BRUCE DEFENDS RIGHTS OF STATES.

Child Labor Amendment Another Exercise of Federal Authority.

Senator Bruce, of Maryland, in the Senate, on Wednesday, delivered a warning against too much Federal authority over matters properly belonging to the states, and cited especially Federal activity in the control of educational matters, and the effort to adopt into the Constitution the pending Child Labor Amendment.

Senator Bruce pictured the possi-bility of mixed schools as very repugnant to a large section of our country, and especially in the South, and also strongly intimated that there was a tendency toward legislation that might legalize mixed marriages — miscegenation. Senator Bruce is always an interesting and forceful speaker, and does not hesitate to speak plainly without consulting anybody-not even his own party associates—and in his recent effort did not hesitate to condemn the course of several southern states that seem to favor the Child Labor Amend-

Referring to the Sterling bill for a department of education, Senator Bruce said that:

"And in no State of the United States are there gradual encroach-ments of the Federal authority or attempted encroachments in the name of the Federal authority over educa-tion distrusted and feared more than they are in the State that I have the

honor in part to represent. "Nowhere in the United States is the tendency to impose popular edu-cation by the Federal Government more distrusted or more resented-I may say more abhorred, than it is in the State of Maryland. I am happy to say that Maryland is a land of tolerance; the finest tradition of the State is tolerance. We do not want any system of education that will interfere in any way with any reasonable sectarian privileges that any sect has ever enjoyed in the matter of

The Eclipse of the Sun.

The eclipse passed off uneventfully strictly attending to its own business. Not a bank was robbed and not a chicken went "to roost" in this section so far as heard from. The heighth of the eclipse, was at about 9:10, and the darkness did not equal that often preceding a summer electrical storm. All portions of the eclipse were distinctly visible, due to a very clear sky. The clearness of the sky, and the snow covered ground, prevented any very noticable diminution of light. The eclipse seemed about 90 percent full, in this section.

The eclipse in general is conceded by astronomers to have been the most perfectly executed union of sun and moon since the heavens have been stuevents, and was one of great magnificence.

Weather conditions for observation were described as almost generally perfect throughout the East, where most of the fixed observatories and laboratories were located.

Hundreds of telescopic records were made and as many photographs taken from land, sea and air. Scientists felt justified in declaring that a huge fund of information undoubtedly had been added to their store of general and specific knowledge about such mysteries as the content of the Sun's corona. the composition of eclipse umbra and penumbra, the explanation of the "jumping-jack rabbit" of the moon's eclipse shadow, the deflection of light as related to the Einstein theory, the effect of eclipse upon earth's climate and tides and gravity and its effect upon radio activity, upon earth's magnetic centers, its thermometers and its

Feed the Birds.

Editor Carroll Record:-

May I ask that you display in your paper a little notice occasionally reminding the people of Carroll County to place food in some sheltered place so the game birds and game animals will not perish from starvation. The present heavy snow and sleet is working havoc among our game throughout the County, and it is feared that much will starve unless there

is a general campaign started of feeding the game.
Farmers, here and there, throughout the county are feeding the birds and rabbits, but it is difficult to care

for the game preserves against the heavy coating of snow and sleet. Last year, large quantities of rabbits and partridges were killed by the snows and heavy spring rains, and the State Game Department is striv-

ing to save the situation this winter. Sportsmen in every district in the county, should kill off the hawks, owls and crows possible at any time of the year and by doing so they will find better hunting next season.

The State Game Department pays a bounty of fifty cents each on all chicken and bird hawks killed by resi-

dents of the county. The State Game Department has deferred importing stock rabbits into

counties until weather conditions are more favorable J. GLOYD DIFFENDAL,

importance to get about the streets

of a city all day without being run

MRS. S. SENTMAN PASSES 100. A Former Taneytown Pastor's Widow Congratulated.

Mrs. Solomon Sentman, the grand-mother of Robert S. McKinney, of Taneytown, passed her 100th. birthday Necessary to Examine 149 Men on January 19. Her husband, Rev. Solomon Sentman, was the eighth pastor of the Taneytown Lutheran con gregation, serving from 1841 to 1858. He came to Taneytown as his first charge after completing his course at Gettysburg, and was married shortly after leaving Taneytown. The follow-"The Lutheran," written by Rev. Edgar Grim Miller, son-in-law of the late Dr. M. Valentine, will be of interest to many of our readers.

"The Board of Ministerial Pensions and Relief desires to extend its felicitations and congratulations to a pastor's widow who passed her 100th. birthday on January 19, Mrs Solomon (nee Sallie Lehman) Sentman, of Gap, Pa., and Philadelphia.

Mrs. Sentman was born in Philadelphia on January 19, 1825, and on July 13, 1858, was married to the Rev. Solomon Sentman, then pastor at Barren Hill, Philadelphia. Mr. Sentman, after a useful ministry of many years, accepted the superintendency of the Preparatory Department of Pennsylvania College (now Gettysburg College), in 1870, which position he held at the time of his death in 1872. During his years of service he was instrumental in turning a number of men to the ministry, outstanding among whom was the late Dr. M. Valentine, for many years president, first of the college and then of the seminary in Gettysburg. One of Mr. Sentman's colleagues in the Preparatory Department was Chief Justice J. Hay Brown, then a recent graduate of the college. One son was born to the Sentmans, P. Pearson, who died some years ago, so that her nearest living relatives are devoted nieces and nephews who have brightened her years by their loving care and attention.

Mrs. Sentman is a woman of remarkably fine mind and character. She has been blessed, too, with a strong, vigorous body, and within the past few months has made the journey from Gap,, where her home is, to Philadelphia, where she spends her winter. At the last election she vot-ed for Coolidge and Dawes, saying that they were both fine men, and she wanted to cast her ballot for them. Her memories of the leading men and events in the history of the Church go back over the greater part of the century. Old St. John's was her home congregation and her stories of Matthew's and the other churches founded early in the century, and of the men who made history in those days, are most interesting.

She has kept in touch with the developments down to the present through, first, The Lutheran Observ-er and then The Lutheran. It is a pleasure to talk to her about world tified the defendant. conditions and the changes she has seen. All of her old friends have gone before her, but their children and children still enjoy her society pastor of the Taneytown Lutheran contact and fired at the trooper, who, they testified, was a few feet behind pastor of the Taneytown Lutheran con-and find her not only interesting the driver's seat. All were positive young as any in her appreciation of the present, while her magnificent faith and trust in the Christ whom she has served so long is an inspiration to all who knew her. The Board offers its congratulations on a century of life well spent, and its wishes for all joy and blessedness in the new year of a life which is a worthy example stewardship in the Master's King-

Maryland-style Weather.

Sunday and Monday were almost Spring-lamb days; then the weather man handed us an all-day blizzard and a whopping big snow, followed by the coldest night of the winter, from 2° to 8° below, and drifted roads-altogether the worst experience of the

The heavy wind played tricks with the snow, some roads being swept clean, while others were made impassable by drifts. The Westminster state road was not much affected, on Wednesday, the bus schedule being filled close to regular time, but the Rural mail service was practically out of business for the day, except for

on Wednesday, still another layer of snow was added to our already big stock on hand, until the appearance of town and vicinity is decidedly arctic, and many are beginning to wonder what may happen when the change comes, and the bank-up snow moves

On Thursday night, another fall of several inches came along, and today, Friday, the roads are in bad shape, and possibly more snow on the ground than has been the case for many

The roads in some cases will be in bad shape at least for several days, even if no more snow comes. Reports from Pennsylvania duplicates Maryland's experience, and the cold is reported to be the severest since 1917.

February's Special Days.

February introduces itself on Sunday, with ground hog day on the 2nd. Abraham Lincoln's birthday anniversary on Thursday, 12th., with St Valentine's day on Saturday, the 14th. Washington's birth anniversary on Sunday, the 22nd. and Henry Wadsworth Longfellow's birth anniversary on Friday, the 27th. The first day of Lent is scheduled for Ash Wednesday, February 25. Four fish days in the month.

DIFFICULTY IN SELECTING JURY.

to Secure the Twelve.

Considerable difficulty was experienced in Gettysburg Court this week in securing a jury in the trial of Philip A. Hartman, charged with the murder of Francis L. Haley. Pennsylvania state policeman, who was shot and killed near Piney Mountain Inn, on the Gettysburg-Chambersburg road, several months ago, while attempting to arrest Hartman, accused of robbery of the Abbottstown, Pa., bank.

Eleven men were selected from the first fifty called on Monday. On Wednesday afternoon a number of those who had gathered in the Court room were examined but all were dismissed when they either pleaded a fixed opinion which could not be changed, or declared they had conscientious scruples against capital punishment.

Sheriff Shealer then called in special veniremen from whose number the last one was chosen and the jury made complete. The 12th. is Blaine Walters, of Biglerville, said to have

been a former state policeman. Hartman, the accused man, is maintaining an interested attitude, showing interest but not nervousness. The court room was well filled with witnesses, and many spectators were turned away.

The jurors are the following: Hugh McIlhenney, farmer, Straban town-ship; Allen Knouse, farmer, Highland township; William Bittinger, farmer, franklin township; H. T. Brown, shoemaker, Oxford township; William H. Sharretts, janitor, Gettysburg; H. W. Sowers, farmer, Latimore township; Frank J. Rider, hotel proprietor, New Oxford; Roy C. Watson, truck driver, Gettysburg; Emory Sachs, farmer, Cumberland township; Walter F. Foulk, farmer, Tyrone Walter F. Foulk, farmer, Tyrone Township; Edward Peters, cement block manufacturer, Gettysburg, and Blaine Walters, garageman, of Biglerville.

In all, 149 men were examined before the jury was completed. The taking of testimony was commenced

On Thursday, three eye-witnesses to the shooting of Trooper Francis L. Haley October 14 injected the first sensational turn into the trial of Philip A. Hartman, slayer of the Pennsylvania trooper.

The three witnesses who saw the

fatal shot fired, who saw Haley drive his motorcycle to one side of the road, step off and fall forward on his face were Miss Frances McClean, Gettys-burg; Mrs. F. O. Miller, Graeffenburg Inn, and George Johnson, golf pro-fessional at the resort. Johnson iden-

All three witnesses testified they through delightful reminiscence, but as the trooper signaled the driver of the machine to stop.

Proceedings of the Urphans' Court.

Monday, Jan. 26, 1925—Theodore F. Brown, executor of Ellen J. Brown deceased, returned inventory personal property, debts due and current money and received order to sell personal property.

The last will and testament of John H. Peeling, deceased, was duly admitted to probate and letters testamennotify creditors and who returned in- prove costly.

Crop Ruined by the Extremely Cold Weather.

It is authoritatively stated that there will be no peaches this summer in the Cumberland Valley peach belt, due to the below zero weather of the past week. Apples are not affected, but the loss to peaches will be total, except perhaps in a few sheltered lo-

The temperature in the mountain sections has registered as low as 20° to 24° below zero, recalling the year 1912 when 26° below was reached. The loss to fruit farmers will approximate several hundred thousand dol-

A Wolf in Sheep's Clothing.

