SOME PUMPKINS.

How Farmer Thrift Demonstrated that Advertising Pays.

(Written for The Carroll Record, by J. Thomas Wilhide, of Toronto, Ont., Canada.)

Pumpkinville was one of those quiet, orderly towns, where the people went to bed with the fowls, and got up with the song of the birds. For most part they were healthy, wealthy and happy. The nearby farmers brought their butter, eggs, poultry, milk, cheese and vegetables to town every Thursday, so that what the townsfolk lacked in their own gardens, they could buy at reasonable rates. In the Fall the farmers came in with apples and pumpkins by the wagon loads, and the people bought and stored up enough to last all winter, with no lack.

Sometimes the supply was greater than the demand, and the question was, How to sell their surplus stock? Mr. Thrift was one of those wideawake, progressive kind of farmers. He not only subscribed for the local paper, but made it a practice to advertise any surplus of choice products

he had on hand. One day Farmer Thrift was sitting on a stump, where he was ploughing some new, stumpy ground, reading the local paper, while testing his horses. Just then Mr. Skinum came They had a chat about the prospects of rain; the coming election; Women entering politics, going to Congress, and acting as Mayors; what the effect would be on the male sex if women got into the pulpit and did the Preaching; the price of wheat next year; the outcome of the Irish question; high cost of living; pay for farm labor, and finally, how to market their excess products at renumerative rates.

Farmer Thrift casually asked Farmer Skinum if he took the local Paper; and whether he used its columns as an advertising medium for his extras? He said he always found

it paid him well to advertise?

"No," said Farmer Skinum, "it wouldn't pay me. Why, everybody knows me, and know I raise the best stuff in the country. Why, I have lived here for just turning 56 years. No, no, advertising is no good to me; it would be just so much good money

thrown away." So they parted, plowed, planted and gathered; but, pumpkins were a failure across the river in Pokeberry Plains, and Mother Squash must have pumpkins for the winter, at any cost. So she told Father Squash to keep his weather eye open for pumpkins, for pumpkins she must have. One morning Father Spuash came rushing into the house, his face red as a sugar beet, and puffing like a porpoise. Holding out the local paper before the eyes of Mother Squash, said, "Read that, my darling Squash."

Mother Squash wiped the steam from her glasses with one corner of her apron; adjusted them on her eyes with stately dignity, feeling her im-portance, that Father Squash had asked her judgment for once at least, and from his mind, it must be something of very great importance. With measured words she read the following 'advertisement: "Pumpkins! Pumpkins! Pumpkins!"

"Pumpkins white and pumpkins green Pumpkins big and pumpkins small; Pumpkins here for one and all, Pumpkins long and pumpkins round, The finest pumpkins to be found.

Come with your wagon, or your pail; come quick, only a few left for sale."

—Thrift, Huckleberry Farm.

"Now, that sounds like 'Some Pumpkins,' don't it, said Father Squash?" Mother Squash took one long, full, deep breath; and, feeling under her waistband all the pangs of hunger of the little Squashes, during the dignity of the occasion, "Mr. Squash we must have them pumpkins. Quick, out with the wagon! Here's the money! Off you go! Hurry up, or they'll all be gone; for the man said, ome, quick, only a few left for

As Mr. Squash lashed his horses down the lane, Mother Squash stood With arms akimbo, at the gate, shout-

barn door, just as the old farmer was coming out with a pumpkin as ng as he could carry. "Hello," says to Mr. Squash; then looking at the Well, now, you've been going some

"Well, yes, rather," said Mr. Squash; "you see I saw your advertisement in the local paper; that you had a few pumpkins for sale, and that we must come quickly if we vanted to get 'em. Mrs. Squash said,

must get 'em at any price." And about how many do you want"

WRECK ON THE W. M. R. R. Runaway Car Crashes into a Passenger Engine.

A heavy car of lumber became detached from a freight train, on Jack's mountain near Hagerstown, on Monday morning, raced down the mountain and crashed into the engine of passenger train No. 43, at Maria Furnace. Five trainmen and two

W. S. Shaw, engineer of passenger train, Baltimore, leg injured and back

H. C. Cramer, fireman passenger train, Baltimore face lacerated and right foot injured.
T. H. Hoover, conductor passenger train, Baltimore, left arm and chest

Harry Mowery, brakeman passeng-

er train, Baltimore, head and face cut and leg injured. E. K. Cook, baggage master, pas-

senger train, Baltimore, fractured toe of left foot and foot injured. Mrs. Al. Bushman, passenger, Getand jaw injured.

Mrs. Fannie Blumenstock, passhoulder injured.

the passenger train was standing still, as otherwise there would likely have been great loss of life. Engineer Shaw's train was on the same track: he saw the car coming and stopped his train, but before he could reverse the engine the car struck.

Members of thee train crew, who were nearest to the crash, suffered most. The engineer and fireman were thrown from their seats and the men in the baggage car, just behind the engine, catapulted from one end of the car to the other. Passengers were thrown from their seats. The runaway car and the engine were wrecked by the impact, and working crews had to be sent to clear the

Carroll Jurors Drawn.

Westminster, Md., Jan. 22.—Chief Judge William H. Thomas yesterday drew the following petit jurors to serve at the February term of the

Circuit Court for Carroll county, which will convene Februray 13:
Taneytown district, Charles B.
Kephart and Francis F. Crouse; Uniontown, William H. Bowers and Harry Formwalt; Myers', William F. Brown and John F. Maus; Woolery's, H. Clay Eby and William N. Fowler; Freedom, William F. Doyle; Manchester, J. Warren Strevig, Ernest W. Leese and George M. Hoffman; Westmington Erneis A. Logne Westminster, Francis A. Logue, Frank B. Dillard, Harry Starr and Harvey A. Stone; Hampstead, Daniel W. Houck and Charles J. L. Herick; Franklin, Lee T. Smith; Middleburg, William H. Devilbiss; New Windsor, Charles F. Stem and Wesley E. Sau-ble; Union Bridge, Preston M. Rine-hart; Mount Airy, Winter D. Jones; Barrett, Howard Warfield.

Distribution of Calendars.

The Calendar business is here to stay. Some business men have the bad taste to look upon them as "nec-essary evils," but this is largely because they do not go to the trouble of making the most out of their calendar investments. Handing out Calendars, without question, to everybody who calls for them, is not the best method of distribution-it encourages "making collections", and cheapens them in the estimation of the public. A large, handsome calsomething to be appreciated.

The proper way for merchants to handle calendars, to their best advantage, is to mail or otherwse distribute them. Certainly, a number should be kept for "handing out." but the main object should be the long winter days, raised herself to supply appreciated customers, first of all. If mailing is too difficult, or with their Baltimore friends. expensive, then a route should be

laid out and a house delivery made. It pays to wrap up calendars, or supply envelopes for them. It also pays best not to buy many kindswe should say, not more than two styles a year, and in most cases, only There is always this objection to try to avoid-some getting too

would be too great; and as calendars must be considered in the light of gifts to best customers, rather than as mere advertisements, it follows panting, foaming horses he said. that some does discrimnation in distributing them is unavoidable.

CARROLL COUNTY BALTIMOREANS.

Great Success of the Society's Annual Banquet.

The banquet of the Carroll County passengers were injured, as follows; Society of Baltimore City, which took place Thursday evening, Jan. 19, 1922, at Hotel Emerson, was an inspiring occasion, and one long to be remembered by those who had the

good fortune to be present. More than one hundred and thirty Carroll Countains, men and women, assembled around the festal board and after the invocation by Rev. A. S. Weber, D. D., of Baltimore, partook of a delicious menu, during the service of which John Bohl's orchestra rendered many delightful num-

Willis E. Myers, President of the Society, acted as toastmaster, and speakers.

Owing to official duties in the Sen-Alabama, was compelled at the last It is considered very fortunate that minute to cancel his engagement to speak. However, in spite of this disappointment a most delightful program was provided, which was interesting from beginning to end. Charles R. Miller, Vice-President of the Fidelity & Depost Company, a former Westminster boy, made the principal address of the evening, his subject being "Men of Carroll Whom I have Known." He spoke of many of the old pioneers of Carroll county in the legal and business world, and his address was replete with information and interest, and all regretted that the limited time at his disposal did not permit him to give in full all

of the facts which he had collected.
Other Carroll Countians who spoke were Mrs. Frances M. Goodwin, who has been prominently before the public as the only woman candidate for the position of Postmaster of Baltimore city, and her address convinced all that should she get the position she would ably conduct the duties incident thereto. duct the duties incident thereto.

W. Scott Leister, another Carroll county boy who has spent thirty-two years of his life in the Baltimore Postoffice, and who also has been mentioned as a possible candidate for the Postmastership of Baltimore city, followed Mrs. Goodwin. George R. Babylon, Carroll county's famous fisherman injected some

ginger into the program in his usual forceful way. H. Peyton Gorsuch, of Westminster, made a brief address in his usual

happy manner. Hobart Smock, who enjoys a wide reputation not only as a singer but as a raconteur, gave a delightful half-

hour of stories and recitations. Male quartet, of Westminster, composed of J. Smith Billingslea, Edwin S. Gehr, Walter L. Zepp and James Pearre Wantz, with Miss Anna Shriver, of Westminster, as accompanist. These boys inspired the crowd with

FOR BETTER SCHOOLS. State Grange on Record for an Im-

proved School System.

I enclose a resolution passed by the State Grange at its meeting in Cambridge December 13-16, 1921. It indicates very clearly where the farmers of this State stand with respect

to education. "Resolved, by the Maryland Grange in annual session at Cambride, Dec. 13-16, 1921, that we re-affirm our bearound his room. His weakness, lief in the absolute necessity for an adequate system of free public education adapted to the specific and general needs of all the people.

Deploring the low rank of Maryland among the States, we indorse the program for education, which has been formulated by the school people of the State, having for its final purpose without increasing direct taxes, a competent, well-trained teacher, in hearty accord with American ideals, in every public school position in

We particularly commend the printysburg, Pa., face lacerated and nose gracefully presented the various ciple of an equalization fund, which will make it possible to accord a more Mrs. Fannie Blumenstock, passenger, Hanover, Pa., left arm and shoulder injured.

Owing to official duties in the Sennearly equal educational opportunity to all the children of the State. Resolved, That a copy of this reso lution be sent to the Governor of Maryland, to every member of the coming Legislature, and to the State Sup-erintendent of schools."

"Resolved, by the Maryland State Grange in annual session at Cambridge, December 13-16, 1921, that we recommend that the subordinate granges take active steps to stimulate public sentiment in favor of eliminating as rapidly as practical suitable monuments and markers.

A bill has been presented which would place the Susquehana river bridge, from Havre de Grace to Perble all antiquated, unhygienic, and unfit rural school buildings to the end that the country school may be acorded adequate and proper facilities for school work.

We urge the several county school authorities to formulate a comprehensive forward-looking program of rural school consolidation for their respective counties and put the same into effect at such times and in such manner as is found to be feasible."
M. S. H. UNGER,

County Superintendent.

> to pay the rent. The court decided that there was no agreement or contract for the purchase of the engine and a verdict was given the plaintiff for \$59, which amount was admitted to be due by the defendants.-Frederick News.

Changes in Home Mission Board.

At a meeting of the Board of Home Missions and Church Extension of the United Lutheran Church of America on Jan. 18, Rev. H. H. Weber, D. D., Secretary of the Board after a service extending over 33 years and in which work he has been signally successful. Rev. Charles J. Smith, President of Roanoke College, Salem, Va., was elected Secretary to fill the vacancy. Mr. Harvey C. Miller, of Philadelphia, resigned from the Board because of his appointment to the Executive Board of the Lutheran Church, and Dr. George E. Holtzapple, of York, was elected to succeed him. Rev. J. Elmer Bittle was elected Western District General Superintendent of the Board. It is said Rev. Weber will become pastor of York's largest Lutheran Church.

H. L. Perry, of Hanover, yard conductor of the Western Maryland railroad, was knocked from the top of a box car in the local yards Wednesday afternoon and severely injured. His injuries consisted of a badly bruised right side of the face, a fractured left wrist, a sprained right leg and possible internal injuries. He was rendered unconscious for about 20

WPORTANT BILLS NOW POURING IN.

The Governor took a little exercise though still marked, is gradually decreasing and it is hoped he will be able to be out the first of next week.

The County Commissioners of Washington county are empowered to issue bonds to the extent of \$450,000 for school building purposes by the terms of a bill introduced in the House by Delegate Funk.

The first direct attempt to repeal the 18th. Amendment through the same legally consituted agencies which passed in came in the House Tuesday, when Delegate Fillmore Cook, Baltimore city, introduced a resolution petitioning the national Congress to submit to the several States the question of repealing the amendment.

To perpetuate the memory of Maryland troops on the fields of battle where they fought and died in the late war, Delegate Gambrill, Howard county, introduced in the House a bill creating a commission to visit the battlefields of France on which Maryland troops fought and there to erect

ryville, in the hands of the State Road Commission, and ultimately eliminate the tolls now charged for passage over the bridge. The bill provides for a bond issue, the amount of it to be reduced \$50,000 per annum. The interest on the bonds to be paid by tolls, and the redemption of the bonds by a local tax in Baltimore city and the counties of one-third of a cent on \$100.00. The bridge is now owned by a private corporation.

A bill has been presented to regulate the sale of securities in the state by the appointment of a commissioner, through whom dealers would be Editor Record:

Please put my name on your mailing list. I do not know how much your paper is your paper in the first dealers. The bill, provides that the proposed commissioner shall be furnished with full information regarding a security issue Our papers out here all went up, but have not come down yet. We are also with copies of prospectuses and before it is placed on the market, and | 1921. having a fine winter; snowed three other literature used in promoting the or four times, but not over 3 inches sale. Both the stock promotion concern and the directors, jointly and severally, would be made liable for acres of corn last year and a cyclone damaged it some, but I gathered misreepresentation of the value of segondary 27 cents. I had 4000 bushels of carry while concealing the fact that he oats. At present I am feeding two gain while concealing the fact that he was profiting thereby also would be

Jail sentences for persons operating motor vehicles under the influ-ence for liquor are provided in a bill introduced in the House by George W. Bankert, of Carroll county. For E. Basler and wife, 11 acres, for \$10. the first offense fines of \$100 to James N. Dorsey and wife to Wal-\$1,000, or imprisonment for 30 days ter B. Blizzard and wife, small lot, to one year, or both fine and imprisonment, are provided. The second offense would subject the offender to imprisonment in the House of Correction for from six months to two years no option of a fine being provided. Licenses would be revok-

ed arbitrarily upon the first offense. County representatives of both parties show a strong sentiment against passing the organization bill giving Baltimore two more Senators and \$10. twelve more delegates, and the city delegation of 24 members threatens and wife, farm of 187 acres, for \$10. to solidly oppose all important legislation until Baltimore's claims are agreed to. There is also strong division of sentiment over the question of elections and governmental reor ganization.
In the Senate, a resolution was pre

sented by Senator Snader, signed by citizens of Carroll County, urging legislation against race tracks. Like petitions have been received from other counties.

