AUTOMOBILE LAWS AS PRESENTED

Short time for the Public to Cive Them Consideration.

The following auto law amendments were taken up in the House, yesterday, after having been before the Judiciary Committee for a month These amendments were prepared by the Automobile Clerk of Maryland. There are also said to be separate amendments, not included in the fol-lowing list. These amendments should be carefully considered by the public so far as there is yet time, and opinions forwarded to representatives at Annapolis.

Stay of execution regarding revocation of operator or chauffeur licenses by the Commissioner of Motor Vehicles pending appeal.

There has been considerable dis-satisfaction among the motorists as a result of the fact that under the present law appeals from the action of the Commissioner of Motor Vehicles in suspending or revoking licenses is without effect as the appeal does not stay the operation of the Commissioner's order. If the motorist has an accident for which he feels that he was in no way to blame and the Commissioner suspends his license, he must pay the penalty before his appeal can be heard even though he may be entirely innocent and be acquitted by the court. The club has therefore proposed an amendment to this provision of the law which provides that the action of the Commissioner of Motor Vehicles in suspending or revoking the license of the motorist does not take effect until the motorist has an opportunity to have his case tried in court. Change in right of way at street

and road intersections.

Reduction from \$25.00 minimum fine to \$5.00 minimum fine for ex-ceeding thirty-five miles an hour up to fifty miles an hour.

The present law provides a mini-mum fine of \$5.00 for exceeding the speed limit of 15, 20 and 25 miles in their respective localities, and there is no good reason why the same minimum should not apply to the excess over 35 miles per hour in its terri-tory, for any motorist exceeding from 1 to 5 miles over the first three (3) speed limits is invariably fined no more than the minimum of \$5.00, and it should, therefore, be left to the discretion of the court to impose the same minimum upon the motorist who slightly exceeds the 35-mile limit with a \$5.00 minimum.

Motorists to have the right of appeal from the Commissioner of Motor Vehicles' decision upon definitions of the motor vehicle law.

Defining safety zones where passengers alight from and enter street railway cars.

Permitting a motor vehicle to pass

AN UNUSUAL CASE. C. E. H. Shriner vs. Union Bridge Electric Company.

A case of considerable interest in Taneytown was passed on by the Public Service Commission, on Feb-ruary 25. We give the statement of the commission, and the conclusion, because of the general interest involved, and because of its unusual

character. The opinion states; "The petition filed in this case asks that the Union Bridge Electric Manufacturing Company be required to furnish electric service to the dwel-ling property of Charles E. H. Shri-ner, just outside the limits of Taneytown, an incorporated town of Carroll County, in this State. This case is unique in its facts and in the smallness of the amount involved.

Taneytown is lighted and electrically served by the Union Bridge Electric Manufacturing Company (hereinafter called the Company) which se-cures the current which it distributes from The Potomac Edison Company. In the year 1919 the Company extended its lines from Union Bridge to Taneytown, and shortly after the in-auguration of the new service in Taneytown proper, certain property, tenants and owners of unimproved property on Baltimore Avenue outside the town limits sought to have the Company run a line and furnish a transformer for serving the houses and other buildings on Baltimore Avenue in the suburbs of Taneytown. The Company stated that the cost of the line was prohibitive and that the business would not be remunerative. The suburban citizens of Baltimore Avenue called a meeting to which all the residents of the section, including the two tenants of Mr. Shriner's property, were invited. One of these tenants was present but the other, Mr. Shriner's son, failed to attend. As a result of the negotiations between the Baltimore Avenue suburbanites, who organized under the name of the East End Improvement Asso-ciation, (hereinafter called the Association) and the Company, a plan was finally agreed upon for the lighting of Baltimore Avenue for the dis-tance of about one-half of a mile be-yond the town limits and the furnishing of electricity to such persons as cared to become customers. In order that the revenue might be sufficient to justify the undertaking members of the Association dug the holes, furnished and erected a number of the poles for street lighting and agreed to pay annually \$285.00 for ten lights along the highway, in con-sideration of which the Company agreed to serve the houses of such

members of the Association along Baltimore Avenue as desired electricity at and for the same rates as the Company charged in Taneytown.

