NEW ROAD BILL INTRODUCED BY GOVERNOR.

Road Extension Calls for \$3,000,000 Bond Issue Loan.

Senator Harrison introduced the road bill prepared by the Governor and which provides for rural post roads lateral roads and the extension of the state road system. This provides for a loan amounting to\$3,000,-000 and makes it incumbent on the counties to contribute toward con-

In a statement issued by him expalining the provisions, the Governor

says:
"The bill for state roads construction for the next two years was prepared under my direction and introduced today by Senator Harrison. This bill provides for a bond issue of \$3,000,000, of which approximately \$850,000 in each of the next succeeding years will be used to construct post roads by matching an equal ap-propriation from the United States government. The balance of \$650,000 each year, with an additional \$100,000 from the automobile license funds, will be used to match an appropriation of \$750,000 from the counties to construct lateral roads. This is the plan outlined by me at the time of my inauguration and again referred to at the time I presented the budget to the legislature.

"The bill as drawn provides that both classes of roads are to be divided among the counties on the basis of their road mileage. The duty of meeting the State's appropriation is made manadatory on each county; the method of raising the money to meet this appropriation is left to the discretion of the county authorities, and they are given ample authority to raise it in any way which suits their local conditions. If this bill is enacted, it means for each dollar spent by a county for improved roads \$3.00 will be spent by the State and federal government. I hope that its provisions will be very fully discussed and considered, in order that the members of the Legislature will have all possible suggestions before them of the best method to continue the building of permanent roads throughout the State.'

Spring Printing and Advertising.

This is the time of the year for business men to have their office stationery, and advertising matter, printed for use during the year. A neat card, folder or blotter, can be carried with each letter, or bill sent out, without any additional cost for postage. This is also the time to begin the Spring campaign of newspa-per advertising; to plan for it ahead, and to regard it as a business help

The Prohibition Elephant.

According to the discussion in the U. S. Senate, there are 59,000,000 gallons of liquors and alcohol in the conded warehouses of this country. What to do with it, is a coming big question. The United States has an interest in it, under present laws, of \$6.40 a gallon tax, while the liquor itself is worth less than \$1.00 a gallon, after leaving a fair profit for the

This is only preliminary to what shall be done with the stock on hand. A bill has been presented providing for the buying of land and erecting storehouses, for the collection of the revenue when the liquor is taken out for sale for legitimate uses, for bottling plants, and other details. final disposition of the liquor on hand, is a question that will come up when this bill is reported out of the com-

land State Grange legislative committee, of which Herbert R. Wooden, of this county, is a member, has issued the following circular letter to all who are opposed to race-track gambling. We give it publicity with the hope that so doing may help to arouse public sentiment that will be used against the passage of the racetrack bills. We hope that these bills will not get the vote of a single member of Carroll County's representatives. Mr. Byrn says:
"There are three bills before the

S. L. Byrn, chairman of the Mary-

Maryland legislature that claim our attention. Two to legalize race track gambling in Maryland by license and one to prohibit race track gambling in our state. The excuse, if I may term it such, for presenting the first two is that the race tracks will produce revenue, bringing into the Treasury of Maryland hundreds of thousands of dollars yearly. Are we in such pressing need, or so indifferent to the source of our state income as to be ready and willing to barter our moral, social and political life for revenue, and thus make void the teachings of our homes, churches and schools by legalized gambling?

If it is just revenue we want, why not revive the Louisiana lottery, permit the opening of gambling dens and have a three ring circus with all the side shows; the gate receipts will be more. Of course, our moral prestige would be destroyed, our social status, respect for self and state cast upon the derelict dump heap, and our political condition would be rotten be-yond measure—but there would be the revenue. To adorn Miss Poly

No!! the people of Maryland are not so devoid of decency, respect for self and state, as to sell their priceless heritage for such a mess of pottage. There are plenty of legitimate sources of revenue that will yield the necessary funds for our state government which will not put in jeopardy the honor of our people nor destroy the good will and esteem of those beyond our borders. But we are told

Rather let us administer this department and every department of our state with funds honestly and honorably come by and wisely spent that they may in the future, as in the past, be a memorial to our statesmen and a credit to our people.

It is for the Maryland legislature to say the proud traditions of our state shall shine in the faces of her citizens, or whether we shall bow our heads in humiliation and shame. It is our individual duty to make known our wishes in this matter that our nd necessity.

LEGISLATIVE MILL HAS LESS BILLS THAN USUAL

Senator Snader Opposes Mortgage and Judgment Tax.

