet with success in securing a remedy when danger of fire is pointed out, Government Agents are ready

to step in to enforce compliance should this become necessary. It would indeed be useless stubbornness for anyone to fail to respond to this effort

effort.

The motto of the Maryland Conservation Association is: "An ounce of prevention is better than a pound of cure in helping to win the war."

Every owner, superintendent, foreman, watchman, porter and workman, is expected to be just a little more alert, a little more careful, and a little more interested than he was before. Every householder and housewife and every fireman, policeman and public official of every kind, is expected to be just a little more vigilant.

Proceedings of the Orphans' Court.

Monday, Oct. 1, 1917.—Letters of administration on the estate of Elizabeth Fowble, deceased, were granted unto William F. Fowble, who received an order to notify creditors and returned an inventory of debts.

turned an inventory of debts.

The last will and testament of Susanna M. Hough, deceased, was admitted to probate and letters of administration with the will annexed were granted unto Edgar C. Hough, who received warrant to appraise and an order to notify creditors.

Letters of guardianship of Milderd E. Haines and Evelyn P. Haines, wards, were granted unto Mary E. Haines

Haines.
Tuesday, Oct. 2, 1917.—Sarah V.
Sharrer, administratrix of Albert F.
Sharrer, deceased, settled her first and final account.

Letters of administration on the estate of Lewis Myers, deceased, were granted unto Missoura A. Myers, who received warrant to appraise and an order to notify creditors.

J. Thomas Zile, executor of Leonard

Zile, deceased, returned an additional inventory of personal property. Rachel R. Aldridge, executrix of Mark A. Aldridge, settled her first

and final account.

Nathan H. Baile, executor of Winfield S. Drach, deceased, reported sale of real estate on which the Court granted an order ni si.

Weeklies Advancing to \$2.00.

Weekly newspapers in parts of the West have jumped their rate to \$2.00 a year, many of them a year or so ago having advanced to \$1.50. Some have advanced to \$1.75. The Clinton, Kentucky, Gazette, says of its advance to \$1.50:

"Last November we raised our subscription price from \$1.00 to \$1.50 for our paper. For every man who stopped taking it, we gained two more. Would not go back to the old price, and feel bad because we did not bounce to \$2.00."

The Canova (South Dakota) Herald, has just made this announcement:

"After October 1, 1917, the subscription price of the Canova Herald will be \$2.00 per year, payable strictly in advance. Until October 1, subscribers may renew their subscriptions at the old rate of \$1.50 per year and may pay in advance as many years as they wish at this rate, but they must do it before October 1, as after that date all subscriptions will be \$2.00 per

"The publisher did considerable figuring before determining to raise the price, and after keeping a close record of all costs in connection with printing the paper, for several months, it was found that there were just two courses open to follow: Either raise the price or reduce the size of the paper. It seemed raising the price was the most logical thing to do, as we figured our readers would rather pay 50 cents a year more than get a smaller paper."

Many like annoucements are being made by weeklies in Indiana, Illinois, South Dakota, Iowa, and other States.

The Condemnation of Senators.

A situation exists in the U. S. Senate, unparallelled in the history of this country. Petitions have been presented with the strongest backing demanding the expulsion of Senators La Follette, of Wisconsin, Stone, of Missouri, and Gronna, of North Dakota, all charged with disloyalty. All of these are not only strongly against the government's war propaganda, but in their speeches and efforts indicate a strong pro-German sentiment, or at least their attitude is so regarded.

It is improbable that the Senate.

at this session, will expel LaFollette, or the others, but there is strong probability of a resolution of censure deploring their attitude. Petitions are still coming in, some of them urging that deportation to Germany be the sentence for treasonable utterances.

No More Macadam Roads.

Chairman Zouck of the State Roads Commission says Maryland will build no more macadam roads as it has been abundantly demonstrated that they will not stand heavy traffic as well as concrete. One of the difficulties with concrete, and one not entirely eliminated, is its tendency to crack, but the use of expansion joints and improved methods of construction have largely overcome this tendency.

Experience has shown that the upkeep of concrete roads is much less than macadam and as the first cost of the two kinds of roads is about the same, the odds are in favor of concrete, and this class of road will be adopted as a fixed policy, hereafter.

The Commissioner of Health of New York City, is quoted as authority that the raise in the cost of milk has caused the deaths of 400 children in that city.

the Star-Spangled Banner Oh, long may it wave O'er the land of the free, and the home of the brave."

A hotel in New York has arranged for free classes in French, in order that guests may be able to read the menu cards. Now, if this enterprising hostelry would only arrange for a free course in finance, in order to show how the said French named viands may easily be paid for, it would be completing the job in fine

It would be a good idea, we believe, to first insist that women dress sensibly, as a prerequisite for considering her privilege of voting. As long as men are compelled to regard her as more or less insane about her outward apparel, they are not apt to have very high regard for her mental, and generally judicial, qualities. The Frederick County Grand Jury was wholly within its rights, in condemning the "loud" fashions so generally

Freight Embargoes.

As a rule, a "freight embargo" is understood to be an arbitrary ruling of the railroads, for which they are held accountable by shippers, and an about. Not continually disagreeing evidence that in various ways they are discriminating, especially against measure of the bounties he gives us, small shippers, because all of the embargoes are against shipping long distances, and into large cities, while shipments from the cities can be made to the country districts, as a rule, with no embargo restrictions. The fact is, the railroads are but

little, if any, to blame, for the embargo is the result of lack of help at terminal stations, and at transfer points, to handle freight, and relieve railroad congestion. For instance, if freight is allowed to accumulate at terminal stations, and not removed by consignees, the companies-which are held responsible for the care and safety of freight-can do no better than to refuse to ship any more to such stations.

Also, when a shipment is made to a far western point, for instance, requiring transfer at certain connecting, or junction points, from one road to another, and there is insufficient help to make these transfers, the congested condition again forces question of trains and carrying, so much as it is a question of lack of man help, and team help, at these important centres.

Full carloads, very naturally, receive the preference of the railroads, as such hauling is largely a matter of transportation and switching, requiring no warehousing. The transfer business, operated by firms not connected with railroads, and draying by individuals, are really the agencies that are unable to handle the freight | ference with that plan is what is business, and forces the railroads to establish embargoes.

Putting Up Prices.

We are of the opinion that a good thing else is up," and without any real cause. We are also inclined to believe that often when people say "they can't afford to raise" a thing at | that tells the true story. a certain price, they guess at the conclusion as often as they know posi-

THE CARROLL RECORD left go as such, but now, there is a disposition to eliminate such items. and make everything pay, or at least to make everything bring more.

The water in the streams, the leaves P. B. ENGLAR. Editor and Managor on the trees, the sand in the gutters, the birds in the air, the fish in the creeks, may about as easily be said to be "worth more now," as some other things that are more easily controlled and marketed by individuals. The rush for "putting up prices" has unquestionably been overdone, and largely because of power to do so, showing the natural inclination of humanity to be oppressive, if given half a chance.

> And this tendency is not limited to any particular class. Almost everywhere one turns, there is the same story; and when there is justice back of the trend, it is all right, but we strongly suspect that these advances are about as frequently unjust, as just; that people advance prices without knowing that there has been an advance in cost, or how much, and that in other cases there are not advances when there should be.

> This is a pretty good time for everybody to be sensible, and not oppressive. Some have lost their heads, entirely, and are creating an unhealthy and excited state of affairs that exists only in imagination. It is also a good time to recognize the rights, the needs and the circumstances, of others. Too much strenuous selfishness is apt to react, and even while it is being exercised it will bring no lasting prosperity. The gouger and skinner usually gets his dues, after a time.

The Sin of Complaining.

Complaining, even when there is great provocation, is hardly justifiable, especially when the basis of complaint is a logical result of the times, or of natural causes. Complaint of rascality, inefficiency or wastefulness, is another matter, and needs not only the complaint, but the follow-up processes needed to remedy improper conditions.

Everybody in this country ought to read "Pollyanna," and then read it again. We ought to realize the absolute sinfulness of our complainingof our suspicious, grasping inclination- our lack of charity. As a matter of fact, we are favored and blessed far beyond our narrow conception, for the most part. We need absolutely harsh discipline, and real losses and troubles, to make us see clearly, and we need to be made realize that we are crooked in our conclusions—absolutely complainers without just cause.

Thankfulnes, instead of complaint, should be the basis of our mental activity. Not a sifting of experience to find something to be grouchy about, but to find something to be glad with the Giver of all good as to the but thankful to him for what he does give and seeing the full measure of it, for the most of us receive far more than we are entitled to because of the measure of our good works and service to Him.

The great trouble with the most of us, is, we see only our own little business and our own prosperity; we imagine ourselves the chief of the downtrodden; we are willing to run over everybody and anything to get profit for ourselves, taking but little account of who, or how many, may thereby be caused cost or inconvenience. Shame on the chronic condition of mind and morals that takes account only of self!

An Over-worked Word.

Everybody is getting tired of the word "conservation." It is not a word to be disregarded, but everybody is, and has been, "conserving" for some time, and if the country is not soon left alone, and all this talk the embargo. It is not, therefore, a about saving and economy curtailed, a panic—the worst thing that could happen-will be brought about, and there will be real want and disaster. What we need is an optimistic and rational conduct of our affairs, the circulation of as much money as possible in ordinary channels, and an equalization of incomes with increased prices.

When a man gets more for his products, he must expect to pay more for somebody else's products, and intercausing most of the present hardship. Nobody has a right, just now, to be making "big money," because he can not do so without adding unjust burdens on others. Paying big prices for labor is no particular hardmany things are "put up in price" on | ship, as long as the product sells at a general principles, because "every- correspondingly high price. Percentages and averages, rather than prices, are what count in general results, and it is this "general result"

It will be tremenduously harmful for this country if the people get into tively what they are talking about. the way of thinking that they must The fact is, there are always a lot of cut out all but the barest necessities things produced that are in the "don't of life, and must hold tight to every pay" class, and these are ordinarily dollar they get. The object of all Pacific Coast, obtained financial aid

should rather be "to live, and let live," and keep all industries that are worthy of living, going the same as usual. This can not be done by howling calamity, and scaring everywork, and help the other fellow to get along too.

Give Up Your Candies and Ice Cream Sodas!

There is an article about the part children will play in the war in the October Woman's, Home Companion. It was written by Agnes Repplier and

"More sober, less inspiring, but very whit as educational is the program of thrift and service to which the Minute Girls-who may be best described as Camp-fire girls at home and at school-have pledged their support. These children are taughtwhat they are quite old enough to understand-that times of war call for sterner qualities than times of peace and plenty, and that they must be prepared to meet new conditions with new courage and new efforts. They are not, for example, to dawdle over breakfast, and then hop on a trolley car to get to school. They are to start earlier, and walk. They are not to spend Saturday afternoons at matinees and moving picture shows. They are to tramp or bike if the weather be good, and to learn economic cooking or elementary nursing possibly turned to account. They are not to waste anything that can be possibly turned toaccount. They are rigidly to curtail the money spent on candy and ice cream sodas-which is a wise reform. The increased consumption of candy in the past few years has been regrettable from every point of view. There is a feverish outcry from tradesmen whenever any economy is projected, a feverish protest against the cramping of industrial conditions; but no one can deny that too much candy is eaten in the United States.'