There was offered in evidence much testimony showing bad feeling between Mr. Shriner and his fellow property holders and charges were made that Mr. Shriner was excluded from membership in the Association. ping aside the personal and in relevant matters, it appears that Mr. Shriner objects to paying the sum which the Association has fixed as his share of the cost of maintenance of the street lights, claiming that others pay less than the assessment put up-on him and further, that the Association wants him to pay a double assessment while in reality his house, which is a double house with permanent partition wall between and tenanted by two families, should be considered one property. It is true that there are inequalities in the charges, this discrimination being merely due to an attempt to ease the burden on several persons not so well to do as their neighbors but there are voluntary contributions by owners of uns improved land abutting on Baltimore Avenue which compensate for such inequalities. The petition is against the Company and asks that an order vehicles. be passed requiring service to be Providing that a motorist shall furnished and at the same rates charged in Taneytown. It is undoubtedly true that a public service company must serve all applicants within a reasonable distance from its line. Mr. Shriner is entitled to service. The cardinal rule of rate making is that discriminations his neighbor's brow. If the law stands for anything, it stands for equality, and we fail to see either among consumers in the same class or similarly located must not be perprogressive and enterprising men of mitted. It is no answer to say that the Company is responsible for the situation and should either furnish Mr. Shriner at less than the charges paid by his neighbors or else run an independent line to Mr. Shriner's property. The line would not be remunerative and such order would be its burdens." in violation of the Company's constitutional rights. Were the Commisquire the Company to furnish elec-tric service to Mr. Shriner's property sion to direct that Mr. Shriner's property be connected with the line that serves the houses of the Association members, without requiring Mr. Shriner to pay an equal amount with Company governing service on the his neighbors, it would result in a discrimination. The arrangement was solicited by the Association and no dules of rates and rules covering fault can be attributed to the Company in yielding to the persuasion of the Association for an extension of service into a field where the return could not be compensatory. It is im-portant to bear in mind that we are dealing with a very small Company serving a small community. A ruling that might fit a similar case arising in connection with a strong company would not here be just and equitable. We must recognize Mr. Shriner's right to service but also see that he obtains no undue advantage through the enforcement of his right.

BONDED DEBTS GROWING FREQUENT How Far Can the State Safely En-

courage the Policy? Loan bills introduced in the legis-

lature, in addition to those approved by Gov. Ritchie, total \$7,309,000, which, if passed, would add 1.7 cents to the 1925 tax rate, and gradually increase, making the rate for 1927 about 30 cents.

In addition to these bills there is the soldier bonus that calls for a referendum, and a companion bill to provide revenue for the bonus.

Almost every county in the state also has one or more bond loan bills, and there are numerous municipal

bills of the same sort. Bonded indebtedness is evidently having its day as a popular make-shift with which to satisfy all sorts of money-spending projects, in order to get around the unpopular plan of raising the needed funds within a few years by increasing tax rates. The idea seems to be that going into debt-borrowing on credit-is justifiable, even though in the end-count-ing interest payments-this is more expensive than paying as you go.

The state, in other words, is being asked to back a financial plan for the whole people that would be consider-ed as risky for the individual, especially considering the high construction and other costs prevailing at this time. The serious question therefore is, how far can the state afford to go into the money market for loans, and passing the payment of the same to the future? It is also worth while considering,

whether by legislation of this sortbond issues-we are not encouraging the very thing that is already resting too heavily, for instance, on agri-culture—prices too high for labor, and for most things farmers, and the common run of folks, have to buy? Instead of practicing econ-omy, and holding back in satisfying our desires, we are apparently dis-posed to "go ahead" full speed, and keep alive the very causes that are responsible for the inequalities we complain of.

Individual buying, and putting off payment, as exercised by the indi-vidual, is merely the bond issue plan as practiced by states, counties, or municipalities.

POOLING WHEAT A FAILURE. The Cost Much Greater than by Private Storage.

The Seed Trade News, Chicago, publishes a news account showing how the co-operative handling of western wheat through the pooling plan, is a distinct failure, the cost being greater than that of privately owned warehouses. Not a single one of these pools has proven satisfac-tory to the wheat grower. It says: "Unless farmers are more gullible

and long suffering than presumed, the slow demise of the compulsory pooling plan for marketing wheat is in sight and old line farmers co-operative elevators and organized grain exchanges have apparently little to fear from competition by wheat pools and other ideas operating un-der the name of co-operative associations.