The total number of bills introduced, with the session more than half over, is but little more than half the usual number up to this time, and all of the bills are well up and under-There are but few bills before the legislature that will cause much debate, or delay.
Mr. Leatherwood, of Carroll, pre-

sented a bill authorizing Mt. Airy to issue bonds to the amount of \$22,000.

The first bill signed by Gov. Ritchie was one authorizing a bond issue for Cambridge, the proceeds to be devoted to the purchase of a gas-

oline power fire truck. The most important fight to come before the legislature will be over the effort to repeal the prohibition amendment, or to recall the act of two years ago ratifying National Prohibition. Gov. Ritchie is openly back of such an effort. Another bill has for its object the testing of the prohibition law in a suit before the Supreme Court, following the plan of Rhode Island.

The drys, of course, will not let such legislation go through by default, but will put up a strong fight. The wets are claiming a majority in both branches, and the Governor admittedly has a harmoniously working organization which strongly indicates that "might" is apt to win over "right." But, even if the legislature passes a repealer, it is held that the act will be of no use, as a State, once acting on an amendment to the Constitution of the United States, cannot

withdraw its act later.

The Senate and House, on Tuesday, passed additional resolutions against Woman Suffrage in the State by a vote of 65 to 25 in the House, and 17 to 7 in the Senate, which finally disposes of the matter for the session.

A bill has been introduced, that is of interest to Taneytown, as well as other towns and sections of this county, to eliminate railroad grade crossings. A bill of this kind was brought up two years ago, but did not come to a vote. The present bill provides that the railroad companies shall pay 65% of the cost of removing dangerous crossings, and the State, or municipality the other 35%.

Senator Snader has presented a bill exempting Carroll county from the payment of taxes on mortgages and judgments. Two years ago, Senator Warfield and Speaker Wooden had the county added to the counties levying such a tax. This is an old, old question, with arguments for and against, but the Record still holds that such investments should pay a reasonable

Report of County Agent Fuller's Work for the Past Year.

The past year was a busy year in the County Agent's office. Many farmers of the county are taking ad-vantage of the service offered by the Maryland State Agricultural College and the U.S. Department of Agriculture co-operating. The County Agent being the county representative of this organization which extends over the entire country. The service consists of educational work, organization, and aiding the farmers to market his products.

In the educational work last year, Farmers' Institutes were held in seven different towns. One short course was held at Union Bridge, 145 meetings were held with an attendance of 8036, nine field meetings were held with an attendance of 1586. Under this heading the County Shows were held in co-operation with the Granges, and Boys' and Girls' Clubs in seven different schools. The best products from these county shows were brought to the big county show and rally held in the Armory in Westminster, in November. Over \$500 was given out in prizes at these shows. The money came from the business men in the towns, and the Maryland Agricultural Society which gave \$100. The most important line of educa-

tional work is that of the Boys' Agricultural Clubs. Ten clubs were organized the first of the year. Thirtyeight boys finished the fat pig project, one the breeding project, six the poultry, twenty-four potatoes, six the acre of corn, and one boy produced 112 bushels of shelled corn per acre. This work not only instructs the boys how to produce farm products under the best systems, but requires the keeping of accounts and helps the boy to find his life's vocation. This is very important work as it is laying the foundation for the future of Carroll's most important industry, that

Carroll county made a big step forward in organization the past year. A Grange was started at Finksburg, a Community Club at Middleburg, and ten Boys' Clubs were organized over the county with two prospective or-ganizations in embryo. County-wide we have the Carroll County branch of the State Dairymen's Association, the Carroll County Poultry Association. the Sweet Corn producers' Association, the Farmers' and Threshers' Protective Association, and for the moral welfare, the Ministerial Asso-

The marketing problem is in the lime light at the present time. Here-tofore the farmer has had little to say as to the marketing of his produce, but he is getting so organized today that he is having some say in the marketing of farm produce. The Dairymen's Association is a good example of his work. The Sweet Corn Growers' Association is another. The proper selection and packing of eggs has resulted in an increased return to only co-operative selling, but buying as well. Considerable money was saved by co-operative buying in large lots of feeds, fertilizers, etc.

not to gouge an exhorbitant price, or corner the market and force certain concerns, dependent upon them for raw material, out of business, but that all might receive a square deal which means cost of production plus a 10%

Another phase of the County Agent's work which decreases as the work develops, is that of personal service. County Agent Fuller made 520 visits last year, traveled 7,278 miles, 423 called at his office in the Times Building, 326 telephone calls, 141 meetings were attended by 9622 people, 32 articles were published in the county papers, 35 circular letters numbering 2864 copies were sent from the office, as well as 1100 bulletins, 66 visits were made to schools and 47 specialists were brought into the county from the Maryland State College and U. S. Department of Agriculture.

