NO. 1

## PRESIDENT HARDING VISITS GETTYSBURG

### The Marines Capture Seminary Ridge on July 4th.

The President and party had a very uncomfortable time at Gettysburg, last Saturday and Sunday, due to the heat and the heavy electrical storms. The President weathered the experience, however, and left early Sunday, by auto, for Marion, Ohio, going west via Chambersburg and Cumberland, and spent the night at Uniontown, Pa.

The President was comparatively comfortable, considering the plight of the marines in their dog tents, some of which were completely flooded with water, making them untenable on Sunday morning, ankle deep in mud. General Pershing, accompanied by Major General John A. Lejeune, Major General Wendell C. Neville and Brigadier General Butler, inspected the troops after reveille. An hour later as the hot morning sun drew the moisture from the ground and added a heavy humidity to the heat discomfort the entire encampment assembled for divine service.

On the military crest of Seminary Ridge Lieutenant Colonel Chaplain Edwin B. Niver, of the Marine Corps, conducted the service. The sermon was preached by the Right Rev. Jas. H. Darlington, Episcopal Bishop of Harrisburg, and Senator George Wharton Pepper read the lesson. Hatless in company with the rugged veterans of the Marine salient, President Harding stood with Colonel Theodore Roosevelt, Assistant Secretary of the Navy; Senator Medill McCormick, Representative Thomas D. Butler, General Pershing and a dozen others of his official retinue. The ladies were seated at the upper end of the slope. There was no shade from the sun's pitiless rays, and the service for the participants in consequence was something of an ordeal.

Immediately after the service the President and his party left on board their automobiles, for Marion, O. Sham battles, which very few of the spectators understood, were held on Monday and Tuesday. On Monday, the Marines charged as Pickett's men had done, valorously as fifty years ago, but met with the same fate. On Tuesday, the battle was fought as it would be fought today, and the attackers won. Only those familiar with the war game, understood, but the demonstration was impressive, nevertheless.

A very realistic demonstration was given in the destruction of a balloon by an airplane that set it on fire with a machine gun. As the balloon burst into flames, a parachute, presumably containing the balloon's occupants, descended to the ground—a skilful arrangement of electric wires and "dummies."

It is estimated that fully 25,000 visitors saw the sight, and many of these will have adventure and stories to tell for many a day.

The Marines' camp broke up on Wednesday with preparations for the homeward march on Thursday, and Thurmont was reached Thursday evening, via Emmitsburg. Notwithstanding the rainy time, the camp was regarded as a success and the officers are making arrangements in contemplation for next year's tour of duty. Last year the Wilderness was used by the marines for their maneuvers and Manassas is spoken of as the likely place of 1923. Scores of places throughout the country have asked for the camp next year, but it is the idea to have scenes of historical interest used regularly because of their peculiar adaptability for movements of troops and the lessons of patriotism that they teach. These features have been outstanding at Camp Harding, and Gen. Smedley D. Butler, the commandant, today expressed his pleasure over the results accomplished.

Not only have the men profited, but the maneuvers have been a great patriotic influence throughout the country, and there already has been a marked result in the recruiting service, it is said. It will be the effort to enlarge the marine enrollment to the full 20,000. It now is about a thousand short of this mark.

### Rural Carriers Meeting.

On Saturday evening, July 8, next, the Rural Letter Carriers of Carroll, Baltimore, and Frederick counties, will hold their annual meeting and banquet at the Firemen's building, Westminster. All Postmasters, City carriers and P. O. Clerks are most cordially invited to attend. Program as follows:

Business Meeting of Rural Carriers at 6:30 P. M.; Banquet at 7:30 P. M., served by the ladies of Krieger's Lutheran Church. Open meeting following banquet. Speakers will be W. H. R. Woodrow, Esq., Baltimore city carrier, Harry T. Purdum, Esq., Examiner of Stations, Baltimore Postoffice. The price per plate for banquet will be \$1.00. The ladies have promised us a "bang up meal," come be with us, we assure you a good time.

Maryland will receive \$427,086, for roads from the Federal Treasury in the fiscal year beginning July 1. The sum must be matched by the State, and the money expended in accordance with rules that are in force.

### SUNDAY SCHOOL TRAINING.

Program of Interdenominational Meetings of Workers.

The following program will be rendered at Mt. Lake Park, Md., July 10 to 17, 1922, and repeated at Ocean City, July 20-27, with the exception that Rev. Henry H. Wailes, D. D., will give the Bible Study Course. The enrollment fee is \$2.00.

8:30-8:45. Devotional.  
8:50-9:30. Life of Christ, Rev. U. S. Wright  
9:35-10:35. Primary Work, Miss Maggie S. Wilson.

Organization and Administration.  
Church School, Abner B. Brown.  
10:20-11:00. Psychology, Professor Arthur E. Bennett.

11:05-11:45. Pedagogy, Professor Arthur E. Bennett.  
11:50-12:30. Junior Work, Miss Maggie S. Wilson.

Young People's Work, Col. Jos. H. Cudlipp.  
Adult Work, Rev. Maurice R. Hamm.

Baltimore students may leave Monday, July 10 at 3:20 P. M. B. & O., arrive Mountain Lake Park, at 10. Round trip fare \$13.84.

Wednesday, July 19, 2:10 P. M. via Ocean City 8:11. Round trip fare \$7.50.

### Letter from W. M. Simpson, Iowa.

The editor of The Record has received a letter from Winfield M. Simpson, of Panora, Iowa, who left the vicinity of McKinstry's Mills, this county, for Iowa, about 50 years ago. He writes of personal reminiscences of the old days, and makes inquiries as to a number of former acquaintances, among them, James D. Haines of this district, and of Warren M. Brower, who recently died. He says:

"I sometimes think I am Rip Van Winkle when I think of Western Iowa 44 years ago, and as it is now. There is a charm that lingers around me that I can not, and would not forget of the pioneer and frontier days. There is something in the whoop of the Indians, the howl of the wolf, the bark of the coyote, the flutter and whir of the millions of prairie chickens, the cackle of acres of wild geese and ducks and a grandeur in the prairie fire and a lovely beauty in the tall waving prairie grass, and in the spring time the prairies covered with flowers—but all are gone now."

He also asks that his best regards be extended to Miss Sidney Brower, and to tell her of his remembrance of many pleasant times spent together at Uncle Dennis Clemson's. Most of the persons inquired about have gone to their long homes. Mrs. Matilda Wagner, formerly Hamburg, of Uniontown, went to Iowa at the same time, and is still living at Penna.

### The Union Bridge Bank Case.

Edw. F. Olmstead, the defaulting cashier of the Union Bridge National Bank, had a hearing before Judge Rose, in Baltimore, last Friday, and was convicted on several counts, and sentenced to four and a half years in the Federal prison, at Atlanta, Georgia.

His gross shortage has been stated as \$168,367.92, and according to a statement in the Union Bridge Pilot, last week, the various assets, assessments, and a contribution from the directors, reduces the shortage to about \$30,000, which would be covered by an assessment of about 11 percent on the depositors, which seems to be the best way to wind up affairs.

The probability is that this will be done, and that the bank will continue in business, beginning very largely at the bottom to place the bank on a healthy basis for the future. In case this plan is not adopted, the directors would withdraw their contribution of \$28,000 and a receivership would result, with greater loss to the depositors than the 11 percent.

### Taneytown Citizens in Auto Reck.

As J. Albert Angell was taking his daughter, Miss Laura, and Miss Mildred Boston to Summer School, at Towson, on Wednesday in his Ford car, accompanied by N. A. Reindollar, their car was sidwiped from the rear by a car driven by a Mr. Kaiser, of near Sykesville, and overturned. The accident occurred just this side of Reisterstown.

Mr. Angell was driving moderately, fully on the right side of the road. The Kaiser car was going at a much more rapid gait, and with plenty of room to pass safely. All of the occupants of the Angell car say they heard no horn sounded and only knew of the passing car when they found their own struck, and going over.

Mr. Reindollar was thrown entirely out of the car, with great force, falling on his head, while the other three were entirely covered by the overturned car. Mr. Reindollar was considerably cut about the head and face and otherwise injured. Mr. Angell was hurt in the back, while the ladies received only minor injuries, and were taken to Towson.

The top of the car was completely wrecked. The injured were given medical attention, and returned home on the bus in the evening. Mr. Kaiser agreed to pay all damages, and likely the case will rest with that. This is only another of the many cases in which one never knows whether he is safe on the road, or not, no matter how careful he may be in driving.

Damage by fire amounting to \$3,500,000 to B. & O. R. R. property, on the Baltimore water front, demonstrates why railroads must be given opportunity to make plenty of money. Some of the argument against the railroads sounds very small, when items such as this must be faced.

## TWO BIG STRIKES NOW IN OPERATION.

### Both Sides Appear Determined to Fight to a Finish.

The strike situation, so far as the railroad shophmen are concerned, is more or less a tie-up, with indications that the leaders are about to enter into negotiations for a compromise with the Railroad Labor Board. While the strike has not completely stopped work, and while the railroads are gaining substitute workers every day, the walk-out has been very general, on most roads, the Pennsylvania system perhaps suffering the least.

In general, there is an optimistic feeling, based largely on the fact that twelve of the roads have agreed to drop the outside contract system that was the chief cause of the strike. Public sentiment, also, is on the side of the Railroad Labor Board.

The miners' strike is practically on a stand-still, with conferences under way. It is believed that early next week the exact status of the situation will be clearer, one way or the other; especially as the case can not longer be delayed if the country is to have plenty of coal for this winter, and it is believed that the government will take charge of the mines, in case an agreement is not soon made between the two principals.

The strikers have been warned not to interfere with the U. S. mails, and armed guards with orders to shoot, will protect them, and the marines be employed, if necessary. The mails are to be protected, strike or no strike.

Following July 4, there were apparently no additions to the strikers ranks, while several roads reported considerable gains and many roads have made formal announcement that the strikers must return to work by next Monday, July 10, or forfeit all rights. Their places, railroad officials said, were gradually being filled by new men.

Although the effect of the decreased repair facilities was felt in the equipment of most of the roads, the larger lines reported service unimpaired.

Reports that considerable numbers of striking shophmen have returned to their tools today and that satisfactory staffs of new men were being hired to replace those still out were issued by officials of several railroads entering the port of New York area.

The Lehigh Valley announced that its absent shophmen will lose their service privileges unless they resume work by midnight tomorrow.

The Lackawanna announced that 100 strikers had come back at the Kingsland shops.

Most of the 80 per cent. of Delaware and Hudson shophmen who quit their posts Saturday remain out, but 500 new men have been put in their places, it was said by L. F. Loree, president of the line.

The Erie announced it had hired between 800 and 900 new men of whom about 150 are negroes. None of the Baltimore and Ohio strikers are returning, it was said by one of the officials of that road, who added that 250 new men have been employed in the past 24 hours.

### Weather and Crops.

The week ending Tuesday, July 4, 1922, was warm and very wet. Thunder storms occurred on June 28, 29, July 1, 2 and 3. July 4 was markedly cool, with light rain. Crops were damaged locally, and some fields and roads were badly washed by local, heavy downpours of rain. Lightning also caused local damage; the most severe loss therefrom was the burning, on July 2, of two grain elevators and three piers of the Baltimore & Ohio Railroad, at Locust Point, Baltimore.

The weather of the week was generally favorable for plant growth, but interfered decidedly with farming operations. The numerous thunderstorms terminated a dry period that lasted two weeks. Growing crops and pastures were benefited and are now in good to excellent condition.

In Allegany and Garrett Counties wheat and rye continue to ripen, and oats are heading; elsewhere over the section wheat and rye have been harvested and oats are beginning to ripen or are ripening. Thrashing of grains has begun in the southern and central counties, with fair to good yields.

Corn is excellent, and averages 2 to 4 feet in height. Early potatoes are being dug in the southern counties, and are maturing to the northward, except in Allegany and Garrett counties, where they are in bloom. Early tomatoes are ripening and the late planted are in bloom or fruiting. Sweet potatoes and tobacco are in good condition and truck and gardens are in good to excellent condition.

### Marriage Lisenses.

Franklin J. Weller and Sarah J. Doring, both of Charlestown, W. Va. Geo. V. Quinn and Martuvia E. Forrest, both of Baltimore.

Harv F. Wright and Dena Dayhoff both of Woodbine.

Charles Ralph Foreman and Edna Allend, both of York.

Richard F. Branner and Mary C. Morris, both of Sykesville.

Russell L. Nusbaum and Mildred R. Otto, both of Union Bridge.

### THE ANTI-FRANCE MOVEMENT.

Special Committee Will Assemble in Baltimore, Next Week.

Considerable comment has been afloat, this week, both for and against the action taken by the Republican conference at Braddock Heights, last week. As yet, the special committee provided for, has not been announced, consequently the name of a candidate agreed upon has not yet materialized. The belief is that the movement itself is likely being taken up with those leaders of the party not participating in the Braddock Heights meeting, with the hope that a united agreement reached, if possible.

Col. Markey says: "The Committee will not only be a representative body, but it will also be representative of the communities in which these men live. All are in sympathy with the movement, and I am confident they will select a candidate who will appeal to every loyal Republican."

It is understood that several women interested in the success of the party have consented to serve on the committee. While the organization as such will not be represented, a number of the participants have always taken an active part in Republican politics.

Local members of the party management are not France shouters will be heard from immediately after the candidate to be chosen has qualified. Following the lead of men like Charles W. Main, Albert A. Moreland and other influential Republicans, these are expected to come out flatfooted against the nomination of the senior Senator.

### Of Interest to Subscribers.

There is some criticism made because of the maintenance of the \$1.50 subscription rate for weekly newspapers. As we have repeatedly stated, the \$1.00 a year rate never paid, even when publication costs were at the lowest, and that present costs of publication still fully require the \$1.50 rate. Let us demonstrate, in the light of figures from our annual statement, June 30, to our stockholders.

We will represent our year's receipts by 100. Of this total, 20 represents subscription receipts, 45 job printing receipts, and 35 advertising receipts. Our subscription receipts, in fact, were slightly under one-fifth of the entire receipts.

This means that even counting subscriptions and advertising receipts together, we have only 55 percent of the total, and with the \$1.00 rate in force, it would have been less than 50 percent of the year's receipts. The fact is, this office could maintain a job printing plant, alone, at a profit, more nearly than it could a newspaper plant alone; and we believe that our experience, backed by figures, is approximately the experience of the other offices in this country.

### Dangerous German Electric Irons.

A shipment of 180,000 German electric irons was recently received in New York. These irons retail at \$1.00 but are not accompanied by stands. This introduces an additional hazard, although it is the irons themselves that present the chief danger. They are flimsily constructed, and since their period of service is extremely brief, they are expensive at any price. The flexible cord attached to them is of sub-standard No. 32 gauge, whereas No. 18 is prescribed by underwriters as a minimum requirement. Furthermore, the insulation is inferior and will not stand much usage. The plug is of a wooden type long ago discarded in the United States.

An engineer who tested four of these irons found that not a single one lasted long enough to undergo the complete tests which it was planned to carry out, the heating element breaking down in from three to thirty-five minutes. In the interior of the iron, the mica insulation was in small pieces and insufficient to prevent contact with some part of the appliance.