Diet and Patriotism.

It is painful to conceive of the state of mind of an absolutely conscientious citizen at work regulating his diet with a view to patriotic food conservation. He watches the newspapers for his instructions from Washington. He has been keeping a few potatoes within a glass-topped table to be admired along with the family treasures. Suddenly he is told he must eat potatoes as fast as he can or they may rot in mountains, so plentiful they are. Wheat, above all, must be saved; yet wherever he goes he is offered wheat cereals, wheat cakes, wheat bread. Sometimes the restaurant prints on its menu a pious adjuration to him to avoid scarce articles, but it usually has no corn bread to offer him. Then he reads a report that after all there is a lot of wheat. Sometimes he reads a bashful hint from Washington that h must control his sweet tooth; another day that meat is rather to be econo-

Even the most conscientious citizen is left uninspired, if not bewildered, by these vague and contradictory reorts. Others will perhaps give up, reflecting that Lucullus was after all greater general even than he was gourmet. Such vague and slight economies as the "one wheatless meal a week," or whatever was requested, are too insipid to be very effective. Self-sacrifice is no fun unless the sacrificer can do enough to feel a little heroic and to have something to brag about. Also his economy must be big enough so that he can conceive of its making some possible difference.

There is a wonderful opportunity, through energetic State and municipal agents, for the Food Control Administration to effect whatever dietary economies are wise. The public is ready enough to respond to definite propaganda and a program that makes some appeal to the imagination. If wheat and meat are urgently to be economized, so far the casual observer sees in most neighborhoods. little being systematically being done in that direction.—Phila. Ledger.

Japan's Trade Expansion

In Leslie's of recent date appears an article by W. E. Aughinbaugh on the tremendous progress made and making by Japan in winning world trade. We quote:

I recall the time when Japanese stores were unknown in Latin-America. Today they are to be met with in all the large cities of these republics while Japanese coolies have supplanted the Chinamen, against whom in many of these lands exclusion laws have been passed, presumably instigated by the wily statesmen of Nippon. It has been repeatedly intimated on good authority that some of the Latin republic which are none too friendly toward the United States have suppressed treaties with Japan, while it is an open secret that Mexico, in exchange for fishing privileges given Japanese concerns along her

and munitions from this same source. Markets for such articles as glassware, toys, silk, paper goods, notions, textiles, cottons, toilet goods, and a host of other necessities which were body stiff. Let everybody keep at formerly dominated by European nations are now completely in the hands of the Japs, due to their reduced freight rates on national products and low wages to workers in home factories, which means that these lines will be absolutely controlled in the future by Japan. As an example, I may state that the cheap clock and watch trade in Chile, Argentine, Uraguay, Brazil and Peru are today supplied exclusively by Japan, whereas the United States and Germany formerly operated alone in this field.

In a previous issue of Leslie's, the same writer strongly urged the necessity of trade treaties with the various nations of the earth. He urged that no time be lost in negotiating commercial conventions embodying "favored nation" clauses which would pevent discrimination against exports from the United States, and which, in time, would necessarily grant trade favors to the treaty-making countries. If trade treaties mean anything, they mean Tariff favors and Tariff preferences extended in return for similar Tariff favors and preferences. They mean a general system of Tariff bargainings. They mean a complete overturning of the sound Protection policy of a uniform Tariff on imports from all countries, extending no favors and granting none and with such penal and, if necessary, prohibitory restrictions dealing with unfair discriminations against American exports as would make it a costly proceeding on the part of any nation so discriminating.

What, for example, would be the character of any "favored nation" treaty negotiated with Japan? That country, with its labor scale oneeighth to one-tenth the American scale, would have no need of a Tariff or trade treaty with United States. Since Japan, with "reduced freight rates on national products and low wages to workers in home factories,' can now control the markets for a large line of industrial products which 'were formerly dominated by European nations," the enterprising Orientals can snap their fingers at "favored nation" treaties and at Tariff favors and preferences. They would be of no value to that country. Japan in respect of cheap production and ability to compete successfully in all markets, is the most favored nation in the world. The United States, with a high rate of wages and a correspondingly high production cost, and heavily handicapped by a Free-Trade Tariff, is the least favored among nations so far as competition in world markets is concerned. It is also a non-favored nation in ability to control its own domestic market .-American Economist.

True Happiness.

It's a beautiful world, friends. Why spoil it by grumbling? Why throw away your birthright of joy and gladness and deep abiding peace in a mad rush for gain? Don't forget that the very best things lie close at hand. I heard yesterday of a poor lad, paralyzed the entire length of one side, his right hand and arm useless, yet he was making good at odd jobs in a large concern, singing and whistling the whole day through, and when one of the working force said to him one day: "You're always happy, John. How is it?" he turned, with his ready smile fading a bit. "I have to be don't you know, Miss F—,"he replied. "I have to sing and whistle to forget."

Friends, it helps to be cheerful. It helps to be brave. We're all reaching out for happiness, but we think too much about it. We're too closely oc-cupied with the I of it to get the most

What though you did fail in your undertaking? Begin again. What though you did meet with a loss? Thank God it left you with health and strength. What if life hasn't turned out just as you planned it. one end of the earth to the other hu-

manity echoes the same cry.

Let's be true, friends. Let's be true! True to ourselves, to life, to God. It will mean the giving of our best every day, when perhaps we are tempted to give but half best, or even to shirk utterly and give next to nothig. It will mean making our bodies a fit dwelling place for the soul God put within them. It will mean selfdenial of those things that hurt. It will mean accepting responsibilities, shouldering blame in our work, when the blame is ours; not trying to make excuses nor throwing them on another. It will mean being patient, brave, and kind, whether the burden of the day be heavy or light-reaching out a helping hand to the one who is close beside and almost ready to It will mean, friend, giving out to the world a bit of that same Godspirit that was fashioned into your soul when you were sent into this old earth fresh from the heart of love and of God .- L. D. Stearns.

Sour Stomach.

Eat slowly, masticate your food thoroughly, abstain from meat for a few days and in most cases the sour stomach will disappear. If it does not, take one of Chamberlain's Tab lets immediately after supper. Red meats are most likely to cause sour stomach and you may find it best to cut them out.

HESSON'S

Are You Ready for Fall?

This is the question that is being asked daily, and we are endeavoring to help you answer it in the affirmative by having ready for your selection a full stock in every department.

Dress Goods. Right up to the Standard.

We are right up to our standon display our usual large assort ment of materials suitable for Dresses and Dress Suits.

Dress Ginghams.

We have just received a shipment of new patterns of Ging hams of standard quality, which will make very pretty house dresses or school dresses.

Apron Ginghams.

Always a large assortment o Lancaster and Amoskeag Apror Ginghams on hand to make your selection from.

School Supplies.

Supplies on hand, ink and pencil for work, we have a line equally tablets, companions, pens, pen- as good. Come in and let us cils, slates, sponges, composition show you our line and save you books, lunch boxes, etc.

School Dresses.

A very pretty lot of plaid and chambray dresses for any age ard in this Department, and have girl. They are made of good quality gingham, and the patterns are very good.

Sweater Coats.

For every one in the family, we have a suitable Sweater. Just the thing for the cool mornings and evenings. Our line is composed of an assortment of black, blue, maroon, rose and purple. Some being trimmed in white or gray. Don't fail to look over these and get our very reasonable

Shoes.

For Men, Women, Boys', Girls or Children. We have a line of Shoes suitable for all occasions. If it is for dress, we have the A big assortment of School very best quality and style, or if money.

Clothing for Fall.

Our new line of Suits for Men and Boys is now coming in, and consists of the newest Fabrics and Stripes on the market.

For a recommendation of our Clothing as to fit, quality or style ask the fellow who has been wearing our Clothes; he will tell you how well we have pleased him.

The Taylor line of Samples of made-to-order Suits is now on display, and is made up of over a hundred and fifty samples of the newest and best wool varieties at the lowest possible cost. When can we expect to have you call for your measurement?

Store Closes at 6 p. m., Monday, Wednesday and Friday

THE BIRNIE TRUST CO.,

TANEYTOWN, MD.

The statement made below shows the progress of this Bank in the last five years.

Date.	Capital Stock.	Surplus & Profits	Deposits.	Total Resources

General Farm Topics

THE ASPARAGUS BED.

Good Growth of Foliage Means a Larger Crop Next Year.

Don't ignore the asparagus bed now that the cutting season is over. It has given you its food contribution; now see that it has plant food to make a good growth of foilage. Fertilize and cultivate well now to insure that strong, healthy growth which is essential to a good yield of shoots next spring.

After the cutting season the ridges should be leveled and the asparagus bed thoroughly cultivated, says the writer of the bulletin. A high grade fertilizer then should be applied at the rate of 1,000 to 1,500 pounds to the acre. A fertilizer containing 2 to 4 per cent of nitrogen, 6 to 8 per cent of phosphoric acid and 6 to 8 per cent of potash will give good results. Muriate of potash and kainit are preferable to sulphate of potash. Where the land is already heavily manured the nitrogen may be left out of the fertilizer mixture. The fertilizer to be applied should be distributed broadcast over the bed or in a strip on either side of the row and thoroughly mixed with the surface soil by harrowing or cultivation. Flat cultivation should be practiced after the cutting season.

In many sections the asparagus plants are cut down as soon as the berries turn red, and after drying sufficiently they are burned to destroy any disease germs or insects that may be present. In regions where severe freezes occur it is doubtful whether the cutting and burning of asparagus tops are advisable. The old tops hold the snow and prevent deep freezing and the blowing of soil. Some growers thoroughly harrow the bed after the tops are removed; others throw a slight ridge over the row, but ridging is not necessary unless there is danger of injury by severe freezing during the winter. Where land is inclined to wash, cultivating and ridging in the fall are objectionable.

SELECTING SEED CORN.

Ears Should Be Chosen From the Field of Standing Grain.

Seed ears for next year's crop, if selected in the field from standing corn. may be chosen more wisely, be stored more carefully and will then produce a larger yield in return than if picked from the shock or crib.

Corn yields have been increased three and one-quarter bushels to the acre at the Ohio agricultural experiment station by selecting seed in the fall from standing corn. The best ears grown under average conditions of stand and fertility can be picked out by such field selection. A good ear chosen at husking time or from the crib may owe its excellence to espe cially fertile soil or to the fact that only one stalk grew in the hill.

An ear equally good, but grown on average soil and with three stalks in a hill, will likely yield more when planted the next year. Such an ear may be marked in the field by a little paint or a string and then separated from the others at husking time.

Corn left in a crib over winter is fre quently injured by weather conditions and germinates poorly the next spring

DISINFECT STABLES.

Thorough Cleanup Checks Cattle Diseases and Dairy Herd Losses.

Disinfecting dairy stables checks contagious and infectious cattle diseases. A thorough cleanup followed by disinfection about twice a year with a coal tar disinfectant is recommended by the Ohio experiment station.