These deductions are based upon figures now available showing the cost of handling 1922 pooled wheat by the Southwest Wheat Growers Associated, operating in Oklahoma and Texas, and by the North Dakota Wheat Growers' Association. The former has about 12,000 members and has always been considered the most efficiently managed and a model for other organizations of its kind. The Oklahoma pool handled 3,122,000 bushels of wheat in 1922, the operations covering the period from July 1, 1922, to June 30, 1923. Its detailed cost sheet develops the interesting fact that it had a handling expense of 14.6 cents a bushel, or an everage of \$175 a car, and full settlement for the wheat was not completed until after the movement of the 1923 crop was under way. The selling cost was actually 15.7 cents a bushel, considering that a further deduction of \$31,802, or a little more than a cent a bushel, was made for the establishment of a "contingent reserve."

The net return, after deducting all costs and operating expenses, was \$2,758,153, making 88.3 cents per bushel, the net price which members received for their wheat. The average farm prices for the period covered in the association statement was 96 cents a bushel, as reported by the department of agriculture. It appears therefore, that the farmers who sold their wheat through this co-operative pool netted nearly 8 cents a bushel ess for their wheat than the average received by those who sold through-out the year at their local stations.

The items making up the handling expense for the year are illuminat-ing. There was paid for storage and handling at terminals \$180,045, or 5.7 cents a bushel for the whole volume of the pool, although necessarily a large part of the wheat was sold promptly upon arrivals. Salaries, travel and office expenses reach a total of \$62,494, or 2 cents a bushel. The salaries paid amount to \$40,107

THE LEGISLATURE FOR THE PAST WEEK.

Progress being made, but not many Bills Passed.

Delegate Sharp, of Baltimore, presented a petition purporting to represent 20,000 voters urging the legis-lature to pass a bill permitting exhi-bitions of moving pictures on Sun-days. Nine petitions were presented, at the same time, against Sunday movies

Without opposition, the bill spon-sored by Eastern Shore delegates for a \$750,000 road from Love Point to Denton was passed by the House. A companion bill is in the Senate. Adoption by both Houses and signa-ture by the Governor will mean establishment of a ferry service from Baltimore to Love Point by the Penn-sylvania railroad. It is one of the bills to which the Governor has not yet given his sanction.

The eight-hour law for women was put through the House, on Tuesday, which provides that women in factories shall not work more than 8 hours a day, or 48 hours in one week. The bill was hotly debated, and numerous

amendments offered and defeated. Mr. Upshur and Mr. Williams said certain industries in the counties, and especially in their sections, demanded more than eight hours' work a day at times and that the women were glad to get the extra employment. Mr. Bruce said the bill was unfair to the women themselves, as it would compel them to work on Saturday after-

noons to make the full 48 hours. Amendments then were offered and consolidated into one to exempt Somerset, Wicomico, Worcester, Cecil, Dorchester, Washington, Talbot, Howard, Baltimore, Calvert, Frederick, Caroline, Carroll and Queen Anne's counties. This was lost by a vote of 57 to 49.

The State Road and Bridge bill, carrying \$5,400,000, was passed to third reading in the House, on Wednesday

The bill to repeal the direct primary law, was killed in the Senate. The Senate bill providing that wo-men need not state their age when

registering, has been favorably re-ported. An amendment has been offered making the same change in the law for men.

A bill has been presented in the House, providing for the election, instead of appointment, of members of the Public Service Commission; one from the Eastern Shore, one from Baltimore, and one from the Western shore counties.

The mothwho does not take proper care of the babies' bottle may cause more trouble than the dairyman producing milk under ordinary farm conditions. The Dairymen are urged to use methods advised by the Dairy Specialists of University of Maryland in order to get a clean milk of low bacteria count in the hands of the trans-portation companies and hold them responsible for delivering a good product to the dealer; and he in return to the consumer. The question of County Bond issue for schools for the country was heartily aproved by all present providing it carried a referendum. A bond issue is only just to all tax-payers as places some of the burden of the building of the school houses upon those who get the advantage of using them. The Grangers have always stood for law and order. The following resolution was read, and after considerable discussion was passed: The National Order of Patrons of Husbandry has always stood for law enforcement and respect for constituted authority, and at the annual meeting last December in Pittsburg it reaffirmed its position on these questions and made this subject one to be especially emphasized during 1924.