In two of the irons, short circuits immediately occurred, due to the poor assembly. Such construction is sure to result in the blowing of fuses on the circuit employed. Also, owing to the scant insulation, there is considerable likelihood of shock when the irons are employed in the neighborhood of plumbing fixtures.

Potential fire hazards—arising indeed, not from poor construction, but from careless or ignorant use—already exist in abundance with the best of American-made irons. There is no room in this country for irons which are inherently dangerous, even when properly employed.—National Underwriters Association.

### Proceedings of the Orphans' Court.

Wednesday, July 5, 1922.—Uriah Bixler, executor of Elizabeth Petry, deceased, reported sale of personal property, and settled his first and final account.

The last will and testament of Mary E. Stoner, was duly probated and letters testamentary thereon were granted unto Sarah E. Zile and Edna L. Price, who received warrant to appraise and order to notify creditors.

Thursday, July 6, 1922.—Mary M. Royer and Nevin Royer, executors of Jehu Royer, deceased, returned inventory of personal property and received order to sell personal property and real estate.

## RIGHT TO WORK IS UPHELD BY PRESIDENT

### Says Laws Must Be Upheld and Menaces Suppressed.

The address of President Harding, at his old home in Marion, Ohio, on the 4th, was full of pointed expressions relating to the serious questions of the day.

Governments, the President said, speaking with great earnestness, cannot tolerate class or group domination. It will be a sorry day for the American people, he predicted, when such domination is reflected in national law.

"A free American has the right to labor without any other's leave," the President asserted, referring directly to the recent murder of more than a score of workers in the mine fields of Southern Illinois. "It would be no less an abridgement of right to deny men to bargain collectively. The Government cannot tolerate any class or group domination by force. Government, and the laws which it is charged with enforcing, must be for all the people, ever aiming at the common good."

The President's words gave added significance to statements of General Pershing, who spoke just before the President.

"When whole communities," said General Pershing, "openly sympathize with ruthless murder of inoffensive people in the exercise of their right to earn a living and where wholesale murder goes unpunished, it is imperative that public opinion should demand the strong arm of the law, under fearless officials, take positive action."

The President also had other warnings for his hearers, in one of which on the subject of prohibition, he differed from his Secretary of War, Mr. Weeks.

"The Eighteenth Amendment," said the President, "denies to a minority a fancied sense of personal liberty, but the amendment is the will of America and must be sustained by the Government and public opinion, else contempt of the law will undermine our very foundation."

The efforts of certain individuals and groups, which have power to influence public opinion, to inflame the people or misrepresent national events, were deplored by the President.

"My one outstanding conviction after sixteen months in the presidency," asserted the President, "is that the greatest traitor of his country is he who appeals to prejudices and inflames passion, when sober judgment and honest speech are so necessary to firmly establish tranquility and security."

"I have no fear about the Republic. We are not only stronger, but we are morally better than when we began. If there is seeming excess of exploitation, profiteering, dishonesty and betrayal, it only is because we have grown larger, and we know the ills of life and read of them more than the good that is done. I do not wonder that the ignorant and ill-informed are made restless by the magnified stories of public abuses and proclaimed privileges. We need the truth, only the truth, the wholesome truth, as the highest aid to Americanization and the manifestation of the higher patriotism. America will go on."

### New Telephone Equipment.

New telephone equipment costing \$673,000 will be built in Maryland this summer. The Board of Directors of the C. & P. Telephone Company having just authorized that expenditure. Of the total to be spent, \$110,000 is to replace plant damaged by storms last winter, \$75,000 of this being Western Maryland where the sleet storm of January 11th, destroyed lines from Frederick to Middletown and vicinity, and the balance to be spent on the Eastern Shore where the storm of February 15 loaded the overhead lines with ice. More than a thousand poles are to be replaced.

Between Frederick and Middletown, an overhead cable has practically been completed, insuring protection from interruption during future storms.

For ordinary telephone growth for the summer, \$420,000 will be spent. This will provide plant facilities for the 1500 new telephones expected in the state by October. Baltimore will have two-thirds of these.

Rapid development in the city of Baltimore makes it necessary to provide additional facilities in the Home-wood and Calvert Central offices. On Harford Avenue from Henry Run to Glenmore Avenue, underground cable will replace the present overhead wires.

### Why Wait Thirty Years?

An exchange says, "There is a shoe dealer in a central New York town who has built a profitable and sound business, to quote him 'without one line of advertising.' He has seen his business grow in thirty years, and he does not use the local newspapers."

Just so. If a man works hard through personal solicitation, does a square business, is fortunate enough to have easy competition, and is willing to wait "thirty years," he can build up a business without advertising. But, why wait the "thirty" when advertising will bring the arrival in much less time?

### WHAT ARE ROTARIANS?

The activities of Rotary Clubs Fully Explained.

Mr. A. B. Blanchard, son-in-law of the late Col. Jos. A. Goulden, who is a regular summer visitor at the Goulden home, near Taneytown, is an ardent Rotarian. The North Side News, Bronx, N. Y., has the following to say with reference to Mr. Blanchard and the Rotary movement, which will be of interest to our readers.

Alexis B. Blanchard, Rotarian delegate from Los Angeles where he was attending the five day convention of the Rotary International. There were 26 nations represented at this year's convention which is becoming so important that President Harding found it worthy of comment. In a letter sent to Crawford C. McCulough, president of the Rotary Convention, Harding said "Rotary having become an institution of decidedly international character, its annual convention assumes an increasing importance each year. Please convey to the gathering assurance of my earnest interest and hope for continuance of useful efforts."

Blanchard was very much pleased with the reception accorded to him and claimed that much good was accomplished for the benefit of Rotarians and their communities by the convention. Among the many resolutions passed was one which would prohibit Rotary Clubs from calling upon other Rotary Clubs for financial assistance on projects which they have endorsed and underwritten. Also to amend the plan for computing attendance among Rotary Clubs; to develop interest in work in Rotary Clubs in behalf of crippled children and many others.

"I consider Rotary to be unique," Mr. Blanchard said in interview, "because of the fact that it has never gone into a single community save at the invitation of that community and that there never has been a club which was granted a charter that has forfeited it. Rotary is also unique," he continued, "in that it is the only organization in the community which has no inactive membership. It has a record of an average of 85 percent of its 1,200 clubs for the last year. At the present time 200 Rotary clubs are being formed each year and there are already 1214 clubs in existence."

Blanchard claimed that Rotary seldom takes up any civic movement for the purpose of carrying it on itself. The Rotary plan is to initiate a movement and then turn it over to an existing agency of a new organization for that specific purpose if none exists. In other words, Rotary tries to be of service to other organizations. It does not drop the movement it starts but makes it its business to aid the proper agencies whether they are charitable or civic organizations, in carrying them on to success."

### The Steele Farm Sold.

The Real Estate, Mortgage and Investment Co., has recently sold the farm known as the "Steele Farm" three miles east of Mt. Airy, near Watersville station, in Carroll county, containing 250 acres and improved with a new brick mansion house, tenant house, one of the finest dairy barns in the State, and large bank barn. Included in the transaction is an accredited herd of registered Holstein cattle consisting of thirty head of fine milk cows. The purchaser, Lawson H. Summers, expects to conduct a modern dairy farm. The purchase price is understood to be about \$24,000.—Frederick News.

### Transfers of Real Estate.

Commercial State Bank of Frederick to Laws on H. Summers and wife, \$10 for 250 acres.  
Perry T. Chaney and wife to J. Basil Chaney and wife, \$10 for 5 acres.  
Preston M. Reed and wife to Edw. A. Perry and wife, \$2800 for 5 acres.  
Edward F. Sterner and wife to Sandford R. Ludwig and wife, \$10 for 73 acres.

### Largest Gun in the World.

The largest gun in the world, army officers say, is at the Aberdeen, Md. Proving Grounds. It will be used to guard the New York harbor.

With a range of 30 miles and a weight of 2,400 tons, the gun is said to be more powerful than the "Big Bertha" of the Germans, which bombarded Paris. It is a 16-inch gun and its manufacture has been in progress since the signing of the armistice.

The gun was cast at Watervliet Arsenal, N. Y., while its mount was made at Watertown Arsenal, Mass. Both were shipped to Aberdeen to be assembled and tested. The tests proved successful, it is said.

Work of crating the massive gun for shipment is now going on and it is expected it will be taken to its New York resting place within the next few weeks.—Balt. Sun.

### Maryland State Road Mileage.

In response to our request for information, the State Road Commission informs us that on July 1, Maryland has 1811.27 miles of hard-surfaced state roads; 130.61 miles under construction; and 150 miles for future construction in 1922; or, by the end of this year, a total of over 2000 miles of concrete, macadam and shell roads.

Maryland stands fourth in cantaloupe acreage, as follows: Colorado 16,000 acres; Arkansas 8,610; California 7,380; Maryland 6,310.

# THE CARROLL RECORD

(NON-PARTISAN)  
Published every Friday, at Taneytown, Md., by The Carroll Record Company.  
P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.  
GEO. H. BIRNIE, Pres. JOHN S. BOWER.  
G. A. ARNOLD, V. Pres. D. J. HESSON.  
JAS. BUFFINGTON. P. B. ENGLAR.  
G. WALTER WILT, Secretary.

TERMS—Strictly cash in advance. One year, \$1.50; 6 months, \$1.00; 3 months, 75c; 4 months, 50c; 3 months, 40c; single copies, 5c.  
The label on paper contains date to which the subscription has been paid.  
All subscriptions will be discontinued on expiration, according to Governmental orders.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.  
All advertisements for 2nd, 3rd, 6th, and 7th pages must be in our Office by Tuesday morning each week; otherwise insertion cannot be guaranteed until the following week.

Entered at Taneytown Post-office as Second Class Matter.

FRIDAY, JULY 7, 1922.

All articles on this page are either original or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

## Is Another "Union" Needed?

There is one big "union" in this country—the union of states—that should be sufficient to guarantee "equal rights to all, and special privileges to none," with full freedom in the pursuit of liberty and happiness. This union, however, has become less and less all comprehensive since the early years of its formation, largely because of the operation of organized forces in the pursuit of selfish, rather than general interests.

Just when or where, these organized forces originated, would be difficult to establish. Our political parties—our partisan representatives of political creeds—were first in the field, as it was early recognized that government by party was practically essential, and that it was necessary for the people to create clearly outlined policies, and to advance them by orderly means, that the best popular government might be attained.

After the formation of these parties, self interests soon saw that the control, or direction by influence, of parties, meant influenced legislation, favorable or unfavorable to business interests. On this assumption, capital entered politics, and the result was "trusts," and highly organized corporation influence.

For years, these unions were largely confined to the special interests of railroads, express companies, manufacturers, and to big combinations of capital generally. Unquestionably, these "interests" greatly exceeded their rightful privileges; and labor, as well as the consuming public, paid the cost.

Largely taking their cue from capitalistic efforts and successes labor unions came into existence. At the beginning, they were limited to efforts to secure from capital, a fair return for labor; and "unionizing" in such numbers as to represent political power at the polls, was the natural course—and justifiable.

Now, we have practically a reversal of the situation that prevailed for years. To a large extent, capital, trusts and corporation influence have largely disappeared as political powers. Laws have been passed curbing, if not actually controlling, capitalistic movements; in fact, it is being urged with a great deal of convincing argument that governmental influence has been too highly extended against capital, and that it no longer gets a fair deal.

Labor unions, on the other hand, are now wielding a tremendous power. The original purpose of these unions—the purely protective—appears to have been lost in an aggressive trend, and there seems to be much truth in the frequently expressed belief that unionism is in the game "to win," right or wrong, regardless of any other interests.

Might alone never makes right. As capitalism had gone beyond just bounds, in trusts and monopolies and secret agreements, and needed restraint, it is beginning to appear that the country is being too radically labor-unionized, and that a "labor trust," or monopoly, or agreement, is equally as unjust in its operations as was its predecessor sponsored by capital.

Eventually—if indeed the time is not now here—there must be still another demonstration of unionism if this country is indeed to be the land of the free, governed by the majority, with "equal right to all, and special privileges to none."

The people—the great non-union, unorganized, masses—may be compelled to form their own "union." The servants of the people—members of Congress—whose ears have been so close to the ground for danger signals from organized labor, must be taught that there is a larger crowd to cater to—the vast unorganized citizenry of this country—that regards

all monopolistic movements, whether of capital or labor, as oppressive and unfair.

## The Anti-France Conference.

The Republican Conference at Brad-dock Heights, last week, was unique in the history of partisan politics in this state, in any party.

First of all, it was a protest against the nomination of a candidate misrepresentative of the party. Col. Pearre aptly illustrated this feature in stating that some years ago he found it necessary to withdraw from the Republican party, and enter the Progressive party, in order to be consistent and have harmonious relations with his political home. His inference was that it was now up to Senator France to pursue a like course.

Second, it was more than mere announcement of preference between candidates. Ordinarily, parties hold conventions, or primaries, vote for several candidates, yet accept the one chosen by the majority as the candidate of the party. This feeling was largely absent, many if not most, of those participating had decided not to vote, at the general election, for Senator France, even if nominated as a Republican.

Third, it was a notice serving that individual independence, as Senator, does not extend to a more or less general disregard of party policies. In other words, that we have government by parties, rather than by individual units, acting on their own will.

Fourth, the conference was, in fact, a protest against a situation that has occurred under the primary law that could not occur in a convention.

There were other underlying influences actuating members, but these were sufficient to bring about the result—the record-breaking protest—and no effort to minimize the extent of it can be successfully established. The 140 or more persons present were unquestionably supported by many more than enough to make Dr. France's candidacy entirely hopeless, especially considering the very uncertain political outlook in this state; unless, indeed, a so-called Republican candidate might be elected by Democratic, or other party, votes.

It is likely true, too, that those who promoted the conference fully realized the situation that is sure to result if Senator France is not renominated. Defeating him in the primaries does not mean the sure election of the nominee of the party. There will be deserters in either case. The greater principle involved, therefore, was rather an effort to choose the lesser evil. That if party defeat must come, it is preferable that it be with a candidate more truly representative of the party than Senator France is adjudged to be; and this is very close to the peak of patriotic citizenship, even if it is not regulation politics, as the game is usually played.

## Personal Liberty.

"You cannot interfere with a man's personal liberty. Any law which does, is bad law," declare persons who do not like some laws on the statute books. But there is no law that does not interfere with personal liberty—that is exactly what they are enacted for. Without laws one could do whatever he might choose, but the law says, "The greatest good to the greatest number demand that you be restricted"—hence personal liberty is interfered with.

Certain persons wish to keep their children from school because they do not believe in education, but the law says, "An ignorant man is dangerous—you must send your children to school." Another neglects his farm—Canada thistles grow wild—the law says, "You must root them out and burn them." Still another permits San Jose scale on his peach trees, the law says, "This must be destroyed or the trees cut out and burned." Another has tuberculosis in his cattle—the law takes them in hand.

Every law restricts personal liberty. Without restriction, liberty becomes license, and our government is based on the wishes and needs of the majority. One man's liberty ends right where his neighbor's begins. He may desire to blow a cornet all night, but he will soon find that his personal liberty will be interfered with. He may wish a pig pen in a residence section, but the law will interfere with his personal liberty again. Liberty is regulated by law, and good citizens will do their utmost to obey every law, whether they like it or not.