"Measles is one of the most treacherous diseases we have to contend with, so far as the after effects are concerned," says Dr. Riley, chief of the Bureau of Communicable Diseases of the State Department of Health, in a bulletin just issued by the Department," so it is a mistake for parents to think it is quite safe to expose children to the disease on the ground that it is just as well for them to 'have it

and have it over.'
"Fewer cases of measles have been reported from the counties of Maryland during the current season than at some other times, but the very fact that many of this year's cases are of the milder type, gives all the more reason for safeguarding not only the children who are ill, but of preventing others from coming in contact

with them. "First, because it is a well known fact that an apparently well child exposed to a so-called 'mild' form of any communicable disease, may have the disease in a very severe form. This is true of all of the children's diseasesmeasles, scarlet fever, chicken-pox, mumps—so the wisest thing to do is to keep all children away from the one who has the measles, or who has any of the other diseases, for that

"Second, because the after-effects from a "mild" attack may be quite as serious as from a very severe one. Measles has been called "the wolf in sheep's clothing" because it may masquerade as a mere case of "sniffles," a light cold, or even a slight attack of indigestion. But symptoms of this sort, if neglected, may lead to serious complications—eye, ear, nose, throat or lung troubles. Pneumonia frequently follows neglected cases of

"During uncertain weather, such as we are having now, and are likely to have for some time, it is not worth while to take any chances. A child who has a suspicious 'cold' should be put to bed, the family doctor should be sent for, and his advice carefully

Cost \$13,000 to Remove Snow.

The state paid \$13,000 to have the big snow removed from 2300 miles of state highway, and while the exense was great, it is estimated that it would have been much more expensive to have left it lay.

If the snow is permitted to remain on the highway, the first vehicle pass over it leaves a track which is followed by all other vehicles that pass over the same roadway. The ruts are gradually worn through to the surface of the road and the chains of the autos then dig into the asphalt eaving a permanent mark.

Roads damaged in this way are almost irreparable, according to the engineer, and after two or three winters of such treatment the results would be very evident. It was also pointed tary thereon were granted unto Lydia out that the many accidents that oc-Marie Peeling, who received order to cur on snow-covered roads would also

To keep the 2,300 miles of State are 14 of these plows stationed under Mr. Child's direction. These plows Robert Merryman, deceased, returned cost \$250 each and are attached to inventory of money and settled his motor trucks. These gigantic shov-first and final account and received or-els shovel the snow into the ditches along the highways and this later Elsie L. Wilson administratrix of melts without making the roadway

Two Roads Wanted.

A delegation of the citizens from board of County Commissioners, this week, asking for a recommendation to the state roads commission to have the road between Mount Airy and Westminster built at the Westminster end. The board had already recommended this road to the state roads commission and at this time was not able to give the delegation any reply to their proposals as they have not heard from the commission

A delegation also from the vicinity of Detour came before the board for the purpose of pressing them to build a macadam road on which they have a subscription list of \$4,000. This proposal was held over for consideration. The petition dates back to the year 1924, from April 1st.

President of Juniata.

Ex-Gov. Brumbaugh. of Pennsylvania, was inaugurated as President of Juniata College, on Thursday. He retired from the same position 20 years ago to establish a public school system in Porto Rico, and later filled the office of Superintendent of Philadelphia schools, before entering upon the governorship of the state. Juniata is a college operated under the influence of the Church of the Brethren, located at Huntingdon, Pa. kraut and other foodstuffs.

COL. SWEEZEY REPLIES TO CRITICS

Says Inmates Must Work, to Provide Necessary Expense.

Col. Sweezey, general superintendent of the Maryland penitentiary, whose methods have been sharply criticized recently, due to numerous escapes, has given the following interview, as contained in last Sunday's Baltimore Sun.

His statement is informative, rather than a justification, and does not cover the facts complained of—that inmates have too much communication with outside friends, too easy access to implements and weapons, and too much close communication with each other. For instance, Kelly, the latest to attempt to escape, was found to have a loaded revolver on his person, a good sized sum of money, and had some way secured other articles not to be found on the inside of the pen.

"Asked why prisoners sentenced to the institution for committing crimes of violence, such as murders, hold-ups burglaries and assaults, and prison-ers who have histories of bad conduct, should not be kept in solitary confinement for the period of their sentences, Colonel Sweezey replied:

"Before answering that question I want to reply to a public criticism that I am sentimental; that a maudlin sentimentality is the foundation

of my policies here.
"I have spent all my life in positions where I was forced to punish men, and they were not criminals either. It doesn't hurt me to punish a man when I know he deserves punishment. Without a heart throb I could cuff a prisoner to the bars of his cell and leave him there for months if his behavior warranted it.

"But I do not do these things because they are impracticable. Solitary confinement for all the men in this institution who committed violence or who have records of misbehavior is not possible under our present system

"This institution must be practically self-supporting. For 1925 the State has appropriated \$62,000 for the maintenance of the Penitentiary. That amount will pay a little over a third of the pay roll for the guards.

"The money to make up the balance of the payroll, the money to buy food to feed the 1,120 men now here, the money to buy fuel to heat this build-ing, the money to light, repair and pay the overhead costs of this insti-

tution must be earned by the prisoners themselves. "If we put half our population in solitary confinement, where are we to obtain the money needed to pay our expenses? The institution receives from contractors \$1 a day for every man supplied. It costs us approximately 85 percent a day for every in-

County Ministerial Association.

mate here.'

The Carroll County Ministers Association held their regular monthly meeting, Monday, January 26. The newly elected officers are: Rev. John B. Rupley, President; Rev. G. Wilbur Shipley, Vice-President, and Rev. J. N. Link, Secretary. They were present and assumed charge for the first

A letter from Supt. G. W. Crabbe of the Anti-Saloon League of Mary-land was read, stating that certain wet forces were at work seeking the removal of Commissioner Haynes. The Association authorized its secretary to write the President expressing their opposition to any change.

Rev. Daniel L. Eckard, returned missionary from the Bog District, India, addressed the meeting on his work and the general work of Christian Missions in India. Mr. Eckard is connected with the Church of God. The address was very cordially received and he was given a vote of thanks.

Caught With 40 Gallons.

William H. Knisely, of Harrisburg. is in the Adams county jail, charged with violating the liquor laws and officers are searching for Ernest Delva, of Camp Hill, a companion of Knise-

The two men were on their way Westminster district was before the from Baltimore to Harrisburg and when near Hampton their machine upset when they attempted to turn out of an icy rut in the road to allow another car to pass. Knisely was thrown through the windshield and forced to seek medical attention and when residents of the community went to their assistance, it was discovered that the car contained forty gallons of white mule liquor.

Delva succeeded in getting away after pointing a gun at G. C. Chronister and telling him that if he had a family to support, some one else would have to support them if he followed him.-Littlestown Independent.

Overproduction of Canned Peas.

There is an overproduction of canned peas that is giving canners considerable concern. The production has been increasing for several years, while demand and consumption have not kept pace. The increase in pro duction is estimated at about 5,000. 000 cases a year, or 10,000,000 dozen

At a meeting of the National Canners Association in Cincinnati, this week, a Wisconsin pea canner suggested a national advertising campaign, such as has greatly increased the demand for cranberries and sauer-

COMPULSORY ATTENDANCE.

Violations of School Law in Frederick County.

Varied excuses were advanced by five parents, arraigned before Justice Sherman P. Bowers, Friday after-noon, for failing to send their children to school. Four of the defendants were ordered to pay the costs in the cases, after promising to comply with the law. The fifth case, against Ernest Abrecht, was held open for investigation.

All of those charged with failure to send their children to school in addition to Abrecht, William Wickham, Keefer Winpigler, Marshall Stockman and Claude Brightwell, expressed their disapproval of the compulsory school attendance law.

One of the fathers claimed that his son, who is 15 years of age, is needed to support the family as he is not able to obtain work at this time. He stated that he would pay the penalty pre-scribed by law rather than take the boy from work, as he was the only

support of the family. Three of the fathers admitted they were unable to induce their children to attend school, another stated that he was little concerned whether his child attended school. Winpigler asked the court that his boy be compelled to live up to his promise to attend school. Justice Bowers obliged by promising the youth that he would be

turned over to the Juvenile Court in case he fails to keep his promise. All of the delinquent children are registered at the Church street school. Prof. David Zimmerman, principal of the school, appeared at the hearing to vouch for the accuracy of the reports on which the parents were arrested. County Truant Officer Frank D. Harshman preferred the charges against the parents.

Justice Bowers reprimanded parents and pupils for negligence. He stated that the children would later regret they did not take advantage of their opportunity to get an education, and told the parents that they should make every effort and sacrifice to see that their children attended school.

Mr. Harshman stated that a number of parents throughout the county will be arrested in the near future for failure to send their children to Many parents have disregarded the law and warnings which the truant officer sent to them.—Frederick News.

52 Story Building Proposed.

A proposed "Cathedral of Learnis being planned for Pittsburg, to be 52 stories, or 688 feet in height. The proposition is backed by Elbert H. Gary, chairman of the U. S. Steel Corporation, who made an enthusiastice speech favoring it, on Thursday night, at Pittsburg, that was radio-casted throughout the country, at a dinner in his honor by the University

Official Presidential Vote.

The official result of the Presidenelection was announced at the State Department, Thursday. In all 28,930,837 votes were cast, divided as follows; Coolidge 15,729,448; Davis 8,383,531, and La Follette 4,817,858. President Cooldige had a popular majority of 2,528,059 over both opponents.

Harry C. Picking Dead.

Harry C. Picking, president of the Gettysburg National Bank, treasurer of Gettysburg college and one of the most prominent residents of that town, died suddenly Friday morning. He was in his usual health when he retired Thursday night, and not apparently ill when Mrs. Picking arose about 6:30 Friday morning. A paralytic stroke was given as the cause of death. Funeral services were held Monday afternoon in College Lutheran church.

The Record May Miss.

Our mail train to Keymar has been running late, for several evenings, due to the snow; and as the public road to Keymar is too badly drifted for us to send the week's Records there to meet the W. M. train east, we must take the chance of the trains connecting, and that our subscribers will receive their paper as usual, on Saturday.

The original of the glass known as a "tumbler" was a drinking vessel with a bottom so constructed that it would not stand upon a table. The "tumbler" was a product of the old days and was designed to make a man "take off his liquor" without setting the "tumbler" aside.

Please let us have the copy for your Sale Bills in ample time, and help us to avoid a rush near sale time. Bills and cards should be ready a month, at least, before the sale date. Give us the work now, and take your time about distributing it!

Cigars are being made now, by an ingenious machine, at the rate of 474 an hour, or 79 every 10 minutes. Another machine automatically sorts out 30 different shades of cigars, at rate of 4000 an hour, with more than human accuracy.

One of the ordeals a boy of New Guinea has to go through is a number of days of starvation, during which time tempting food is brought to him at intervals. If he betrays the least emotion at the sight of the food he is considered lacking in self-control and is sent back among other boys for another period of time.

Protect the Sane.

A girl out in California is on trial for murdering her mother, by shooting her, because she objected to the girl going to an off-color party. She shot her mother, went to the party, tion is that she was not responsible for the crime—it was just her bad temper that was responsible—and she enjoyed herself at the party because she couldn't bring her mother to life again, and thought she might as well do as she had always done before. Very logical, isn't it?

And this is a specimen of human "Young America!" Of course, she was "insane"—most criminals are but, she ought to be hanged, just the that our whole country, and especally same, or otherwise as effectually dis- our rural sections, is suffering from. posed of, in order that there may be at least one less left alive to make The Country Weekly and the Farmer. life unsafe for persons who are not insane.

We are getting entirely too familiar with insanity pleas-and big "fees"-and not enough familiar with verdicts for the protection of the sane. Rabid dogs are killed, and so should rabid human beings. Dogs at least have the defense of no human mental faculties; so, most of our murderers are not entitled to as much mercy as the dog.