The Agriculture Extension work stands for the improvement of farming conditions, and the farm and the home. The services of the County Agent is free to all. Mr. Fuller is

France Honors American Dead.

The French government has sent to the nearest surviving relative of each American who lost his life in the recent war, a Memorial Diploma, handsomely engraved, and containing the name of the deceased.

The principal figure in the group engraving symbolizes the soul and spirt of the American army which helped France to maintain alive the flame of the torch of liberty and justice. The group is an elaborate one, and each feature of it represents some special sentiment. The inscription reads:

Which means—"To the memory of ----of the United States of America, France's homage," with the signature of the President of the French Republic, Raymond Poncaire.

Over one billion more pounds of sugar were exported from this country to Europe, in 1919, than in 1918. This should be a pretty fair and understandable explanation why sugar is scarce and high in this country.

ORGANIZED EFFORT FIGHT HIGH PRICES.

The Experiment to be Tried in Washington, D. C.

Through the initiative of Attorney-General Palmer, his office will launch a campaign in the city of Washington that is to be a model for other cities, in order to put into effect practical plans for reducing the cost of living. The campaign will be in charge ing. The campaign will be in charge of Howard E. Figg, whose chief lieu-tenant will be Miss Edith Strauss, both having had considerable experience along this line in the Attorney-General's office.

Experimentation so far has demonstrated that official efforts to reduce costs do not produce results, but that the people must act. On being asked what he menat by co-operation on the part of the public, Mr. Figg

"I mean just this," he replied. "All of us spend too much and too thought-We are too much addicted to doing things we cannot afford. If peo-ple would stop buying high-priced meals, high-priced silk skirts, highstockings and high-priced shoes those articles would disappear from the market. The restaurant keeper would find his fancy-priced food unsalable and quit offering it.
The haberdasher would find silk
shirts piling up unsold on his shelves."
"To what extent is labor's incessant

clamor for more wages responsible for prevailing high prices?"
"I am afraid," replied Mr. Figg,
"that it is largely responsible. In many cases labor's claims are undoubtedly well founded. They are always justified where they do not out-strip demonstrated rises in living costs. But what is to be said of the

clothing industry, in which average wages since 1914 have risen by 225 per cent, as against 85 or 90 per cent in the average cost of living ? It is not the manufacturers of men's, women's and children's apparel who are getting rich out of the present abnormal cost of clothing."

The Cardinal's Pastoral Letter.

Cardinal Gibbons issued a Pastoral Letter to the Catholic church, which was read in all of the churches of that denomination, last Sunday. It is a fine letter, abounding in Amer-ican sentiments of the highest character, and is worthy of the thoughtful consideration of the general public, as it in reality covers a review of the many vital problems now con-fronting the American people.

The letter is especially valuable because it contains the warning that the whole country needs to have a higher conception of the brotherhood of man, under the fatherhood of God. it is the duty of each citizen to relea number of our poultrymen. > Just one sentence, if it contained no other, would be worth the effort and publicity of the whole letter. It is that "the people as a whole have a prior claim and that the first step must be to insist that the rights of the community shall prevail, that law and order shall be preserved and that the public shall not be made to suffer while the contention goes on from one mistake to another.'

The Railroad Bill Passed.

The House passed the Cummins— Esch railroad bill ,last Saturday, and on Monday the Senate passed it by a vote of 47 to 17. It now goes to the President. This action on the part of Congress is in direct opposition to union labor organizations, who will now try to influence the President.

Senator Henry L. Myers, Democrat of Montana, denounced the influence of organized labor upon Congress. He asserted Mr. Gompers has assumed a position of greater power than that of the President of the United States always ready to help or secure help as he explained, the President can only veto legislation that Congress has passed while Mr. Gompers can to the members of his congregation, prevent the passage of legislation who offered under the circumstances that he does not approve.

Labor's opposition to the conference bill was condemned in the Senate as insincere and merely a pretense to force a two-year extension of federal operation to have that additional time in which to conduct propaganda in behalf of the Plumb plan for nationalization of transportation facil-

Thirty-two Republicans and fifteen Democrats voted for adoption of the conference report. Three Republicans and fourteen Democrats opposed it. Senator France, of Maryland, was one of the three Republicans in opposition.

BONUS TO STATE SOLDIERS.

Bill Presented Authorizing Loan of \$9,000,000 for This Purpose.