Our Special Notice Column.

The notices in this column, hereafter will be Lino set, following the style in this issue. We can not accept any advertisements in this column not uniform with the style used; also please observe the rules at head of column. This column is maintained, not so much for profit to us, as for profit to the user, and as a news feature. This advertising is worth double our charge for it.

How Our Expenses "Come Down."

Feeling the need of an expert machinist to look over our cylinder press for the cure of some defects, correspondence with the manufacturer brought the information that the charge for machinist would be "\$12.00" per day, and expenses"; also for a cylinder blanket, that a few years ago cost about \$8.00, the price now quotsome who think the subscription price of \$1.50 should "come down."

This information merely follows having been required to pay \$1.75 an hour and expenses" several weeks ago, for a gentleman to look at our linotype and tell us a lot of things we already knew. Oh, yes! Expenses are "coming down" fast.

The Columbus district, in Ohio paid over \$1,000,000 in fines for vio-lation of the prohibition law, during POPE BENEDICT DEAD.

A Victim of Pneumonia after a Brief Illness.

Pope Benedict XV died at 6:00 Increased Representation for Baltimore in Doubt.

o'clock Sunday morning, of pneumonia. Cardinal Gasparri, who will adadminister the Holy See during the
time before a successor is elected, is among those most prominently mentioned as the next head of the church. The College of Cardinals is expected to meet on Februray 1, and it is thought that the two American Cardinals-Dougherty and O'Connell -may reach Rome too late for a

The Pope was ill but a short while, and up to two days before his death it was believed that he would recover. He will be especially mourned in America for his great efforts in behalf of humanity and peace, and because he was particularly attached to the Bishops and clergy of the American church. There are seventy Cardinals in all, anyone of whom is eligible for selection to the Head of the

After the death of Pius X, which occurred on August 20, 1914, the conclave began on August 31 and the new Pope was elected on September 3. If the same procedure is taken in the present case the election of the

Pope would occur about February 5.
A Pontifical High Mass was celebrated at the Cathedral, in Baltimore, on Thursday, and it is probable that every church in America will hold a requiem mass for the deceased Pontiff within a few weeks.

Reducing the Public Debt.

Washington, Jan. 20 .- Ordinary expenses of the Government fell off by nearly \$700,000,000 during the first half of the current fiscal year as compared with the same period in 1920, while public debt disbursements decreased by \$1,000,000,000 according to a statement issued today by the Treasury covering financial opera-tions from July 1 to December 31,

During the first six months of the current fiscal yeear ordinary expenses of the Government aggregated \$1,838,000,000, compared with \$2,508,-000,000 for the corresponding period of the previous year, while public debt disbursements totaled \$3,078,-000,000, as against \$4,945,000,000 for the first half of the fiscal year of

_______ The Bonus Elephant.

hand, as an elephant, but Maryland proper course for their sympathy. appears to be in the same predicatrouble is the same in both caseslack of cash with which to feed it. The generosity of both legislatures body else's money; and the same eagerness exists in both-to court votes-when it can be done, also in the same way.

The soldiers—the most of them no doubt want the money. Why shouldn't they? Chances to pick it up, easy, are rarely avoided by anybody, even though there was no promise of "bonus" pay, and even though they went under a draft law without any extent of voluntary enlistment worth considering.

So far as the general government is concerned, if the money was now at hand that was wasted in contracts for mountains of stuff never needed of the squandered cash to pay off the bonus, and then some; but, this asserted.

is all ancient stuff-the steam shovel was used and cannot now be used to shovel the coin back.

Maryland, apparently, is going to to play safe by invoking the referendum. If the people vote for the bonus, the people will have to find the wherewith to pay the bill. Why should not Congress also handle the job "Maryland style?" The Philadelphia Ledger editorially illuminates the subject after this style;

"This session of Congress will see the passage of a Soldier Bonus Bill. Under the stiffest sort of pressure from the ex-service men and party chieftains, the Republican majority is bending its back to the load. That warning romble is about to be heed-The President's little dinners to congressional leaders also are showing results.

Admittedly action is being taken with some reluctance. This bonus question is loaded. It is one of the most troublesome and potentially dangerous things on the legislative calendar, and one of the most per-

Scattered over the Nation, in every In every way they could they have let it be known that they want a bonus. They have asked for it and stood that they mrst have it.

Now, no one, not even Secretary Mellon knows how much it will cost. Congress likes to hope the outlay will be no more than \$2,500,000. It may reach easily three times that figure by the time the last dollar has been paid back by the taxpayers.

and buffalos, because they eat too committed to the budget, to economy and to General Dawes, to pledged reduction of expenses that is showing results. What will the soldier bonus do to the tax schedules? How is the money to be raised without the taxpocketbook nerve?

Can we get the money from our The time was, only a few years ago, when everybody was arguing the "tariff" question. Every newspaper tariff" question. Every newspaper and relitiois of the state of the money from out late allies after the Debt-Refunding Bill has passed? Maybe so; maybe not. Must it come out of a sales tax? Not if the well-sharpened scythes of the "farm bloc" can pre-

ment with the same animal. The gives the operators side, as follows: "If the United Mine Workers strike, they will be plunged into a life and death struggle for the preservation of their union. The operators -to give away money-is undoubt- of unionized mines positively assert ed, when it means giving away some- that they will not renew the present wage contracts and that they cannot continue to operate, except on the basis of a lower wage scale. They will endeavor to operate with nonunion workers, however, if the strike

materializes. Many operators of union mines assert that if the union rejects a decrease in wages they will deunionize their mines and close down if they find it impossible to operate on a nonunion basis. They say that the union mines cannot continue to compete with nonunion and will be compelled to close, in any event, unless wages are reduced.

According to the operators, about 30 per-cent. of the bituminous mines are nonunion. Wages are lower in the nonunion mines and employment is steadier. The nonunion undersells for the war, there would be enough the union product and hundreds of union mines already have been closed as a result of this competition it is "What is a Yankee?"

Writing about the present New Jersey Legislature, a correspondent of the Philadelphia Public Ledger says that "the new Republican majority leader is a Yankee." In specification he adds: "He was born in

All persons born in Boston, then, are Yankees. Presumably the correspondent did not intend to restrict the Yankee habitat to the modern Athens. Probably in his view, largely shared, all New Englanders are Yankees. This is accurate enough, but insufficient.

Among the Pennsylvania Dutch not only all New Englanders, but all the people of New York and New Jersey are Yankees. In Central and Southeastern Ohio all those who dwell in the northeastern part of the State are called Yankees. Across the Ohio River, in Kentucky, all Ohioans are Yankees. South of Mason and Dixon's line all the inhabitants of the Northprecinct, division and township, are ern States are Yankees. To the some 4,000,000 former service men. world at large all the people of the world at large all the people of the United States are Yankees.

But the elusiveness of the Yankee are now demanding it. It is under- does not stop even there. Going back to its etymological antecedents, the term Yankee means Englishman. The Indian allies of the French in the world. wars between England and France for possession of about all of what is now the United States save what the Spanish had staked out were taught that the name of the enemy was "Anglais." The noble red man tried his best to say it and emitted sounds, which, reduced to type, would be something like "Yangay." So in this vernacular, even when we were under payer feeling it in that sensitive the English flag, we were all "Yangays"; not only all Americans born, bled in a mass meeting called the but all who were of the British armies

An etymologist of established repute, Heckwelder, derives "Yankee" from attempts of the Indians to say "English," attempts which resulted in some such word as "Yanghees" or annul laws passed by the comitia, "Yangheesh." So, in the venerable and rather overworked last analysis, a Yankee becomes simply an Englishstreams of revenue starting to flow man. Hence the supercilious Briton across the Atlantic as soon as the Rewhen he calls us Yankees in a disparaging way is only calling himself names. But thereby he renounces of the word, a tribune is a champion there will be very little "tariff talk." It must be the allied payments, a all claim and title to the descriptive of the rights and liberties of the peo-

But of the two methods of correction-restoring high prices for farm products or forcing other prices down nearer to their level, there is not much question which the public would prefer.

The farmers are in desperate plight. What on earth does that mean but that they are getting far less for their products than they have to pay for the products of other forms of labor, and that the proper method of easement is to bring those other products within reach by reducing the cost of industrial labor. For none of us is the low price of wheat an index of living costs. In normal times it serves as such. That it does not do so now is all the proof needed that prices are under an unnatural stimulus; their character is partly indicated in the fact that while there is perhaps four times as much unemployment as in 1913, the wages of those employed are approximately twice as great.—Balt. American.

LONDON HAS DOG CEMETERY

Founded Nearly Twenty Years Ago, Ground Set Off Is Now Overcrowded With "Graves."

Comparatively few of London's visitors-or inhabitants either, for that matter-find their way to the dogs' cemetery in Hyde park, says a correspondent. Situated in a corner of the park it is so shut in by trees and thick hedges that the ordinary passersby would hardly notice it, but it is well worth a visit. Nearly 20 years ago the favorite dog of an old gentleman living near the Victoria gate died. His master obtained permission to bury his canine friend in the garden belonging to the cottage occupied by the gatekeeper, and so the dogs' cemetery was started. Soon there were other applications from people who wanted to find a quiet resting-place for their pets, and now the cemetery is so crowded that more ground will have to be taken or the cemetery closed, and dogs' funerals things of the past. Not being reserved solely for dogs, cats and even one monkey are buried there. The cemetery is neatly and carefully kept. The graves are marked by miniature headstones, while on many, flowers are planted, and some are kept constantly bright with fresh wreaths. Some of the epitaphs are curious, while many are pathetic, and nearly all express a hope of meeting in some future

HAD IDEAL DEMOCRATIC RULE

In Early Years of the Republic, Roman Citizens in Mass Meeting Enacted Laws.

The constitution of the Roman republic, especially during the early centuries of its existence, was democratic beyond any constitution known today. The citizens of Rome assemcomitia, and enacted the laws, and the people each year elected two chief executive officers, who were called consuls. Another important office was that of the tribune, who was also elected for a year. He possessed the veto power, that is, he could veto or and was held to be the special and powerful guardian of popular rights and the welfare of the commonwealth. The number was increased, and the body of tribunes became one of the most powerful parts of the government. According to the modern use

The word also had another meaning, being used as a name for a platform and especially the platform and pulpit-like structure in the French chamber of deputies from which a

Stones That Absorb Water.

Stone is by no means impervious to sandstones, hold a large percentage. Even marbles absorb quantities. The absorptive capacity of limestones ranges from 7 per cent or more down to practically zero. Porous to which the pore water, according to the United States geological survey, Department of the Interior, whereas semicrystalline and crystalline limestones or marbles have lower percentages of pore space and absorption, such marbles as those from Vermont, Tennessee and Georgia being almost nonabsorbent. Pumice stone, which is usually lighter than water, owing to its great amount of pore space, will absorb large quantities of water; obsidian and volcanic glass which are of the same chemical composition as pumice stone, but several times heavier than water, will absorb none. Quartzite, granite and the numerous eruptive rocks are practieally impervious to water.

"Cockles of the Heart."

Physiologists will tell one that there are no "cockles" in the heart, and yet people have asseverated for many years that certain incidents have 'warmed the cockles of their hearts." Etymologists have been puzzled over the expression, and so far have sought in vain its derivation. The theory most favored lies in the general resemblance, more fancied perhaps than real, between the human heart and the cockleshell, the base of the heart being compared to the hinge of the bivalve.

Whether by coincidence or otherwise the scientific name for the cockleshell family is cardium, meaning the heart, from the Latin, although originating in the Greek language. The cockleshell long ago was the emblem of the pilgrim returning from the Holy land.

Musical "Performances."

The columnist of the London Daily Express adds a sequel to the story of the London violinist who, when the conductor announced at a Strauss rehearsal, "Tod und Verklarung" would be played next, observed: "Good heavens, I've just played that!"

When Strauss came over to conduct his "Sinfonia Domestica"-or was it "Heldenleben?"—with the London Symphony orchestra he finished a rehearsal by thanking the orchestra for what, he said, was the finest interpretation of his work he had yet heard.

Whereupon one of the horn players turned to a colleague and remarked casually: "Well, I've still got two pages to play, anyhow."

Hesson's Department Store

JANUARY SALE

Dependable Merchandise.

STOCK TAKING HAS BEEN FINISHED AND WE HAVE AGAIN FILLED OUR SHELVES WITH A NEW LOT OF MER-CHANDISE IN EVERY DEPARTMENT SO THAT WE FEEL ABLE TO MEET THE NEEDS OF THE PUBLIC. IN EVERY DEPART-MENT YOU WILL FIND PRICES THAT WILL MEAN A SAVING

Dress Goods.

We are showing a very nice lot of wool dress goods, in the standard colors, of from 38 to 54 in. width, at prices that will mean a big saving to our trade.

Dress Gingham.

Just received a new supply of good quality Dress Ginghams, in beautiful patterns suitable school or house dresses.

Apron Gingham.

Our assortment of Lancaster and Amoskeag Apron Ginghams has been increased to include all the leading patterns obtainable,

and our price is as low as 15c. We also have a few patterns of other brands of Apron Gingham, at lower prices.

Outing Cloth.

We have a very nice assortment of Outing Cloth in light and dark patterns of different weights at very low prices.

Muslin.

Every one knows the quality of Hill's Bleached Muslin. During this month we will sell this fine grade Muslin at the very low price of 18c. We also have a very nice lot of Bleached and Unbleached Muslins, at other prices.

Our assortment of these for Men, Women, Misses' and Boys', is still very large, and we feel confident we can supply your needs in this department, at a very reasonable price.

Comfortables.

We have a very nice lot of good size, beautiful floral designed Bed Comforts, at new low prices.

Misses' Hose.

Just received a shipment of Misses' Hose, in brown and black of good quality, that will sell as long as they last for 15c and 18c.

Boys' Suits.

We have a very nice line of Boy's Knee Pants Suits, in vari-ous patterns, suitable for Boys', from 7 years to 17 years. When in need of a Boys' Suit, call and look over our line, and let us save you money.

Men's Pants.

Our assortment consists of the Shippensburg Corduroy, Kerseys and Cotton, of good grade material and full cut. Get our prices on them, and save yourself mon-

ey on your next pair of pants.

Underwear.

For the whole family, we have them, in the Union Suits, and two piece goods of woolen, heavy fleeced and ribbed material at the lowest possible prices.

We are receiving fresh ship-ments of Shoes, every day, so that we are now in a position to show you just what you want at a big saving. When in need of a new pair of Shoes, call and let us demonstrate to you that we can furnish you better Shoes for less

Ball-Band Rubber Goods.

We have a full line of that good Ball-Band brand of Rubbers, Arctics, Felt and Gum Boots for Men, Women and Children.

Some Inflation!

Speaking of the days of the inflated dollar, old Si Chestnut said: "By gum, it's a fact that for a time, a nickle's worth of oats straw and four cents worth of turkey feathers rigged up as a woman's hatwould fetch more than the price of a yearling calf."

