No. 12

TERRIFIC EXPLOSION WALL STREET, N. Y.

Likely Caused by a Bomb placed by Plotting Terrorists.

A terrific explosion occurred in Wall St., New York, at noon, on Thursday, in front of the banking house of J. P. Morgan & Co., in the heart of the financial district, which killed twenty-nine persons and injured more than two hundred. Opinion is as yet divided as to whether it was an accident, due to a collision between a wagon loaded with explosives and another vehicle, or whether it was a planned explosion of power-

Evidence tending to confirm the theory that the explosion was caused by a bomb or some other infernal machine came from several sources.

Chief Police Inspector Lahey reported that he had found evidence to justify the conclusion that the explosion was caused by a huge bomb loaded with TNT—trinitrotoluol—reinforced with iron slugs fashioned from window weight bars. Pieces of these slugs were found in several adjacent structures. This type of weight bars, a close inspection by police and Department of Justice agents dsiclsed, is not used in any building

within a radius of several hundred feet from the scene of the explosion. Warning that radicals planned a renewal of bombing outrages were sent less than a month ago to all Eastern clients of the Wm. J. Burns Detective Agency, according to a statement by Mr. Burns, who said he was convinced that the explosion was a premeditated attack and was not

Mr. Burns, who said he had been engaged by the Morgan firm to make an investigation of the accident, stated that his personal investigation convinced him that a wagon containing a bomb or bombs was left in front of the Subtreasury building with a timing device so fixed as to cause it to explode precisely at noon. No trace of the driver of the wagon has been found, he said, and added that in his opinion the man escaped a few moments before the explosion oc-

Fire Chief Kenlon and officers from the Bureau of Combustibles also expressed the belief that the explosion was caused by a bomb after examining fragments of metal found in the street in front of the Morgan offices. Dr. William F. Doyle, chief of the Bureau of Combustibles pointed out that the small hole found in the street near the Morgan offices and the widely-scattered scars on the facades of nearby buildings also indicated that the blast was caused by a bomb rather than by an explosion of a quantity of dynamite or other

Names on Taneytown Memorial.

The following is the list of names on the Taneytown Soldiers' Memorial: Luther A. Anders, Bernard J. Arnold, Charles R. Arnold, Howard S. Baker, Roland M. Baker, Charles Bankard, Vernon D. Bankard, Vincent S. Biggus, Pauline Brining, A. R. C.; Howard V. Brown, George D. Clabaugh, John O'N. Crapster, B. Walter Crapster, Norman L. Crouse, John S. Cuddy, Carl F. Demmitt, Edgar S. Fair, Paul T. Fair, Earl L. Foreman, Harry J. Forney, Walter C. Fringer, Merwyn C. Fuss, William B. Fuss, David W. Hemler, Clyde L. Hesson, D. Clotworthy Hill, Raymond O. Hilterbrick, Fern R. Hitchcock, John B. Hockensmith Joseph B. Houck, Estee W. Kiser, J. Carroll Koons, Earle W. Koons, Jesse M. Leatherman, Albert O. Lemmon, Irvin W. Legore, Clarence E. Mayers, Percy L. Mehring, James O. Myers, John O. Myers, Jacob A. Myers, ReRoy H. Hull, Harry W. Nusbaum, Roy W. Phillips, Roland R. Reaver, Robert S. Reck, C. Ervin Reid, David H. Reindollar, E. Eugene Reindollar, Jr., Lloyd L. Ridinger, D. Bernard Shaum, Francis E. Shaum, nard Shaum, Francis E. Shau Charles A. Sheomaker, George Shriner, Denton E. Slick, Jesse Slick, Albert P. Smith, John E. Smith, Otto McD. Smith, Robert A. Stott, John R. Vaughn, Harvey E. Wantz, E. Fern Weaver, Mark E. Wisotzkey, Harry M. Witherow, John W. Witherow, Lester S. Witherow.

Below the names of the above survivors is the inscription: Lost Their Lives in the Great Cause,' followed by the names of Howard A. Frock, William D. Hess, Raymond L. Hesson, Verle E. C. Snider.

Barn Destroyed by Fire.

Johnathan M. Dorsey's barn and contents, hay, farming implements and machinery, with three large granaries containing about 1,500 bushels of wheat, all outbuildings and straw stacks and one mule on his farm on the Washington road, near Berrett, about 12 miles from Westminster, were destroyed by fire Monday morning. Flames, first seen on the barn floor, swept rapidly through the structure.

Threshing was in progress and it is supposed that the fire was caused by a price 17c lb., now 52c; white book paspark from the engine. Though Mr. Dorsey carried a fair insurance his loss is said to be very heavy.

Another barn fire, on the farm of Henry J. Zouck, near Glyndon, Balticounty, caused a loss of near \$20,000, on Monday. This fire was also credited to sparks from the furnace of a threshing outfit.

SCHOOLS FOR WOMEN.

Woman Suffrage League Will Instruct County Voters.

Citizenship schools for women of the State will be inaugurated in Annapolis during the special session of the Legislature under the auspices of the Woman Suffrage League of Mary-land. The Annapolis school will be followed by schools in every county of the State and several schools in Baltimore before the general election.

These plans were made by Miss Lavinia M. Engle, director of the citizenship work for the Woman Suffrage League, and Mrs. Charles E. Ellicott, president of the League, at a conference at League headquarters, on Charles street, Baltimore.

Every county school will be directed by Miss Engle, who is well known throughout the South and the Southwest as one of the national organizers of the National American Woman Suffrage Association. The county school is expected to draw the woman leaders from every district of the county, who will in turn hold similar schools in their localities.

Miss Engle is preparing for the schools with the assistance of the county chairmen of the Woman Suffrage League of Maryland, who will have organized the classes and arranged for a meeting place by the time Miss Engle goes into the counties. The schools will be held in the county seats usually, and will be open to all women of the respective counties. They will be held during one day only, in one or two sessions.

For What do they Come?

Foreigners are coming into this country at a rapid rate. Some are coming back who went home to engage in the war, but by far the larger number are newcomers. The rate of their coming is considerably more rapid than ever known, and estimates are placed as high as a million and a half a year.

What effect this great influx will have on this country, is problematic. They ought to satisfy the demand for labor in the cities, and more. Per-haps they represent the way through which the cost of labor will come down? As yet, their coming is little noted, but if their rate is a million or more a year, there will be plenty of notice taken before long. If these people come here to con-

sume food, and not help to produce it, what then? If they come as willing help to the "red" agitators, what then? If they come as strike-breakthen? If they come as strike-breakers, what then? That they are coming when their own countries must need them to help build up thier war-destroyed industries, is suspicious; it will bear close watching.

Soldiers Stole Wheels.

Two soldiers who admit they are absent without leave from Camp Dix were arrested late Thursday at Tan-eytown by the State Police and later lodged in the county jail, charged with stealing the bicycles of William ales, Jr., and John Bigham. The thefts were made Thursday morning. at the Meade School where the boys had left them while attending classes. At noon the theft was reported to Officer C. A. Fox, who informed the State Police. After searching several roads south of town the police found the men in Taneytown.

The men give their names as Thos. W. Hart and James A. Cassidy. They protest they are not deserters but admit they have no leave of absence. The soldiers had been in town for several days. The bicycles were returned to their owners.—Gettysburg Star.

Fires in Westminster.

Westminster had several fires on Tuesday night. The first was in the truck of Lee N. Fleagle, of Avondale, that had stopped before Eckenrode & Myers' service station for gasoline. As the tank was being filled it overflowed and the gas line was ignited. The flame shooting into the air caused great excitement. The blaze was under control of chemical extinguishers upon the arrival of the fire company. The cab of the truck was burned. Doll Ibeck, who was with the truck was badly burned about the legs.

The second alarm was from the Carroll Shoe Repairing Company. A passer-by saw flames breaking through the roof, at 11:30 o'clock. Prompt response of the firemen, a full reservoir, and the brick party walls of connecting buildings, made possi-ble the control of the flames. The building was damaged, but not destroyed. The shoe repairing ma-chinery of C. J. Velonsky, and much of his stock was damaged by smoke and water.

Paper Still Soaring.

Market quotations on paper, envelopes, card board, and printers' stock generally, are still soaring. The September price on an envelope that we used to buy at 83c per 1000 is now \$3.01 per 1000; a cheaper envelope, former price 65c per 1000, now \$2.44. A cheap Bond paper, former price 6% c lb., is now 24c; a medium price Bond, former price 101/2c lb., now 241/2c; a good grade Bond, former per, from 4c to 18c; manila wrapping paper, from 5c to 15c; white cardboard from \$1.70 per 100 sheets, now \$5.40 per 100; a cheap colored board, from \$1.20 per 100 to \$3.60 per 100.

We have a printed price list of date April 1, 1915, from which comparisons are made with Sept. 1 list from the same firm.

LANDSLIDE IN MAINE FOR THE G. O. P. CANDIDATES.

Greatest Republican Victory in the History of the State.

Maine, the only state to hold an election in September, surprised even the Republicans, on Monday, by giv-ing the largest majority in the his-tory of the state—65,000. The Republicans had made a claim of from 30,000 to 35,000, and the Democrats were prepared to argue that a smaller majority than that would stand for proof that the tide, this year, was running in their favor.

Governor and all four Congress-

men are Republicans. The women voted largely with the Republicans, and helped to increase the majority.

The plurality for Governor was 17,000 more than the largest obtained by any other Gubernational candidate in the history of the state. Every member of the State Senate is Republican, while of a membership of 151 in the House, the Democrats elected

The League of Nations was made the issue in the state by speakers from both parties. Matters of mere-ly State importance were hardly touched upon in the campaign. The leading speakers were men of national prominence, both parties striving to effect a good showing in the "barometer State," the only State in the Union to hold its State election in advance of the voting for President. For the Republicans, addresses were delivered by Governor Calvin Coolidge, of Massachusetts, Vice-Presidential nominee; Senator Henry Cabot Lodge, Senator Joseph S. Frelinghuysen and others.

The Democrats sent in the State Franklin D. Roosevelt, candidate for Vice-President; Secretary Daniels, former Secretary William G. McAdoo and Homer S. Cummings, former chairman of the Democratic National Committee.

Ancient History of the U.S.

From a book in our possession, printed in Glasgow, Scotland, in 1788, we reproduce the following information concerning the United States:

"The United States of America possess the following provinces: New England, New York, Pennsylvania, New Jersey, east; New Jersey, west; Maryland, Virginia, North Carolina, South Carolina, Georgia.

The Spaniards possess the east coast of Florida, the next southern country, the principal settlement therein being St. Augustine; the French have some settlements to the west of these along the river Mississippi, which empties itself into the Gulf of Mexico; the principal city is Fort Lewis, from whence the country is called Louisiana.

More to the south west is the empire of Mexico and its dependents, a capital of the same name. subject to the Spaniards; this country extends itself westward to the Pacific ocean, and the Spaniards send ships yearly from Acapulco, a port therein, across the ocean, to the Philippine isles in the East Indies.

Northward, on the Pacific Ocean, is New Mexico, and the island of California, but of these we know but

This was written about 300 years after the discovery of America; which shows how primitive and unsatisfactory were means of development, and securing exact information, covered by that period; and how great, by comparison, has been the development of the past 132 years.

For a "Dry" Congress.

The Anti-Saloon League is making special effort to defeat "wet" candidates for Senate and House, this year, and appeals to men and women to help the effort by voting only for candidates. While there is little chance for the repeal of the 18th amendment, the League fears that the liquor interests will try all means to interfere with present laws, and wants to make assurance doubly sure by sending to Congress only the right sort of men. A circular letter from the League, says:

"The only way the good men and women of the country can defeat this tremendous combination of appetite and greed is to mobilize every friend of law and order and decency to register their conviction at the ballot box on election day. When the ballot boxes are open there is no way to distinguish whether a vote has been cast by a man or a woman. All count for exactly the same. Unfortunately there are some of our new voters who will be swayed by immoral and unright-eous motives. This is a regrettable fact. We are sure, however, that the vast majority of our women can be depended upon to do right. If they count for the most, their opinions must be expressed by voting."

A record breaking apple crop is reported in Adams, York and Franklin counties, Pa. The fruit is also in fine condition. The entire Pennsylvania crop is placed at 17,500,000 barrels. The chief danger now is, that help will not be sufficient to handle and save the crop.

Another old saying has gone into the discard—the one about the rain making corn, and corn making whiskey, etc. It stops this year, with

DECLARATION OF INTENTION. Held not to Apply to Women Votes

Women who came into Maryland after March 29, 1902, and prior to August 26, 1920, when the proclamation of Women Suffrage was issued, are not required to make a declaration of intention for the purpose of registration, according to an official opinion by Attorney General Armstrong. It was at first believed that women would be subject to the provisions of the Declaration of Intent law, passed 1902 This law requires that, before a voter can participate in a Maryland election, he must make a declaration that he intends to retain this as his residence. This must be done one year before an election if the individual comes from another

Many county women have moved to Maryland within the last eighteen years and of course, never had any reason for making a declaration. When women suffrage became a fact it was, naturally, too late to comply with the law.