## Mob Law is Treason.

The wholesale killings at Herrin, Ill., can be described only as cold-blooded, brutal, fiendish cowardly massacre. Those who attempt to palliate or explain the inhuman crime are lacking in moral sense. The men slaughtered were engaged in an employment that was lawful, however unpopular in the immediate locality. There was even a question as to whether they were violating the laws of the miner's organization. At any rate most of the working men tied together and shot or beaten to death after capture were ignorant of any intended offense.

The anti-lynching law pending in Congress, oppressed by mob sympathizers and constitutional hair splitters, might, if in force, have made the authorities of the county in which these bestial crimes were committed, somewhat more interested in the performance of the duties they were sworn and paid to discharge. A heavy and richly justified monetary penalty would have been imposed upon the locality in which the law has been suspended by a perverted public sentiment under which murder is no crime. The claim is often made that attacks upon lynching are aimed at the South. In all the history of Southern lynchings, partly to be explained by deep rooted racial prejudice, there is no chapter of outlawry so black as that which has just stained the reputation of Illinois and of America as a land of law, order, humanity and justice.

We think sometimes that in this country we are far removed from the possibility of such organized brutality as that which reigns in Russia. Incidents like that at Herrin, Ill., have a tendency to awaken us to the possibilities of a certain kind of education and agitation working upon the minds of ignorant and brutal men. There are organizations and politicians engaged from Washington and elsewhere in sowing the seeds of class hatred, envy and lust for domination which, if they come to their full fruition, will drench the soil of this country with blood, and the Herrin spectacle will become typical of conditions throughout this country. This may seem an alarmist statement but anyone who will take the trouble to look over the inflammatory literature being sent out by the train load from Washington and other propaganda centers will be convinced that it is not a far fetched prediction.

Lawlessness in a republic like ours, where laws are the handiwork of the people acting through their duly chosen representatives, is treason; treason not only to statutory and constitutional law, but to all that America stands for. Those who engage in mob demonstrations, as Abraham Lincoln said, trample upon constitutions which are the hope of humanity for liberty and progress. The man who apologizes for or condones such lawlessness is lacking in loyalty to the fundamental principles of Americanism.

As for public officials who have taken upon themselves the solemn and sacred obligation to protect life and property and liberty under the law, but who abdicate that function in fear of the lawless or in order to count their favor—what words are strong enough to characterize their weakness and shame? A courageous law enforcement official true to the oath of office he has taken, would be willing to die, and a cowardly one would resign, rather than betray his trust. If all those upon whom the people rely for the maintenance of order and the enforcement of law, were to abandon their obligations as completely as did those who abdicated their offices in the Illinois locality which has just been given world-wide odium, this republic would be plunged into the black chaos of wholesale murder and rapine.

It is high time that there should be an awakened sense of duty and responsibility among citizens and officials throughout this country. Lawlessness great and small is increasing. We cannot go much further along the road of disregard of law and contempt of courts and the preaching of class hatred and envy by open or secret enemies of American institutions, without paying a fearful price for our disregard of things fundamental in this republic. The Herrin massacre is an alarm bell ringing in the night. Well it will be if it should arouse the sleeping loyalty of Americans to their priceless heritage of ordered liberty.—National Republican.

## A Splendid Medicine for the Stomach and Liver.

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their qualities," writes Mrs. William Vollmer, Eastwood, N. Y. When bilious, constipated or troubled with indigestion, give them a trial. They will do you good.

## HOW FIRST LOCK WAS MADE

Development of the Key Reveals an Interesting Story of Ages Long Passed Away.

The modern lock is a development of the horizontal bar placed across the inside of the door. This was a good substitute for a lock when one remained inside, and to adjust it so that it would fall into place when the door was closed from the outside was comparatively simple, but to lift the bar from the outside when one wished to enter, was the problem. This was accomplished by fitting a hole into the door post, through which something designed to lift the bar was inserted. This was the first keyhole and the instrument used in lifting the bar was the first key, says the Brooklyn Daily Eagle.

The simplest idea for preventing the bar from sliding was to bore a hole in the top of the bar, which would also penetrate the staple on which it rested, and drop a peg into the hole through the staple. The unlocking problem could be accomplished by any instrument which would lift the peg and permit the bar to slide back. Then if a series of pegs were used, all of which had to be lifted, unlocking would be more difficult. In our modern locks, the pegs have simply been replaced by "tumblers" on which the key acts in the same way. The key originally had wooden pegs fastened to correspond with the pegs holding the bar in place on the inside, and these pins developed into the notches which are on our modern keys. As there were no pockets in those days the other end of the key was made into a ring and worn on the finger. That is why the keys of today usually have a ring at the end—just a relic of the past.

## FIND CHEESE SUBTLE THING

Reason That is Advanced for the Apparent Impossibility of Imitating the Genuine Camembert.

A man interested in agricultural products wanted to make cheese of the type of Camembert, but while he had the same ferment, employed the same methods and used what seemed to be the same kind of milk, neither he nor anyone else in this country obtained the same result.

On visiting France he found that the makers of the cheese in question were very particular about their milk, obtaining it from the dairymen of a certain district only. In the fields of these farmers there grew, he found, a sprinkling of certain grasses that he did not find elsewhere, and it is possible, and even likely, that these make the subtle difference in the milk that shows in the cheese which distinguishes the genuine from the artificial product.

And yet, the special grasses were only incidental; they were not the main grasses of the pasture, which were the same as those found elsewhere.—Ellwood Hendrick in Harper's Magazine.

## Leather His Hobby.

One of the curious American characters of the last century was the "Old Leather Man" who for nearly 30 years tramped over eastern New York and Connecticut clad almost entirely in leather. His home was in a cave near Sing Sing, where he was found dead in 1889. He did occasional jobs of plumbing, and never accepted any recompense but food and tobacco.

He was said to have been made insane by an unfortunate love affair in France when he was a young man. According to the story, he won the heart of the daughter of a wealthy leather merchant and entered into her father's business to prove his worthiness. He speculated in leather and when the market in that commodity crashed, his prospective father-in-law was ruined and his own hopes were shattered. This unhinged his mind, and he determined to spend the rest of his life wandering around the countryside clothed in leather. His name was Jules Bourglay.

## Cost of Stopping Trains.

An ordinary passenger locomotive consumes a pound of fuel for every 52 feet it travels. Each unnecessary stop, made with a heavy freight or passenger train, represents a fuel loss of from 500 to 750 pounds of coal, depending on the weight of the train, the length of the stop and the grade conditions.

A brake-line air leak on a train of 50 freight cars has been known to cause a loss of as much as 2,540 pounds of coal in a ten-hour period.

The loss of coal each time a modern locomotive pops off for five minutes is about seventy-five pounds. If locomotive firemen were to save a little more than one shovelful of coal out of each ten used, the total saving would be equal to nearly 7 per cent of all the coal handled.—World's Work.

## Origin of Siang Term.

Students of slang have found interest in an article in an English magazine on "Black Beetles," because it gives what is perhaps the origin of the use of "cuckoo" as a new synonym for crazy. According to the writer, the word cuckoo comes from the Spanish "cucaracha," which he says probably means a sort of bug, in Spanish "cuco." The word "bug" in a similar, if restricted, sense has become pretty well established in slang use in this country, and perhaps, say students of the subject, finding its way across the Rio Grande, has been exchanged for its Mexican equivalent in the same way that many other Spanish words have entered the American language.—New York Evening Post.

# Hesson's Department Store

## Big Showing of up-to-date Summer Merchandise.

WE HAVE PUT FORTH UNUSUAL EFFORTS IN GETTING OUR LINE OF MERCHANDISE FOR THIS SUMMER, AND WE FEEL THAT IF YOU WILL BUT GIVE US A CALL WE CAN CONVINCED YOU THAT WE HAVE NOT FAILED IN OUR EFFORTS TO MAKE OURS A MOST COMPLETE LINE AND AT RIGHT PRICES.

### Summer Dress Goods.

In our Dress Goods department you will find a complete line of Messaline Silks, Crepe-de-chine, Georgette Crepe, Pongees, white and colored Voiles and Organdies. These all run in splendid widths and are of excellent qualities.

### Linene Suits.

We have a nice assortment of Linene Suits, in all colors that are fast. They are very popular sellers this season, and we would invite you to look these over when in need of something of this kind.

### Ready Made Waists.

A very nice lot of Georgette, Crepe-de-chine and Voile Waists to select from. Just the thing that will look well on you, and save the worry of having one made.

### Men's Dress Shirts.

A very pretty assortment of Pongee, Madras and Percalé Shirts, now on display for the summer trade. These Shirts are well made of best material, good designs and well deserving of your consideration.

### Men's Straw Hats.

A new assortment of Straw Hats in the newest styles of the stiff straw. Also have genuine Panamas of the best quality.

### Ladies' Hose.

We have a large assortment of Silk Hose, in the full fashioned and cheaper grades in all the leading colors, viz: black, white, cordovan, lark and grey. Also a fine lot of lisle thread hose in the best colors.

### Tennis Oxfords.

For tired feet and something cool, we can think of nothing better in the shoe line than a pair of tennis oxfords. For men, women, boys' and girls'. We have them in either brown or white.

### Sewing Machine Needles.

At last we are prepared to take care of the needs of our trade in this line. Just bring us the name of your Sewing Machine, and we can supply you with needles, bobbins or a shuttle to fit it.

### Ladies' Footwear.

We have a very complete line of a standard brand of footwear for Misses' and Ladies', in Patent Leather, which has been taking the lead this season, black kid, cordovan and white canvas, also canvas sport oxfords.

### Summer Underwear.

A complete line of summer Underwear, for Men, Women and Children in the knit or muslin, one or two piece garments.

# A Sick Man Said:

"I wouldn't WORRY so much now, Doctor, if I had only saved more of my money for a time like this."

It often takes a touch of adversity to really open a man's eyes. The only trouble with that is it may then be too late. The time to save is now. The place for the savings is in our reliable bank. Old age, sickness, death, these are as certain as youth, health and strength and in every case a bank account comes in handy.

## "MARRIED TO THE ADRIATIC"

Picturesque Ceremony That Was Held of Great Importance in Old Venetian Days.

A picturesque ceremony performed annually in Venice in the time of the doges was the "Marriage of the Adriatic," a rite symbolizing the dominion of the city over the neighboring sea. It was instituted in 1177 to commemorate a great naval victory by the Venetians over Frederick Barbarossa, it is recorded. Pope Alexander III in this year presented a ring to the doge of that day, and ordered his successors, every Ascension day, to cast a similar ring into the Adriatic, promising that the bride so espoused should be as dutiful as a wife to her husband. The first ceremony was performed on Ascension day of that year.

The doge and his suite, accompanied by many citizens, proceeded to the island of Lido, in the Adriatic. Arriving there the doge first poured holy water into the sea and then, taking the ring from his finger, dropped it into the ocean, saying: "We espouse thee, a sea, in token of our just and perpetual dominion." Solemn high mass was then celebrated, and the ceremonies concluded with a great feast.

## Wife to Accompany Explorer.

J. L. Cope, the explorer, returned to Plymouth, England, a year ahead of schedule; he had discovered extensive, workable mineral deposits and gained valuable knowledge relating to fisheries, including the secret migrating places of whales. After exploring these finds, he plans to go back, taking his wife with him, in which case she will be the first woman to set foot on the Antarctic continent.—Scientific American.

## Different Reasons.

Mother (scrubbing Johnny's ears)—I certainly hate dirt.  
Johnny—I do, too, ma.  
Mother—I'd never believe it! Why?  
Johnny—Cause it makes you wash me.

## Sunday School Problems.

Bert Fowler, sheriff of Grant county, has a daughter who teaches a class of little children in a Marion Sunday school, relates the Indianapolis News. Recently the young woman told the children the Bible story of Noah and the ark, elaborating as much as she could on the description of the flood and the manner in which the animals made their way into the house of refuge.

After she had finished the story she was amused as well as amazed when a little boy asked: "But, teacher, who guided 'em thing?"

## An Absentminded Bridegroom

By H. LOUIS RAYBOLD

© 1922, by McClure Newspaper Syndicate.

"Well, well, congratulations, old man!" and Jerry Green gave Davis a slap on the back which caused him to wince, even as he had an inward doubt of the sincerity of his fellow boarder's felicitations. "When is the happy event to be?"

"Can't say as to that," returned Davis, pleasantly enough. "The sooner the better."

"To be sure, to be sure. Only, mind you, Dave," and Jerry shook a wagging finger under the other's very nose, "don't get one of your absent-minded streaks on and forget there is to be such a thing as a wedding when the joyful day comes. That would be tough on Doris! And count on your fellow boarders, old top. They'll be on hand, every man of them!"

The affable Jerry left Davis at the next corner, and the latter proceeded more slowly, reflecting bitterly that if he and Doris could only skip their wedding day their marriage would begin much more auspiciously. The very thought of going through the solemn ceremony with that bunch of conspirators eyeing him and nudging each other if he fumbled for the ring or Doris hesitated over the promise to obey, oh! he hated it in anticipation.

Doris, he knew, was of the same mind as himself. But ten years' humble subservience to her aggressive aunt had induced in the girl a docile acquiescence in all things. It would never have occurred to her to combat her relative's wishes, even in so personal a matter as her own wedding.

Yet that night Doris, with troubled eyes, poured out her heart to Dave as

he had failed. Yes, Davis felt sure that Ed would initiate and forward any little scheme of devilry to get even.

As they reached the theater Davis threw back his shoulders. "Don't worry, little girl," he whispered tenderly. "Just leave everything to me." But it must be confessed that during the entertainment which followed his thoughts were too deeply centered on the problem to get his money's worth out of the program.

On the night of the wedding an undercurrent of excitement was distinctly evident at the supper table at Mrs. Barker's. The ceremony was scheduled for 7:30, the expressman was to come for the trunks at seven and Doris was to put on her going-away suit in which she was to be married immediately after she had for the last time cleared the long table. In view of the occasion her aunt had thoughtfully excused her from further duty in the kitchen.

Every one was prompt at the meal—that is, every one except Davis. In fact, it was well along toward the end of the meat pie course when the telephone behind Jerry Green rang noisily. Jerry jumped to answer. Then he hung up the receiver, dumbled up in laughter, slapped his thigh and all but choked. "That bird Davis will be the death of me! He's clean gone and forgotten it's his wedding day. Says to expect him in about an hour or so, to take Doris here to the movies. He's eating at a quick lunch so's to stop at the library!"

There was utter silence. Then to a man the boarders laughed, only sobering slightly when they saw Doris, face bowed in her hands, rise and leave the room. Behind her fingers hid a tremulous smile.

Thus it was that, while the crowd waited for Dave and Mrs. Barker attended to the expressman, Doris slipped out and met her bridegroom at the corner. A few minutes later, in a quiet little parsonage uptown, a perfectly satisfied couple said "I do" and "I will" before only four spectators—the minister, his wife, his daughter and the parsonage cat.

### FIRST STEPS IN PHOTOGRAPHY

Frenchman Named Niepce Produced Permanent Picture About One Hundred Years Ago.

About a hundred years ago the first permanent photographs were secured on a compound of sensitive bitumen of Judea by a Frenchman named Niepce. As early as 1802 a process by which records could be made by the action of light was discovered by a certain Tom Wedgwood, but no method of fixing the print was then known, and it was not until Niepce came along with his process that this was made possible. In 1829 Niepce entered into partnership with Daguerre, another Frenchman, whose name is remembered in daguerreotypes, the earliest photographic records that remain at the present day. A monument was erected in France, near Chalons, upon which an inscription names the year of 1822 as that in which Niepce "Discovered photography."