A bill for the above purpose has been presented by Senator Eppler, of Allegany county. To the Record, it looks as though this bill, as well as movements of this character, should be held up, at least for the present, though we admit that we have very little information on the exact details of the bill except that contained in the following news report, which seems indefinite:

It provides for a loan of \$9,000,000, the money to be applied to payments to all of those who participated in the war in various capacities. Each is to receive a bonus of \$10 for each month in the service, but that given regulars is to cease as of November 11, 1918. Nothing is allowed those who served less than 90 days and has been a resident of the state six months prior to his entry into the service. It is also disallowed those who did not report for duty prior to November 11, 1918, or was discharged prior to January 15, 1918, except in cases of death or disability by reason of ser-

Those entitled to compensation desiring to continue their education in any school not run for profit may, under rules established by the State Board of Education, receive \$30 a month while at school, but the total amount disbursed is not to exceed \$1,080. Applicants for compensation who have participated in combat are entitled to a 25 per-cent increase in the total amount.

The Comptroller, Treasurer and Adjutant General are constituted a Military Service Recognition Board, which may employ clerical assistance. To meet the interest of the bonds an extra tax is imposed on collateral inheritances and also on estates.

Socialists May Use Bullets.

Albany, Feb. 19-Morris Hilquit. Socialist leader, today predicted that control of the United States Government would pass peacefully into the hands of the Socialist party when it enrolls the working class. He issued a warning, however, that "it is not a warning, however, that "it is not impossible the people of this country will be compelled to supplement their political action with a little shooting" if the profiteering class revolts after the majority of the people are ready to introduce "substantial reforms" by "legal constitutional methods."

Testifying before the Assembly judiciery committee at the trial of the

diciary committee at the trial of the five suspended Socialist assemblymen charged with disloyalty, Mr. Hilquit denied that the Socialist party intended to promote its program by other than "legislative action, parliamen-tary action and in a peaceful way." But while he asserted the party was

not plotting bloody revolution to achieve its aims, Mr. Hilquit warned history has shown that "when the privileged minority is about to lose its privileges it becomes desperate and tries to dstroy reform or lawful revolutionary movement by force."
"In that case it will be up

be up to the majority of the people to defend their rights against such lawless, powerful, privileged minorities, and in a case of that kind it may come to shooting," he concluded.

Mr. Hilquit made his "prophecy" toward the close of his grilling cross-examination by Martin Conboy, of committee counsel, who quoted Victor Berger as saying Socialists and workers must be "prepared to back up their ballots with their bullets." Mr. Hilquit, who extolled Berger, interpreted that as meaning to defend themselves after they had come into power through the ballot.

Argument for Low Salary Gone.

Wide publicity was given recently to the statement that a minister of the Reformed Church at Sunbury, Pa., had declined a raise in salary of \$500.00. A little inquiry brings out some facts of interest. This pastor is said to receive \$1800 from his congregation and about \$200 as Chaplain of the county jail, which requires very little service. Besides this he has some income from other things to which he devotes part of his time. Even if he did decline \$500 more the case entirely breaks down as an argument against the increase of salaries much lower than that now received. It is rather commendable, however, to make the salary \$500 more.

Early Sale Prices Excellent.

At the public sales so far held, prices have been excellent-some of them quite remarkable. This is true of nearly all kinds of live stock, and of desirable machinery harness and household goods. If the early sale prices keep up throughout the season, all sales will be satisfactory to those who hold them.

A New York newspaper, last Sunday one week ago, reduced the size of its issue from 84 pages to 72 pages, for the day, and thereby lost (so it says) \$14,000 in advertising in order to "conserve the paper supply." There is a lot in this item to think over, and to figure out, and it does not all relate to paper.

A Philadelphia preacher recently made this assertion before a ministerial association: Too many men attending morning service have their minds on a contemplated afternoon motor ride, instead of the words of the preacher." The probability is that this was about the mildest thing he could say, as to the minds of some

Senator Sherman, of Illinois, is generally regarded as an extremist, but occasionally gets off some palpable hits. He now wants to get rid of thousands of surplus clerks in the government departments, in order that "Senators may get three square meals a day on \$7500 a year"; and also suggests as an appropriate motto for the Capitol, "Everybody for himself and the Treasury for us all." These two are not bad, for a Senator.

Sooner or later, this country must decide, whether it can, and will, govern itself through a Congress, and laws, or whether it is to be governed by powerful private combines, both of capital and labor. In our opinion, this means that standard wages must be fixed for all kinds of service, and that men who conspire to interfere with the standard wage scales, must be considered violators of law, and subject to penalties, the rule to apply to both laborer and employer.

For a "Democracy" it has been abundantly demonstrated that, after all, the people rule, largely, only in the selection of their rulers, and that the President, for the time being, is quite Kingly in his prerogatives. Instead of having a King, by order of succession, and for life, we choose one every four years, and call that "government by the people." The King of England, by comparison with the President of the. U S., is quite a powerless individual.