In fact we all felt the effects of the inflated dollar. Getting the inflation out of the dollar is something like getting over the effects of a "jag" in the days before home brew became popular. Dollars are valuable now, because their purchasing power has increased, which is all the more reason why you should save them. May we help you?

BEAUTY IN THIS MILL TOWN

North Billerica, Mass., Declared a Joy to Visitors, Also Has Few Labor Troubles.

It might seem rather far-fetched to proclaim a relationship between the profession of landscape design and the labor problem-a relationship, moreover, that develops into a beneficiary influence, helping in a modest way to render this problem less acute.

There is evidence of this fact at North Billerica, Mass., within twenty miles of Boston, where large mills are situated, says Egbert Hans in the Boston Transcript. The owners of the mills have, as one phase of their welfare work during the last fifteen years, engaged a landscape designer of national reputation to establish and maintain suitable planting about employees' homes, the plant and other buildings under the company's control. To create and maintain an interest among the mill employees in this work, the mills established a yearly competition, offering various prizes for the following activities:

The best kept premises, front and rear.

The training of vines on house porch, arbors, trolley or other posts. The placing of window and porch boxes.

The designing and maintenance of flower gardens.

The establishing and care of vegetable gardens.

The result of these efforts is displayed in the general appearance of the town, through which no stranger can pass without carrying away a vivid Impression of beauty and individuality.

Yet North Billerica is not one of the modern garden cities created overnight, as a result of sudden industrial development. It is part of the township of Billerica, one of the oldest mentioned in the histories of the Bay state. The Talbot mills and other industries are responsible for its growth, and the unusual relationship referred to has given it the not less unusual distinction of being a beautiful mill

WOULD PLANT USEFUL TREES

Easterner Makes a Good Suggestion Concerning a Proposed "Road of Remembrance."

Referring to the Road of Remembrance from Buffalo to New York city, which it is proposed to line on both Sides with elm trees in memory of the dead of the World war, certainly such a road lined with large elm trees would present an imposing appearance. But would not this memorial road be Just as imposing with the added advantage of future usefulness if the trees planted were such as the stately Walnut, the hickory and the white oak? | the final victory of materialism in the is a correspondent of the New York

Has not the time come for the planting of trees for real use rather than -Hueffer in the North American Remerely for ornamentation; and should not ornamentation and utility go hand in hand in such a matter? Is not the domestic supply of these valuable and useful woods much below what it should be, and should there not be a new supply started wherever pos-

If the planting of trees along the roadside is done with the idea of their being a memorial to those who gave their all to their country during the World war, would not such memorlals be emphasized in the beginning by the planting of trees that will grow into usefulness as well as furnish shade and a magnificent appearance?

Community Ice Machines.

There are now in operation throughout the United States many central electric stations provided with icemaking apparatus. The unused power of the stations during the "light load" Summer season is employed to run compression motors for liquefying ammonia in the process of freezing artifi-The plan has been especially suc-

cessful with small plants supplying electric power and light for towns of less than 5,000 inhabitants.

LAND OF BLAND

Traveler Writes of Art Treasures in Old Mexico.

Among Them, Cathedrals and Churches as Fine, or Finer, Than Any Found Elsewhere.

The guileless tourist who throngs European picture galleries, because he is told it is the proper thing to do, will, some day, when he has got it out of his head that Mexico is a nation entirely inhabited by murderers, find that there are artistic treasures just as worth while only a little way across the Rio Grande. There are a hundred great churches and cathedrals more beautiful than any yet dreamed of in his own country; there are pyramids that rival Cheops and bas-rehefs as striking as anything Nineveh could show; above all, for those in search of beauty in common things, there are a dozen handicrafts, the products whereof would drive collectors mad with rapture if they were bought in Naples or Ishpahan. The blanket serapes worn by the men are familiar, chiefly through machine-made imitations; less so the rebosos worn by the women; of a special interest as showing the blending of East and West is the native pottery, as for example, the beautiful Talavera and Mudeiar ware. Although the introduction of this is usually ascribed to the Dominican monks, its Spanish or Arabic influence is, in actual fact, merely overlaid upon the very much more ancient native craft of which examples are still preserved in the National museum and elsewhere.

It is safe to say that not one in a hundred persons if asked to name the three finest equestrian statues in the world would know that at least one of them is to be found in Mexico. It represents King Carlos IV of Spain and is said to have been the first bronze statue ever cast in America. It is without any question the finest, ranking second only to that of Bartolommeo Colleoni in Venice, yet I mention it here, less for what it is than for what it represents.

The Mexican people unfortunately for their reputation live in a country of unparalleled fertility and wealth. Were they only more enterprising and business like they would long ago have sacrificed its beauty to the benefit of their own pockets and thereby gained the admiration of their neighbors. Their cities, today mines of beauty in which you cannot walk 100 yards without passing some noble church or palace fit for the "Sleeping Beauty," or quaint detail of quainter public life, would be rectilinear nightmares where skyscrapers and factortes and elevateds and smokestacks fought with each other which should most openly show its contempt for mere humanity. Perhaps if the advocates of progress and efficiency at the expense of your neighbor have their way, that day may still come. It will be a bad day for Mexico; it will be an even worse day for the rest of the western hemisphere, for it will herald pearance of that religion of beauty which is called art .- Oliver Madox

"Safety First."

The following "Rules of the Road" have been forwarded by an English resident in Japan who has copied them from the central police station at Tokyo. At the rise of the hand of the po-

liceman stop rapidly. Do not pass him by or otherwise

disrespect him.

When a passenger of the foot heve in sight, tootle the horn; trumpet at him melodiously at first, but if he still obstacles your passage tootle him with vigor and express by word of the mouth the warning "Hi, Hi."

Beware the wandering horse that he shall not take fright as you pass him by. Do not explode an exhaust box at him. Go soothingly by.

Give big space to the festive dog that shall sport in the roadway. Avoid entanglement of dog with

your wheel spokes. Go soothingly on the grease mud as

there lurks the skid demon. Press the brake of the foot as you roll round the corner to save the collapse and tie-up.-London Punch.

Eruption of Flames on the Sun. There was recently the biggest disturbance on the sun that astronomers have ever happened to observe. It seems to have been an enormous eruption, during which masses of flames were thrown to a height of hundreds of thousands of miles!

A gigantic arch of fire, spanning a large section of the sun's edge (as seen through the telescope), rose, upheld, as it were, by two columns, one at each end. Rising still higher, it finally broke, assuming thereupon a spiral form. The arch was at least 200,000 miles high, and lasted four

months before it disappeared. Another eruption of flames, which attained a height of 300,000 miles, occurred soon afterward, stretched like a rubber band, the middle part rising rapidly and the sides straightening so as to form almost an isosceles

SHED LIGHT ON WORLD'S AGE IS OLD LONDON PLAYGROUND

Discovery by Humble Englishman Proved a Most Valuable Contribution to Scientific Knowledge.

A village grocer in Kent, England, some years ago came upon some peculiar stones around his house. He studied them intently and as a result succeeded in establishing the age of mankind!

As most people know, our primitive ancestors used tools and weapons which are known under the names of eolithic, neolithic and palaeolithic instruments.

The grocer who made the discovery, Benjamin Harrison, came to the conclusion that these stones would per-

haps throw some light on the subject. For 50 years he made collections of samples, and by devoting himself to their study managed to prove that man existed at least 200,000 years ago. The stones he had collected were relics of ancient implements.

Mr. Harrison was content to spend his life in his native place, seldom traveling more than twenty miles away. When only twelve years of age he started his researches among the chalk hills of the Downs and on the site of the old Roman camp at Oldbury.

In 1919 his name was included in the civil list for "devotion to scientific work." It was stated that few men whose scientific discoveries are of real importance were so little known to the community outside the select circle of specialists.

At the time of his death he had collected 5,000 specimens of ancient

HIS LIFE NOT A "FAILURE"

Mere Worldly Success Not the Only Thing That Has, or Should Have, Value.

"He is a little mild-eyed, gray man who never has amounted to anything. He is just another of life's failures." Thus wrote one business man to another.

Let's see. What is a failure? A good many years ago the heart of a boy leaped with the surging impulses of ambition. All the golden dreams of youth, finer by far than any realities,

were his. But he never quite managed to make things turn out the way he had planned. Riding the high winds of great accomplishment was not for him. His was the colorless monotony of grocery bills, rent, half-soled shoes and

a silver watch. He wanted to be a diamond, but he only turned out to be a piece of

One of life's unfulfillments, that's all.

But not a failure, because no man who is a good husband or a good father or a good citizen is ever a

If he is, there's something wrong with the whole scheme of human destiny.-Thrift Magazine.

Meaning of the Carat Mark.

any other article of jewelry you gen- ply. "What has she been in for?"erally find the mark, "14k," on it if it is made of gold of that proportion. But as to just how much gold there is in a 14k gold ring, few people know. Some gold is 18k and some 22k.

Just as the name "sterling" stamps silverware as being made of solid silver, so the carat marks on goldware indicate the amount of gold used in making it. Gold is divided into twenty-four carats, the "k" mark meaning "carat." Pure gold contains twenty-four carats. The mark "14k" on an object made of gold means that there are fourteen parts of gold and ten parts of alloy, generally copper, in its makeup. Articles made of pure gold would not retain their shape, so the alloy is added, 14-carat gold being most generally used in the manufacture of jewelry.

Delays That Were Fatal.

Former King Karl stopped for dinner at a time when he should have gone on; and all history suggests that such delays are nearly always fatal.

triumph, when he stayed to eat many dinners in Capua, just as Prince Charlie lost his hope of the crown when he delayed on his march to London. Six weeks at Holyrood ruined the Stuart cause. "Had he at ence marched south he might well have reached London, and had he reached London the face of history in this island might have been changed." So, too, with James II when William III landed in England; had he thrown off hesitation and moved at once to meet the invader the chances are that there; would have been no "Glorious Revo-

Primitive Conditions of Life. The natives of some unexplored re-

gions of South America make little clearings, usually one or two, but sometimes as many as 20 or 30 acres. These gardens are disorderly affairs, with the half-burned stumps left sticking up. They plant them without apparent method. They generally have a great deal of casava, our tapioca, which is their form of cereal. It also furnishes the native drink, in fermented form.

As to meat, they eat only what they can catch and kill, wild meat, exclusively, and they hunt largely with bow and arrow. It is no rare sight to see an Indian starting off with a great bow six feet long to shoot birds, for which he uses a blunt arrow, says Pro- ache then, madam? fessor Gleason. They use barbed ar-1.6-ti rows to shoot fish.

Hyde Park Has for Centuries Been the Science of Amusements Dear to Englishmen.

In Hyde park, London, nearly every game and sport known to the English has been practiced at one time or another. In 1550 the French ambassador hunted there with the king. In 1578 the Duke Casimir "killed a barren doe with his piece in Hyde park from among 300 other deer." reign of Charles I the park became celebrated for its foot and horse races round the ring, the "dusty mill-horse

drive," as Lady Malapert calls it. "Shall we make a fling to London," wrote Richard Brome, "and see how the spring appears there in the spring gardens; and in Hyde park, to see the races, horse and foot; to hear the jockies crack?"

Racing in the ring was one of the greatest attractions in the park, and some of the meetings were thought to be of great importance, as even among the state papers there is preserved the agreement for a race that took place there. Charles I mixed freely with his subjects on these occasions, but, looking on the royal park as his own possession, he once ordered the ejection of a Berkshire squire, whom he referred to as an "ugly rascal." The "ugly rascal" overheard the phrase. He went away quietly, but vowed vengeance, and gradually embittered the whole of his country against the king. He had, indeed, his revenge, for writ large on Charles Ts death warrant was the name of the "ugly rascal."

MORE THAN MERELY ORATOR

Will Crooks, English Labor Leader, a Man of Most Remarkable Personality.

Although he had such a wonderful way with him when talking to an audience, the late Mr. Will Crooks was

the despair of reporters. It was impossible to transfer his spoken words into cold print without losing the very thing that captivated his audience—the personality of the

It was all personality with Mr. Crooks, and experienced reporters have been known to go to a meeting which Mr. Crooks kept in roars of laughter, and when they had written their report tear it up because it failed to convey any idea of what had hap-

Mr. Crooks was good at telling a story, but even better at repartee. At a recruiting meeting during the war a man tried to interrupt him, and provoked the withering retort, "Yes, I know you. You are one of those who could settle the whole thing in a barber's shop on a Saturday

afternoon.' Mr. Crooks' favorite story concerned a woman who bought some flowers from a flower-girl at Piccadilly circus. She was so pleased with them that she promised to buy more on Wednesday, "when my daughter is coming out." "She shall have the best posy, When you buy a watch or a ring or ma'am, that I can make," was the re-London Tit-Bits.

Famines in History.

The famines of the ancient world, usually confined to comparatively small countries, such as Egypt or Palestine, were largely due to the smallness of the area depended upon for food. Unfavorable conditions were general and failure in one part usually meant failure throughout the country. And only one or two crops were depended upon.

Another cause of those ancient famines and of some of the famines in Europe during the Middle ages, was want of means of transportation. The land where famine prevailed might not be more distant than a hundred miles from a district where there was plenty, but it was impossible to carry some of the abundance of the latter to the stricken country, or carry it in sufficient quantities and with sufficient dispatch to succor the needy.

One of the great assurances against want are our means of transporta-Hannibal lost Carthage, a possible tion-the steamship and the railway, which make available the whole world's supply of food.

Way Hats Cause Baldness.

It is necessary for the hair to have sufficient air and good circulation of the blood as it is for the body. Both must "breathe," and both must be supplied with blood to carry off impurities. In the case of hair, the blood is supplied through tiny veins situated around the roots and any tight band around the upper portion of the head will cause the hair to die and fall out.

The construction of men's hats is such that they press rather tightly upon the forehead and the bulging portion of the head at the back, thus impending free circulation of the blood.

The connection between a man's hat and his baldness is clear from the fact that there are but few men who are entirely bald. Most of them have a fringe around the ears and the lower portion of the back of the head, parts which are not covered by their hats.

CORRESPONDENCE

Latest Items of Local News Furnished by Our Regular Staff of Writers

All communications for this department must be signed by the author; not for publication, but as an evidence that the items contributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted.

We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

BLUE RIDGE COLLEGE.

The Blue Ridge basket ball team will meet the Western Maryland basket ball team, on the home floor, this Friday evening, January 27, at 8

Alton Packard, the eminent cartoonist and humorist, entertained and instructed a very large audience on last Friday evening. This is the second time he has been on the Blue Ridge lecture course. Each time he has lived up to his reputation of "Cartoonist Supreme-Humorist extraor-

dinary."
R. C. Flory, a returned missionary from China, spent several days this week visiting the college. During his visit he gave an illustrated lecture on China missions, and gave several mission talks before the student body. The assistant State Forester, Carl

E. Pfeiffer presented the work of the State Forestry Department before the student body on Thursday evening, January 19. The main theme of the evening lecture was the prevention of forest fires. He also showed the development of the planting and growth of trees. The slides that were shown on the screen, and the motion

pictures, were very good.

