

## JUDGE THOMAS DIES SUDDENLY.

Stricken while in his Office last  
Saturday Afternoon.

Chief Judge William H. Thomas, of the Fifth Judicial District, died suddenly, Saturday afternoon, in his office at Westminster. He was stricken shortly after 2 o'clock, and died a few minutes later. Death was due to angina pectoris. His sudden death was a great shock, as he was believed to be in excellent health.

Judge Thomas was widely popular wherever known in the state, having been supported at his recent election by Republicans and Democrats alike. His death is taken as a distinct loss to his wide circle of warm personal friends.

He had served as Associate Judge from 1901 to 1908, and as Chief Judge since 1908, having been re-elected last year for another 15 year term.

The dead judge was in his sixty-third year. He is survived by his widow, Mrs. Katherine Roberts Thomas, a daughter of the late Chas. B. Roberts, at one time Attorney-General of Maryland and a judge of the Fifth Circuit; a son, Dr. Charles Roberts Thomas, of Columbia, Miss.; three daughters, Mrs. Grant Schwartz of Harrisburg; Mrs. William R. Semans, of Baltimore, and Miss Eleanor Thomas, and a brother, Truman Thomas, of Maddox, St. Mary's county.

Judge Thomas was an ardent churchman and a member of the vestry of Ascension Protestant Episcopal Church, Westminster.

The Judge had just returned to his office from luncheon, and was making ready to draw additional jurors for the May term of Court, when stricken with symptoms of acute indigestion, that soon resulted fatally.

After private services at his late home on Willis St., public services were held at Ascension Episcopal Church, at 11 o'clock, Tuesday morning, by Bishop John G. Murray, of Baltimore, followed by interment in Westminster cemetery.

The active pallbearers were Judge Thomas' six cousins, Armstrong, James, Roderick N., Douglas, Edward M. and Henry B. Thomas, Jr.

The honorary pallbearers were Judges John R. Patterson, Hammond Usher, T. Scott Offutt, W. Mitchell Digges and Carroll T. Bond, of the Court of Appeals; Judges William Henry Forsythe and Robert Moss, Jr., associates of the Fifth Judicial Circuit; former Judges James A. C. Bond and John P. Briscoe, of the Court of Appeals; Attorney-General Thomas H. Robinson, Dr. J. M. T. Finney, Dr. William S. Baer, Dr. William A. Fisher and Dr. Henry M. Fitzhugh and Frank A. Furst and Francis Neal Parke.

Other judges, attorneys and court officials present were: Judges Walter L. Dawkins and Charles J. Heusler, of Baltimore, and Judge Glenn H. Worthington, of Frederick; Senator George Arnold Frick, William L. Marbury, Joseph C. France and Alfred Jenkins Shriver, of Baltimore; Jacob Rohrbach and John S. Newman, of Frederick; Senator Stephen A. Gambrill, Joseph L. Donovan, Herbert Mellor, James Clark, N. H. Warfield, Joseph Hunt, Martin Burke and Hart B. Noll, of Ellicott City; James J. and James Lindsay, of Towson; John S. Young, clerk of the Court of Appeals; James Guy Thompson, secretary of the Court of Appeals; John C. Hyde, deputy clerk of the Court of Appeals, and Deputy Clerk Brady, of the Circuit Court for Anna Arundel county.

### Masonic Choir Program.

One of the most delightful musical programs ever presented to a Taneytown audience, was rendered in the Opera House, Wednesday evening, by the Masonic Choir, of Frederick, under the auspices of the High School.

The program consisted of choral selections by the Choir, soprano solos by Miss Dorothy Filler and instrumental solos on the saxophone by Mr. David Hagan.

The large audience present expressed its appreciation of the various numbers, demanding frequent encores, which were generously given.

The proceeds of the concert are to be applied to the High School library fund.

### War on Drunken Drivers.

E. Austin Baughman, State Automobile Commission in an address at Atlantic City, declared war on the reckless speeder and drunken driver, and advocated the taking of drastic measures to reduce the death toll of the automobile juggernaut. He stated that a startling percentage of automobile casualties can be traced to drunken drivers.

What would be the condition of things, should there be saloons in every town, and convenient road houses along our fine state roads?

### Simpson Indorsed by Wets.

E. Ridgely Simpson, one of the Republican candidates for the Congressional nomination in this Second district, was indorsed on Tuesday night, by the Maryland Division of the Association Against the Prohibition Amendment. A resolution adopted declares "He is 100 per-cent wet, and a very active and loyal member of this Association."

### F. NEAL PARKE APPOINTED.

Offered the Chief Judgeship by the Governor.

Governor Ritchie on Wednesday, tendered to F. Neal Parke, of Westminster, Carroll County, the chief judgeship of the Fifth Judicial Circuit, carrying with it membership on the Court of Appeals, made vacant by the death of Judge William H. Thomas.

Mr. Parke is considered an outstanding lawyer of the circuit, and was backed by lawyers of every shade of political opinion. He was in Rockville trying a case when the telegram offering him the place was sent. It is understood that he notified the Governor through a friend that he will accept.

Although he never has held salaried public office, Mr. Parke has a record of service in public affairs and those relating to the legal profession. He was a member of the Budget Commission, which about 10 years ago reorganized the fiscal system of the State.

More recently he was a member of the Reorganization Commission and the State Judiciary Commission.

He was born in Carroll county, January 6, 1871, the son of George M. Parke, who was register of wills, and the grandson of Joseph M. Parke, register of wills and leading lawyer. The new judge was educated at Western Maryland College.

Appointed to West Point in 1889, he remained there until forced out by ill health in 1891. He then read law in the office of the late Judge Thomas, whom he succeeds. Admitted to the bar in 1893, he practiced in the office of his grandfather. He became the partner of Judge James A. C. Bond in 1898, under the present firm name of Bond & Parke—Baltimore American.

### Taneytown Contestants Win.

Miss Ethel Sauble and Norville Shoemaker, representing the Taneytown High School team in the declamation contest, held in the Reformed Church, on Friday night last, were awarded first honors. Miss Sauble's selection was "Mice at play" and Mr. Shoemaker's, "The first Settler's Story." Mr. Airy won second honors. Other teams contesting were from Westminster, Union Bridge, Manchester, Hampstead, Sykesville, Charles Carroll and New Windsor.

The judges were Prof. C. F. Sanders, of Gettysburg College, Miss Pearl Eader, an English teacher, W. M. College, and Miss Lida Lee Tull, principal of Md. State Normal, at Towson. Owing to the excellence of all performances, the judges kept very close tab on all points made, in order to reach a decision.

During the evening a vocal quartet was rendered by Misses Treva Becker, Vada Smith, Hazel Hess and Ethel Sauble, of Taneytown school; a duet by Miss Louise Bankert and Gordon Hesson of Union Bridge school, and a piano duet by Misses Janet Crebs and Margaret Crouse, of Taneytown.

Prof. J. L. Hunsberger, Taneytown, presided, and Superintendent Unger awarded the banner.

### Weather and Crops.

The week ending Tuesday, April 29, was the most favorable of the crop season to date. It was characterized by sunny weather, which was favorable for drying out the soil, for plowing, and for general farming activities. Much plowing was done. Temperature for the week averaged normal. The 23rd. and 26th. were cool, while the other days were mild. Light showers occurred on the 25th. and 28th.

Wheat and rye are in good condition, except poor to fair in lowlands. Grasses are fair. All are improving, but making slow growth. Rye is beginning to head in southern Sussex County, Del. Sowing of oats was general, except in the Alleghany Mountain region. Early sown oats in southern Maryland and on the Eastern Shore are coming up.

Apple tree buds are now showing in Western Maryland, and continue to swell in the other northern-border counties, they are ready to open, or are opening, in central and southern counties. Peach, pear, plum, and cherry trees are in full bloom, except ready to bloom in the Alleghany Mountain region. Strawberries are coming into bloom over the section to the eastward of the Blue Ridge Mountains.

Planting of early potatoes, of peas except in Western Maryland, and of truck crops, made good progress during the week. In some localities planting of early potatoes and peas has been finished. Early potatoes planted in March in the southern counties failed to come up, as a rule, and are rotting or have rotted. Early planted peas in southern counties are up; are looking well, and are making a good stand; to the northward late-planted peas are coming up in some localities.

Tomato seeds are being sown. Early sown tomato and tobacco seeds are up. The season continues fully two weeks behind the normal. Warm and continued sunny weather is needed.

### Glee Clubs Program.

The Ladies' and Men's Glee Clubs, of Blue Ridge College, will give an attractive program, including the Comic Operette, "Peppery Pa," next Tuesday night, May 6, at 8 o'clock, in the College Auditorium. Admission 35c.

## SOLDIER BONUS INFORMATION.

Terms of Bill Now Argeed on in  
Joint Conference.

The Baltimore American says of the Soldier Bonus bill:

"When the President signs this bill—and there is every expectation that he will sign it—each soldier will receive a twenty-year endowment insurance policy, its amount determined by the length of the soldier's service time in uniform, and running as high as \$1400 for home-service men and as high as \$1900 for men who went abroad.

If the soldier dies within twenty years this sum is handed to his dependents. Beginning two years from now he can borrow upon his policy, the loan value increasing annually and amounting up to 60 per cent. of the face value during the last year. Twenty years from now each soldier alive will have the amount of the policy presented to him in cash by the United States Government."

Compensation amounting to \$50.00 or less, is payable in cash.

The Senate and House reached agreement on the Bill, on Wednesday, in a conference report, and the bill will go to the President for signature or veto. As he has heretofore expressed himself as opposed to a bonus at this time, the general belief seems to be that he will not sign the bill, but bonus advocates in both branches seem sure that a veto, if one comes, can be overridden. Chairman Green, of the House Ways and Means Committee, gives the following explanation of the agreement.

"The soldiers' adjusted compensation bill, as agreed to by the conferees, makes the following important changes from the original House bill.

"Female yeomen of the navy and of the Marine Corps and members of the Porto Rican regiment of infantry are included among those entitled to the benefits of the bill.

"Persons who were discharged or otherwise released from the draft for the period of service terminating in such discharge or release and cadet engineers of the Coast Guard are excluded.

"The administration of the act and the payment of any benefits are placed in the Director of the United States Veterans' Bureau instead of being distributed between the Veterans' Bureau and the War and Navy Departments.

"Cash payments to those entitled will be made beginning March 1, 1925. The House bill set nine months after the enactment of the act and the Senate bill fixes July 1 as the time to begin such payments. The adjusted service certificates will be dated January 1 and issued as soon after that date as possible.

"In the matter of loans made upon the certificates, the base rate upon which interest is to be charged is the rate charges at the date of the loan rate charged at the date of the loan paper. The House bill permitted the base rate to be figured from either 30, 60 or 90 day commercial paper, under the provisions of the Federal Reserve act. Several other provisions of the loan feature are broadened so as to leave no doubt as to the intent of Congress in this matter."

### Insurance Man Killed.

John H. Ermold, aged thirty-eight, 2802 Parkwood avenue, well-known Baltimore insurance man, died at 11:30 o'clock, Monday night in Washington County Hospital, at Hagerstown, five hours after he was pinned beneath his automobile, which skidded and rolled down an embankment, as he was returning from Washington to Baltimore.

Mr. Ermold was well known among insurance men in Carroll County, having until recently been head of the rating division of the Baltimore office, and as such visited the various agents of the county, and throughout the state.

### Second Annual Eistedfod.

The second annual Eistedfod, or High School Music contest, will be held in Alumni Hall, Western Maryland College, Westminster, on Friday evening, May 9, at 8 o'clock.

Orchestra, soloists and Glee Clubs will compete for honors. Mr. John Dumes, Music Supervisor for the Baltimore City schools, will act as adjudicator. The following high schools will be represented: Mt. Airy, Sykesville, Westminster, Taneytown, Union Bridge, Pleasant Valley, Charles Carroll, Manchester, Hampstead and New Windsor.

## Some Little Newspapers Need Killing.

The other day, a daily newspaper in commenting on the advent of the Radio, said it might kill some "little newspapers," and so much the better—"they need killing"—but worth while papers would not be hurt.

This is worth telling to those who think their home-town should have a "little newspaper." It is an open statement that ought to cause home folks to see what they are doing when they cut out the home paper.

If the "little newspaper" is wanted; if it is perhaps only a necessary evil; if the home neighborhood would be worse off without it, then it must be kept alive by proper support.

For many years, or since the advent of Rural delivery, "Some little newspapers" have been hard hit by the strenuous efforts of daily newspapers to cover the wider field opened up. The fact that most of these have refused to be killed, must be very objectionable to "worth while" papers; and now, if Radio will help to do it, "so much the better."

No doubt "some little newspapers need killing," just as some big ones deserve the same fate—in the opinion of some. But, lots of people and things do not get what they "need."

An important question may be—who, in each community, are helping the Radio, and the daily newspapers to kill the "little" papers?

### MORE NURSES NEEDED.

Proper Care of the Sick Becoming a  
Serious Question.

The lack of nurses—or of qualified persons to give attention to the sick, whether graduate nurses or not—is one of the serious problems of the present day. There is, as yet, a pretty fair distribution of physicians throughout rural sections, though their number appears to be diminishing, rather than increasing; but the supply of nurses, so essential to care of the sick, is next door to a public calamity.

This is due to the fact, very largely, that rural sections have been drained of surplus help, both male and female. Families, even, do not stay together, at home, but the younger members drift away, quite in contrast to conditions years ago, and cases of only temporary illness often cause serious consequences.

What can be done about it, is a big and important question—one that ought to be met in some practical way. Even when trained nurses can be had, their pay—from \$25.00 to \$35.00 per week—is prohibitive in many cases, and "going to a hospital" has the same very serious objection—the cost.

Looking to the state for help is becoming an over-worked expedient, but it is perhaps true that the state is helping in many directions not half so much demanded for the good of the tax-paying public as a state nurse supply, at reasonable rates, would be. Our state legislature shovels out hundreds of thousands of dollars at each session, to so-called educational institutions, that we believe could be better spent in the care of the sick of the state, unable to care themselves.

There should be a plan devised—if no other way presents itself—by which the state should establish training schools for nurses, through which the needs of the counties can be supplied on the basis of a per week charge reasonable enough to be paid by persons in ordinary circumstances; or free of charge, in absolutely needy cases, with the state paying the necessary remainder in all cases. This would represent a defensible expenditure of tax-payers' money.

Our churches, even, are so intent on christianizing "heathen" nations, that they overlook the best form of missionary effort—the care of the needy and sick at home. As we see it, the need for nurses is a problem for both state and church to exercise greatly more concern about; and this means the need of greater concern on the part of the rank and file among voters, and on the part of the laity. An awakened popular sentiment can bring about the needed relief.

The Record would be glad to publish opinions on this very present public need.

### Increase in Postal Salaries.

If the new postal salary recommendations of the committee are adopted, third and fourth class postmasters, and Rural Carriers, will have their pay increased.

Third class postmasters are listed for a flat increase of \$100, in salary, and a clerk hire allowance ranging from \$240, to \$1600, a year, based on the receipts of the office.

Each Fourth class postmaster would receive 160 percent of the cancellations, instead of 145 percent.

In addition to their flat salary of \$1800 a year rural carriers, the committee decided, should receive an allowance of 4 cents a mile. This, it was estimated, would average about \$300 increase for each carrier. The House and Senate subcommittee which framed the bill recommended an allowance of 3 cents a mile.