Is It Intemperance?

Speed up production! has been the advice to everybody, for a long while, and still, "production" lags way behind. What is really wrong? Do we actually need greater production, or is it less consumption that we want? Is there such a thing as too win in the general election-to a demuch business? Can it be an explanation, that the millions of dollars that were but recently spent, each year, for liquors, are now being spent | tion the business of selecting candifor other things, and that the country did not adjust itself to the turn?

Manufacturers of nearly all kinds are so rushed with orders that there trayal of their interests or callous inis no likelihood of lower prices. Many articles are not being made, because it is more profitable to make others. The old law of "supply and islature the advisability of consider demand" as a market regulator, still reigns supreme. There is no getting away from the inevitable. As long as away from the inevitable. As long as stances.

the demand keeps up, we must pay the price.

Think it over. Has the high cost remember, the h. c. of d. was a mighty big one-it made, and kept many thousands of people poor each yearand now we may not be taking account of the statistics, once so comand are wondering what is wrong? without realizing that "intemperance" has merely changed its working habits.

Personal and Public Financial Problems.

In every town there is a demand for more houses. Every local weekly takes up the lament that the people who want to come to town can not be accommodated—the housing problem stands in the way. What is the cause of this shortage of houses? The answer is simple. The abnormally high cost of building. Men with money to invest, do not consider it good financial business to build houses at present costs.

Necessarily, houses for dwelling purposes must be built with personal "bond issue" can cover such investments. Men could build houses, for rent and individually borrow considerable sums on mortgage, pay interest on same and reduce the mortgage our own, that it does not take up near J. N. O. SMITH, Auct. 2-13-30 debt, gradually, but, they are not do-

In almost every town, men are going out of mercantile business; no new business ventures, involving the Investment in business ventures, at risky, and men are not willing to take | take, contain no harmful drug and the risk with their own money.

Real estate sells at a high pricewhen it sells at all—but comparatively few sales are being made. This is not that many do not want to sell, but rather because few want to buy, at present prices. The level of real estate values is kept up because the market is not active, one way or the other, either with sellers or buyers. Men who own farms are doing well, financially, at present; while those who could sell town properties at a good price are holding them, because they would have a big price to pay for another property, or to build. All men are very carefully considering their self-interest in property transactions of all kinds-and perhaps some are making mistakes.

There is a decided feeling, everywhere that present costs and prices can not last, and naturally there is an effort toward conservatism and caution against making individual investments, that in a few years may prove unprofitable. If everybody would know-even five years aheadwhat the standard of values would then be, the situation would be great-Union labor is protesting against ly clarified and more safe; but, nopert financiers—what the future

Would Amend Primary Law.

The Baltimore News, which was one of the original champions of the primary election law, while not admitting that the law is wholly useless, an unnecessary expense, and a misfit generally as preventing "boss" domination, frankly admits that the law is not functioning as it ideally hoped for, and says that occasions arise when it wishes the selection of candidates might be left to "the wise counsel of a properly chosen conven-

It says further: "We did not expect it to be a sovereign panacea, a cure-all for political ills and ailments; but we confess as time goes on, as we see the disinclination of the men best fitted for public office to engage in what now means two bruising fights-first, to secure the nomination and next to sire to see an amendment to the law that will afford opportunity, at least, if and when the electorate wish, to give over to the hands of a conven-

Holding of Food Stuffs.

A principal cause of the very high prices is the holding of food products on speculation. The results are detrimental. Perishable supplies like potatoes deteriorate and often rot entirely. The available food supply is depleted at a terrible cost. Often the speculator gets no benefit, as the loss in quality of his product may make up for the extra price on the portion of it that remains salable.

The Aramko implements is the finder, 7-ft. cut; 2 Champion mowers, 5 and 4½-ft. cut; Black Hawk corn planter, 9-hoe Farmers' Favorite drill, 1 horse rake, roller, 2 barshear plows, 501 and 97; 2 John Deere corn plows, 501 and 97; 1 Long; two 3½ Shuttler wagons, 1 bed hold 15 barrels, the above machinery is in a No. 1 condition; 1 new flow in the plow movers, 5 and 4½-ft. cut; Black Hawk corn planter, 9-hoe Farmers' Favorite drill, 1 horse rake, roller, 2 barshear plows, 501 and 97; 2 John Deere corn plows, 501 and 97; 2 John De portion of it that remains salable.

Under our laws, a man has the right to sell his own property whenever he may see fit. But if the practice of forcing up prices by holding for an advance is going to keep on indefinitely, the State will need some new laws.