The Child Labor Amendment.

We have been asked to comment on forcement" regulations, and these are perity of farmers. likely to be more important than the posal not necessary for us to face.

Children have a right dent, or Secretary Hughes, or someand especially considering the short- States to foreign entanglements, un- rid your system of Catarrh or Deafness age of help on farms, there should be thinkably wrong. no legal restrictions that can be taken | This bevy of wise critics is becom-

er curtail "family help" in the matter of meeting our agricultural needs.

While there are exceptions to all rules, we believe that the average child suffers more frequently from underwork than overwork; that just now we are over-emphasizing the need for what we term "higher education," and to some extent, even "Compulsory attendance" at school.

Work-physical work-instead of injuring children, often gives them the foundation of a strong body that helps them mightily to withstand the heavier burdents in after life; so, the last thing to be aimed at is to teach children to "loaf" or to feel that work is not a credit and a necessity. It was our hardened American boys, largely, who turned the scale in the world war, and not the molly-coddles and effeminate "dudes" whose hands were their chief care.

In conclusion, the Constitution of the United States even, can not prescribe rules for the development of healthy, upstanding, American children; nor can it prescribe rules for such development after eighteen years of age-the work habit must have commenced long before that age. In fact, we go so far as to say that if the state interferes at all in the matter of child labor, it should encourage it, rather than prohibit it, always within and had a good time. Her justifica- proper bounds, and these, we think, can safely be left to the states.

As a people, we should be greatly more concerned over the already plainly manifest desire of young people to pick easy jobs-the white collar jobs, short hour days, and the lures of the city-than to even intimate to them, by law, that as a class they need protection from the necessity of work, deviltry that helps to make up our until they are young men and women. The tendency that even now exists, to shun real work, is one of the facts

Should the time ever come when the country newspaper is forced out of business, the farmer and his problems will lose the strongest of the few advocates he now has. The only strong voice that has been raised, in recent years, against the "tide toward the city," has been the country weekly. The chief means of publicity, and boosting the agricultural sections, and agriculture as a business, for the

country weekly. The best, and practically the only, way of advertising country sales, prothe proposed Child Labor amendment | ducts and wants of the farm, is the to the Constitution that the states country weekly. advantage of, or misapplied, to furth- ing chronic kickers. Should the Pres-

ident attempt to answer their string of objections and arguments, he would have no time left for anything but following them up in newspaper publicity, and be continuously trying to settle questions outside of governmental channels.

If we are to believe these gentlemen, about a half dozen of them know more about foreign problems, and the only proper course for the United States to pursue, than any other men in this country; and anything that is done without "seeing us first," is wrong. They can't forget the "League of Nations," and anything like an argument of any kind, made "over there," in which the United States has part, is a fearsome thing, and commits us to going to war again.

Senate Wants Control of Foreign Policy.

"For months the White House has watched for world developments that might justify calling another arms conference. The President waits to see what may happen to the Leaguecalled conference summoned next summer to Geneva. Refusal of the British dominions to meet and consider the terms of the Geneva protocol has justified this delay. The Senate, however, could not wait. Led by Senator King, Democrat, of Utah, it authorizes and requests the calling of such a conference at Washington.

The Senate, in sum, is anxious to take American foreign policy into its own hands. Not content to stay with in the bounds of "advice and consent," it wishes to force the hand of the Administration, regardless of the fact that the times is not ripe for an arms parley and that such a conference will be called whenever there is any reasonable hope for its success. Nevertheless, the Senate makes its vague and sugary gesture with the hope of some day preening itself before the Nation as the begetter of an arms pact.

The Senate debt-agreement resolution was a sop to the "Irreconcilables" and meat and drink for the Senate's jealousy of the Executive power. The arms-parley gesture smears soothing ointment upon the bruised self-love of the Senate.

The upshot of the whole business promises to be nothing-net. The Paris agreement is made. If it were laid before the Senate with instrucpast twenty-five years, has been the tions from the White House to accept or reject, the Senate would be most embarrassed. For the present, at least, the Russo-Japanese Treaty is a matter between Toko and Moscow. Nor is the President likely to be bull-

SURVEY IS MADE OF BIRD BANDING

Terns Migrate From Kennebec to the Niger.

Washington.-From the banks of the Kennebec to those of the Niger-that is the journey accredited to a common tern by the biological survey of the United States Department of Agriculture, which is now receiving many interesting returns from the bird-banding work at one of its bird colonies in Lake Michigan last year. Among the other interesting reports growing out of this work are those pertaining to three Caspian terns, which were located in Colombia, South America. These were found just at the time when bird banding was being done at the original colony in Michigan this year, thereby proving that the young birds do not breed in their first year.

According to the agricultural experimenters two Caspian terns were reported found in Nova Scotia and many others were discovered along the routes to the latter country and South America. Those found en route, the investigators say, show what course is followed by the migrating birds between their summer and winter homes.

With the growing interest in the procedure the department has only recently published a list of instructions concerning the practical significance of bird banding, as well as some of its history. This form of identification in America dates from the time of Audubon, who about 1803 placed silver threads around the legs of a brood of phoebes and was rewarded the following season by having two of his marked birds return to nest in the same vicinity. Although bird "ringing" was attempted in Europe as early as 1710 it was almost 200 years later, in 1899, that systematic work was under-

Started in 1901.

The earlier investigators, according to the recent report, marked their birds by dyeing or staining the flight or tail feathers, attaching memoranda written on parchment, or mutilating feathers, feet or bill. In this country active experimental work was begun in 1901, when aluminum bands were attached to the legs of the birds. The results were so satisfactory and stimulated so much interest that eight years later the American Bird Banding association was organized in New York city. Subsequent study has revealed that two principal lines of research must be given special attention. First of these is the banding of fledglings and the second, the systematic trapping and banding of adults. The latter is the more significant because the older birds give the most information on bird habits.

Trapping is accomplished by various snares, one of the popular ones being the "Government" sparrow trap, a funnel-shaped device of wire and hardware cloth easily made even by the novice and very effective. Others which the department recommends are the well-known drop trap, the door of which is suspended until the unwary bird makes for the bait, when it drops

down and shuts in the victim. The department, to be able to study even more closely than heretofore the whose casual discoveries of wayfaring band-bearing birds might be well worth reporting. In this way the governmental investigators expect to solve these are the speed with which individuals of any species may travel on their periodic migrations, the possible vanguard formed by one flock for others and the advance made by successive flocks passing one over the other

Questions to Be Answered. Other questions which can be answered by bird-banding operations

Do individuals of any species always follow the same route, and is the route the same for both spring and fall flights?

Do migrating birds make the same top-over every year to feed?

How long do birds remain in one locality during the migration, the breeding or the winter season?

What is the relation between the breeding and the wintering grounds of individuals; that is, do those birds that breed farthest north winter farthest south, thus jumping over those that occupy the intermdiate zone, or do they merely replace the latter individuals as winter residents? To what region do the birds go, par-

ticularly the young, that do not return to the vicinity of their original nests: Do birds adopt the same nesting area, nest site and winter quarters in

successive seasons? For how many broods will one pair remain mated, and which bird, if not both, is attracted next year to the old nesting site?

To what extent do males of a species assist in incubation and brooding? How far from their nests do birds forage for food, and after the young have left the nest will the parent birds bring them to the feeding and trapping station?

Franklin and Masonry The first American newspaper item concerning a lodge of Freemasons in the western hemisphere, according to a recently published book, "The Beginnings of Freemasonry in America," appeared in the Philadelphia Gazette for December 8, 1730. This paper was published by Benjamin Franklin.

Oddly enough, says the Detroit News, the item consisted of an alleged exposure of Freemasonry which had been circulated for some time in England. Franklin afterward became a Mason and held the position of grand master of the province of Pennsylvania.

CAUSES OF FAILURE IN CHICKEN GAME

The poultry business is developing fast, but a great many people are losing money with poultry. There are reasons for everything, says D. H. Hall, extension poultry husbandman, at Clemson college, who points out four of the main causes of failure in the chicken game.

The first cause of failure in raising poultry is starting off on too large a scale. There are many things for a beginner to learn about the poultry business. He should start on a small scale and gradually grow into the poultry game until he knows every angle of it. He should go slowly at first and then increase his business by degrees.

The second reason why people are not making money in the poultry business is the purchasing of poor stock for breeding and laying purposes. Because some people have pure bred poultry does not mean that they always have the very best. The man that goes into the poultry business should start out with the best stock possible.

The third cause of poor results in raising poultry is the lack of proper equipment. A great many people will try to raise chickens when they haven't the equipment to raise them. Equipment is just as necessary to have as the poultry itself. The equipment does not have to be expensive, but you should have the necessary things to make the handling of poultry easy; for instance a large mash hopper to hold plenty of mash, a large water fountain so that water can be kept before the poultry at all times, and a good poultry house that is ar-

ranged conveniently. The fourth thing that causes failure is the lack of care and attention. If you do not love poultry and if you are not willing to give it your time and attention, you cannot expect very much out of it. You must like the business and be willing to spend 14 hours each day in caring for the poultry if you expect to make a success

Prevent Frosted Combs by Proper Ventilation

In cold latitudes it is necessary for poultrymen to guard against frosted combs. Many people think that the best thing they can do to prevent frosted combs is to keep the henhouse closed as tightly as possible. This is a mistake for it is a fact that a moist atmosphere is much more conducive to freezing than a colder temperature when the air is dry, says a writer in Successful Farmer.

The house should be well ventilated, so that the moisture is quickly carried away and replaced with fresh air. poultry house should have enough open space on the south to equal one-fourth the total floor space, and if it does not have that much open space, it will pay you to do a little remodeling. This open space should be covered with muslin. For this purpose a medium grade is best, one that will prevent wind from blowing through, and still permit a slow circulation of air.

The back of the poultry house will naturally be the warmest and best protected, so it will be wise to have the droppings boards and roosts at the back of the building.

Another important thing to remember during cold weather is to keep the fowls busy. If you go to the poultry house very early in the morning, you will see that the birds get off the roosts and stand around on the floor. If there is scratch feed scattered in the litter, they will go to picking just as soon as it is light enough, thus starting the blood in rapid circulation and lessening the danger of frozen combs.

If you allow the fowls to drink ice water on a frosty morning, it will not only lower the egg production but the males are likely to freeze their

Poultry Hints

Both old and young turkeys should be protected from dampness.

Cod liver oil has worked wonders with confined chicks suffering from leg weakness.

Do not breed from birds of low vitality. This causes poor hatches, weak chicks, and unprofitable pullets.

The matter of ventilating the poultry house is relatively simple, especially if the open or curtain front is used. . . .

Losses from fertile eggs amount to 42 per cent, and from infertile eggs 24 per cent of the total shipped for sale.

Killing a diseased chick is not only a kindness but is good practice from the standpoint of the health of the entire flock. . . .

More and more does the humble but ever busy hen show that she is the real "Bird o' Freedom," in America. More hens can be kept on nearly every

Record in Fight on Bovine Tuberculosis

More Tests in October, 1924. Than Any One Month.

(Prepared by the United States Department of Agriculture.)

More cattle were tuberculin tested during the month of October, 1924, in the nation-wide campaign to eradicate bovine tuberculosis than were ever tested in any previous month, according to a summary of the work compiled by the United States Department of Agriculture. A total of 642,-602 cattle were given the tuberculin test during that month by the force of veterinarians engaged by the government and those co-operating in stamping out this costly cattle plague.