Calf diseases have been lessened in the dairy herd at the experiment station by disinfecting the stables each spring and fall. Digestive troubles, particularly white scours, have not been troublesome and fewer deaths in calves have occurred after this practice was adopted. Less garget in cows has been evident. The same treatment will help to hold in check tuberculosis and contagious abortion in herds where these diseases are prevalent.

Thorough disinfecting is urged to kill all disease germs in every possible lurking place. Mangers, stalls and floors need special attention. Coal tar dips are used at the experiment station. After disinfection the stables are whitewashed.

MANURE VALUABLE.

Can Replace Effectively the Costly Commercial Fertilizers.

Can barnyard manure be worth \$8 to \$9 a ton for use on farm crops? At present prices for commercial fertilizers it has had this value in tests conducted by the Ohio agricultural experiment station.

Eight tons of manure re-enforced with 320 pounds of acid phosphate have been as effective in increasing crop yields as the same quantity of acid phosphate mixed with 480 pounds of nitrate of soda and 260 pounds of muriate of potash in tests covering twenty-years at the experiment station at Wooster.

Nitrate of soda now costs nearly cents a pound and muriate of potasb 20 cents. At such prices the eight tons of manure has had a replacement value of at least \$70.

Every pound of manure saved and used with the utmost economy will relieve the fertilizer situation next year and put crop yields on a higher level.

ORCHARD AND GARDEN.

Cut out and burn the old & blackberry and raspberry canes as soon as they've fruited.

Keep the hoe and cultivator * going in the strawberries, but @ cease cultivating the bush fruits. Don't be in a hurry to "lay by" the potatoes. It is well to keep up shallow cultivation as long as the vines will permit. To prevent blight the foliage must be kept covered with bordeaux until the crop is matured.

Look out for sun scald on trees that have not sufficient foliage to shade their own trunk and main limbs

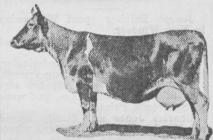

Limestone judiciously used by each farmer whose land is too acid will augment the supply of food by a surprising number of

KEEP UP MILK FLOW.

Short Pastures Should Be Supple mented With Other Feeds.

This is the season of the year when the milk flow always falls off and the size of the milk or cream check decreases accordingly, writes a correspondent of the Kansas Farmer. The successful dairyman will do all he can to prevent this decrease or at least to make it as small as possible. Too often, though, the blame for this decrease is not placed in the proper place, but is attributed to the heat or the

These, of course, are factors to consider, but careful experiments have shown that they are not as important as is commonly supposed. As a rule, the controlling factor at this time is the food supply. The grass at its best is not as fresh and succulent as earlier in the season, and therefore the cows

DAIRY COW-GUERNSEY TYPE.

will not eat as much, and, in addition to this, in many cases the pastures are dry and have been pastured so close as to produce a positive shortage of

Later in the season, when cooler weather arrives and the grasses freshen up, the cows will tend to increase in their flow again, but if they have dropped decidedly in milk flow it will be difficult to raise the production again; therefore the dairyman will find it advisable to supplement the pasture with some other feed. Silage will be the best and by far the cheapest feed if it is available. Lacking that, it may be found advisable to cut some of the green corn and feed of an evening.

Where neither of these feeds is available good alfalfa or clover hay might he fed although the present price is nearly prohibitive, but if it is on hand without having it to buy it would perhaps be advisable to use it. Feed only a few pounds to each cow. In many cases a few pounds of grain daily will give good returns. As a rule, a mixture of several grains will give better results than one alone. This grain mixture should contain a large amount of laxative feeds to counteract the effect of the dry pastures.

FERTILIZING WHEAT.

Manure Re-enforced With Phosphate Will Increase Grain Yield.

Manure re-enforced with either acid phosphate or raw phosphate rock may be the only plant food added to wheat following corn this year, according to specialists of the Ohio agricultural experiment station. Increased crop yields have far more than paid for this fer-

tilizer in experimental tests. Wheat seeding is hurried after the corn crop is cut in a three year cornwheat-clover rotation. After the wheat is seeded fertilizers may be added. A few tons of manure per acre may be applied if available. With it should be mixed raw phosphate rock or acid phosphate

Manure alone has had a value of \$3.65 a ton in increasing crop yields in such a rotation at the experiment station for seventeen years at Wooster. This value has risen to \$4.48 by the addition of forty pounds of raw phosphate rock to each ton of manure and to \$5.41 by the use of a like quantity of acid phosphate.

If raw phosphate rock is used some decaying vegetable matter, such as manure, will make it more effective. The decomposition of the manure increases the availability of the phosphorus in the fertilizer.

Banish the Hessian Fly.

Full grown Hessian fly maggots called "flaxseeds" are in the wheat stubble; in September they become flies and lay eggs in young winter wheat and volunteer wheat. Deep plowing of wheat stubble immediately after harvest is cheap insurance against the Hessian fig. Hessian flies on your neighbor's farm will infest your wheatfields. Organize a community campaign to bury the "flaxseed." Don't let a Hessian fly spend the winter on your farm or in your neighborhood.

Sow a Patch of Rye. Sow rye for pasture and save grain. Corn ground from which the crop has been cut for early feed makes a good place for a patch of rye.

Good Work Is Our Specialty

Government Experts Aid in Installing System to Prevent Damage to Metal Structures.

The damage done annually to underground pipes, cables and other metal structures in this country by electrolysis amounts to many millions of dollars. There are very few water, gas or lead cable systems that are not more or less subject at some points to electrolytic damage from stray currents. Moreover, the loss does not consist merely in the shortening of the life of such structures; electrolytic damage is one of the causes of the leakage of water and gas from distribution systems. The failure of such systems on account of electrolytic action may also involve various dangers to the life and health of human beings. According to the bureau of standards more than 25 separate and distinct methods of dealing with the electrolysis problem have been proposed and experimented with from time to time. Some of these methods are useless, or even harmful. The bureau of standards has been studying the subject of electrolysis mitigation for the last six years, and has aided in installing complete mitigative systems in several cities. The bureau makes somewhat detailed tests in each of these places about once a year to make sure that the protective systems are being properly maintained. An extended series of experiments has recently been undertaken in the city of Springfield, Mass., with the so-called three wire system of electric railway operation; a system which offers considerable promise for the mitigation of electrolysis troubles under certain conditions frequently met with in cities.

IT'S THE SAME OLD WORLD

Letters of Deserted Wife to Husband, Written 2,000 Years Ago, Unearthed in Ancient Ruins.

A wife's letter 2,000 years old was unearthed recently in the ruins of the Serapoum, the temple of Memphis, the great city of ancient Egypt. The letter was written by Islas to her husband, Hephaestion, who had deserted her. There were two letters, in fact, the first bearing a date equivalent to July 24, 160 B. C. In them the wife reproaches her husband for neglect of his family and, what is particularly interesting at the present time, she

complains of the high cost of living. Here are some extracts from the first letter: "Isias to Hephaestion, her husband. Greetings-If you are well and other things are turning out with you according to your wishes, it would be as I perpetually pray the gods. I myself am in good health, and the child and all in the house make mention of you continually. When I received your letter from Horus, in which you explained that you were in retreat in the Serapoum at Memphis, I immediately gave thanks to the gods that you were well. But that you do not return distresses me. For having piloted myself and your child through such a crisis and having come to the last extremity because of the high cost of corn, and thinking that your return would bring me relief, you have never even thought of returning or spared a look for my helpless state."

Happiness.

The true happiness is of a retired nature, and an enemy to pomp and noise; it arises, in the first place, from the enjoyment of one's self; and in the next, from the friendship and conversation of a few select companions: it loves shade and solitude, and naturally haunts groves and fountains, fields and meadows; in short, it feels everything it wants within itself, and receives no addition from the multitudes of witnesses and spectators. On the contrary, false happiness loves to be in a crowd, and to draw the eyes of the world upon her. She does not receive satisfaction from the applauses which she gives herself, but from the admiration which she raises in others. She flourishes in courts and palaces, theaters and assemblies, and has no existence but when she is looked upon .-Addison.

Pure Kaolin Is Rare. Pure kaolin or China clay is rare. It is mined in parts of Alabama, Delaware, Georgia, Massachusetts, North Carolina, Pennsylvania, South Carolina, Florida, Missouri, Tennessee and several other states. There are workable deposits of fireclays in 18 states, important deposits being in western Pennsylvania, in the coal-mining region of Ohio, in a belt across New Jersey from Perth Amboy to Trenton, in parts of Maryland, Missouri, Alabama and Colorado. Ball clay is mined in New Jersey, Kentucky, Missouri, Colorado and Florida. Brick clay of good quality is found in nearly every state in the Union. A very plastic clay, known as gumbo, is found in the Southern states.

Seagirt would not lie, I know, but he is dreadfully careless with the truth. He said that the horse he hired to go to Glenellen last summer was so slow that a spider wove its web in the wheel. Children came and made mud pies in the shade of the buggy. At one point he had an exciting race with a caterpillar. A woman came out and asked him to please drive a little faster, he was keeping the sun off her tomatoes. He said the horse was slower than a barber he knows, who is so slow that the whiskers grow faster than he can shave, and by the time he is through the customer has a full beard.-Exchange.

Horse Was a Little Slow.

SEEK CURE OF ELECTROLYSIS LOVE IN DARK CONTINENT

How Shadrach, Aged Twelve, Violated the Rules Against Courting at College of West Africa.

Although "courting" had been strictprohibited at the College of West Africa, Shadrach, aged twelve, tried to slip this note to his beloved lady one morning at chapel. But, alas for him! it fell into his teacher's hands,

says the World Outlook. "Dear Miss Louise: Simply thease few words hoping and trusting you are injoying the very best of help this p. m. I am writing you and asking you only a word about love. I want you to tell me if you really love me or not. My dear you must consiter over your mind you must not do like a bird up in the air. Ah the love I have for you. You don't know my heart and I don't know yours but I think you have some kind of love for me, miss. You know how love is deep it is so deep in my heart as the bird sings up in the air, but Louise you must not tell me any lie whatever you must tell me the truth, whenever you want anything, ask me and i will give it to you, but you know is not every day a man have money but i will try my best for you, oh you sweet heart you know how i love you because for your beauty. Ah I love you my dear louisest. You must not let candy by your love candy isnt anything what ever. If you want candy tell me and i will get it for you Louisest. O louisest do you here what i say to you if you dont understand what I have to say you must ask me if you dont understand and i will tell you, and again if you eat so much of candy it will rotting all your tooth out and how will you look then. ah dear I dont whant you not to have any tooth in your head so you must stop eating so much candy. You can eat some but not too much because it will make you sick, and darling i wont like to see you Sick if i could hear what Bishop --- say to you so he can carry you to America so you can learn some thing in live. dont let him send you up the river because i want you to be a woman in life and i want you' to promise me if you will ever remem-ber me even to the end of both of us and I will promise you the same. nothing more to say. yous truly boy. Shadrach."

CIRCUS PEOPLE FIGHT HARD

They Stop at Nothing When Engaged in Warfare Which Has Marked Business Since Early Days.

When circus people fight they stop short of nothing, according to one of them, Courtney Ryley Cooper, whose interesting experiences with circus wars are told in Everybody's. Some of the most "annoying" details are given at length.