### Seed Corn.

F. W. Oldenburg, Agronomy Specialist, University of Maryland and County Agent Fuller are putting on a number of root rot demonstrations in field corn. Root rot is a disease which affects the roots causing them to rot off, allowing the stalk to fall over in a high wind, developing a very immature ear. Indications of root rot are found in the cob around the pith, a ring of discolored tubes around the pith may be pink to dark red, or the pith may be putty yellow green color.

In selling seed corn for a farmer the Specialist and County Agent cut off the tip and butt of the ear with a corn knife and examine it for indications of root rot as explained above. This method has increased the yield the first year on an average of 10 bu. per acre.

Farmers interested can obtain help from the County Agent in selecting his seed corn.

## BIG WIND STORM IN SOUTHERN STATES.

Property Loss \$10,000,000 and  
over 100 Lives are lost.

A tornado that struck South Carolina, Georgia and Alabama, on Tuesday, killed over sixty-three persons and ruined 10 million dollars worth of property. There were a number of tornadoes, but all likely due to one central atmospheric disturbance. Much of the damage done was to valuable timber. A large number of persons were injured.

South Carolina, with a total of 41 known dead, many others reported killed, and more than 100 injured, 78 seriously, was the hardest hit. Incomplete reports from Alabama told of 18 deaths, more than a score of persons injured and some missing, while four are known to have been killed in Georgia and more than a score injured.

Relief measures already have been inaugurated by the Southern division of the American Red Cross.

The storm, its destructive force unparalleled in the history of this section of the country, left a path marked by desolation and wreckage roughly estimated at more than 1000 miles in length.

The latest tabulation of deaths in South Carolina 81, Georgia 13, Alabama 11, North Carolina 5, Louisiana 1 and Arkansas 1.

### Proceedings of the Orphans' Court.

Monday, April 21, 1924—Letters of administration on the estate of Lydia C. Leppo, deceased, were granted unto Joseph A. Leppo, who received order to notify creditors and who returned inventories of money and debts.

Alveta I. Brown, executrix of John C. Brown, deceased, returned inventory personal property.

Herbert J. Petry, administrator of Sarah H. Petry, deceased, settled his first and final account and reported sale of bonds.

Monday, April 28th., 1924—Letters of administration on the estate of Florence E. Gore, deceased, were granted unto Hillary B. Gore, who received warrant to appraise personal property and order to notify creditors.

Harry E. Walters, S. and Guy L. Keefer, administrators of Elias Keefer, deceased, returned inventory of debts and report of sale of personal property.

Francis Neal Parke, administrator of Frank G. Dorsey, deceased, settled his first and final account.

John Milton Reifsnider, Jr., administrator w. a. of John Milton Reifsnider, deceased, returned inventory of debts, money and reported sale of personal property and settled his first and final account.

Emma W. Warner, administratrix of Rebecca C. Richter, deceased, settled her first and final account.

Tuesday, April 29, 1924—Carrie S. Newcomer, administratrix of Jeremiah B. Newcomer, deceased, settled her first and final account.

Letters of administration on the estate of Caroline C. Long, deceased, were granted unto Henry W. Long, who received order to notify creditors and who returned inventories of debts due and current money.

The last will and testament of Dora May Ehlers, deceased, was duly admitted to probate and letters testamentary thereon were granted unto Henry Ehlers, who received order to notify creditors under Chapter 146, Acts 1912.

### Fund for Starving Children.

The condition of the children in Central Europe is moving the hearts of the whole nation to pity and immediate action. In Germany, especially, the situation is most critical.

A recent survey showed that two million under-nourished children are in immediate need of relief. Pneumonia, rickets, scurvy and tuberculosis are making awful ravages among these children.

So serious for the whole of Europe as well as for Germany has the situation become that General Allen has returned to America to direct the campaign to raise several millions of dollars to keep these children from perishing.

At the same time, Dr. Adolf Keller, the most outstanding leader of the Church in Switzerland, has just come to America to plead with the American people to save these children from starvation and death.

So much has his appeal moved the churches that the Federal Council of the Churches of Christ in America has joined General Allen in this great act of Christian charity.

The fund for the starving children has been asked by Dr. Keller to lend its assistance and we cannot forbear. We know the terrible situation from first-hand experience. We want to be able to send Dr. Keller \$25,000, at once to be distributed by the pastors among the unfortunate ones. Will you not help. Does not your heart move you to send something at once?

FREDERICK LYNCH, Treas.

70 Fifth Ave., N. Y.

The revised Federal tax bill now includes an amendment exempting all admissions to places of amusement, where the fee is 50c or less. The bill has not yet been passed, but is likely to contain this item when it does.

### TESTING OF DAIRY COWS.

65,000 Already Tested and Found  
Free from Tuberculosis.

Approximately 65,000 dairy cows in Maryland have been tested and found free from tuberculosis. This announcement was made by James G. George, director of State Live Stock Service. These cows were from herds in every county of the state.

This leaves about 160,000 dairy cows yet to be tested. Mr. George said, "Including beef animals there are now approximately 294,000 cattle in the State."

"Ten percent of all the cows this department has examined," Mr. George said, "are tubercular." On this basis 16,000 of the remaining 160,000 untested dairy cows would prove tubercular on examination.

"To indemnify owners against loss when their cattle are condemned the last Legislature appropriated \$125,000. A condemned cow costs the State about \$21.00. The Government however, puts up an equal sum with the State for the purpose of testing cattle and indemnifying owners of condemned animals."

"With these appropriations and with other circumstances favorable we should be able to test all the cows in the State in three years. We have planned to complete this work and make the State safe from tubercular cows in that time."

### Home Demonstration Agents Itinerary for May.

May 1—Hillsdale, Use of Poultry Products.  
May 2—Taylorsville, Millinery.  
May 3—Union Bridge, Farmers' Club.

May 5—Hampstead, Farm Bureau.  
May 6—Silver Run, The Hair.

May 7—Smallwood, Care of the Baby, Eldersburg—Farm Bureau.

May 8—Winfield, Salads.  
May 12—Sykesville, Jr., Clothing.

May 13—Union Bridge, value of Eggs in Nutrition. Westminster, the Skin.

May 14—Warfieldsburg, use of Poultry Products.

May 15—Tanytown, use of Poultry Products.

May 16—Gist, use of Poultry Products.

May 19—Manchester, Clean Milk Campaign.

May 20—Keysville, Salads. Detour Clean Milk Campaign.

May 21—Pleasant Valley, Salads. Union Bridge—Clean Milk Campaign.

May 22—Sykesville, Sr. Taneytown, Clean Milk Campaign.

May 23—Woodbine, Clean Milk Campaign.

May 26—Sykesville, Clean Milk Campaign.

May 27—Middlerun, The care of the skin. Mt. Airy—Clean Milk campaign.

May 28—Eldersburg, Foodstuffs for health. Westminster—Clean milk campaign.

May 29—Barrett, clean Milk Campaign.

May 30—New Windsor, Clean Milk Campaign.

### More Cows for Carroll.

A carload of cows and heifers were bought by George Leister and County Agent Fuller in the neighborhood of Columbus, Ohio. The Holsteins were bought out of a herd of 1060 head of Holstein and Jerseys. A large farm retailing acidified milk in Columbus. The Guernsey cows were bought from a dairyman. The cows arrived Tuesday morning with George in attendance, bringing two more than were bought. They were on the road two days.

The section of Ohio is quite a contrast to Carroll. The barns are very small and not well equipped but all the cattle were T. B. tested. 90% of the dairymen were using pure bred bulls compared to 15% in Carroll.

The use of pure bred bulls, T. B. testing and raising heifers from good producing cows would bring cattle buyers to Carroll instead of Carroll dairymen going to other states.

### Marriage Licenses.

John E. Harman and Ethel L. Lambert, Taneytown.

Russell L. Lindsay and Carrie G. Cartzenadner, New Windsor.

John George Bobb and Mae McCurrey, Baltimore.

Donald L. Feeser and Mary Smith, Littlestown, Pa.

Harold Myers and Jessie Brinkerhoff, Roselin, Md.

Samuel E. Baublitz and Sadie Brennaman, Spring Grove, Pa.

James Howard Peltzer and Blanche Willella Martin, Hampstead.

Joseph Ellis and Frances Loretta Weaver, Umfongtown, Md.

Charles H. Laughman and Phoebeus N. Feeser, Hanover, Pa.

John Klofke and Evelyn Matilda Bopp, Baltimore.

Frank W. Pittinger and Etta Mary Logue Wisner, Westminster.

The Commissions for the Notary Public and the Justice of the Peace have arrived and are ready for the delivery of the same at any time.

### Presidential Primaries.

## THE CARROLL RECORD

(NON-PARTISAN)  
Published every Friday, at Taneytown,  
Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.  
GEO. H. BIRNIE, Pres. JOHN S. BOWER.  
G. A. ARNOLD, V. Pres. D. J. HESSON.  
JAS. BUFFINGTON. F. B. ENGLAR.  
G. WALTER WILT, Secretary.

TERMS.—Strictly cash in advance. One year, \$1.50; 6 months, \$1.00; 3 months, 50c; single copies, 3c.

The label on paper contains date to which the subscription has been paid. All subscriptions will be discontinued on expiration, according to Governmental orders.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 6th, and 7th pages must be in our Office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

FRIDAY, MAY 2, 1924.

Entered at Taneytown Post-office as Second Class Matter.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

One of the proudest boasts these days, is to "get" Havana, or Oskosh, or Honolulu, over the radio. It's the long distance that counts big in pride of conquest. We are always wanting something beyond our proper reach, even if it is no good after we get it.

Really now, isn't it rather tough on the so-called Republican Congress to be blamed for not enacting more legislation, when there are a lot of members in both branches who merely wear the label, but are not Republicans of the standard variety? And they are touchy, too, when anybody tries to "read them out" of the party.

Not so long ago we had a request to publish an appeal that dogs should be kept shut up, or at least from killing game, out of season. The idea appears to have been that dogs are very bad, when they exercise their animal nature to kill rabbits. We rather agree with this; but, we do not exactly enthuse over the idea that the dogs should be prevented from this sort of killing, in order that men may have more game to kill, later on. It seems to us more natural for dogs, with their lack of human intelligence, to kill game, than for man to do it.

### Partisanship.

We get too little genuine representative legislation on the major questions that come before our legislative bodies, and too much of the influence of partisanship, and of the personal interest that attach to popular elections. This fact has stood out all through the present session of Congress, in such weighty questions as the Soldier Bonus, Federal Taxation, Farmer relief legislation, Immigration, and the oil lease investigations. There is not the slightest doubt that in every one of these questions, the primary object of many of the members of Congress, in their arguments and votes, has been to build up party defenses and to protect their individual political futures. To some extent, of course, members represent their constituents in their votes, but this does not alter the fact that the good of the whole country is subordinated to individual, to party, and to class influences.

Once in a while a Senator or member of the House dares to be strictly independent and broad-minded, but in doing so he is likely to endanger his future political career, and but few have the manliness and strict integrity to do it. Perhaps there is no other way to be expected; it is difficult for a man to assume that he knows better what is best than those who elected him; perhaps the conflict, as we have it, is a necessary inheritance from our plan of self-government; but, accepting all this, the fact still remains that we do not get the ideal government.

Add to this, the trading and so-called log-rolling that prevails in legislative bodies, it is perhaps a wonder that government as a finished product is as decent as it is. Take the Soldier Bonus, for instance. It is a known, openly acknowledged fact, that the individual votes of the service men, stood as a threatening influence back of the votes of the majority of members in both branches of Congress. Legislation for farmers, is in exactly the same class, and so are most of the big questions that come up.

Exact justice in legislation—uninfluenced laws—result only when the interests directly involved are so small as not to make a dangerous noise—so weak that they can be safely ignored. Laws affecting large bodies of labor—organized labor—are produced under political pressure; and we have the same condition, very largely, in the ever-present jockeying over the immigration question.

At the present time, the President is in the position of having to deal

finally with most of these big questions. Some of them have been especially staged to "pass the buck" to him. Members of Congress vote in order to square themselves with the voters back home, then when the President hands down a veto, they can throw up their hands and say—"I did the best I could—place the blame on the President."

Putting the President "in a hole" when a candidate for re-election, or putting a party in a bad light before large bodies of voters just prior to a National election, is a game as old as the country itself. We have antagonistic arguments and adverse votes, for no other reason than to cause public sentiment to segregate against "the administration." It is the old fight of the "outs" against the "ins"—it is plain, common American politics, but it does not represent honesty in government.

### Tax Exemption.

Very properly, we think, there is a demand throughout the country that tax-free bonds be prohibited. There is, in reality, no such thing as a tax-free investment, assuming that the expense of government is financed through the payment of taxes. The public must pay the taxes on tax-free securities and plants. The holder, or owner of them, may escape payment, but whenever the government loses taxes in one channel, they must be made up in another.

There are cases in which tax-exemption is helpful to a town, or community; where exemption acts as an incentive for more industry, or furnishes some needed public benefit, or is partly, or wholly, a non-profit making institution, the general public can afford to pay increased taxes. But such cases are more likely to apply to municipal taxes than to National, State or County.

The escape of taxation is a privilege, either taken or granted, at public expense, and privileges of this sort are wrong.

All of us are in some way or another a public benefit, when engaged in a necessary occupation—in so far as the state is concerned—and only in very special cases should subsidies, or exemptions be granted.

The main essentials in taxation are that taxes should be levied practically on all classes and business, and in an equitable manner; on all classes of business essentially profit-making without specially having relation to the public good. Capital has no right to seek profit by escaping taxation.

### Criticism.

Last week The Frederick Citizen rejected a definition of the word "Criticism" because it differentiated between constructive and destructive criticism; that a criticism merely to create dissatisfaction, without offering any means of correction, is unfair, etc. The Citizen gives its idea of this definition as follows:

"The idea that criticism should go hand-in-hand with a panacea seems to us wholly absurd. Criticism, by virtue of the very fact that it is criticism, is always aimed against something that is supposed to be erroneous, harmful, or wrong; that is to say, against something that, by its nature, supposedly ought not to exist. Its purpose is precisely the purpose of a surgical operation: that is to remove an undesirable condition. If the critic, tearing down a structure of errors, ought to have another structure to take its place, then the surgeon, removing gall stones, ought to have some nice white pebbles to take their place."

We rather incline to accept the main definition by Webster; "A critical observation, judgment or detailed examination and review. The art of judging with knowledge and propriety of the beauties, faults, etc."

This definition evidently means that criticism should be fair and proper; if it is not that, it is merely fault-finding, with a destructive purpose. Certainly, there are both wise and unwise, fair and unfair, critics. In practice, we are apt to criticize that which we dislike, not so much for corrective purposes but to place the thing criticised in a bad light, merely for the sake of doing so.

The surgeon, of course, is not a critic. He is a corrective agent, who removes the gall-stones because of their harmful presence, and for the ultimate good of the patient: he has the sole object in view of removing a fault. Destructive—merely fault-finding—criticisms, do not care for the patient at all, but merely point out his defects.

Attorneys, at times, through their argument and evidence, try to prove their case by the use of unfair criticisms and deductions. Politicians take the same course, caring not so much for improving a condition as for painting a thing or person in black colors for the sake of the effect they may produce on the general public that the thing, or person, criticized is hopelessly bad; hence, the public should have no more of that thing or person, nor of any person or thing therewith connected.

Oh, yes, we do have selfishly di-

rected, purely destructive criticism. There is no pure criticism that has any object behind that of fairness, backed by full-knowledge and good judgment.