This exceeds by more than sixteen thousand the previous record number of cattle tested in one month. In May, 1924, there were tested 626,257 cattle, which was the highest number until the recent month of October. The total number of cattle now under supervision for the eradication of tuberculosis is 9,198,975. That the work of tuberculosis eradication is popularly supported is shown by the fact that there is a waiting list of more than two and one-half million cattle whose owners desire to have them tested as soon as practicable.

Of the 642,602 cattle tested in October there were 24,440 which reacted to the test, indicating that they were tuberculous. Such animals are immediately disposed of in accordance with regulations for the prevention of their acting as spreaders of the infection of

Cost of Fertilizer Can

Be Reduced by Legumes "Grow more legumes and let nature take care of your fertilizer needs. Let the air help pay your fertilizer

This is the suggestion soil and crop specialists of the Georgia State College of Agriculture make to help keep the cost of fertilizer down. Nitrogen is the most expensive constituent in factory mixed fertilizer, they say, and economy necessitates the using of a part of the unlimited quantities of nitrogen found in the air over Georgia

The clovers and vetches have been found to make available about sixty pounds of nitrogen per acre, and when the whole crop is turned under, the fertilizing value is equivalent to the addition of five or six loads of stable manure.

A good legume hay crop turned under will lead to profitable and permanent farming. It would require four tons of ordinary mixed fertilizer per acre, containing 2 per cent ammonia, to furnish an amount of nitrogen equal to a good crop of vetch or clover. If purchased in mixed form this nitrogen would cost from \$20 to \$25 per ton.

Prune the Fruit Trees

Young trees, fruit or shade trees, require attention every season. The pruning knife should be used quite liberally if the best results are de-There is no doubt that the fruit trees which are headed low prove more satisfactory. They are easier to get at when pruning, spraying and finally when picking the fruit. Grape vines require the same attention, early in the spring.

Control of Apple Scald

Oiled wrappers have proved to be the most practical preventive of scald found so far. The first consideration is prompt cooling after harvest. Then pack your apples, using oiled wrappers for each apple. Such apples should come through storage in much better condition. Write to the United States Department of Agriculture for Farmers' Bulletin No. 1380 for a more complete discussion of the problem.

Cows do not enjoy moldy silage, and it makes horses sick.

Farmers of the United States planted 370,000,000 acres of crops in 1924.

Semi-solid buttermilk is a valuable poultry feed, especially when there

is no home supply of sour milk or buttermilk. Does the snow sift in on the workbench and tools in your shop or

garage? Melted snow is water, and

water rusts.

The horticulturist of the Dominion of Canada has kept well for 26 years by eating 8 to 16 apples a day, he told members of the state horticultural society at a recent banquet.

It is not denied that the robins and some other birds eat the cherries and berries. They also eat the cabbage and other vegetable worms. In fact, they like the worms better than they do the fruit. Even the sparrows are valuable when the cabbage worm season is at its height.

There is little danger of the small gadener overdoing the fertilizing of his soil. The richer the soil the better for the majority of vegetables and flowering plants. It is well at all times to save any kind of fertilizer or anything that can be developed into fertilizer and apply it where most

Part Vitamins Play in Human Organism

In writing of the fate of vitamins in the body, the editor of the Journal of the American Medical Association says it has been discovered that they are stored up in the liver. The conclusion that vitamins are highly essential to the welfare of the living erganism, he says, as so many recent investigations seem to indicate beyond peradventure, is based on the observation of nutritive failure and the appearance of socalled deficiency diseases when some of the food factors referred to are missing from the diet.

"It may almost be regarded as a corollary," he continues, "that, under conditions of a deficit in vitamin-bearing products, the body itself will become impoverished in these physiologically potent factors. For several types of vitamins evidence is now available that this is actually the case. It has been found by Steenbock, Sell and Nelson that the liver is an important center of fat-soluble vitamin storage, varying in its content of this substance with the ration fed. When the diet of the animal becomes poor in vitamin A, however, the liver becomes correspondingly depleted. The depletion of the same organ in vitamin B adequate supply of this factor has been demonstrated by Osborne and Mendell."

Heart Massage Is One of Surgical Marvels

The heart is a pump, and its work can be done for it quite well for a little while by hand, while its own power fails, and it takes a rest. One has to remember that, normally it never has a rest from the moment of life until death. And what happens in cases of heart massage is that the surgeon rapidly makes his way to the organ, and, taking it firmly and gently in the hand, squeezes it so many times to the minute, thus keeping the stream of the blood circulating. If all goes well, the heart gradually recovers itself, and begins to beat of its own accord.

Thus it practically amounts to thisthat a person may actually die and be brought to life again.

There was a time when it would have been thought madness to touch the heart. Yet wonderful things were done in the World war in removing bullets and shrapnel and in repairing heart rents, though often it is better to let sleeping dogs lie undisturbed, and the surgeon is still very chary of touching the great vital organ. For, though the heart is not so fragile as we once fancled, it has a queer temper. Its nervous mechanism is not a little touchy, and when the animal is deprived of an easily thrown out of gear.-London Times.

Organization of Scientists

The Royal society grew out of two small groups of friends, who met occasionally in London and Oxford to discuss scientific questions, about the middle of the Seventeenth century. These were organized into a definite society in 1660, and two years later the society was granted a charter by Charles II and incorporated as the Royal society. Its early meetings took place in Gresham college, and afterwards in Crane court. In 1782 the place of meeting was transferred to Somerset house, and in 1857 to Burlington house, London.-London Mail.

Find Chicken Buried in Walls of Old House

Hickman, Ky.-Workmen razing an old house bere, built early in the Nineteenth century, found on each side of the chimney a walled-in compartment the size of a hen's nest. In each compartment was the carcass of a chicken, well preserved. Old residents expressed the opinion that the chickens had been walled in the chimney to counteract some superstition.

ARTIFICIAL LIGHT IS STIMULUS TO HENS

The use of some form of artificial lighting is a stimulus to laying hens because it offers more hours of daylight and increases food consumption. Its use is now generally accepted not as a proposition of fooling the fowls, but of lengthening the days and partially duplicating spring conditions.

There is some criticism of the use of lights due to the apparent bad results on the health of the birds that is often noticed in the winter.

Some poultrymen feel that if hens are fully matured by fall and are bred to lay no artificial stimulation is needed. Egg production from some flocks will bear out this attitude, but where comparative tests have been made between flocks lighted and unlighted there is no evidence to prove that lighting causes a greater chance for contracting disease.

"Lighting offers an opportunity for greater food consumption, making possible the manufacture of more eggs," says Prof. A. G. Philips of Purdue university. "Late maturing pullets may be pushed along profitably by lighting in October. With pullets maturing early, a fall molt may be delayed and high-priced eggs obtained. In such a case there is usually a letup in production followed by a molt in December or January.

"Where pullets mature normally in October and are in good condition of flesh, it may not be profitable to light them until November or December or possibly not at all. When eggs are wanted in January from the older hens that have molted in the fall, the use of lights may be applied between January 1 and 15.

"An easy time to turn on the lights is at 4:00 a. m., using an ordinary alarm-clock alarm key to connect the switch. The extra feed offered at this time should be grain consisting of corn, wheat and oats and it may be scattered in the litter the night before. At 7:30 or 8:00 a. m. more grain should be fed. A mash hopper containing 50 pounds bran, 50 pounds flour middlings and 30 pounds tankage, should be open all the time. About three times as much grain as mash should be fed when lights are used."

Sprouted Oats Will Aid

Health of Winter Flock Green feed during the winter months will encourage egg production and promote the health of the flock. Cabbage or sprouted oats are especially recom-

mended. Sprouted oats have the advantage of being easily available on most farms. Trays for sprouting oats, made about two inches deep and two feet square with bottoms of plaster lath, are convenient. The trays are supported on an upright frame or rack provided with clears so that the trays will slide in and out. A four-inch space is allowed between trays.

A rack five feet high will accommodate ten trays or enough for two or three hundred birds. The sprouter is kept in a furnace room or other place where the temperature is 60 to 70 de-

Two or three pounds of dry oats are soaked over night and placed in a tray each day. They can be sprinkled frequently and allowed to grow from onefourth to one inch in length before

Maturity in Seven Months

About seven months are required for a chicken to grow to maturity. During that period of growth its feed goes to the making of bone, flesh and feathers. When it becomes mature its feed goes to the making of eggs. If a bird matures and commences laying in the fall she will continue laying all winter if properly cared for. Birds that are still growing when cold weather comes will usually commence laying late the next spring.

Poultry Notes

Provide plenty of clean nests for the laying hens.

Grade your eggs for uniformity in size, shape, and color.

Keep out the cracked, dirty, small, and very large eggs for home use.

Gather the eggs in a well-padded pail or basket and reduce breakage.

Use only sound, strong, standard packages and pack the eggs properly.

Sell eggs to a buyer who pays for quality or buys on a graded basis. When your eggs are of best quality and the buyer purchases them en a case-count or "nest-run" basis, you get

Keep the nests clean and market clean, fresh-looking eggs. It spoils the sale of eggs when they are marketed in an untidy condition.

less than they are worth.

Use the small, dirty and cracked eggs at home. They have a lower market value but are entirely satisfactory for immediate home use.

Keep the eggs in a cool, clean, fairly dry place until marketed. Heat causes deterioration in quality and evaporation of moisture from the egg. Dampness causes the eggs to mold.

MELROSE.

On Sunday morning, Rev. Baugher preached a very forcible and instructive sermon, on "Is the World Getting" better, or worse," in the Brethren

Church here, in town.

Harry K. Shaffer spent the weekend in Hanover, visiting at the home of his father, Wesley Shaffer, and brother, Roy Shaffer. He also transacted business in York, one day.

James P. Zepp, of near Westmin-ster, spent Monday with his brother,

J. Albert Zepp and family.
Cornelius Dice has sold his farm,
near here, to Edward Berwager, and will have public sale on the 10th. and

13th. of February.
Your correspondent received a letter from far-away Alaska, on Jan. 1, mailed at Colovin, Alaska, Dec. 10th. Among other things he says, "I am now 1,000 miles north of Mile 356 Alaska Zone Railroad," to where your letter was addressed. Hence the long delay. This letter cost "Uncle Sam" about \$2.00 to deliver as it will be taken 900 miles by dog team. He lost his all (over \$1000) in a road house fire, and he says as his is a gold country and is digging to locate a "Pay Streak," he is likely to have his pock-

75 feet thick. Recent visitors at the home of J. Albert Zepp and family were as follows: Mr. and Mrs. C. J. Sauble, Mr. and Mrs. Chas. Sandruck, Mr. and Mrs. Wm. Bankert, Mrs. Carroll Shaf-Mrs. Wm. Bankert, Mrs. Carroll Shaffer, Mrs. Ralph Laughman, Miss Kate Leese, Florence Frock, Mary Lippy, Pauline Gentzler, Annie Sellers, Minnie Leese, Hilda Leese, Minnie Shaffer, Lillie Shaffer, Grace Baumgardner, Ruth Fuhrman, Nathaniel Shaffer, Claude Leese, Curvin Lippy, Clinton Markle, John Hundertmark, Walter Sullivan, John Eisenhuth, Jack Miller, Harry K. Shaffer. huth, Jack Miller, Harry K. Shaffer, Mr. and Mrs. Fletcher McAlister,

Harry Balden. Our faithful old friend, Nathaniel Shaffer, once a resident here, now a resident of Buck Co, Pa., is here on a visit. He left the cold regions where he was "snowed in," since the early part of the year, to live in a temperate climate. He says with 28 inches of snow on the level and the thermometer at 14 degrees below zero it was most comfortable sitting by the warm stove eating chestnuts.