The ruling of the Attorney-General sets at rest all doubt about the status of county women who have come to Maryland since 1902. Any woman who was a resident of Carroll county on the date the proclamation was made public is eligible to register. Women, however, who came to the state since August 28 must now declare their intention in order to participate in the election next year. This also applies to any woman who has temporarily left the state since that date.

An effort will likely be made, at the special session, to repeal this law.

Home-made Grape Juice.

Wise housekeepers can have plenty of grape juice for use not only as beverage but as flavoring in various tempting desserts. The following directions for making it are given by the United States Department of Agriculture: Only clean sound, well-riped but

not overripe grapes should be used. These may be crushed by a potato masher or some similar implement, or the juice may be pressed out in an ordinary cider mill. Pour immediately into a glass or enameled vessel and allow it to stand overnight. Drain the juice from the sediment and run through several thickness of clean flannel. Pour into clean bottles, leaving space at the top for the liquid to expand when hot. Put bottles on a false bottom in a wash boiler, if no commercial pasteurizer is available; fill boiler with water to within an inch or so of the tops of the bottles. Place a thermometer in one of the bottles and heat until the juice reaches a temperature of 180°; then take the bottles out and seal or cork them immediately. Only new corks that have been soaked for 30 minutes in water at a temperature of about 140° should It is well to take the further precaution of sealing the corks with paraffin or sealing wax to prevent the entrance of mold germs

Grape juice may also be made by adding 1 pint of water to every 5 pounds of grapes. Concords and Niagaras make an acceptable product. Crush the grapes, add the water, bring nearly to boiling point and strain. Add one-half cup of granulated sugar to every quart of juice. Bring just to a boil, pour into boiled bottles or cans, place in water bath, and boil 10 mi i-

utes; seal air-tight. Unfermented grape juice properly made and bottled will keep indefinitely if not exposed to the atmosphere or to infection from mold When a bottle is once opened, however, the contents should be used as soon as possible.

ASTHMA CURES MADE WITH STRANGE SERUMS

Hundreds of Sufferers Reported to Have Been Cured.

The Philadelphia Ledger, on Tuesday, contained the following remarkable article on the subject of a new cure for asthma and hay fever. It reads like an advertisement, but we give it as we get it, and for what it may be worth, in the hope that some of our readers who suffer from these maladies may investigate and find relief. The article says:

After years of fruitless effort on the part of eminent medical men the world over to combat asthma, hundreds of sufferers of that stubborn affliction now are being cured each month at the Jefferson Hospital, Philadelphia. The new treatment consists of injections with a combination of serums the ingredients of which are amazing to the layman's mind.

Such startling substances as cat fur, goose feathers, cabbage, fish, horse's mane, onions, dog hair, milk, barley and mustard are used in the preparation of the serums, which have afforded relief to nearly 3000 chronic sufferers since January 1.

At that time, the hospital opened a special asthma clinic under the direction of Dr. Alexander Sterling, who had been in charge of an anti-asthma serum research department for more than five years. An average of 100 patients a week has visited the clinic, which is open every other day, and of those between 75 and 90 percent have been cured, according to Doctor Ster-ling. Many of the men and women, said Doctor Sterling, in vain had tried every known method of fighting the disease and had not been able to enjoy sound sleep for months before visiting the new clinic.

And all those sufferers owe their regained health to cat fur, goose feathers, barley, fish, cabbage, dog hair, mustard, horse hair, milk and onions, applied either singly or in combinations of two, three, four orall of them. all of them.

Strange though some of those ingredients of the serums used may seem at first, they lose their weird. incongruous aspect after an expla-nation by the man who applies them with a success that is filling the medical word with wonder.

"Asthma and in some cases, hay fever, too," said Doctor Sterling yesterday, "is caused by eating or inhaling the protein contained in any or all of those substances. For instance, asthma may be inflicted upon a person by sleeping on pillows stuffed with goose feathers, or on mattresses filled with horse hair. It may also be due to wearing a fur coat, or to the stroking of a pet, such as a cat or a dog. Those are cases of inhalation.

"Then there are the proteins in certain foods which are responsible for asthma. Most common among those are fish, barley, some kinds of bread, cabbage, onions, milk and mustard."

"In brief, the method consists of immunizing the patient by injecting into him the offending protein in ascending doses, until his blood is able to resist any outside attack.

"But, of course, before I know which serum to inject I have to diagnose the case. This I do, first, by ask ing the patient questions, and second, by injecting one of the serums. "For instance, the patient tells me

that he suffers an atttack of asthma after eating fish. I inject the fish serum, and note the reaction. If I find that the patient has stated the causes correctly I tell him to eat a good deal of fish and see me again in a few days.

"At the second visit the symptoms of the reaction are complete and I can then proceed to treat the patient. From that time on I tell the sufferer to abstain from the food which caused the trouble, or not to sleep on feathers or wear a fur coat, as the case may

"These instructions the patient must follow strictly until he is immunized. After that the particular offending article will give no further

"However, in some cases I find that the asthma is caused by a combina-tion of offending proteins. The patient, for example, has contracted the disease by sleeping on feathers and also by eating a certain food, say cabbage. In such a case both serums are injected. Sometimes a patient is cured by the injection of as many as four or five different serums.

"Between 75 and 90 percent of an average of 100 patients visiting this clinic weekly are cured. None of the patients dismissed as healed has re-Charles A. Harner and wife, to turned. I may, therefore, safely say Charles C. Haugh, 22 sq. per., for that the cure is permanent."

GUARD FARM WATER SUPPLY

Clear Water May Contain Disease Germs and Poison in Solution.

All is not pure water that sparkles. Many persons confuse clear water with clean, and think that because water is clear and sparkling it is necessarily pure. On the contrary, water that appears best to the eye may be vilely polluted. It may be clear and yet contain the invisible and deadly germs of typhoid fever or other intestinal disorders. It may also contestinal disorders. tain considerable poisonous matter in solution. A polluted water supply is evidence of the existence of bad sanitary conditions which it is of the ut-

most importance to remedy.

With the growth of population and development of industries there is progressive pollution of streams, so that in the more thickly settled regions streams not already contaminated or subject to pollution are very rare. Water supplies from running streams should, therefore, never be used for household purposes unless no other supply is available. If surface water must be used, it should be clear and should be boiled 20 minutes. Other processes of purification, such as filtering, treating with a misches tering, treating with chemicals, or distilling, are also sometimes used, but under farm conditions are attended with uncertainty and expense. Under ordinary conditions surface water of any kind should be looked upon with

Deep wells, as a rule, are less likely to be polluted than shallow ones. Polluted surface water, however, of ten gains access to both deep and shallow wells at the top. Shallow wells are often polluted through the soil. Deep wells may be likewise polluted through the soil or through rock fissures. Sound casin is a protection but even with this protection surface water may follow the casing to the bottom and thus enter the well.

The logical first step in securing a clean well well.

clean well-water supply is to remove all the sources of possible pollution. among the worst of these are the open privy vault, the cesspool and barn-yard filth. A well in ordinary per-vious soil located lower than and within 100 feet of any of these is almost certain to be polluted. Even though the well is located on higher ground than these sources of pollution, heavy pumping or dry weather may so lower the ground-water level that polluted or contaminated water will be drawn into the well.

Sewage, garbage, manure, or other wastes should never be dumped into limestone sink holes or fissured rock, and above all, into old abandoned wells. An old well used for this purpose is very likely to communicate directly with and pollute the waterbearing stratum from which the other wells in the vicinity draw their supply. Slops or other waste water should never be thrown out of the back door or window upon the ground. If the pigs and chickens must run at the pigs and chickens must run at the pigs and chickens must run at the pigs. large, they should at least be kept away from the well.

Tight, concrete manure pits, imperand water-tight drain are desirable features for farm buildings. If these are beyond the farmer's purse, the manure pile should at least be placed at a safe distance from the well. The well itself should be located as high as possible with respect to buildings, stock pens, and chicken yards, and as far away from the channels of impure drainage and other sources of pollution as possible. -Ag. Dept. New Letter.

The Big Drop in Sugar.

All sugar refiners are now selling sugar to jobbers at 15c. This represents, in some cases, a loss of from 8c to 10c per pound to the jobbers, as they placed car load orders at 23c to 25c per pound, and frequently did not receive the shipments in time to dispose of the sugar before the drop came. Retailers have lost, too, but owing to comparatively small purchases, their losses will not be so heavy.

It seems to us that as the government regulated the profits on sugar, some one—either the government or the refiners—should indemnify the jobbers, if not the retailers, for their heavy losses.

Political Advertising.

The Record has always opened its columns to all political parties and interests, for advertising. It reserves the right to comment on issues and efforts, in its own way, but it does not commit itself to the use of special propaganda, issued from any headquarters or individual, in the interest f any political, or semi-political, ef-

The Record will publish advertising matter in the interests of Antisaloon League efforts, or votes for women, or for either of the recognized political parties, but it will not go further and open its columns in the interests of either as the "organ" of any particular effort.

This same position applies to the promotion of other "interests." Hereafter, we expect to make less use of specially prepared copy, sent us as "news," but which is really the best sort of "advertising," and entitled to be paid for.

John H. Mitten, one of the editors of The Times, Westminster, was 76 years old, last Sunday. He is actively on the job every day, and is still a valuable man in general newspaper work, and as a citizen of the county generally. We extend to him our congratulations, and "wish him many more birthdays," as newspaper cor respondents often say.

AMERICA'S NEW BIRTH OF FREEDOM.

Address delivered by Wm. F. Williams, Jr. at the dedication of the Soldiers' Memorial, Taneytown, Md., Sept. 6, 1920.

Mr. Chairman, Ladies and Gentlemen: While the object of this occasion has already been stated, and while it is recognized, primarily, as a local celebration, or memorial, I hope I shall be pardoned if I take the liberty of interpreting it in more than simply a local sense. I would express the hope that we may see in this memorial, not only a splendid and worthy testimony to those brave boys of Carroll county who made the supreme sacrifice for their country, and those who were willing to make it, but we may likewise see and interpret this program with a vision and hope that comprehends our entire country.

In our busy lives we find entirely too few opportunities for such significant gatherings. It is indeed a hopeful sign when so many, even for a few hours, lay aside, or turn away from, material things and meet to participate in a celebration, or memorial, in which the emotional, sentimental or devotional, predominates.

A man without emotion is but lit-

tle more than a mere machine. Such gatherings give us a good argument with which to meet and refute the cynic and the materialist, who would have us believe that ALL men are wholly absorbed and interested in things material, and there is no place in our lives for the higher, nobler emotions and appeals of the

As I gave some thought to your proposed memorial, and considered what might be expected of me in the matter of an address, the immortal words of Lincoln, at Gettysburg, and the conditions under which he spoke there, came to me with an irresistible appeal. As I read those words it seemed to me that in them I could see, as never before, an admonition and a suggestion of what our own country, as well as the world, so greatly needs today, and which, perhaps, too many have forgotten.

The conditions surrounding the livery of Lincoln's Gettysburg address are, or should be, familiar to all, and I shall not recite them. I shall, however, ask that you note the slight changes needed in its composition to make it read as though it had been prophetically spoken, and providentially preserved, to warn and inspire us in this crisis through which, as a na-

tion, we are now passing. He said:
"Four score and seven years ago,
our fathers brought forth upon this continent a new nation; conceived in liberty and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met upon a great battlefield of that war."
"We have come to dedicate a portion of that field as a final resting

place for those who gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

"But, in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our poor power to add, or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here."

"It is for us, the living, rather to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. is rather for us to be here dedicated to the great task remaining before us; that from these honored dead we take increased devotion to the cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this nation, under God, shall have a new birth of free-dom, and that government of the peopie, by the people, for the people shall not perish from the earth." And so, bearing in mind the relation

which our brave boys of Carroll bore to their brothers in arms; believing we should give to this memorial occasion far more than a local significance; and feeling that we yet stand in shadows cast by that world-wide herror, for which no appropriate name has yet been found, I come to you to-day, my friends, to speak, for a little while, on "America's New Birth of

Why speak to a free people of a "new birth of freedom?" you may ask. What need is there for our freedom to have a "new birth?" you say.

those forged by hammer and anvil. Custom, habit, belief, doctrine, environment; these and other forces which affect us, are as links in a chain which bind, or enslave us far more effectually than the ruthless policy of a master, or the edict of a

Seeing then, as I do, evidences of things which tend to enslave, I deem it the duty and privilege of thoughtful men everywhere to raise their voices against the dangers which threaten to rob us of our liberty, and bring upon us the penalty other nations have paid which refused to be warned of

their peril.