There has been an insistent demand by the public for the elimination of the "special deputies" appointed by the Automobile Commissioner, the motoring public taking the position that the laws should be enforced by regularly employed officers, the in-signia of whose authority should be a uniform as well as a badge and that the person who exercises the authority of an officer should wear the uniform of his office while on duty.

Taneytown Lutherans Elect Pastor.

At a congregational meeting held after morning services, last Sunday, Rev. Wonter Van Garrett, of Middleburgh, Pa., was unanimously elected pastor of Trinity Lutheran Church, Taneytown, filling the vacancy caused by the resignation of Rev. L. B. Hafer, seven months ago.

Rev. Garrett was born and reared near Hanover, Pa. He spent four years teaching school, public and academic: graduated from Gettysburg Theological Seminary in 1919; was engaged in recreation work and Lutheran Camp pastor at Camp Colt, during part of war. Served as pastor at Keyser, West Va., after leaving school: began pastoral work at Middleburg, in 1921.

Mrs. Clara Byerly Garrett, is a native of Chester County, Pa., and a graduate of Wilson College, Chambersburg, 1920. They have one son, Robert Lavere, aged 3 years. Rev. and Mrs. Garrett are expected to be in their new home the first week in April.

Three thousand members of the North Dakota Wheat Growers' Association delivered 2,982,000 bushels of wheat in 1922, and the total overhead expense in marketing it was 13.7 cents a bushel. It is safe to say that no private

grain firm could exist long with a handling expense of even half the amount spent by the two associations and it is unbelievable that shrewd organizers and politicians can continue to interest producers in compulsory wheat pooling which nets them from 5 to 13 cents a bushel less than obtained by their neighbors who took advantage of the machinery of private firms and organized grain ex-changes to dispose of their grain."

Ours is a Government of laws and our security and success as a nation rests upon a strict and impartial en-forcement of the laws against all offenders whether high officials or the most obscure citizen.

Therefore we express the hope that all who are guilty of practicing fraud in the "oil scandal" cases will be punished, regardless of their party connections or their social or official stations.

We especially desire at this time to commend the State's Attorney of Carroll County, Theodore F. Brown, for his work in enforcing the prohibition and anti-gambling laws of the state. We believe he is actuated by a sense of public duty and a high regard for his oath of office.

We note with satisfaction that the Frederick County Pomona Grange at its last session adopted resolutions condemning the various gambling devices which are being used by some organizations in violation of the laws against gambling in this state.

The American people, National, state and local, are always set for argument. We like to "talk"-as the Britishers say, we are "boasters"-and a vast amount of our talk is mere noise, and kill-time enjoyment, very much like a lot of the demonstrations we hear at insane asylums; only, the demonstrators have not been "committed."

Senator Bruce, of Maryland, again showed his independence of partisan lines, by coming to the defense of Attorney-General Daugherty, in a hot debate in the Senate, last Friday. Mr. Bruce will soon become known as a Democratic "insurgent." At any rate, he is showing that he can take care of himself in debate with the old-timers.

Honesty and Self Interest.

It is difficult to be fair in judgment, when one is selfishly interested. We are, therefore, bribe-takers ed. We are, therefore, bribe-takers when we allow personal interest to warp our actions and decisions—we warp our actions and decisions-we take "our price" for crookedness, and tell conscience to take a back seat; and yet, we try to make ourselves believe that we are all honest.

When we came down to the fine dots, there are very few men in any extensive business of any sort, who are strictly honest and conscientious all the way through. Somewhere in our armor of righteousness there are weak spots. We are either not fully frank and truthful, we mislead by insinuation, we are "two-sided," or we use deception in some way or other to put our side over. And we call such acts "good business," or House. Seventy-four when he would "diplomacy," or "tact," or some leave it. Third parties need youth. "diplomacy," or "tact," or some other polite name for dishonesty. The main thing to be aimed at in order to maintain a good reputation

person, in a business of any kind. The "manager" may be a woman, as well as a man. Many a family owes its prosperity to the woman of the house, who is especially frugal and far-seeing-a "good manager," as we say.