A man in Krideler's neighborhood, who is an extensive traveler, told your correspondent that at this time last year he was enjoying Florida waters, bathing.

Representatives of the Melrose Canning Company, of Littlestown, Pa., and Baltimore, held a meeting here one day last week, appointing John M. Eisenhuth to contract for beans and tomatoes, at their office here in town, at any time. The Company is pleased with the outlook for

Humorist Could Also Be Bitter at Times

For real bitterness the following (from Mark Twain) is hard to match: "A myriad of men are born; they labor and sweat and struggle for bread; they squabble and scold and fight; they scramble for little mean advantages over each other. Age creeps upon them; infirmities follow; shames and humiliations bring down their prides and their vanities. Those they love are taken from them, and the joy of life is turned to aching grief. The burden of pain, care, misery, grows heavier year by year. At length ambition is dead; pride is dead; vanity is dead; longing for release is in their place. It comes at last-the only unpoisoned gift earth ever had for them-and they vanish from a world where they were of no consewhere they were a mistake and a failure and a foolishness; where they have left no sign that they have existed--a world which will lament them for a day and forget them forever. Then another myriad takes their place, and copies all they did, and goes along the same profitless road, and vanishes as they vanished—to make room for another and another and a million more myriads to follow the same arid path through the same desert and accomplish what the first myriad, and all the myriads that came after it, accomplished-nothing!'

And they called Mark Twain "America's greatest humorist"!-Pathfinder Magazine.

Observation Relieved Monotony of Illness

It has often been my feeling that perhaps the happiest man is the healthy bookworm who, by laying out a quarter for a second-hand volume, can get as much pleasure in a week as the other fellow, more dependent upon expensive entertainments and indulgencies that draw on his wad. The former is among that happy class that can say with the poet, "My mind to me a kingdom is; such pleasant joys therein I find."

But I discovered his equal the other day when visiting a sick friend in Outremont whose house adjoins a vacant lot, says the Montreal Herald. I found him sitting comfortably on the veranda overlooking that lot and studying it through a pair of field

He asked me: "How many kinds of plants would you suppose there is in that field?"

"About half a dozen," I replied. "I have already found 77," he assured me, and went on to name them. Confinement to a veranda did not worry him much.

Boys Find Skeleton Clad in Old Spanish Armor

La Junta, Colo.-Discovery of a skeleton in ancient Spanish armor 18 miles south of here by several boys has attracted the attention of historians, who believe the skeleton may be that of a member of a band that traversed this part of the country under the leadership of the intrepid explorer, Don Vasquez Coronado. The armor plate is mostly covered with ivory. On it are figures believed to be the Roman numerals, but as vot not decimbered.

DIED.

JOSEPH BELT.

Joseph Belt, one of Carroll county's best known citizens, died at his home in Clear Ridge, near Uniontown, on Friday. Death was due to a stroke of paralysis. Mr. Belt had been ill only a short time. He was in his 65th, year.

When a boy of 19 Mr. Belt entered the car department of the Western Maryland Railroad Company. During the administration of President Roosevelt and Taft he served as superintendent of the car department in the canal zone on the Isthmus of Panama for 12 years. Deciding to retire he bought a small farm near Wakefield known as the Cassel farm. In 1916 while residing on his farm he was offered a high position in Ecador, South America. He accepted this post, but owing to climate and poor health remained only one year, returning to

Carroll county. He was twice married, his first wife having been Miss Carroll. Of this union one daughter, Mrs. John Mr. and Mrs. U. G. Crouse and this union one daughter, Mrs. John daughter, Dorothy, called on B. P. Schuey, Union Bridge, survives. His Stitely and family, at Friendship, on second wife was Miss Ella McGowan, Schuey, Union Bridge, survives. His who survives with two brothers and Mrs. A. J. Graham visited Mrs. one sister; Wiley Belt and Leonard Belt, Baltimore, and Mrs. Josephine Elgin, Frederick. Six grandchildren also survive: Harry, Edmund, William, Nellie and Madeline Schuey, Union Bridge, and Thelma Belt, Baltimore.

Start Spring Broods Now.

Early Spring frys or broilers bring highest prices, early pullets lay when eggs are at their peak.

BABY CHICKS.

Beginning January 28th., and every Wednesday thereafter, until the close of the season, we will have Baby Chicks for sale.

A total Incubator Capacity of 20,736 eggs, allowing us to set about 7000 eggs weekly, enables us to accept and fill large orders.

Our modern methods of incubation results in strong, vigorous Chicks. The low temperature at which they are hatched removes danger of over-heat-

Buy Our Chicks and Watch them Grow! CUSTOM HATCHING.

We solicit your orders for Custom Hatching. We give your eggs every attention, and have had remarkable success hatching for others last season. Our Buckeye Mammoth Incubators "hatch every hatchable egg." We invite you to come in and see for yourself just who we produce stronger chicks for you from your eggs. It costs no more to have them hatched in a good ma-

Orders placed now for any time during the season gives you the advantage of your own selection of time. Later, we can only do the best we can. Early orders always have the preference. Arrange your plans now. Give us a trial,

Reindollar Brothers & Cof Feeders Grit LEADING HARDWARE DEALERS

THE WINCHESTER STORE

Your Incubator demands the very best grade of Kerosene to insure the utmost number of eggs hatched, and the best health of your baby chicks. For over a generation and a half The Red C Oil Company has furnished to Incubator operators a Kerosene so fine, so efficient and so economical that it has practically raised hatching from an uncertain, unbusiness-like gamble to a definite,

When the purchase of eggs requires so considerable an outlay of actual money, and when the burning of even the poorest, cheapest Kerosene in your Incubator will amount to a sum worth consideration, isn't it highly worth while to burn the Kerosene that will give the best, most uniform, most dependable heat?—the Kerosene that will burn absolutely free of smoke and odor? The Red COil and The White COil, same except in color, is the one reliable, definite factor in the incubation of your eggs. The value of the eggs themselves can never be determined absolutely accurately in advance; the weather that will

greet the baby chicks cannot be forecast with precision. Consequently, any factor in hatching which can be relied on implicitly--which is a proven means of insuring a better hatch---deserves to be adopted. That is why hundreds of Incubator operators, many right around you, demand The Red C Oil or The White C Oil, same except in color, for their Incubators

The Red C Oil A brilliant ruby red to color your lamps

The White C Oil The pure white, crystal clear, clean Kerosene

One Mother's Tribute

to Daughter-in-Lau

When I first saw my son Tyler's angelic manner under his wife's regime I held my breath, because in the old days Tyler in a beatific state of mind | meant Tyler getting ready to break out in a new place.

But as time goes on and the serenity remains unbroken. I repeat to myself that perfect line from the "Just So Stories"-"Not always was the Kangaroo as now we behold him"-a text that I recommended to all mothers who have seen their brisk sons neatly trained by well-selected wives.

Indeed, the longer I live the more ready I am to believe that a young man's wife may be better acquainted with his actual current present day self than his mother can possibly be. My daughter-in-law sees in her husband a forceful man of affairs on whose judgment she implicitly relies. I respect his judgment, too, in a way, but I cannot help knowing that he is the same Tyler who, at the age of four, howled himself into a high fever one day because I would not let him lead a bloodhound in the parade when "Uncle Tom's Cabin" came to town.

Mothers view their sons with what psychologists might call an "associative fringe." We are handicapped by assorted memories. We cannot estimate our sons exactly as their wives estimate them. They came upon us at a different stage.—"A Maternal Philosopher" in the Atlantic Monthly.

No other lye is packed so safely and conve-No other lye is packed so safely and conveniently, or is so economical—not a bit wasted. No other lye or soap cleans and disinfects so easily and thoroughly as Banner Lye. It is not old-otyle lye. Odorless and colorless; the greatest cleaneer and disinfectant the world has ever known. Use it for cleaning your kitchen, cellar, sinks, dairy, milk-pans and bottles, for coftening water, and the labor three between a delegating water, and the labor three parts and cleaning water. of washing and cleaning will be cut in half.

Makes pure soap

and saves money besides. A can of Banner Lye, 5½ pounds of kitchen grease, ten minutes' easy work (no boiling or large kettles), and you have 10 pounds of best hard soap or 20 gallons of soft soap.

Banner Lye's sold by your grocer or druggists. Write to us for free booklet, "Uses of Banner Lye."
The Penn Chemical Works Philadelphia U.S.A.

First Coinage of Silver

Silver was first coined on the Isle of Aegina. Here the ancient Greeks stamped a turtle on their first silver coins over 700 years before the Christian era. The first silver coins in the United States were issued by the Massachusetts colony, which minted small silver coins, familiarly known as the pine-tree shillings. The mint was closed by order of the crown in 1684. The first coins made by the United States government were in 1793.

Papal Triple Crown

The tiara, a high cap of gold cloth, encircled by three coronets, with a mound and cross of gold at the top, is the triple crown of the pope. It is ornamented with precious stones and pearls, and is decorated with three royal diadems. It is without inscription. A symbolic meaning has been found in the triple crown, as representing the authority of the pope over the church "militant, expectant and triumphant."

Our Letter Box

Under this heading we will be glad to publish letters from former Carroll-countians, who are now away from home; and especially letters from those whose home was Taneytown. These letters are very interesting, to many, and we should be glad to publish one or more each week. On account of their length, it is not always convenient to use letters on first page and convenient to use letters on first page, and will hereafter use the 4th. or 5th. page.

FROM BECKLEY, OREGON.

Dear Editor: I am enclosing a check of \$1.50 for which renew the Record for one year. It just takes one week for the Record to get here, but my brother and I are always glad to get it, as it gives us so much home news, and it is lots better than a letter, as we get it every week, and we don't get letters every week from home.

I will write you a few lines about this country, and the changes that have taken place, and some of my experiences since I have been here.

My brother and I filed on 320 acre homesteads adjoining each other, the spring of 1910, and in the fall 1910 we established residence. nearest railroad point was Vale, Oregon, which was about 175 miles. I hauled my lumber for cabin 110 miles. I was 13 days making the round trip. The nearest P. O. and store was about 60 miles.

But things have changed a lot since we came here, in the last 14 years. We have two good stores and 2 P.O. We are just 4% miles from Beckley, the store where we do our trading, and get our mail, and there is a good school house at Beckley. They have a very good school there. There are 7 school houses in the valley now, and when we came here there were none.

We get our mail twice a week from Crane, Oregon, our nearest railroad point, 80 miles. Our auto stage leaves Blitzen and Beckley, Monday and Fridays; leaves Crane Tuesday and Saturday, two days for each trip. The railroad was extended to Burns, last Fall, about 35 miles. It is at our County Seat now, which is 84 miles from our place. It has been talked about building the road down through the Blitzen Valley, and over into Cattaw Valley where we live, for the last 10 years. I think the time will come when it will be done, and it don't look like it is very far off.

I hope it comes, as my brother and I have 1040 acres of land, all in one body. We just bought 400 acres last fall, with a good rock house on, all fenced and other buildings on it. now live in the rock house and it sure is warm; lots of difference between living in one of those lumber cabins. We sure needed a good house this winter, as about the 23rd. of December it was 43½° below zero. It was around 35° and 40° below zero for about a week, around Christmas time; but now it is not very cold. We have about 3 inches of snow now, and it looks like we may get some more before morn-Prospects look very good for ing. good crops this year, as we have had more moisture this winter so far, than we had all last year.