The basket ball squad of Blue
Ridge College invaded Shepherdstown
on Friday, January 20, and played two games. The first game with Shepherd College resulted in the locals winning by the close score of 27-22. The Blue Ridge Quint played the same evening the American Legion team, of Shepherdstown, and romped away with the victory by the score of 41-27. Not content with this triumph the five continued their march to Frederick, on Saturday, and took the strong Maryland school for the Deaf team into camp by a 30-26 score. This dual victory of the college aggregation will serve a strong incentive to spur Blue Ridge on to the State champoinship.

HAMPSTEAD.

Mrs. Annie Greenholt, widow of the late James Greenholt, died Sunday morning, at the home of her daughter, Mrs. Wesley Snyder aged 85 years. Mrs. Greenholt had been about 11 o'clock, Isaac Annan's house a sufferer for more than a year from a complication of diseases, combined with the infirmities of old age. She is survived by two daughters, Mrs. J. Wesley Snyder, of this place, and Mrs. Clarence Jones, of Baltimore; two sons, John W. Greenholt, of Hanover; George Greenholt, of Baltimore, and seven grand-children. Funeral services in Trinity Reformed church, interment in the family lot, in the Reformed cemetery. Mrs. Esta Reinaman and Mrs.

Laura Reinaman, are on the sick list. Mr. and Mrs. Vernon Beard and daughter, Ruth, and Miss Katharyn Miller, spent Saturday with Mr. and Mrs. William Arnold.

Mr. and Mrs. Frank Pool, spent Sunday with Herbert Yingling and

Mrs. Frank Lindsay, son LeRoy, and Mrs. Herbert Shipley and family spent Friday with Mr. and Mrs. Edw. Bonner and T. J. Miller.

Mr. Robertson of the U. S. Navy, has returned back to duty, after spending some time with friends here. Miss Mildred Arnold, of Baltimore, spent from Saturday until Monday with her sister, Mrs. Hershel Miller. Emory Sterner, of near Krider's

school-house, is seriously ill with blood poisoning. Several weeks ago, Mr. Sterner hurt his arm, but the wound seemed to be healed, and on Saturday morning he suffered with severe pains in the arm. Dr. W. S. Denner, of Manchester was summoned, and he pronounced it blood poisoning. He is suffering greatly at this writing.

Some of our people are suffering with bad colds and lagrippe.

Alva C. Garner, of Owings Mills, risited his home folks, Tuesday.

John Drach and E. B. Garner are n the sick list.

Mrs. William Koontz and daugher, Ruth, spent Sunday with friends in Middleburg. Mrs Samuel Dayhoff entertained on Sunday, Mr. and Mrs. Nagel Baile,

of Medford. Rev. C. R. Koontz was a Sunday

wisitor in the home of John M. Koons.

Miss Vivian Englar attended the
Western Maryland College banquet,
at the "Southern Hotel" last Friday

Mr. and Mrs. J. W. Messler and daughter, Adelaide, spent Friday in

Chamberlain's Cough Remedy. This is a pleasant, safe and reliable medicine for coughs and colds. It has been in use for many years and is held in high esteem in those households where its good qualities are best known. It is a favorite with mothers of young children, as it contains no opium or other harmful drug. Try it when you have need of such a remedy.

EMMITSBURG.

Three fires occurred in our vicinity this week. On Tuesday afternoon, John Haugh's chimney caught fire, but the blaze was quickly extinguish-ed. Early Wednesday morning, about 6 o'clock, the barn on the Kerschner farm, occupied by Dorsey Bros., near town, was burned by the explosion of a lantern, while doing the feeding The live stock was saved, but a 1 of machinery burned. The same day was burned, when a spark from the chimney ignited the roof. The alarm was turned in and the Vigilant Hose Company quickly responded and did excellent work, but it had gotten such

the house. Carl Haller and family moved near to Washington, D. C., last week. Mrs. Charles D. Gillelan is visit-

headway that the building was de-molished before the flames were ex-tinguished. The most of the furni-

ture was saved by removing it from

ing in Baltimore. Scarlet fever has again made its appearance here. One case was re-

ported this week.

Bertram Kerschner and Eugene Zimmerman, left, on Tuesday, for an extended trip to Florida.

Leslie Fox, of Rocky Ridge, who had both arms broken about two weeks ago, was in town on Tuesday, with his wife and daughter. He is getting along very nicely.

Ever try Nonpareil Poultry Powders? Now is a good time. Your fowls need toning up. Reindollar Bros. & Co. 1-6-tf Advertisement

BRIDGEPORT.

Miss Edna Stull, of Littlestown, Pa., spent the week-end with her parents, D. A. Stull and wife.

Mrs. H. W. Baker and daughter,
and Master Harold Cornell, spent
Sunday afternoon with Gasaway Oh-

ler and wife, in Taneytown. Misses Mary and Maude Hobbs and

Lillian Kelley and Guy Hobbs, all of Thurmont, were recent visitors at the home of Emory Ohler and family.

James Mort, of Tom's Creek, spent

several days last week with his daughter, Mrs. Bernard Bentz and family Mr. and Mrs. Ernest Smith cele brated their twentieth wedding anniersary, last Saturday, by giving a dinner to a number of their friends. Jones Baker and John Keilholtz, attended the Fourth Quarterly Conference of the Thurmont M. E. Circuit.

held there on last Friday. Miss Pauline Baker attended a teachers' meeting, held in Frederick, last Friday. She was accompanied by Mrs. Carrie Fuss and Robert Wag-

Mr. and Mrs. Jones Baker visited at the home of Wm. Naill, on Sunday evening.

HARNEY.

J. V. Eckenrode has his store room at this place about in shape for Guy Haines to take possession, which we are informed he will do about Feb. 1. This was at one time one of the lead-

sick list for several weeks. Samuel Harner has also been sick

and confined to his bed for some time. W. A. Snider is critically ill, at this writing.

If our people do not get their ice houses filled this year, it will be their fault. We are told that it is nearly 15 inches thick, on the Monocacy.

KEYMAR.

Cover & Son who had the building of Miss Anna Mehring's new house has contracted with Wm. T. Zentz for the outside painting.

Miss Mattie Simpson, is spending

some time with her niece, Miss Mar-Rev. Nicholson, of Union Bridge made a recent visit among some of his members of this place.

Mrs. Grace Bohn and daughter,

Cora, of New Midway, spent Mon-day with Mrs. M. W. Bell.

Miss Mary Weybright, of New Windsor College, visited Mrs. Wilbur

Otto, on Sunday. Marshall Bell has sold his home to John Leakins, of Johnsville, the former having purchased from Upton Mehring the 19 acre field opposite Keymar station, known as part of the Lavina Mehring farm. Mr. Bell will

Miss Susie Birely returned home from Baltimore on Monday, after a week's end visit.

Mrs. Walter Johnston is very ill. Emory McKinney was hurt at the cement plant. At this writing, we do not know the extent of the injury. Mr. and Mrs. R. J. Walden is attending the Madison Square Poultry Show, in New York.

The singing school under the direction of Prof. H. C. Roop, now numbers 42, and progressing fine. They are preparing for a public singing on Feb. 5th.

MARRIED

KISER-DEBERRY. On Wednesday, January 25, 1922, by Rev. L. B. Hafer, pastor of Trinity Lutheran Church, Taneytown, Mr. Roy B. Kiser, a son of Mr. James Kiser, of near Keysville, and Miss Hilda S. Deberry, a daughter of Mr. William Deberry, of near Tom's Creek, were united in marriage. This was at one time one of the leading business stands in the upper end have been brought up on farms, and of the county. Mr. Haines has our best wishes for his success.

Jacob Stambaugh has been on the

CARD OF THANKS.

We wish to extend our sincere thanks to neighbors and friends, for their kindness during the illness and death of our dear husband and father.

MRS. J. PIERCE GARNER. MRS. ROY C. KEEFER.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MRS. ELIZABETH B. STITELY. Mrs. Elizabeth Barbara Stitely, wife of Wm. Henry Stitely died at the home of her son, Charles M. Stitely, at Keymar, on Jan. 20, 1922, after long illness of cerebro hemorrhage, aged 77 years and 24 days. She is survived by her husband and the folowing sons and daughters, Geo. H. Stitely, of New Windsor; Charles M. Stitely, of Keymar; Mrs. Auson Boller, of New Midway; Mrs. C. A. Buhrman and Mrs. C. L. Rayner, of Bal-

Funeral took place from her late home, Monday morning, with services at the house by her pastor, Rev. R. S. Patterson, and burial at Rocky Hill

MR. J. A. PIERCE GARNER. Mr. John A. P. Garner died at his home in Taneytown, at an early hour Tuesday morning, January 24, from acute Bright's disease, aged 59 years, 2 months, 5 days. Mr. Garner had been in delicate health for several years, due to a complication of troubles, but was critically ill only

recently. He was a retired farmer, but was also an excellent wood-worker and all-around mechanic-a handy man in general. He had served as Burgess of Taneytown, was a member of the Council of the Lutheran church a number of times, and up to his last illness had been in the employ of H. A. Allison. He was a man of fine character, and a good citizen in everyway.

He is survived by his wife, and one daughter, Mrs. Roy C. Keefer, of near Union Bridge, and by two brothers, Daniel W. and Jere J. Garner. Funeral services were held in the Lutheran Church, Thursday afternoon, by his pastor, Rev. L. B. Hafer, assisted by Rev. Guy P. Bready; interment being made in the Lutheran cemetery.

MRS. WM. B. DUTTERA.

Mrs. Mary Julian, wife of Rev. W. B. Duttera, D. D., of Salisbury, N. C., died January 19, from cancer following a lengthy illness. Mrs. Duttera was twice married, her first hus-band having been William H. Miller, from which union there are two children, Mrs. Judson Shaw, of Georgia, and William Miller, of Salisbury She is survived by four children by second marriage, Wayne and Morris, and Dorothy and Mary; the oldest, Wayne, being about 13 years old. The Salisbury Evening Post gives the following fine tribute to Mrs. Dut-

"Mrs. Duttera was the only daughter of the late David R. and Elizabeth Julian, and was born in this city, spending her entire life here. In her young girlhood and young womanhood she was probably the most popular woman in Salisbury and it was common knowledge that she never allowed an opportunity to pass to render a service to humanity. She knew no class, but she was the friend of all and was pleasant and agreeable and sociable to the rich and poor alike and with a smiling face and cheerful disposition she greeted all whom she met, in home in church, on the street, no matter where.

Before her second marriage she was a member of St. John's Lutheran church, an untiring working. member, and was a leader in all church work, for years being a mem-ber of the choir and leader in all societies and Sunday School. After her marriage to Rev. Dr. W. D. Duttera she became at once a co-worker with him in his labors in church activities. Of late years, when the duties and responsibilities of the home fell upon her she could not devote as much time to church work as formerly but she did all that she possibly could in this way.

There was a time when she lost no opportunity to administer to the sick or the afflicted and in this respect was an angel of mercy. Her friends were legion and since her condition became critical there had been con-stant inquiry regarding her by friends throughout the city. Her home life, before and after marriage, was that of a devoted daughter and sister and wife and mother.

In Remembrance of our dear mother, MRS. ROSE WINTER. who departed this life, Jan. 16, 1922.

A precious mother from us is gone; A voice we loved is stilled; A place is vacant in our home, Which never can be filled.

Our mother now has gone to rest, Beneath the tree of life; She leans upon the Saviour's breast, So free from pain and strife.

Mother, thy gentle voice now is hushed; Thy warm true heart is still; And on thy aged and innocent brow, Is resting death's cold chill.

Thy hands are clasped upon thy breast; We have kissed thy lovely brow; And in our aching hearts we know We have no mother now.

By her son and wife, MR. and MRS. HERBERT WINTER.

On you, dear mother, we would always depend,
And know we had one sincere friend;
And all of the hours on earth with you
spent,
Your heart to us was always bent.

God called you home, it was his will;
But in our heart we loved you still.
Your memory is as dear today
As in the hour you passed away.

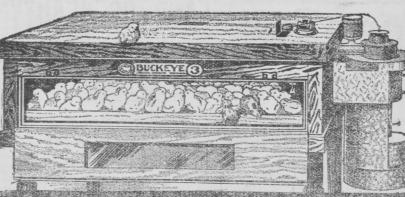

By her Son and Wife,
MR. and MRS. EDW. H. WINTER.

A grandma dear, a grandma kind. Has gone and left us here behind: We will cease to weep for tears are vain, And grandma dear, we will meet again.

Oh, grandma dear, can it be, No more thy smile of love we see; Those eyes that now are closed in death, We will think of till our last breath. We loved her, yes we loved her; But Jesus loved her more; And He has gently called her To yonder shining shore.

Dear grandma, you will never be forgotten Never shall your memory fade; Sweetest thoughts will everr linger, Around the grave where you are laid. By her grand-child, CARRIE V. WINTER.

Secretary Mellon on the Bonus.

Secretary of the Treasury, Mellon, has sent a letter to Chairman Fordney of the Ways and Means Committee, in response to a request for the Treasurer's views on the Soldiers' Bonus proposition, in which he says;

"It is clear that in order to balance the budget, expenditures must be still further reduced, rather than increased, and that under those conditions there is no room for new or extraordinary expenditures.

"The Government's economics more over, have benefitted without stinting in any way the relief of disabled veterans of the late war, for the figures show that the Government spent for this purpose in the fiscal year 1921 about \$380,000,000 and will spend in the fiscal year 1922 and again in the fiscal year 1923 about \$450,000,000 a year for the same purpose, or more than will be spent for any other one purpose except interest on the public

"The overshadowing problem of the Treasury is the handling of the public debt, particularly the conduct of refunding operations, with almost \$6,500,000,000 failing due within the next sixteen months. The Liberty Loans were floated during the stress of war, through great popular drives and with the help of a country-wide organization of perhaps 2,000,000 persons. To conduct refunding opera-tions on a similar scale in time of peace is a task of unparalleled magnitude, and it is of the utmost importance to the general welfare that it be accomplished without disturbance to business or interference with the normal activities of the people. "This cannot be done if the refund-

ing is embarrassed by other opera-

"The figures show that with the enormous refunding operations which the Treasury has to conduct, it would be dangerous in the extreme to attempt to finance the expenditures involved in the bonus through new borrowings. The position of the Treasury remains unchanged, but if there is to be a soldiers' bonus it is clear that it must be provided for through taxation, and through taxation in addition to the taxes imposed by existing law."

Relics of Sir Walter Scott. By the earnings of his pen Sir Walter Scott built his country home, Abbotsford, called "a romance in stone and line." It is a pleasure to linger in his study at that place. Here he wrote many of his books surrounded by a library of some 2,000 volumes. Here is the portrait of his pretty French wife, the crucifix held in the pale hands of Mary Queen of Scots until the ax fell, the keys that were found in the old moat at Lochleven castle and various other articles of interest. In a case in the great hall may be seen the black and white suit last worn by Sir Walter with the queer old bell-crowned tall hat. All around are memories of this man whose stories were clean, who never dipped his pen in the mud that depicts the lowest passions of humanity.-Chicago

Footprints. "What's the matter with the Honorable Flubdub?"