### A Disgrace to Maryland.

Senator David G. McIntosh does well to place before the civic organizations of Baltimore the matter of better pay for the members of the General Assembly of Maryland. He is within bounds when he calls this pay a disgrace to the State.

As President of the State Senate and as one experienced in Maryland politics, Senator McIntosh knows that the \$5 per diem is utterly inadequate. He showed that in many cases members had to pay \$6 a day for board alone, not to mention other hardships. Unfortunately, years must elapse before the proper increase can be made, but in the meanwhile the importance of it as a State duty must be kept before the Maryland people. Several years back they voted down an amendment to give their Legislators more money. They must retrieve that mistake.

On the same day Senator McIntosh spoke, a bill was introduced into Congress to increase the pay of members from \$7500 to \$10,000, because the present sum will not pay a Congressman's living expenses. If \$25 a day is inadequate in Washington, surely \$5 a day is not enough in Annapolis; for although Annapolis may be smaller than the National Capital, the cost of living there is on a metropolitan scale.—Balt. News.

### Farmers Drowned in a Sea of Credit.

Of all the farm-relief measures with which the Sixty-eighth Congress has wrestled in committee or on the floors of the House and Senate, most of them have been farm-credit measures. The Coulter bill seeks to further spoon-feed the Northwest with credit. The Norbeck-Burness bill, smashed in the Senate, asked a credit of \$50,000,000. The Norris-Clinclair bill wants \$100,000,000 from the Treasury. The McNary-Haugena bill, a peculiarly vicious proposal, seeks a \$200,000,000 credit for price-fixing and exporting.

Every time farm relief is urged—and for fifteen years it has been constantly urged—the one suggestion seems to be credit and then, more credit. Fifty years ago "greenbackism" was the farm panacea. Then it was that queer blend of waning populism and Bryanism of 1896. Co-operation has been urged in others of the many farm crises just as it is today. But since 1900 or thereabout credit has been the farm fetish.

Everybody has talked farm credits. Long and short time, warehouse and mortgage, livestock and wool, plain, fancy and extra-special farm credits have been the fashion. Credit came to be looked upon as the soothing ointment, the unctuous anodyne and the healing specific of all farm troubles.

Strange to say, it still is, though no man knoweth how much farm credit has been given. Records exist showing that since 1914 the Federal Government has advanced more than \$5,000,000,000. The twelve districts of the Federal Reserve Bank had hardly been established until the rigid rules of banking were broken down to make the farmer a special and extra-privileged borrower, with more time and leeway than other men.

Then, as if to prepare for the dangerous land boom of 1918-19, the farmer got his own Federal Farm Loan System, twelve more banks, through which about 4500 farm-loan associations have been created. Then followed twelve more, the Federal Intermediate Credit Banks, capitalized at \$5,000,000 each, to lend money to farmers for periods of from six months to three years.

Nor are these all. Came also national farm-credit associations, rediscount corporations, joint-stock land banks and farm-loan groups. The War Finance Corporation has been revived. Added to this cloudburst, this tide, this avalanche of farm credit from State and Federal strong boxes—for the States also went into the farm-credit business—came a swarm of private banks and farm-mortgage concerns, all loaning money to the farmer.

The result is a jamboree, and orgy, a wild spree of farm credits, so overextended, so multiplied and pyramided, that little is left in many sections to pledge or mortgage. Land and livestock, clay and loam, hoof and horn, hay rick and corn crib, growing crops and personal character—all and everything are pledged, plastered and chattel-mortgaged. Interest charges gnaw at the farmer as Kansas grasshoppers gnaw the plains country, sap him, as the chinch bug saps his corn and blight him as the green fly blights his wheat.

He had been drowned, choked and dragged under by credit and still more credit. This has forced his taxes up and trebled his interest charges. Now he is beginning to

cry out against credit, the thing that has ruined him: but his panacea peddlers continue to run round in circles and can find nothing wherewith to save him except the thing that has undone, ruined and destroyed him.—Phila. Ledger.

### Men Teachers and Boys.

A school principal is reported as having said it is unfortunate that more men teachers can not be employed in the schools. He has a school with many children whose parents are unnaturalized aliens. He said that the boys from many of these families need a man teacher very much. Apparently in the countries where their families came from, the women may be regarded as inferior, and the boys catch something of this contempt.

This teacher remarked, while the native boys did not seem to object so much to being controlled by women, that they were often more lawless than the children of the aliens. The democracy and sense of freedom of American life goes so far that children are allowed to manage their own affairs entirely.

There is a certain age when most boys have some contempt for woman-kind. Creatures that don't know the baseball rules look like an inferior of beings to them. They get well over that point of view in due time. But at that period of savagery in the lives of these young barbarians, a man teacher is a wholesome force.

Some men will always go into public school teaching because of their love for the profession, or because they use it as a stepping stone to college work or other positions. But to attract more of them into the ordinary run of teaching positions, salaries would have to be raised considerably.

Perhaps more fellows would go into this work if they realized that the men who enter it are regarded with unusual respect and affection. They may not get wealth in money, but they are rich in friendships of the countless young people whom they help to rise in life.—Ellicott City Times.

### Local Pride

will induce you to try Rein-o-la Laying Mash—the good results will keep you a regular feeder of it. It actually does all we claim. Contains high-grade beef scraps—no tankage. Makes all the difference between profit and loss. A trial is convincing.—Reindollar Bros. & Co. 10-26-tf

—Avertisement

### New Fields for Railways

A great enterprise of the early future will be building railways in South America, Asia and Africa. In each of those continents are now vast areas of rich land that can be exploited only when the railways come. In the United States there are on the average 83 miles of railway to every 1,000 square miles. In Europe there are only 62 miles of railway to every 1,000 square miles, in South America only seven, in Asia only four, and in Africa only three.—Youth's Companion.

### Safeguarding the Crossing

One traction company in New Jersey, realizing the danger to the motoring public of grade crossings, has evolved a sign system of warning at each crossing. Suspended across the road and directly above each crossing is a large board with several electric lights. This board bears the following message: "Danger! Look Out for Locomotive! Stop When Lighted!"

### Hall's Catarrh Medicine

will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

Sold by druggists for over 40 years

## Hesson's Department Store

## DISPLAYING

## A Full Line of Merchandise for Spring Household Needs.

### Room Sized Rugs.

In this department we are showing a very attractive assortment of 8.3x10.6, 9x12 and other good sized Rugs of grass, wool fiber, congoileum and tapestry and axminster qualities. We are sure when you once look over our stock of various grades of Rugs, you will have the problem solved about what you will cover that floor with this Spring. A very pretty assortment of the Nationally advertised Gold Seal Congoileum Rugs, suitable for any room always in stock.

### Carpets.

For those who prefer carpet for their rooms, we have on hand a line of every pattern of rag or chain carpets, in the 36 and 27-in. widths at moderate prices.

### Congoileum Rug Border

Just the thing for making the floor around the border of that Rug more attractive by covering the rough floor with a piece of oak colored rug border.

### Linoleum and Congoileum

A very pretty assortment of patterns of 2 yd. wide Congoileum and Linoleum here for you to make your selection.

We are headquarters for that "Best Quality" Gold Seal Congoileum. The kind that makes a very attractive and yet not too expensive floor covering.

Also carry a full line of the better quality 2-yd. wide Linoleums.

### Rubber Stair Pads

A good sized fine quality rubber pad for a very low price.

### Window Shades.

We have on hand a fine assortment of regular sizes, in Window Shades in all the leading colors and quality. For the inexpensive shade we have the water color, mounted on a good spring roller. Also carry a fine assortment of the non-fade oil color shades, mounted on the famous Hartshorn rollers.

When you are thinking of replacing your old Shades, call on us, and let us explain to you the merits of our shades, and our service in this department.

### Dishes.

If it's dishes you need, be assured we have a full line of them. We carry at all times a full line of open stock white, blue Willow ware, and fancy patterns in fine quality china-ware. Also a very nice assortment of 100-piece sets of attractive designs.

### Kitchen Utensils.

Visit our kitchen ware department when in need of anything in the cooking utensil line. If it's Granite, Enamel or Aluminum, you will almost be sure to find here what you want.

### Sheets and Pillow Cases

When in need of these look over our line. We have Sheets in 72x90 and 81x90, of very good quality muslin.

Also a full line of bleached and unbleached Sheetting in all the standard widths.

# POULTRY

## BREEDING CHICKENS FOR EGG PRODUCTION

"Breeding chickens for high egg production is in its infancy," said Prof. L. H. Schwartz of Purdue university recently. "There never was such a big demand as there is now, for males particularly, of known breeding. Large returns are in store for the farmer raising reliable standard bred birds. Selection is the keynote for success in any breeding enterprise."

One essential for successful breeding is to have at least two pens, one for the breeders and the other for the layers. Both males and females should be carefully selected and only the best used for breeding. The practice of using pullets in the breeding pen was condemned, while breeding from birds molting late in September, October and November is recommended.

Late molting birds have proved to be the best birds for breeding high egg production. A bird, in order to be a high producer or a breeder for high production should be full of energy, have plenty of capacity, have a deep body and long and wide back. Males and females should be kept as long as they breed and produce well. The desirable way of introducing new blood is by buying eggs or pullets. The inheritance of high egg production is transmitted through the male, and only high producing hens should be used.

When birds are not too closely related and are carefully selected, well housed and given a well-balanced feed, the improvement of our flocks for egg production will take place.

## Eggs for Hatching Must Be Gathered Carefully

At the time an egg is laid, the germ is smaller than the eye can see and is located within a ring visible on the surface of the yolk. It is very delicate and improper handling of the egg before it is set may kill this germ.

Eggs to be set should be gathered several times daily to prevent chilling or "starting" by a broody hen. The nests should be kept clean, a wire mesh bottom nest which lets the dirt out being best. The eggs should not be washed, as this opens the pores and allows the egg to evaporate. Scrape the dirt off and do not set those which are very dirty.

Keep them at a temperature of from 50 to 60. At 63 they will start to hatch, and if not put under a hen at once will probably die. Do not put them in dusty material or where dust can gather on them, as this will close up the pores and smother the chick later. A basement is much better than a dry room. Do not hold the eggs over seven days before setting—five days is safer.—O. C. Krum, Poultry Specialist, Colorado Agricultural College.

## Whitewash Favored for Cleaning Chicken Coop

Because mites breed so rapidly, the hen house becomes uninhabitable by summer if preventive measures are not taken in the spring. Mites can live for five months without blood, so that closing the poultry house during the summer will not completely starve them out. This explains why they can live through the winter and be ready to breed the next spring. A poultry house can be kept absolutely free from mites. Clean out all the old nests. Clean up all litter on the floor and burn it. Paint the roosts and dropping boards with undiluted commercial liquid k-iller, or with crude petroleum. Apply to the entire length of the roosts, top side and under; also where the roosts join the wall. Repeat in June, and again in August. Spray the entire interior of the coop with disinfectant whenever you clean it. Whitewashing and cleanliness largely prevent poultry disease and the red mite as well.—American Poultry Journal.

## Poultry Hints

Do not breed from mongrels. Keep only one breed.

If the floor is damp the litter should be covered with four to six inches of litter at all times.

The litter on the floor should be kept clean. It should be changed at least every three months. Dirty litter is very unsanitary as well as unsightly.

The nesting material should be cleaned at least once every two months and the nests well sprayed with disinfectant. Mites and disease germs find good resting place in dirty nests.

Broodiness is inherited and can be reduced by not breeding from the hens which are broody more than once in a year.

More and more eggs are being bought on a quality basis. Do not set eggs which are off in shape, color, or texture of shell.

Turkeys need an abundance of fresh, pure water. If they can't get it from the brook, spring or horse trough, keep a bucket full of fresh water in a shady place.

## WHY

### "Wooden Soldiers" Must Be Removed.

The nondescript "wooden soldiers," gracing every crossroad in the country, are to go, the Post Office department at Washington has ruled. They are to be replaced with community mail boxes of a neat design.

The Postal Guide supplement states: "The Post Office department is being pressed to replace these shabby guardians with some trim device which shall not disfigure the country roads. Every city now strives for beauty, declare those who urge the improvement, and the rural districts want to look their best, too. There is little question that 15 or 20 undecorated tin boxes, some on thin posts, some on round posts, some on thick posts, some on short posts and some on long posts, are a blot on the crossroads."

One design submitted is an artistic tiny house on a shapely post, accommodating three mail boxes, which can be built at about the same cost as three separate boxes.

### Why Schools Are Needed

"Do you think it pays to give to a public school?" writes William McAndrew in World's Work.

"My boy, our community has already responded. It is building another school alongside this. My wife and I and our three children will build a third, with an athletic field, a swimming pool, and a farming plant. Why? Because the people want this sort of thing. It has doubled the number of children going to school here. The citizens have organized a bus service to get the youngsters from the farms. The school has become the center of community life. Does it pay? Who was the chap that praised the man who made two blades of grass to grow where one grew before? Our new farm school will tend to that and, besides, our good teachers can count up the proceeds and say 'here are two happy hearts for every one there was before.'"

### Why Philosopher Laughed

Just why Democritus, a Greek philosopher who lived in the time of Socrates, was called the laughing philosopher is not known for certain. His moral philosophy was very stern, and taught the absolute subjection of all passions. Tradition says Democritus put out his own eyes in order not to be diverted from his meditations.

Some ancient writers say that Democritus became so perfect in his teachings that he went around continually with a smile on his face, and hence the title "laughing philosopher." But others give a different reason. They say the inhabitants of Abdera, the Thracian colony where Democritus was born, were noted for their stupidity, and that he was called the "derider," or laughing philosopher, because of the scorn and ridicule he poured on his townsmen for their ignorance. Still others say he received the name from his habit of laughing at the follies of mankind in general.

### How to Make Invisible Ink

Ever want to use a secret ink for writing? If so, the two simplest are milk and lemon juice. Just take a bit of milk or a bit of lemon juice and put it in a clean inkwell.

A clean new pen must also be used, so that no trace of black will appear on the "invisible letter." Dip the pen in the ink often so as to be sure it is writing, and after the letter is finished, do not blot it, as that will absorb some of the invisible ink and the blotted portions will not show up well when it is desired to read the message.

To make either of these invisible inks visible, all that has to be done is to get the paper on which they are used good and warm and they will both show up plainly. Care must be taken when heating the paper not to burn it or scorch it.

### Why Turks Failed

The tradition is that some bakers were working in a cellar one night in the year 1629. One happened to hear a muffled sound of digging. At that time the city was besieged by the Turks under Soliman the Magnificent. Guessing that the enemy were tunneling a way into the city, the bakers gave the alarm. The aroused garrison was able to baffle the enemy. Eventually the Turks were badly defeated. In commemoration of these events, the Vienna bakers thereafter molded their rolls in the shape of a crescent, the sacred emblem of Turkey.

### Why Pacific Is Calmer

The fact that the Pacific ocean is less subject to storms than the Atlantic is due to various reasons. Partly because of its great extent and partly because there is no wide opening to the arctic region, the normal wind circulation is on the whole less modified in the north Pacific than in the Atlantic. The trade winds are generally weaker and less persistent in the Pacific than in the Atlantic and the intervening belt of equatorial calms is greater.

### Why Maine Is Colder

Maine is colder than France on account of the ocean currents. Off the coast of Maine there is a cold current coming from the polar regions and flowing southward. It cools the air and makes the climate colder. Off the coast of France is the Gulf stream. This gives a warmer climate.