In the discussion of some of the problems so vitally affecting our country-and this seems to me a most appropriate occasion for such discussion I shall speak of them as, in my judgment, they appear in our large cities and industrial centres; for we find that the concensus of opinion among students of our social, economic and industrial problems is, that they are more acute, or far reaching, in the cities than elsewhere. Not that any part of our country is free from great problems, but since the tendency is to leave the rural sections and live in the cities, none should be indifferent to them or their solution.

THE OUTLAW STRIKE. One of the most dangerous developments recently appearing in our in-dustrial life, is what has been called

the "Outlaw Strike." To the thoughtful citizen whose natural sympathies are with the man who "in the sweat of his brow eats his bread," no more dangerous or demoralizing symptom has ever been noted in the industrial life of our na-When members of labor unions, or any one else, repudiate their obligations and deny their willingness to abide by agreements which all con-cerned had every reason to believe were made in good faith, they have not only taken a long step toward alienating the sympathies of their natural sympathizers, but have shaken the very foundation upon which the structure of industrial honor and public confidence rests. The foolish man "who built his house upon the sand" was no more foolish than those

responsible for the "outlaw strike."
"Labor Day," a great memorial to
the dignity and power of organized
labor, and one which we, in a sense, are observing today; this day, which means so much to labor—unless labor rids itself of radical, unworthy leaders, and abandons such unworthy and indefensible weapons as the "outlaw strike" and "walkout vacation,"may cease to be observed as a holiday by decent citizens of our country, and will only remain as a reproach and rebuke to those who shall have forfeited the respect, support and sympathy of honest men. Organized labor's best friends can render it no better service than to discourage all dishonorable and dishonest ices. No one would deny the practices. right of redress of a grievance, but all should insist that justice be secured without sacrifice of honor.

THE PROFITEER. The day is not far gone when there was a universal cry and criticism against the "trust" and those responsible for "trust" methods and policies. I have made my contribution in denunciation of them, and have nothing to offer in retraction, or apology. But, the blackest spot on our national, economic and industrial character, is that made by that modern vampire and offspring of greed and covetousness—the profiteer. Compared to him, the old trust magnate, with all his evil, was an angel of light to an

imp of hell. Worshipping mammon as his god, void of conscience as a serpent, determined to coin the horrors of war into blood-stained gold, the profiteer has stalked through our land as ruthlessly as some fiend with hob-nailed boots would crush the skulls of nursing infants who, lying helpless in his pathway, might impede his progress toward his victim. These degenerates deserve to be jailed, and then ostracized from decent society as though they were lepers; for social These fiends are lepers they are. giving us a practical demonstration of the doctrine that "might makes

"PASSING THE BUCK."

The report published in the daily papers of Baltimore City, on Aug. 31, showed how the mine operators had increased the cost of coal at the mine one dollar a ton to meet the increase in wages which they expected the commission appointed by the President would allow the miners. But when the award was announced it was claimed by the writer that an increase of fifty cents on the ton would have paid for the wage increase allowed the miners, so that it appears the operators had "cleaned up" fifteen million dollars in the period between May and August. The retailer, in his turn, had "passed the buck" on the ultimate consumer" in some cases charging as much as three dollars and seventy-five cents a ton over the May price. And yet, we sometimes boast of our freedom, and wonder at the growth of radicalism in our country.

MORE PAY, LESS WORK.

The nation-wide, and probably world-wide, scarcity of dwelling houses, due to conditions resulting from the recent war, has developed a condition which, if true, as reported to me by men whom I have always found to be truthful and reliable, and who are in a position to speak from personal knowledge, reveals a disreptuable and dishonorable policy on the

part of those guilty of such acts.

I recently read in one of our daily papers the report of one who claimed to have investigated, and compared the wages received and average number of bricks laid by bricklayers during each year, from 1909 until and including part of 1920. This report showed that while in 1909 they received 50 cents an hour, and laid 1400 bricks a day, they now receive \$1.25 an hour and lay an average of 541 bricks. It was estimated by a writer reviewing this report that if this rate of increase of pay and decrease of work continued, by 1930 Yes, in a sense, we ARE all free. But let us not forget that, though decrease of work continued, by 1930 decrease of work continued, by 1930 decrease of work continued, by 1930 they would be laying about one brick ably the world, today. Social, ecother world, today all they would be laying about one brick ably the world, today. Social, ecother world, today all they would be laying about one brick ably the world, today. slavery which bind more securely than a day and getting \$17.00 a day for nomic, industrial and political evils, all

laying it. I could hardly believe such a condition existed, and so asked the friends of mine who employed bricklayers and other mechanics, and was astounded when they gave me figures showing even greater differences than those just quoted. They said the same principle applied in other lines of work. I have nothig to say against the increase of wages, as all know the great increase in the cost of living has made necessary large increases in salaries, but an employee who deliberately does less than 50 percent. of the amount of work he can do while receiving such wages, is as clearly a thief as though he picked the pocket of his employer as he lay asleep on his bed. No real friend of a mechanic will try to defend such dishonesty. And the quicker such practices are abolished the quicker will there be more cordial relations established between employee and employer. Arrogance on the part of an employer, and dictatorial power on the part of labor unions, will never produce a happy solution to our industrial problems. A day of honest work and a fair payment for the same, must be the policy adopted if we are to be free from industrial discord and trouble.

DEFIANCE OF LAW.

The effort of the government officials to enforce the eighteenth amendment to the constitution of the United States, has developed a situation which deserves and should receive, the serious consideration of all hon-est, law abiding citizens. I have no desire, nor intention, to discuss the merits or demerits of prohibition. That is immaterial here. But the matter of respect for the authority of the constitution of our country, is a question which no good citizen can look upon with indifference if he appreciates the fundamental principles upon

which this republic rests.

Anyone who claims that on the adoption of the eighteenth amendment every requirement was NOT fulfilled, either does so through ignorance or with the deliberate purpose to deceive. The unanimous opinion of the Supreme Court has decided its constitutionality beyond the shadow of a doubt; and yet, in spite of these facts, the papers of our country are full of accounts of flagrant defiance of the laws enacted to enforce the amendment. Not only is this true, but many of the daily papers of our country—certainly a

large majority of those in the eastwhether inspired by mercenary or lower motives, apparently look upon these law-defying, law-breaking acts of these criminals, with indifference, or with editorial comment which tends more to encourage than condemn this

This lawless element would try to justify their defiance of law and lack of respect for the constitution of our country, on the absurd theory that if they do not like, or approve, a law, or if it interferes with their "personal liberty," they are under no obliga-tions to respect or obey it. The logic of this argument, if carried to its conclusion, would leave each man free to select and obey only such laws as he personally approved, while defying all others. To me, this is little, if any, above anarchy, which is defined

in the Standard Dictionary as "the theory of individual liberty."

Those honestly opposed to this amendment, and think it harmful to our country should, respect and obey it so long as it is part of the constitution, while exercising their right to endeavor to repeal it in a legal, orderly, constitutional way. Any man or woman who deliberately refuses to report the violation of this law, they having knowledge of such violation, is as derelict in their duty as though they saw a thief entering a house and refused to call an officer. The principle involved is that of law enforcement and detection of crime; not like or dislike of a particular law.

LOW MORAL STANDARD. No good citiezn can be indifferent to that which affects the morals of his community, or his country, and it is only from a sense of duty that I call to your attention some evidences which indicate that the standard of decency and morality among many women of our country is far below what it should be.

We read history in vain if we fail to take warning from those nations which met their doom in immoral de-

The lewd and lascivious dances indulged in by many of those attending public dance halls; the indecent exposure of their bodies by women who should set an example of modesty to girls who associate with them and look to them for an example; these are symptoms of a danger which should not only give us great con-cern, but should arouse all of us to stern indignation and determination to correct these evils before our moral standard degenerates to the level of

a Sodom or Gomorrah Any man coming into the presence of ladies with his body naked to his waist, would be charged, and justly so, with violating all laws of decency and respect; and yet we see women on the street, in the cars, at places of amusement, and even in places of worship, so scantily clothed in thin transparent material, that the very nature of their costumes suggests the lewed and lascivious, and we toler-

ate it with hardly a protest.
All advocates of morality and decency should be thankful that at least one religious denomination has announced its intention to deny the sacraments of the church to all women who refuse to dress with a reasonable degree of modesty when they attend

places of worship. LOW SPIRITUAL TIDE. The spiritual tide in America today is running alarmingly low, and presents a condition peculiar to no one church, sect or denomination. It is general. Many have forgotten, or ignored, the divine proclamation that "righteousness exalteth a nation, but sin is a reproach to any people." The line of demarcation between the man in the church and the man of the world, who makes no religious pretension, is too often almost obliterated. To me, this is the greatest dan-

these present problems which deserve our serious consideration, and which we should strive zealously to solve; but none, or all of these approximate the deadly, blighting calamity which threatens the individual or nation which forgets God.

These evils, at their worse, affect things which are temporal, and therefore transient, but to ignore and forget God, and arrogantly deny his claim upon us, will not only deaden and dull the highest, noblest and best in us here, but will damn our souls through eternity.

There is a call to our very best efforts to free our land from this religious indifference. The call is to the laymen, as well as the clergy. The church needs to stand steady and immovable as the Rock of Ages against all efforts of those who would compromise with modern evils under the guise of "liberality" or any other

subterfuge. And so, my friends, as long as we are the victims, may I say, of such doctrines, policies, practices and environment as those to which I have called your attention today, we are not "free" in the highest and best sense of that term, and nothing less than a "new birth of freedom" should satisfy us, or cause us to cease our efforts to be free from such evils.

CONCLUSION. In answer to the insistent and anxious call of humanity to save the world from the destruction, devastation and damnation of a conquestmaddened despot, America answered in a voice heard around the world: "HERE!" And under the magic touch of patriotism, sympathy for the oppressed, and determination to crush tyranny at any cost, there sprang into existence an army of millions of the finest, cleanest, bravest soldiers through whose veins human blood ever coursed.

In the time, and with a minimum of casualties which astounded the world, those millions crossed the ocean and threw themselves into the vital and crucial points so long held by those brave fellows whose hearts were sick and whose hopes had fled.

And then—Oh the immortal glory of it! With an irresistible power, against which neither the forces of earth nor demons of hell could long endure, these boys in khaki, with never a quivering or a halting step, beneath the folds of the "Star Spangled Banner" which has never defeat, pressed ever onward through gas, and mud and shell, and wire, and every death dealing torture conceived by fiends. On! On! and on, on, they went, until victory was

theirs, and civilization was saved. Then hope came into hearts where despair had reigned.

Then light came into eyes which

had dimmed from weary vigil.

Then men embraced men in the ecstacy of their new found joy. Then the highest ideals were enunciated and answering "Amens" echoed around the world. Then God was proclaimed as Jehovah who delivered. Oh, that this consummation had endured! But, in our deliver-ance we stumbled and fell. Fell into greed, fell into lust, fell into excesses

of body, mind and soul. Jealousy and suspicion raised their heads and showed their poisonous

In the mad scramble for pleasure and gold, God was forgotten and self was enthroned. Under the blighting pall of greed and lust, high ideals wither and true liberty lies in chains And, while my call to you today may be as discord where sweet, soothing music is desired, as God has given me the light, I have praclaimed the truth as I see it.

arise in the might of faith and in our American manhood, and, in the dedication of this beautiful tribute to the beloved sons of old Carroll, let us, here and now, rededicate our lives to

the country we profess to love!

Let us adopt, as our watchword, that trinity of virtues which, in the horror of war, was our constant companion—Duty, Service, Sacrifice. Let Duty be to us not a burden, but a privilege. Let Service be real to God, and our fellowman. Let Sacrifice bring no faltering, but let its altar be our

Then, with Duty, Sacrifice and Service exemplified in our daily lives, and with an unshaken faith in God, and a determination to rid our land of the evils which threaten it, ours shall be the glorious privilege to visualize and realize the ideal of Lincoln in America's "New Birth of Freedom."

"In the beauty of the lillies
Christ was born across the sea,
With a glory in his bosom
That transfigures you and me:
As he died to make men holy,
Let us LIVE to make men FREE,
While his truth goes marching on.

A Greatful Letter.

It is in trying conditions like that related below by Mrs. Geo. L. North of Naples, N. Y. that proves the worth of Chamberlain's Colic and Diarrhoea Remedy. "Two years ago last sum-mer," she says, "our little boy had dysentery. At that time we were living in the country, 8 miles from a doctor. Our son was taken ill sud-denly and was about the sickest child I ever saw. He was in terrible pain all the time and passed from one convulsion into another. I sent my husband for the doctor and after he was gone thought of a bottle of Chamberlain's Colic and Diarrhoea Remedy in the cupboard. I gave him some of it and he began to improve at once. By the time the doctor arrived he was out of danger." -Advertisement

Chronic Catarrh.