Last week, your correspondent received word of the rather sudden death of Rev. William S. Delp, of Washington, N. J., on Tuesday even-ing, Feb. 17th. He had shoveled the snow off of a porch roof, and the exertion brought on an attack of heart trouble, and he only lived two hours. He was a former pastor of the Uniontown Lutheran charge, from 1882 to 1891, going from here to German Valley, where he remained 28 years, resigning last Spring, on account of ill health. He is survived by his wife and two daughters—Mrs. E. C. Welsh, of German Valley, and Miss

They couldn't be built now for twice \$71,000

When the talk turns from politics to railroads, and the traveler with the cocksure air breaks in with, "There's an awful lot of 'water' in the railroads," here are some hard-pan facts to give him:

American railroads have cost \$80,900 a mile -roadbed, structures, stations, yards, terminals, freight and passenger trains—everything from the great city terminals to the last spike.

A good concrete-and-asphalt highway costs \$36,000 a mile—just a bare road, not counting the cost of culverts, bridges, etc.

Our railroads couldn't be duplicated today for \$150,000 a mile.

They are capitalized for only \$71,000 a milemuch less than their actual value. Seventy-one thousand dollars today will buy one locomotive.

English railways are capitalized at \$274,000 a mile; the French at \$155,000; German \$132,000; even in Canada (still in pioneer development) they are capitalized at \$67,000 a mile. The average for all foreign countries is \$100,000.

Low capitalization and high operating efficiency have enabled American Railroads to pay the highest wages while charging the lowest

In the Circuit Court for Carroll County: NO. 5197 EQUITY.

ADELAIDE S. DRIGGS,

JAMES E. DRIGGS. The object of this bill is to procure a decree granting the plaintiff a divorce a vinculo matrimonii from the defendant, and giving to her the right to resume her

vinculo matrimonii from the defendant, and giving to her the right to resume her maiden name.

The bill states that the plaintiff was married to the defendant, in New York City, on the 17th day of April, 1915, and lived together until about June 1, 1915, when the defendant, without just cause, abandoned and deserted the plaintiff, and declared his intention to live with her no longer nor to contribute to her support; that said abandonment has continued uninterruptedly for more than four years, and is deliberate and final, and the separation without reasonable expectation of reconciliation; that no child was born of said marriage; and that defendant is not a resident of the State of Maryland.

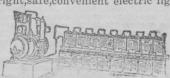

It is thereupon, this 29th day of January, 1920, ordered by the Circuit Court for Carroll County, sitting in Equity, that the plaintiff by causing a copy of this order to be inserted in some newspaper published in Carroll County, in the State of Maryland, for four successive weeks before the 1st day of March, 1920, give notice to the said absent defendant of the object and substance of the said bill of complaint, warning him to appear in this court in person or by solicitor on or before the 18th day of March, 1920, to show cause, if any he have, why a decree ought not to be passed as prayed.

PETER WRITES ABOUT CHRIS-TIAN LIVING.

PRIMARY TOPIC—Doing as Jesus did.
JUNIOR TOPIC—How to Treat Those Who Wreng Us

Who Wreng Us.

INTERMEDIATE AND SENIOR TOPIC

The Nobility of Patience.

YOUNG PEOPLE AND ADULT TOPIC

Ideals for Christian Living.

The purpose of Peter was to establish all who were passing through suffering and testing. See for example 1:7, 3:14, 4:12, 5:10-12,

I. Christian Growth (vv. 1-5).

The Christian obtains his life through the new birth, and the agent of its accomplishment is the Word of God (1:23). The same vitalizing and energizing power which makes the believer a child of God is essential to growth and development. In order to have spiritual growth there must be both renunciation and appro-

1. Renunciation (v. 1). Certain things injurious to spiritual life must be put away (1) malice-all wickedness, that is, the will to do injury to others without cause; (2) guile-deceit of all kinds; (3) hypocrisiesfeigning to be what one is not-assuming a false appearance; (4) envieshatred of others because they possess excellencies which we do not; (5) evil speaking—all kind of slanderous speaking against others.

2. Appropriation (vv. 2, 3). (1) Spiritual food must be taken (v. 2). The principle of the new life was conveyed through the Word (1:23), and the Word is the means by which that life is to be strengthened and developed. Just as a new born babe loves milk, so men who are born again love the Bible. (2) Spiritual food must be assimilated (v. 3). The Word of God must be received and assimilated by meditation.