### Wireless.

Eastern radio clubs protest against a government ruling which prohibits them from broadcasting music, concerts or news. These are allowed to be sent only by "designated stations."

Some wireless amateurs charge this is the first step by corporate interests to obtain a monopoly of the air.

Such monopoly, by natural processes, will be attempted later. For the present, the ruling is wise. It aims to confine "sending" to experts, to prevent the cluttering incident to two messages being received at the same time.

Primary function of wireless still is saving life at sea. Wireless "lines" must be kept open.—Chicago Post.

### For Amateur Photographers.

Amateur photographers have been aided by the introduction of sensitized paper in both roll-spool and cut-sheet form of all the important sizes, which will fit any camera without using special attachments. This paper is used in the same manner as are the celluloid film or dry plates, and the picture is printed directly on the paper when the shutter is operated, says Popular Mechanics Magazine. After the exposures are made, the rolls or sheets can be developed in approximately ten minutes and dried in a very short time also, as the solutions and water used do not penetrate deeply into the paper.

### This Oil Camp Pretty.

Perhaps the last place in the world which one would expect to be "pretty" is a Mexican oil camp, but a United States fuel oil company recently made the boast that it has the prettiest oil camp in the Tampico district, disregarding the rule of modern fiction that such spots should be hard-boiled. This nonconformist camp, at Salvassuchi, lies in a bend of the Panuco river, in the midst of orange groves. There are lawns and gardens around its houses, a good swimming pool, carefully tended water gardens and hedges of such flowers as delight the honey-bee.—New York Evening Post.

### New Name; Old Song.

Customer (in music seller's)—I want a copy of "The Stolen Rope."  
Assistant—I am afraid I don't know of such a song.  
Customer—Why, it goes "Tum-tum-tumpty-tum."  
Assistant—Oh, you mean "The Lost Chord."  
Customer—Ah, that's it!—London Telegraph.

## Moline Plow Company Reorganizes

(Reprinted from "The Eastern Dealer.")

Under date of May 11, 1922, the Moline Plow Company, of Moline, Ill., issued the following statement of their reorganization.

"Announcement of the completion of reorganization of the Moline Plow Company was made here today. New plans for the company and its subsidiaries, chief of which will be the Stephens Motor Car Company, were ratified.

"The new company was launched with \$16,000,000 of current assets and with all current indebtedness cleared from its books, except accrued and current expenses and \$70,000 of current accounts.

"The most striking feature of the reorganization is the conversion of \$25,000,000 of indebtedness into \$12,500,000 of twenty-year debentures and \$12,500,000 of old first preferred stock—\$7,500,000 of old first preferred stock was converted into \$7,500,000 of new second preferred stock.

"The financial house cleaning was done with unusual thoroughness. "The assets are net after writing inventories and plants to rock bottom, and ample provision for liquidating all unprofitable departments and obsolete and slow-moving inventories, for possible losses on receivables, and for any reasonable contingency of further readjustments of the business or declines in value.

"A vigorous policy of readjustment and conduct of the business was presented by the management and ratified by the directors, the most significant feature of which is the plan of the president to modernize and improve the system of implement sales and distribution. This promises lower prices on implements to the farmer.

"The officers elected are: First National Bank of Chicago, chairman of the Board; George N. Peek, president; H. S. Johnson, executive vice-president; R. W. Lea, vice-president and manager of the Stephens Motor Car Company; F. W. Edlin, vice-president and sales manager; C. B. Rose, vice-president in charge of tractor works; H. B. Dinneen, vice-president in charge of implement manufacturing; L. C. Shonts, secretary; L. C. Blanding, assistant secretary; F. J. Hoenigman and John Hammerich, assistant treasurers. The following were elected directors: F. O. Wetmore, G. N. Peek, H. S. Johnson, John E. Blunt, Jr., Merchants Loan and Trust Company, Chicago; C. P. Coffin, Illinois Steel Company, Chicago; Herman Waldeck, Continental and Commercial National Bank Chicago; S. A. Mitchell, Mercantile Trust Company, St. Louis, Mo.; C. T. Jaffy, First National Bank, Minneapolis, Minn.; Rumsey W. Scott, Chemical National Bank, New York City; J. Herndon Smith, St. Louis, Mo.; F. F. Winans, National City Company, Chicago; Henry R. John-

ston, Chatham and Phoenix National Bank, New York City; R. I. Barr, Chase National Bank, New York City; Horace Fortescue, Philadelphia National Bank, Philadelphia; H. H. Cleveland, Rock Island, Ill.

"The plan adopted seems the surest means of safeguarding all interests. It has re-established the company in a strong financial position, with ample capital, reserves for all contingencies, and no current indebtedness. The good will of the business is great, as is indicated by the unanimity of all concerned in reaching an agreement. A great improvement and simplification of the line has taken place during the last year. The company's house is in order to take full advantage of the improvement in the implement and automobile business, which seems inevitable.

"The Stephens Motor Car Company is placed in an equally sound position. The investment in plant and equipment is unusually low, and the assured standing of the company will now give ample assurance to everyone interested in the Stephens automobile. The company has taken over the poppet valve motor business of the R. and V. Engineering Company, and will manufacture an automobile engine as well as an engine for tractors and trucks, for sale to other manufacturers.

"George N. Peek, president, has great faith in the future of the company.

"The new company is dedicated to a policy on improvement in implement distribution," said Mr. Peek. "Implement sales to farmers have been on a system suited to frontier development before good roads, the parcel post, the automobile. We have had too many small dealers at cross roads, and not enough strong distributors in natural trade centers—too much factory canvassing, small shipments and too long terms. Too large a part of the price of the implement to the farmer represented the cost of getting it to him.

"Our new plan means larger volume and territory per dealer, more carload factory shipments, shorter terms, less factory sales effort, and as a consequence, larger discounts for farmer and dealer. It cuts out the wastes of distribution. It means more prosperous dealers and less cost in getting implements from factory to farm. It will make local financing more attractive than financing by the company. It will leave more of the profit of sales in the community where it is achieved. It will pull business by attractive discounts rather than push people into buying by weight of sales force.

"Farmers and dealers alike have been demanding these changes for a good many years and it gratifies me greatly to head this old and respected company.

## HOW

SIMPLE SIGNS FORETELL THE WEATHER AT HAND.

—The following on this subject is given by an old "weather man": A gray, lowering sunset, or one where the sky is green or yellowish green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates a storm. A corona growing smaller indicates rain; growing larger, fair weather. A morning rainbow is regarded as a sign of rain; an evening rainbow is fair weather. A deep blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm. Fogs indicate settled weather. A morning fog usually breaks away before noon. Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain. The first frost and the last frost are usually preceded by temperature very much above normal.

## NO "MYSTERY" IN LIGHTS

How Element of the Supernatural Has Been Taken Out of Happenings in North Carolina.

Application of science and common sense have lifted out of the supernatural the "strange lights" on Brown mountain which for some years have agitated residents of Burke and adjacent counties in North Carolina. It was announced by the United States geological survey.

G. R. Mansfield, geologist, detailed to study the phenomena at the request of Senators Simmons and Overman, has concluded that the lights are common "evening night" lights given unusual red and yellow tints by air currents. Mr. Mansfield reached his conclusions with aid of a surveyor's telescope, a good watch, a topographic map, a train register and cold mathematics. He found the lights originated in the country miles beyond the mountain and played their weird game only at the whim of favorable natural conditions. Automobile, locomotive, building or street lights and brush fires played their part.

## Why English Motorists Rejoice.

"Police Constable Beck of the metropolitan police force has made his last professional appearance in court."

This announcement in the London Daily Telegraph will convey little to the American motorists, observes the Living Age. He will not cut even the sedatest of capers over it, neither will he throw his cap in the air, nor buy so much as an extra set of tires on the strength of the news. How different in England! There the news is greeted in much the same spirit as that which Lenin might suddenly receive tidings that Lloyd George was going out of business. For the fame of Police Constable Beck extends far and wide through Surrey, where "it is estimated that since 1903 he has caused something like 100,000 motorists to be summoned to the Kingston court"—an average of well over ten a day for twenty years, week in and week out.

## How to Dry Fruit.

Experiments in the "dehydration" of pears has been engaging the attention of the Oregon agricultural experiment station. Development of a satisfactory process has been attended with some difficulties, chief among them being that of preserving the natural color of the fruit, but it is believed that the problem has been solved.

Best for the purpose seem to be Bartlett pears. When peeled, cut in halves and deprived of their cores, what remains is about 96 per cent water. Thus, as a result of drying, the product is greatly concentrated. In this form it can be utilized as a basis for very delicious confections, various flavors being added to the material.—Philadelphia Ledger.

## How to Furnish a Corner.

There is nothing more difficult in furnishing a large room or a hallway than the selection of the proper piece of furniture to fit a corner attractively. A little console table with a right-angle back affords an interesting and clever solution of this problem, and is equally appropriate for the hall or the drawing room. It may be of carved wood, or stained or enameled, or of wrought iron, or of wood finished with gold, or of metal, so that this particular bit of furniture may be made to fit in delightfully with any variety of furnishings or fittings.

## Why Japs Are Poor Aviators.

The Japanese are the greatest masters of human equilibrium in the world. Watching them balance lightly on slack wires or stand on their hands on slender poles, one would assume that aviation has few terrors for them. As a matter of fact, however, their peculiar sense of equilibrium does not seem to aid them in the flying airplanes. An experienced instructor who has drilled many Allied aviators says the Japanese make the least satisfactory aviators in the world, Eskimos excepted.

## Why He Was Blue.

Bacon—You're looking down in the mouth, old man.  
Egbert—Well, I'll say I feel pretty blue.

Bacon—You look as if you had lost all your friends.  
Egbert—Well, to tell you the truth, I've borrowed money from everybody I know.—Yonkers Statesman.

## WHY

Fumigation Now Rarely Is Used as a Disinfectant

The value of routine fumigation of rooms as a means of preventing the spread of infectious diseases has been questioned of late years, says the Journal of the American Medical Association. The experience of the health authorities at Providence, R. I., extending over many years, indicates that the abandonment of room disinfection is not followed by any noticeable increase in the number of secondary cases.

In New York and in several other cities terminal disinfection has been omitted since 1913 in cases of scarlet fever and in several other diseases.

It is now the general belief that the germs of acute infection of the respiratory tract do not survive very long outside the body. The trend of the recent investigation has been to show that the main danger of infection is by direct transmission from convalescents, mild cases and healthy carriers. Better results are likely to be obtained in preventing the spread of most infectious diseases by giving attention to the human sources of infection rather than by resorting to frequent fumigation with a germicidal gas.

## IS NOT WANTED IN AMERICA

Why the Mongoose Has Been Barred Out as a Distinctly "Undesirable Alien."

The mongoose is an "undesirable alien." The other day the steamer Dromore Castle docked after a 28-day voyage from Cape Town. She resembled a modern ark, as her cargo was animals entirely. Along with the lions, leopards, koodoo antelopes, wart hogs, night apes, gnus, bush babies, snakes and birds, were 18 mongooses and these were promptly turned back though Kipling made the mongoose a hero. The mongoose is a killer. It will tackle anything and is referred to as the "lion's provider," because, having sucked the blood from an animal, it leaves the carcass for the king of beasts. In the tropics, it is a friend of man, because it cleans out rats and snakes. It did that for Uncle Sam in Porto Rico. But having rid the locality of pests, the mongoose turns to domestic animals and fowls, for it must eat. Hence, in 1910, congress passed a law which bars it from the United States. The mongoose will tackle and kill a cobra. But it will also eat a fat hen. So the 18 are on their way back to Africa.

## Why Brain Can't Be Overworked.

Don't be afraid of overworking the brain; you can't do it. You can't think too much, observes a London Answers writer.

"The more the mind does," says a prominent medical authority, "the more it can do."

Another well known doctor said recently:

"In all my practice as a physician dealing with nervousness and mental diseases, I can say without hesitation that I have not met a single case of nervous or mental trouble caused by too much thinking or overstudy. What produces mental trouble is worry, emotional excitement or lack of interest in one's work."

So there is no need to be afraid. The more you think, study or plan, the better it is for you, because you are training your mental powers. You cannot overwork the brain as long as you keep it healthy with outdoor exercise whenever possible. Then it will recuperate of its own account. It is worry that destroys the brain—worry, fear, bad feelings and mental idleness.

## How Ice Is Giving Up Dead.

The glaciers and snow fields of Switzerland melted so much during the long, hot summer of 1921 that many long-lost bodies were found. One was that of a guide lost 18 years ago; another a Swiss school teacher who disappeared in 1914, and in as much as the winter just past has been mild, it seems that many more bodies will be recovered this summer. It is hoped that the remains of Lord Frederick Douglas, killed during Whymper's ascent of the Matterhorn in 1865, may be found. Ice surpresses embalming, and if we could get to the bottom of the Arctic ice we might learn what men were like 50,000 years ago.—Indianapolis News.

## How a Fish Flies.

Some highly interesting observations on flying-fishes have been made by Dr. E. H. Hankin, in the Arabian sea. In still weather the length of a glide was about a meter, with considerable lateral instability; in a light wind this was increased to from 200 to 400 meters. A resemblance between the wing action of soaring vultures and the fin action of the fishes was marked. In both, the wing or fin is inclined upward, the outer part at a higher level than the base, in slow-speed flights, while both show a downward inclination in flight at high speed.

## How Instinct Rules Mankind.

Dr. Bernhard Hart, lecturing at the Royal Society of Arts in London recently, brought out the point that man, as well as animals, is largely guided by instinct, reason and intelligence being merely guides or weapons in the hands of instinctive forces. The sex instinct, he said, was one of the most powerful in the human mind and unquestionably responsible for much of our behavior. The herd instinct was the mainspring of conventional

## How Human Blood Stains Are Known.

Human blood stains may be differentiated by a serologic test from the blood of all animals with the exception of the anthropoid apes.

UNIONTOWN.

Mr. and Mrs. George Slonaker visited in Baltimore, the past week. The funeral of Miss Maria Angel, of Waynesboro, was held in the Lutheran Church, last Saturday morning.

George Selby and Mrs. Melvin Routsen, are on the sick list. Rev. Sheridan preached in the interest of church extension, in the M. P. Church, Sunday morning and evening.

Fourth of July visitors were John Harbaugh, wife and son, of Baltimore, at J. C. Hollenberry's; Miss Elsie Singer, at John Newcomer's; Mr. and Mrs. Howard Hiteshaw and daughter, Catherine, at Snader Devilbiss; Mr. and Mrs. Michael Bentz, of Finksburg, at B. L. Cookson's; Mrs. Dunsing, with her daughter, Miss Lena Dunsing; Mr. and Mrs. John F. Beaver and sons, Harrisburg, at U. G. Heltbride's; Ralph Cummings and sister, Miss Annie, of Baltimore, at Rev. Earl Cummings; Walter Page and family, at Charles Waltz's; Mrs. J. E. Lowe, Sr., Mr. and Mrs. George A. Leister, Mr. and Mrs. Chas. Miksel, Mr. and Mrs. Frank Lowe and daughter, Miss Margaret, at Rev. J. E. Lowe's; Mr. and Mrs. Clarence Billmyer, of Baltimore, Mr. and Mrs. Sherman Caltrider, of Greenmount, at Mrs. Elizabeth Billmyer's.