## SCHOOL DAYS

## Mother's Cook Book

"If you intend to be happy don't be foolish enough to wait for a just cause."  
"The man who has a thousand friends, has not a friend to spare."

### FOOD FOR THE DAY

A SALAD which is both appetizing and good to look at is:  
Apple and Onion Salad.

Cut into small cubes two cupfuls of good-flavored apple. Peel and slice, then cut into small cubes a mild-flavored Bermuda or Southern onion. Mix well, add a dozen dates cut into bits, serve, with a good-flavored salad dressing on lettuce.

### Vegetable and Broth Soup.

Take the broth from a well-cooked tongue; add to the broth one sliced onion, two sliced potatoes, one each of sliced carrot and turnip. Season well with salt, pepper, kitchen bouquet and a few spoonfuls of strained tomato. Cook slowly for an hour, add a teaspoonful of walnut catsup and serve piping hot. Strain if desired, but the soup with the vegetables is far more economical.

### Pressed Egg.

Chop fine six hard cooked eggs, one green onion and one-half of a green pepper. Mix together with one-half teaspoonful of salt, one tablespoonful of prepared mustard. Place the mixture in a small greased bread pan, press down and add a layer of chopped ham, using one and one-half cupfuls. Finish with the rest of the egg mixture. Pour on two tablespoonfuls of stock to help bind it together and press down well. Keep in the refrigerator until molded well enough to slice. Serve in place of cold meat or as a sandwich filling.

### Cocoa Doughnuts.

Beat two eggs until light, add two-thirds of a cupful of sugar and beat again. Add two tablespoonfuls of melted butter and one cupful of milk. Sift together three cupfuls of flour, three teaspoonfuls of baking powder, two tablespoonfuls of cocoa, one-fourth of a teaspoonful of salt and one teaspoonful of cinnamon. Mix all together, adding flour to roll. Cut into strips and twist slightly. Fry in deep fat, drain, and when cold roll in powdered sugar.

## MEN YOU MAY MARRY

By E. R. PEYSER

Has a man like this proposed to you?

Symptoms: You have seen his broad-shouldered, long-limbed body in khaki shirt and old tweeds, swing to work in the early morning with his faithful lunch box in his hand. He's athletic and a good workman, and the boys take all their quarrels to him. You might have seen his adoring mother's glance and imagine her saying to herself: "He's a good boy," when he kissed her good-by in the morning. He has no use for girls. His ma is his ideal. He even finds her in his lunch box—he kept her tintype in his breast pocket in the trenches.

### IN FACT

His mother is not only in his heart, but in his mind. Prescription for his bride: Study him and him only as his mother did before you. Be careful of your cooking. Be satisfied to sew when he reads all evening.

Love his silences—they are solid and he is sure.

## The Why of Superstitions

By H. IRVING KING

### WINDING

IN SOME parts of the country an inquisitive girl, after getting ready for bed, throws a ball of string on the floor and, winding the loose end round and round her wrist says: "I wind, I wind, my true love to find," asking the color of the unknown's hair and for other details concerning him. In other sections the girl goes out at night and throws a ball of yarn into an empty house, or into a cellar, and, repeating about the same incantation, winds the loose end into a ball. In the first instance the maiden dreams of her future husband; in the second she catches a glimpse of him in the dark house or cellar. Some say that for a surety of success this mode of divination should be practiced on Allhallow-een and the ball of yarn thrown into a barn.

In origin this superstition is akin to the magic doctrine of obstructive knots. We have already seen how all obstructive knots can so tie up a man's physical and mental activities as to prevent their functioning naturally. But it was also believed by those of olden times that knots, when constructed for that purpose, could bind a man and his affections to one desirous of possessing him and them.

This is undoubtedly the origin of the common "love knot," found even on the collar of the "Most Noble Order of the Garter." The obstruction of a knot of this kind is an obstruction to the wandering of the man's fancy—Queen Dido and her sandal-knots, for instance, as cited by Servetus. The winding of a cord or a thread was supposed to have much the same effect as tying it in a knot. Elworthy tells of a "charm" found in a house in Naples which consisted of a lemon stuck full of nails; around the nails a long string was wound many times. Many instances might be cited of the efficacy of winding among the ancients. The maiden of today winding her ball of yarn finds therein the heart of her destined husband—as did her ancestors of dim and distant old.

## The Young Lady Across the Way

The young lady across the way says the new tariff law may make things a little more expensive for American consumers, but we can afford it, and she supposes something simply had to be done to help Europe to her feet again.

# THE CARROLL RECORD

## FRIDAY, MAY 2, 1924.

### CORRESPONDENCE

Latest Items of Local News Furnished  
By Our Regular Staff of Writers

All communications for this department must be signed by the author; nor for publication, but as an evidence that the items contributor are legitimate and correct. Items based on rumor, or such as are likely to give offense, are not wanted. We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Post Mail, west, on W. M. R. R. Thursday morning. Letters mailed on Thursday evening may not reach us in time.

#### MELROSE.

Mrs. Milton Dressler, on the hill, is having a brooder house built, intending to have more chickens in the future.

Two young men, coming down the State Highway on bicycles, tired and weary, stopped at the garage here in town. One of them, in trying to avoid hitting some children on the highway, drew the brakes too suddenly, throwing him from the wheel, bruising him considerably, helped him to induce his mate to sell their wheels to Mr. Sandruck, and take the McMahon bus to Baltimore. Their names and whereabouts are unknown.

There will be a "Spider Web" social at Wentz's School-house, on Saturday evening, May 3, 1924. There will be cake, candies and ice cream for sale. Music will be furnished by "St. David's Orchestra." All are welcome.

Chester M. Geiman has purchased a Fordson tractor.

One of our marketmen bought three crates (ninety dozen) of eggs from one of his customers, that didn't stand the incubator test. They were sent back from Baltimore, and what happened we do not know, but the peaceable, God-fearing people should soon all know what our Saviour said about the Golden Rule, as found in St. Matt. 7:12.

It is with pleasure that we met, in our little town, after a severe winter on the old folks, the familiar face of John Wolz, president of the Mason and Dixon Mining Co., on Saturday last. Among other things he told our correspondent that his sons, when they want to go only a short distance, instead of walking, use a car. The "I. W. W." Society may mean some complicated things, but we may call part of it, "I Won't Walk" Society.

Raymond Strevig recently purchased a Ford coupe.

Marvin Wilson, one of our Wentz's Union Sunday School officers, now living in Hanover, was a pleasant visitor to your correspondent, Sunday last.

#### EMMITSBURG.

The Bazaar held at Mt. St. Mary's College, this week, is being well attended.

Frank Halas, of Chicago, is visiting his brother, Walter Halas. Mrs. Halas and daughter have been here for some time.

John Kump, of near town, is a patient at the Frederick City Hospital, where he is receiving treatment.

William H. Treiver, of Baltimore, has purchased the drug store and property, of Charles J. Rowe and will take possession on Monday. Mr. Rowe is moving to B. P. Ogle's property, formerly the Edgar L. Annan home.

Murphy Beall, has opened a lunch room, where Norman Hoke, formerly operated a grocery store.

It is rumored that we are going to have an Atlantic and Pacific Tea Store in our town.

Mrs. Andrew Annan and daughter, Miss Luella, spent a few days in Baltimore, last week.

Miss Ann Codori entertained at cards, last week.

Earl Green has purchased an Essex sedan.

Mrs. Lucy Galt, has returned home, after spending some time in Lancaster and Washington.

Harry Boyle, of Winchester, Va., visited his parents, Mr. and Mrs. Harry Boyle, this week.

Messrs. Charles Sharrer, James Bishop and Robert Topper, attended a meeting of the postal employees of the county in Frederick Saturday evening.

Arthur Kirby and family, moved from Baltimore to one of J. T. Gelwick's properties.

Mr. and Mrs. Charles Baker were in Baltimore, on Sunday, in their Ford car, when a truck hit them, badly damaging their car so that it could not be driven home. Mrs. Baker was thrown from the car receiving a cut about the head, which required four stitches; also badly bruised. Mr. Baker was uninjured. The truck failed to stop but several officers were standing by and were able to get the license number.

#### MAYBERRY.

Mrs. Rube Myers has returned home after spending several weeks with her son, Charles Myers, in Hanover.

Miss Carrie Hiner is spending some time with Mrs. W. M. Myers and family.

Abram Crushong, son of Ellis Crushong, broke his arm at two places, on Wednesday, at Mayberry school. It was necessary to take him to Gettysburg hospital for an X-Ray.

Prayer-meeting will be at Ellis Crushong's, on Sunday evening, May 4th, at 7:30. All welcome.

#### KEYMAR.

George DeBerry and family, entertained at their home, on Sunday, Mr. and Mrs. George Cameron and daughter, Pauline and son, Raymond, and George Fox, all of Baltimore; Mr. and Mrs. Norman Fox and sons, George and Russell, Mr. and Mrs. Newton Hahn and daughter, Grace; Mr. Chas. Sell and daughters, Thelma and Anna, Rev. R. S. Poffenberger and Frank Bohn.

#### LINWOOD.

Mrs. Samuel Dayhoff spent Sunday with her mother, Mrs. Henry Sittig, of Clear Ridge.

Rev. and Mrs. C. R. Koontz entertained Walter Brandenburg and wife, Sunday.

Claude Etzler, wife and daughter, Jane, were Sunday guests of Charles Etzler's, of Union Bridge.

Mrs. J. W. Messler visited her son, John S. Messler and family, of Union Bridge, on Tuesday.

Miss Mattie Pfoutz, who has been spending some time with friends in Washington, returned home Saturday evening.

John A. Englar and wife, entertained a few friends over the week-end, in honor of their son, Pvt. John A. Englar, Jr., of Washington, D. C.

Calvin Binkley and family spent Sunday afternoon with friends in Johnsville.

Miss Fedelia Gilbert, of Uniontown, was a Sunday visitor in the home of Jesse P. Garner.

Communion services will be held at the church, Sunday, May 18, at 7:30 P. M.

William Stem, who has been quite sick, is able to be out again.

Lee Hines, of Baltimore, was here with his home folks, over Sunday.

#### NORTH EAST CARROLL.

The pageant rendered at St. David's Church, on Sunday night, was enjoyed by all. It was one of the largest crowds that was seen for a long time there. The offering amounted to over \$50.00.

Chester Geiman recently purchased a new Fordson tractor.

Mr. and Mrs. Parker Monath, spent the week-end at the home of Charles Monath and family.

Mr. and Mrs. Marcellus Yost entertained at their home, on Sunday; Mr. and Mrs. Robert Fuhrman, of Fuhrman's Valley, Mr. and Mrs. Samuel Miller, sons Claude and Fred, Spring Grove.

Bruce Ruhlman suffered severe bruises and cuts about his body, when he was thrown from his horse, on Sunday.

Mr. and Mrs. Howard Bowman, entertained at their home, on Sunday; Mr. and Mrs. Granville Leese, of Hokes; Mr. and Mrs. Harry Lippy, Misses Hilda Lippy, Fannie Showers, Florence Wheller, of Greenmount; Mr. Harry Black, daughter, Frances, and Clayton Black, of Manchester.

Edward Yost lost a valuable horse, last week, resulting from a broken leg, being kicked by another horse.

#### UNIONTOWN.

Mrs. Clarence Wolf and daughter, Helena, visited her parents, in York, last week.

George Slonaker had his house newly painted lately; others are wanting the painter's leisure to follow suit.

The play given by the "Beantown Choir," was a success; all had a chance to have a good laugh.

Our visitors have been: Mrs. Annie Babylon, of Frizellburg, at Mrs. Billmyer's; Mrs. Emma Smith, of Hagerstown, at D. M. Englar's; Mr. and Mrs. Joseph Wallace at Samuel Repp's; Mr. and Mrs. Charles Lamb, of Hanover, at Dr. L. Kemp's; Mr. and Mrs. George Slonaker, Harry Cashman and family, of Frizellburg, at Samuel Talbot's; Joseph Ellis, of Philadelphia, Mrs. Neil Roberts, of Lynchburg, Mr. and Mrs. Norman Otto and Eugene, of Washington, at H. H. Weaver's; Rev. Hixon Bowersox and family, of York, Marshal Campbell and family, of Westminster, at Francis Bowersox's.

Rev. J. E. Cumming was called to Baltimore, Saturday, by the illness of his mother. His wife is helping to care for her.

#### DETOUR.

Mr. and Mrs. M. L. Fogle visited in Baltimore, Washington and Virginia, recently.

Mr. and Mrs. J. C. Stambaugh and family, Mr. and Mrs. L. D. Troxell and family, and J. W. Whitmore attended a birthday social at the home of Mr. and Mrs. John Whitmore, near Thurmont, in honor of Mrs. Stambaugh's mother, who was 87 years old, and is very active yet.

Joseph and Amos Crushon, spent Sunday in Hanover.

Mr. and Mrs. Harry Clabaugh and Miss Mabel Bell, of New Midway, Mr. and Mrs. Floyd Wetzel, and Mrs. Thelma Smith, of Thurmont; Mrs. David Wetzel and Miss Edna Wetzel, of Rocky Ridge, called on Mr. and Mrs. D. L. Sharrer, Sunday afternoon.

Mrs. Annie Cowell had the misfortune to run a nail in her foot, and was unable to walk for a few days.

#### UNION BRIDGE.

Prof. Wolf was able to return to school this week.

While working for Scott Clemson, Wednesday, Harvey Cooke suddenly dropped dead.

An elaborate program was rendered at the Parent-Teacher's meeting, on Monday evening.

Hawn Myers, while riding out the state road, Saturday, was struck by a large truck and sustained a broken leg. Later, he was taken to Frederick Hospital.

Mrs. Ruth Ritter had a new metal roof put on her house, this week.

Mrs. John Koler moved from the C. E. Engle residence to Mrs. Walden's property, on Main St.

An 11-ton blast was put off at the Cement Plant, Wednesday evening.

#### A Good Thing - DON'T MISS IT.

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchitis, "flu" and whooping coughs, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds, piles, and skin affections; these valued family medicines for only 5 cents. Don't miss it.

#### LITTLESTOWN.

Donald Feezer, son of Mr. and Mrs. Maurice Feezer of Lombard St., and Miss Mary Smith, daughter of Mrs. Della Smith, of Cemetery Ave., were married last Friday evening, at the Catholic Rectory at Taneytown, by Rev. Quinn. Their attendants were: Mr. and Mrs. Maurice Feezer, of Taneytown.

Mrs. Emma Weikert, of N. Queen St., announced the engagement of her only daughter, Miss Ada J. Weikert to Spurgeon Wolf, of Reisterstown, Md. The wedding will take place this summer. Miss Weikert, was a member of the class of graduates of 1922 at Hood College, Frederick, Md. Mr. Wolf graduated from Gettysburg College in 1923, and is engaged with his father, J. W. Wolf, in business, at Reisterstown, Md.

Mr. and Mrs. LeRoy Crum, Sr., and son, LeRoy, Jr., of Frederick, spent the week-end at the home of Mrs. Crum's brother, Mr. Millard Engle and family, on Patrick St.

Mr. and Mrs. Roy Knouse moved their household goods to Silver Run, where they will make their future home. Mr. Knouse is employed in the office of the A. W. Feezer canning company.

Dr. I. F. McNair returned to his home on Sunday, after being a patient in the Warner Hospital at Gettysburg. He was a victim of grippe. He is very much improved at this writing.