Our manner of living makes us very susceptible to colds and a succession of colds causes chronic catarrh a loathsome disease with which it is estimated that ninety-five percent of our adult population are afflicted. If you would avoid chronic catarrh you must avoid colds or having contracted a cold get rid of it as quickly as possible. Chamberlain's Cough Remedy is highly recommended as a cure for colds and can be depended upon.

DEPARTMENT STORE

HIGH-CLASS MERCHANDISE AT LOW PRICES

We always keep this motto in mind in making our purchases and feel we are in a position to save you money in any of our departments.

In keeping with the above policy, we aim to keep on hand a Large Assortment of

Calico, Apron and Dress Gingham, Shirting, Percale, Towelling, Muslin and Sheeting, White Dress Goods of every description, Silk and Dress Goods,

Hosiery, Work and Dress Shoes, Men's Hats and Caps, Work Pants and Shirts, Groceries and General Household Necessities.

Give us a call and let us convince you that your dollar will go as far with us as with any other Store.

Yours For Service

Conservation

'Ma, can't I have some little brothers and sisters to play with?" asked the lonesome little chicken of the sedate old hen. "No, Augustus," replied the thoughtful hen, "not while eggs are 70 cents a dozen."

That's conservation. A little tough on Augustus, but it had to be done. The war has taught us all the lesson of conservation. It has taught us how to save. It was a good, wholesome lesson and it should not be forgotten, now that the war is over. A good bank like ours is a friend to every saver. Deposit your funds with us and accept our banking facilities.

BEST HOUSES FOR CHICKENS

Several Plans and Arrangements Between Two Extremes Which May Suit Conditions.

In the manner of housing fowls there are two systems widely different in their extremes. At one extreme is the colony plan, which consists in placing small houses for small flocks far enough part to obviate the necessity of fences, thus giving free range with but little mingling of the different flocks. At the other extreme we have the continuous house. This kind of house consists of a series of separate pens, under one roof, opening directly into a hallway in the rear, or having doors between the pens without the hallway, or opening into a hallway and also into one another. There are several plans and arrangements between these two extremes which may be built to suit varying conditions.

The advantages of the colony plan, according to poultry specialists in the

Colony Houses Allow Flocks Free Range.

United States department of agriculture, are, first, small flocks on free range; second, no expense for fencing; third, there is less need for scrupulous attention to cleanliness and providing regular supplies of animal and vegetable feed during summer months. This plan, however, has the following disadvantages: First, extra cost of labor in caring for fowls in stormy weather, when it will often be difficult to get around to feed and care for the fowls regularly; second, houses built on the colony plan, if built as well, cost more than a continuous house of the same capacity, for partitions, which may be constructed largely of wire netting, are much cheaper than two end walls; third, the colony plan allows only about 100 birds to the acre, while the continuous-house system, with suitable yards, allows 450 to 500 birds to the acre:

ROOSTS FOR LITTLE CHICKS

Difficult to Keep Youngsters Clean if They Are Permitted to Remain on Floor.

It is often advisable to teach the chicks to roost when eight to twelve weeks of age. When they are allowed to remain on the floor it is difficult to keep them clean and to keep them from crowding. If wide roosts-three to four inches are used there is but little, if any, more danger of crooked breasts than if the chicks are allowed to remain on the floor.

The chicks can generally be taught to roost by putting the perches near the floor and placing with them one or two old hens or older chicks that are in the habit of roosting. If this plan is inconvenient or does not prove effective, the chicks may be placed on the perches after dark for a few nights, until they have learned to go there of their own accord, say poultry specialists of the United States department of agriculture.

TEST OUT BROODING SYSTEM

Greatest Loss Is Due to Chilling Received While Being Transferred From Incubator.

Chickens are usually left in the incubator from 24 to 36 hours after hatching, without feeding, before they are removed to the brooder, which should have been in operation for a day or two at the proper temperature for receiving the chickens, say specialists of the United States department of agriculture. A beginner should try his brooding system carefully before he uses it. After placing the chicken in the brooder they can be given feed and water. Subsequent loss in chickens is frequently due to chilling received while taking them from the incubator to the brooder. They should be moved in a covered basket or receptacle in cool or cold weather.

CULL OUT ALL LOAFER HENS

Reason Why So Many Flocks Are Unprofitable Is Because of Presence of Nonlayers.

Lack of proper culling thus far has proved to be, in the majority of cases, the principal reason why a poultry flock is not profitable. Forty per cent of the hens in the average farm flock today are nonproductive and should be sold or eaten. It costs about \$2 a year, taking the country over, to feed each hen. If she does not produce more than that amount of eggs she is unprofitable.

ALL DELIGHT TO HONOR FOCH

Whole World Paid Homage to the Genius of the Great French Master of War.

Marshal Foch's home in the Avenue de Saxe, Paris, has become one of the wonderful dwelling places of the world. Far more than a dwelling place, it is now a museum of glory. The rooms of that modest first floor flat are crowded with the trophies which all civilization has offered in homage to the man who led the allies to victory. Such profusion of beautiful things and notable works of art is rare, and admidst it the unassuming figure of the marshal moves almost grieved, as it seems, by the possession of these precious tributes. which only his kindly courtesy induced him to accept.

They come from every part of the world. That large, solid silver statuette of a French general of the Napoleonic wars is signed by Los Amigos de Francia a Francophile league in Spain. Next to it is an alabaster figure by a French master. Over the hearth stands a great gilt empire clock inscribed "To Marshal Foch, from the grateful town of Cassel."

Gold caskets, jeweled swords of honor, antique and valuable miniatures and ivories, the splendid enameled collar of the Grand Cross of the Bath, are crowded together in the glass cabinets that line the walls. Here is all the respect, all the enthusiasm, all the gratitude and joy of victory of a whole world, expressed in the finest and loveliest forms that the ingenuity of great artists, sculptors, goldsmiths, can contrive. And it is proof and touchstone of the merit of the man to whom they have been offered that he lives in this illustrious treasury of glory without seeming to be conscious either of it or his fame.-G. Ward Price, in the Continental Edition of the London Mail.

BEFORE WHITE MAN'S COMING

Eight Groups of Indians Divided the Land Which We Now Know as North America.

The North American Indians were divided into seven or eight great groups, according to their various languages. The Algonquins made up the largest family, comprising the eastern tribes of Canada and the United States south of Hudson bay, east of the Mississippi river and south to Virginia and Tennessee, including the Ojibwas, Ottawas, Crees, Algonquins and Blackfeet. The Iroquois or Five Nations of Cooper's stirring tales inhabited the east central states, including New York. West of them lived the Dakotas or Sioux, from Canada to Arkansas and from the Mississippi to the Rocky mountains. The Muskokis or Appalachians occupied the southeastern states as far west as the Mississippi; while the Shoshonis were at home in the region from Texas to Montana and from California to Idaho. The Athabascas, the Yumas, and the Pueblos occupied Alaska and Canada, Oregon and New Mexico respectively.

Strange Hotel. What is probably the queerest hotel and restaurant in the world is that recently erected at Atlantic City, N. J. It takes the form of a monster elephant. Seen from a distance the resemblance of the structure to a live elephant is remarkable. As you approach it its huge size becomes apparent, but you quickly observe that it is only a thing of wood and iron, but most cleverly contrived. It boasts of many beds, and a dining pavilion on the animal's back capable of accommodating two hundred people. One reaches this novel restaurant by means of a staircase which runs up through the animal's legs and body. Here and there windows give the necessary light. Needless to say the elephant hotel is causing quite an attraction, and its owner bids fair to reap a good harvest as a result of

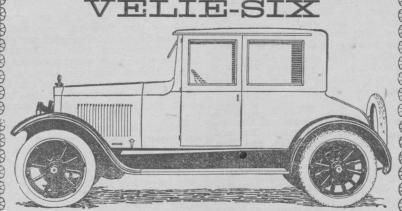

Virginia Still Holds Record. Even with the inauguration of an Ohioan as president next March assured, as nearly as human events can be, Virginia will still hold the record for native sons in the White House. The record then will stand: Virginia, Washington, Jefferson, Madison, Monroe, William Henry Harrison, Tyler, Taylor, Wilson, 8; Ohio, Grant, Hayes, Garfield, Benjamin Harrison, McKinley, Taft, Harding or Cox, 7. Of Virginia's sons five were of English paternal ancestry, two Scotch, one Welsh. Of Ohio's sons three were of English paternal ancestry, two Scotch, one Scotch-Irish. We have seen no authorized statement of the paternal ancestry of Harding or Cox.

his ingenuity.

Experiments in Road Building. In order accurately to determine the durability of the various kinds of roadway, the government bureau has a stretch of roadway at Arlington representing all the different methods of road building, and over this a heavy machine is drawn back and forth by cable. This is supposed to reproduce the action of vehicles passing over it and the results are carefully noted and compared. The result of the operations will be used as a guide to the expenditure of nearly \$300,000,000 which will be made under government auspices during the next three years.

In Favor of Yachts. "You prefer yacht racing to horse racing or motor racing?"

"I do. You can take your wife to see all kinds of sail boats without her insisting on your trying to own one."

Feed Every 3rd Hog FREE

Save feed and get your hogs ready for can save fully one third your feed, making possible to feed every third hog free by feeding

Milkoline At 2c a Gallon Milkoline has a base of pasteurized and sterilized,

modified Buttermilk. It is guaranteed not to contain any sulphuric acid or anything of an injurious nature to hogs or poultry.

Aids Digestion: Thousands of the most successful hog raisers from New York to California during the pastseven years have proved that Milkoline helps and assists digestion, tending to insure perfect assimilation of feed. It helps tone up the system so that hogs are less subject to disease, and practically insures gains of 2½ pounds per head per day.

University Tested Professor W. B. Combs while Ass't. Prof. of Dairy Husbandry at Missouri University conducted a scientific test on Milkoline and found that Milkoline fed hors on Milkoline and found that Milkoline fed hogs put on more weight and showed \$2.57\% more profit than hogs not fed Milkoline. W. H. Graham a successful feeder of Middletown, Mo., said \$30 worth of Milkoline made him an extra profit of \$420. Lee Jackson of Vappingers Falls, N. Y., says Milkoline fixed up a bunch of shoats in fine style and is great for brood sows.

Can't Spoil: Milkoline is guaranteed not to rot, sour or mould. It will keep indefinitely in any climate. Flies do not come near it. It is always uniform, and is guaranteed to make you money or it doesn't cost you anything. -Distributed by-

2c a Gallon Milkoline Milkoline comes in condensed form, and you do the diluting on your own farm. When fed as directed Milkoline mixture (one part Milkoline to 50parts water or swill) costs only 2c a gallon. Full feeding directions free, It is shipped in convenient kegs and barrels which we supply free. The prices are as follows: 5 gal. \$7.50; 10 gal. \$12.50; 15 gal. \$16.50; \$2 gal. \$32.00; 55 gal. \$19.50. It pays to buy in barrel lots because you save 60c a gal. over the 5 gal. quantities.

30 - Day Guaranteed You are safe in ordering any quantity of Milkoline today. Feed one half the shipment to your hogs and poultry in a thirty day test, then if you aren't entirely satisfied return the unused part to us at our expense and we'll immediately refund every cent you paid us. We are so confident that you will find Milkoline the best morey makes on the farm that the are so confident that you will find Milkoline the best money maker on the farm that the S. W. Boulevard Bank of Kansas City substantiates this offer. You are the sole judge. Send money order, or check, to us or our nearest dealer and we will ship immediately. Our booklet, "How to Hustle Heavy Hogs to Market" will be sent free on request—your name on a card will do.

Project Up to Congress to Reclaim 4,000,000 Acres at \$250,000,000 Expense.

TURN DESERT INTO EMPIRE

Members of House Committee on Appropriations and Group of Western Colleagues Make Inspection Tour of Government Projects.

Washington.-Plans for putting 4,000,000 acres of land on the agricultural map of the United States by a program of reclamation calling for the expenditure of about \$250,000,000 over a ten-year period are to be considered seriously by congress when it reassembles.

Members of the house appropriations committee and a group of Western colleagues who have been making an inspection tour of the government's reclamation projects and of the national parks in company with officials of the department of the interior, after traveling 10,000 miles by train and 4,000 miles by auto and viewing the Irrigation achievements since 1902 have come back earnest converts to a big reclamation plan.

Arthur P. Davis, director and chief engineer of the reclamation service, who accompanied the congressional tour, is now in the West visiting other projects and preparing his recommendations for the annual estimates to be submitted to Secretary Payne.