"Sand finds its way into car journals, causing hot boxes and a delay in the arrival of the show trains. Poison sometimes gets into the meat that is fed to the 'principal' animal act, with the result that tigers and lions turn their toes to the sun and the circus loses one of its best acts. Wagon wheels come off mysteriously-it is easy to loosen the nuts of a wagon in the darkness of night on a circus lot. Health departments receive sudden announcements of epidemics among people or stock, and hold the circus until both can be examined. Working men are bought away, and delays created by every scheme and device. Fighting circuses have even accused each other of throwing railroad switches and causing wrecks. Taking it by and large, 'dirty opposition' is a gay and exciting existence.

"And where it all began is beyond the annals of circusdom. It was here before we came into the game. Grizzled old men around the stake-andchain wagon tell stories that were history when they were children. Years of warfare, then short spasms of peace and 'gentlemanly conduct'-such is the history of the circus from the time of Barnum. Then men called each other thieves and cutthroats and robbers and embezzlers and burglars through the newspapers, and the circus magnate who owned the most vitriolic press agent was by far the wisest showman."

Gun Cotton.

Gun cotton may be made as follows: Immerse cotton wool in a boiling dilute solution of potassium carbonate, wash with water, and then dry. Then steep for a few minutes in a cold mixture of one part of concentrated Atric acid and three of oil of vitriol, then squeeze, and again place in a fresh acid mixture and leave for 48 hours. Then squeeze and wash for a long time with running water, and finally steep in a solution of potassium carbonate. Gun cotton is insoluble in water, alcohol, and ether. It takes fire at 300 degrees Fahrenheit burning away rapidly but without explosion. When ignited in a confined space or by percussion, it decomposes with violent detonation, the energy of which equals that of five times its weight of gunpowder.

Don't Be Obstinate.

It is surprising how many people do not know the difference between obstinacy and firmness. Some persons feel uncomfortable over standing by their principles, for fear some one will think them obstinate, and others pride themselves on never making a concession to please anyone, and imagine they are beautifully firm. It is quite important to get the difference quite clear in your own mind, since firmness, is one of the most necessary virtues, and obstinacy one of the most serious ou's - Exchange.

LITTLESTOWN.

While instructing the girls of the High School in basket ball, last Thursday, Miss Lydia Rebert, Assistant Principal, fell on the play ground, badly spraining her ankle. Medical aid was administered and Miss Rebert was removed to her home in an

Because of a lack of water-power, the street car was delayed for three hours, on Sunday afternoon. car was stopped in about the middle of Hanover street, at 2 o'clock, and was not able to reach the Square until 5 o'clock. Many people were inconvenienced by the delay, some securing other methods of transporta-

After a short illness from a complication of diseases, Mr. John Staley died, Thursday morning, at 1 o'clock, at his home on Cemetery avenue. The deceased was aged 79 years, 7 months and 21 days. He is survivied by his wife and the following children: Mrs. Ernst Ohler, of this place; Mrs. Edw. Seasley, of near town; Mrs. Frank Unger, of Pennville; Miss Amanda Staley, of Taneytown; Mrs. Earle Miller, of York; Newton Staley, of Hanover; John and Samuel Staley, of Harney; and three sisters: Mrs. Wm. Anthony, Mrs. Rebecca Bowers and Mrs. Barbara Hesson, of this place.

At the Rally Day services, held at the Reformed Church, Sunday morning, it was decided to give kits to the following boys who have enlisted or been drafted from that church: Paul Crouse, John McGuinness, Ralph Sherman, Atville Hawk, Wm. Wilt, George Dehoff and Preston Snyder.

A canvass is to be made of the town for jellies, preserves and fruit butters for the Red Cross hospital at the Gettysburg camp. The boys get no delicacies, such as jellies and fruits unless they are donated by relatives or friends, and as they are especially desired and enjoyed during sickness, will you not all contribute as much as you feel able to, when the canvass is made.

It was necessary for secret service men to visit our town on Friday evening, in order to "round-up" some stray soldiers who had wandered out of the five-mile limit, and to look after the question of who is supplying intoxicating liquors for men in U. S. uniform.

Miss Lucinda Stair died at the County Home, at Gettysburg, Sunday evening, at 7 o'clock, when she was stricken with apoplexy. The deceased was aged 67 years. She survived by two brothers, James Stair

and Hamilton Stair, of near town. Miss Mary Crouse and niece, Miss Frances Zimmerman, of York, spent several days with Mr. and Mrs. Emory

Misses Naomi Simpson, Lottie Smith and Messrs. Stanley Stover and Maurice Reindollar spent Sunday at Camp Meade, Md.

Stanley Bankard, wife and son, Stanley, returned to their home in Detroit, Mich., after spending several months among friends and relatives in this place.

Arthur Wehler, of Reading, is visiting relatives and friends in this place and vicinity.

Preston Harner, wife and son, of Harrisburg, are spending some time among relatives in this place.

Mrs. Margaret Hilterbrick, of this place, and William K. Stitely, of Gettysburg, were united in marriage, on Saturday evening, at 7:30 o'clock, by Rev. F. E. Taylor, pastor of the Presbyterian Church, Gettysburg. and Mrs. Stitely will make Gettysburg their home, in the near future.

DETOUR.

A card was received from Amos Cushon, recently, saying he liked Camp Meade

Margare Smith, of New Midway, spent Sunday with the Misses Essick. Mrs. A. Fogle and Margaret Fogle, of

Baltimore, recently visited Mr. and Mrs. S. R. Weybright. Belvah Flanagan, of Woodsboro, visit

ed Mary Renner, over Sunday.

nickle and wife, during the week were:
Mr. and Mrs. Harry Boone and family,
of Johnsville; Mrs. L. F. Miller and son,
Maurice, of Philadelphia; Mr. and Mrs.
Elmer Buckey, of Littlestown, Pa.
Mrs. Jane Delaplane, of Troutville,
spent Sunday with E. D. Diller and wife.
Phoebe Grossnickle, visited her sister

at Westminster, during the week, and attended the York Fair.

Mrs. S. Edna Myerly, wife of Jacob Myerly, of Detour, died at the Frederick City Hospital, Friday, at 4 o'clock, aged 25 years, 5 months and 8 days. Her husband and two enildren. Earl and May, 5 and 3 years old, survive her, besides her parents, Mr. and Mrs. G. S. J. Fox, of Detour, and a brother and sister, at home

Mrs. Myerly's death came as a shock to the community, as she was taken sick on Thursday, and was removed to the Hospital, Friday, at noon, and died Friday, at 4 o'clock. She had many triends and relatives in this section, as here she lived during her whole lifetime. Although it is very sad that she had to go so young we must feel consoled when we remem ber "God doeth all things for the best.

The funeral services were held at Rocky Ridge, Mt. Tabor Lutheran Church, of which she was a member, on Monday. Interment in adjoining cemetery.

HARNEY.

Leander Hesson, of Baltimore, who has been spending a few days with his brother, J. D. Hesson and wife,

has returned home.
Misses Helen Wisotzkey and Margaret Thompson, of Littlestown, Pa., spent a few days with John J. Thomp-

on and wife.

MRS. JACOB MYERLY.

Mrs. Sarah E. Myerly, wife of Jacob Myerly, of Detour, died Friday afternoon, at 4 o'clock, at the Frederick City Hospital, following an operation. She was aged 25 years, 5 months, 8 days. Besides her husband, her parents, Mr. and Mrs. Granville Fox, of Detour, two children, aged 3 and 5 years, survive her. The funeral was held on Monday, at Mt. Tabor Church, Rocky Ridge.

WASHINGTON ROTH REAVER.

Mr. Washington Roth Reaver, son of the late Mr. and Mrs, Joseph M. Reaver, died at the home of his sister, Mrs. Charles Hoffman, in this district, early Monday morning, from typhoid fever, aged 30 years, 6 months, 3 days. Funeral services were held at the home on Wednesday afternoon, by Rev. L. B. Hafer, and burial took place in the Lutheran cemetery, Taneytown.

He is survived by his step-mother, Mrs. Rebecca Reaver, of Taneytown, and by the following sisters and brothers: Mrs. Charles Hoffman and Mrs. Frank Null; Milton Reaver, near Harney; Robert. of near Kump; Samuel, at Kingsdale, and Oliver and Roy, in Littlestown.

DAVID JOHN WOLF, JR. David John Wolf, Jr., son of Rev D. J. and Mrs. Wolf, of Apollo, Pa. fell asleep in Jesus as the morning sun was rising over the eastern hills on August 27th. Never had a child more promising prospects for the future than little David. As a boy, he had a fine physique, rosy cheeks and robust in health, a bright and interesting child, beloved by all; but in his eighth year he passed through a severe siege of inflammatory rheumatism, which affected his heart, which eventually was the cause of his going from us.

Only six days before his passing away he celebrated his 16th birthday anniversary. His transition from the Church militant to the Church triumphant was peaceful and serene, going while asleep and without a strug-

On Tuesday evening services were conducted in the parsonage, at which time all the local ministers of Apollo were present, and each spoke words of comfort. The members of the congregation and other friends expressed their love and sympathy in many ways. Their floral tributes were beautiful and expressive. All the various organizations of the congregation had their tribute to accompany the remains, which were taken the following day to Center Hall, where on Thursday morning another service was conducted by Rev. R. R. Jones, who on the words of St. Paul: "All things shall work together for good to them that love the Lord," after which the body was laid to rest in the beautiful cemetery at the base of the Nittany Mountain, among those of his kindred, to sleep in peace till "The Day of the

He is gone from us young in years, but his memory abides to bless us still, and we are stronger and better because he was with us for a time, and heaven is nearer since he left us.

EMMITSBURG.

Miss Margaret Saffer, aged 17 years, died at her home early Tuesday norning. She is survived by her mother, Mrs. Grace Saffer, and one brother, Albert, who is engaged in the Emmitsburg Savings Bank. Her funeral took place Thursday morning, from St. Joseph's Catholic church,

Rev. J. O. Hayden officiating. On Tuesday morning, Mrs. Miles Rowe was stricken with paralysis,her entire right side is effected. She and her daughter came here about a year ago and intended returning to New York the day she was stricken. She is a daughter of the late Edward

Miles, of this place.

GOODYEAR LIQUID ROOFING CEMENT.

A NEW METHOD FOR WEATHER PROOFING WATER PROOFING SUN PROOFING

Goodyear Liquid Roofiing Cement is a heavy paste cement applied with a brush, for metal, composition, shingle or gravel roofs. Of long fibre asbestos and gum, it is always of the right consistency for application. It works easily under the brush.

It does not remain soft and sticky nor does it dry hard and brittle but dries to a pliable plastic coating that will resist heat and cold, snow, ice or any of the elements that destroy common roof coating. It contains no coal tar or other injurious substances.

Goodyear Roofing Cement is Guaranteed 10 years

Each gallon will cover about 150 square feet, leaving a good heavy coating which contains enough asbestos fibre to form a complete web coating over the entire surface covered. It is sold with a written guarantee to give entire satisfaction for 10 years.

Prices: Black, \$1.50 per gallon; Green, \$1.60 per gallon Makes an old roof new. Investigate now!