I sure would like to see this country make good, as a person that goes through the experiences that I did on one of these homesteads, is sure entitled to a good fortune. It is just 12 years since I was in that well accident, when Wm. Carroll and I was in a 84 foot well. 6 days and 6 nights without any food or water and Carroll had both legs broken and I was badly cut and bruised, which I still feel the effects of.

And about 4 years after I was out of the well I had to have an operation, which was caused from the well then were constructed to carry off the accident. So I think I am entitled to all a person can get out of this land, and the only way a person can do that is to stay till the last dog is

Well, I will close for this time as I am not very much of a hand to write letters, but we sure enjoy the letters that you have in the Record. Wishing you and all of the readers of the Record a success

Yours Truly, KOONTZ BROS. By Robert L. Koontz, Beckley, Oregon. Jan. 14, 1925.

ANOTHER FLORIDA LETTER.

Editor Record :-

Will you please send me the Carroll Record to Plant City, as I will stay here for two or three weeks. Also send me some back papers if you have them to spare. I can get rooming and board cheaper here than I can in Tampa or Miami, and better railroad and bus line conveniences than at either.

I was over at the Sulphur Springs, and the Alligator farm, two places no one should miss that comes to Flori-

Today was a record breaker for strawberries and vegeables in Plant City. I won't know before tomorrow how many were shipped. I was at the station this morning, and the express agents told me 19 cars of berries onehalf by express and the other by freight. There are two roads cross here and the platform is L shaped. Buyers stalls, 46 in all, then quite a number don't have any stalls, that ship by freight. The price per quart 17 to 20c. This morning they didn't ship quite as many. Yesterday's shipment was over 100,000 quarts.

I send you a card, so you can see how they grow in Florida. They are about as large as a guinea egg, so it don't take long to pick a quart; but I don't think they have as good a flav-

or as the Maryland berries.

Now, I will not write any more about strawberries, but it is such a sight to see them come in every day, that you can't help but to tell them. I was out at the Lakeland Fair today. They had no live stock of any kind, but their poultry exhibit was very good, and the fruits and vegetable exhibits were wonderful. The nicest new potatoes, tomatoes, have reduced chicken raising to a sci-cauliflower, cabbage, egg plant, red ence, and you will find that practicalbeets, turnips, squashes, lettuce. peas, ly all of your individual problems have string beans, oranges, pineapple, ba- been solved by the various authorinanas, grape fruit and about 50 other ties. things that I didn't know the name

for, things that we can't raise in Maryland.

I often wish that some of the Taneytown boys could be here, just for one week, as "tin can tourists" they call us down here. I know Cal. Fringer would enjoy it, and Sam Ott and Jacob Buffington.
Yesterday morning I was talking

with a policeman in the freight yard, and in came an old trucker driving an old mule in a one-horse wagon, and had the kind of harness on they have down here-traces, hames, collar, bridle and rope lines. The police wayed to him to get to one side that the automobiles could pass, so I asked him what he thought of the harness. He looked at me and laughed and said "that's the way I used to drive when I was a boy. My father had two mules, and the one was lazy, from the time he came in the world, didn't matter how much you beat him you couldn't make him trot."

He said the only thing he was afraid of was to put some nails in an old tin bucket, and rattle them behind him, and he would run to kill him-So, one time he rattled the bucket and the mule started out, and he was going to pull him in, and the bit broke, and off the mule went, and the longer the faster. He said he knew that wouldn't do, as something would happen, so he reached down and unhooked the traces and out went the He run on a little piece, stopped and turned around, and back at him setting on the old wagon. He looked around and found a piece of wire that made a bit for the bridle, hooked him up again and went on. He said he was always careful how he rattled the bucket after that.

My best regards to all friends. I have been in good health and take plenty of exercise.

E. M. DUTTERER.

RECLAIM 3 000,000 ACRES IN MISSOURI

Lands, Once Worthless, Now of Much Value.

Cape Girardeau, Mo.-What engineers describe as the world's greatest drainage reclamation project is now nearing completion at an ultimate total cost of more than \$50,000,000. Nearly 3,000,000 acres of swamp lands in the St. Francis river basin of southeastern Missouri and northeastern Arkansas will have been made tillable.

Excavations will total upwards of 500,000,000 cubic yards, according to engineering estimates, or more than in the construction of the Panama canal. Lands which were virtually worthless now are valued at from \$40 to \$100 an acre. Corn, wheat, cotton and numerous other crops are successfully raised on the soils built up by deposits brought down by the Mississippi and other large rivers.

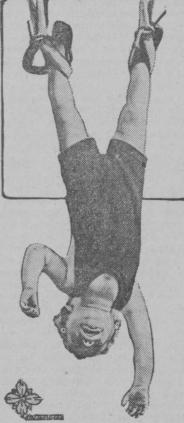

With the removal of stagnant water the mosquito has disappeared, and with it malaria. Homeseekers have poured in by the thousands.

The Little river drainage district, the largest ever organized, has authorized a new \$5,000,000 bond issue to provide additional drainage and flood protection for its 500,000 acres. The plan originally adopted and car-

ried out provided for the diversion of the water of the hill streams by digging a channel on the northern border of the district to the Mississippi river. This was paralleled by 40 miles of levee. More than 700 miles of ditches surface waters. These ditches, which are 100 feet wide and 15 feet deep, empty into Big lake, Arkansas.

The cost of drainage has been met by bond issues, retired in 20 years by taxes levied on the lands according to benefit. The average cost has been around \$20 an acre.

IT'S IN THE BLOOD

Just me mis mother is little Adrian Primrose, seventeen months old, pictured above executing one of his difficult gymnastic stunts, the like of which have won him the name of world's strongest baby. His mother is Ruth Clayton, celebrated European contortionist.

CHECK RAINFALL BY OCEAN WARMTH

Find New Way of Predicting Precipitation.

San Diego, Cal.—There is a direct relation between the temperature of the ocean and the seasonal rainfall in the same region, according to George F. McEwen of the Biological institute at La Jolla, Cal., who has reached this conclusion after extended research.

Using this theory, Mr. McEwen has predicted that the rainfall in San Diego and vicinity this year would be five inches more than the average for the last eight years. According to the hypothesis, low summer temperatures in the ocean mean increased rainfall in the winter, and higher temperatures indicate less precipitation.

"The moisture of the air over the North Pacific ocean," explained Mr. McEwen, "is continually replenished by evaporation from the ocean surface. The amount of the water vapor available for precipitation upon the land is proportioned to the mass of air flowing in from the ocean.

"It has long been known that a high pressure area over the North Pacific, centered 1,000 miles or more west of San Luis Obispo, reaches its maximum intensity in late summer and diminishes till about February, when in some years it disappears entirely, and again increases to a summer maximum. Therefore a summer in which the ocean 'high' is relatively great should be followed by a relatively great transfer of air landward during the winter or rainy season.

"Numerous barometric observations over the ocean, suitably distributed both in space and time, would serve to determine the amount of air forming the Pacific 'high.' Foreknowledge of the amount of air available for transfer landward would indicate in advance whether to expect a wet or dry season."

Mr. McEwen said his observations had indicated that a change in ocean temperature of one degree Fahrenheit corresponded, on the average, to a difference of two inches in rain over the coastal region of southern California.

PRESIDENT OF A BANK

This is Washington's only girl bank president-a pretty bobbed-haired girl, Miss Mildred Yates, whose bank has 200 depositors and \$27,000 total deposits. Miss Yates is the president of Central High School bank and has on her staff ten girls and three boys. Depositors are students, members of the faculty, janitors and others connected with the school.

Lodge Desk Long Used by Bay State Members

Washington.-The desk in the senate chamber used by the late Senator Henry Cabot Lodge during many years of his service in that body was the same formerly used by two other distinguished senators from Massachusetts, Charles Sumner and George Frisbie Hoar. There is a report about the Capitol that at a time even earlier the Lodge desk was used by Daniel Webster.

When the senate vacated the chamber now occupied by the Supreme court and moved to its present quarters in the new wing of the Capitol, the desks, including that which Senator Lodge used and which had long seen service, were retained. As new states were admitted into the Union and new senators entered the chamber desks of the same style were constructed for them.

These relics are highly cherished by the senate, and it has been the unbroken rule, so far as the memory of the oldest senate employees runs, to refuse permission for the removal of any of them.

****************** Letter, After 60 Years, Reaches Destination

Medina, N. Y.—A letter, written on March 13, 1864, by a Civil war soldier at Fort McHenry, Baltimore, Md., has just been received in Medina. The letter was written by James Fisk to his parents, Mr. and Mrs. Henry Fisk, and it has been delivered to his sister, Mrs. Sarah Smith of Shelby, a hamlet south of Medina, who now is eighty-four years old. The parents died long

The only explanation for the delay is that the letter was held for the censor and laid aside with army records and overlooked.

TOWN SEEKS TOURIST TRADE

Creede, Colo., Once Scene of Great Boom, Begins Struggle for Existence.

The story of the struggle of a small mining town in Colorado for existence has just been told by the Department of the Interior. It is of Creede, in the midst of the great mountain group called San Juan mountains, near the Rio Grande, just below the picturesque canyon of Willow Creek. The citizens of Creede are now doing their best to make their town a stopping place for tourists, to offset the decline in min-

The first mining claims in the Creede district, as stated in a report by the Department of the Interior, through the geological survey, were located in 1883, but the great boom, which rivaled anything in the early history of other mining districts, did not begin until late in 1891, when perhaps 10,000 people rushed to the camp, a railroad was extended to it and the small amount of flat land available in the deep canyon was built up almost solidly. Early in the following year a disastrous fire destroyed most of the new city. The city was rebuilt, but the boom subsided almost as rapidly as it had grown.

It was in June, 1891, that two prospectors, Theodore Renninger and Julius Haas, grubstaked by two butchers of Del Norte, set out to prospect the Creede region. It is said that the search for their strayed burros led Renninger to the outcrop on the famous Last Chance claim. The poor surface indications led him to define his claim the "Last Chance." A short time later he sold his share in it for \$65,000, but by December, 1892, the mine had produced silver and other ore valued at nearly \$1,500,000.

After the great boom the district settled down to a more regular existence and has produced metals valued at more than \$40,000,000, about half of which was distributed as profits. The metal produced in largest quantity is silver, which makes up about two-thirds of the total value of the metallic output. Lead makes about one-fifth and gold about one-fifteenth.

Most of the metal mined was taken from a single vein which extends along a great fault or earthquake rift that is several miles long and cuts volcanic rocks. Many thousand years ago the rocks on one side of this fault were dropped down more than 1,500 feet. A mining tunnel follows this vein for about two miles. Some ore has been produced from other veins, most of which extend along faults.

VALUE OF CENTRAL CHURCH

Edifice in the Downtown District of Any City Is an Invitation Pleasant to the Stranger.

What stranger in a city has not welmed the sight of a church, the sound of its music and worship, in the heart of the business district or near the hotel which had been made a temporary home? Both to the visitor in a city and to the resident there is an element of convenience and invitation about the downtown church that somehow sets it aside from all other places of its kind.

There is a peculiar flavor as well as usefulness about churches that stand in the midst of the busy, everyday scenes of the modern bustling city. Every visitor to lower Broadway, New York, knows the appeal of old Trinity, the coolness of its walls, the soothing power of its chimes in contrast to the grinding noise of the streets and the refuge the ancient edifice affords to one who would step aside for a moment from the crowded life of a metropolis.