Dorothy Segafosse is visiting her uncle, Robert Davidson's family near Upperco.

Mrs. U. G. Heltbride returned on Saturday from her visit to Lancaster, and Harrisburg.

Rev. John Hoch, of Lisbon, Pa., will preach in the Church of God, Sunday morning and evening, and at Wakefield in the afternoon.

LINWOOD.

Miss Katherine Bowersox, of New Windsor, is visiting Miss Dolly Reese. Mrs. Elmer Barnes and son, Billy, spent the "Fourth" with Edna Barnes and family, of New Windsor.

Mrs. Margaret Englar, of New Windsor, Mr. and Mrs. C. H. Englar, of Baltimore, visited Mrs. Clara Englar, over the Fourth.

Mrs. Joseph Langdon and son, Jas., of New Windsor, spent Wednesday with her mother, Mrs. Laura Etzler. John Buffington and David Englar, of Baltimore, were Sunday guests of R. Lee Myers.

Miss Ruth Englar spent the weekend with friends in Westminster. Russell Fleagle and wife, of Uniontown, spent Tuesday with Jesse Smith and wife, and attended the ball game at Union Bridge.

Those failing to hear Dr. Baner's lecture, last Friday evening, on "America's Vision," missed a rare treat.

Rev. and Mrs. C. R. Koozts, of Garbertown, were entertained, on Sunday, by Samuel Brandenburg and family.

HAMPSTEAD.

The golden harvest is on and the clicking of the reapers heard all along the line.

The remains of James Ferrier, who died at his home south of town, near the summit of Merringer Hill, at the age of 72 years, 1 month, 11 days, were laid to rest in the Lutheran cemetery, followed by services in the church. He is survived by his widow and five children.

Mrs. Runamos and sons, of Charleston, South Carolina, are here at the home of Mrs. Runamos' mother, Mrs. J. Bixler.

Drs. Denner and H. M. Keller have fallen in line and are having their homes nicely painted.

Saturday morning an airplane, which sailed over the field where Mr. Irvin Summers was cutting wheat, frightened the horses and caused them to run away with the binder which was demolished.

UNION BRIDGE.

Mrs. Hoke, of York, Pa., is visiting her daughter, Mrs. Weaver. July 4th was a home-coming day, and many familiar faces were seen in this section.

Mrs. M. Reese is at her home again, and rapidly regaining her health. The M. E. parsonage is entertaining the pastor's parents.

BRIDGEPORT.

Walter Stull, wife and family, of McKeesport, Pa., were visitors of D. Allen Stull and family, this week. Miss Mary Loney has returned to her home in Baltimore, after visiting friends in this place.

The following were guests of Harry Baker, wife and family, this week: Rev. E. R. Baner and wife, of Hampstead; Calvin Flohr, wife and son, John, of Catonsville, and Mrs. J. L. Cornell, of Baltimore.

Those who spent Wednesday evening at the home of Emory Ohler, wife and family were: Edward Hobbs, wife and two daughters, of Thurmont; John Ohler and wife, of Emmitsburg.

What might have been a serious accident, occurred on the state road here Sunday evening when a large Baltimore-bound car collided with a car coming out the old Frederick road to the state road. Both cars were somewhat damaged and the Baltimore car ran over the embankment. Fortunately, none of the occupants of either car were seriously hurt, while Messrs. Bryan Byers, Edgar Grimes and Clarence Eyer, of Emmitsburg, the occupants of the Ford, were all thrown out and two badly cut by the glass of the windshield. Both cars were removed to a garage that night.

Clarence Naill and wife, of Harney, visited his sister, Mrs. Jones Baker, on Sunday.

Allen Bollinger, who was operated on for appendicitis, at the Frederick City hospital, last week, is getting along very well.

Preaching services at Tom's Creek Church, this Sunday evening, at 7:30.

HARNEY.

Communion services were held at St. Paul's Lutheran Church, on last Sunday.

Samuel Harner recently sold his property, in this place, to Benj. Marshall, of Baltimore, for \$2800. While it is a desirable home, we believe it was a fair price and Uncle Sam can be well pleased.

Miss Nellie Null, of Baltimore, spent several days visiting her grandfather, over the Fourth.

Mrs. Emma Shriner, of Keymar, spent several days at her home in this place.

Amos Snyder, who has been confined to the house for some time, is able to get out and around again.

Ruel Hess, of Cumberland, spent several days the beginning of the week visiting friends in this community, and at the same time taking in the encampment at Gettysburg.

We have had a very wet spell of weather which has put the grain in bad shape; but we believe, with a little patience, everything will come out all right.

There will be no preaching services at St. Paul's Lutheran Church, for the next three weeks, on account of Rev. Young being absent on his vacation.

KEYMAR.

David Newman, of Smithburg, who is spending some time at the home of his sister, Mrs. W. F. Cover, attended the funeral of his brother-in-law, Mr. Egalston, at the Soldier's home, near Washington.

Mrs. R. W. Galt is spending some time with her cousin, Miss Ella Gilliland, in Gettysburg.

J. C. Field and wife, of York, visited at the home of the latter's parents, near this place.

L. O. Hape and wife, of Washington, were visitors in this place, last week.

Miss Frances Sappington, of Hagerstown, is visiting her grand-mother, Mrs. Fannie Sappington.

Mrs. Chas. Gardner, of Blue Ridge Summit, Pa., is spending some time with relatives here.

Mrs. Murray Wisner, of Baltimore, is visiting at S. E. Haugh's.

Miss Dorothy Haugh gave a birthday party to 25 of her young friends on July 2.

Quite a number from this place visited Gettysburg on Sunday.

DETOUR.

Mrs. Johanna Hollenbaugh entertained the following on the 4th: E. J. Luby, wife and four daughters, Estie, Harriet, Marion and Margaret, of Baltimore; Albert Salter, wife and family, of Pikesville; and Miss Ella Ledley, of Baltimore.

Among those who visited the Marine encampment at Gettysburg this week were: F. J. Shorb and daughter, Mrs. P. D. Koons, Jr., Mrs. R. R. Diller, Mrs. Frances Rinehart, C. W. Cover and family, Mr. and Mrs. E. D. Diller, Jas. Welty and family, Sydney Shry and family, M. J. Wilhide and family and Jesse Coleman.

Webster Harnish, of New York, is spending a week in the home of Mrs. A. V. Diller.

Miss Magdaline Wood, of Baltimore is visiting her aunt, Mrs. Wm. C. Miller.

Miss Margaret Smith, of Baltimore, spent from Sunday until Wednesday with Dr. and Mrs. R. Diller. Miss Thelma Smith, of New Windsor, is spending some time at the same place.

Thos. Zumbrum and sisters, Mildred and Dorothy, of Union Bridge, visited P. D. Koons, Jr., and wife, this week. M. L. Fogle and wife, spent Sunday in Hagerstown.

S. Arthur Myerly and wife, of Philadelphia, spent Sunday with his parents, Jas. Myerly and wife. Messrs. Bernard K. and Carvel Diller, of Washington, spent the weekend with relatives here.

Biliousness and Constipation. "For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been today had I not tried Chamberlain's Tablets. The tablets relieve the ill feeling at once, strengthen the digestive functions, helping the system to do its work naturally," writes Mrs. Rosa Potts, Birmingham, Ala.

Taneytown 8—Frederick 2.

Taneytown won an easy 5-inning game from the Frederick Jr. Fire Dept team, on Saturday afternoon, after a heavy rain delayed the game until 5 o'clock. The visitors made a rather poor showing, especially in the 3rd., when two hits and a bunch of errors allowed the home team to score 5 runs.

Taneytown was minus the services of Bonsack, regular pitcher, whose place was taken by Martin, of Union Bridge; and George Baumgardner, High School payer, substituted for Denver Hitchcock, and Boyd for Groff, in part of the game. The visitors made their only hits in their half of the 5th., and scored two runs that looked like a gift. The score was: Taneytown 1-0-5-2-x=8 Frederick 0-0-0-0-2=2

Taneytown 12—Hanover 4.

Taneytown won from the Hanover Boys' Club, on Tuesday, by the score of 12 to 4. Both teams swatted the opposing pitchers about as in batting practice; the difference being that Taneytown hit the hardest, fielded best, and its errors were less costly. Bonsack was again absent, and Martin, of Union Bridge, took his place. Denver Hitchcock was also out of the game, his place being taken by Small, who made the sensational play of the game in taking a one-hand fly after a hard run in centre.

There were but 5 strike outs in the game, 3 by Martin, and 2 by the second pitcher tried by Hanover. Martin passed 6 on balls; Hanover 3. The generally good fielding of the home team stood in the way of heavier scoring by the visitors. The score was as follows: Taneytown 1-4-0-4-2-0-1-0-x=12 Hanover 2-0-0-0-0-0-1-1-0=4

Western Maryland College.

The attention of our readers is directed to the advertisement of Western Maryland College appearing in this issue. This college is located at Westminster, Md., and begins its fifty-sixth year Sept. 18, 1922. It has made a record for thoroughness and excellence not surpassed by any in the state. Its beautiful location in the high-lands of Maryland, its fine equipment in buildings and grounds, its high-grade faculty, its modern courses of study and its charges kept down to reasonable rates makes it an attractive place to get an education.

The college offers eight courses leading to the degree of B. A. Courses may be elected which prepare for the schools of law, medicine, and engineering. A four-year course in Home Economics leading to the degree of B. A. is offered. In addition to the regular courses offered, there are supplementary courses in music, speech, and education. Completion of the last named course secures a certificate of the State Board of Education. A regular unit of the Reserve Officer's Training Corps is established at the college, the government supplying the Professor of military science and tactics and uniforms and equipment.

A new dormitory, costing \$150,000 will be completed by September 1st, in time for the opening of school. A new athletic field, built at a cost of \$50,000 and considered the best field in the eastern part of the United States, was dedicated in June. We commend this institution to any of our readers who may be considering sending their sons and daughters away to college.

One Dollar Saved Represents Ten Dollars Earned.

The average man does not save to exceed ten percent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he can not be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.

Birthday Surprise Dinner.

(For the Record.) A birthday surprise dinner was held at the home of Mr. and Mrs. Jas. E. Mort, in honor of Mrs. Mort's 67th birthday, and her daughter, Mrs. James E. Grimes' 47th birthday. Dinner was served at 12 P. M. consisting of three large birthday cakes with candles, sandwiches, salads, pickles, chips, fruits, lemonade, watermelon, ice cream and cake. Very useful presents were received.

Those present were James E. Mort and wife, James E. Grimes and wife, Bernard Bentz and wife, Roy Mort and wife, Charley Hefestay and wife, Robert Grimes and wife, Raymond Baumgardner and wife, Ruth, Marion and Brooke Bentz, Maude Mort, Francis Baumgardner.

In Sad but Loving Remembrance of our dear Mother and Grandmother, MRS. SUSAN E. MILLER, who departed this life 5 years ago, July 10, 1917.

In the graveyard softly sleeping, Where the flowers gently wave, Lie the ones we loved so dearly, In her lone and silent grave.

Mother, thou wilt never be forgotten, Never will thy memory fade, Sweetest thoughts shall ever linger, Round the grave where thou art laid.

Why should I wish her back again, To this world of sorrow and care? For I hope she is safe with Jesus, And has no sorrow there.

By her daughter, MRS. JACOB STRAWSBURG.

By the beautiful gate she stands and waits, For dear grand-mother, from pain set free, I shall clasp her hands and feel her kiss, When the hinges turn for me.

Think not dear grand-mother that thou art forgotten, For by me you never shall be, For as long as breath and memory lasts, My thoughts will be of thee.

By her Grand-daughter,

MRS. WILLIAM PERAGO.

REPORT OF THE CONDITION

OF THE Detour Bank, at Detour, in the State of Maryland, at the close of business, June 30, 1922.

LOOK! MEN! Here's a Fine Silver-Plated Safety Razor for 49c. Not one man in a hundred can tell the difference between this imported razor and the popular \$5.00 kind—It is made of best materials—gives equally smooth shaves and it uses Gillette Blades. Each razor is heavily silverplated and put up complete in a plush lined, nickel plated case. Every man who shaves himself should take advantage of this chance to buy a dependable safety razor at such a low price. 'Twas Said—A clergyman was in the habit of going up to his little girl's bedside each evening and telling her a story before she went to sleep. One evening he told her such a thrilling tale that the child, sitting up in bed, looked very straight at her father, and asked, skeptically: "Daddy is that a true story, or are you just preaching?" You don't need to be skeptical about what you read in our ads—they are true stories about the goods we have to sell and can be depended upon. That's one of the reasons why this store has succeeded in building a substantial business—we have always been careful not to make any statements that are apt to be misleading or confusing—our constant endeavor is to tell our customers about our goods in plain words that are easy to understand. Our merchandise is of a quality which does not have to depend on deceptive advertising to move it. You can read our ads and buy our goods with confidence. Reindollar Brothers & Co. LEADING HARDWARE DEALERS

HOME MADE ICE CREAM, Cake, Chicken and Ham Sandwiches, Tea, Coffee, Saturday evening.—Mrs. Hitchcock.

Porch Swings | Automatic Refrigerators Save Foods | Porch Rockers

Refrigerators are not bought these days as they used to be, when all we wanted to know was whether an "ice box" was "big enough" to hold all the things we wished to chuck into it.

Today we are modern. We want to know if a refrigerator is or is NOT an "ice-cater"; we want to know if our foods will keep COLD, sweet and wholesome for the entire family; we want to know that we are getting not only the most scientifically-built but the BEST-built, and the MOST-ECONOMICAL refrigerator on the market. Also we want a "good-looking" refrigerator.

**That's why we recommend The Automatic**

We are also Agents for the Famous White Frost, the all-white round Refrigerator. We also handle two lower priced lines—four lines in all—so you can buy just what you want, to suit your purse.

**Furniture of all kinds at a Big Saving**  
**C. O. FUSS & SON**  
 TANEYTOWN, MARYLAND.

**SPECIAL FOR July and August**

I wish to inform the public that premiums will be given to the trade for July and August sale. Coupons will be given for each cash purchase. One Dollars worth coupons gets you an Aluminum teaspoon. Two Dollars worth an Aluminum Tablespoon. Ten Dollars worth an Aluminum mixing spoon or soup ladle. Come and see what I have and get prices. We aim to give all a square deal. Share your trade and I will share my profits. A nice line of Groceries, Notions, Confectionery, Cigars, Tobacco, Flour, Cakes, Crackers, etc., always on hand. Your patronage will be appreciated.

New athletic field, costing \$50,000, ready for the coming season. New dormitory, costing \$150,000, to be completed by September 1st.

**BOARD and TUITION \$400.00.**  
 Prospectus for 1922-23 on application 7-7-10t

**Her Power of Resistance.**  
 "Seen that new movie, Mayme?"  
 "What's it called?"  
 "Tempestuous Love."  
 "Is it good?"  
 "Fair, but th' guy who plays th' lead couldn't str up no tempest in me."

**In Luck.**  
 "He does not love me any more," sobbed the heart-broken young wife.  
 "You are lucky," said the seasoned matron, "if he does not love you any less."

**Her Own Affair.**  
 Muriel—Oh, Mame, why didn't you tell me I had a dab of rouge on the end of my nose?  
 Mame—How do I know where you want to wear your complexion?