SHALL HYPOGRISY AND DOUBLE DEALING WIN IN MARYLAND?

PROMOTERS OF ANNEXATION BY FORCE ARE TRUE TO NEITHER PARTY

Having caused the Republican Convention to reverse itself upon the Annexation plank in its platform of two years ago, which plank declared in fayor of annexation with a referendum to the people affected, in accordance with the Constitution of the State, and is said to have been approved, if not prepared, by Chief Judge of the Supreme Bench of Baltimore City Morris A. Soper, then holding that office by appointment of Governor Goldsborough and a candidate for re-election for the full term, they are now supporting Mayor Preston's Democratic nominees in the city, after having made the city candidates sign a repudiation of their party's platform.

THIS IS APPARENTLY IN PURSUANCE OF A PLAN OF CONQUEST, WHICH WILL GIVE THE POLITICAL RULERS OF THE CITY CONTROL OF THE STATE

By grasping one-half the population and taxable basis of Baltimore County and the richest and most populous part of Anne Arundel County through the Preston-Field Force Bill without a referendum, and then securing control of the Police and Liquor License Boards and passing a constitutional amendment giving the city proportional representation in the Legislature they can reduce the remainder of the State to the condition of a dependent province.

FROM 70,000 TO 100,000 PEOPLE IN THE TERRITORY PROPOSED TO BE ANNEXED ARE MADE THE PAWNS IN THIS POLITICAL GAME.

The Democratic Party has declared in favor of annexation by a bill that would be fair alike to the city, the territory to be annexed and the remainder of the counties affected, on condition that the same be referred to the voters in the territor, proposed to be annexed, in accordance with the provision of the Constitution of this State. This provision was written into the Constitution by the Republicans themselves, in 1864, and was recognized by them as necessary so lately as their convention of 1915, when they declared that a referendum was required for any annexation.

MAYOR PRESTON, FOLLOWING HIS "RULE OR RUIN" POLICY, IS MAKING A CATS-PAW OF THE REPUBLICAN PARTY TO DEFEAT THE DEMOCRATIC CANDIDATES FOR THE LEGISLATURE AND THE DEMOCRATIC CANDIDATE FOR COMPTROLLER, SO THAT THE CITY OF BALTIMORE WILL BE ABLE TO ASK AND RECEIVE SUCH REP-RESENTATION IN THE STATE CONVENTIONS OF BOTH PARTIES AND IN THE LEGIS-LATURE AS WILL ENABLE IT TO DOMINATE THE GOVERNMENT OF THE ENTIRE STATF. DO EITHER THE DEMOCRATS OR THE THINKING REPUBLICANS OF MARY-LAND, WHETHER OF THE CITY OR THE COUNTIES, WANT THIS, IN THE LIGHT OF PAST HISTORY?

THE BALTIMORE COUNTY NON-PARTISAN CITIZENS' PROTECTIVE COMMITTEE.

EXECUTOR'S SALE OF

Valuable Farm and 3 Wood Lots

By virtue of the power and authoricontained in the last will and testament of Leonard Zile and of an order of the Orphans' Court of Carroll County, the undersigned as executor of Leonard Zile, deceased, will sell at Public Sale, on the farm firstly, hereinafter described, on

THURSDAY, OCTOBER 18th., 1917. at 1:30 o'clock, P. M. First all that valuable farm of which Leonard Zile died seized and possessed situated on Meadow Branch, in Uniontown District, in Carroll County, containing

100 ACRES

more or less, same being described in a deed from John Zile unto the said Leonard Zile, dated March 24th., 1865. This farm is improved by a good substantial 8-room, brick house, with basement and cellars; large bank with wagon shed atta shed, large hog pen, completely cemented; chicken house, corn cribs, large grain barrack, three wells of good water, ochard of all kinds of

There is about 20 acres of meadow land which affords excellent pasture and the remainder is in the highest state of cultivation, and is altogether one of the very best farms in this section of the State.

Second: A tract of land containing 20 ACRES

more or less, being part of the land described in the above named deed, PRIVATE SALE containing about 9 acres of Oak and Hickory timber, the rest is cleared and in a high state of cultivation. TANEYTOWN PROPERTY This lot will be offered as a part

of the farm above described and also separate and will be sold at the best advantage to the estate.

Third: A wood lot containing 3 ACRES, 3 ROODS and 19 SQ. PRS. of land, described in a deed from Harry Rinehart, Trustee to Leonard Zile, dated March 15th., 1909, located near the road leading from Hughes' Blacksmith Shop on the State Road to Pleasant Valley. This lot has growing young timber on it, and is desirable as a wood lot.

easily be made for two families. Fourth: All that wood lot contain-Possession will be given April 1st.,

6 ACRES and 18 SQUARE PERCHES of land, more or less described in a deed from James Robertson, et. al., attorneys to Leonard Zile, located road from Westminster to Warfieldsburg and adjoining the farm of James Robertson, Elias Reaver and others, and is covered with chestnut and oak timber.

TERMS OF SALE: One-third cash on day of sale, or upon ratification of sale by the Court; one-third in six months and one-third in twelve months from day of sale, credit payments to be secured by the notes of the purchasers with approved security bearing interest from day of sale or all cash at the option of the purchas-A reasonable deposit will be required of purchasers on day of sale.

Repair Worn Machinery.

The great outcry for farm production and the scarcity of machinery points to the need of some way to repair a great many implements that are now useless largely because of the neglect with which they have been treated, says the United States Department of Agriculture, which adds that the machinery manufacturers and their local sales agents should help to perform this repair service.

Throughout the country there are thousands of binders, mowers, and other farm machines rusting in the fence corners, and many of these might be made available for further valuable service. The manufacturers of farm machinery are admittedly unable to furnish all the new machines required and are paying for fulltransportation in competition with

the demand for machines of war. The railroads of the country, acgency to rescue practically every tive service. A similar plan should the reclamation of this cast-off farm equipment through the agency of central repair shops where the work could be done. Many of the machines might be made available for further service with repairs of comparatively

small cost. Added to the almost sinful carelessthe attitude on the part of farm machinery manufacturers in years past to favor the abandonment of worn and disabled machines in order to sell new ones; but now the time has arrived when it is difficult to supply the market with the necessary new machinery. The department suggests that representatives of the manufacturers, on the one hand, and of the farmerssuch as farm bureau agents or county agents-on the other hand, should get together to establish the necessary farm machinery repair stations in convenient localities.

Less grain can be fed by many dairymen without reducing milk production, provided they feed more silage and legume hay. will be available for feeding to cattle, for much more than usual is needed now for human food, and the emergency demands that every effort be made for its conservation. Milk production must be maintained -hence, every effort should be made to substitute other feeds for grain in the dairy ration. To do that the silo will help

Silos Save Grain.

Fruits and green vegetables are canned so as to supply succulent and palatable foods to the family during the winter. Succulence is just as essential to the cow as to a human being. The abundant milk flow obpage advertisements to influence tained from June pasture, to a large governmental authorities to insure them necessary raw materials and grass. Silage provides succulent feed during winter when pasture is not available. With silage in the ration dairy cattle can be kept in the cording to one of their officials, are being compelled in the present emertem of a cow is well suited for the scrap locomotive from the old-iron utilization of large quantities of graveyards and rebuild them for acgreen grasses and other coarse, succulent material. Silage is palatable be adopted, says the department, for and no other feed will combine so well with dry hay and a little grain to produce maximum economical results.

"Siloing" is an excellent way of preserving the mature corn crop or of saving one which for any reason must be harvested before maturity. 40 percent. of the total food material ness of some farmers there has been in the corn plant is in the stalks and leaves. When the farmer harvests only the ears he loses nearly one-half of the crop; on the other hand, when the crop is put into the silo the losses are very small. When drought, frost, or insects attack a field of corn before it is ripe, the entire crop may be lost unless the farmer has a silo ready in which to preserve it.

No feed crops can be so successfully harvested under widely varying conditions as those that are put into the silo Only in case of drought or frost is it necessary to rush the filling of the silo; rain or dew on the forage does not injure the silage The silo at all times, and particu-

larly now, offers to the farmer one of best means of reducing his feed bills The present great national emergency places these questions before every farmer who keeps cattle: Hav you a silo? If you have not, your herd is not most economically fed; why not build a silo and fill it before frost comes? If you have one, is it big enough to supply all the silage your cattle can eat before the next crop is harvested? If not, build another You can buy one ready to erect, or you can build it yourself. Home-made silos of concrete or wood can be erected with little trouble.

Call on the extension department of your State Agricultural College for advice or write to the Dairy Division, United States Department of Agriculture, for bills of material, with full specifications for silos of differcapacities .- U. S. Dept. Agriculture.

Prehistoric Japanese Canoe. Workmen engaged in the dry river

bed of the Namazue-gawa, Osaka prefecture, have unearthed a huge canoe made of camphor wood. It has not yet been completely uncovered, but the part so far dug out measures over 40 feet in length, 6 feet in width and 26 inches in depth. There are traces of the canoe having been colored blue.

According to archeologists the canoe is about one thousand years old, and renew & next though several similar canoes have been discovered in various parts of the country, nothing like the present one in size has been found.—East and West News.

THE VOICE OF AUTHORITY.

"Did anybody call me while I was out?" asked Mr. Gadspur.

"Yes, sir," answered the office boys "A lady did."

"A lady, eh?" "Yes, sir. But I think it was Mrs.

Gadspur." "What did she say?"

"She said, 'Is that Green Hill four four-seven-three?' Then I said, 'Yes sum.' Then she said, 'Summon Mr, Gadspur to the 'phone at once.' " "Ahem. Yes, that was Mrs. Gade

A Slap at Her Complexion. "Is it true that Mrs. Dubwaite and Mrs. Twobble are no longer on speaking terms?"

"Yes. I fear the breach will never be healed."

"What did they fall out about?" "They met on the street one day, Mrs. Dubwaite said to Mrs. Twobble 'My dear, how do I look?' Mrs. Twobble kissed her effusively and said: 'My dear, you are a work of art!"

A Faux Pas.

"I've lost confidence in that fortune teller."

"Why so?" "She said I was going to inherit

money. "Maybe you will some day." "But after I had paid her fee, she forgot that she had already told me

my name was Jones, and called me 'Mr. Green.'" WRONG DIAGNOSIS.

"My dear friend, can you loan me two hundred dollars? I have just recovered from an operation for appendicitis.

"Appendicitis! Your doctor doesn't, know his business. He should have operated for gall stones."

Inconsistent.

The pretty girl is willing quite,
Proposals to extort;
Yet she wants no man very long,
Nor will she have him short.

"Once let a man with a thimbleful of brains get the idea that he has an analytical mind, and he is the greatest bore on earth."

"I know a greater bore than that." "Name him."

"The fellow without even a thimble ful of brains who thinks he has an analytical mind."

Had a Grievance. "Where are your manners, sir?" asked the crusty business man of a stranger who unceremoniously rushed

into his private office. "I left them out in the main office," answered the irate caller, "where I was insulted by two or three of your impudent clerks."

"LONG-GREEN" WORM.

appendix is a worthless organ." "Oh, I don't know. It's worth about two million a year to the medical profession."