Sylvester Collins, son of Mrs. C. C. Collins, of M. Street, who has been critically ill, for more than a week, is improving very slowly.

Miss Kathryn E. Kratzert, eldest daughter of Mrs. Mary Kratzert (and the late Adam Kratzert), was married to Mr. Roland R. Renn, April 19, 1924, at Spencer, Iowa. Mrs. Renn taught school at Nescopeck, Pa., and Mr. Renn is a teacher at Spencer, in the college, at which city they will reside.

Mrs. Renn and her parents were former residents of this place. It will be recalled that Mr. Kratzert was killed in Hanover about 2 years ago, as a freight of which he was a conductor was shifting cars, being caught between two cars.

Dr. J. R. Riden and family returned to their home in this place, after spending some time in Atlantic City, visiting Mrs. Riden's mother, Mrs. Stevenson and family.

Mrs. Chester A. Spangler, who spent some time with her parents, Mr. and Mrs. Daniel Barnett, of Waynesboro, returned to her home in this place.

Sunday guests at the home of Rev. and Mrs. George H. Epler and family were: Mr. and Mrs. Henry Wonders, of Dillsburg; Mr. and Mrs. Jos. Moyer, of Harrisburg; Mr. and Mrs. Adam Zinn, and son, Wilbur, and Mr. and Mrs. William Bentz, of Shiremanstown.

Mr. and Mrs. John Myers and son, John, Jr., and Mr. and Mrs. George Tervoio, of Baltimore, spent Sunday with Mrs. Myers' parents, Mr. and Mrs. Simpson Shriver and family, N. Queen St.

Mr. and Mrs. Herbert Shriver and daughter, Leona, of Two Taylors, were guests at the same place, on Sunday.

Those who spent Tuesday evening at the home of Mr. and Mrs. Millard Engle were: Mr. and Mrs. Oliver Reaver and daughters, Edith, Rose and Charlotte, and son, Lewis, of near town, and Miss Helen Gephart, of near Bonneville.

Miss Kathryn Allison, of York, and friend, Raymond Baublitz, of Gettysburg, spent Sunday with their friends Clarence and Aileen Byers, E. King St.

Mr. and Mrs. George Schott, of Pennville, former residents of this place, celebrated their 50th. wedding anniversary, Saturday, April 26th. They were married in Baltimore, on April 26th., 1874.

#### CLEAR DALE.

Mr. and Mrs. Milton Bishe delightfully entertained at their home, on Sunday; Mr. and Mrs. William Clouser and son, Mr. and Mrs. Harry Stine and daughters, Pauline, Bernice and Helen, of near Littlestown; Mrs. Walter Lemmon and son, Eugene, Hampton; Mr. and Mrs. Charles Shoemaker and daughter, Helen and son, John, of Black's; William Kuhn and Charles Hawk, of Littlestown; Mr. and Mrs. Lester Shoemaker, Mrs. William Lemmon and children, Wilbur, Ella, Edith and Betty Jane; John Hawk, Grimm Bowers, William Hawk, Franklin Stear and Frank Hawk, of this place.

Mrs. Charles Crouse and sons, spent Sunday with Mr. and Mrs. Wilson Crouse, of Blacks.

Mr. and Mrs. Luther Spangler and daughter, Mary, spent Sunday with Mrs. Spangler's parents, Mr. and Mrs. Joseph Spangler, of Center Mills.

**CONSTIPATION**  
must be avoided, or torpid liver, biliousness, indigestion and gassy pains result.

#### BRIDGEPORT.

Russell Ohler, wife and three sons, were visitors at the home of Mrs. M. A. Baumgardner's, near Keysville, on Sunday.

Clarence Kempher, who has been employed in Baltimore, has returned home to help his father with the farm work.

Miss Larue Miller, of Union Mills, spent a week with her sister, Ethel, and aunt and uncle, Mr. and Mrs. Aaron Veant.

Wm. Naill, wife and children, and sister, Carrie, visited Jacob Null and wife, near Taneytown, on Sunday afternoon.

The following visited at the home of D. A. Stull, on Sunday: Mrs. G. Harner, Thurlow Null and wife, of Harney; Mrs. Agnes Phillips and son, of near Littlestown.

H. W. Baker, wife and daughter, Pauline, spent Sunday with Mark Lovell and wife, near New Windsor.

Preaching Services at Tom's Creek, Sunday, at 10:00 o'clock.

#### NEW WINDSOR.

Chas. Bonsack, of Elgin, Ill., spent a few days in town, this week.

Charles Ecker, of Lansing, Mich., visited his mother, this week.

Roy Dudrow and wife have taken one of the apartments in the Bonsack home.

Miss Margaret Lambert, who has been visiting relatives in Brooklyn, N. Y., has returned home.

George Hoover moved into his new bungalow, on Wednesday.

Elder A. P. Snader made a flying trip to Oak Park, Ill., on Thursday last, returning on Monday.

Mrs. George Shoemaker, of Taneytown, visited her aunt, Mrs. J. R. Galt, this week.

Mr. and Mrs. John G. Snader had a family dinner, on Sunday last.

Paul Buckey and family, visited Hoffman Fuss and wife, on Sunday last.

Joseph Tydings, of Baltimore, is visiting his daughter, Mrs. L. A. Smelser.

#### Hens Will Lay

If you feed them a good high-protein laying mash, Rein-o-la Laying Mash has proved itself to be a big egg producer. Ask us about it.—Reindollar Bros. & Co. 5-2-tf

#### KEYSVILLE.

Mrs. H. C. Harner, son, Ernest Harner, and grand-daughter, Audrey, of Emmitsburg, visited A. N. Forney and wife, on Sunday.

Miss Ella Dutrow, spent Thursday with her parents, at New Midway.

The following were visitors of Jas. Kiser and wife, Sunday: Roscoe Kiser and Osborne Engleman, of Baltimore. Misses Flora and Hazel Hull, of Fountandale, Pa.; William Arnor, of Gettysburg; Carl Haines, wife and daughter, Vivian, of near Emmitsburg and Roy Baumgardner and wife.

Miss Gladys Hahn was the guest of her aunt, Mrs. George Winters, York, Pa., last week.

Charles Harner, wife and son, Richard and George Ohler and wife, of Emmitsburg, spent Sunday at the home of George Cluts.

William A. Naill, of Bridgeport, spent a few days, this week, with his daughter, Mrs. Peter Baumgardner.

William Anders, wife and daughter, Beulah, of near here, Dr. and Mrs. Charles Stultz, Mrs. Joseph Fox and daughter, Mrs. Ada Moore, all of Woodsboro, were visitors at Thomas Fox's, Sunday.

Calvin Hahn, wife and family, attended the funeral of Franklin Hahn, in Baltimore, Wednesday.

The C. E. County Convention will be held in the Lutheran Church, at this place, June 12.

Long-necked People Seldom have Heart Disease.

According to Dr. Liwel, a Barker, emeritus professor of medicine at Johns Hopkins University, Baltimore, "short, stocky, plump, good-natured and sympathetic people have a special tendency to high blood pressure and diseases of the heart."

On the other hand, Dr. Barker told members of the Philadelphia Association for the Prevention and Relief of Heart Disease, a few days ago at their third annual meeting in the College of Physicians, "long-faced, long-necked and long-chested people, who go through the world without regard to others, are relatively free from the disease."

There is a middle-of-the-road way in the use of tobacco, alcohol, coffee and tea, he said. "I am not one of those persons who see no good in a moderate use of stimulants," he declared. "There is little or no harm in the use of tea and coffee, alcohol and tobacco, if it is done with a sense of proportion."

"But the man who smokes ten or fifteen black cigars a day or downs two strong cups of coffee with every meal, or the woman who soaks herself day and night in tea can expect nothing else but a weak heart. It's the abuse, and not the use, that hurts."

Although the actual cause of inflammatory rheumatism has not yet been established, Dr. Barker said the virus had been observed to accompany certain nodules in microscopic examinations of rheumatic conditions. Such rheumatic conditions are in a large part responsible for the many cases of heart disease, particularly in those past middle life, he said. "Fifty-eight percent of the population of forty-five years or more in the United States die from heart disease."

**A Faster Chick Growth**

#### MARRIED

#### ELLIS—WEAVER.

Miss Loretta V. Weaver, youngest daughter of Mr. and Mrs. H. H. Weaver, of Uniontown, Md., and Mr. Joseph Ellis, of Philadelphia, were married at the bride's home, Tuesday April 29, 1924, at 11:00 A. M., by Rev. J. Earl Cummings of the M. P. church. They were attended by the bride's sister and husband, Mr. and Mrs. Norman Otto, of Washington. The bride was gown in grey silk crepe, heavily beaded, and carried an old colonial bouquet of Marechal roses. The groom looked his best in a dark blue suit. The bride's going away suit was dark blue.

After the ceremony a wedding dinner was served, and the happy couple then left in their car for their home in Germantown, Philadelphia, Pa., where their house is already furnished for their use. They have the best wishes of their many friends.

**Synthetic Food Would Put End to Farming**  
Now we know what's to become of the farmer. The word is passed along that J. B. S. Haldane, an English scientist, predicts chemical synthesis of foods within 120 years to a degree that will rate agriculture a luxury, and mankind will be completely urbanized. A hard fate for the agriculturist and a hard living for poets and artists if such there be in that distant day, says the Nation's Business. And what of the gardens filled by suburbanites and commuters? Ill fares the day when no seed catalogue may proclaim man's kinship with the soil.  
Chemistry thou art afoot,  
Take thou what course thou wilt.  
But invitation to choice is only empty fealty to courtesy when meals hold a single course. If the doctor had his crystal in good kelter the folk who are up and about when this forecast falls due may as well take their calories from a needle. And who is to take old Judge Palate's place? "Dame Science," you say? Well, well, so it goes, so it goes. Poor old fellow, he made mistakes, but no one can hope to please all tastes.

**Hydromotor Bicycle**  
A motor bicycle which can run on land or water, designed by an Italian, has been tried out successfully. It is equipped with pontoons which keep it afloat and with a rudder which is controlled from the handlebars. The pontoons are filled with air similar to the life-saving crafts used at the beaches, so that they cannot be submerged. The bicycle is equipped with a small engine of two horsepower, but the designer is developing one of higher power.

## SPECIAL NOTICES

SMALL ADVERTISEMENTS will be inserted under this heading at One Cent a word, each week, counting name and address of advertiser—two initials, or a date, counted as one word. Minimum charge, 15 cents.

REAL ESTATE for sale, Two Cents each word. Minimum charge, 25 cents. APPLY AT RECORD OFFICE ads not accepted—but will receive sealed replies. No personal information given.

THIS COLUMN is specially for Wants, Lost, Found, Short Announcements, Personal Property for sale, etc. ALL NOTICES in this column must be uniform in style.

I SPECIALIZE in White Wyandottes. The breed that combines beauty, size and quality. I offer selected eggs only, from 7-lb. fowls and 10-lb. males, at only 75c per setting; \$4.75 per 100. If you cannot call, just drop a card, and say how many you want.—J. Raymond Zent, Key-mar, Md. 3-14-1f

FOR SALE—Desirable Brick House in New Windsor. All modern conveniences. Apply to—E. Ray Englar, Helen Englar, Vivian Barnes, New Windsor, Md. Phone N. W. 1-R. 3-7-1f

## Freak Bluegill Knew the Way to Her Nest

The uncanny ability of carrier pigeons to find their way back to the home loft is well known. Dogs, too, have been known to travel great distances to reach the old home from which they have been separated. And now we learn that fish also have a sense of direction.

Douglas Harrison of Wichita, Kans., recently informed the American Game Protective association of an interesting occurrence. He was fly-fishing for bass when he noticed near the shore of the lake a most peculiar bluegill fanning her nest. Mr. Harrison put on a small fly and after several attempts hooked the fish, which he wanted merely to examine.

He found that it had no tail; its body had been cut off close behind the dorsal fin, undoubtedly when the fish was very small. Nature had made amends for the accident by providing abnormal growth in the dorsal fin, which extended back behind the fish and acted as a rudder.

The appearance of the fish was so remarkable that Mr. Harrison dropped it into his "live box" in the boat and took it back with him to the clubhouse more than a mile away. There other members of the club came down to the dock and viewed the freak. After all had satisfied their curiosity the fish was tossed back into the water.

That afternoon while Mr. Harrison was walking up the bank of the lake, fly-fishing from the shore, he was greatly astonished, on reaching the spot where he had caught the freak bluegill in the morning, to see her again peacefully fanning over her nest.—New York Times.

### She Was an Expert

"Julia, do you know what love is?" The lovesick man put the question in an intense voice.

"Yes," replied the fair maid, firmly. "But do you really know?" he asked again. "Have you ever been the object of a love undying as the sun, as all-pervading as the air, as wonderful and sparkling as the stars? Have you ever loved and been loved like that, Julia?"

In an agony of suspense he waited for her reply.

"Have I?" she presently murmured, staring thoughtfully into the glowing fire. "If you will come up into our box-room I can show you a trunk full of letters and three albums full of photographs, and in my jewel case are several engagement rings."—Philadelphia Inquirer.

### E'g Supply of Admirals

Much prestige attaches to high positions in France and there is much comment on a peculiar situation that has developed under the reduction of naval armament. France having seven first-class battleships, but eighty-six admirals and rear admirals on the active list for duty. The only situation like it is in Mexico, says the Ohio State Journal, where in the present rebellion six generals were assigned to a command of seven hundred soldiers, a reserve force that was moving toward the battle ground, but France hopes to work her way out of her situation with no loss of dignity.

### Furriner, Probably

A traveler in the Northwest eyed his seatmate for a while and then asked where he was from. "Saskatchewan." "What's that, podner?" "Saskatchewan."

The interlocutor pondered over this for a while and then suggested: "You no spik Inglis?"

We have no Agent. Simply phone or write. Gremer, Florist. 219-227 E. Walnut St., Hanover, Penna. 2-28-6mo.

## Viola Dana

This popular "movie" star has hosts of friends among the people who like moving pictures. Viola Flugrath is her real name. She is only twenty-two years old. Shirley Mason of the "movies" is her sister, as also is Edna. The sisters were on the stage continuously during their childhood. Viola has been in pictures since she was eleven years old. She was born in Brooklyn.

## Have You This Habit?

By Margaret Morison

### PSYCHE JONES

THE first sign of superstition in Psyche Jones was years ago before it had become fastened upon her. Just before a dinner party at her house, a guest failed. The place was removed and everybody sat down. Then came coffee and finger bowls, and in the natural course of such events the party should have gone on to the drawing room. But Psyche did not move. They sat and sat. They began to grow restless as the hour grew later, but their hostess talked on, her eyes bright and feverish. At last a telephone call came for one of the guests, and the spell was broken. Later Psyche explained in confidence, after sitting down she discovered that there were thirteen of them; Psyche knew the fate hanging over the first one to leave; she was no heroine, she confessed it; and if that message had not called away her unconscious victim they would have been sitting there yet!

After that Psyche's habit began to grow. She built a new house in the country, and visitors began to tell strange tales. One visitor had been surprised to find no mirror in her room. Of course mirrors were eliminated lest one be broken. Another told of her first meal at Psyche's. As soup was served and she put down her spoon, she wondered if her expression were as disappointed as the expressions of the other guests.

"I hope you like cooking without salt," said Psyche suddenly. "I am superstitious, you see, about spilling salt."

So it went. When there was pie for dessert, Psyche explained that every person at the table was being given a piece with the point directed toward him.