This genius for managerial ability is too frequently lost sight of. In a big industry, for instance, requiring a great amount of machinery and operators, the latter are apt to see only their own efforts turning out a finished product on a large scale, and the office force apparently just "sitting around all day"-not working. It is this one-sided, ill-conceived idea of the value of manual labor, that causes a vast amount of industrial as well as individual discontent-the minimizing of the value of "white shirt" man in getting the orders that cause the wheels to go round and employ man at the machine.

Third Party-No Leaders.

The Philadelphia Ledger, in its entertaining editorial style, pictures how there may be a formidable third party, this year, by enumerating a block of states that are represented in Congress by "insurgents," then proceeds to knock the structure to pieces, like this:

"There are, however, even more reasons why a third party cannot succeed in 1924 than why it might succeed. It might, by some miracle of political black magic, cook up a stew of issues that would do for a single campaign. It might even be able to agree for once and for awhile on the skeletonized platform of "Soak the Rich!" and "Damn the Raflroads!" and "Down With Mam-mon and Wall Street!" Nevertheless its greatest hindrance would remain. It has no leaders. There's the rub. Henry Ford left it orphaned when he turned his back on it. His

If a Man Steals, Let Him Pay.

Out in Lincoln, Nebraska, a man is trying to repay \$14,000 at the rate of \$50 a month out of his earnings at honest work. He will have to put in more than 23 years to discharge money was to make the third-party in more than 23 years to discharge mare go. He was to be the little the principal. If interest is added, woolly lamb on the third-party as it should be, the time will be indefinitely prolonged.

> This man took \$18,000 which belonged to others and which had been entrusted to him. When confronted, he restored \$4,000, or less than onefourth, and upon his own application he was given a chance to return the full amount on the installment plan. He recognized the justice of making restitution, and preferred it to going to prison. By the time he has paid the last cent he will have restored himself to good standing in the world, and, better than anything else, will have regained his own self respect.

Restitution and reparation should be made part of any penalty for crime involving property. When culprits know in advance that detection means that they must restore all they stole or destroyed, they may be deterred from entering on crime, Small consolation comes to the victim when he hears the man who has smashed his automobile in a stolen J. for rectitude, is "not to get caught." The man who can play his cards, and "get by," may be the greater rascal than the poor fellow who bungles and leaves incriminating evidence behind, but he passes as "shrewd" enough to not to get caught, and that is the virtue, that the world rewards.

If the mask could be torn off from private characters in a community, what a sensation there would be, and how few there woud be to stand off and take in the show disinterestedly.

Value of Managerial Ability.

A business that seems to run itself, either isn't much of a busienss, or is one that is gradually running down. Every business continually needs an infusion of fresh energywhat we call "promotion".sometimes. There is always a natural, steady loss, to a piece of machinery, due to had been buffeted about, and re-"wear and tear," and we must be adding something to our profits to compensate for this loss, and eventualy replace the machine. We need a combination of "sinking funds," as agreed to unite, and at the last minit were, to redeem our obligations to the "wearing out" process.

So, when we head a going business, that seems to be prosperous, we need to be sure that we are always putting something fresh into the business, in addition to what we cult to explain easily. Mr. Longmay term "renewals." We must always be adding new customers, new subscribers, devising something new to keep our family of patrons both interested, and growing.

Here is where the "business manager" comes in. The casual observer may think him a pretty heavy expense for what he appears to do. He may not be very active, out in the open, as a salesman, or hustler for trade: not even an ornament, nor popular-as this word is often regarded-but the business manager of the essential features of the may be, and often is, the one indispensable men connected with the success of an enterprise.

Initiative-inventive foresightplanning ahead-keeping at the forefront of what is new-anticipating popular demands-are all functions

have not grown or hardened. No leadership is the blight on third-party hopes. Men with leadership in them may hear the singing bugles, but they will sit in their tents. They fear the political "mavericks," malingerers and malcon-tents. They are afraid of the cranks, lunatic-fringers and soreheads. They know how hard it would be to gather and hold the disgruntled, the discontended and the dreamers. Wise in their political generation, they fear being trampled to death by the ghost-dancers and hell-raisers surging into any new Party of Discontent.