No Great Danger. "Oh, kissing does upset me," Declared coquettish Sue. Quoth he: "You'd better let me,

We're not in a canoe." Brief Interval.

"And how long is that?"

"A few weeks."

"I met Jagsby just now. He told me he was 'off for life.'" "He means the life of a housefly."

Keep Trying.
A man cannot always tell when he

reaches the door of opportunity." "That may be true, but the fellow who tries every door he comes to will open one sooner or later."

Expert Demoralized.

has to play croquet with his aunt.

George Starkweather's Mission

A Story of Secret Service In the World's War.

By F. A. MITCHEL

George Starkweather was dressing for dinner at his hotel in Rome when a stranger entered his room and closed the door behind him. Starkweather looked at him, indignant at this cool trespassing.

"Why do you enter my room without knocking?" he asked sternly.

"Because I do not wish to be seen entering your room. I chose a moment when there was no one in the corridor. and it was essential that I should lose no time. Signor, you are wanted at the Quirinal palace.

"I-at the palace?" "Yes, signor, and I am ordered to take you there without your going being known. As soon as you have finished your toilet go down and out. You will find a cab standing by the sidewalk. Enter it and tell the cabman to drive you to the Plaza de Venetia. He will take you to the pal-

"But why this mystery?" "There are spies watching the movements of every one who has any communication with the government. That is all I can tell you now. You will soon know the rest. May I trouble you to look out into the corridor and advise me when it is empty?"

Starkweather did as requested and presently reported that the coast was clear. The stranger went out, and George finished dressing. While doing so he was wondering what this summons to the king's palace meant. He was an American traveler who had gone to Italy some six months after the breaking out of the world's war to see for himself how things were going. He knew no one in Rome except an American lady who had married an Italian who now held a portfolio in the cabinet. But he could not see why this acquaintance should cause him to be summoned by the king.

When Starkweather had finished his toilet-he put on ordinary clothes instead of evening dress-he went to the dining room, partook of one course of the table d'hote, then went out and got into a cab which he found waiting for him. He saw there the man who had entered his room unbidden.

"You have been a long while, signor," said the stranger, "in finishing your toilet. You do not seem to hesitate to keep his majesty waiting."

"If the king calls for me," replied George, "when I am about to dine either he or my stomach must wait. Since I am an American citizen, not a subject of the king of Italy, I do not feel compelled to sacrifice my stomach

When they reached the gates of the palace grounds they passed in through nes of onards and alighted at a side entrance of the building. Starkweather was conducted to a room in which sat the king and his prime minister. At his entrance both rose and greeted the American in a friendly manner.

"Mr. Starkweather," said the prime minister in fair English, "Signor Baroni, whose wife is a countrywoman of vours, has suggested you as one fitted to carry a message from his majesty to France. Would you be willing to oblige us by doing so?"

"I am at a loss to know why I am selected for such a purpose," replied Starkweather.

"You are an American, thus far a neutral in this war. Therefore you will not be so likely suspected of bearing a message from the Italian government. For you must know that the central powers are watching us keenly to know what we are going to do and, if we enter the war on the side of the allies, to know it at the earliest possible moment. Were we to send an Italian or one known to be in our confidence it is quite likely that the message would be stolen from him before he had crossed the border. We hope by using an American who has not been previously known to us to throw the spies off the track.

"If we are neutral the allies can move a million men they now hold to oppose us against the central powers. Here is a dispatch notifying the French premier that Italy will remain neu tral. It must be delivered with the utmost dispatch, and the central pow ers must not know of our policy.

"You are to carry the dispatch to Edward Bruson, who is waiting for the king's decision in Lucerne. will instruct you as to the best means of reaching Paris.

It was suggested to Starkweather that the cab in which he had come to the palace would be watched on its return, and he was advised not to use it further. It was dismissed, and that night the messenger left the palace by a private exit, entered his hotel by a rear door and, having thrown what articles he needed for his journey into a lightweight suit case, left the house in the gray of the morning when no one was about, proceeded to the railway station on the Esquiline hill and took a train leaving for Milan.

It did not seem to the American that after such precautions any one except those who had dispatched him could know that he was on a mission, prob ably the most important to France to the world, that had ever left the Italian capital. He did not know the power of the spy system of the central powers, which in this case was operated by the Austrians. The man who had taken him to the palace was shadowed, and Starkweather's movements from the moment he left his hotel to go there were known to those who were intrusted to report to Vienna every movement of the Italian gov-

Starkweather reached Lugano, a resort for tourists at the foot of the southern slope of the Alps, before being obliged to halt. At Lugano he was obliged to stay over till the following morning. He asked the landlord of his hotel how he could kill an evening and was told that the kursaal, or casino, was open, though since the war it was not much frequented. He went there and found a small orchestra, refreshments and a number of patrons. Seating himself at one of the tables, he called for a liter of wine and a cigar. He had listened to several pieces from the orchestra when a couple entered and took a seat at a neighboring table.

The man looked like a German or an Austrian: the woman was dark complexioned and appeared to be French. At any rate, she spoke French to the man, whose accent was Teuton-

ic. She seemed very ill at ease. Presently the man arose from the table and went to the cashier's desk. He had no sooner left the woman than she leaned toward Starkweather and

"Monsieur, are you French?"

"No, madame; I am an American." "I am French and am trying to get to France. This man is trying to head me off. For heaven's sake, help me!"

The woman's companion at this moment turned and, seeing her thus speaking to Starkweather, glared at him, returned at once to her, and together they left the kursaal.

An American gentleman is nothing if not a defender of woman. Starkweather longed to assist this one, but did not know how to go about it. Besides, he considered the responsibility he had assumed in bearing the king of Italy's message quite enough for him to attend to without getting into trouble with a Teuton who was tyrannizing over a lady. He therefore resisted an impulse to follow the couple and endeavor to afford the poor woman another chance to communicate with him. He sat where he was till he had finished his cigar and his wine, then returned to his hotel and went to bed.

The next morning at the railway station one of the uniformed attendants who carry hand baggage for travelers snatched at Starkweather's suit case and wrenched it from his hand. The American, who was something of an athlete, sent the man sprawling with his fist. A crowd was collecting when Starkweather jumped on the train, which was moving out. He had not carried his dispatch in the case, but the incident warned him that wherever it was it was in danger. Looking out of the coach window, he saw the man he had knocked down running after the train. But he had been bruised, and the train had achieved a good headway, so he was unable to catch it.

As soon as Starkweather had become composed after his fracas he looked about him, and there sitting in a seat at the other end of the compartment was the woman who had appealed to him at the kursaal the previous evening. She smiled at him, and he took a seat beside her. She told him that she had succeeded in eluding her persecutor and had reached the station and boarded the train.

During the day the train sped through a valley in which dashed a stream. Early in the afternoon the famous St. Gothard tunnel was reached, to pass through which some fifteen minutes are consumed. Starkweather conversed with the lady, who informed him that she was on secret service for the French government. When the tunnel was reached Starkweather was surprised to notice that the lamp in the top of the car was not lighted. Why it was not he could not explain till after having passed through the tunnel, and even then he did not know how the failure to light it had been

When the train entered the tunnel Starkweather was sitting in his own seat at some distance from the lady. Being plunged in total darkness, he naturally placed his hand on his dispatch which was in the left side coat pocket, directly over the heart. The train had not been in the tunnel a minute when he felt a pair of viselike arms about his chest, pinioning both his own arms. Then he was held by one arm of his assailant while the other hand was thrust under his coat and grasped his hand which held the dis-

It was Greek meet Greek. Starkweather's grip was of iron, and his adversary's was of steel. But Starkweather had the advantage of holding the dispatch, though he was not in training for such an encounter. His

opponent finally clutched his throat. Starkweather before leaving his hotel had picked up a stiletto he had bought for a curio and hung it. American plains fashion, to the back of his neck. He just had time before losing consciousness to free one arm, draw

the stiletto and stab in the dark. When the train shot out into the light, revived by fresh air he saw the woman who had appealed to him for protection lying on the floor in a pool of blood. But her disordered apparel showed under it the clothes of a man.

Starkweather climbed out of the window on to the footboard, and as the train slowed up at the station near the mouth of the tunnel he jumped down on terra firma and ran like a deer.

At the time the world wondered why France took away her troops from the Italian frontier, sent them against the Germans and saved Paris. Now it is known that the prime minister of France received the message of the king of Italy at midnight and at once set free the troops held on the Italian Ephemeral Slang.

A man in middle life recalls the slang of his boyhood with some such indulgent wonder as that with which an elderly woman looks at the fashion plates of her early youth-"snide," "cheese it," "straw Katy," "spoony," "chestnut," or even those of more recent coinage—"snap," "skiddoo," "twenty-three," "30 cents." They were artificially charged with meaning, and their effervescence is irretrievably gone. "Lemon" and "lobster" are nearly as flat. With disappearance of a certain kind of early Victorian prudery has gone the vogue of such terms as "inexpressibles" for trousers. Du Maurier's once famous novel has almost reached the vanishing point in the perspective of time, and we no longer speak of feet as "Trilbys." It is not safe, however, to prophesy that because a word comes from a proper name it will fade as fades the fame or notoriety of the person. We have forgotten what "Edgarism" is, but "Fletcherize" may yet make Fletcher immortal, even as "derrick" preserves in the dictionaries the name of a once famous hangman .-Robert P. Utter in Harper's Magazine.

Not a Word Waster.

Sir William Grant, the learned master of the rolls, was a native of the county of Banff and for a considerable time represented that county in parliament. Though a forcible and easy speaker, scarcely inferior to any of his time at the bar or in parliament, he was a remarkably silent man, says the Farm and Home. He was the most patient of judges. The story is well known of his hearing an elaborate argument for two days on the meaning of an act of parliament and when the counsel finished simply saying, "Gentlemen, the act is repealed." On one of his visits to Banff he rode out a few miles into the country, accompanied by a few friends. The only observation that escaped from him was in passing a field of peas. "Very fine peas!" Next day he rode out with the same cortege and was equally silent, but on passing the same spot he muttered. And very finely podded too!"

Music and Its Trinity.

What we call music is well described as a trinity. The three components are rhythm, melody and harmony. Rhythm s to music what the will is to the individual. The rhythm of music is its physical side, just like the body or flesh of the human being. Melody in music parallels the heart (or blood), a component part of the individual. Harmony is the soul of music just as feeling is the soul of the human being (also ossessed of a three fold nature.) The triple elements in music are represented in the history of the world first by the drum (rhythm); second, by the lute (melody), and third, by the lyre (harmony). Music lays its first hold on the human understanding by its rhythm. All men are influenced by it (even savages). And every soldier (with or without an ear for music) can appreciate the tap, tap of a drummer boy's drum and can march longer and better for it. -Philadelphia Record.

Be Canny. Home preparedness—cans loaded with

That rubber ring you put on a pre-

The awful question "What shall I have for dinner?" is easily answered if your shelves are full of home canned products.

Can't eat 'em all in summer? Not enough in winter? Home canning is

the answer. You put a lid on waste every time you seal a preserving jar.