"I never saw," said she, "why such things should be left to chance."

In spite of Psyche's care, however, her guests did not find that many of them received letters the following morning.

The climax of Psyche's habit came when her horse ran away with her one day right across a funeral procession. Out of sheer fright she took to her bed. For a year she stayed there. A week before the year was up she made final arrangements for her demise. The fatal hour arrived. But Psyche did not die. And so the spell was snapped. It had taken a whole year under the shadow of a horrible dread to break the habit of superstition to which Psyche had become a slave.

HAVE YOU THIS HABIT?

### Points Out Efficiency of City Manager Plan

When politics becomes oppressive, institute city manager government.

That is the suggestion put forth in Kansas City by W. S. Ferguson, director of public service for Cleveland, now under the city manager form of government. Mr. Ferguson is on a short vacation.

Civic affairs have been freed of political chains and men who have been successful in business are at the helm, Mr. Ferguson declared.

The nucleus of the government is W. R. Hopkins, city manager, and five department directors besides Mr. Ferguson.

Mr. Ferguson, who is an architect and engineer, never has been in politics, and Mr. Hopkins forgot big commercial ventures when the council selected him for the city's head.

The council also elected a mayor. He receives \$2,500 a year, the manager \$25,000 and the department heads \$7,500. Cleveland is the largest city with city manager government, Mr. Ferguson said.

"Mr. Hopkins and his directors have obtained the co-operation of the council of twenty-six elected members and of the people because we are not interested in politics," Mr. Ferguson said. "City officials are giving Cleveland more service because they choose workers according to ability rather than political qualifications. Of course, you can't cut out politics entirely in a city where it has reigned for years."

Mr. Ferguson told of Cleveland's garbage reducing plant, where 850 tons were being handled a day at no loss. The process is one of reduction to grease, fertilizer and gasoline, which are sold. Plans have been completed for a new \$1,000,000 plant, which will be erected within a year and is expected to produce revenue.

"The best plan of garbage disposal," Mr. Ferguson said, "is for the city to dispose of its own garbage in a plant properly equipped and managed. Proper management is the first essential and that it what appeals to Cleveland."—Kansas City Star.

### Failure to Vote Harmful

One of the recognized difficulties in this country is to get all the "good" citizens to go to the polls. It has been established that very large numbers of potential voters fail in each election to go to the polls.

Doctor Tigert, in his address before the American National council in New York made the following significant statement in this connection: "I doubt if a weak or undesirable public official has ever been elected by a larger majority than the number of good citizens who failed to vote in the election. I agree with the statement I heard a public speaker make the other day, when he said that he had ten times as much respect for the man who voted ten times as he did for the man who did not vote at all."

Instances were cited by Doctor Mann where grafting politicians were able to continue in power because only 87 per cent of the voters turned out to take part in an election. These same grafting politicians were cast out, he said, when only 85 per cent of the voters went to the polls after conditions had become such that they were goaded into fulfilling their duty as citizens.

### Fan Helps Burn Coal

Fuel experts for several years past have been preaching the use of smaller sizes of anthracite coal such as pea and buckwheat, for household use. They state that these sizes of coal have nearly the same amount of heat producing units per ton as the larger sizes and point out that they are materially lower in price. Some people find that the smaller coal burns admirably in their furnaces except on occasional heavy damp days. Then, a furnace stoked with small-sized coal simply will not burn brightly enough to produce the desired heat. On such days an electric fan will come to the rescue. Open the ash-pit door, set the electric fan directly in front of it. Then connect it to one of the convenience outlets in the cellar and turn on the fan. With the added draft provided by the fan the small-sized coal will burn just as if the weather conditions were normal.

### Town Has Only One Pupil

Sharon, N. H., supports a school for only one pupil. It has, in fact, only one child of school age. The place's state school tax consequently is only \$2 a year. The community was a thriving settlement fifty years ago with 50 population, but today only twenty live within the limits of the town, which is steadily vanishing.

### First Rubber Pavement

What is believed to be the first rubber pavement in the United States has been laid on a railroad crossing in Racine, Wis. The section of rubber paving will have a severe trial as this crossing is used by thousands of automobiles and heavy motor trucks each day. A similar pavement in Princess street, Edinburgh, has been used for more than twenty years, yet it has lost only a fraction of an inch in thickness during this period.

### Taxicab Driver Proves Chivalry Is Not Dead

"Don't offer me money, lady—it's so long since I have been a hero," said a taxicab driver, proving thereby that chivalry has not died.

The girl was dressed to impress a possible employer—that is, in her best. She had been job-hunting, and a sudden rainstorm left her marooned in an office building on a Fifth avenue corner. Taxis of all colors, all of them comfortably filled, went skidding past, and for half an hour the girl watched them greedily. Finally an empty cab came along. She dashed for it and jumped in without a word of warning, says the New York Sun and Globe.

"Get up; get up, miss," said the driver, beginning to look frightened. "I've gotta take this cab around to the garage."

"I can't get up," said the girl.

"You'll hafta get up," said the driver sternly. "I can't stay here all night—that cop is telling me to move on now."

"Now, man to man," said the girl, looking at him out of black-fringed Irish eyes, "do you want me to get this hat wet?"

He looked at the eyes and then at the hat. It was a pink silk hat, and, like the clouds, it had a silver lining.

"No miss, I don't," he answered. "Tell you what I can do—I'll take you as far as I'm going and get you another cab there."

Without even throwing the meter he drove off and did not swerve until they reached the taxi barn.

### Quintana Roo Better Than Its Name Sounds

Quintana Roo left a bad taste in the mouths of Mexicans in the days of Porfirio Diaz because it was principally known as the place to which political offenders and "bad Indians," mainly from Sonora, were sent to do time and die in its unhealthy climate. But now comes a report telling of the vast natural resources of this practically unknown territory of 18,000 square miles, comprising the eastern part of the peninsula of Yucatan and extending about 800 miles north and south. Data brought to United States Consul O. Gaylord Marsh at Progreso by prospectors, chicle gatherers and archeologists show that Quintana Roo has several ranges of hills, about nine lakes and several short rivers. The western part is said to contain wide rolling pampas, the interior is rich in valuable tropical woods and the coast abounds in fish. The soil is reported good for all sorts of tropical and semi-tropical vegetables and fruits.

Of the some 9,000 inhabitants of the territory, 2,500 live in Santa Cruz de Bravo, the capital. Transportation to the interior is lacking, but the recent arrival of an American caterpillar tractor has given the more enterprising coast residents visions of a speedy development.

### Life in a Dead Hand

The dead hand is often a busy little mitt in these days of speedy finance. It works a full 24 hours in the day and brings results. We refer to mortmain in a broad sense as signifying funds functioning "on their own," as it were, without the disturbing influence of human timidities and eccentricities.

As the case in point there was the A. Barton Hepburn estate of something over \$7,000,000 which, because of the intricacies of its settlement, remained for a few months in process of liquidation, says the New Orleans Times-Picayune. Mr. Hepburn died January 25, 1922, at which time the property was carefully appraised at \$7,440,587. Recently an accounting of the executors was approved by the court, showing that since the decedent's passing the increment to his estate has been \$1,738,945.

At the present time most of the estate has been distributed, but there are still possibilities of further gains by a kind of retroactivity of the power of money. The proverbial green bay tree has nothing on funds that are wisely placed, in wise control, by those who, realizing their end is near, wish to make wisest provision for their heirs.

### Mountain Has 20,000 Deer

Despite the isolated and inaccessible character of Kaibab plateau of northern Arizona, it is one of the most beautiful in the United States, and it is in fact a mountain with 20,000 deer.

Nowhere else in the United States can the same number of deer be found in an equal area, says the Detroit News.

The game preserve is thirty-five to forty-five miles in extent, and the deer are free to roam throughout this immense territory. Its isolation has helped the government to keep the hunters away. When the preserve was established in 1906 it was estimated that the area contained about 3,000 deer. An estimate made by representatives of the United States biological survey and forest service in 1923, after an extensive survey of the area, places the present number at 20,000.

This high, flat-topped mountain, sometimes called Buckskin mountain, but better known as Kaibab mountain, flanks the Grand canyon on the north.

### Egyptian Flag Changed

The familiar red and white colors of the Egyptian flag have disappeared. By edict of the king the symbolic white crescent and three stars remain, but green has been substituted for the red background. Green is the color entitled to be worn by those who have accomplished the pilgrimage to Mecca.

### Glastonbury Thorn Was Staff of St. Joseph

The beautiful story of the Glastonbury thorn begins in the dawn of Christianity with Joseph of Arimathea, one of the devoted band of disciples sent forth to carry the gospel to the ends of the earth.

St. Joseph was accompanied by twelve others, and the little company of zealots pursued their weary way to the west of England, to the ancient Isle of Avalon, says the Detroit News. When Joseph and his companions, footsore, hungry and weary, one day at twilight came to a hill southwest of Glastonbury and saw a fairland valley beneath wrapped around by the silver ribbon of the Brent river, they knew their wanderings were over and that there they should raise a citadel of faith to their risen Lord.

Deep into the earth Joseph struck the staff that had given him such good service on the long march, as a token that his work should take root there and flourish. This thorn staff was a cutting from the very Palestinian thorn tree, according to tradition, from which thirty years before had been stripped branches and pointed leaves to make the crown of mockery worn by the Man of Sorrows on the cross.

The staff so impulsively planted took root, according to the legend, and blossomed, strangely enough at Christmas, as well as in the summer time, at the same time bearing ripe fruit. It was said that Joseph also brought with him to Glastonbury the holy cup, known as the holy grail.

### Experienced Actors Need Good Director

The young and inexperienced actor does not need direction half as much as the leading man no longer in the first, second or even third flush of giddy youth who has been in the habit of browbeating the humble author and the obsequious stage manager, and who brings to his work in addition to an inability to learn his lines, all the old bad tricks of barnstorming days and the determination to keep to the middle of the stage even if, like the boy who stood on the burning deck, he has killed the play stone dead.

The modern star, of course, stands in need of elementary teaching with every part that she essays. Otherwise the electric bulbs that blazen her name over the entrance of the theater pop, one after another, blackening the lives of manager, author, company, stage hands and all the other people who hang about the theater for their daily bread.—Cosmo Hamilton in the Saturday Evening Post.

### Burns

It is not the men of letters who have handled Burns with the surest touch. Men to whom letters mean little or nothing are quicker to understand him. The fact is that Burns is everyman. . . . This wonderful instinct for truth and frankness is the secret of his genius and of his style. Perhaps it is the secret of all great style. . . . No sermon worth so much as a tallow dip has ever been preached on the life of Burns, but the mere story of his life is an enthralling drama. . . . It is true that at Ellisland and Dumfries he wrote not a few of his finest songs, and that "Tam o' Shanter," in many ways the strongest and maturest of all his works, belongs to his closing years. . . . In "Tam o' Shanter," especially, he surpasses himself; no masterpiece of narrative so concise, so various, so telling, is to be found even in Chaucer. Is it not a strange thing that the king of poetic story-tellers told only one story?—Sir Walter Raleigh.

### The Sisters

'Twixt Minnie Mumm and Maxie Mumm much difference there be. When Minnie Mumm was forty-five, Maxie was sixty-three.

Yet stranger things than this we knew—that year we kept full score: When Minnie Mumm was twenty-nine, Maxie was ninety-four!

When these two maidens went to work disparity was seen. While Minnie Mumm put in five hours, our Maxie toiled thirteen.

But when they came to draw their pay perhaps they made it straight. Our Minnie Mumm pinched fourteen bucks—Maxie banked forty-eight.

So from the cradle to the grave the girls showed variant skins. They seemed so dreadful far apart—and yet, b'gee! were twins.—Los Angeles Times.

### Hair Woven Into Cloth

To demonstrate the value of its beautiful white coat as raw material for weaving cloth, a Samoyed dog, a species best known in the Arctic circle, was exhibited at a lecture of the Royal Society of Arts in London. The hair used is from the combings—the undercoat that comes naturally twice a year. It was said that the commercial possibilities of garments made from this product have been proved.—Popular Mechanics Magazine.

### More Action

Planist—If you want to make that song successful you must sing louder. Vocalist—I am singing as loud as I can. What more can I do?

Planist—Be more enthusiastic. Open your mouth and throw yourself into it!

### Force of Habit

Employer—This won't do. Every time you see a six you call it a three.

Clerk—I'm very sorry, it's mere force of habit, sir. I used to work in a ladies' shoe shop.—Passing Show.

### Desk of Washington's Sister Is Home Again

After more than 140 years of wandering, the desk at which Betty Washington Lewis, sister of George Washington, sat and penned the courteous epistles of her day has come back to her old home, Kenmore, Fredericksburg, Va. For more than a year the women who have been struggling to save Kenmore as one of the historic shrines in America, have been sending out literature, describing the purpose of the Kenmore association, to the various D. A. R. chapters, says the Detroit News. One of these appeals reached the regent of the Old Trails chapter in Minneapolis, Minn., who communicated with the registrar of the Washington-Lewis chapter at Fredericksburg, telling of the old desk.

After leaving Kenmore the mahogany desk first found a home with a son of Colonel Lewis at Marmion, one of the best-known of the colonial places in Virginia. Next it went to Alexandria, then to Washington, D. C., from there passing to New York city. Finally it found a place among the possessions of Mrs. Maurice Ainsworth of Minneapolis, who kept it until she knew that it would be restored to its rightful surroundings.

### Digging Machine That Uses Compressed Air

An unusual digging machine that combines the processes of shoveling and loading is finding its way into hundreds of mining and construction jobs. It is operated and driven entirely by compressed air.

The speed of the loading can be controlled so as to throw the material to the farther end of a long car, or merely to drop it into a short one.

The mechanical shovel will dump its load into the center of the car from any position, even extreme right or left, it is claimed.

Compressed-air power is applied through direct-thrust cylinders. Three control levers successively crowd, dig and dump the shovel.

The two middle cylinders, acting as one, which do the main digging, are provided with cataract oil escapement plunger pistons. This arrangement is declared to give a steady and controlled but fast movement, from the first of crowding to the last of dumping, permitting no building up of pressure and consequent jumping, or throwing out of the load.—Popular Mechanics Magazine.

### New Mint Plant for America

In Mentha citrata, a plant belonging to the mint family, the United States Department of Agriculture believes it has introduced a new crop which, under suitable conditions, may bring an acreage return equal to that now obtained from other cultivated mints. During the past year the crop was grown at Arlington farm, near Washington, on a scale large enough to give definite indications of its possibilities. The yield of oil from the plant when distilled was at the rate of 80 pounds to the acre. The oil itself is very fragrant and when fractionated yields 50 per cent of linyl acetate, a compound extensively used by manufacturing perfumers.

### Huge Output of Pig Iron

The output of pig iron in the United States in 1923 was nearly 40,000,000 tons, an amount that surpasses even the war-time production of 1916; yet the exports of steel and iron were much lower than they were in 1913, and the lowest in the history of the industry in America if compared with the quantity produced. How long will it take American blast furnaces, keyed up to war-time pitch, to supply the demands of home consumption? Or has home consumption so increased that it can keep this great industry going at its present gait?—Youth's Companion.

### Plans Hothouse for Humans

Human hothouse plants will be more than a figure of speech if a Chicago engineer can carry out a project that he is urging. He wants to build in some city a residential section perhaps half a mile square, put a glass roof over it and have one central heating plant for it. He promises to produce an Hawaiian climate all the year round, roses in winter, no rain on wash days, and other alluring advantages. He thinks that the cost of the superstructure would be offset by the lower cost of building inside the enclosure and by the lessened expenditures for heat.—Youth's Companion.