"Says he wants to leave footprints on the sands of time." "Better change his patter, then."

"Huh?" "Tell him to quit running around in circles."-Louisville Courier-Journal.

GIVE THOUGHT TO THE BIRDS

New York Authority Urges Prospective Home Builders to Remember Feathered Friends.

Home owners, in planting trees, shrubs and vines, should take into consideration the idea of growing plants that will attract birds, according to Professor Alan F. Arnold of the New York State College of Forestry, who finds that there is a possibility of many of our native birds disappearing altogether for lack of food and shelter.

The list of trees, shrubs and vines attractive to birds includes many of our most ornamental plants. There is no more valuable evergreen tree for red cedar; it aso provides the best tainty. shelter and nesting sites for birds, and insects commonly found on the

the Chinese flowering crabapple are that. two particularly beautiful trees that are favorites with the birds. The gray-stemmed dogwood, honeysuckle, American elder and sheepberry are al-80 serviceable to the birds, and ornamental. The Virginia creeper, one of the most popular vines, furnishes nesting sites for birds and draws the attention of the birds away from grapes, apples and peaches.

"If one has a place where plants a wilder sort can be introduced." said Professor Arnold, "and wishes to make a special point of attracting birds, there is a great variety of native plants that could not perhaps be used for more finished effects, but here would be just the

CIVIC DUTY SHARED BY ALL

Cultivation and Spread of Public Spirit and of Patriotism Must Not Be Evaded.

Civic responsibility, when the qualifying age is reached, rests on all alike. Furthermore, the notion of one's Dublic duty has during the last few Years broadened considerably. Young and old are learning that voting, though a serious and weighty affair, is but one small part of a citizen's duty. A citizen's business is to mind the

law and help to see that others mind it. A citizen's business is to be a good heighbor, to pay his debts, to collaborate in works of neighborhood

henefit, to assist effort for the general Social welfare. He has not done enough when he

has made himself rich. He may bulle himself a home of great costliness and beauty. He may surround himself with the appurtenances of e elsure. These things are legitimate rewards of honest, earnest toil.

But if he is a good citizen, he cares not merely to have, but to share. Children taught to be unselfish in their games and diligent in their studies have had their primary and

fundamental lesson in citizenship. The habits they acquire, of industry and generosity, will make them in maturer year's beloved and respected, as examples of public spirit and of ^{hatriotism.—Philadelphia} Ledger.

Beauty as Civic Asset.

If we want to draw self-supporting Outsiders to the city as a place of residence, beauty attracts more quickly than anything else, asserts the Indlanapolis News. A good many hold the view that this argument applies Only to the more wealthy districts. There is nothing more false than this. It applies equally to the working home districts. There are working home disblets in this city which, if left alone, Will remain beauty spots. The houses are set back from the sidewalk sufdelently to admit of flower beds and awns, which in summer are most atbactive. These districts should be Protected by a zoning law that would not permit a grocery store or a garage to get into their midst.

Analysis of the situation will show that by spending a little money the taxable value of certain districts can he raised so it will cost the public ning and a beauty spot will be added to the city.

Argument for Clean Streets.

notice in the description of the Jerusalem, as given us by St. John Revelation, that there are streets, and it is very certain that these streets tre perfectly clean and that it will be required of all who would be a dweller eternity that they must be of cleanly habits.

We may depend that in the final day of reckoning that it will count heavily against people who make a practice of throwing paper or other refuse in the eet or spitting in improper places, for it will be taken for granted that would in like manner defile and Utter up the city of our God and will be wanted.—Cleveland Plain Dealer Correspondence.

THINGS ONE WOULD FORGET

Among Them May Well Be Listed This, Told So Feelingly by Victim of Deaf Cashier.

When I was a young fellow, shy and self-conscious, I went to a church sociable. I escorted three charming girls with angelic countenances and human appetites out to the refreshment table. After they had eaten all they wanted I found that I had left pocketbook at home. A deaf man, whom I had never seen before, was at the cashier's desk. My face aflame, I went down and said softly:

"I regret to say that I have, unfortunately, come away without any change to-"

"Change two?" chirped the old man. Oh, yes, I can-five if you want it." A crowd of people was waiting impatiently to pay their bills and get

Finally I shouted: "I have no money," and I was ready to sink into the earth, while all the people, especially the three girls I had treated, were giggling and chuckling audibly. Some of the church members came up to see what the uproar was, and recognizing me, made it all right with the cashier.—Chicago Tribune.

Breeches Were Worn in Babylonia. s, a garment for the legs, especially, as distinguished from trousers, for covering the upper portions of the legs, were formerly called hose in England. Breeches or hose were in use even among the ancient Babylonians. In Europe we find them first used among the Gauls, hence the Romans called a part of Gaul "breeched Gaul" (Gallia braccata). In the Fifth century breeches had become fashionable in Rome. In the time of Queen Elizabeth and James I the breeches had assumed enormous dimensions, being stuffed out with various materials, as wool, hair, etc. King James' partiality for such breeches is well known, and we find him represented in an old engraving with wide stuffed breeches tapering to the knee, slashed and adorned with lace. In the reign of Charles I they took the form of short trousers, loose at the knee and ornamented with ribbons and lace. In the time of William III the tight knee-breeches came in, and were supplanted by trousers only in the Nineteenth century.

Traveling. Ourselves are cosmic and capacious beyond conjecture and to experience some notion of the planetary perspective is the richest income from traveling. It takes all to inform and educate all. Sallies forth from our cramped firesides into other homes, other hearts, are wonderfully wholesome and enlarging. Travel opens prospects on all sides, widens our our horizon, liberates the mind from geographical and conventional limitations, from local prejudices and national showing the globe in its different climates, zones and institutes of intelligence. The traveled mind is the catholic mind educated from exclusiveness and egotism.--Exchange.

Types of Oranges.

The best known orange is the "sweet" or "round" type which comprises the bulk of the commercial crop. There are several other types, however. The manderin or "kid glove" type—the tangerine, in other words is common on the fruit stands, but it constitutes but a very small portion of the market supply. The Seville orange, known as the "sour" or "bitter" variety, rarely is grown for its fruit, but seedings are used extensively as root stocks on which to bud sweet oranges. The Bergamont orange, from the rind of which Bergamont oil is made, seldom is grown in the United States.

WAVES OF GIGANTIC HEIGHT

Thousands of Tons of Water Not Infrequently Poured Upon Decks of Ocean Vessels.

Even in stormy weather the average height of waves in mid-ocean does not as a rule exceed 30 or 40 feet. Sometimes, however, one enormous wave makes its appearance amidst the rest.

Why this should happen no one can say. All we know is that a mighty mass of water rushes suddenly toward a ship at the appalling speed of over 100 miles an hour.

If the ship can meet such a wave with her bows she will ride over it, though thousands of tons of water may sweep over her decks. But if the wave is following her and rushes at her from the stern, she may fail to rise. Many a good ship has gone to her doem in this way.

These vast mountains of water rise sometimes to a height of more than a hundred feet—as high as the spire of a church. They have been known to extinguish the mast-head lights of sailing ships.

Sometimes on a perfectly calm day there will be a sudden troubling of the surface of the sea, and without the slightest warning a wave 150 feet high will appear.

Plant Societies.

It appears that the knowledge of botany has been greatly advanced by the development of what may be called the sociology of plants, that is, the study of their relations to one another, as well as their adjustments to surroundings. Botanists recognize that plants are not scattered haphazard over the globe, but are organized into definite communities. A pond has its plant society, all the members of which fall into their proper places. A swamp-forest consists of trees possessing a certain social relationship, and differing from those that form a forest on dry land. There is progression from one social organization of plants to another. A lily-pond may give place to a swamp-moor, this to a society of swamp shrubs, and this, again, to a swamp-forest of tamarack, pine and hemlock. So societies of plants on dry lands succeed one another as the conditions change.

Cause of Volcanic Explosions.

Volcanic explosions are commonly regarded as the release of stores of energy kept confined by external pressure, and boiled explosions and geyser eruptions are typical of this class of outbreaks. An expert of the United States geophysical laboratory finds that another class of explosions. that of explosive mixtures like gunpowder, are not likely to occur in volcanoes. But a third class, that of explosive compounds brought into contact with oxygen or water, is more probably the usual source of volcanic explosions, and is illustrated by aluminum sesquioxide - finely divided brought into such relation with water in the electric furnace that mechanical detonation causes violent explosion. The dust of Mont Pelee may have been analogous to the aluminum sesquiox-

The Indians' "Pipe of Peace."

The calumet, the "pipe of peace" of the American Indians, was used on all ceremonial occasions, but especially when treaties of peace were being ratified. Each warrior took a solemn puff from the pipe as it was passed around the circle. Native tobacco, with which willow bark or sumac leaves were mixed, was smoked. The bowl of the pipe was made of white stone in the East and Southeast. In the West it was made of a red clay obtained from the famous pipestone quarry of Minnesota, mentioned in Longfellow's "Hiawatha." The pipe had a very long stem, made sometimes of wood, sometimes of reed. Feathers, porcupine quills and women's hair were used as decorations on the stem. The name "calumet" originated with the French Canadians.

The Yawn.

The amount of effort we make in yawning is surprising. Dr. C. Mayer, writing in the Lancet, says there are three stages, and the whole process lasts about six seconds. In that time we widen the chest, lower the diaphragm, elevate the wings of the nostrils and the soft palate, draw the tongue upward and backward and dilate the rima glottidis, the opening between the true vocal chords. We also depress the lower jaw to its greatest extent, contract a number of muscles in the neck, shoulders and trunk, widely open the mouth, close the eyelids, feel the noise in the ears and have a feeling of pleasure and satisfaction. We stretch the arms and extend the trunk. Altogether, it is a most complete performance.-Brook-

HOW=

"TAPESTRY FORESTS" OF HAWAH WERE STARTED. -The Hawaiian islands were thrown up ages ago from enormous volcanic chimneys that opened in the Pacific floor. Even to this day the eruption has not ceased. The mountains of the archipelago, with the passage of a great length of time, have been weirdly worn by terrible rains, so as to present to the view fantastically carved canyons and gorges, flanked in many places by almost vertical cliffs.

Upon the face of these cliffs flourishes a dense growth of "tapestry forest," as it has been called, composed of many species of trees strangely dwarfed in order to enable them to cling, supplemented by a shrubbery undergrowth and woven into a continuous mantle. The soil on the cliff faces is necessarily thin, and, to save themselves from being blown off, the trees develop an intricate system of anchoring and bracing roots, forming in many a steep place natural lad-

ders up which the natives climb. The tapestry growth is saturated with water like a sponge, the rainfall in the parts of the islands where it flourishes being extraordinary. To the eye, with its variations of gray-green, yellow-green, olive-green, silvergreen and scores of indefinable shades, it has a rich, mottled, velvety effect, as if of a wondrous woven drapery. Now and then landslides occur, making great rents in the drapery, which are slow to heal. The repair work begins with grasses; other humble plants follow and eventually, when enough soil is available, trees sprout and establish themselves. - Philadelphia Led-

Why It Should Not Be Necessary to Travel to Secure Needed "Change of Climate."

MAKE HOME HEALTH RESORT

"The search for a better clmiate," says the Journal of the American Medical Association, "frequently means, as every clinician well realizes, a change in something more than meteorological environment. It is not the air for the lungs, the temperature for the skin, the altitude for the circulation, or such incidents that alone are sought. Social, mental and physical changes occasion their own beneficial or baneful transformations. Many of the advantages which rest, recreation, diversion, outdoor life, relaxation, altered diet, expert medical attendance and proper hygiene secure under the guise of a 'change of climate' frequently could be obtained at home with less real hardship to the patient.

"Frequently the home will become a health resort if it can be made a pleasure resort. In the case of specific diseases such as tuberculosis, we gradnally have learned the importance of teaching the patients how to live at home. The burden of recovery no longer is shifted solely to the 'resort' in a far away place. Have we not neglected all too often the possibility of taking advantage of local climates? Perhaps it will become more popular in the future to seek health at home. Then the choice of climate will no longer require 'a nerve-racking decision."

How Chinese Women Are Working. Chinese women are rapidly assuming a more prominent position in the economic and business affairs of that country. Miss Zung Wei Tsung, who went to London to represent Chinese women at the International Working Women's congress, tells the London Express that Chinese women in Shanghai are not unlike English women in many things.

They shop, they drink tea in restaurants, and they go to the movies with their husbands and children. It is only in a few old conservative families that the women are kept in the seclusion of their homes.

"Few Chinese women work, and you do not see them in banks and stores," continues Miss Tsung. "But this state of things is changing. Next year there will be a new telephone company that will employ girls as operators. Many are studying shorthand and typewriting; railway companies employ girls now as ticket agents, and recently a number of women entered for a civil service examination."

How She Played Sir Walter.

The duke of Westminster recently came to the rescue of beauty in distress in the person of the Angloready gallantry as Sir Walter Raleigh's when he saved Queen Elizabeth's feet from the mud.

The actress was motoring from Cauterets and sought to cross the Spanish frontier at Hendaye, but ran up against the immovable Spanish customs men, who demanded 50,000 francs, as the Spanish laws against automobile smuggling provide for a money deposit equal to the value of

Not having such a large sum, she was about to turn back, when a motorist who said he had often applauded her performance in London asked if he might be permitted to offer assistance. The permission was granted and the stranger presented the customs officials a check. It was signed by the duke of Westminster.

WHEN DICKENS ATE 'POSSUM

English Author and Washington Irving Dined With Webster in the National Capital.

"I have, sir, just purchased in the market a famous opossum"-so wrote Webster to Irving and the latter's guest, Dickens, in March, 1842-"and I have sent it home to Monica, my cook, who will stuff it with chestnuts and bake it with sweet potatoes in true Virginia style. It will be, sir. a dish fit for the gods. Come, with your friend, and partake."

Dickens and Irving did partake in Webster's house, on Connecticut avenue, Washington, and Dickens did not relish the 'possum as much as he relished Webster's company. In a paper on literary aspects of the capital in the Catholic World Margaret B. Downing recalls another British visitor's introduction to a new dainty in Washington, Thackeray, in 1851, ate his first ice cream with Irving at the home of Hamilton Fish, on H street. Not many people realize that Irving lived for nearly five years in Washington. Of course, every one knows that George Bancroft long lived there, and that Whitman and Burroughs were in the civil service during the same Civil war years. Probably most people know also that Mrs. Stowe resided in Washington while "Uncle Tom's Cabin" was appearing in the National Era. Charles Warren Stoddard, the author of the "South Sea Idylls," also lived in Washington for a time. But no city really has title to an author until he not only lives in it, but writes about it. The author of this paper omits all mention of Henry Adams and the most notable novel of Washington life, "Democracy."-New York Evening Post.