Compromise Tax Measure.

The Republicans in the House, made a remarkable record, last week with the Income tax rate bill. The Mellon (regular administration) bill placed by the Garner (Democratic) bill; when along came Mr. Longworth, Republican, with a new bill, on which the Republican insurgents ute both the Mellon and the Garner bills were thrown aside, and the Longworth bill passed and sent to the Senate.

The differences between the three plans have differences in detail diffiworth claims that his substitute is well considered and will raise sufficient revenues, while he charges that the Garner plan would cause a big deficit.

President Coolidge, who was strong for the original Mellon plan, is not disposed to favor the substitute, although it has a Republican label. He is quite likely to make his preferences clear before the bill goes on passage in the Senate.

The following is a brief statement various propositions:

The Longworth Compromise. (Adopted by the House)

BRAVE DEFENSE

Because she had made him wear short socks instead of stockings the clergyman's wife was apprehensive when her small son, Bobby, returned from his first day at public school. When he had gone to kindergarten the boys had made fun of his abbreviated leg covering, and he had cried bitterly after his first school day.

"Did the boys make fun of your socks?" asked his mother anxiously as Bobby swung through the gate. "Tug Johnson did."

"What did my brave boy say?" "I said, 'You got on stockings like your mother wears, and I am wearing socks like my dad !' "

The Central Office Operator

FORTY-EIGHT years ago • the telephone was a toy, thought by many to have no commercial value; today it is an indispensable factor in our daily lives. Day in and day out the flashing of myriads of tiny lamps, the calling signals, on the switchboards continue, and day in and day out the operator must be on the job.

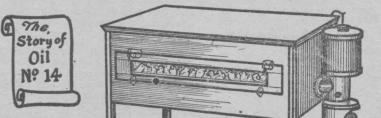

Good telephone service is only possible because the central office operator is intelligent, willing and interested in her work.

A RTIFICIAL INCUBATION of poultry eggs was practiced in Egypt and China centuries ago. The Chinese method was to deposit the eggs in sand at the bottom of wooden boxes, place the boxes on iron plates, and keep them moderately heated until hatching time.

THE American Poulterer's Companion published 1856, contains the following interesting information concerning the development of Incubators : "The incubation of chickens by hot water heat is said to be the invention of M. Bonnemain of Paris. . . A few years since an apparatus was invented by Mr. L. G. Hoffman of Albany, N. Y. It was constructed of tin, with the hatching chamber surrounded with water, heated and kept at a proper temperature by means of a Lamp.

Less than 70 years ago the Incubator as we know it today was a novelty whose practicability was doubted. But now, after great strides forward in construction and heating, Incubators have a definite place in our everyday life. However, the best of Incubators is dependent on the Kerosene you burn in it. Play safe by burning The Red "C" Oil or The White "C" Oil, same except in color; long-burning, giving an absolutely dependable, steady heat, it is the superior Kerosene for Incubators.

LESSON TEXT-I Sam: 15:13-23. GOLDEN TEXT-Behold, to obey is better than sacrifice.-I Sam. 15:22. PRIMARY TOPIC-A King Who Disobeyed God

JUNIOR TOPIC-A King Who Lost His Kingdom. INTERMEDIATE AND SENIOR TOP-

IC-Saul's Successes and Failures. YOUNG PEOPLE AND ADULT TOP-IC-Lessons From Saul's Reign.

In order to properly present this lesson, a survey of chapters 8 to 15 of I Samuel should be made.

I. The People Demand a King (I Sam 8:1-22)

1. Their Reasons (vv. 1-5): (1) Samuel was incapacitated by old age.

(2) The unfaithfulness of his sons whom he had appointed as his successors. Samuel greatly blundered in this, for the office of judge was not hereditary

(3) The desire to be like other nations. Since the surrounding nations had kings as leaders, they wanted a king who would fight their battles.

2. Samuel's Protest (vv. 6-18). He took the matter to the Lord in prayer and the Lord instructed him to solemnly point out to the people the meaning of their action.