Services of yet other kinds are afforded by institutions of the type of Tremont Temple in Boston. The downtown church has perhaps the easiest access to men and women who ordinarily would not be expected to concern themselves greatly about the affairs of religion.—Kansas City Times.

Town With Many Lakes.

Winter Haven, in Florida, suffers from an embarrassment of riches in the form of lakes. The town, which has about 2,000 people, is entirely surrounded by fresh-water bedies, large and small, and the avenues of escape into the country are few. If Winter Haven should ever get its army of lakes hooked up with canals, the "mariners" who attempt navigation therein can spend as much time on a centinuous voyage as large ships require in crossing an ocean. An elaborate system of navigating charts would be required to avoid confusion and the anneying mistake of getting "into the wrong pew."

Religion as Needed.

The soldiers marched to the church and halted in the square outside. One wing of the edifice was undergoing repairs, so there was room for only helf the regiment.

"Sergeant," ordered the captain, "tell the men who don't want to go to church to fall out." A large number quickly availed

themselves of the privilege.
"Now, sergeant," said the captain "dismiss all the men who did not fall out and march the others in-they need

it most."-The Continent.

Fifteen Little Rules

That Make for Success employer advertised for a typist. Six applicants were interviewed. Two asked, "What are the hours?" Two asked, "What make of typewriter do you use?" One asked, "How long a holiday do I get?" and the other wanted a job. She got it.

The successful man lengthens his stride when he discovers that the signpost has deceived him; the failure looks for a place to sit down.

To yield is easy, to resist is hard. Grapple the first difficulty that comes up. Wrestle till you down it, if it takes till break of day.

Concentrate all your thoughts upon the work in hand. The sun's rays do not burn until brought to a focus. The soundest salesmen make the

least sound. Poor work will make you poor.

If you feel yourself the victim of hard luck there is a cure for you. Try hard work.

Some men move through life as a band of music moves down the thoroughfare, flinging out melody and harmony through the air to everyone far and near who listens.

Many a man has made a needless failure because for purposes of immediate gain he has let himself lose the reputation of dealing fairly and generously with others.

Beware of the man who is always confessing his faults but never trying to correct them.

Don't get so interested in what you're going to do tomorrow that you don't do anything today. Do you love life? Then do not

squander time, for that is the stuff life is made of. Wisdom is knowing what to do

next, skill is knowing how to do it, and virtue is doing it. Men are neither born nor borne to

success. Each must earn it. Give a promise with caution and keep it with care.-From the Anvil of

Seek Indian Relics

A hundred pounds of colored beads, scores of brass ornaments of all kinds, many other curios besides several leather pouches of what is said to be war paint, have been unearthed by scientists of the history department in the University of Washington, on the lower Elwha river in the northwest corner of the United States. The Indian relics were discovered by digging in an old burial ground, and while some of the articles reflect the influence of early white traders there are many which appear to have been buried generations before explorers invaded the northwest. Evidence was unearthed that at some distant time either war or pestilence visited the Northwest tribes and took great toll. This was indicated by forty skeletons found in one grave. Increased efforts are to be made to recover enough of the rare specimens of aboriginal cul ture to enable scientists to identify the origin of the first inhabitants of the heavily timbered northwest re-

Audiences Warm Theaters

Large, well-filled theater audito riums are kept comfortably warm ever in cold weather, with little or no fire in the furnaces. The explanation is were puzzled, until they discovered that that under normal conditions the average human body constantly radiates into the surrounding air about 425 heat units. The total volume of heat obviously is considerable if the audience is large. Investigators have found further that if the play on the boards is exciting the output of heat from the human furnaces is measur ably increased, the total heat being proportional to the number and intensity of the thrills and climaxes in the play. Acts and scenes that evoke peal after peal of laughter are almost as effective heat producers as tense dramatic scenes. - Pathfinder

On a Diet

Little Ruth Fishback, daughter of Mr. and Mrs. John Fishback of Brendenwood, was sitting on a log, which was on the hearth of the fireplace at her home one night recently.

On being questioned by her mother as to what she was doing and why she was so quiet the child answered: "I'm playing I'm on a diet."

When Ruth saw the misunderstanding frown on her mother's face she replied, "Isn't a diet a thing you're on where you don't get anything to eat?" The rest of the evening was spent in explaining.—Indianapolis News.

The Deepest Sea

The discovery of a spot in the Pacific ocean, southwest of Japan, 32,636 feet deep, will not greatly astonish oceanographers, for the Pacific has long been known as the deepest of all the great seas of the globe.

Nowhere else has any depth been reached as great as 30,000 feet, but in the Pacific as many as ten soundings have been made exceeding that figure. In the Atlantic only two places are known with depths greater than 24,000 feet, the deepest being a spot north of the West Indies, where the lead found bottom at 27,972 feet.

What He Left

Uncle Henry Jones had died very suddenly, and a distant relative of the relict was offering her condolences. Finally the lady got round to the point where she felt she could decently ask a burning question. "And what did poor Henry leave?" she inquired sweetly.

"Leave?" snorted the widow. "He left the barn only half painted, just as I told him he'd do!"—Australian

Christian.

East End of City Is Generally the Poorest

The "east end" of a town is generally the poor end, while the west end is generally the aristocratic section. There are few exceptions to this rule, if any, and the most natural explanation is, that in countries of the Atlantic seaboard the prevalent wind is from the west and southwest and that, therefore, the richer classes naturally select their residences as far to windward as possible, in order to avoid the smoke and grime of the city proper.

English and European towns, moreover, for the most part, grew up centuries ago on the banks of rivers, and since the westerly bank of the river is generally the sunniest, another explanation is supplied.

No theories of this kind, however, will be found wholly sufficient, for in almost every land, and through long ages, the same phenomenon has been noticed.

Probably the most satisfactory explanation is that the time of leisure and recreation coming toward the close of the day, people of all time have naturally turned to that period for the principal meal of the day.

Why Industrial Workers Have Short Span of Life

Industrial workers have eight years less expectation of life than office workers, Dr. Louis I. Dublin, statistician of the Metropolitan Life Insurance company, declared at the industrial conference of New York state.

Doctor Dublin urged founding under the state department of labor, or another agency, of industrial clinics to study and treat cases of occupational disease among workers, reports the New York World.

In addition to 2,000 deaths each year in this state from occupational accidents, specific diseases afflict the worker, Doctor Dublin said.

Among the most virulent are tuberculosis, especially among stone cutters, sand blasters and grinders; pneumonia and the degenerative diseases caused by exposure and strain, and poisoning from lead, brass, mercury, arsenic, aniline, wood alcohol, hides and skins.

Doctor Dublin called on the 170,000 physicians of the state to consider industrial diseases more seriously and to help fight them.

Arthur Williams, president of the American Museum of Safety, said out of 41,000,000 employees an average of 2,500,000 are on the injured list all the time, a \$1,250,000,000 economic loss yearly.

Why Dog Kept Fat

Their dog being languid and out of sorts, an excellent Parisian couple took it to the veterinary surgeon, who advised them to feed it on macaroni. They doubted whether the patient would take kindly to this form of diet, and their fears were justified. The dog sniffed disdainfully at the macaroni and turned away. They persevered, and so did the dog. This went on for several days, and the dog, instead of pining away, was as fat as ever. They the cat, evidently a sympathetic friend, was raking bones and bits of offal out of the garbage boxes and bringing them to the dog, who took cover and devoured them with relish.-Continental Edition of the London Mail.

Why Called Saladin Tithe

The Saladin tithe was a tax levied in England in 1188 for the purpose of raising material support for the Crusaders, who had gone on or were going to Palestine to fight the powerful Saracen chief, Saladin. The chief interest still attached to that tithe lies in the fact that it is the first instance in English history of a tax on personal property. One-tenth of all movables or of their value was exacted from all the king's subjects, clergy and laity alike, except those who had themselves "taken the Cross," that is, joined the crusade and taken up arms against the infidel. When there was doubt respecting the value of a person's movables liable to taxation, the value was assessed by a special jury.

Why He Made the Change

Mark Twain, while at his summer residence, prepared one evening to take a drive and, expecting to remain out until late, told his hostler that he need not wait for him. He instructed the man, however, when he had finished his work to lock the stable and place the key under a stone, the location of which Mr. Clemens described with much exactness. When the humorist reached home after his drive he was surprised to find that the key was not in the place selected. When his patience had been exhausted he awoke the hostler, who explained, as he started out to find the missing key. "Mr. Clemens, I found a better place te hide it."-Pathfinder.

Why City Air Is Bad

Every time a ton of coal is burned in the family furnace 17 tons of gas go up the chimney, 16 of which are the gases of the atmosphere, either free or in combination with the elements of which the coal is formed. A little more than 12 tons are of nitrogen, which goes through the fire unchanged. Nearly four tons of oxygen are needed to burn the coal and this oxygen all goes up the flue as carbon dioxide, sulphur dioxide and water vapor. Most of the coal, 1,500 pounds or so, alst goes up the chimney, principally as carbon dioxide, less than one part in a hundred forming smoke.

= | Far North Also Has

Its "Emerald Isle"

Were not the title pre-empted, Codiak, in the Katmai district of Alasaa, might have been called the 'Emerald Isle" quite as well as Ireand, for its situation in the Pacific s similar to that of Ireland in the Atlantic ocean, is the assertion made by a writer in the Washington Star.

Although the Island of Kodiak is 100 miles from Mount Katmai, which in June, 1912, gave one of the most tremendous volcanic explosions ever recorded, it was buried nearly a foot deep in ash. The ashy blanket transformed the "Green Kodiak" of other days into a gray desert of sand, but after a period of two years the ashladen hillsides were again covered with verdure finer than ever before.

In the words of a resident of Kodiak, "Never was such grass known before, so high or so early. No one ever believed the country could grow so many berries, nor so large, before the ash.

The island owes its climate, as does Ireland, to the tropical ocean current which bathes its shores. The eastern half of the island is occupied by a forest of spruce, whose trees reach a great size. Then comes luxuriant grass land, equal to any grazing land in the United States, and finding a parallel only in the "guinea grass" of the tropics.

Armenians Have Long Survived Other Races

The Armenians have remained unshaken in all vicissitudes and by their courage have preserved until our days their nationality, their language and their customs, asserts Herbert Welsh in the New Armenia.

The races that the Armenians knew in their infancy have vanished from the face of the earth. Their brothers, the Phrygians, are today only a vague memory. Among the contemporaries of the Armenians, only the Hellenes, the Italiotes and the Gauls have survived, not, however, without undergoing many changes, and abandoning many of their former customs. Except the Greeks, one must seek the kinsmen of the Armenians among the nations who were brought from the steppes of the North toward the shores of the Mediterranean by the same flood that brought the ancestors of Haik toward Thrace.

It can clearly be seen that the titles of nobility of the Armenian race date back to more than 3,000 years before our era, and that they are much more ancient than those of most of the European peoples. About the time when Rome was being founded, Haik, the eponymous hero of Armenia, led the Armenians to Ararat. The Persians were just commencing their political life when Armenia had already constituted herself a state.

Astronomical Theories

The naval observatory says the belief is commonly held among astronomers that Mars is an older planet than the earth. The old theory of the origin of the solar system, called the nebular hypothesis, was first proposed by Laplace a hundred or more years ago. According to his view, the sun far as the orbit of Neptune. In the process of shrinking to its present size it left bits of itself behind, each of which became a planet; so that the farther out a planet is, the older it is. However, there are many astronomers who do not accept this theory; several different theories are now given to explain the origin of the solar system.