### Clerk Sought to Please

Father, accompanied by his little flock, walked into a beach hotel and sought speech with the clerk.

"Can you arrange for accommodations?"

"House very full, sir. Best we can give you is a telephone booth."

"Don't spring that old gag on me. My wife and two daughters can't live in a telephone booth."

"Oh, as to that, we can give you four booths and will also insert a paragraph in the society papers to the effect that you have engaged a suite."

### The Materialist

Old Sinner—Good morning, parson, had only a small congregation last night, I believe.

Young Clergyman—Small congregation, yes. But ah, the church was filled with angels and archangels.

Old Sinner—Maybe, parson, maybe; but they never seem to notice the collection plate.—Boston Transcript.

## Fields that Feed Us Are Plowed One Furrow at a Time.

When one sees the farmer and his faithful team plowing, little does he realize the food which feeds the world, is grown in fields that are turned over one furrow at a time.

The saving of One Dollar at a time with the regularity the farmer turns his furrows will start a money supply, which will feed opportunities' demand for cash.

## Lesson for May 4

### ASSYRIAN EXILE OF ISRAEL

LESSON TEXT—II Kings 17:1-18.  
GOLDEN TEXT—"I will delight myself in Thy statutes: I will not forget Thy word."—Ps. 119:16.

PRIMARY TOPIC—How a Little Girl Helped a Great Soldier.  
JUNIOR TOPIC—Israel Driven Into Exile.

INTERMEDIATE AND SENIOR TOPIC—A Nation Punished for Its Sins.  
YOUNG PEOPLE AND ADULT TOPIC—Lessons From Israel's Downfall.

#### I. Israel Taken Into Captivity (vv. 1-6).

This was in fulfillment of that which Amos had predicted in the days of Jeroboam II at a time when the nation was at the height of its prosperity. The northern kingdom was ruled by nineteen kings, all of whom were wicked. Their wickedness was not because of lack of information or opportunity but in spite of it. God promised the first king His blessing if he would be loyal to Him. Jeroboam departed from God and the apostasy thus begun continued downward to the end. In the reign of Hoshea, the last king, the king of Assyria came and besieged Samaria and carried the children of Israel captive to Assyria, from which they never returned.

#### II. The Sins Which Caused Their Doom (vv. 7-18).

1. Conformed to the Ways of the Heathen (vv. 7-9). God had commanded them not to follow in the ways of the heathen, but these Israelites, instead of maintaining lives of separation, secretly did that which was displeasing to God. Secret sins, as surely as open sins, bring ruin, for all things are naked and open to Him with whom we have to do. The One who visits judgment upon the sinner knows all things.

2. Serve Idols (vv. 10-17). They not only compromised by "walking in the statutes of the heathen," but worshiped their gods. It was a short step from following in the statutes of the heathen to worshipping their gods. Before they worshiped idols they cast off the true God. Indeed idolatry came into the world because the race did not wish to retain God in its affections (Romans 1:21-23). Idolatry did not come in through ignorance but through willful perverseness. People today worshipping false gods have first cast off the authority of the living God. Man is a religious being. When he ceases to worship the true God he worships other gods.

3. They Were Rebellious (vv. 13-15). God by His prophets has said unto them, "Turn ye from your evil ways, and keep my commandments," but they stubbornly refused His testimony, even rejected His statutes. God in love tried to save them. He sent some of the noblest and best prophets who ever spoke to men to persuade them to turn from their sins, such as Elijah and Elisha, but they stiffened their necks and plunged deeper into wickedness. This they did in defiance of God.

4. Caused Their Sons and Daughters to Pass Through Fire (v. 17). This was the dreadful Molech worship, the most cruel rite of heathen worship. It was done by kindling a fire in a hollow metal image until its arms were red hot and placing live children therein to be burned to death. This was the depth to which the Israelites had sunk.

5. Resorted to Magical Practices (v. 17). When faith in the true God wanes men always turn to the magical arts. In this way the Israelites sold themselves to evil in the sight of the Lord and provoked Him to anger.

#### III. The Judgment Falls (v. 18).

At this stage of the drama the curtain dropped. God could not be inactive longer.

1. God Was Very Angry. His anger is not raving fury but the revulsion of His holy nature against sin. God cannot tolerate sin in His presence. His wrath must strike. Though He waits long, the debt must be paid and that always with compound interest. There is only one way to escape God's wrath; that is to turn from sin unto God through Jesus Christ.

2. Remove Them Out of His Sight. The land of Palestine is regarded as the land of God's sight—that is, the place of His manifested presence. These people are still scattered among the nations and as a political organization they will never return to their land. The judgment was severe, but not more so than the sins merited. God had waited long. The despising of His grace eventually works ruin. Therefore, what judgment must fall upon the people who in the light of this day reject His grace and His mercy.

#### Practical Christianity

"Go," never spells "Stay." We need more religion in the s-o-l-e, as well as in the soul—a walking as well as a talking religion. The trouble is not so much with non-church-going masses, as the non-going church. We need not only a lookout committee but a "Go-out" committee.—H. G. Gibbud.

#### A Christian

A Christian is one who follows Christ, but is a leader of men.—Christian Herald.

### May 4 In His Steps (5)

#### How Jesus Overcame Temptation

Jesus Christ is the Eternal Word made flesh. This does not mean that the divine was changed into the human, but the divine took the human into union with itself. "Forasmuch as the children are flesh and blood, he likewise himself took part of the same and became in all things like unto his brethren;" or in other words, He subjected Himself to the conditions of existence essential to human nature. His deity was never relinquished or suspended; nevertheless, while being truly God, He was also truly man. As such He overcame the temptations that were presented to Him.

This overcoming was due first of all to the fact that as a man He loved righteousness and hated iniquity (Heb. 1:9). His holiness was not merely the negative quality that abstains from wrong doing, but the positive quality which implies the doing of all that is right. Positive holiness is that which meets evil and overcomes it. The positive holiness of our Lord's manhood was a factor in His overcoming temptation. In the second place, we notice His use of the written Word of God. He never doubted its authority or its power. When confronted with the temptation in the wilderness, he used this "sword of the Spirit" and by its use obtained the victory. In the third place, our Lord in His humanity overcame temptation through prayer. The words pray and prayer are used at least twenty-five times in connection with our Lord Jesus Christ. He prayed before the important steps in His life and prepared Himself in prayer for all the important events. His praying is mentioned by each of the four evangelists. Nothing is more marked in the records of His ministry on earth than His prayerfulness.

In these matters He is our great example, as well as our great Saviour. The love of holiness, the use of the written Word, and perseverance in prayer will enable us to overcome.

### Industrial History Is Shown in Magazine "Ads"

If one would get a bird's-eye view of America's industrial development and, in a sense, her social evolution as well, says the Christian Science Monitor, he can do no better than make a study of the advertising in long-out-of-date magazines.

It is an absorbing bit of research. Go to a library, or into your own dusty files and get copies of two or three of the older leading magazines of the country for the years, say, of 1890, 1893, 1898, 1900, 1906 and 1914. In the advertising columns you may trace the evolution of the American country house and all its furnishings. You will see the bicycle begin and end. There will pass in review before you a whole cycle in the art of printing.

This stage, set for the motorcar, will portray in a complete drama its entrance, its transformation, its triumphant domination of the scene. Many a gigantic 10,000-candle-power advertising appropriation of today can be seen slowly, cautiously feeling its way along a twilight road; first guessed by faint auroral flashes sent out from quarter-page displays.

The pages themselves will increase in steady arithmetical progression, parallel with the growth of the average American bank deposit. No treatise or text book could present more graphically the phenomenal industrial metamorphosis of the United States and the alterations in national tastes, desires and wealth.

### French Now Sending Autograph Telegrams

It is now possible to send autograph telegrams as the result of the perfection of a device for that purpose by M. Belin, a French inventor. This transmitting machine is being installed in all the French telegraph and post offices.

The sender of a telegraph message writes the telegram on a revolving cylinder, and through a series of novel mechanical devices it is received by the addressee in the original writing of the sender.

Over the surface of the paper on the revolving cylinder runs a needle, which in its movements breaks and restores an electric current. Special ink is used in writing this telegram, so that the words are in light relief above the surface of the paper.

The delicate needle strikes the obstacle made by the letters, is jerked upward and interrupts the electric circuit.

These interruptions are all registered at the receiving end, and the result is that by the inverse process the exact pattern of the written telegram is reproduced and this "tele-autograph" is delivered to the addressee.

### Sea Sand for Fertilizer

In Cornwall, England, sea sand is used very largely for fertilizer and for dressing the soil of the farms. This is because the sea sand from places nearby contains a large percentage of calcium carbonate derived from the shells of the sea mollusks. The winds carry the sand inland for some distance and pile it up in dunes. Its low price makes it preferred now to lime, although for years it was considered valueless.

### Traffic Law Really Is Aid to Motor Driver

The traffic law deals with two classes of drivers. There is the man who is bent only on beating the game, who will violate all the laws with a light heart if he thinks he can get away with it, or if the penalty seems less than the immediate profit. The law must deal with the problem of catching, restraining and penalizing this irresponsible driver; and in dealing with him, harshness should be the keynote.

On the other hand, by far the larger proportion of motorists come in contact with the law only in what should be its beneficent aspects. To them, the law need be only a set of agreed upon principles for insuring that all of us drive to the least interference with any of us. It specifies certain equipment which we must carry, not with the view of forcing us to carry it, but in order that we may have a convenient and authoritative standard of reference. It prescribes the manner of our driving, in general and in particular circumstances, not with the idea that we need to have a club held over us, but again so that each of us may have a standard by which to forecast the probable conduct of the other fellow.

In defining and enforcing these and other necessary standards, the law can afford to err on the side of leniency. It can often correct without penalizing, it can even more often impose a light penalty as a mere jog to the offender's memory, it can and should reserve the display of its teeth for the habitual or the wanton violator.—Scientific American.

### Daylight Saving Is Not Popular in Italy

Daylight saving is unpopular in Italy because of the name the government ascribed to it. At least that is former Premier Nitti's laughing explanation. The new time was called the "legal hour."

With the advent of spring, says Mr. Kenneth L. Roberts in Europe's Morning After, the Italian government ordered that all clocks be set back an hour so that the people might have the advantage of an extra hour of daylight. But in Italy, as in other countries, a large number of people didn't like the arrangement, and so they made a frightful uproar and organized strikes against the "legal hour." The street railway employees, for example, were striking; I asked one of them his reasons.

"The new hour," said he, "makes it necessary for us to get up too early in the morning. Everything is foggy and dark."

I reminded him that the new hour saved coal for the nation and gave him an extra hour of daylight when his work was done.

"Yes," he said, "but it is too foggy and dark when we get up."

"Our mistake," declared Nitti, "was in calling it 'the legal hour.' We should have known that no true Italian would have endured it. We should have called it 'the illegal hour.' Then every Italian would have been unanimously in favor of it!"

### Materials in Straw Hats

In the United States straw hats are made from braid that is chiefly imported from Italy, China and Japan, says the Detroit News. Of the various materials which go into the fabrication of plaited hatgear the most important is wheat straw. The straw must have a length of "pipe" between the knots and must possess a clear, delicate golden color and must not be brittle. The most valuable straw is from Tuscany, and from the Tuscan plait the leghorn hats are made. Many substances besides straw are used in braids for hats and bonnets. Among these may be noticed willow and cane, as well as palm.

The famous panama hats are made from the leaves of the screw pine.

### Nearly Killed by Bats

Attacked by what he declares was a swarm of a thousand bats, Joseph Morasky, Southern Pacific station agent at Imlay, relates a weird story of a recent trip he made through a cave in a mountain six miles east of Imlay. Morasky says he lowered himself into the mouth of the cave, and after proceeding through a natural tunnel and down an incline for about 200 feet came into a large chamber. This chamber was the home of the bats, and he says they began an infuriated attack upon him, and declares that he owes his life to the fact that he wore a very heavy cap, coat and gloves. His clothes were badly torn when he finally emerged from the cave.—Reno News in Sacramento Bee.

### Value of Egyptian Irrigation

Irrigation work, including the Assuan dam in Egypt, has cost to date about \$53,000,000, but the increase in the value of land in middle and lower Egypt and in the Fayum province has been from \$955,000,000 to \$2,440,000,000 and the total rent from this area of land has risen from \$82,000,000 to \$190,000,000. This is what the irrigation engineer has done for Egypt in two decades.

### Dynamiting the Mosquito

Man has begun to use high explosives in his war against insects. Dynamite, which we usually think of in connection with the destruction of big things, is now being employed against little mosquitoes. It is used to blast these dangerous disease-carrying pests out of existence by digging ditches which drain the mosquito grounds.

### Poisonous Snakes Are Pets of Zoo Keeper

At Port Elizabeth, South Africa, attached to the natural history museum and aviary, is a large "snake garden," where poisonous reptiles live in perfect freedom, among their natural surroundings, says the New York World. The garden is, of course, cut off from the rest of the world by a concrete wall.

Its keeper is a negro who has worked in the snake garden from the days of his childhood and has actually succeeded in building up a real friendship with his charges. Protected only by gauntlet gloves and leather puttees, with his other clothing merely the regulation uniform of the museum, he fearlessly enters the enclosure and freely handles his pets.

When one considers that the majority of the snakes in the garden are of the most deadly varieties—the African cobra, the puff-adder and the fer-de-lance among others—one would think twice before offering to swap jobs with the keeper of the reptile house.

Poisonous snakes are popularly believed to be untamable, but the negro keeper at Port Elizabeth seems to prove that, if not actually affectionate, they can be persuaded by kindness to tolerate human companionship.

The snakes in the Port Elizabeth garden are not used for display purposes only. Their venom, extracted, is used in the preparation of serums and antidotes for snake-bite.

### Auto Driving Making Pigeon-Toed People

As a result of continual automobile driving, Americans are becoming pigeon-toed, according to the statement of Dr. Carl Hunt of New York city, after extensive research to determine the cause of a marked tendency to "toe in" on the part of a large percentage of the population in large cities. Complaints of pains in the right foot, which are becoming common, also are attributed by him to the same cause.

"Automobile drivers are developing a new form of foot trouble that in many cases becomes actual deformity," says Doctor Hunt. "Ever since the advent of the foot accelerator, my car-driving patients, in ever increasing numbers, have complained of pains in the outer side of the middle third of the right foot, particularly when walking. In most cases I have found that with correction of the position of the foot on the accelerator, manual manipulations, simple exercises, and properly fitting shoes, the trouble has disappeared."—Popular Mechanics Magazine.

### Bug That Stabs Potato Bug

Against the devastating potato bug, the United States Department of Agriculture is marshaling an army of enemy soldier bugs, popularly known as "stink bugs."

Every time a potato parasite clashes with one of these deadly antagonists, potato plants are just one bug safer. For the soldier bug usually wins. Advancing to the attack, he jabs a spear-like beak into a soft spot in his prey's armor. Barbs at the tips of the jaws keep the spear inserted. The doomed potato bug at first feigns death, then begins a frantic scrambling over obstacles to shake off its assailant. Exhaustion finally leaves the potato bug at the mercy of the soldier bug's appetite, which sates itself on the blood and juices of the victim.—Popular Mechanics.