HAS MANY CLAIMS TO FAME

Island of Jersey Has Been Called a Wonderland-Really Is an Interesting Place.

The island of Jersey is famed for many things, remarks the "Under the Clock" columnist of the London Daily News. . . . lilies, golfers, "wonders," potatoes and cabbages ten feet high, to mention only a few of its most obvious specialities. But its chief claim to fame is that it is the residuary legatee of the old Norman duchy, therefore the inheritor (and presumably the proprietor) of the British empire. Jerseymen undoubtedly fought in William's victorious army, at Hastings, and to this day the island has a constitution and laws which have been little altered since the reign of King John, and which, on occasions, have even dared to defy the thunders

of the privy council. The inhabitants are a most intensely loyal people, and the two greatest blows that can be offered to their pride are, first, to confuse their island with Guernsey, and second, to call them French. Fancy the joy of the Jersey contingent which was welcomed into Fermoy with the strains of the Marseillaise! Jersey has never been conquered; England has; the deduc-

Cypress Lumbering.

tion is obvious.

Not many years ago owners of cypress swamps regarded their property as practically worthless. Cypress lumbering was attended with peculiar difficulties because of its swampy growth. The green logs could not be moved with oxen or mules because of their great weight and the softness of the soil. And often the logs were so saturated with moisture that they would not float. Sometimes only about 15 per cent of a cut could be gotten to market. Finally lumbermen began to girdle the trees six months or a year before cutting, which resulted in

a great saving. Now the lumbermen drain the swamps before cutting. Swamp drainage is an important part of modern cypress lumbering. Massive machinery also is used. In the overhead cable skid method the logs are brought in by a carrier traveling over a powerful cable suspended between two trees usually about six hundred feet apart.

Color Blindness.

In total color blindness the eye distinguishes only light and dark, in the more common partial color blindness red is mistaken for green, or black for brown, and in a third form only primary colors can be made out, often with confusion of blue and violet. The new spectrometer of F. W. Eldridge-Green measures the portion of the spectrum appearing to be monochromatic and the limits of visibility at each end of the sectrum. The average eye sees six definite colors and 18 apparently monochromatic parts of the spectrum; another more or less imperfect color vision separates not fewer single color patches than 18. Exceptional eyesight detects seven French actress Alice Delysia, with as distinct colors, with as many as 25 monochromatic patches.

Joke on Him.

The bride and groom, followed by the usual shower of old shoes and rice, boarded the train. The traveling man across the alsle enjoyed the fun to his heart's content.

After the train started, the groom tried to clean up the rubbish left by the merrymakers. He opened the window and threw out the old shoes and rubbish. The traveling man was so amused that he forgot that he was

sitting there in his stocking feet. Later he came to his senses and then he found that the groom had mistaken the only pair of shoes the traveling man had with him for some that the merrymakers had left.

Rose Terry's Scholarship

By E. DUNBAR.

When the Browning society of Tatum gave the "Rose and the Book" to raise funds needed to send a student to Tatum Women's college, there were those among the citizens of Tatum who figured it out that the women had adopted a roundabout way of raising two hundred dollars. Old Si Bradley actually went to figuring about it, and the afternoon before the performance in the new theater he gave out as his opinion that it had cost the folk of Tatum some thousand dollars in cold cash to raise that two

Just in the Bradley family alone it had cost nearly twenty-five dollars on a conservative estimate. Jenny, Si's daughter, was taking a minor part. She had had to get her own costumes. Not counting the things that she had had to make, but could use later, these costumes had cost her eight dollars and seventy-three cents. Then she had had to give up two evening music lessons for evening rehearsals and Jenny got a dollar a lesson. That came to over

hundred.

ten dollars. Then there were tickets for all the Bradley family and a taxi to take Jenny to the dress rehearsal the night before, as it had rained, and Jenny had been so busy over the rehearsals that she hadn't been able to help her mother, so they had had to get in a sewing woman three days to help with the spring sewing. And so it had come altogether by careful figuring to \$22.75. This was barring the possible necessity of a taxi to take Jenny to the play that night, and it looked like rain, as well as the probability that Jenny would be all played out after-

What Si Bradley was arguing was that it wasn't worth while. If the folks of Tatum wanted to give a scholarship, through the Browning society, they should be assessed just so much. Then there wouldn't have to be any play and he wouldn't have to go through the ordeal of sitting through

ward and would need a doctor and

F Roger Maplewood, Mr. Bradley's companion in arms, added his quota of argument against such perform-It would cost even more than Mr. Bradley had figured. For he knew It for a fact that the Wentworths were going to be quite a bit out of pocket. Jim Wentworth was going to take a part and at the last minute he had been called away on business. He couldn't throw the thing over the last minute that way. So he had to telegraph to some fellow he knew, taught English in some college somewhere and knew Browning from A to Z, and get him on to take his place. This had meant Jim Wentworth had had to pay this professor's carfare, and that the Wentworths would have to have company dinners. No. it wasn't worth while. According to Roger Maplewood there wasn't any reason why the citizens of Tatum should give scholarships anyway. If a girl hadn't enough money to get an education she could go to work in a factory or somebody's kitchen. College educations were for children of the well-to-do, not for poor

This discussion took place aboard the local trolley car of Tatum and it was audible to the few passengers because Roger Maplewood and Si Bradley always sat on opposite sides of the car and threw their remarks back and The state of the s

Rose Terry, going from high school to the farmhouse where she worked, was one of the passengers. This was unfortunate. For Rose Terry was the one out of the seventen or eighteen who had applied for the scholarship who had been selected by the Brown ing club as the beneficiary. She was twenty-six and settled. That was what finally decided the matter. In other words she wouldn't do what unappreciative beneficiaries of the club's bounty had done before-just get through college and then marry some one and waste her education. The club wanted to be sure that if they helped a girl to go through college she was going to spend her life in teaching afterwards. If she was the kind that would get married, why waste the education?

Rose Terry was twenty-five the year before when she went to work with a farmer in return for her board and then started in at the high school. She had been able in one year to make up for the neglected education of her girlhood and prepare herself for college. She had not applied for the scholar-She had expected to go on working with the farmer's family. But the committee had heard of her and had persuaded her to make her application. She had been selected and now the committee had asked her to sit in the front set along with the officers of the Browning club. No, they didn't want to make a spectacle of her, only if any one should want to point her out they could do so easily.

This overheard conversation between Si Bradley and Roger Maplewood had not lightened her spirits especialty. She was leaving school at three that afternoon. Then there would be a room or so to sweep. The cake to make, table to set, supper to serve, dishes to wash and then she must dress in her best cotton voile and catch the seven o'clock trolley back to Tatum.

She was tired and pale when she

! met Mrs. Gray, the president of the club that evening, and somehow Mrs. Gray took something of a satisfaction. The paleness and tiredness made her look all the more settled. Secretly Mrs. Gray would have enjoyed leading Rose up on the stage between the acts and presenting her to the audience as the one they had selected as their bene-

All eyes were focused on the stage when the curtain rose. It was Prof. Moore who received immediate attention. He was the substitute who had been imported at the last minute. Not only was he a sranger but the tones of his voice and the obvious sureness of his action were new to the inhabitants of Tatum. The general comment was that he seemed like a regular actor. The attention was so thoroughly focused on this imported performer that few of the audience noticed a little flurry in the front row when Rose Terry slid from her seat a supine heap on the floor, or later, when half conscious and supported by Mrs. Gray's strong arm, she made her exit before the performance had more than begun.

"That's Rose Terry," people whispered. "She's worked awful hard." "Well, I only hope she appreciates what the people of Tatum are doing for her. I guess she isn't the only one that feels like fainting."

These words were the first that Rose heard as she slowly regained full consciousness propped up against a chair in the cool of the vestibule. They did not help her to get a grip on herself. And as she made an effort to get back her strength by inhaling long breaths of fresh air she felt the tears well in her eyes. Quickly her thoughts went back to the experiences of the last five minutes. She tried to choke back the sobs but she could not resist the wave of weakness that seemed to sweep over her. She held her hands to her eyes and made no answer nor any effort to look up when Mrs. Gray shook her and told her to get control of herself. She felt a strong desire to cease to exist and almost welcomed the faintness that she felt coming back

She was conscious enough to do a little rapid thinking as they carried her out through a side hall into the dressing rooms. She tried to protest. They musn't take her there. But her efforts were in vain. She knew they laid her on a wicker lounge in one of the dressing rooms. She knew some one was fanning her. Then a long time passed and then-. It seemed she had suddenly been transported back two years. Yates Moore was bending over her. She felt his breath and recognized his voice. It was only when she opened her eyes and saw his fantastic costume that she remembered where she was and what had happened. Then some one hurried up to Yates Moore, looking very surprised. They had been looking for him, waiting to send up the curtain after the second act. Yates hesitated, then pressed Rose's hand and begged lier

to remain there until he came back. The next morning an executive meeting of the officers of the Browning society was called by telephone and not one of the members failed to appear promptly in Mrs. Gray's parlor.

No one needed to be told, for the information had spread like wildfire, that Rose and Prof. Moore had talked Rose had once been engaged to him, and there had been a quarrel. It was not known just then what the quarrel was all about. Mrs. Gray promised to total sum paid out for this purpose in have full details for the next meeting. once instead of going to college.

"And she looked so plain and set-"Well, she oughtn't to have applied for the scholarship if she had had any such plans in her head."

"She didn't apply," came back in unparliamentary manner from Mrs. Gray in the chair. "What we want to do now is to look over the qualifications of the other applicants. Rose Terry is done for as far as the Browning society is concerned."

OLD ENGLISH EASTER CUSTOM

Ceremony of "Heaving" Is Still Observed in Some Rural Parts of the Country.

An Easter "heave" is not a trip on the sea. It is a very ancient Easter custom which is still observed in rural England. In some parishes it is called "lifting." The custom seems almost as old as Christianity itself. Kings, nobles, and peasants are all 'heaved." An old document in the Tower describes the Easter "heaving" of Edward I. by the ladies of the bedchamber and maids of honor. The "heaving days" - still called such were Easter Monday and Tuesday. On the Monday the men "heaved" the women - selzed them, lifted them thrice head-high, and then demanded a "chaste salute." If that was not given, then a shilling fine was imposed. On the Easter Tuesday the women heaved the men. The latter were held until, by payment of tall, they won "leave and license to depart." It may be asked-why "heave"? Heaving, like most old customs, had a religious origin. Easter is the commemoriation of Christ's rising from the grave, and "heaving," which is a rising of the person from the ground, was simply a way of remembering the religious significance of Easter. It seems queer to us, but our unaltered forebears went in for symbolic (and frolicsome) remembrances far more

An Old Acquaintance.

Council-"Have you ever seen the prisoner at the bar?" Witness-"Yes Wr. That's where I met him!"

HOW ==

PRIMITIVE RACE MAKES USE OF "FIRE STICKS." -Far in the interior of New Guinea-behind the rolling surf. beyond the mountains-lives a race of pygmies. They are chocolate-colored men, barely four feet seven inches in height, but they are well proportioned, and bear no signs of deformity or dwarfism. "Tapiro" is the name of the tribe to which they

This tribe has its own villages and its own plantations. Their dress is a grass helmet with up right rims and a projection at the crown in which a bird of paradise plume is usually worn. This hat, with a bright, yellow gourd suspended by a string about the waist, is then sole costume, writes Temple Manning in the Cleveland Plain Dealer.

But over the shoulders of each man is hung a bag made of string. It holds fishing tackle and fire sticks. Thus the men are always provided with foodcatching utensils and the vital sparks with which to start a fire to cook what they catch.

The fire-making implements are two in number. One is a stick of hardwood, the other a "rope" of rattan. A cleft is made in the stick, and a stone is forced into the cleft to keep the sides apart. The firemaker places one end of the stick beneath his foot and the other end of the stick over a bunch of dried leaves. Then he places the rattan rope beneath the cleft stick and grasps it with both

Working the rope back and forth as rapidly as his hands can move, the friction of the rattan against the sharp edge of the wood causes ignition. The leaves begin to smolder, and he blows them into a flame.

It isn't a speedy process, but it is sure. For generations beyond memory these pygmies of the forest-covered hills have depended upon their fire sticks for cooked food and for heat.

REPAIRING RAVAGES OF WAR

How Co-Operative Societies Are Aiding the Good Work in Devastated French Regions.

Dur'ng the last year the co-operaovement in the devastated reof France has made considerable ress; in fact, at the present time the greater part of reconstruction work is executed by such societies. Both the government and the popula-. tion of the devastated localities have found these methods of the greatest practical value. Furthermore, the government encourages their organiza-

Since the beginning of 1919, 203 cooperative societies have been organized in the department of the Meurtheet-Moselle. They have already obtained important results. On December 31, 1920, urgent repairs had been made to each other after the performance. on approximately 12,000 buildings. The sums disbursed for these repairs amounted to 124,430,000 francs (\$24,-014,990 par), or 81 per cent of the the department. In 1920 the co-operawas going to marry Prof. Moore at of 621 farm buildings, or 88 per cent ; of the total in the department. The sum disbursed for the above purposes tled," sighed a leading Browningite, amounted to 20,250,000 francs (\$3,908,-250 par), or 95 per cent of the total.

> How Human Heads Differ. Women have broader heads in comparison with their length, darker eyes and hair, and a less marked bony de-

velopment of the skull, according to Miss Fleming of Aberystwith, who, according to the Daily Chronicle, gave the British association some facts and figures associated with her investigation of sex and growth features, and conclusions based upon an examination of 2,500 children and 1,000 women, mostly Welsh.

She had compared these with the figures of Professor Fleure relating to man. There was a marked tendency both in boys and girls to an inch more in width than in length of head. Reexamination showed that the vivid red hair of children changed into brown about the twelfth year. In the case of fair-haired children the darkening process began earlier in the case of girls than in boys.

How to Find Faults in Machinery. If your automobile engine is not running as it should, and you do not know what the trouble is, get one of the new biaural stethoscopes and make a diagnosis, as a physician does when he wants to learn what the trouble is with the interior machinery of his patient. This improved device for detecting faults in running machinery has the advantage of possessing two ear-pieces which entirely exclude external noises. It has a jointed rod which is placed upon the part where the noise is suspected to be, and the noise is so magnified that the location and nature of the trouble can be quickly determined

Why He is Unpopular.

Mrs. Bunker-He sure is unpopular with the golfers since he worked so hard on his invention.

Mr. Bunker-What's the Invention? Mrs. Bunker-A golf ball that registers the strokes during the course of the game, and there is no chance

Air Travel Is Not Popular With Ordinary Man. A "flying boat," for use over water

or land and capable of alighting on either and rising from either, made a record the other day of an average speed of 165 miles an hour from Philadelphia to New York. Two passengers were carried.

Such incidents are mildly interesting but not especially important. They do not prove any change of much consequence in human flight. There is no evidence of progress of the kind which counts most and is most needed in the use of heavier-than-air machines.