Secretary Payne Enthusiastic. Secretary Payne, who has just inspected two of the government's principal reclamation projects at Yakima, Wash., and Shoshone, Wyo., has become an enthusiast regarding the desirability of utilizing America's undeveloped resources by building new commonwealths in the arid West.

While the reclamation service is restricted in its estimates to \$8,000,000 or \$9,000,000, equivalent to the amount received by sale of public lands, sale of water and returns on irrigation developments, Secretary Payne has already declared his intention of asking congress for \$12,000,000 to open up 160,000 acres of reclaimed land in small farms, with special considera-

tion of the Shoshone project.

Representative Will R. Wood (Rep.) of Indiana, a member of the appropriations committee, says that he and others who have just inspected these projects have been converted from their previous reluctance to make such large appropriations and now believe that it is a national duty thus to create opportunities for its citizens to establish themselves in permanent homes on such fertile areas, wrested from the desert.

Many who opposed the "farms for service men" proposition in the last congress on the grounds that it was camouflaged reclamation have pledged their support to an out-and-out irriga-

tion development. Senator Jones of Washington introduced a bill in the last session which seeks an appropriation of \$250,000,000 for reclamation work and the interior department has drafted a program

that calls for more than that.

Turn Desert Into Empire. Senator Charles L. McNary of Oregon wrote a favorable report last December from the committee on irrigation and reclamation of arid lands. He pointed out that under the reclamation act passed in 1902, the government has expended in construction work a little over \$123,000,000, that water for irrigation purposes has been made available for 1,780,000 acres of land, which had been largely barren, desert waste and unproductive. It is now worth from \$100 to \$750 an acre, with an

average crop value per acre of \$63.60. "Out of the uninhabited and almost worthless desert has been carved an empire of nearly 2,000,000 acres, intensively cultivated and producing crops whose annual average gross returns per acre are about double those of the rest of the country," says Director Davis of the reclamation serv-

While the bill introduced by Senator Jones calls for \$250,000,000, the reclamation service is now working on 30 projects which call for a total appropriation of \$302,000,000, but returns would be coming in from some of the earlier construction before the entire expenditure was made. Of the 4,000,600 acres which it is proposed to add to the farm lands about onethird is public land belonging to the United States government.

Director Davis has figured out that the average value of lands in the projects did not exceed \$10 an acre, or \$17,000,000, when the government irrigation was started in 1902, and that today they easily represent increases in land values of \$556,000,000 due to this work, and has prepared a detailed report on this for congress. He figures that only 3.5 per cent of the total ultimate cost will be finally charged against the government.

Tarantula on Shoulder.

Devil's Lake, N. D.-After setting down a crate containing a bunch of bananas that he carried across the store on his back, John Lunak, an employee in a grocery store here, felt something crawling on his shoulder, and, putting up his hand, came in contact with the largest tarantula over seen in the city. A bite from the creature would have meant almost certain death.

MONKEY MOTHERS PUPPY

The most affectionate little mother of all at the children's playground at Golden Gate park, San Francisco, Cal., is none other than Charlotte Russe, a monkey. Not long ago Mr. Taylor, superintendent of the playground, was given an orphaned puppy. Charlotte took it upon herself to care for him, and she does. Taylor is the only one who dares venture within a "safe distance" of the puppy while Charlotte is around. She is shown holding the orphan while Taylor holds the bottle.

************* Rattlesnake and Old Man Fight to Death

Atlanta, Ga.-Word has been brought to Atlanta of a remarkable fight to the death between an aged farmer, living near Buckhead, and a giant rattlesnake.

The farmer, Mack Richards, who is well advanced in years, was mending a fence when he disturbed a rattlesnake so large that when piled in a coil its head was more than two feet above the ground.

The snake struck at him and would have reached its mark if it had not been deflected by heavy briars.

Before it could coil again, Mr. Richards seized a rail, and pinned the snake against the ground. He tried to call for help, but none was near.

The snake, by main strength, twisted itself out from under the rail and prepared to strike again. This time Mr. Richards got

beyond striking distance, but the snake followed him and continued the attack.

Mr. Richards picked up a shorter rail and with it gave battle, finally killing the reptile. It measures six feet in length.

BLAME DISASTER TO CARL

Austrian Collapse Charged to Emperor's Conflicting War Orders, Says Commission.

Vienna.-Chief blame for the collapse of the Austrian forces on the Piave river, in the Austro-Italian campaign, is placed on the former Emperor Carl by the report of a commission appointed to investigate war delinguencies.

On the fateful November 2, 1918, the report says, the then emperor issued three conflicting orders within a few hours. The first was for the conclusion of an armistice. Forty-five minutes later this was revoked and 95 minutes afterward it was issued again. During this period, it was said, the emperor consulted no one on the mat-

"We must ask," the report says, "whether the emperor and his advisers were not guided by the fear of the army flooding back on Vienna rather than by any other circumstances. It may be, perhaps, not by express intention but rather subconsciously, that the desire prevailed with more than one of these men that the troops had better not return home at all.'

Hair and "Hoss" Tonic.

Louisville, Ky.—"I drinks hair tonic and hoss tonic, that's what 'toxicated me," Annie Walker told Patrolmen Revel and Fultz after they battled to place her under arrest at her home, 548 South Brook street.

Annie had just finished whipping one man-her husband-when the police arrived on the scene, drawn by her shouts of victory.

The police found an empty bottle of horse medicine.

Leaves Wreck to Wed.

Columbus, Ind.-When he emerged from a railroad wreck near Indianapolis and found he was not dead, Clifford K. Robbins, son of Mrs. B. F. Robbins of this city, hurried home and notified his fiancee. Miss Alice N. Huddleston, that he wanted to marry her at once. A preacher was awakened at 11 o'clock and the wedding ceremony performed. Then Robbins collapsed and was rushed to a hospital. He may die of internal injuries.

SPECIAL CORRESPONDENCE.

Latest Items of Local News Furnished by Our Regular Statt of Writers.

All communications for this department must be signed by the author; not for publication, but as an evidence that the items coatributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted. We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

UNIONTOWN.

Last Thursday evening, Frank Coleman, of Bark Hill, was coming to town, on his motor cycle, and when near town, passed a buggy on the road and then coming on, ran into Jacob Bankert's automobile. He was caught by the fender and had his leg broken in three places. Samuel Repp took him to the Md. University Hospital, where the limb was set, on Sat-

Last Sunday afternoon, Rev. V. K. Betts, accompanied by 47 of his mem-bers, paid an official visit to the Church of God Mission, in Hanover. Rev. Betts delivered the sermon for the afternoon, subject, "The Prodigal Son." Several selections of music were given by the Uniontown choir

Our school opened, Monday, with but one teacher, Mrs. H. B. Fogle. On the primary side, the attendance No one appeared to take the place of a principal.

Mr. and Mrs. L. F. Eckard and Miss

Sallie Yingling, visited Luray Cave, Mrs. Rose Repp is gradually recov-

ering from her late illness.
Rev. C. H. Dobson is conducting a two weeks' meeting. and members of the other churches are helping in a union service. Rev. Rotan, of Baltimore, spoke twice on Sunday. The singers, Mr. and Mrs. Sheets, were much enjoyed, and we are hoping good results may follow

these meetings. Josiah Erb, one of our oldest inhabitants, enjoyed a trip to Silver Run, last Sunday, where special services were held in the Reformed church. His boyhood days were spent in that neighborhood, and it was a pleasure to him to visit the place again

Geo. Selby entertained Rev. Dobson and family, Rev. and Mrs. Rotan, Mr. and Mrs. Sheets, Harvey Selby and family, and Miss Anna Baust, or Sunday.

B. L. Cookson and wife, in company

with Mr. and Mrs. Frank Mather, of Westminster, will motor to Pittsburg, on Saturday, for a few days' visit with relatives.

Rodkey & Co's canning factory is proving quite a success and employng quite a number of our people to help with corn and tomatoes.

MARRIED

KOONTZ-BROWN.

Mr. Charles Perry Koontz and Miss Mary M. Brown, were married at the residence of the groom's mother, near Bridgeport, on Friday, Sept. 10, 1920, by Rev. L. B. Hafer.

TRITE—CRUMBACKER.

At the Church of God parsonage, Uniontown, on Saturday, Sept. 11, Rev. V. K. Betts performed the marriage ceremony for Mr. Clarence E. Trite and Miss Anna E. Crumbacker, Waynesboro. The bride is a daughter of Mr. and Mrs. George Crumbacker, formerly residents of this neighborhood.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MR. RUSSELL STULL. Mr. Russell, son of Mr. and Mrs

D. Allen Stull, of near Bridgeport, died on Sunday, Sept. 12 from typhoid fever, aged 21 years, 1 month and 2 days. He is survived by his parents, one brother and one sister. Funeral services were conducted in the United Brethren Church, Taneytown, on Wednesday morning, by Rev. D. J. March; interment being

made in the Reformed cemetery. Mr. Stull is generally spoken of as a fine young man, and one whose untimely end is a great shock to his family, and the whole community.

MRS MARY REBECCA FAIR. Mrs. Mary Rebecca, widow of the late Mr. James F. Fair, died at Springfield Hospital, on Monday, Sept. 13. Her body was brought to the home of her sister, Mrs. Sarah Babylon, in Taneytown, on Tuesday. She is survived by one son, Mr Thomas Fair, and one daughter, Mrs. Bessie Lloyd, of Baltimore, and by four sisters: Mrs. Milton Starr, Mrs. William K. Eckert, Mrs. Sarah Babylon

and Mrs. Sue G. Crapster. Funeral services were held on Thursday afternoon at Mrs. Babylon's, by Rev. James Cattanach, the Presbyterian Church, Catonsville, interment following in the Lutheran cemetery, where her husband is buried. Her age was 70 years.

MR. DAVID H. BROWN. Mr. David H. Brown, a farmer of this district, who was taken to Frederick Hospital, on Saturday night, Sept. 4, for an operation for gall stones, died there early last Sunday morning, very unexpectedly. He was apparently doing very well, and there were no indications other than that full recovery would follow. He was seen by his nurse at about 6 o'clock, and later by Dr. Johnson, and was apparently in good condition; but the nurse, on going into his room at 7 o'clock, found him dead. Death is thought to have been caused by an embolus, or clot of blood, carried

was 45 years. Mr. Brown was a son of Samuel A. Brown, of Taneytown, who survives him, together with his wife, two sons and one daughter; also by one brother, Dr. S. G. A. Brown, of Shippensburg, Pa.; and three sisters: Mrs. Spangler, of Littlestown, and Misses

either to the heart or brain. His age

Celia and Millie, at home. Funeral services were held at the home, Wednesday afternoon, by Rev. W. G. Minnick, of Baltimore, and Rev. Guy P. Bready. Interment was made in the Reformed cemetery, Tan- gestion.

ONE AIM.

When a boy, I went partridge hunting. All unknowing, I got in the midst of a big flock, hidden in the grass. Suddenly they flew up. My excitement was intense. I pointed my gun first at one, and then at another. Finally, when they were about out of range, I shut both eyes and pulled the trigger, then looked to see the feathers fly-and they did-but not as the result of my shot. I missed the mark.

This is just the way the masses have gone through, or are going through life. We are in the midst of golden opportunities, physically, mentally, socially, financially, morally and spiritually, but the masses have had no positive steadfast aim: No real

object in view.