### Mammals of California

There are 2,000,000,000 mammals in California. Half of these are burrowing rodents, such as ground squirrels, kangaroo rats and gophers, which give farmers much trouble. Dr. Joseph Grinnell of the University of California, however, has a good word to say for gophers and such. Fossils show that they have been in existence at least 200,000 years and he has figured out on one tract of land that in that time gophers have given the soil the equivalent to 3,400 plowings to a depth of six inches. It is all right to keep them off artificially cultivated land but in other areas, the plowing and fertilization furnished by them is invaluable.

### Why Bread Becomes Stale

Dr. Katz, a Dutch inventor, has been trying to discover what makes bread grow stale. He has found, it is reported, that low temperature is the chief cause. Bread kept at 140 degrees Fahrenheit was quite fresh at the end of 48 hours, but when the temperature was reduced to 122 degrees the bread began to grow stale and continued to increase in staleness down to about three degrees below the freezing point. Beyond that staleness grew less until at the temperature of liquid air the bread had again become perfectly fresh. It is suggested that bread can be kept fresh by placing it in a fireless cooker immediately after it is removed from the oven.

### Penalized

"Why do you always use 'whilst' in place of 'while'?" asked the city editor of the new reporter. "Because I think it's a nicer word." "All right," said the editor. "I think you'd better work in the janitorial department for a whilst."—Boston Transcript.

### "Never Told Her Love"

His fiancée—Yes, Titus, I loved you when I first met you. Titus Canby—Why'n time didn't you say so then? Here I've gone an' wasted \$4.25 courtin' you.

## What is an Incubator ?

The Dictionary tells us that an incubator is "a hatching apparatus artificially warmed." Remember that.

We say that the cheapest and most efficient warmth comes from burning The Red C Oil and The White C Oil, same except in color. It is Smokeless and Odorless—Long-burning, giving a steady, dependable heat. It is the logical Kerosene for your incubator.

Now consider your other Kerosene uses. In your Lamps, in your Stoves, and in your Lanterns; as the economical fuel for your Tractor. Many of your everyday needs are dependent on Kerosene. Why not make that portion of your daily life where Kerosene is concerned productive? Why be satisfied with plain kerosene when The Red C Oil and The White C Oil is waiting for you at these convenient dealers, ready to give you maximum service for every penny it costs?

Join the ranks of the wise buyers and demand The Red C Oil or the White C Oil, same except in color. You'll be more than satisfied—you'll be thankful!  
Buy a gallon or a barrel today from one of these dealers:

### Our \$1.00 Offer.

It is socially proper as well as business-like to use printed stationery. It is also economical and apt to result in having paper and envelopes on hand, when needed. We fill many such orders by mail. Either of the following offers mailed postpaid for \$1.00, anywhere within the third zone—300 miles. Add 5c when to be mailed to 4th, and 5th, zones, and 10c beyond 5th, zone.

#### OFFER NO. 1.

100 sheets 6x9 paper, ruled, good quality, in two pads; with 100 size 6 1/2 envelopes to match.

200 sheets Hammermill Bond paper, 5 1/2 x 8 1/2 unruled, padded on request, with 100 size 6 1/2 envelopes to match. Printed either in dark blue, or black. Not over 4 lines neat type, the same form on both paper and envelopes. Envelopes printed on back, if desired.

Cash with order, when sent by mail. Write instructions, and copy for the printing, very plainly.

THE CARROLL RECORD CO., TANEYTOWN, MD.

#### NOTICE TO CREDITORS.

This is to give notice that the subscribers have obtained from the Orphans' Court of Carroll County, in Md., letters of administration upon the estate of

ELIAS KEEFER, late of Carroll County, deceased. All persons having claims against the deceased, are hereby warned to exhibit the same, with the vouchers properly authenticated, to the subscribers, on or before the 9th day of November, 1924; they may otherwise by law be excluded from all benefits of said estate. Given under our hands this 11th day of April, 1924.

## TANEYTOWN LOCALS

### Brief Items of Local News of Special Interest to Our Home Readers.

Mrs. C. O. Fuss spent a week in Baltimore, at the home of her daughter, Mrs. Olive E. Wolfe.

O. J. Stonesifer, editor of The Pilot Union Bridge, his wife and son, visited at Mahlon Brown's, on Sunday.

Miss Ida Sherman, of York, Pa., spent the past week with her sister, Mrs. James Buffington and other relatives.

Misses Alice Harman and Vada Smith, spent Sunday at the home of Mr. and Mrs. Walter Smith, at Woodsboro.

Wm. M. Ohler, Jr., has enlarged his store room by taking in the hallway formerly belonging to the dwelling part of the building.

Our new Littlestown correspondent is sending very newsy letters, and those interested in the happenings of our neighboring town, should read them.

On account of the death of Judge Thomas, the meeting of the Westminster Rotary Club, at Sauble's, on Wednesday evening, was postponed until a later date.

Rev. W. V. Garrett has been called back to Middleburgh, Pa., to officiate at two funerals—one last week, and one this week. Both were sudden deaths.

Miss Anna Wilhide, of Baltimore, spent the week here preparing for the sale of the personal effects belonging to her sister, Miss Clara, who recently died.

Mr. Steiner Engelbrecht and friend, Miss Ruth A. Hyser and Miss Ethel Baker and Anna Harman, spent Saturday afternoon in Westminster and Medford.

Charles M. Harner, of Baltimore, was an over the week-end visitor to Taneytown. He has a rather wide fund of recollections of "old times" in the town.

Miss Ethel Sauble and Norville Shoemaker carried off the first honors at the county declamation contest, last Friday night, held in the Reformed Church. The program lasted until near 12 o'clock.

Rev. and Mrs. L. B. Hafer, Mrs. G. T. Hafer, Miss Genevieve Brewer and Miss Mae Siner, all of Gettysburg, spent Tuesday with Mr. and Mrs. J. J. Garner. Rev. Hafer also attended Judge Thomas' funeral.

"Please extend my subscription for 8 months, I must have the Record. I am an old Taneytown and always pick up the Record first out of 6 other papers."—Mrs. V. J. Eckenrode, Thurmont, Md.

The month of April kept its record to the very last day, of being an unusually wet and cold month for its place on the calendar. All outdoor work is fully two weeks behind the average for this time in the year.

Mr. and Mrs. James A. Reid and daughters, Ellen and Grace, and Anna Newcomer, of Hanover, and Miss Corrine Kuhn, of McSherrystown, and Ruth Hilbert, Taneytown, spent Sunday with Mrs. Alma Newcomer.

At the close of each month a ticket will be printed in the Record, for the purpose of using in a vote for the best looking property, yard or home, so far as flowers, shrubbery and lawn are concerned. The tickets to be deposited in a box at the Postoffice.

(For the Record.) Those who spent Sunday with B. J. Hyser and family were: John Harner, wife and daughters, Oneida and friend Vernon Snyder, of Frogtown; Edward Hyser, wife and children, Mardella, Benjamin and Leona and Edward, Jr., all of Gettysburg, and Miss Ruth Hyser and Anna and George Benjamin Harman, of Taneytown.

Chas. A. Kohler, of Braintree, Mass., once a resident of Taneytown, and still well remembered by many here, in a letter to the Editor, last week, said that he was now ticket agent at Braintree, and does a ticket business of almost \$8000. a month, mostly in small fares—a pretty busy job. He was a tower switchman there, for quite a long while.

Several times, recently, we have seen statements of the ownership of copies of The Maryland Journal and Advertiser dated in 1773. These are merely fac-simile copies, issued by the Baltimore American in 1873, in celebration of the 100th anniversary of the American. The yellowish paper and old style typography were perfectly matched, and many thousands of copies were printed. Especially since the Baltimore fire, it is doubtful whether there is a genuine copy of the 1773 print in existence.

Mrs. Stanley C. Reaver was taken to Frederick Hospital, on Tuesday, for an operation.

Mr. and Mrs. John S. Bower, of Hanover, were among the Sunday visitors to Taneytown, and attended services in the Lutheran Church.

Rev. G. Wilbur Shipley and Rufing Elder Robert S. McKinney attended the Presbytery of Baltimore which met Monday in the Lafayette Square Church.

Mr. and Mrs. William E. Wagner who have been living in Miami, Florida, the past two years, are visiting Mrs. Wagner's sister, Mrs. Nettie S. Angell.

### CHURCH NOTICES.

U. B. Church, Manchester—Preaching, 10:30. Sermon by Rev. Paul Barnaby, Baltimore.

Millers—Sunday School, at 9:30. Alesia—Sunday School, at 2. Address by Revs. Barnaby and Holdcraft, Baltimore.

Bixlers—Sunday School, at 10:00. Preaching at 7:30. Sermon by Rev. Barnaby. Prayer-Meeting, Wednesday evening, May 7, at the home of Mr. Irvin Kreitzer.

Emmanuel (Baist) Reformed—Saturday, 2:00 P. M., Mission Band; Sunday, 9:30, Sabbath School; 11:00, Morning Worship; 7:30, Young People's Society.

Trinity Lutheran Church—All regular services, Sunday morning and evening. The regular monthly meeting of the Church Council will be held on Monday, at 1 o'clock.

U. B. Church, Town—S. School, at 9:30; Worship with Preaching, at 10:30; Prayer and Praise Service, at 7:30; Bible Class Monday evening, at 7:30.

Harney—Sunday School, at 9:30; Evangelistic Services, at 7:30. Subject of sermon "Is a Man a victim of Circumstances."

Reformed Church, Taneytown—S. School, at 9:15; Service, at 10:15; C. E., at 6:30; Service, at 7:30. The Willing Workers will meet Friday evening, May 2, at 7:30 in the Primary Room at the Church.

Keysville—Sunday School, at 1:00; Service, at 2:00.

Uniontown Lutheran Charge, St. Paul's—9:30 Sunday School, Thread Day for India Lace. 7:30 C. E.

Emmanuel (Baist)—Woman's Missionary Society, and Light Brigade, May 8, at 7:30, at Mrs. Walter Myers. Choir rehearsal after the meeting.

St. Luke's (Winters)—9:30 Sunday School; 10:30 Maryland Sunday School speaker.

Mt. Union—1:30 Sunday School; 2:30 speaking by one of the Md. S. S. Association workers. 3:30 Jr. C. E.; 7:30 Sr. C. E.

Pipe Creek Circuit M. P. Church, Uniontown—9:30 S. School; 10:30 Divine Worship; 8:00, Evening Service.

Uniontown Circuit, Church of God—9:30 Sunday School; 10:30 Preaching, Theme, "Resurrection Scenes, the Journey to Emmaus."

Frizellburg—2:00 Sunday School; 7:30, Preaching Service.

Presbyterian, Town—S. School, at 9:30; Christian Endeavor, at 7:15; Morning Worship, 10:30; Evening Worship, 8:00.

Piney Creek—Sunday School, at 1:00; Preaching, at 2:00.

### Country Town News.

Small humorists in city newspapers often make fun of the people who write local and village items for country town papers. The items thus collected look small and trifling to these folks who are accustomed to dealing in crimes and sensations every day.

These little items, however, record the progress of industry, the occurrence of social and community events, and the movements of people. They show that the country folks are very active in unostentatious and useful ways, and are wide awake to the movements of the times. The country town news items are not usually sensational, which simply indicates that the country folks are keeping the laws of God and man. Useful lives may not make exciting news reports, but they constitute a good community to live in.—A. J. Hawkes, in Sheldon (Ill.) Journal.

### Old Folks Made Happy.

(For the Record.) Mrs. James Weishaar has been confined to her room for the last two months. The last of March, her husband, James Weishaar, was hauled home with a broken leg, so we have to call it the "Old folks Home."

On last Sunday, the old folks was made very happy. At 12 o'clock the callers began to come—relatives and friends till 6:30 in the evening. There were between 20 and 30 coming and going. The old folks were made very happy with gifts and kindness and wishing them many more happy Sundays.

### A Wonderful Horse.

Oh Horse, you are a wonderful thing, No buttons to push, no clutch to slip, No sparks to miss no gears to strip, No license-buying every year. With plates to screw on front and rear.

No gas bill climbing up each day—Stealing the joy of life away. No speed cap chugging in your rear. Yelling summons in your ear. Your inner tubes are all O. K. And thank the Lord, they stay that way.

Your spark plugs never miss and fuss. Your motor never make us cuss. Your frame is good for many a mile. Your body never changes style. Your wants are few and easy met. You've something on the flivver yet.

### A Remarkable Child.

The commuters' smoking car was filled, mostly with proud young fathers, who had been relating everlasting anecdotes of the clever remarks made by their offspring. Finally, Spiffington, seeing a hole in the conversation, horned in by saying:

"I don't like to talk, but I honestly think that boy of mine is the most remarkable little fellow I ever saw."

Everybody yawned. "Yes," pursued Mr. Spiffington. "He's six years old and, as far as I can recollect, he never said a bright thing in his life."—American Legion Weekly.

### The Dominie's Discount.

At a certain church in a southern town it is the invariable custom for the pastor to kiss the bride after the ceremony. Now one young woman who was about to be married in his church did not relish the prospect, and instructed her prospective husband to advise the minister that she did not wish him to kiss her. The bridegroom obeyed the instructions given. When the young man returned she asked: "Henry, did you tell the minister that I did not wish him to kiss me?"

"He did, Florence."

"What did he say?"

"He said that in that case he would charge only half the usual fee."—Harper's Magazine.

### Testing the Cake.

"Susie," said the girl's mistress, "go and see if the cake's done. Stick a knife in it. It's done if the knife comes out clean."

Susie departed. Some minutes later she returned beaming.

"The knife came out as clean as a whistle," she said, "so I stuck the rest of the knives in it, and the forks and spoons, too."—London Opinion.

by using fresh feeds. Rein-o-la Feeds are made fresh each week. You take no chances when using them. Only the best of grain used.—Rein-o-la Bros. & Co. 5-2-tf

### Used Wages to Pay for Automobile.

Found guilty at a trial before Justice J. Grahame Johnson, Monday afternoon, of failing to provide for his family, consisting of his wife and eight children, Charles Burdette, Schleyville, was sentenced to the House of Correction for six months. Sentence was suspended under promise to pay his wife \$8 per week.

The case was brought to the attention of the authorities by Miss Louise Nelson, county probation officer, who visited the home and found the younger children in need of clothing. She also discovered that the two older sons and an older daughter were supporting the family while the father did very little work and contributed practically nothing to the maintenance of his wife and children. Miss Nelson made arrangements to supply the younger children with clothing.

The case was reported to the authorities and Burdette was arrested by County Constable Charles W. Smith. At the trial Mrs. Burdette testified that her two older sons and daughter were the only means of support the family had. She stated that her husband worked a few days now and then at chopping wood, but did not give her any of his earnings.

Burdette testified that he was a woodchopper and worked only during good weather. He said he applied his earnings to an automobile he bought on the installment plan, for \$200. He stated that he owed some money on the machine and was obliged to apply his wages to the payment of his car. He added that he had been making from \$4 to \$10 or \$15 per week and would abide by the decision of the magistrate and pay his wife \$8 per week and would go his way and let his family go their way.—Frederick News.

## To The Republican Voters of Carroll County

When the Eighteenth Amendment was passed it closed the doors of every liquor saloon in this country. Its repeal would open them again, and conditions would be a thousandfold worse than ever before. Mr. E. Ridgley Simpson is a member of the Executive Committee of the Association that wants the Amendment repealed. I am bitterly opposed to such action. If a Republican, go to the primary on Monday, May 5, and place your x mark opposite my name as follows.

Lloyd Wilkinson x