Canned berries are bird proof. Frost doesn't nip canned vegetables. Canned green peas and yellow peaches help fight the blues.-New York Globe.

From Private to Private Life.

A little known episode in the career of the dethroned czar. Nicholas II.. was his period of service in the Russian army as a common soldier. He submitted to all the restrictions placed on an ordinary private, saluting his officers and carrying his full equipment with the rest. On the regimental roll he figured as "Private Nicholas Roma-noff, of the Orthodox faith, coming from Tsarskoe Selo."

Two Questions.

"Why do you weep over the sorrows of people in whom you have no interest when you go to the theater?" asked

"I don't know," replied the woman. 'Why do you cheer wildly when a man with whom you are not acquainted slides to second base?"-Exchange.

An Evident Alternative. "She married him in spite of great opposition, didn't she?"

"Yes. If her marriage doesn't turn

out well she'll only have herself to "Good gracious! Why? What's to prevent her blaming him?"

"Smith could never misrepresent his goods, for such a trick could be easily seen through.' "What kind of goods does he sell?"

"Just a fancy name for cussedness."

Whether or not we have to look back to the fifties for the first matinee, there is at least little doubt that the invention had not attained any general popularity when the seventies were reached. I am reminded that the Bancrofts, who were responsible for many innovations that have since become the vogue, did not institute afternoon performances until 1876, after they had been in management eleven years. The Bancrofts, if not the inventors of the matines were certainly the first to pay full sal-

aries to those who took part in them. Not until 1878 did the matinee be come a fixed and regular feature of even the Bancroft management. It was a byproduct of "Diplomacy," the success of which made any means of providing additional performances ac ceptable. Sir Squire Bancroft has put it on record that at the beginning the matinee was a much more costly affair than it is now, as frequent and separate advertisements and announcements were necessary to make it known .-Westminster Gazette.

A Defect In Higher Education.

It must be said that the higher education of the United States is at present in a condition where it may readily drop backward rather than improve. The college student of today and in some cases even the university student is permitted to sprawl over so large and so varied an area of intellectual interest that he loses the discipline in concentration, in hard work, and in the mastery of some relatively small field that comes from pursuing a better and older method. There is just now, however, a marked tendency among the better colleges to aid and to guide the student toward concentrating his interests and his energies upon a small group of subjects that have some common center of interest and some well marked relationship. This movement is a sound and hopeful one and should be encouraged and aided .-President Butler in Youth's Compan-

Salt Means Much to Health. "If the human race should be deprived of salt even for a period of a few months," said a physician, "we would not only lose a natural healthful incentive for our food, but disease, with all its attendant miseries, would spread with such relentless speed as to defy the efforts of the most skillful doctors of the land. Ailing persons frequently refuse sugar, but they seldom turn up their noses at common salt. That is because there is in the body a deficiency of chloride of sodium. and nature intuitively excites the de sire for it. Salt is essential to health and life and is as much a food as bread or flesh. If there is no wish for salt in a person doctors uniformly conclude that disease in some form is lurking unsuspected in the system."

Obliterating Class Distinctions. Modern and cultured persons, I believe, object to their children seeing kitchen company or being taught by a woman like Peggotty. But surely it is more important to be educated in a sense of human dignity and equality than in anything else in the world. And a child who has once had to respect a kind and capable woman of the classes forever. The true way to overcome the evil in class distinctions is not to denounce them as revolutionists denounce them, but to ignore them as children ignore them .- G. K. Chesterton.

The Spanish Alcalde.

In former times in Spain the alcalde de corte was a judge of the palace court, having jurisdiction in and about the residence of the king. The office is now obsolete in this sense, but "alcalde" is still used to designate the mayor of a town exercising the functions of a justice of the peace.

Why He Looked Sour.

Dusty Dennis-Why do you look so sour, pard? Gritty George-Why, one of dem comic artists wanted me to sit on de fence and let him sketch me. Dusty Dennis-What of dat? Gritty George-It was a barb wire fence .-Exchange.

News to Her.

"What was the farmer talking about?" asked the first city girl. "A whiffletree," said the other.

"Well, I've studied botany, but I never heard of a whiffletree. Sounds like his idea of a joke."-Louisville Courier-

PRACTICAL HEALTH HINT.

Flat Foot.

A treatment suitable, with but slight modification, for all cases of static foot trouble (flat foot). from the early cases which are often described as "weak ankles" to the most severe cases, where there is old standing structural change, is described by Dr. P. B. Rath in the Lancet. The treatment consists of attention to footwear, attention to position in standing and walking and regular daily exercises. Whether boots or shoes are worn, whether they button or lace, they must be the shape of the feet. The inner side of the boot where the big toe lies is kept straight, so that the end of the boot is opposite the big toe and not opposite the second or third toe. This is to insure that the big toe is not pushed out against the other toes and has plenty of room in which to act. The soles should be a sixth to a fourth of an inch thick, the heels broad, an inch or less in beight.

SUNDAY

Lesson II .- Fourth Quarter, For Oct. 14, 1917.

THE INTERNATIONAL SERIES.

Text of the Lesson, Ez. i, 1-11-Memory Verses, 2, 3-Golden Text, Ps. cxxvi, 3-Commentary Prepared by Rev. D. M. Stearns.

The seventy years captivity of Judah had begun to come to an end, but as it required eighteen years to complete their captivity in the reigns of Jehoiakim, Jehoiachim and Zedekiah we may expect the restoration to cover some years and be accomplished by different companies returning at different times. The first company was taken captive in 606 B. C., and this first company of returning ones was, according to the date at the top of the page in my Bible, 536 B. C., or just seventy years later. The times of the gentiles began with Nebuchadnezzar, in the first year of his reign, when he carried away the first captives, and just 2,520 years later, or in our 1914, the times of the gentiles seem to have begun to come to an end by this great European conflict, but whether it will take eighteen years more or less to complete their ending, we must wait to see.

It is the Lord working everywhere and at all times, and working always His purpose after the counsel of His own will (Eph. i, 9, 11). He said through Jeremiah that the captivity would be seventy years, and He said through Isaiah that He would raise up a man called Cyrus to lead in the restoration, and he called him by name about 200 years before he was born (Jer. xxv, 12; Isa. xliv, 28; xlv, 1-3). He is one of the seven men in the Bible mentioned by name before they were born. Compare the last two verses of Chronicles with the first three verses of our lesson and note how they are almost word for word the same, and remember that a repetition by the Spirit demands from us very special attention. Some of the great truths to be specially noted here are that the Lord God of heaven gave Cyrus his kingdom, and told him to build the house of the Lord at Jerusalem, and stirred up his spirit to do it, and to make proclamation throughout all his kingdom that all who were willing might go up to Jerusalem to build the house and that those who did not go should help those who did go with silver and gold and goods and beasts, besides the free will offering for the

Many mourning, homesick ones among the captives may possibly have given up all hope of ever returning, or if reminded by a few who did not forget the words of Jeremiah that the Lord had said they would return (for there are always a few believers like the Simeons and Annas at the time of our Lord's birth) they probably said it can never be, or how can it ever be? There are always many even among the Lord's professed followers who have no use for those who take the word of God literally, but His word stands in spite of all the scoffers and unbelievers and shall be literally fulfilled in His time.

Daniel had been a captive all through the seventy years, and he tells us that about this time, because he had been studying the words of Jeremiah, he gave himself to prayer and fasting, with confession of the sins of himself and his people, and earnestly asked God to forgive their sins and to remember Jerusalem. That prayer brought Gabriel from heaven to Daniel before he had finished praying to tell him of the Messiah, His suffering and glory, and of the time of a greater restoration than the approaching one from Babylon, when his people should be forgiven their iniquity and obtain everlasting righteousness (Dan. ix). It is just as difficult to get people to believe God now as it was then, and all the talk today is men and munitions, and who shall win in the great conflict, and how peace can be brought about, but the thought of the Lord interfering and doing something does not enter many minds. Yet it is written: "Our God shall come and shall not keep silence. A fire shall devour before Him, and it shall be very tempestuous round about Him." "Behold the Lord will come with fire and with His chariot, like a whirlwind, * * * for by fire and by His sword will the Lord plead with all flesh" (Ps. 1, 3; Isa. lxvi, 15, 16). In His time He will surely do this and all else that He

The commission of our lesson was to build a literal house of the Lord at Jerusalem, and note in lesson verses 5-11 what abundant, willing provision was made for it and how Cyrus, the king, helped. The building that is now going up and is steadily growing is the church, the body and bride of Christ, to reign with Him when He shall come in His glory to set up His kingdom and make wars to cease in all the world. The church must be completed and be caught up to meet Him and the marirage of the Lamb take place before He can come in His glory. What are we doing to help build the house? Every soul won to Christ in any part of the world causes joy in the presence of the angels and helps to complete the church. Nothing else is really worth while compared with giving the gospel to those who never heard it, for only by the gospe can souls be saved, and those who have it possess it as a trust committed to them for which they must give an account (I Thess. ii, 4).

has purposed, and it may be soon.

SCHOOL TOUCH OF

Chinese Influence on Clothes Especially Noted This Season.

Negligee Garments Tendency Is Even More Pronounced Than in Outdoor Frocks.

The vogue for things Oriental is strong this season. The Chinese influence on clothes is especially noted. Many modish garments for daytime wear carry a Chinese note, minor or otherwise, in the color blending, decoration, etc., but in negligee garments the tendency to favor these things is

even more pronounced.

The sketch illustrates a boudoir suit combining a richly embroidered little mandarin coat and comfortable little ankle-length trousers cut after the Chinese fashion, quite straight and innocent of flare, frill or fullness. The coat proper may be Chinese blue satin embroidered in dragon, bat or other design in metal threads, the coat banded in black satin matching the trousers. As shown, a three-inch-wide band of blue finishes the trousers, but if desired they may be merely faced with blue and a band of motifs of metal thread embroidery furnishes the decorative feature.

Trousered boudoir garments are decidedly the fad of the moment. In addition to the Chinese and Japanese effects, gorgeous Turkish trouser boudoir costumes are shown and other bifurcated garments for negligee wear show old-fashioned frilled pantalets of ankle length, accompanied by silk or lace coats. Women no longer swathe themselves in the gorgeously trained boudoir robes that held sway for many years when they wish to relax and make themselves "comfy" for an afternoon nap. They prefer, rather, the simpler things, dainty and of rich materials, but, nevertheless, real loung-

Real Chinese Boudoir Garment.

ing garments, and certainly this season the seal of approval has been set upon garments of the trouser type.

The Chinese coat shown is as simple as possible to cut and make, and very effective imitation Chinese embroidery may be attained by the generous use of gold thread plus a generous stock of patience.

UNDERBODIES VARY IN TYPE

That for Use With Finer Blouse Not Best to Wear Under the Waist That Is Washable.

The underbodice worn with a blouse of georgette crepe or chiffon is not at all the same type that is worn under a linen or cotton affair.