We think of this, and do a little of that, and perfect ourselves in no one thing, to our own undoing in this mad race of life. We are in such haste that we become "Jack of all trades" and master of none. Having no definite object in view, and not taking a fixed steady aim, we miss our oppor tunity because we do not pull the

trigger at the psychological moment. Men lack, or fail, because they have no aim: no real object in life. Better shoot at one bird and hit it, than point your gun at a venture and kill none. Have one ultimate aim and subordinate every other to it. might shoot into a flock of birds, and by chance hit one, but One Aim is governed by unerring law; it cannot miss the mark and will bring you ain for loss. What you lose in owder you will gain in birds. It is recorded that William Pitt was

orn with a definite aim. He was always taught "That great things were expected of him." Grant's mother called him "Useless Grant." But he had this one trait of character, "Stick-Lincoln said, "Grant had the grip of a bulldog when once he got his teeth in." ONE AIM makes for success or failure, right or wrong, but it gets there every time. Some Aim, may do much, but ONE AIM, will do

much more. It is a wonder worker.
Why these failures in life? Who is at fault? After many years' experience and careful observation, our conviction is that the principal fault lies at the door of Parents and Teachers. The child is ignorant and very impressionable. It has neither sound judgment nor the power of righteous will. It is largely the victim of its surroundings and of home and school training. As it comes in touch with the arts, sciences, mechanics, literature, and agriculture, it thinks it would like to work at them all, or it may prefer one, and yet that one, not be the one for which nature has best prepared it

Every child has one predominating desire and talent. Some have more. This should be discovered by parents and teachers and pressed to the front, but not to the exclusion of a general education. One thing cultivated and perfected would make them master of any condition and ensure them a competency at a pleasant calling through life. But few, comparatively, perfect themslves in their highest natural adaptability. Why not? Because as children they are not encouraged in that one thing. Indeed, I have known them to be discouraged in home and school, because they wasted so much time on this or that hobby, and as a result they never mastered any one After a few years of scattered shots, they lost heart, and gave up in despair-miserable failures- not be cause they did not have the potentialities of success within, but because had not been wisely directed take one direct aim, and use all the world within to perfect their world

without. Parents and teachers should watch the bent of mind of the child from infancy, and give it every encouragement to become proficient in the one thing which they find it especially prefers, and constantly delights in doing. It can be taught to master other things as a side issue. The Will, Self-Control, perseverance and Initiative are all cultivatable, and the perfection these in righteousness depends much spon those who have the child's

training in hand. Back of that constant building of boats with sticks and paper, painting with polkberry ink, drawing in the making models of mud, or preaching to dolls and empty chairs, may lie the spirits of greater men and women than have yet blessed the world with their God-given talents and powers. There is nothing done so well that it cannot be improved; so there is always room at the top of the

ladder of Will, Way, and Invention. Be wise. Have an object. Take definite aim. Have one thing in mind and master that. "Like begets like." The Laws of Attraction will gather about you all the essentials for growth, just as the growing plant attracts and appropriates the natural

supply. Have one righteous aim in life. This will demand all the powers of your will, to invent methods, plans, means ways for its accomplishment. The first essential to a great and successful life is "The fear of God"; and the second is, "This one thing I do.' The world today is looking for Master minds. Who can command their own price at will. Who will qualify J. THOS. WILHIDE.

A Birthday Party.

A surprise party was held at the home of Mr. and Mrs. R. C. Hilter-brick's for Miss Annie Diehl, Sept. 8th. Those present were: Mr. and Mrs. Henry Becker, Mr. and Mrs. James Rodgers, Mr. and Mrs. R. C. Hilterbrick, Lizzie Case, Iva Hilterbrick, Annie Diehl, Pauline Becker, Treva Becker, Mable Hull, Marie Hilterbrick; Messrs Harry Copenhaver, Wilbur Currens, Edward Warner, Harry Koontz, Samuel Case and Maurice Becker.

Connecticut Ratifies Suffrage.

The Connecticut legislature, on Tuesday, put through the ratification of the 19th amendment (Woman Suffrage) by an almost unanimous vote. This was in defiance of the Governor's instructions that it might not pass any measures except those for which it was called, at the same time calling a special session for Sept. 21, to

consider ratification. Also in defiance, the legislature passed two pieces of general legislation, although the Governor had given notice that he would "pocket" any such legislation.

the amendment, it will do so again, next Tuesday, at the special session, as the Governor declined to sanction the act of this Tuesday. This apparently means that the amendment has been, or will be, suffi-

ciently adopted, no matter what de-

cision may be made as to Tennessee.

Rats Overrun English Town.

Millions of rats are overunning Abertillery (Monmouth), England, and neighborhood. While the congregation was leaving a Baptist church in Tillery street on a recent Sunday an army of rats ran among them. One woman collapsed. All means have been used, but the rats have not only survived, but also thrived. The medical officer of health, Dr. Bailie Smith, says the rats are of two kinds-brown and black. The black rats, as a rule, keep to the sewers, but the brown Although the legislature ratified rats climb anything—telegraph poles and rain and gas pipes. They swarm everywhere. It was suggested to the Abertillery district council that expert rat destroyers should be employed, but local staff having stated that they could do better than the experts, the matter has been left to them with discretionary power to call in help if. necessary.

Play Ground in Tiers.

The first municipal play ground of Czecho-Slovakia, in Prague, occupies a high hill which is terraced off, supplying space at the top for tennis courts and ball grounds; on a lower terrace a pavilion, band stand and open-air theater, on a still lower tier a running track, and farther down the children's grounds, with sand pile, wading pool and swings. In this latter section there are pavilions where mothers can sit and rest or sew as they watch the children. This first play ground for children is a co-operative effort of the Czech government and the American "Y" which will eventually be entirely under government management. At present the city has supplied the place, the Y. M. C. A. is paying for the equipment and the Y. W. C. A. has given the leadership. Charts for smaller play places for other parts of the city are being prepared.

Artificial Silk Improved. A new process has been developed

whereby the same raw material (wood cellulose) is converted into an imitation silk which, when woven into cloth, has remarkable brilliancy and durabilty, with a "feel" like that of real silk. It is waterproof and no more inflammable than natural silk. The new process silk can be drawn into much finer threads than those of ordinary artificial silk, and is said to be particularly remarkable for the

By HOWARD L. RANN

THE ELECTRIC STOVE

THE electric stove is a successful device which prevents the housewife from being overcome by the heat and baked to the dull, reddish brown aspect of the Arapahoe squaw. A woman can stand in front of an electric stove all day and run it with one hand, while beating up a sponge cake with the other, and still, remain as cool and collected as a refrigerator ear. In fact, the only person who is liable to become overheated when he looks at one of these stoves is a hus-band who has just figured the meter rate with a pencil stub and a sinking

Man cannot realize what the introduction of the electric stove means to woman, because he has never posed in front of a-soft-coal range for eight hours in succession, trying to prepare

It Does Not Cost Any More to Cook a Thick Beefsteak Than It Does to Buy the Steak in the First Place.

enough food to keep a family of eight children from eating the upholstering off of a hair sofa. The old-fashioned cook stove, with sloping legs and concave stomach, has caused thousands of women to regret having given up teaching country school and entering upon matrimony with one eye closed. Nobody has ever determined the number of heat units thrown off by one of these stoves on a peaceful summer day when the air is vibrant with the melody of birds and the thermometer is running around the track with its tongue out. We do know, however, that many a man has come home at noon, only to be greeted by a wife with straight hair and carmine complexion, like unto the over-ripe tomato, all due to a steel range which was not content with trying to cook what

it carried inside. The electric stove does not have to be fed kindling in the form of cobs, but is operated by a simple button, which turns on the heat and the meter at one and the same time. This meter is very fast on its feet, and it is a painful sight for a frugal husband to watch it turn over and devour watts and kilowatts in a reckless and prodigal manner. It does not cost any more to cook a thick beefsteak on an electric stove than it does to buy the steak in the first place, and after the oven has become thoroughly heated it will remain in that condition so long as nobody wants to use the heat.

If some way could be devised to turn back the surplus heat generated by an electric stove into the meter, and get credit at the end of the month, more people would use it without a sense of dark, chilly foreboding.

ous occupation.

Builds Nests in Safe Places. A species of swift builds nests which are composed of a gelatinous secretion from the glands inside the mouth. These nests are edible and are a very popular delicacy in the Orient. They are built in cup shape and are attached to the face of the rock in perilous places, making the gathering of them a rather danger-

Last Night's Dreams -What They Mean

DID YOU DREAM OF FLYING?

T O DREAM that one is flying is a rather common experience and is one of the "typical" or "standard" dreams of the scientists as it manifests itself in practically the same manner to everybody. According to Professor Strumpell of Leipzig, one of the "highbrow" dream investigators, this dream sensation of flying is the result of the dream-mind translating the sensation caused by the rising and falling of the lungs of the dreamer after the, skin sensations of the chest have been reduced to insensibility by sleep. This theory, however, is rejected by other scientists for what seem very good, reasons-too long to recite here. Doctor Ferden of Vienna and some others interpret the flying dream as erotic dream symbolism, while Professor Freund declares that in spite of the standardization of the dream under consideration, it requires special interpretations in some persons and in all cases arises in the dream-mind or psychic.

The mystics interpret the dream as a favorable omen. According to them it is a prognostication that the dreamer will arrive at a considerable, perhaps a great, fortune, and will be promoted to some high office of state. Also it is a sign that you will be happy as well as fortunate. If you are unmarried and in love, you will marry the one of your choice and will live happily. If you are not in love now you will be soon and a marriage will result. More than that, you will have many children who will be successful

For anyone who dreams of flying there is a journey in store, which journey will result to his great advantage. The "highbrows," of course, deny that there is any prophetic meaning in the dream. . So there you are-the "highbrows" and the "lowbrows"-take your choice. (Copyright.)

Get Close

By GEORGE MATTHEW ADAMS

ANY a General, since Time got M to going, has bitterly learned the futility of fighting a battle at long range. Also, many a Business man has learned to his sorrow the disaster back of a distant relationship between himself and his customers. Step a Step Closer.

Individual supremacy and power result from combat, whether or not it is a Battle at Arms, a Battle in Business, or a Battle with your own Self. And the Closer you get to your Opponent the surer you are of Vic-

Step a Step Closer.

Another thing to remember-Imagination is a powerful factor in Success and the Closer you are to your work or your Opposition, the biggest will be your vision, the more will you See, and the clearer will loom the real purpose back of each effort that you make in life.

Step a Step Closer. Close quartered you are able to detect defects, and correct them. Close centered there is no lost motion, but power in every stroke. If you will but apply the suggested thoughts back of this little talk, to your work today, larger growth is sure. You will be a bigger man or woman.

Eager to Have It Out. "Kate never seems to grasp anything

you tell her." "No; she's the kind of woman who instead of listening to what you are saying is already listening to what she is going to say."-Boston Tran-

PUBLIC SALE

The undersigned will sell at public sale, at her property near Harney,

SATURDAY, SEPT. 18th. 1920, at 1 o'clock, the following described personal property:

HOUSEHOLD GOODS, consisting of 1 range, 1 egg stove, 1 parlor stove, 2 beds, 1 cot, 1 bedspring, 1 feather bed, 1½ doz. chairs, 4 rockers, 1 sink, 3 clocks, 1 reel, 2 spinning wheels, 1 ingrain carpet, 1 brussels, carpet, 12 carpet, 2 carpet, brussels carpet, rag carpet, dough tray, walnut corner cupboard, kitchen cupboard, 6-ft. extension table, 2 breakfast tables, stand, 2 mirrors, pictures, lamps, dishes, cooking utensils, waffle iron, crocks, jars, fruit jars, knives and forks ½-barrel cop-per kettle, two ½-barrel copper ket-tles, brass preserving kettle, 5-gal. coal oil can, Enterprise sausage stuffer, Enterprise sausage grinder, pudding stirrer, 2cider barrels, churn, butter bowl; buckets, meat hogshead, washing machine, wringer.

CARROLL RECORD

STARTING IN RIGHT

By DORA MOLLAN

Halton Jones was a New Yorker born and bred. A little of the citydweller's assurance crept into his voice while his arm found its way around Ruth's slender waist. "You do love me, don't you, Ruth?"

"Yes," replied Ruth Redfield, tremblingly but confidently.

So they settled their future under the maple trees by the spring, with ar August moon looking down. And the transforming light of that heavenly body slurred kindly over the crude and lovely aspects of the little New England farm, emphasizing the inherent beauty of the scene. To Ruth that moonglow typified Hal's love for her, which, shining down the pathway of life, would transfigure every sordid de-

The next day Hal's vacation visit in the vicinity came to an end and he returned to the city. "I'm going to plug hard and make good, Ruth, and just as soon as I can save enough so we can start in right we will be married."

Ruth, wonderfully happy, acquiesced. She wanted time to dream over this new element in her life and there would be so many things for her clever Yankee fingers to work on as she dreamed! Things for herself and the new home in the big city.

Mrs. Redfield took the news calmly; life had taught her the futility of taking any news otherwise. "You tell Joe," Ruth requested, not meeting her mother's eye. And Mrs. Redfield did that evening after Ruth had gone to her room. Joe Hodges sat across the table plunged in study, for he attended a nearby agricultural school, doing the rough work on the Redfield farm for his board.

Mrs. Redfield didn't raise her eyes from the rags she was sewing, nor did she reply to the boy's choking, "I'm glad for her." But after a while she walked around the table and put her

Itehed for a Chance to Lay His Hands on the Slender City Chap.

hand on the bowed head. "All things turn out for the best Joe," she said,

Then Joe Hodges, clenching his toilroughened hands, decided to carry on; to stick to his plans for the futurewith one change. There would be no woman in them; if Ruth was not for him then he wanted no one. It was characteristic of Joe that he never considered leaving the Redfield farm but stuck on, working harder than ever and trying to be to Ruth as a kindly, helpful brother.

Ruth informed her friends that her wedding would take place the following spring. "Hal wants time to save enough so we can start in right," she would add proudly. "We're going to have one of the most modern apartments, so I won't be a slave to house-

There followed busy days when Ruth, singing over the task, dyed various scraps of material in bright colors and cunningly fashioned them into gay little rugs. Then word came from Hal that he feared the rugs she described wouldn't fit at all in the sort of apartment he had planned to take. Ruth put them away regretfully; but in a few days bits of white material, and dainty laces took their place and the singing was resumed.