**At the Lecture.**  
 I am afraid that my command Of information may seem small; So what I do not understand I oft applaud the most of all!

**Nearly Explicit.**  
 Jones—All right, if you think I can find your house, McManus, it will be delightful to go to see you some time.  
 McManus—Shure, ye can't miss it. It's just in the middle uv that row uv houses that looks all alike, on'y some looks more alike than others.—Answers.

**Unkind.**  
 "Were you at the wedding?"  
 "Yes."  
 "Did you see the present we sent her?"  
 "No. I just had time to glance at a few of the expensive gifts."

**SHERIFF'S SALE.**

By virtue of 3 writs of fieri facias issued out of the Circuit Court for Carroll County, at the suits of The Taneytown Savings Bank, C. Edward Harver entered to the use of The Taneytown Savings Bank, and The Birnie Trust Company, a body corporate, against the goods and chattels, lands and tenements of Charles H. Stonesifer and Carrie G. Stonesifer, his wife, to me directed, I have seized and taken in execution the following real estate of Charles H. Stonesifer and Carrie G. Stonesifer, viz:

First. All those tracts, parts of tracts or parcels of land containing 42 3/4 ACRES OF LAND, improved by large frame dwelling house, bank barn, hog pen, wagon shed, chicken house and other outbuilding, located near the road running from Taneytown to Tanetown, about 1 1/2 miles east of Taneytown in Taneytown District, Carroll County, Maryland, being the same land which was conveyed to Charles H. Stonesifer and wife by William W. Witherow by deed dated March 30, 1920, and recorded among the Land Records of Carroll County in Liber E. O. C. No. 136, folio 4, and now occupied by the said Charles H. Stonesifer.

Second. All the right, title, interest and estate of the said Charles H. Stonesifer in and to all those tracts or parcels of land containing 81 ACRES, 33 RODS 30 SQ. PERCHES, more or less, improved by large brick dwelling house, bank barn, wagon shed, hog pen, chicken houses and other outbuildings, all in good repair, located near Keyville, Carroll County, Maryland, and now occupied by Frank Houck, and being the same land which was conveyed to the said Charles H. Stonesifer for and during his natural life and at his death to the child or children of the said Charles H. Stonesifer, by H. Oliver Stonesifer and wife, by deed dated March 13, 1917, and recorded among the Land Records of Carroll County in Liber E. O. C. No. 132, folio 416, and I hereby give notice that on

**SATURDAY, JULY 22, 1922,** at 2 o'clock P. M., on the "first" herein-before described tract or parcel of land occupied by the said Charles H. Stonesifer, I will offer for sale the aforesaid real estate and property so seized and taken in execution, by public auction to the highest bidder, for cash.

**Increase Your Crops With a New International Manure Spreader**

**THE POPULARITY and fame of the International roller bearing Manure Spreader is due to one thing—and that is sheer merit. The record of this Spreader has shown that it is a highly profitable investment from all points of view. Those features which create its special value are of practical interest to every man on the farm.**

1. Roller Bearings—Roller bearings at 7 points—the only spreader so equipped.
2. Double Ratchet Drive—Walking beam transmission from main axle eccentric and extra large ratchet wheel give easy, strong, steady feed. Box tapered to eliminate friction on both sides. Six feed speeds.
3. Oscillating Front axle—Auto type, permitting short turn. No pole whipping.
4. Power; Both Wheels—Power is transmitted from both ends of the rear axle—beaters and wide-spread driven from one wheel and the manure feed from the other.
5. Wheel Track—Rear wheels track with the front wheels, lightening draft.
6. Tight Bottom—There is no clogging, jamming apron, because the spreader has a tight bottom. Spreads anything.
7. Two Beaters—Two all-steel beaters with chisel-pointed square teeth work from both top and bottom of the load.
8. Wide Spread—The spiral behind the beaters gives the manure a third beating, and spreads it finely and uniformly beyond the wheels.
9. All-Steel Main Frame—Wood box sides hold only the load.

Let us show you the International Manure Spreader and explain its superior features. Call on us at your first opportunity.

## An Easter Egg and a Hat

By FREDERICK HART

© 1922, by McClure Newspaper Syndicate.

In modern buildings the stair-well is constricted to such a narrow space that if one stands on the twentieth or thirtieth floor and looks down one will probably not see more than a lighted slit, with no suggestion of the depth below. Aforetime, however, when people were not so cramped in their buildings—or in their souls—stair-wells were generous.

In the old-fashioned four-story mansion, now a rooming house, where Florence Elridge lived, the stairs wound in a stately fashion around a space a good six feet square, reaching from ground floor to roof. Florence, who lived on the third floor, could peek over the banisters and see the second and first floors go about their business. She rather liked the stair-well; it spoke to her of ample days gone by, of large hospitality and easy-going lives, remote from the rush and roar of modern times.

Florence lived alone in a little room on the third floor, as we have said. On the second floor lived a nice young man. His name was Arthur Hayden, and he worked in an engineer's office and got a perfectly amazing salary. He and Florence had met over the mail table in the lower hall, and had passed by ceremonious degrees from a simple "Good-morning" to "There's a letter for you. Aren't you the lucky one?" or some such polite badinage.

The stair-well remained impassive to any budding romance that might or might not be burgeooning on it. It had seen too many brides in its time to grow excited over two young people of opposite sexes who were getting acquainted in its shadow. It

Arrived at the Same Point at the Same Time.

seemed to say to itself: "If those young folks don't arrive at the point it isn't my fault. They are eminently well suited, and I must say that the young lady is by all means as lovely as any of the brides who have wended their way over me in days gone by; but why should I interfere? I am an aristocratic stair-well, and it's none of my business." Thus did the stair-well commune with itself in the night hours, as stair-wells do, with little confidential creakings and rustlings. Meanwhile Florence and the nice young man continued to call each other "Miss Elridge" and "Mr. Hayden," and to joke politely when they saw each other, or make a remark about the weather, or something like that.

This went on for some months. Winter showed signs of relaxing into spring. The cold was less intense. The streets were slushy. The shops displayed new hats. Everything pointed to the coming of the benign season. And Easter was at hand.

Florence bought herself a new hat in celebration of the annual festival. She also noted with some concern that Mr. Hayden showed no sign of any springlike reaction. He remained as impassive as ever. His calmness before the advent of the goddess Easter irritated Florence subconsciously, and she took to hanging over the stair-well when he went out or came in to see if he had bought himself a bright necktie, for instance, or had a flower in his buttonhole, or showed any of the signs by which the male of the species responds to the call of the spring. The stair-well, wise in its generation, allowed Florence to look without hindrance, and even warned her, by sundry creakings, when the nice Mr. Hayden was coming.

Mr. Hayden, in fact, should have bought a new hat. His winter headpiece was several seasons old and showed it. It wasn't as though he couldn't afford it; he got, as we have already said, a perfectly amazing salary; but he just didn't. Some men are that way. He continued to wear his old felt, that looked like a coal scuttle, Florence thought. She watched him anxiously now. She really took an interest in that hat, and wanted to see whether or not he would get a new one. The stair-well waited, too. It seemed to say to itself: "That young thing is falling in love with that engineer and doesn't know it. She thinks she is interested in his hat. Ha, ha! Wait and see!"

Came the Saturday before Easter. Florence returned at noon. In her arms

was a paper bag and in the bag were six eggs, raw. She was going to boil them that evening and draw little pictures on them and give them, next day, to some young friends of hers. She mounted the stairs—they seemed unusually creaky that day, as though they had something to tell her—and was just turning into her room when she heard footsteps below her and knew that Mr. Hayden was coming in.

"I wonder," thought Florence. "Has he bought a new hat for Easter, or is he still wearing that awful old thing?" She rushed to the banisters and leaned far over to look at the ascending Mr. Hayden.

Eggs are unstable things. They have no corners and slip very easily. Anyway, the string on that paper bag was not very tightly tied. Florence, leaning over the stair-well suddenly saw, with a gasp of horror, something white and oval slide into view under her very eyes and descend in rapidly diminishing perspective. She opened her mouth to scream, when Mr. Hayden stuck his head over the banister, apparently to look at the mail table. The egg and his hat arrived at the same point at the same time.

If the crash had been loud enough to wake seven cities it could not have stunned Florence more. She stared over the railing, unable to cry out held by a horrible fascination at the sight of the wreck that had been made of Mr. Hayden's hat. He, on his part, after recovering from the blow—an egg falling two stories hits hard—took off his hat, held it so it would not drip, and looked to see who had assaulted him. His gaze met Florence's, and for a moment neither spoke. Then some demon of irresponsibility prompted her tongue.

"Happy Easter!" she called. He was up the stairs in, it seemed to her, three steps. He stood confronting her and the omelet that had been his hat dripped sullenly in his hand. "Did you do that?" he asked sternly. "I'm sorry—it slipped—I didn't do it on purpose—but—oh—you do need a new hat!"

He looked at her a moment, and something in her face made his heart beat hard; and something in his eyes made her drop her own while a wave of red suffused her face. "—I—," he began, and stopped. "You—" again a false start. "Suppose you come out and help me pick out a new one," he got out at last. "I'm sure you have much better taste than I have."

They descended the stairs together. The hat had been deposited in her wastepaper basket. Somehow his hand rested on her arm, then slid down till he felt her warm fingers. "Easter's a lovely season," he said irrelevantly. "Isn't it," she sighed. "And I think the custom of giving eggs is splendid," he continued. She hid her face in his sleeve. "Oh, don't. I'm sorry—oh—"

"Yes," said the stair-well critically. "they make a very pretty couple . . . my word! He's kissing her!"

### HAD PASSION FOR LEARNING

Fisherfolk of Scottish Town of Buckie Remarkable for Their Devotion, to Printed Word.

Sixty years ago Buckie was known in Scotland as "the holy town." It was a village of theologians. Even the very children could talk and argue on questions which would have puzzled the average divinity student. St. Andrew's university did not turn out men who knew more about the Bible, its writers and its critics than did those fisherfolk, who spent every spare moment of their lives in the study of abstruse volumes by the greatest students of divinity of all ages.

Great Greek scholars were to be found among those fishermen. They were self-taught. Their passion for knowledge was such that they spent years of the hardest study so that they might read the Bible in the language in which it was written. Often the whole village would club together to buy some book which was specially wanted. They then passed it from hand to hand and ship to ship until the bindings fell apart and the salt water so stained the leaves that the printing was no longer decipherable.

The books were taken to sea and studied after the nets had been lowered. Each ship had its own "library," books being passed from ship to ship, and when an argument arose those sailors could quote authorities, page and verse, in support of their theories.

### New York's "Dry Niagara."

A few miles southeast of Syracuse, N. Y., in a cavity whose bottom is 220 feet below the surface of the adjacent upland lies Jamesville lake, a body of water 500 feet in diameter and about sixty feet in depth. Eastward from the lake extends a gorge through which flows Butternut creek. One authority says that in former times a river flowed here, and that Jamesville lake is the pool that was formed under a great waterfall. Steep cliffs rise around it on three sides, and all the features of a dry Niagara are here disclosed in great detail.—Washington Star.

### Where Japanese Excel.

The Japanese are famed not only for their skill in making decorative articles, but for the beauty of the materials used. It is said that the secret of the composition of some of their alloys of brass and copper has only lately been revealed. The finest Japanese brass, called "shochu," consists of ten parts of copper and five of zinc. Another very beautiful alloy, named "shadko," to which splendid hues are imparted by treatment with acids, is formed by mixing gold and copper, the proportion of gold varying from 1 to 10 per cent of the entire mass.

### MADE BUSINESS OF MURDER

William Burke, Infamous Irishman, Also Instrumental in Adding Significant Verb to Language.

Burke and Hare were two notorious body-snatchers, or resurrectionists, who carried on their infamous trade in Edinburgh. William Burke was born in Ireland in 1792, and went to Scotland as a laborer about 1817. In 1827 he was living in a cheap lodging house kept by another Irish laborer named William Hare. About the end of 1827 one of Hare's lodgers, an army pensioner, died, and Burke and Hare sold the body to Dr. Robert Knox, an Edinburgh anatomist. Hare thereupon suggested body-snatching as a business and Burke agreed. The two men then started in to entice poor travelers to Hare's or some other cheap lodging house. The victims were plied with liquor and then suffocated under mattresses, without marks of violence. Doctor Knox took the bodies and paid up to £14 (\$600) for them. At least 15 people had been murdered in this way before Burke and Hare were arrested. Hare turned king's evidence, and Burke was found guilty and hanged in Edinburgh on January 28, 1829. Hare found Scotland too hot for him and went to England, where he is believed to have died under an assumed name. The verb "to burke," meaning to suffocate, to strangle, to suppress, or to put out of the way secretly, had its origin in Burke's method of doing away with his victims.

### WHERE GREAT EXPLORER LIES

South Georgia Island, Tomb of Shackleton, Lonely Spot in the Great Antarctic Region.

An interesting picture of life in South Georgia island, the "Gateway of the Antarctic," where Shackleton was buried, was given by an explorer who made a research expedition there a few years ago. At that time there was only one woman on the island, and she was the domestic in the household of Capt. C. A. Larsen, a former Antarctic explorer who had settled down as head of a Norwegian whaling station on the island. "Below my solitary tent," the correspondent writes, "the grassy bank sloped sharply to a milk-colored glacial stream entering an inlet of the sea only 50 yards away. A quarter of a mile across the inlet stood the perpendicular front of a beautiful valley glacier, coming down between peaked hills from the lifeless, silent interior. Penguins bobbed out of the sea below the glacier and were my most interesting callers for their curiosity could not resist a human being. Sea elephants crawled unconcernedly up the stream below me and went to sleep among the hummocks on the beach. Above the tent, on the plateau of the little promontory, seven pairs of albatrosses carried on their courtship and nesting, along with giant petrels, skuas, kelp gulls and the pretty little antarctic titlarks, the only land bird of the Far South, whose cheerful song was almost the sole homelike sound."

### Details Needed.

A woman, blessed with a masterful disposition and considerable property, died, leaving behind her a will in which her husband was cut off with a dollar, on the ground that he had deserted her a year before.

The lawyer finally located the man and broke the news gently by telling him that he had received only a small bequest.

"How much?" carelessly asked the man.

"One dollar." With the same carelessness, the man turned toward the door. Just as he reached it, however, a sudden thought struck him.

"Say," he called back anxiously, "Did she specify what I was to do with this dollar?"

### Sarcasm From the Grave.

The will of Alexander Louis Teixeira de Mattos, the English translator of Fabre, Maeterlinck, Couperus, Zola and many other continental writers, contains one bequest that will interest a good many booklovers who have loaned their favorite volumes not wisely but too well—at any rate, too generously, says the Living Age. The estate of Mr. de Mattos was not large, its gross value amounting to less than £3,000 (\$15,000), and many of his bequests take the form of books. He leaves books to many of his friends. One volume in particular is left to a certain friend and is described as one "which he borrowed many years ago and has not returned."

### Increased Tractor Power.

A new attachment designed to give the small tractor greater bearing area and increased pulling power, replaces the round wheels with two large sprockets, according to an illustrated article in Popular Mechanics Magazine. Outside of each sprocket is a cast-steel arm which projects forward and downward, carrying at its front end a smaller idler wheel. A track tread passes around the sprocket and idler wheel, giving the tractor increased bearing area.