For years there has been no lack of speed. Thousands of flights in this country and in other parts of the world have shown that airplanes could easily cover long distances, at 100 or 125 miles an hour. They could make great inroads upon other means of travel, if speed were the only req-

But there are still two very grave defects. One is the lack of security, which is felt as an absolute bar to air travel by a vast number of possible patrons. The other is the inability to rise from and light upon small spaces with certainty and safety, which forces aircraft to use fields which are often far from the business centers of cities.

It would mean much more to the future of aerial navigation to cure these shortcomings than it ever can to increase the speed of air travel and set a swifter pace in the aerial transpor tation of mails and light freight.

WATCH FOR SIGNS OF "COLDS"

How They May Be Avoided or Got Rid Of Is Told by New York Physician.

With the approach of winter the subject of colds in the head again becomes of great "human interest." The reader will probably find interesting the following learned contribution in the Journal of the American Medical Association, as well as practical hints about the avoidance and cure of colds. Says Dr. J. W. McCilan of Avon-bythe-Sea, N. Y.: "I have long been convinced that 'colds' in the nose and throat are not caused by bacteria, but are produced 'primarily by temperature changes,' which may 'light up the nose and pharynx.' Even when the sneezing had begun with leakage at the nose—a sign invariably with me of developed 'cold in the head'-I could as invariably avert these 'colds' by (1) strenuous exercise maintained until all sensation of stuffiness of nose and throat had gone; or by (2) a short cold foot bath; or (3) a longer hot foot and leg bath; or (4) by application of an electric heating lamp, following this by quickly covering the feet and legs, keeping them warm either in shoes by motion or in bed wrapped warmly (this if retiring)."

How Ancients Regarded Garlic.

Despite its curative powers-not to speak of its association with grand opera-garlic has had many bitter enemies, according to "The By the Way" columnist of the Daily Express,

In ancient Egypt the priests refused entry to the temples of any one smelling of garlic, and the Greeks held i in such abhorrence that they were ac customed to place it on the piles of stones at the crossroads as a supper for Hecate, the goddess of the infernal regions.

In medieval Europe, too, the detesta The important thing was that Rose tive societies commenced the erection tion in which the bulb was held was often displayed and in some of the royal courts it was a serious offense to partake of it.

Alphonse, King of Castile, instituted in 1368 an order of knighthood called the Ordre de la Bande, the members of which were not permitted to eat either garlic or onions under pain of exclusion from the court.-London Correspondence in New York Tribune.

How Matter Affects Energy.

The foundation on which much of the progress of chemistry has been built was the proposition that matter is indestructible; and likewise the notion that energy was indestructible, or the theory of the conservation of energy, was responsible for reconciling the laws and ideas of physics, and pointed out the way for tremendous progress. More recent investigation. says Popular Mechanics Magazine. has shown an interrelation between these two, things-matter and energy -and that, as in radioactive substances, energy may appear at the expense of matter, so that according to more recent ideas the sum total of matter and energy is constant, but each one of them separately, is not necessarily so. However, a small quantity of matter corresponds to a prodigious amount of energy, and reversely a very large amount of energy, corresponds to a very small portion of matter.

How "Booze" Is Smuggled.

Most of the great quantity of liquor confiscated by federal agents along the New England-Canadian border has been seized in big raids in which truckloads or automobile loads were taken. There is undoubtedly some smuggling by water, but in an extensive inquiry I heard of one case only, John Holmes writes in the New York Tribune.

Revenue agents arrested a man who was making frequent trips back and forth along Lake Memphremagog in a motorboat. They found nothing aboard to interest them except an enormous gasoline tank. On examination they found the tank to be doublebarreled. It had two compartments a small one containing gasoline and

Why Some People are Poor.

Their ideas are larger than their purses.

They do not keep account of their expenditures.

They are easy dupes of schemers and promoters.

They reverse the maxim, "Duty before pleasure."

They do not consider it worth while to save nickels and

They try to do what others expect them to do, not what they can afford.

ELIJAH IN NABOTH'S VINEYARD

LESSON TEXT.—I Kings 21:1-29. GOLDEN TEXT—Be sure your sin will

REFERENCE MATERIAL-Lev. 25:23-28; Amos 8:4-10; Micah 3:1-4. PRIMARY TOPIC—The Sin of Selfish-

JUNIOR TOPIC-Elijah Denounces a

Selfish King.
INTERMEDIATE AND SENIOR TOPIC
INTERMEDIATE AND Feared.

Jehovah's Champion Feared.
YOUNG PEOPLE AND ADULT TOPIC -Respecting the Rights of Others

I. Ahab Covets Naboth's Vineyard

1. Location of the vineyard (v. 1). It joined Ahab's summer home in Jezreel. He wanted to transform it into an herb garden and thus round out his property.

2. Ahab's proposal (v. 2). He offered to buy it outright for money, or place. give in exchange a better one. Ahab's wish for it was a selfish whim. He did not at all need It.

3. Naboth's refusal (v. 3). It was for a twofold reason: (1) regard for the paternal estate; (2) obedience to God's law (Lev. 25:23-28, cf. Num. 36: 7-9). His refusal was on conscientious grounds. A king, even, has no right and you will be amazed to find that to ask of his subject that he violate his conscience.

4. Ahab's behavior (v. 4). He came into his house, lay down upon his bed and refused to eat. The king was sulking like a spoiled child. This is a picture of what a fool even a king, may make of himself. Let us learn that "godliness with contentment is great gain" (I Tim. 6:6).

parently she came with the sympathy of a wife, inquiring as to the cause of his behavior. But when she knew of Naboth's refusal she was violently angry. That a humble subject should refuse to conform to the desire of the king was an insult which she would not brook.

II. Ahab Taking Possession of Naboth's Vineyard (vv. 7-16).

1. Jezebel's treachery (vv. 7-15). (1) Her contemptuous question (v. She taunted him for his cowardice. The fear of being thought weak moves a weak man quickly. (2) Her exhortation to Ahab (v. 7). "Arise, eat bread, and let thine heart be merry." A wife has great influence over her husband. Many a man has been saved from discouragement and therefore defeat, through his wife's influence. Unfortunately in this case the influence of the wife is bad. (3) Her promise to Ahab (v. 7). "I will give thee the vineyard of Naboth." She took matters into her own hands. If Ahab was too weak to be king, she would rule for him. (4) Her wicked scheme (vv. 8-15). She wrote letters h Ahab's name, sealed them with his seal and sent them to the elders and hobles . who were dwelling in the city with Naboth, asking them to proclaim a fast, as though some great calamity had befallen the nation, and place Naboth before the public as the one who was the cause of it all. They were Instructed to find two false witnesses Who would testify against Naboth. The charge they brought according to the wicked device of Jezebel was blasphemy against God and the king. Naboth's only offense was his refusal to sell his estate, contrary to the law of God. When they had stoned to death Naboth and his sons (II Kings 9:26), they came and told Jezebel, who in turn came to Ahab with the information and directed him to take possession of the vineyard.

2. Ahab goes to Jezreel to take possession of Naboth's vineyard (v. 16). Ahab had not killed Naboth, but he eagerly accepted the prize without inquiring as to how it was secured.

III. Elijah in Naboth's Vineyard Announcing Doom Upon Ahab (vv. 17-

Doom upon Ahab (vv. 17-22). Elijah told him the dogs should lick his blood in the place where they licked the blood of Naboth. Evil was to fall upon Ahab and his posterity, even wipe out his seed and name. He vas guilty of conspiracy, murder, robery, perjury, blasphemy, though he had been silent and inactive. God held him responsible for Jezebel's acts, tor he was king and head of the nation. The day of reckoning did come

to Ahab (I Kings 22:38). 2. Doom upon Jezebel (vv. 23-26). She likewise should be eaten by dogs by the wall of Jezreel. This was literally fulfilled (II Kings 9:33-37). Be sure your sin will find you out." IV. Ahab's Repentance (vv. 27-29).

Because of this, God promised to Withhold judgment during his life-

Death of Abraham.

And these are the days of the years Abraham's life which he lived, an hundred threescore and fifteen years. Then Abraham gave up the ghost, and thed in a good old age, an old man, and full of years; and was gathered to his people.—Genesis 25:7-8.

The Murmuring Congregation. And the Lord spoke unto Moses and ato Aaron, saying, How long shall bear with this evil congregation, which murmur against me?—Numbers

— THE — **CHRISTIAN ENDEAVOR**

--- From --Moody Bible Institute Monthly Chicago, Ill.

January 29 What the World Owes to Foreign Missions Matthew 28:16-20

The debt of the world to the Christian missionary is beyond all estimate. Through all the Christian centuries, he has been the chief channel through which the cleansing and energizing power of heaven has come to earth. Physically, morally, spiritually, so-cially, nationally and internationally, the world is debtor to the Christian missionary. The true conception of God as He is revealed in Christ, the noblest type of manhood and womanhood, and the best that there is in our civilzation is traceable to him. As far as he has been true to Christ, grace and truth has found its best human expression through the mission-The darkness of false religious and idolatrous systems have been overcome by the power of God working through His missionaries, and the truth which sets free has taken its

Not only is the world indebted to the missionary for its spiritual well being, but also for the contribution that he has made to the world's knowledge. Dr. James S. Dennis in his Christian Missions and Social Progress presents many facts and illustrations concerning this: "Turn to the oriental shelves in our libraries nearly all of the brightest and deepest and most valuable books there, have been written by missionaries. To missionary pens we are indebted for the most reliable information we have regarding the far East as well as for the most fascinating, poetical, scholarly, and correct pictures of oriental life that we have." A missionary critic writes, "The great service which missionaries have render-5. Jezebel's inquiry (vv. 5, 6). Ap- ed to the cause of knowledge can never be forgotten. It is to their labors that we owe what we know of the Chinese history, language and literature. Missionaries compiled the only dictionaries as yet in common use. A missionary translated the classics into English, laying the whole world under perpetual obligation."

Not only by noble and unselfish living, by the preaching of the gospel and by contributing to world knowledge, but in the work of translating the word of life into the languages and dialects of earth, the missionary has placed the world in an attitude of obligation and indebtedness to him. Behind the missionaries' life and laborers ,there is the power of the living Christ.

Tennis in Olden Times. Tennis, the forerunner of the lawn game of today, is a very old game. It was introduced into England about the Fourteenth century. A line was chalked on a wall and a stroke below this was regarded a fault. Palm tennis originated in France. The ball was driven by the palm of the hand; at first the hand was bare, but later the players used a glove, and later still some form of racquet was used. In the time of Edward IV, Henry VII and Henry VIII a crude form of tennis was played in England, and it is on record that Queen Elizabeth was pleased at a game played by ten of the Earl of Hertford's servants. Another story tells how a noble earl, becoming heated by the exertions of the game, wiped his face with the queen's handkerchief, and was rewarded with a crack on the head with her majesty's

Talking Through Your Hat. Try this amusing experiment of hearing the phonograph with both your ears stopped up.

Sharpen to a fine point one end of thin piece of wood about three inches long. Hold the wood between your teeth, the pointed end touching the record of your phonograph.

Start the machine, then stop your ears tightly with your fingers, and you will be surprised at the clearness with which you can hear the record. Here's another tip. If your phonograph needle breaks and you have no more, insert an ordinary needle through the crown of a felt hat. Place the needle on the revolving record, and it will reproduce sound loud enough

to be heard in a very large room.

WHY DO THEY LIKE THIS MAN?

It is Because He Has the Life and Energy that Red Blood Gives.

He has a good color. He is strong and virile, and looks it. He is good humored. He laughs easily. In short, he is "full of life," which is simply another way of saying he is full of red blood. If you are weak and run-down and nervous, don't sleep very well and have a poor appetite go to your druggist and buy a few bottles of Gude's Pepto-Mangan and take it for a few weeks at mealtime. See how it will build you up by giving you plenty of good blood. Don't drag around half sick and half well. Get some "pep" into you by taking Pepto-Mangan. Sold in both liquid and tablet form.

Some Aspects of the Farmers' Problems

By BERNARD M. BARUCH

(Reprinted from Atlantic Monthly)

To take a tolerant and sympathetic view of the farmers' strivings for better things is not to give a blanket endorsement to any specific plan, and still less to applaud the vagaries of some of their leaders and groups. Neither should we, on the other hand, allow the froth of bitter agitation, false economics, and mistaken radicalism to conceal the facts of the farmers' disadvantages, and the practicability of eliminating them by well-considered measures. It may be that the farmers will not show the business sagacity and develop the wise leader-

ship to earry through sound plans; but

hat possibility does not justify the

obstruction of their upward efforts. We, as city people, see in high and speculatively manipulated prices. spoilage, waste, scarcity, the results of defective distribution of farm products. Should it not occur to us that we have a common interest with the farmer in his attempts to attain a degree of efficiency in distribution corresponding to his efficiency in production? Do not the recent fluctuations in the May wheat option, apparently unrelated to normal interaction of supply and demand, offer a timely proof of the need of some such stabilizing agency as the grain growers have in contemplation?

It is contended that, if their proposed organizations be perfected and operated, the farmers will have in their hands an instrument that will be capable of dangerous abuse. We are told that it will be possible to pervert it to arbitrary and oppressive priceflxing from its legitimate use of ordering and stabilizing the flow of farm products to the market, to the mutual benefit of producer and consumer. I have no apprehensions on this point.

In the first place, a loose organization, such as any union of farmers must be at best, cannot be so arbitrarily and promptly controlled as a great corporation. The one is a lumbering democracy and the other an agile autocracy. In the second place, with all possible power of organization, the farmers cannot succeed to any great extent, or for any considerable length of time, in fixing prices. The great law of supply and demand works in various and surprising ways, to the undoing of the best laid plans that attempt to foil it. In the third place, their power will avail the farmers nothing if it be abused. In our time and country power is of value to its possessor only so long as it is not abused. It is fair to say that I have seen no signs in responsible quarters cultural business organization. Agri-There seems, on the contrary, to be a and abundant flow of farm products respond to the farmers' difficulties, to the consumer and ensure reasonable which they must realize are their own. and dependable returns to the pro-

to the national well-being of a prosperous and contented agricultural population, we should be prepared to go a long way in assisting the farmers to get an equitable share of the wealth they produce, through the inauguration of reforms that will procure a continuous and increasing stream of farm products. They are far from getting a fair share now. Considering his capital and the long hours of labor put in by the average farmer and his narily enjoy but a fifth to a quarter of dung pile in the court." the net annual national gain. Notwith- Heresy of heresies! men do live. the farmers had during the war, there way, and the average of recoveries is is today a lower standard of living said to be creditably high. Before we mong the cotton farmers of the South than in any other pursuit in the country.

In conclusion, it seems to me that the farmers are chiefly striving for a genera'ly beneficial integration of their business, of the same kind and character that other business enjoys. If it should be found on examination that the attainment of this end requires methods different from those which other activities have followed for the same purpose should we not sympathetically consider the plea for the right to co-operate, if only from our own enlightened self interest, in obtaining an abundant and steady flow of farm products?