Under the finer blouses the glorified corset cover is made of pussy-willow, or some other soft silk, of net or of silk voile. Under the blouse that is washable a cotton underbodice, but one that is always dainty, is more cor-

A novel idea to wear under rather elaborate blouses is to use a wide piece of ribbon, large enough to go around the body like a girdle. This is held on over the shoulders by the regulation ribbon straps. The wide ribbon is fitted into the waist by taking up little seams all around, and these seams are hemstitched by machine. This little underbodice buttons in the

Another bodice is made like the oldfashioned corset covers our grandmothers wore, with round necks, wide armholes and infinitesimal extension sleeves. It is gathered into the waist by two strings run through invisible folds and closes in the back. These corset covers are pretty in batiste for wear under washable blouses. In some models the back is cut in surplice crossed and brought back to the front in a belt that ties with ribbons in front. The simple embroidery scattered over the surface will not interfere with any on the blouse which may be worn

It must be a matter of some difficulty for a member of the tribe of Kayans of Borneo to keep track of his own name. Among those people, when a child is born it receives the name of some repulsive object or is simply called "it," so that, not having a distinctive name, the evil spirits cannot identify it and cause it

When the child is two or three or four years old they name it, say, Tijan. The father is thereafter known as Tama Tijan-Tama meaning the "father of"-and the mother is known as Inai Tijan-mother of Tijan. The father's original name, Kebing, for example, is dropped, and frequently it is forgotten unless there are other fathers of Tijans. In that case the father is known as Tama Tijan Kebing

-father of Tijan, formerly Kebing. If Tijan dies, then Tama Tijan's name becomes Oyong Kebing (meaning "Kebing the bereft," provided Tijan was the eldest child). If a younger child dies, the father becomes Akam Kebing; if his wife dies, he becomes Aban Kebing. If he becomes a grandfather, his name will be Laki Kebing. Lagi is distinctly an honorary title, like its equivalent datu among the Malays. With those people datu is superior to the title hadji, borne by one who has made the pilgrimage to Mecca. Datu, literally grandfather, is equiva-

lent to elder with us. manners to ask a man what his name If a white man does so through ignorance, the man will turn to a bystander and ask that the stranger, who does not know the customs, may be informed. If a man tells his own name, the evil spirits will hear him, and can more readily do him harm .-Youth's Companion.

In the Library.

Newly Rich Hostess-You see, I went to the best bookseller in town and ordered all the gems of literature for our library.

Caustic Guest-You ought to have sent for a jeweler when you got N. R. H .- Why should I send for a

jeweler for books? C. G.-Because most of them, I notice, are uncut gems.

of the Enemy.

Imitating the bugle-calls of the enemy is quite legitimate; so is the wearing of their uniform, with one reservation. A soldier may not fire on the enemy while so attired. But he may advance or retreat, build bridges and perform any other military operation short of actual fighting, using the uniform as a means of deception.

A soldier may spy as much as he likes. If he worms his way into the enemy's lines he is only doing his duty, and, if captured there, may not be punished beyond being taken an ordinary prisoner, provided he is wearing a uniform. If he is in any kind of disguise he may be shot.

In the course of his spying he may kill as many of the enemy as he can. When he approaches the sentries he may stab them in the dark, or use any trick to throw them off their guard except one. He may not say "friend" if the sentry challenges him (unless, of course, he intends to surrender).

Similarly, if suddenly attacked, he may not use any words to make the enemy believe that he is a friend in disguise, and so take him unawares.

His Wife's Temper. I have seen, especially among the

leisure class, capricious and ill-tempered women whose husbands lived in constant dread of a scene of some sort, says a writer in the Woman's Among the Kayans it is a breach of Home Companion. There, poor, downtrodden men spent their days in placating their wives, in side-stepping tempers and tears with humiliating nimbleness, or in exercising a patient kindness less degrading to them and deeply touching to all spectators. Such men are always pitied by the whole community in which they live, but this pity is a subtle form of contempt. The sympathetic community feels that sidestepping a wife's moods is a poor way for a live man to be spending his days.

When, however, a man blights the life of his household in a similar way, the commiseration which his wife receives is small, especially if he happens to be that which is so aptly termed "a good provider." In fact, the feeling of the community eloquently reflects my mother's attitude; that it is a "woman's business to make her home livable.'

FANEYTOWN LOCAL COLUMN

Brief Items of Local News of Special Interest to Our Home Readers.

Shellbarks are reported to be plentiful this year, and are now being gathered, chiefly by the young folks.

Chas. B. Schwartz and daughter, Miss Aileene, moved to their farm on the state road, the first of this week.

Mrs. N. B. Hagan left, on Monday morning, for Baltimore, to spend several days with relatives and friends.

Dr. and Mrs. C. M. Benner and son, Robert, spent Sunday afternoon with Mr. and Mrs, Henry Basehoar, near Littlestown.

Emanuel Ohler has sold his farm to George C. Overholtzer, and Mr. Overholtzer has sold his farm to

Mr. and Mrs. H. C. Dorcus, of Woodsboro, guests of Mr. and Mrs. Jere J. Garner, together attended the York Fair, this week.

Prof. Wilbur L. Koontz has rented the Galt home, on Baltimore St., from the present owner, Edward S. Harner, and will remove to it the first of next

The cannery will continue business for a while, canning pumpkins, if the offerings are sufficient. See ad. in this issue. The corn season closes this week.

Luther T Sharetts has been elected lay delegate to the Maryland Synod, which meets in Washington, October 15th. John L. Zimmerman is the

Mr. and Mrs. John A. Yingling left, on Tuesday morning, on a trip to relatives in Indiana. They may also go on to Chicago and Iowa before returning home.

Our large card notices against Trespassing, are just the thing for posting up on fences and trees about a farm. They cost only 5c each-"same old price."

Mrs. Harry B. Miller is acting as teacher of a portion of the primary department of our High School, which has been crowded out of the main building for want of room.

David J. Wolf, Jr., son of Rev. and Mrs. D. J. Wolf, died on Aug. 27th. (See death column.) David will be remembered as having been critically ill while yet living in Taneytown.

The part of the article referring to the loss caused by the burning of the house of Mr. Dutterer, in last issue, should have read "partially covered by insurance, etc.," as there was only \$400 insurance on the building.

Margaret Reindollar daughter, Mrs. Alice Douglass, of Walbrook, and two lady friends, motored to town, on Thursday, bringing along with them Mrs. Mary Martin, who had spent a week in Walbrook,

All members of the P. O. S. of A., interested in hearing a report of a trip to the National Camp, in Chicago, are requested to attend the regular meeting of the Camp on Thursday night, the 11th., when a photograph of the National delegates will be presented to the local Camp.

Many packages of perishable articles, such as fruits, have been sent by parcel post to the soldiers, often arriving in a decayed condition. Postmasters have been instructed to enforce the laws, and to refuse to accept articles likely to spoil before delivery, or which are not securely

A meeting of the Taneytown Branch of the Red Cross chapter will be held in the Firemen's Building, next Thursday, at 3 P. M. This will be a meeting for all members. Officers will be elected and any other business that may properly come before the annual meeting, will be attended to.

(For the Record.) Mr. and Mrs. Maurice Utermahlen, of Tyrone; Birdie and Thomas Hess,of Otterdale; Lloyd Hess, of Westminster, and Jacob Hess, of Taneytown, visited their brother, William, at the home of their aunt, Mrs. Maryann Fogle, last Sunday. Mrs. Margaret Newcomer spent Sunday at the same place.

There is a new question up, now-"Is it a sin to knit for the Army, or Navy, on Sunday?" The next question will likely be-Is it a sin to waste time eating, or sleeping, instead of keeping steadily on knitting? These are very serious (?) problems, as knitting has become one of the fashionable fads of the times. If Shakespeare was in business today, he would likely say,"To knit, or not to knit; that's the question."

David Staley has bought the John Null property, on Middle Street, for

Mrs. Margaret Bankard is spending a few days with Mr. and Mrs.

The brick work on Harry L. Baumgardner's house is about completed. The building will be quite a creditable addition to this growing section of

Mrs. Warren, of Boston, who was Miss Flossie Danner, daughter of Mr. and Mrs. J. Vance Danner, residents of Taneytown twenty-five or more years ago, is visiting Misses Mary and Clara Brining.

Ordinance No. 91, just published, increases the Taneytown Corporation tax 10 cents, or from 40 to 50 cents on the \$100. The increase is alleged to be due to increased expenses. About \$600. will thereby be added to the total receipts.

Charles Oren Garner will preach in the Church of God, Uniontown, Sunday morning, at 10:15. Rev. L. F. Murray, Pastor.

Red Cross Contributions.

The following additional sums have been received by the local Red Cross chapter: Corn Huskers at Cannery 6.26 A. W. Feeser & Co. 10.00 Perch H Shriver 3.00 Miss Percy Adelaide Shriver

Mrs. Calvin Valentine 2.00 \$850.46 Total In addition, a blanket and two comfort kits have been sent, as the allotment of the local branch toward camp outfits; also 11 pairs of pa-jamas, 8 pairs bed socks, 275 compresses, 88 gauze rolls and 34 muslin bandages.

Croup. If your children are subject to croup, get a bottle of Chamebrlain's Cough Remedy, and when the attack comes on be careful to follow the plain printed directions. You will be surprised at the quick relief which it

Advertisement Elephants' Curious Teeth.

Whoever has looked inside an ele-

phant's mouth has seen a strange Elephants have no front teeth, and they never eat flesh or any that requires tearing apart. Eight teeth are all they have, two above and two below on each side, huge yellow molars as wide as a man's hand. Over these hay and fodder are shifted by the queerest, ugliest tongue in the whole animal kingdom, a tongue that is literally hung at both ends, having no power of movement except in the middle, where it shifts back and forth from the side, arching up against the roof of the big mouth like a wrinkled pink serpent. Elephants, like human beings, have two sets of teeth. The milk teeth, which are smaller than the permanent molars fall out when the annials are about fourteen years old. These baby teeth—which are, nevertheless, enormous—are occasionally picked up by circus men among the fodder and preserved as

curiosities.

Black Walnut in Demand.

Black walnut is now in good demand and brings high prices on the mar-ket. The larger clear logs, butt cuts, and stumps, suitable for sawing or slicing into furniture veneers, are readily salable. Second cuts and limbs, however, are more difficult to market advantageously.

For high-grade walnut veneer the market wants logs 16 inches and over in diameter at the small end. Practically any length from 6 to 16 feet will do, but lengths of from 7 to 10 feet prevail. There is a good demand for walnut grown in the open because the rapid growth gives the wood a variegated color and a richly figured grain or pattern that is much in favor now for furniture. For logs of this character the present prices range from \$60 to \$100 per 1,000 board feet at the railroad. Butts should always be cut well into the ground in order to obtain as much as possible of the stump, which is often the choicest part of the tree.

Walnut logs left after the choice cuts have been removed should be peeled, the ends painted, and then rolled on sticks to keep them from the ground and to avoid deterioration.
Walnut of this character is in demand for gunstocks. Recently there has been an unprecedented demand for these and the market has absorbed all the suitable wood offered. Now that the United States has entered the war, it is likely that the demand for second and third grade logs will be continued.

Logs of this character are also in demand for sawed furniture stock. When intended for the latter purpose it is usually most profitable to saw them up locally into 1-inch boards, which should be well air-dried.

Marriage Licenses.