### Lightest of Liquids.

Many experiments here and abroad have shown that liquid hydrogen is by far the lightest of all known liquids. Its density is one-fourteenth that of water, and, curiously enough, this happens to be the same ratio of density that hydrogen in the gaseous state bears to air. For long the lightest liquid known was liquid marsh gas, which possesses about two-fifths of the density of water.—Washington Star.

### POSSIBLY SLIM WAS RIGHT

Come to Think of It, His Inamorata Hardly Displayed the Ardent Love He Had Looked For.

"Funny how a guy makes up his mind to enlist," remarked Slim, the company clerk, to a bunch of his buddies in the bunkhouse. "What made you decide to take the big plunge?" asked a buddy. "It was this way," explained Slim. "I had a little squabble with the girl, and I told her I was going to join the marines. Just to make it sound as if I meant business I wrote a letter to the nearest recruiting station, and before sending the letter up I let her read it."

"Did she say anything?" asked the buddy. "Not a word. So I went out and posted the letter. A little later I gets the answer back, saying I could enlist for two, three or four years, and I shows it to the girl. 'There you are,' says I, 'if you don't treat me different from now on, I'll go straight out and enlist for two years.' 'Two years,' says she. 'Two years! Ah, don't be a piker, Slim, why don't you make it four?' 'Come to think of it,' concluded Slim. 'I don't think that Jane was as bughouse about me as I calculated.'—The Leatherneck.

### CALLS FOR NERVE AND SKILL

Hunters of the Sword-Fish Find Their Prey Altogether "Worthy of Their Steel."

Sword-fish schooners are the fastest fishing-boats under sail in the world. They have to be, for the sword-fish is a fast mover. He is a fighter, too. Often has he charged a ship and driven his "sword" through her stout planking. When a school of sword-fish is sighted, the spearman goes forward to the end of the bowsprit and gets into the "pulpit," an iron fitting at the end of the spar, where he stands to drive his lance into a fish. The line attached to the spear rushes out of the tub in which it is coiled, and the fish makes off, doubling his speed in a vain effort to escape. A good-sized fish will often fetch as much as \$40; but it is a hard life, and it needs fine seamanship in the chase amid the huge seas of the Atlantic when bad weather prevails. The sword-fish is widely distributed in the ocean, but is most common off the North American coast. Its average length is 7 feet, but some are 12 feet or 15 feet. The "sword" is used to spear its prey, such as cod, tunny and mackerel, and even to attack whales.

### The Bello-Pacifist.

"H. G. Wells is known in Europe as a bello-pacifist, and truly his recent peace articles have stirred up a lot of bitterness and strife." The speaker was Stephen Lauzanne, the French publicist. He went on: "Wells reminds me of the cantankerous individual who was about to be married. When he came to the church on the wedding morning he warned the minister beforehand that he didn't want any fuss."

"He consented, however, to station himself in due form at the flower-decked altar, but as the minister proceeded with the ritual he got more and more impatient. Finally, when he was asked if he, Henry, did take this woman, Jane, to be his lawful wedded wife and so on, he gave a snort before the question was half through, and then turned to the congregation and said in a loud, jeering voice:

"Well, I guess I came here with that intention."

### They Never Did.

My most embarrassing moment occurred while dramatizing a Christmas play. I had the part of the mother of a large family presiding at the feast on Christmas day. It fell to me to carve the goose. Having rehearsed this part, I was anticipating no difficulty, so I started bravely out on the breast bone. Gently and slowly it slipped out of my grasp. I tried again with the same effect. As the titters from the audience increased, I became slightly confused.

At this opportune moment the father, sitting opposite, uttered his next lines, which were: "Did you ever see such a goose?" With that the audience began to roar, and I gave it up in ignominious defeat.—Exchange.

### Plugging Out.

A Kentucky man seems to have found a relative of the city girl who thought it must be cold work harvesting the winter wheat. The young woman of whom the Kentuckian tells is a native of Cincinnati, and was lately talking with him about tobacco and tobacco-raising.

"I should like ever so much to see a tobacco field," she said, "especially when it is just plugging out."—Way-side Tales.

### Broadened Observation.

"A statesman has to be a profound student." "No doubt about it," replied Senator Sorghum. "Time was when a good campaigner could get by if he kept his eye on the map of his own state. Now you've got to be an expert in the geography of the world."

### World's Largest Reservoir.

In about two years London's reservoir at Littleton will be the largest artificial reservoir in the world. It will hold water to supply London for a month, or 6,500,000,000 gallons. Its surface will cover 800 acres.

### Girls Only.

In the midst of a busy afternoon, a girl, age thirteen, came to the desk of a branch library and said in a discouraged tone:

"You used to have a little red book for girls only, but I can't find it now. I read part of it and want to finish it."

The puzzled assistant decided here was a case for imagination and suggested obvious books, as "Little Women," "Six Girls," with no success. Finally, as a last resort, she guessed at random:

"Was it 'Keeping Up With Lizzie,' by Bacheller?"

And it was.

### Habituation.

"Your constituents must think very highly of you to send you to Washington again and again."

"Not all of them," admitted Senator Sorghum. "Many, of course, contemplate me as their invincible leader, but a few regard me merely as a sort of bad habit."

### Cruel.

Conceited Amateur—I was taught how to play the violin when I was eight years old.

Crusty Professional—Indeed! How old were you when you forgot?—Tit-Bits.

## Why Some People are Poor.

Their ideas are larger than their purses.  
They do not keep account of their expenditures.  
They are easy dupes of schemers and promoters.  
They reverse the maxim, "Duty before pleasure."  
They do not consider it worth while to save nickels and dimes.  
They try to do what others expect them to do, not what they can afford.

TANEYTOWN SAVINGS BANK

A Size for every Requirement

Threshing is most profitable where equipment of the correct size is used. The Rumely Ideal is made in five sizes. Among them is the one that will do your work best and most profitably for you.

The same perfected principle of separation is employed in each size.

You get fast, clean work. You save grain often wasted in the straw stack. Every bushel including your "pay bushel," which is every fifth bushel, comes through clean. You get all your profit. All these advantages are yours when you thresh with the famous

Rumely Ideal Separator

We put faith behind it because it is a product of the great Advance-Rumely plant where finest "quality" has always been the dominating principle; because it is the fruit of over 80 years' experience; because thousands of farmers and implement men have proved it worthy in the field. Come in and let us point out the reasons.

Dependable Belt Power

The machines at both ends of the belt must be dependable and economical. For the best and cheapest threshing power the famous OILPULL, "The Cheapest Farm Power," has no equal. Ask us about it.

Five Sizes

22 x 36 28 x 44  
28 x 48 32 x 52  
36 x 60

## LESSON FOR JULY 9

### DANIEL INTERPRETING NEBUCHADNEZZAR'S DREAM

**LESSON TEXT**—Daniel 2  
**GOLDEN TEXT**—The kingdoms of this world are become the kingdoms of our Lord, and of His Christ; and He shall reign forever and ever.—Rev. 11:15.  
**REFERENCE MATERIAL**—Isa. 9:8, 7:13, 14:47; John 18:33-38.  
**PRIMARY TOPIC**—How God Answered Daniel's Prayer.  
**JUNIOR TOPIC**—Daniel Reveals the King's Dream.  
**INTERMEDIATE AND SENIOR TOPIC**—How Daniel Met a Severe Test.  
**YOUNG PEOPLE AND ADULT TOPIC**—God's World-Kingdom: Its Nature and Method.

#### I. Nebuchadnezzar's Dream (vv. 1-13)

This dream made a tremendous impression upon the king's mind, but he had forgotten its content. He urgently demanded of the wise men that they make known the dream and its interpretation. Because of their failure the king was very furious and commanded all the wise men of Babylon to be slain.

#### II. The Revelation of the Dream (vv. 14-35)

When the decree was in process of execution Daniel was sought out to be slain. He sought an interview with the king and obtained time. Note:

1. The prayer meeting in Babylon (vv. 14-18). Daniel was the leader in that prayer meeting. He called his fellows together and most definitely prayed to God. Their lives were at stake; their need was great.

2. Daniel's ascription of praise to God (vv. 19-23). God heard their prayer and Daniel responded in lofty strains of praise to God.

3. Daniel before the king (vv. 24-30). Because he had been with the Lord and had obtained wisdom, he was confident before the great king.

4. The content of the dream (vv. 31-35). Daniel made known to the king that in his dream he had beheld a great image with a head of gold, breast and arms of silver, belly and thighs of brass, legs of iron and feet part of iron and part of clay. He beheld the image smitten by a stone and the stone became a great mountain.

#### III. The Interpretation of the Dream (vv. 36-46)

1. The head of gold represented the Chaldean monarchy with Nebuchadnezzar as its head (vv. 37, 38). With the accession of Nebuchadnezzar to the throne, the times of the Gentiles began.

2. The breast and arms of silver represented the Medo-Persian power (v. 39). The Medo-Persian empire was a kingdom inferior to the Chaldean.

3. The belly and thighs of brass represented the Grecian empire under Alexander the Great (v. 39).

4. The legs of iron represented the Roman empire (vv. 40-43).  
(1) The two legs represented the eastern and western divisions of the Roman empire. (2) The feet of iron and clay represented the two elements of human government, which inhered in the Roman empire and are present today in all forms of government, namely, absolutism and socialism, or imperialism and democracy. These elements have no coherency.

5. The stone cut out of the mountain (vv. 44, 45). This is the kingdom of heaven so graphically set forth in the New Testament, for the kingdom of heaven is the kingdom which the "God of heaven shall set up." (1) The stone is Christ (Isa. 28:16; Matt. 21:42-44). (2) When did the stone strike? The impact of the stone was upon the feet of the columns (v. 34). This shows that it did not strike at Christ's first coming, for the Roman empire was a unit at that time; not even the division of the empire as represented by the two legs had taken place as yet. The stone smiting the feet shows that the stone will strike when the Roman empire shall have been divided up into ten kingdoms. (3) The kingdom of heaven is thus seen to be brought into realization through a great catastrophe. The end is not by gradual and peaceful extension through preaching the gospel, but by a crushing blow. The stone does not fill the earth by crowding the colossus out, neither by securing its submission to God, but by destroying it. Gentle dominion shall end in a crash; upon its ruins shall be built the kingdom of heaven. The action of the stone is of judgment, not grace. The text plainly says it is "after" the stone has done its smiting work that it becomes a great mountain and fills the whole earth (see Psalms 2: 5, 6; Zech. 14:1-9). Just as the first part of this dream was literally fulfilled, so shall the last part be fulfilled. Messiah's kingdom shall be a real and literal kingdom.

**News Spreads of Miracles.**  
Jesus went over the sea of Galilee, and a great multitude followed him, because they saw his miracles which he did on them that were diseased.—John 6:1 and 2.

**Forgiveness of Sins.**  
Blessed are they whose iniquities are forgiven, and whose sins are covered.—Romans 4:7.

**Indemnity.**  
Indemnity is the exaltation of character.—W. M. OHLER.

## THE CHRISTIAN ENDEAVOR TOPIC

From Moody Bible Institute Monthly Chicago, Ill.

July 9

### How to get the Blessings of Freedom

John 8:31-36  
"Whoever committed sin is the bond-servant of sin." Sin is bondage. Salvation is freedom from this bondage. This is implied in the name given to our Lord when He came from heaven to earth. The angelic message announced that His name should be called Jesus, which means Saviour.

The method of deliverance from this bondage is clearly portrayed in the Scripture lesson. As the result of our Lord's teaching on a certain occasion, many believed on Him. In order to prove the reality of their faith and to test their discipleship He said to them, "If ye continue in my Word then are ye my disciples indeed and ye shall know the truth and the truth shall set you free." The blessings of spiritual freedom are attained by the knowledge of the truth, the truth as it is in Jesus. In proportion to the increase of knowledge, there is a growing sense and enjoyment of freedom.

Those to whom our Lord spoke resembled His words and the inference of bondage which His message conveyed. They had no deep sense of sin and consequently no perception of need, so the Master goes deeper and says with great plainness, "Whoever committed sin is the bond-servant of sin." From this bondage there is no self-obtained freedom. Deliverance must come from another source. Self is helpless to deliver, for self is fallen and weak. The sinner is under the dominion of another who is able to hold him fast. But there is One who can set the bond-servant free. One who is not a mere servant in the house, but the Son over the house.

### MAY REDUCE COST OF SILK

Italian Expert Said to Have Perfected Machine That Has Possibilities of Importance.

Silk has always been considered an article of luxury on account of its high cost in comparison with other textile materials, writes United States Commercial Attache H. C. MacLean from Rome. This has been due in large degree to the labor necessary in handling the cocoons and preparing the thread for spinning. Consequently the silk industry has flourished only in countries where cheap labor is available.

After soaking the cocoons in water the thread has always been unreeling by hand, which is a work of great delicacy, but one for which it has not been possible to pay high wages. Thus, while silk weaving in Italy has been making progress the preparation of the raw silk has shown a decline. It is now reported that an Italian silk expert has succeeded in perfecting a machine which will perform the operation of unreeling the thread mechanically. A new company has recently been formed, which has taken over the patents covering the invention and will manufacture the machines.

If the invention succeeds commercially as well as it has in the experiments that have been made it bids fair to revolutionize the silk industry, and, according to the inventor, the cost of silk may be reduced to such an extent that it will be able to compete with cotton and linen.

### GOT HUBBY AT A BARGAIN

Most Girls Would Consider Transaction Worth the Expenditure Involved in the Case.

A business man who wanted a book-keeper stated his need in an advertisement. The notice was seen by a young woman who was out of work and who had searched for employment day after day without success. She had just one cent left. This she spent for a postal card, on which she wrote a reply to the advertisement and dropped the card in a street letter box.

Her application impressed the business man favorably, and he wrote to her asking her to call at his office. She did so and secured the position. Her modesty and worth, no less than her capability, so won her employer that before many months had passed he offered her his heart and hand, and she accepted and became his wife.

"And to think," he said one day during the honeymoon, "that it all came from your spending your last cent for a postal card and mailing it at a street corner!"

"Yes," she replied with a smile and a blush. "I dropped a penny in the slot and got a husband."—Pittsburgh Dispatch.

### There are emancipation celebrations at various times of the year.

August 4 is observed as a celebration of the emancipation of Haitian negroes by the British. August 1 is celebrated as the anniversary of the proclamation issued August 1, 1834, by the British government, freeing slaves in its colonies. More than 700,000 slaves were set free in the West Indies at that time, principally in Jamaica, the English government paying several millions of dollars to the slave owners as indemnity. The day most widely celebrated, however, is September 22, the anniversary of Lincoln's proclamation issued in 1862.

### HOUSES NOW SHOT FROM GUN

Concrete Construction Surely May Be Said to Have Reached the Limit in This Idea.

"Shooting" houses out of a "gun" is the latest wrinkle in concrete construction, writes Cleveland Gains in Popular Mechanics Magazine. The gun consists of a nozzle-like affair at the end of a 3-inch hose. Dry concrete is put into a container and water forced through it. The mixture is thus made at the last moment before it is applied.

In building the first of the houses in this fashion a one-sided framework of tar paper and chicken wire was erected. Iron reinforcing rods were placed against this and the concrete shot against it with the use of a gun. A wall two inches thick was "shot" in this way, allowed to dry, and the tar paper and chicken wire peeled off. The result was a solid concrete wall. Doors, windows and plumbing were put in place and the wall shot around them.