3. The grand objective (vv. 4, 5). It is coming to Christ-to grow up and become a part of the glorious church, the spiritual house, which is designed to show forth the glory of

II. Seemly Behavior of Christians

1. As pilgrims and sojourners (vv. 11, 12). Christians are merely sojourners on the earth; they are journeying through it on their way to the eternal home in the heavens. Our heavenly citizenship (Phil. 3:20) should constrain us to (1) abstain from fleshly lusts (v. 11). The term "lusts" includes the entire army of unclean forces springing from our carnal natures; they are enumerated

in Galatians 5:19-21. These war against the soul. (2) Behavior honest before the heathen (v. 12). Christians should so live that it will be impossible for the world to speak against them as evildoers

2. As citizens (vv. 13-17). While the Christian's true citizenship is in heaven, he has a responsibility as a citizen on the earth. A Christian man recognizes the necessity of social order, and will not only graciously submit to the authority of rulers regardless of the form of government, but will faithfully perform his obligations as a citizen. This he will not do through cringing fear, but as the Lord's free man. By this free submission as a servant of God he puts to silence the ignorance of foolish men (vv. 15, 16). (1) Honor all men (v. 17). He will see in every man the image of God and therefore give honor to him. (2) Love the brotherhood (v. 17). The Christian has a peculiar love for those who are of the same household. (3) Fear God (v. 17). (4) Honor the king (v. 17). This has peculiar significance, for in all probability the wicked Nero was the king then reigning.

3. As servants (vv. 18-25). While doubtless slaves were meant here, the principle applies to all who have relation to employers. The Christian will be in subjection to his master. He will not only do this when his employer is gentle and reasonable, but even when it means wrongful suffering. It means not only submission, but loyalty. It is the duty of a Christian to consider and further the interests of his employer. Many times to do so means hardship and suffering. The grand example of suffering wrongfully is Jesus Christ. While his suffering is an example to us, it was much more, because he suffered in order to break forever the power of sin so as to do away forever with oppression.

February 29. The Result of Our Words and Deeds. Galatians 6:7-10.

First of all, let there be full persuasion that words and deeds produce results, results on others and in our-selves. Like a gun that shoots, and recoils, words and deeds produce effects, both on others and ourselves. This is as inevitable as the principle in our Scripture lesson "that whatsoever a man soweth, that shall he also If he sows good words and works, he will most surely reap a harvest of goodness for himself in addition to the enriching of other

This truth must possess as a settled conviction. Then the exhortation of verse 9 will not fail in its appeal— 'Let us not be weary in well doing.' How easy it is to become weary, to cool off, to let up, to decrease our gifts to evangelism and missions, to fail in prayer, to give way to discouragement and depression, to become occupied with the things and to lose sight of the one thing needful. "Let us not be weary in well doing," in speaking a word of kindness and cheer, in doing the work committed to our hands. He has said, "In due sea-son we shall reap if we faint not." This is enough—toil on. Keep alert to the opportunities of doing good to rain; but others hold that they are all, especially to fellow Christians, "them that are of the household of faith." Beware of neglect, especially the neglect of so-called little minis-

Scripture abounds with words of warning and counsel concerning our words and works. (See Matthew 12: 37, James 3:5-13, Psalm 141:3, and

Some one in the meeting may ask, "How can this life be maintained?" The answer is found in Proverbs 4:23, "Keep thy heart with all diligence for out of it are the issues of life." Here we strike the solid ground. It is a matter of heart life, for out of the abundance of the heart the mouth speaketh, and also actions proceed. The heart purified by faith and indwelt by the Holy Spirit is essential to a life of good words and deeds.

Chronic Constipation.

There are people who never have a movement of the bowels without it is produced by a cathartic. Most of them have brought that condition on themselves by the use of mineral waters and strong cathartics that take too much water out of the system and aggravate the disease they are meant to relieve. A mild laxative tonic like Chamberlain's Tablets affords a gentle movement of the bowels that you hardly realize has knighthood. Napoleon, when he formed

Happenings That Foretell Coming Good Fortune Are Worth Keeping in the Memory.

We must all have noticed how many unlucky omens there are, and how few signs that foretell good fortune. It has been well explained that we need to be prepared for bad luck, but that good fortune does not require to be guarded against.

All the same, it would certainly add to the cheerfulness of life in general if lucky omens were more widely known, says London Answers. How much brighter things look to us if we have reason to hope that something good is coming to us!

Everybody, of course, knows that it is lucky to pick up a bit of iron or coal. So it is to pick up a pin if its head is toward you; if not, let it lie!

It is, of course, a sign of good fortune to put on some garment inside out, but only if it is done by accident and the garment is allowed to remain reversed during the day. William the Conqueror put on his mail-shirt back to front on the morning of the battle of Hastings, and we all know what luck he had on that occasion!