(1) The king would make slaves of their daughters and make their sons to serve in his army and do all kinds of hard work on his farms and in his house

(2) He would take their lands, even those inherited from their fathers, and give them to his favorite officers and servants. Not content with that, he would make the tenth part of their produce to give to his maxorites. 3. Protest Disregarded (wvv. 19-20).

Having made up their minds, they deliberately shut their eyes to the truth and madly rushed into the experiment. II. Saul Chosen as King (I Sam.

9-11). 1. The King Rointed Out (9:1-10:16).

Saul was sent to search for his father's asses that had wandered away. While on this errand, Samuel found him and anointed him. Saul and his father were acting freely in this matter, yet at the same time God's purpose was being carried out.

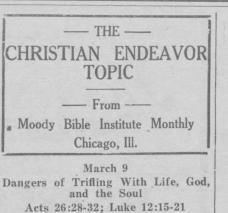

2. The King Chosen at Mizpeh (10:17-27). Saul was chosen because of his fitness. If they would have a king, the Lord gave them the one best fitted for their needs.

4

(1) A fine physique, He was head and shoulders above the rest of the people

(2) Modesty. (3) Self-control. (4) Military instinct.

The method of choice was by lot. When the choice was made, part of the people enthusiastically cried, "God

Seriousness of purpose and soberness of conduct form a great asset in life, notwithstanding the ridicule and jest that may be leveled against these qualities by the frivolous and the foolish. There is nothing incongruous between seriousness of purjoy on the other. When Paul spoke "words of sober-ness and truth" before Festus and

Agrippa, he was accused of being mad by one of the two men, and treated with indifference by the other. In the light of Paul's fervent and masterly presentation of truth, we may truly call both of these men "triflers." They trifled with God and their own souls. One was almost persuaded, but because he loved darkness better than light he turned a deaf ear to the apostle's appeal and trifled with God and conscience. Although acknowledging that Paul was justified in his course of conduct, yet for the sake of present gratification, they both trifled with the things of the fu-ture. In the words of Romans 1:18, they suppressed the truth which they knew through the toleration of unrighteousness practices which they recognized to be wrong. Against all such conduct "the wrath of God is revealed."

The one who is known in Scripture as the rich fool likewise trifled with the things of God and the soul. It is always a fatal mistake to leave God out of the reckoning in any enterprise, any transaction, any event, or any purpose. Until God is found in the revelation of Himself through Christ, the soul of man is poor, very poor: but when He is found as a Saviour, then the riches of goodness and grace are unveiled. These, when seen and appropriated, make the life rich towards God so that it abounds in every good work.

Horses and Calico Always Among the Gifts Exchanged After Ceremonial Visit Is Over.

Horses are always considered among Indians the very finest present that can be given, and following a visit of one tribe to another, as the homeward trek is in progress, each Indian family will have several leading behind, presents from their late hosts. The Poncas, Otoes, Pawnees, Cheyennes and several other of the plains tribes, use a spring wagon and a team with which to travel about the country. and in the warmer months of the year it is not unusual to encounter long strings of these going on a visit to some other tribe.

III. The King Confirmed at Gilgal (I Sam. 11).

Saul took advantage of the great victory over the Ammonites to get all the people to crown him king.

IV. Saul's Failure (I Sam. 15).

This is one of the saddest pictures in all history.

1. The Command to Saul (vv. 1-3) He was commanded to utterly exterminate the Amalekites. The reason assigned was their evil treatment of Israel after they came up out of Egypt (Exod. 17:8; Deut. 25:17).

2. The Disobedience of Saul (vv. 4-9). The commandment was carried out only in part. Agag, the king, was spared, and the best of the goods appropriated.

3. Saul Rejected by God (vv. 10-25). (1) Samuel cried to God (v. 11). The news of this disgraceful affair greatly disturbed Samuel, moving him to cry unto God day and night.

(2) Saul's hypocritical pretense (vv. 15-16). This pretense carried a lie upon its face. Though disturbed by a guilty conscience, he tried to conciliate Samuel, but the very bleating of the sheep and the lowing of the herds betrayed him. He then tried to put the blame upon the people.

(3) Samuel rehearses before Saul God's dealing with him (vv. 17-23). Samuel met his hypocrisy by bringing him to squarely face his sin. God is more concerned in having His subjects render obedience unto His commandment than He is for them to offer unto Him sacrifice.