In examining the agricultural situa tion with a view to its improvement, we shall be most helpful if we maintain a detached and judicial viewpoint, remembering that existing wrongs may be chiefly an accident of unsymmetri-cal economic growth instead of a creation of malevolent design and conspiracy. We Americans are prone, as Prohind every difficult and undesirable economic situation." I can positively assert from my contact with men of large affairs, including bankers, that, as a whole, they are endeavoring to fulfill as they see them the obligations that go with their power. Preoccupied with the grave problems and he tasks of their own immediate affairs, they have not turned their thoughtful personal attention or their construcfive abilities to the deficiencies of agriof a disposition to dictate prices. culture, it may be said, suffers from their preoccupation and neglect rather commonly beneficial purpose to realize than from any purposeful exploitation a stability that will give an orderly by them. They ought now to begin to On the other hand, my contacts with

the farmers have filled me with respect In view of the supreme importance for them-for their sanity, their pa-

tience, their balance. Wit, the last year, and particularly at a meeting called by the Kansas State Board of Agriculture and at another called by the Committee of Seventeen, I have met many of the leaders of the new farm movement, and I testify in all sincerity that they are endeavoring to deal with their problems, not as promoters of a narrow class interest, not as exploiters of the hapless consumer, not as merciless monopolists, but as honest ment bent on the improvement of the common weal,

We can and must meet such men and such a cause half way. Their husiness is our business-the nation's

MARVELS OF LUGE SURGERY

Traveler Writes of Really Remarkable Results Ach evad by Operators With Crude Instruments.

Wilbur Daniel Steele writes in Harper's of certain Algerian hillmen who practice surgery. "It is said that some of them are fakirs, as pure as family, he is remunerated less than you will find in any Christian land and any other occupational class, with the that some are surgeons of an ability possible exception of teachers, reli- almost beyond the credence of an age gious and lay. We are destined to sit at table with an old man who wields a knife with a right arm that the French doctors at Ain Touta once condemned to immediate amputation-or else, they said, he would die. Being a Mohammedan, and so constrained by his faith from bodily dismemberment, he told them he would rather die at home in the hills. In the hills a man, who can neither read nor write the odd scraps of his materia medica jotted down in a worn threecent notebook, took him in hand. He removed the upper half of the upper arm bone, shattered by shotgun fire, borrowed part of the femur of a jackal dog, slaughtered for the purpose, fitted the whole thing neatly together (all fessor David Friday well says in his this while the patient looked on with admirable book, "Profits, Wages and a degree of interest to be imagined), Prices," to seek a "criminal intent be- and gave the old man back as sound a limb as one will find in the hills.

> Ancient Form of Adornment. Tartooing, that very apparent means of proclaiming one's love for the bring deep, is an ancient form of adornment, and in ancient times most hon-orable. The Polynesians are known to have been adepts in the art, and from that time to this there have always been people who have been attracted to this form of beauty. These decorations have taken all sorts of forms, from the plain black and white work to that in the most variegated colorings, to say nothing of the method of "gash" tattooing, which consists of cutting deep gashes in the desired design, filling them with clay and then letting them remain as a sort of cameo on the flesh.-Detroit News.

Home Town

ALL BENEFITED BY ZONING

Minnesota Newspaper Points Out the Advantages of Farsseing and Comprehensive Plans.

The prosperity of a city depends much on how it is built. It is always an advantage to a city to draw to it those well able to support themselves, because they become supporters of the city and pay their share of the taxes. The amount of taxes that newcomers can provide is enormous. By paying attention to the proper points in city building, the city establishes the very thing that brings this population without cost to itself.

Cities grow by natural means sometimes. A water power may develop a large city, but the city itself may be built in a clumsy way and without beauty. One factor in city building is arrangement. This is why zone laws are proposed so that a home builder of any class may feel sure that his surroundings will not be spoiled by the invasion of unsightly things that are wholly unneces-

The best good of a city should prevail over the more selfish desire of some property owner to make money regardless of his neighbor. There is just as much chance to make money under the zoning law, however, as there is without it, and even a greater

VALUE OF PROPER PLANNING

Fundamental Business Idea in Looking to the Future Development of the Community.

Town and city planning do not find their value in developing the esthetic side alone, but also apply the sound business fundamentals of maintenance and improvement to the community. declared B. Loring Young, speaker of the Massachusetts house of representatives, in an address at the eighth annual conference of the Massachusetts Federation of Planning Boards. By directing proper provision of water supply, sewage disposal, housing facilitles, adequate municipal buildings and local forest reserve, he said, they work to the enhancement of citizenship in its relation to the community, the state and the nation.

As an opening to the conference, citizens of Winchester acted as hosts to the members of the foderation on a motor trip of inspection of the many developments of the town which make it pre-eminent among communities where town planning has been carefully and intelligently applied. The first evidences of this were a large playground and park, a redirected stream and an attractive bridge, which have replaced unsightly tanneries and tenements and permit an unrestricted view of the community center.

Home Ownership Best.

Aside from the security which the home owner enjoys, the possession of his own home should be the ambition of every man. Naturally the first step is the most difficult, for the purchase of a home means a cash payment that is usually well beyond the \$1,000 mark. Once that hurdle is taken, however, the other payments are easy, for they should not exceed, at the outside, \$75 a month on the kind of a home the average man can afford. When the current business depression, with its deplorable unemployment situation, goes by the boards I believe many more Americans will see the wisdom of owning their own homes and thus increasing the percentage of our people who are free from the clutches of the landlord.-Washington Post,

To Hurry the Zoning.

The Chicago zoning act should be put into effect as quickly as possible. Many a beautiful residence neighborhood has been ruined by the steady encroachment of factories, coal yards and the like and the sooner the city is zoned the sooner this stupendous loss will be eliminated. It would also be a positive assurance to a man building or buying a home that his property will not loose value through the introduction of low-class improvements and will also tend to stabilize realestate loans as well as reduce fire hazards .- E. C. Roos in Chicago Daily

Daily Short Story. Willoughby Wampus, the sunshine editor, reached his desk prepared to scatter large gobs of sunshine. Then he reached for his plug to-

It was missing. He was gloomy the rest of the day.

bacco.

Refused to Vote Bonds. Bradford, Pa., voted against bonding the city for a municipally owned electric plant. A vigorous campaign was waged. In the election municipal ownership was defeated by a vote of

Swiss Have Joint Dairies. Switzerland has many co-operative cattle associations, besides joint stock dairies in every village.

Good Man, Good Citizen. By far the greatest thing a man can do for his city is to be a good man.

"My Telephone Is My Only Salesman'

HE above statement was made by a Washington business man who two years ago was doing a gross business of \$300.00 per month. Today he is doing over 1200 per cent. more business per month than at that time.

All of his business is not done in Washington. He sells large orders to customers in cities in several of the surrounding states—by telephone.

If the telephone can be so successfully used by this man, it will certainly do as much for you.

Consider the speed, certainty and satisfaction in a telephone call. And the rates are reasonable.

The pages in the front of your telephone directory will give complete information about the different classes of calls.

Ask the operator for rates to any point.

The Chesapeake & Potomac Telephone (A) Company

TANEYTOWN LOCALS

Brief Items of Local News of Special lunch room, in Fairfield. Interest to Our Home Readers.

Miss Helen Terry, of York Pa., is spending several days with J. A. Thomson and wife.

Mrs. Chas. A. Martin and son, John, of Philadelphia, spent the week with Mr. and Mrs. N. B. Hagan.

Mrs. Claude Biddinger and daughters, Evelyn and Mabel, spent several days at the home of Mr. and Mrs. James Shorb.

George W. Lemmon has been awarded the contract for carrying the mail between the Postoffice and railroad station, beginning February 1.

By mistake, the public sale by Geo. H. Taylor, on Jan. 31, was inserted in our sale register last week among the March sales. The date of advertisement of sale in full, was right-Jan.

There was general complaint, this week, that coal was poor and did not give much heat. We expect the weather was more to blame than the coal, but we felt more like "blaming" it on the latter.

The Dorcus Sewing Circle of the U. B. Church of this place, held their first meeting on the evening of Jan. 26, at the home of Mrs. Chas. Hahn, with great success.

(For the Record.) Jennings Frock and sister, Miss Lulu, of near Taneytown, spent Tuesday with their sister, Mrs. Russell Reinaman, of Trevanion. Howard then he saw the pumpkins. "Hello Baker and Samuel Reinaman also Baker and Samuel Reinaman also didn't know you grew any pumpkins were callers at the same place in the down here in Pokeberry Plains this

Senft, both students of the Lankenan school, at Philadelphia, were weekend guests of Miss Senft's parents, Mr. and Mrs. John Senft, of Shady Side.

The Gettysburg Star says "Gettysburg needs 100 houses." Taneytysburg needs 100 kouses." Taneytysburg needs

tysburg needs 100 houses." Taney-town does not need 100, but needs a Edward variety; and took first prize great many more than it has. If this at the Poketown Fair. Extra, you need is not filled, some day we will need is not filled, some day we will not have tenants for the houses we have. Turning away applicants, can the advertisement in the local paper, be carried too far.

a banquet held in York, on Tuesday night by the Columbian Council. William Thomson, of York, who is mell known in Taneftown, sang several fine solos for the occasion.

Wm. E. Shaw, formerly of this sec- you didn't advertise tion, who has for many years been an kins are all right for the season; but engineer on the W. M. R. R., was in-jured in a wreck caused by a carload they'll rot long before Spring, but I of lumber that became uncoupled from a train, on Jack's mountain, allow they're mighty good while they do last. Now, Mr. Squash, do you know I have the New Zealand Iron-Monday morning, and crashed into bark, Double-ribbed, Ohaeawai pump-Shaw's engine. He had a badly in- kins, the finest in the market. Why, jured leg and sprained back. An account of the wreck appears elsewhere to get the bark off one, but believe in this issue.

Mass., formerly a well known resident of Taneytown has been elected Worshipful Master of Delta Lodge, A. F. & A. M., and on his installation was presented with a handsome black ebony, gold mounted gavel. He has been in the employ of the N. Y., N. H. & H. Railroad at Braintree, since 1895, and is well known there and here as a bass soloist.

Federalsburg, Md., has been having a lively time over the street tree question. The authorities cut down a lot of trees, on the claim of interference with street improvements, and the property owners raised a strong protest. The aid of the State Board of Forrestry was invoked, and the authorities have promised to replace the old trees with young ones, and shrubbery along the walks.

The little story from J. Thomas Wilhide published on the first page of this issue, is a simply stated lesson to farmers on the value of the advertising of their products. Mr. Wilhide pays a tribute to the value of the "local paper" that is not over-stated. and his use of the humble pumpkin, for the purpose, but leaves to the imagination possible greater results from more valuable products.

(For the Record.) A very enjoyable surprise party was held at the home of Mr. and Mrs. Geo. DeBerry, in honor of their daughter, Luella, at which there were about sixty present. The evening was spent in music and games and about 10:30 P. M., all were invited to the table which was laden with cakes and candies of all kinds. At a late hour all returned to their homes wishing Miss DeBerry many more surprises.

Carroll B. Reindollar, of Fairfield, Pa., has sold his interest in the hardware business to his brother, Robert S., and will open a restaurant and

The motor that runs the pipe organ week, said to be due to windows left open. Until necessary repairs can be had, hand-power must be used.

The barn on the B. F. Kerschner farm, near Emmitsburg, formerly owned by Harry L. Baumgardner, was destroyed by fire, with its contents, except live stock, on Wednesday morning. The fire is reported to have been due to the explosion of a lantern.

(Continued from First Page.) Edward variety you see. Took the first prize at the Poketown Fair for size. My wife says they are the finest pie stuff she ever handled; and she's been making pies right here on this farm for 55 years and 6 months this comin' Spring, off and on; and my word for it, Mr. Squash, she knows a pumpkin when she sees it, and for that matter, so do I."

The wagon was loaded to the full, the price was paid and Mr. Squash was pleased with himself at the thought that Mrs. Squash would be delighted when she saw the load. But, after a little reflection, he wondered what in the world they would do with a whole load of pumpkins. But then he consoled himself with the thought that they were very choice, and won first prize at the Fair, so Mr. Thrift said, so he felt satisfied with his purchase and went on his way humming "The tune the old cow died on."

Now, how strangely things do happen when you are not looking for them. Just as Mr. Squash was turn ing in at his gate, along came Farmer Skinum in his gig. As soon as he saw Mr. Squash he shouted, "How are you Mr. Spuash? How is Mrs. Squash? How are all the little Squashes? How's business?" And and-what-have-you-got-there? Why I

"And neither did we," said Mr. Miss Katherine Blum, of Jackson- Squash. I've just been up to your next ville, Fla., and Miss Annie Starner neighbor, Mr. Thrift, on Huckleberry

the advertisement in the local paper, so Mrs. Squash hurried me down and I got a load."

"W-e-l-l, y-e-s, they are a mighty fine pumpkin, I'll allow," said Mr. Skinum: "but mine are just as good, and a little bit better for they took the double-blue-ribbon, first prize, over neighbor Thrift's pumpkins five years in succession, at the Poketown years in succession, at the Poketown Fair, don't you know?"

"W-e-l-l, n-no," said Mr. Squash, "you see I didn't go to the Fair; I didn't see the pumpkins; and I didn't know you had the pumpkins ,because

"W-e-l-l Mr. Squash, them pumpit takes two men and a good-sized boy half an hour with a saw and axe me, Mr. Squash, when you get there you've got some pumpkin; but Mrs. Chas. A. Kohler, of Braintree, Skinum always cooks hers in the shell. And they will last too; we've had 'em keep 'round till Spring. Mighty handy to have 'round the house, Mr. Squash, specially when you've got a lot of hungry mouths to feed, these hard times. And do you know Mr. Squash, I would have sold you two loads for the price you paid

The truth was, everybody knew Mr. Skinum; that he had prize pumpkins, and had them for sale-except the man who wanted to buy-because he didn't advertise in the local paper.

A Wedding Anniversary.

(For The Record.)
The 20th, wedding anniversary was celebrated at the home of Mr. and Mrs. Ernest T. Smith, by surprise, Saturday, Jan. 21. A very enjoyable time was spent among the many guests, at which time all kinds of games, music, etc., were played. Later all were invited to partake of

the refreshments of many kinds. Those present were: Mr. and Mrs. Ernest Smith, Mr. and Mrs. William | near Trevanion. T. Smith, Mr. and Mrs. Clarence Hawk and children, Glenn, Earl and Kenneth, Mr. and Mrs. Preston Smith and daughters, Velma and Grace; Mr. and Mrs. Maurice Baker and children, Wilmer, Ralph, Mildred, Lloyd, and Mr. and Mrs. John H. Harner and daughter, Thelma.

Worth Considering.

The question is not so much how you contract a cold, but how to get rid of it with the least loss of time and inconvenience. If you will consider the experience of others under similar circumstances, who have been most successful inchecking their colds in their beginning, you will secure a bottle of Chamberlain's Cough Remedy without delay, and use it faithfully. There are many families who have used this preparation successfully for years and hold it in high esteem. It is excellent.