After another letter from Hal these vanished also. Ruth elaborately explained to her mother that Hal had advised saving her money and buying everything in the city at the last moment. "He says styles change so rapidly one can't be sure so far ahead that things will be right." Mrs. Redfield's lips came together in a straight line, but she offered no remonstrance in words.

As spring drew near Hal received a raise. "Everything looks fine for the big event to come off as per schedule," he wrote. On the heels of this followed less cheerful news. The rents of model apartments had advanced faster than his salary. Didn't Ruth think they had better wait till they could afford what they wanted? Ruth answered "yes," as she was so evidently expected to do.

Next Ruth busied her restless hands | gardener.

with curtains, hemstitching them with infinite care, happy in the belief that they couldn't fail to fit into any simple But Hal vetoed them, too, when he came on for his summer vacation. "Nobody uses plain white curtains now," he explained with elaborate kindness. "They must match the color scheme of the room they are designed for. We'll buy them.

Joe overhearing this, itched for a chance to lay his strong hands on the slender city chap; to take him by the collar and knock some sense into his head, or some nonsense out.

When Hal left he assured Ruth that they would be married by Christmas sure. But the girl's interest in things seemed to lag. Christmas drew near; Hal wrote that the firm declined to give him a vacation then. Whenever Joe's eyes fell on Ruth's listless face, he harbored thoughts akin to murder. But Mrs. Redfield's words recurred to him: "All things turn out for the

So Joe just plodded ahead and carried out his plans. In March he finhis agricultural course and bought an abandoned farm nearby. There was a dilapidated house on the property, and into this he moved. Another hired man took his place on the Redfield farm.

Ruth was working feverishly making Joe's house comfortable for him. She brought out the gay rag rugs and the hemstitched white curtains. When Joe attempted to remonstrate she answered that she had no use for them and not enough to do to keep her

When the house was as complete as she could make it, Ruth formed the habit of spending an hour or two each day putting it in order for its lonely occupant. She chose the time when Joe was at work in the fields. One day he returned unexpectedly and found her there, sitting in the middle of his kitchen floor, alternately plying a scrubbing brush and wiping tears from her eyes.

"What's wrong now, Ruth?" Joe demanded. "Tell me and I'll fix it for you somehow." His tone augured ill for an offending person; it was well for Halton Jones, just then, that he was many miles away.

"You ought to get married, Joe. I -I can't come to fix the house for you

any more." "You're going to be married soon yourself?" Joe brought the words out with difficulty. Then he added bitterly, "It will be some time before I can 'start right.' My wife will have to work some, I fear."

"The Lord worked, Joe. He made the world; he didn't buy it out of a department store! And I'll never marry any man who won't let me work; so there! I wrote Hal so last

"Then marry me," said Joe. And

MADE WATERS SEEM ALIGHT

San Diego Citizens Once Greatly Disturbed by Visit of Countless Millions of Annelidas.

One evening in the February of a recent year the citizens of San Diego, Cal., experienced quite a scare, almost a panic. About eight o'clock the calm surface of their beautiful bay presented such a tremendous phosphorescent glow that many persons living on the bordering hillsides became greatly alarmed, rushed to their telephones and anxiously called up the fire department to inquire as to the cause of masses of fiery lights that gleamed on the water.

Definite knowledge relative to the strange sight was not fully obtained, however, until the next day, when the chief of the state marine biological station, after closely examining a bucketful of the eellike worms, which had been captured by an old skipper on the ferryboat, explained that the bright light was caused by millions of small reptiles known as annelidas that had suddenly come to the surface. He further mentioned that these strange creatures had a habit of making periodical visits about once every 15 years.

From eight o'clock to midnight the broad harbor in front of the city appeared to be filled to the brim with luminous snakes, its waters being literally alive with wriggling phosphorescent reptiles, averaging about two feet in length, their slender, flat bodies resembling shiny blades of matted grass. So thickly massed were the squirming reptiles that the steam launches from the anchored warships in the harbor were apparently barely able to make headway through them and many thousands of the lustrous snakes were killed by being crushed in the propellers of the vessels.

Light and Power for Farms. A new lighting and power plant for the farm discards the usual storage battery, is designed for starting at any one of four distant points, and is claimed to avoid wasting energy. Its capacity is the equivalent of 30 25volt lamps. On turning on one light, the generator runs at speed just sufficient for that light, and more lights cause an automatic electric governor to open the engine carburetor just enough for the additional load. A single-cylinder gasoline engine drives the 750-watt multipolar generator. The generator has two commutators, and one winding for the 110-volt lighting current with another for a six-volt self-

Secret of Success. Mrs. Backlot-You seem to have had wonderful luck with your victory

Mrs. Earlyup-Yes. Every one says I was lucky to marry such a good

DESERT HERO KNOWN TO FEW

Dog That, With Its Master, Was Savior of Many Lives, Well Cared For in Its Old Age.

Rufus, the dog hero of the desert, who has saved many lives, is ending his declining days in a dog sanatorium at Pasadena, Cal., where he is well cared for. The end of the dog is not far off, says Our Dumb Animals in a recent issue. He is spent and feeble after his many long and weary journeys over the burning and blinding sands with his pioneer master. He will no doubt soon fall asleep.

Lou Westcott Beck and Rufus were intrepid pioneers in a life-saving project that received scanty support and tardy recognition. Together they fared forth on their mission of mercy, Beck carrying signboards and cans of paint, Rufus laden with saddlebags of restoratives and poison antidote. While the man set up the guideposts, or painted the water signs, the dog succored many a prospector who otherwise would have died miserably from delirium of thirst or the venom of snake bites.

The work of these two great benefactors is over. Beck died in July, 1917, and since then the government has appropriated one hundred thousand dollars to carry on the project that he and his devoted dog started.

Rufus will be well provided for by a veterinarian who was a personal friend of Beck's. The old dog's years of hardships, of life-saving service on the desolate wastes, are not without their reward. His many friends who used to see him on the streets and pat him with approval as he started out on his desert trips will not forget him in his old age.

ENCOURAGE BIRDS TO NEST

Only Through Them Can the Many Insect Pests Be Kept Within the Bounds of Safety.

Of all the ways of ridding our gardens, parks and farms of the insect pests that destroy fruit, grain, and even trees, none is so effective as the encouragement of birds. Most birds are naturally insect eaters, and it is really amazing to count the number of beetles, bugs, caterpillars and grubs that a small bird will devour in

Andre Godard, a French naturalist, remarks in a recent number of La Nature (Paris) that agricultural plagues invariably follow the disappearance of birds, and he notes that the forests of Hungary were saved by the placing of many artificial nests to attract the feathered enemies of the grubs that were destroying the trees.

It is true that a few birds eat fruit and grain, but even these prefer inand it is probably true in ninety-nine cases out of a hundred that the bird which seems to be eating the fruit is really pecking at an insect inside it.

Many Film Pictures Per Second. Taking motion pictures at the rate

of some 15,000 a second with a camera and lens, is the recent achievement of a French scientist. High-speed photography is not new, but heretofore has depended upon electric-spark shadows, without s, and lacking sufficient illumination for clear definition. The mechanism of the camera consists of an aluminum reel, electrically driven at 3,000 r. p. m. and winding film at 164 feet a second. At this rate pictures 2 inches high are made about 10,000 times a second, larger and smaller surfaces being exposed at respectively slower and faster speeds, says the August Popular Mechanics Magazine in an article carrying a full-page illustration.

The illuminant is a stream of hightension electric sparks with a frequency of about 80,000 a second, produced at the focal point of a concave reflector, and kept from flaming by a current of air.

Nippon Honors Her Soldiers.

On a hill near Port Arthur, China, there looms a grand memorial tower, and just back of it are buried, in unmarked trenches, the bodies of 22,000 of the bravest soldiers of Nippon, says the Detroit Free Press. It is a shrine for every loyal Japanese. On the side of another hill lie buried all that is mortal of 15,000 Russians, and there also a monument has been reared. These were the men who died during the siege of Port Arthur, which commenced 15 years ago and continued for almost a year. Although Port Arthur was given back to China by the Japanese it remains for all-practical purposes a stronghold of Nippon, and it is today more Japanese in character than Chinese, and is likely to remain so unless Japan is forced to relinquish the city by another war.

William Jason Knew.

William Jason Tucker, four-yearold son of Dr. and Mrs. E. T. Tucker of Columbus, was out riding with his parents and sister Sunday night, and an unusually large number of fireflies were seen along the country roads. His sister, age six, asked what caused the light in the fireflies. While her mother was trying to explain, William Jason remarked scornfully: "Why, Emily Margaret, anybody ought to know that. It's because they have headlights in their stomachs."-Indianapolis News.

Abiding Faith. "He has implicit confidence in him-

"That so?" "Yes. Even drinks the beer he says he made himself."

ARABIAN EMPIRE NOT LIKELY

Travelers Point Out, System and Organization Are Foreign to the Semitic Mind.

"History is against the probability of the creation of an Arabian empire. The Semitic mind does not lean toward system or organization," said Col. Thomas E. Lawrence recently.

"The Semites are represented by very little art, architecture, philoso-But we find an amazing fertility among the Semites in the creation of creeds and religions. Three of these creeds-Judaism, Christianity and Mohammedanism-have become great world movements. The broken fragments of countless other religions which have failed are found today on the fringes of the desert.

"The desert seems to produce only one idea-the universality of God. We, who have gone out to discover the meaning of the desert have found only emptiness-nothing but sand, wind, soil and empty space. The Bedouins leave behind them every extraneous comfort and go to live in the desert, in the very arms of starvation, that they may be free. The desert exacts a price for its secret. It makes the Bedouins entirely useless to their fellow men. There has never been a Bedouin prophet. On the other hand, there has never been a Semitic prophet who has not, before preaching his message, gone into the desert and caught from the desert dwellers a reflection of their belief. The idea of the absolute worthlessness of the present world is a pure desert conception, at the root of every Semitic religion, which must be filtered through the sceen of a non-nomad prophet before it can be accepted by a settled people.-Asia Magazine.

ANIMAL LIFE AT ITS WORST

Woe-Begore Specimens of Dogs, Pigs, and Horses in the Cuban Province of Pinar del Rio.

There are more dogs than any other kind of animal life in Pinar del Rie, the westernmost province of Cuba, and chickens, pigs, ponies and goats rank next in the order named. Dogs may be seen everywhere, but they are lazy and indifferent. Each shack-hold has a few chickens, none of which would have the shade of a chance in a poultry show, but might hold their own at a cocking main.

There are many pigs to be seen, but they are so thin and weakened that the much-abused razor-back looks like a prosperous porker, says the National Geographical Magazine. Each pig is anchored fast to a peg in the ground, tethered to a rope. Knowing that if the rope were passed only about the pig's neck he could wiggle free, the native passes it around the pig in the front of one shoulder and behind the opposite leg, and then draws it tight enough to prevent the pig from backing out of it or creeping through.

The horses one sees are between the Texas and the Shetland pony in size, and so thin that one wonders if they can make a shadow. Milch goats, which are the cows of Pinar del Rio, seem to be the one class of animal able to look fat and sleek.

New Rigid Airship Is Speedy. In the latest rigid airship, R-80, as developed by the Vickers people, particular attention was given to the elimination of unnecessary head resistance and the cutting down of weight, and the builders have produced in R-80 a ship of only 11/4 million cubic feet capacity, whose performance in speed and endurance is equal to that of R-33 and R-34, which have a capacity of two million cubic feet. The overall length of R-80 is 530 feet, its diameter is 70 feet and its height 85 feet. The total gross lift is 38.5 tons at sea level, and the disposable lift is 17.5 tons. At full power the estimated speed is over sixty miles per hour and the cruising radius at this speed is four thousand miles and sixty-five hundred miles at fifty miles an hour-Scientific Ameri-

Artificial Milk on Board Ship. The milk problem on the hospital ships of the United States navy is solved in a different and highly ingenious fashion. On board the Mercury and Comfort there is now a machine which manufactures milk in any desired quantity, although the ship may have been at sea for weeks. The "mechanical cow" needs to be fed with a combination of unsalted butter and skimmed milk powder, and it will give milk with any degree of butter fat which is required. It also produces cream that will whip and the fluid which it yields tastes like the best quality of dairy milk and cream that can be procured ashore.

Eruptions on the Sun.

Not long ago, at the Yerkes observatory, an eruption was observed (and photographed) on the rim of the sun which threw up material to a height of 500,000 miles. One cloud of it, which appeared as if floating detached, was reckoned to have some thousands of times the volume of the earth. We are accustomed to regard great volcanic explosions on the earth as the most appalling of natural phenomena, but they are feeble and trifling disturbances compared with the outbursts which are continually taking place all over the body of the

The Remedy. "I am sorry I can no longer offer my friends a good bumper."