If you find your keys or other steel articles rusting, do not be annoyed about it; it only shows that somebody is putting money by for you.

It is lucky to be followed home by a stray dog. Still better it is if a strange cat comes to stay at the house. Speaking of cats, pessimists, of course, assert that when they tear the furniture with their claws, it is a sign of "scratching luck" to their masters.

NOT ALL INDULGE IN KISS

Many People Know Nothing of Osculation, at Least as Masculine Form of Greeting.

The kiss, which appears constantly the Book of Genesis, "The Odyssey," and in Heroditus' description of the Persians of his time kissing one another, and which is still prevailing even among men in France and the Slavic countries, relates a writer in the Louisville Courier-Journal, seems to be unknown over the entire world, where the prevailing salute is that of snuffing or smelling which belongs to the Polynesians, Malays, Burmese and other Chinese, Mongols, etc., extending thence eastward to the Eskimo and westward to Lapland, where Lynnaeus saw relatives saluting by putting their noses together.

Among the manners and customs of the French allies in France, which most American soldiers "over there" saw for the first time, nothing probably seemed stranger to them than the practice of kissing among men.

As for the custom of kissing men on both cheeks, that has come down from the days when young French noblemen, about to be knighted for some valiant deed, spent 24 hours in solitude and prayer and then came forth, knelt, received the stroke of the sword across their backs and were kissed by their use is not so likely to be follow- of the old customs, keeping the touch -Advertisement of the sword and the kiss.

OMEN'S SAID TO INSURE LUCK

Miss Peach will you be mine?" "All right, if you insist, and while you're on your knees, don't forget that you got down there to fix that strap." Airplanes in Collision.

Losing the engine from his plane while flying at an altitude of a mile did not disconcert a young American airman while flying at an overseas field, according to Popular Mechanics Monthly. Collisior with another craft tore the engine from his machine, but at a moment when the plane was gliding on an even keel, he climbed on to the top of the fuselage at full length and in some manner managed, by continually shifting to prevent the craft from fluttering into a direct fall. While maintaining balance with his body he also manipulated the controls and guided the machine earthward.

Russians Flocking Into Japan. A minor, but none the less particularly interesting, outcome of the anarchy in the former empire of the czars, is the extensive Russian immigration into Japan. There are Russians everywhere in the land of the chrysanthemum. In Kobe and Yokohama particularly every available domicile is taken up by Russians. For at least two reasons Japan welcomes this influx into her borders. The Russians find everything very cheap in Japan, after their country's high prices, and are good customers. The other reason is an outcome of the fact that many of the refugees belong to the old revolutionary strata of Russian society, and there are many expert chemists among them. These men have opened laboratories in their new home, and are organizing an industry which bids fair to make Japan independent of the German market. Thus Japan is reaping a valuable reward for

You don't hesitate to buy two postage stamps so you and your wife can both write letters; or two newspapers so you can both read. Two copies a week of THE COUN-TRY GENTLEMAN cost even less. The Record printed 5000 "Go to Church" cards for Sparrows Point, last week, where a union campaign of all the churches for every person to attend church every Sunday in March, is in progress.

Rev. Seth Russell Downie was sick in bed, in Harrisburg, several days, while there attending the funeral of his brother. He had intended visiting Taneytown, on the trip, but was compelled to hurry back to Frostburg due to the time lost by his illness.

The question of the Taneytown railroad grade crossing is involved in a bill before the legislature, that would require the town to pay 35% of the cost of removing the grade. The situation should be looked into by our local authorities.

The Editor of the Record has been confined to bed, a portion of this week, with lumbago, which has considerably interferred with the regular routine of his newspaper work. If anybod wants something that will make them "quit," let them try lumbago.

Harry S. Downie, youngest brother of Rev. Seth Russell Downie, quietly passed away, Tuesday, Feb. 17th. He was conscious to the last. The funeral was held Monday, the 23rd., delayed from Saturday in order to get his brother, James, back from the far south. Mr. Downie spent last summer at the Sycamores and made many

Twice the Light On Half the Oil

Recent tests by the Government and noted scientists at 35 leading Universities prove scientists at 50 leading Universities provided the Aladdin gives more than twice the light and burns less than half as much oil as the best round wick, open flame lamps on the market. Thus the Aladdin will pay for itself many times over in oil saved, to say nothing of the increased quantity and quality of pure white light it produces. A style for every need.

\$1000.00 Will Be Given by the Mantle Lamp Company—the largest Coal Oil (kerosene) mantle lamp house in the world—to any person who shows them an oil lamp equal to the Aladdin.