4. The Judgment Upon Saul (vv. 26-35). For the presumptuous offering of the sacrifice, the dynasty passed from Saul's house, and for this act of flagrant disobedience, the kingdom was rent from him. He confessed his sin and begged Samuel to still honor him before the elders of the people. Samuel forsook him and left him alone to suffer in disgrace.

given the Indian by white persons. It matters not what the other presents may be, there are always many bolts of calico, and these are always gratefully received and appreciated.

It has been the custom of many of the tribes for centuries for the squaws to carry their papooses on their back, with the babies strapped to boards and then placed upright over the women's shoulders. Calico is always wrapped around boards which happen to be about the right length for papoose carriers. In the old days when the traders bartered bolts of calico for pelts the squaws immediately grabbed these boards on which the cloth was bound, for their infants, and this custom is followed to the present day. In fact, the squaws visit the merchants in Ponca City and other towns where the Indians trade, and have all of the boards saved for this particular purpose.

Why Cured Fertilizer Grows Better Crops

Mr. Royster discovered that by aging or curing fertilizer for four to six months he could increase its value as a plant-food. He found that this curing brought about a certain chemical action which prepared the fertilizer for the use of crops and made food elements available at the very time they are needed.

Why Mr. Royster can Cure his Fertilizer

Naturally it requires vast quantities of material in order to anticipate a season's supply, half a year before it is needed. (This half year representing the aging period). It also requires strong financial resources. Thus; - only a company like Royster's can offer this improved type of fertilizer.

William Ohler, Sr., who has been confined to the house for the past three weeks with grip, does not show much improvement.

Attention is called to the excellent letters we are now receiving from our Littlestown correspondent, as they will be of considerable interest to many of our readers.

Mr. and Mrs. J. N. Hoover, John W. Hoover, Marian Hoover, Jessie Newcomer, Thelma Tracey, Reba Hoover, all of York, spent Sunday at the home of Mr. and Mrs. Harvey Stultz.

A preliminary survey is being made of the proposed Taneytown-Littlestown road. Considerable interest is being manifested by some as to whether the new road will commence at the square, or at the corporate limits. This is a matter yet undecided, but it is safe to say that there will be no more street grading done, such as accompanied the laying of the state road on Baltimore and Emmitsburg streets.

While lengthy as a news item, it will be found of interest to many, especially because of the unusual character of the case.

Early Wednesday morning, a large truck loaded with lumber, narrowly escaped upsetting in front of Mrs. J. H. Harman's residence, on Baltimore St., extended, by getting off the ce- at both services. ment road too far, and the ground being soft. Later, the truck was pulled manuel (Baust)-Missionary Society out by Geo. R. Sauble, with one of his large trucks.

In a recent elocutionary contest held under the auspices of the P. O. S. of A., of York County, in the Wells Memorial High School building, in which Grammar and High School students participated, Miss Hilda R. Harner, youngest daughter of Rev. and Mrs. H. O. Harner, carried off first prize, being awarded \$5.00 in gold.

(For the Record.)

Those who spent Sunday with Benjamin Hyser and wife, were: Edward Hyser, wife and children, Mardella, Benjamin, Anna, Leona and Buddy. all of Gettysburg; John Harner and C. Ott. wife, and daughter, Oneida, and Vernon Snyder, all of Frogtown: Steiner Engelbrecht and Miss Ruth Hyser, and Anna Harman and George Benjamin Franklin Harman, all of Taneytown. (For the Record.)

The pupils of the 5th. and 6th. grades of Black's School, rendered a play on Thursday night, Feb. 28, entitled, "Whose Little Bride are you?" Three acts, 21/2 hours, under the supervision of their teacher, Clyde Riffle. The play was a success and showed very careful instruction on the part of the teacher. The proceeds were \$26.00, which will be spent for reading material and phonograph records.

The Frederick News comments editorially, on the practice indulged in, in towns, largely by children, of "cutting across" lawns and grass plots, and severely condemns the practice; to which The Record adds its approval. This stunt is force in Taneytown, and should be prohibited. Usually, property owners have a hard time getting grass to grow, and they do not want it ruined in winter and spring by "Young America."