"Oh, yes, you can when you take them out in your flivver."

Everyone Should Save Some Money

LESSON FOR SEPTEMBER 19

EVILS OF INTEMPERANCE (TEM-PERANCE LESSON). LESSON TEXT-Prov. 23:19-21, 29-35.

GOLDEN TEXT-The drunkard and the glutton shall come to poverty.-Prov.

ADDITIONAL MATERIAL—Dan. 1.
PRIMARY TOPIC—Keeping Our Bodles

JUNIOR TOPIC-What Strong Drink Does to the Drinker.

INTERMEDIATE AND SENIOR TOPIC

-Deadly Foes in Disguise.

YOUNG PEOPLE AND ADULT TOPIC

-Alcohol - False Claims and True

1. A Father's Wise Counsel (vv.19-

1. What it is (v. 20). "Be not among winebibbers; among riotous eaters of flesh." This means persons who meet together for the express purpose of drinking intoxicating liquors and eating purely for the gratification of their appetites. Wine bibbing and gluttony usually go together.

2. Reason given (v. 21). drunkard and the glutton shall come to poverty." Intemperance in drinking and eating leads to ruin. Poverty inevitably follows in their wake.

II. Woes of Those Who Indulge in Wine (vv. 29, 30). The miseries attached to the drunk-

ard's life:

1. The awful pain which causes one to cry out "Oh!" Many, indeed, are the pains which men suffer because of strong drink.

2. Sorrow-the remorse which causes one to cry out "Alas!" Many are the expressions of bitter regret which daily come from the lips of the drunkard. Sometimes it is the sorrow of poverty of himself and family -clothed in rags and half starved; sometimes it is the sorrow of following a broken-hearted wife to the grave and seeing his children scattered among strangers.

3. Contention-strife and quarreling. Much of the fighting among men is directly caused by their passions being inflamed by strong drink. The drunken man is always ready to take offense, as well as to give it.

4. Babblings and complainings. The winebibber complains of everything; Ill luck, broken fortune, ruined health, loss of friends, of fate and of God.

5. Wounds without a cause. These are wounds which might have been avoided-from fightings in which a sober man would not have engaged, and from accidents which are purely the result of intoxication. 6. Redness of eyes. This has ref-

erence to the bloodshot eye of the tippler which renders dim his vision. All these woes come upon those who

tarry long at wine (v. 30). Those who frequent the places of drinking soon are tarrying long at wine.

III. The Attitude Enjoined (v. 31). Look not at it. Do not put yourself in the way of temptation. The only safe attitude toward strong drink is total abstinence, and the only sure way of total abstinence is not to even look at it.

IV. The Drunkard's Bitter End (vv.

1. The acute miseries resulting (v. 32). "It biteth like a serpent, and stingeth like an adder." Strong drink, like the poison of the serpent, permeates the whole system and ends in the most fatal consequences-the bitterest sufferings and death.

2. The perversion of the moral sense (v. 33). (1) This excitement causes the eyes to behold strange things. This denotes the fantastic images produced on the brain of the drunkard. Since unbridled lust always goes with wine drinking, no doubt it is true as the Authorized Version has it, "Thine eyes shall behold strange women." Drunken men do desire and rave after unchaste women. (2) "Thine heart shall utter perverse things. His moral sense being perverted, his utterances partake of the same. He tells lieshis words cannot be relied upon. Anyone who has had dealings with a drunkard knows that his statements cannot be relied upon.

3. He is insensible to danger (v. 34). The drunkard is unsteady; his brain reels to and fro. He is foolhardy, even as one who would lie in the top of a ship's mast where there is the greatest danger of falling off.

4. He is insensible to pain (v. 35). The drunkard is utterly ignorant of what happens to him while under the influence of strong drink. Many bruises and wounds the drunkard has which he cannot account for.

5. His abject bondage (v. 35). After all his suffering, sorrow, and disappointments, he goes on as a bond slave to follow the ways of sin.

6. Hell at last, for no drunkard shall inherit the kingdom of heaven (I Cor. 6:10),

Melancholy.

Melancholy sees the worst of things -things as they might be, and not as they are. It looks upon a beautiful face, and sees but a grinning skull .-Bovee.

Thinking and Speaking. Think all you speak, but speak not all you think. Thoughts are your own; your words are so no more.-Delany.

Surface Christianity. Good breeding is surface Christianity. -O. W. Holmes.

— THE — CHRISTIAN ENDEAVOR TOPIC

- From --Moody Bible Institute Monthly Chicago, Ill.

September 19 Good Work; Finding It and Doing It

Ecclesiastes 9:10; Colossians 3:22-25 Stimulating words and phrases in relation to work abound in these Scripture verses. "Do it with thy might"; "Not with eye service as men pleasers, but in singleness of heart, fearing God"; "Do it heartily as to the Lord"; "Ye shall receive the reward of the inheritance, for ye serve the Lord Christ.'

What a transformation would come into our work-a-day world if such principles could be adopted and worked out! But they must first be worked in. They are Christian principles and can operate only in Christan hearts. There is much loose talk about the adoption of Christian principles in industry, but Christian principles can no more be adopted wrought into the lives of unchristian people, than living precepts can be adopted by dead folk. The outstanding message of Jesus is, "I am come that ye might have life." That life contains within itself the power to adopt His lofty principles.

Good work in every sphere brings its own reward whether it he in the

its own reward, whether it be in the church, the Sunday school, young people's societies, the study, the market, the farm, the bank, the store, the mine, the school or the home. cess in every department of activity s impossible apart from good work, therefore determine to do first-class

Testimonials and examples concerning hard work as essential to success, can be drawn from many fields of endeavor. Sir Joshua Reynolds speaking to students of art said: "If you have great talents, industry will improve them. If you have but moderate abilities, industry will supply their deficiency. Nothing is denied to well-directed labor. Nothing is to be obtained without it."

Daniel Webster once said: "All the genius I have lies just in this, that when I have a subject in hand, I study it profoundly day and night it is before me. I exploit it in all its bearings so that my mind becomes pervaded with it.'

Of Rufus Choate it is said that one of his most remarkable traits of character was his unflagging industry, coupled with a readiness to make any sacrifice of his own enjoyment in order to secure the highest position in

his profession. Speaking of the minstry, Norman McLeod used these words, "I feel convinced that every man has given him of God much more than he has any idea of, and that he can help on the world's work more than he knows What we want is the single eye that will see what our work is, the humility to accept it however lowly, the faith to do it for God, and the

perseverance to go on until death." The greatest work in the world for the Christian is to prayerfully find a place in the plan of God and then fill that place according to the principles found in our Scripture lesson.

HOW WIRELESS PHONES HAVE AIDED IN RE-DUCING LOSSES BY FIRE. -The wireless telephone, as a result of a season's tryout, dur-

ing which the handicaps of "packing" instruments over a thirty-mile mountainous trail, the perils of passing through a forest fire, and numerous other tests were applied, has been pronounced a success for forest service work by officials of the service, according to an announcement from district headquarters at Missoula, Mont.

Hereafter, the announcement says, wireless telephone instruments are to be a part of the standard equipment of the forest service.

At the direction of Chief Forester William S. Graves, tests of this plan of communication were initiated in this district last season by R. A. Adams, telephone engineer, who was assisted by Everett Cutting. United States signal corps standard sets were selected for the experiment, and one was placed in position, after almost interminable difficulties. at the Mud Creek ranger station, near the Lolo hot springs, Montana and another at Beaver Ridge, Idaho.

While the air-line distance between the two stations is but 12 miles, the distance by trail is 30 miles, much of it almost impassable even with pack animals. At last, however, after mishaps that included pack horses off the trail, packs displaced and rolling down mountainsides, and batteries and equipment all but lost, the antennae were hung high on convenient pines.

"The sets were used during the fire season of 1919 in reporting fires and otherwise in the carrying on of the fire campaign with eminently satisfactory results," says the forest service statement.

Why He Is Good Citizen. The adage runs: "Many men, many minds," yet all minds are not equally keen, nor equally honest. It's the man who thinks clearly and honestly that most invites confidence. Such a man is a big asset to any community.

Beauty Chats

By EDNA KENT FORBES

. PRETTY FEET

7 OOD shoes cover a multitude of G defects in the matter of feet yet every woman wants to have her own feet as naturally pretty as possible. And it is not an easy task to bring feet long disfigured by corns and callouses into the pink and white and perfect form that nature intended.

The first thing to do, however, is to make quite sure that the style of shoe being worn is one that agrees with the foot. If new corns come, if the toes are pushed together, you may be sure that special type of footwear had better be discarded. For one thing, sharp pointed shoes are

The Feet Need as Much Care as the Face.

harmful to any sort of foot. They push over the big toe against the next smaller one to bring the large toe in the center of the foot and the point of the shoe, at one and the same time. This means eventual disfigure-

Heels more than an inch and a half high are injurious; they throw the balance of the body outside the normal line. It would be an excellent thing if women would adopt the English walking boot style for daytime, if they are on their feet much of the time. These have half heels, and are stylish, and usually extra well made. For evenings Cuban and French heels are all right. Then, the feet should be bathed in hot water and soap every night, unless one gets a hot bath daily. They need more attention than the rest of the body since, being encased in leather two-thirds of the time, they get less ventilation than any other part. People with foot trouble would find comfort if they wore open sandals in the house with stockings over the

weeklies varies from \$2.00 to as high in town a visit, on Wednesday. as \$4.00 per year.

David C. Sullivan, at \$1000.

Mrs. Minerva Harman has sold her farm on the Emmitsburg road to Stanley C. Reaver, on private terms.

Matt. H. Galt and family left, last Saturday, by auto, for their home in Springfield, Mo., after spending several weeks here.

The Taneytown High School opened, on Monday, with a full corps of teachers, and the largest enrollment for the past three years.

Miss Mary Snyder has returned home, after a three weeks visit to relatives and friends at Two Taverns, Gettysburg and Fairfield.

Our neighbor and friend Amos Duttera ate his 82nd. anniversary dinner with his son, Maurice C. Duttera, on Thursday the 16th.

John W. Myers and family, who had sale of a portion of their personal effects, last week, removed to York, Pa., on Thursday of this week.

Miss Cecile M. Givens, of Stamford, Conn., and Mr. Lambert Smelser, of Baltimore, Md., are the guests

Little Miss Helen R. Yohe, has returned to her home, in Baltimore, after spending several months with her grand-parents, T. M. Buffington and wife.

Mr. and Mrs. Theo. M. Buffington, Mr. and Mrs. Yohe and daughter, Helen, enjoyed a bay trip to Tolchester, last Saturday, and an auto trip to Washington, on Sunday.

Harry J. Ohler, wife and daughter, Ethel, Miss Virginia and Carroll Duttera, spent Sunday with Mr. and Mrs. Clyde Humer, at Brookside Park, near Dover, Pa., and enjoyed the trip very much.

Rev. W. G. Minnick, of Baltimore, paid our office a brief visit, on Wednesday, while he was here to assist in the funeral services for Mr. David H. Brown. He was formerly Mrs. Brown's pastor.

Rev James Cattanach, pastor of the Presbyterian Church, of Catonsville, Baltimore, visited our office, on Thursday. He was called here for the funeral services of one of his members, Mrs. James Fair.

Middletown laments that, unlike Taneytown, it is not having a string of fine new dwellings built. We are getting the dwellings, but, their occupants do not count in the town's population-and that "riles" us.

Both parties have named, or will name, six female members of the County Central Committee, for Taneytown District. As we are not sure of the appointees for both parties, we will hold the announcement until

Mr. Walker, of Frederick, has been looking over the electrical work situation here, this week, with the intention of opening up the business, if properly supported. He has sold his interest in the Frederick firm, of which he was a member.

The cannery has been operated at high tension, all week, in a strenuous effort to prevent the corn from getting the better of the capacity of the plant. The season's pack of corn will be a record breaker, and promises to last for several weeks longer.

From the best information easily obtainable we learn that the delay in extending the electric wires to Taneytown, is due to shortage of transformers, and perhaps to other necessary appliances. The wire itself is reported to have been on hand for some time.

Taneytown defeated Fairfield, last Saturday, on the grounds of the latter, by a score of 13 to 7, after Fairfield had defeated Emmitsburg 11 to 1. With a patched-up team Taneytown visited Hampstead, on Tuesday, and met with a Maine style landslide, 9 to 1 defeat.

The Sunday School room of the Reformed church was re-opened last Sunday, with rally-day services. The repairs consisted of frescoing, wainecoting and new carpet. The main address was by Emory L. Coblentz, Esq., of Frederick. The church has also been improved by painting the wood work of the exterior.