In similar fashion ceilings, floor, a fence around the yard and other parts of the house and yard were shot. Seats were shot into the wall at one place, decorative designs in another, and so on. The resulting house and yard was a complete home in one piece—a monolith.

The second house built with the gun employed walkboard in place of tar paper and chicken wire, with even better results.

### FRENCH HOLD TO NEST EGGS

Almost Every Household Has Some Kind of Hoard Stowed Away for an Emergency.

To arrive at the undoubted financial strength of France you must first understand that in every country there are two kinds of fiscal life. One pertains to government income and expenditure, the other to what might be called private money—that is, the resources of the citizens. A country may be broke and at the same time have immense potential wealth.

This is precisely what is happening in France. Government finance is riding on a rocky road, but the great mass of the people still have their nest eggs. Thrift, as every one knows, is instinct with the French. Those who have had experience with French penuriousness maintain that the French make of thrift a vice.

Save for investment in government bonds the average French man or woman delights to keep his or her fortune in actual cash. During the war they risked death to go back to ruined firesides to dig up their precious hoards. The result is that France has more real gold and silver stowed away in stockings and old pots than any other country. Government financial crises may come and go, but this huge reservoir of savings—the bulwark of the nation—goes on forever.—Isaac G. Marcossin in the Saturday Evening Post.

### Practical Deduction.

Antoinette, who is six, has a charming mother who sings very beautifully. Since babyhood Antoinette has delighted in listening. The other evening the southern girl was a dinner guest.

When Antoinette's mother sang "Carry Me Back to Ole Virginny" in the mellow dialect of the South, the southern girl felt the tears creeping into her eyes. Antoinette piped up, "Mother, is it a little baby that wants to go back to Virginny?"

"Why, no, darling," the mother answered. Then, glancing at the southern girl. "It is someone who loves that state, dear. It's her home—She wants to go back—Someone like auntie. You know she comes from the South—"

Antoinette looked askance at the southern girl. "Well, why don't she walk back? Only babies get carried!"—Chicago Journal.

### The Champion Nuisance.

He goes at night to see a show where chorus flappers stand arroy to do their little steps and sing, while bum comedians blithely spring (with limber lips and brazen tongue) gags that would make the Sphinx seem young! Next morning when I faint with toil, and gather wampum for my moll, this bimbo lets a yip escape his mouth with riabldry agape, and then proceeds to tell quite badly those jokes to which I'd hearkened sadly when I was younger far than now—some day I'll crown that simp, I vow! He tells me all he can remember of wheezes grayer than December—wheezes I hadn't heard of lately; and then he roars immoderately. He even feels that I also should catch the spirit of a show which he had seen and I had not—I swear that baby should be shot!—Buffalo Express.

### Who Remembers "Butter Daisies"?

A government clerk was heard bemoaning those lost dainties of his youth.

"I have eaten all the modern candies," he said. "Yes, sir, all the chocolates, and the milk chocolate, and the fudges, and the nut candies, and the sort with a cherry to jump out at you and all that."

"They are very nice, but none of them approaches the delicious flavor of the old butter daisies. I remember how I used to get a nickel, run to the corner store and invest in a bag of butter daisies."

"Small yellow cones they were, that melted in your mouth, much as the fabled nectar of the gods was supposed to do. No, sir, I haven't tasted a butter daisy in 20 years."—Washington Star.

# THE RECORD'S Buy-at-home Campaign

Some say "It don't pay to advertise" while others know "it don't pay" NOT to advertise. Evidently, the people who go away from home to buy believe in advertising.

MR. ADVERTISER!

You may think this little "ad" of yours has not "paid" you. Perhaps it has not—one never quite knows about that, for sure. The preacher would quit his pulpit if he had to have plain results from every sermon; the Editor would stop writing his editorials, if he depended on each one bringing favorable comments; the legislator would give up in despair, if his work should be judged by the full observance of all laws.

If this ad has not "paid" perhaps the experiment has shown the better way to advertise? If it has largely represented \$10.00 laid down to an expert solicitor, perhaps it will lead to investigation as to how the same amount of cash might have been better invested in space, by calling on the editor himself?

Wanamaker says "it pays," and so do the mail order houses, and they know. The thing for you to do is find the right way, then keep it up. The very reason why you went into this experiment, is proof that you know advertising pays "the other fellow."

Honest now, lots of people are not to be blamed for going away, or sending away, for goods. They are merely accepting invitations from people to patronize them, telling what they have to sell. If you want more business you must tell more people what you have that they want. That's all there is to good advertising.

To test the value of this page we offer for a short time only Genuine Cant Sag Field Gates at \$5.00 each, cash.

12-ft. to 16-ft. widths, worth up to \$9.50 each.

## TANEYTOWN LOCALS

Brief Items of Local News of Special Interest to Our Home Readers.

George C. Naylor lost a fine young horse, last week, from pneumonia.

Miss C. L. Mourer, of New York, is visiting Mrs. J. T. Erb, in Westminster.

Mrs. Elmer Hess was given a birthday surprise, Wednesday evening by her children.

Mr. and Mrs. Clarence Hilterbrick of Baltimore, visited relatives in town over Sunday.

Mr. and Mrs. O. M. Crouse, of Westminster, visited at George E. Koutz's, on the Fourth.

Harry Suttin, wife and daughter, of Canton, Ohio, spent Wednesday with Clarence E. Dern and wife.

Mr. and Mrs. Clotworthy Birnie, of Washington, were over Sunday visitors at Mr. Birnie's home here.

Mrs. Mary L. Motter of Washington, and Mrs. Virginia Tutwiler, of Philadelphia, are summering at George R. Saubels.

Pulling the cars of visitors to the Gettysburg field, out of the mud, on Sunday and Monday, was a busy and profitable industry.

Mr. and Mrs. Chas. F. Beck, of Beck, of near Sykesville, were guests of Mrs. H. D. Hawk, last Saturday evening and Sunday.

J. C. Weimaster, of Towson, manager of the Jeffersonian, and Louis Resser, of York, were visitors at the Record Office, on Monday.

Mrs. Mary Crapster returned home, on Tuesday evening, from a lengthy visit to her daughter, Mrs. Anna Smeltzer, at Intermont, W. Va.

The last few days have been fine for drying out the wheat in the fields, thereby giving farmers the badly needed opportunity to "haul in."

Miss Ethel Sauerhammer returned home, last week, from her school at Lansdowne, Pa., having been delayed on account having had an operation on her tonsils.

A bad hail storm, last week, ruined 50 acres of standing wheat on the Hafer farm, near Chambersburg. The storm also left 20 acres already cut in bad condition and also some damage to growing corn.

The threatening skies did not prevent a steady stream of auto vacationists going through to Gettysburg, on the 4th. The state road was filled with them from early morning until past noon.

Lightning struck the corner of Mrs. J. Henry Lambert's farm dwelling, last Saturday afternoon, fortunately doing only slight damage, and no fire ensued. At the same time, a shock of wheat was struck in Mr. Kemper's field, nearby, burning it up.

James F. Yingling made a narrow escape, one evening last week, from being struck by lightning. He had taken shelter from the storm under a pear tree, but went to the house, and several minutes later, lightning struck the tree he had been under.

Those who spent Sunday last with Mr. and Mrs. Jacob Strawsburg, were: Mr. and Mrs. William Perago, of York, Pa.; Mr. and Mrs. E. Russell Reinaman and daughter, Reda, of Fairview; Mr. and Mrs. John W. Froek and family, of Keysville; Wm. Miller, of near Mt. Union.

The local baseball team will play the Keystone Wirecloth team, of Hanover, on Saturday, in Taneytown; and on Wednesday next, will play Westminster, also on the home ground. This latter game, especially, should draw a large crowd. Taneytown, so far, has won 7 games and lost 2, and is playing a strong all around game.

John O'N. Crapster lost a horse, last Saturday, under unusual circumstances. He had hitched the horse to a light wagon to bring milk to town, and in switching at flies the horse caught the lines under its tail. Mr. Crapster gave the line a twitch to disengage it, when the animal reared up and fell, and in so doing broke its neck.

Taneytown is certainly going the limit in the use of concrete for streets and sidewalks. A large portion of Baltimore St., is now concreted from curb to curb, which in the future may prove to be a decided handicap, when it becomes necessary to lay more drains, not to mention sewerage. Let the future look out for itself, seems to be the motto; and trees—must do the best they can. Repairs to water mains and connections will also be very difficult and expensive.

Col. Upton Birnie, of Washington, is visiting relatives in town.

Miss Ruth Breneman, of Lancaster, Pa., is spending some time with her aunt, Mrs. Guy P. Bready.

Percy L. Mehring is home from Jefferson Medical School, Philadelphia, for the summer vacation.

There are reported to be four or five aspirants for the postmastership who will take the Civil Service examination in Westminster, July 15.

Mr. and Mrs. Robert Ridinger and children, of York, and Mr. and Mrs. Lloyd Ridinger, of Manheim, Pa., spent several days with their home folks.

Camp No. 39, P. O. S. of A., of Harney, made a donation of \$5.00 to Hesson-Snyder Post American Legion, for its participation in Decoration Day services in Harney.

Mr. and Mrs. Roland M. Baker, of Elkins, W. Va., and Miss Dorothy Young, of Hagerstown, have all returned to their homes after spending two weeks with Curtis Baker and family and other relatives of this vicinity. Miss Catherine Baker, of Taneytown, has also returned home, after spending two weeks at the same place.

The following officers of Camp No. 2, P. O. S. of A., were elected for the ensuing year: Charles Stonesifer, President; Vernon Crouse, Vice-Pres.; C. E. Ridinger, M. of F.; M. Ross Fair, Con.; Wm. Kiser, Inspector; Harry Copenhaver, Guard; Delegates to State Camp, Rev. M. E. Ness, Merwyn C. Fuss, Charles E. Ridinger, Sherman Gilds.

Those who spent the Fourth at the home of Chas. Hefastay and wife, were: James Mort and wife, Ray Mort and daughter, Maude; John Mort and wife; Misses Mildred and Hazel Mort and Ralph Mort, of Tom's Creek; Leo C. Bair and wife, Harry Bair, Mrs. Anna Marshall, of Bair, Pa.; Walter Luedeckey, wife and daughter, Lillian; Mrs. Rosa Reifsnider and daughter, Anna; Miss Laura Hollenberry and Mrs. Latom and Steve Dubel, of Baltimore.

The news came to Taneytown, on Thursday morning, of the death of Mrs. Katharine Bloomer, of Washington, who had been ill for quite a while with an affection of the heart. Mrs. Bloomer was the second daughter of Judge and Mrs. Clabaugh, very well known and popular in Taneytown, her childhood home. Mr. and Mrs. Bloomer were always summer visitors here, and because of her illness the Clabaugh home has not been opened this year. The many friends of the family here extend their heartfelt sympathy.

### A Prize Poker.

A famous engineer was entertaining a distinguished Englishman before showing him over his works. The visitor complained of the insignificance of everything American. "Why," he said, "we have a castle in London with a fireplace as big as this room." When in the works the engineer showed his visitor a huge ship's shaft. "What's this for?" asked the Briton. "Oh," responded the engineer, "that's a poker we're making to fit your fireplace!"—Chicago Herald.

## SHERIFF'S SALE

OF A VALUABLE FARM

near Taneytown, in Carroll County Maryland.

By virtue of a writ fieri facias issued out of the Circuit Court for Carroll County on a judgment of George I. Harman entered to the use of Henry J. Hilterbrick against the goods and chattels, lands and tenements of Charles H. Stonesifer and Carrie G. Stonesifer his wife and to me directed, I have seized the following real estate of Charles H. Stonesifer and Carrie G. Stonesifer his wife to-wit:

All those tracts or parcels of land now owned and occupied by Charles H. Stonesifer and wife, containing 42 1/2 ACRES OF LAND, more or less, improved with a good frame dwelling house, barn and other outbuildings about 1 1/2 miles east of Taneytown, on the road leading from Taneytown to Uniontown, in Carroll County, Maryland, being the same land that was conveyed by William W. Witherow to Charles H. Stonesifer by deed dated March 30, 1920, and recorded among the land records of Carroll County, in Liber E. C. C. No. 136 folio 4.

And I hereby give notice that on MONDAY, JULY 31, 1922, at 2 o'clock, P. M., on the above real estate occupied by Charles H. Stonesifer, I will sell all the right title and interest of Charles H. Stonesifer and Carrie G. Stonesifer his wife, in and to the above fee simple property so seized and taken into execution to the highest bidder for cash.

E. EDWARD MARTIN, Sheriff. N. B.—This sale is made under the first judgment against the above real estate recorded March 31, 1920, in Docket No. 19 page 5.

IVAN L. HOFF, Attorney for Henry J. Hilterbrick 7-7-4t

## PUBLIC SALE

OF VALUABLE Real Estate and Stock.

By virtue of the power of sale contained in the Last Will and Testament of Isalah Reifsnider, deceased, and of an order of the Orphans' Court of Carroll County, dated November 15, 1921, the undersigned, Executors of Isalah Reifsnider, deceased, will sell at public sale on the premises, situated about 2 miles south of Taneytown, in Taneytown District, Carroll County, and on the road leading to Key-mart, on

SATURDAY, JULY 29, 1922, at 1 o'clock, P. M., all that valuable little farm which was conveyed to the said Isalah Reifsnider, in his life time, by the following two deeds, one from Mary E. Harbaugh, dated March 31, 1904, and one from Daniel S. Crabbs, et al., dated April 4, 1906. This farm contains

52 ACRES OF LAND, more or less, is improved by a two-story frame dwelling, 8 rooms, closed porch with two side porches, bank barn 45x65 feet, with wagon shed and corn crib attached, hen house and chicken house and other necessary outbuildings, all practically new, well of good water at house, water piped to the barn. Apple orchard with other fruit, 3 acres of good timber, pasture land with running water. This property lies along a hard road, is convenient to churches, schools and railroad, and is a most desirable little farm.

At the same time also will be sold Ten Shares of the Carroll County Agricultural and Fair Association and Three Shares of the Sharrets Telephone Company.

TERMS of sale of this stock. Cash.

ISAIAH LEWIS REIFSNIDER, DAVID B. REIFSNIDER, Executors of Isalah Reifsnider.

At 3 o'clock, P. M., on the above date, the undersigned, trustees, under a decree of the Circuit Court for Carroll County, sitting as a Court of Equity, dated January 11, 1922, will sell at public sale on the premises on Emdenburg Street, Taneytown, all that lot of land, containing

THREE-EIGHTH OF AN ACRE LAND, more or less, described in a deed from Herbert W. Winter and wife to Mary R. Reifsnider, dated March 20, 1912, this lot is improved by a frame dwelling house, 6 rooms and pantry, with closed porch, wash house, large stable, with shed and corn crib attached, hog house, all in good condition, and is a very desirable town property.

TERMS of both real estate sales:—One-third cash on the day of sale, or upon the ratification thereof by the Court, and the residue in two equal payments of 6 months and 12 months respectively, the credit payments to be secured by the notes of the purchasers, with approved security, bearing interest from the day of sale, or all cash at the option of the purchasers.

ISAIAH LEWIS REIFSNIDER, DAVID B. REIFSNIDER, Trustees. THEO. F. BROWN, Attorney 6-30-5t