Preserving Trees

Large wounds in trees made by the removal of branches of considerable diameter may be protected by painting the cut surface with a heavy coating of white lead. A large number of waxes, paints and washes have been tried, and the conclusion has been drawn that any substance which is not corrosive or detrimental to growth and which will protect the heartwood from the attacks of rot spores, will prove a satisfactory covering for a cut surface. Among such substances may be mentioned white lead, yellow ocher, coal tar and grafting wax.

Awakens New Hope

Some enterprising California citizen discovered that goldfish are much more valuable in a pond of stagnant water than in a glass bowl. It is said that a few goldfish placed in sluggish water where mosquitoes breed will in one season eat every vestige of mosquito larvae, freeing the neighborhood of this pest. Just about the time we had given up all hope that this metallic colored fish had any value other than as a parlor pet, along comes this news dispatch. There is hope for the gar pike yet .- Detroit News.

Oriental Rug Designs

Authorities on oriental rugs say that the rug itself typifies the universe and the various designs the ever-changing course of life. The principal color, if red, typifies life of victory; if blue, royalty; if white, purity: if green, devotion, and if black, evil. In patterns the Swastika means good luck; the flower and knot, fortune and life everlasting, the circle, immortality. The star of six points represents Allah.

Our Inquisitive Youngsters "Uncle Tom, what are those little

square holes in your desk for?" "Those are pigeon holes, my dear." "When will the pigeons be back?"-Boston Transcript.

IN 1863 Mrs. McClintock, widow of a famous Oil pioneer, died and left her entire fortune to her adopted son, John W. Steele. The way John squandered the tremendous fortune he inherited won him world fame. The set out to "paint the country red". He gave away thousand-dollar pins. He walked the street with paper money stuffed in his button holes, for the urchins to grab. He a hack, and then give the driver enough money to buy for himself. He bought and rented hotels and theaters for sport. He bought a minstrel show and toured the country. Steele once spent a hundred thousand dollars in a day! He often explained that he could never rest until he had spent every cent he had. "Coal Oil Johnnie" became a household word; then his money gave out. ¶ And then "Coal Oil Johnnie" settled down as baggage master in a little Nevada town!

Coal Oil Johnnie wasted money purposely. Others of us are apt to waste money without realizing it. Poor Kerosene is an unnecessary waste. Always insist on The Red C Oil or The White C Oil, same except in color, and you'll have the most economical, most serviceable Kerosene for your Lamps, Stoves and Incubators.

Lesson for February 1

THE VINE AND THE BRANCHES

LESSON TEXT—John 15:1-17.
GOLDEN TEXT—"He that abideth in me, and I in him, the same bringeth forth much fruit."—John 15:5. PRIMARY TOPIC-Being Friends of

JUNIOR TOPIC-The Vine and the

Branches.
INTERMEDIATE AND SENIOR TOP-IC—Fruit-Bearing Lives.
YOUNG PEOPLE AND ADULT TOP-IC—Union With Christ.

Under the beautiful allegory of the vine and the branches Jesus set forth the spiritual oneness of Himself and His disciples.

1. The Relationship of Jesus and the Father to the Disciple (vv. 1-3).

1. Jesus the Source of the Disciple's Life (v. 1). He is the true vine. Through the incarnation Jesus identified Himself with humanity, and by virtue of His atoning death and resurrection it is possible for the believer to be a partaker of His life so that between the disciple and his Lord there is a community of life. As the vine pours its life into the branch, so Christ pours His life into the believer. Our salvation is eternal life because it is the life of the eternal Son in us.

2. The Father Has in His Hands the Discipline of the Disciple (v. 1). The "Father is the husbandman." Just as the culture of the vine is in the hands of a husbandman so the discipline of the believer's life is in the hands of the Father. In this disciplinary proc-

(a) Removes the unfruitful branch (v. 2). He does not take the trouble to prune the fruitless branch. The nominal church member, the mere professor, He removes.

(b) Purges the fruitful branch that it may produce more fruit (v. 2). He restrains our natural tendencies and desires in order that the virtues of the Lord, the fruits of the Spirit, may shine forth.

3. The instrument by which the pruning is accomplished is Jesus' words (v. 3). The disciples already were cleansed by Christ's words, for Judas the traitor had been cast out. If the believer's life is to be fruitful in character and service the pruning knife, Christ's words, must be intelligently and regularly applied.

II. The Conditions of Fruit Bearing

The supreme object in pruning, the culture of the vine, is fruit.

1. Abiding in Christ (vv. 4-6). As the branches draw sap and life from the vine, so believers must abide in Christ, from whom they derive their purity, strength and wisdom. Indeed, it is a mutual abiding, the disciple in Christ and Christ in the disciple. It is Christ's life expressing itself through the believer. The one thus indwelt by Christ will bear much fruit. So great is the displeasure of the Lord with lifeless, unfruitful branches that they are to be "cast forth." "withered." even burned (v. 6)

2. Christ's Words Abide in Us (v. 7). So mighty is the power of the one who abides in Christ and in whom His words abide that Heaven can withhold no gift from him.

III. The Blessed Issue of a Fruitful Life (vv. 8-17).

1. The Glorification of the Father (v. Through much fruit-bearing, the Father will be glorified (Matt. 5:16). 2. Credentials of Discipleship (v. 8).

The only way to prove that one is a child of God is to manifest the characteristics of God in one's acts and serv-

3. Abiding in Christ's Love and Keeping His Commandments (vv. 9, 10). The way to abide in Christ's love is to keep His commandments. The one who neglects the words of Christ is destitute of His love. It is folly to talk of being in the love of Christ while disobeying His teachings.

4. Fulness of Joy (v. 11). The way to have fulness of joy is to have Christ's joy in us. 5. Loving one another (vv. 12, 13).

4

The one who abides in Christ and has the life of Christ flowing into him will live a life of love, will love his fellowman, especially his brother in Christ.

6. Friends of Christ (vv. 14, 15). Christ's friends do whatsoever He commands. Being thus obedient He takes us into His confidence and makes known unto us the Heavenly

7. Perpeutal Fruit-Bearing in Love, With Power in Prayer (vv. 16, 17).

Physical Vigor

Physical weakness is not a sign of spiritual power. All other things considered, the man or woman who enjoys physical vicor will be able to accomplish more than those who are puny and ill.

How Many?

"How many people," says Jeremy Taylor, "are busy in the world gathering together a handful of thorns to sit upon!"

Our Fears

What we fear most is not today's trouble; but that which may happen tomorrow.

Dumb Love

A dumb love is only acceptable from the lower animals.-Doctor Van Dyke.

— THE — CHRISTIAN ENDEAVOR TOPIC

---- From ----Moody Bible Institute Monthly Chicago, Ill.

FEBRUARY 1 Christian Endeavor-As Expressed in Friendliness Philippians 2:1-11

Friendliness is expressed in deeds. Behind the deed there may be well laid plans and thoughts, but we must be doers of things, not dreamers only. "It is not a man's ability that counts," said Dwight L. Moody, "but

what he does.' The friendship of Christis expressed in His undertaking and doing some-thing for us. This is an outstanding feature in our Scripture lesson. He was in the form of God, in the glory that He had with the Father before the world was. He might have re-tained that form and continued in the enjoyment of that glory. But, no! He laid aside that glorious form and took upon Him the form of a servant and was made man. In the words of Hebrews 2:14, "For as much as the children are partakers of the flesh and blood, he also himself likewise took part of the same." Why He did this s shown in the words immediately following: "That through death he might destroy him that had the power of death and deliver them who through fear of death were all their life time subject to bondage." turn to our Scripture lesson in Philippians, He became "obedient unto death, even the death of the cross." As the apostle John contemplates this he exclaims, "Herein is love.

The atoning work of Christ through His death on the Cross is finished. Into that none can enter save as recipients of what He accomplished there, but in the principle of it, the priciple of sacrifice and love and true friend-ship, all His saved people are called. This is the meaning of the appeal in our Scripture lesson, "Let this mind be in you which was also in Christ Jesus," this mind of sacrifice, of love and of true friendship. "Look not every man on his own things, but every man on the things of others." Be indwelt by the Spirit of Christ. To have this mind in us which was also in Christ is the essential factor in all friendly service. Without it lawns and shrubbery instead of perwhat we do will be perfunctory and mitting the city's back yard to become mechanical rather than the expres- a dumping ground for the city's refuse. sions of true friendship. It will be Industrial buildings located along the something done because assigned to us railroad trackage can be beautified or else to quiet an uneasy conscience. Members of our young peoples' so-cieties and Christians everywhere should cultivate the spirit of friendship after the pattern presented in this Scripture lesson.

Danger of Deforestation

The forest service says that the reduction of the forests does diminish stream flow. The forest cover acts as a gigantic sponge that holds back excessive moisture and lets it out gradually into streams. Deforestation can take place without danger to a certain point. If the deforestation is carried too far it proves dangerous through periods of excessive moisture such as melting snow, which causes floods. With the forest cover acting as a sponge it does lessen floods to a cer-The increase in arable lands would diminish neighboring streams in so far as forest lands would be taken and placed over in the arable

Expert Shingle Weavers

In spite of the multiplication of efficient machines to lighten and simplify labor, shingles are still woven (or packed) by hand. No machinery has yet been invented capable of eliminating the expert shingle weaver. Examine a bunch of shingles as the carpenter takes them apart for shingling the roof, and you will see the unique process by which the compact bunch has been woven. Now a wide shingle. now a narow one, makes the bunch the exact width, and all day long the eaver stands and seizes shingle after shingle thrown out from the sawing nachine, and without any false moves reaves them into compact bunches. The term shingle-weaver has been exended by custom, till it now applies to anyone who works in any department of a shingle mill.

Scriptural Translations

Every year scholars are toiling to ranslate the Scriptures into more and still more dialects. Thousands are plodding all over the globe to put these translations in the hands of all peooles. In the interiors of distant countries, far up the Amazon valley perhaps, or into darkest Africa, where the Bible has never been, colporteurs are tramping with their packs. Motorcars are carrying the Bible across the desert from Damascus to Bagdad in 48 hours, a journey that was once a matter of six weeks, and by fastest camel post a trip of nine days.

Monuments to Apples

Monuments or markers have been erected to a few of the most noted varieties of apple. In 1895 a monument was built to the Baldwin at Wilmington, near Lowell, Mass., The first in New York was erected in the town of Camillus, Onondaga county, on the original site of the Primate apple trees of John T. Roberts of Syracuse, in 1903. There followed one to the Northern Spy in 1912, and the McIntosh Red in the same year. A monument to the Wealthy was erected at Excelsior, Minn., in 1912.

ommunity Building

Paint Adds to Beauty and Value of Building

No man or woman with any selfrespect would wear the same suit or coat year after year, frayed at the bottoms, buttons missing, or otherwise in a dilapidated condition.

How about the home with its ugly discolored patches, roof with shingles missing and doors and windows showing the effects of the elements? asks a writer in the Indianapolis Star.

One is just about as foolish as the other and both are a source of needless expense.

Has it ever occurred to you that it is less costly to keep the home painted up spick and span than to let it wear a discouraged, dilapidated look?

Plenty of good paint, frequently applied, is one of the best investments any home owner ever made.

One of the first requisites in making the home beautiful is to dress it up in beautiful colors, outside as well as inside. This applies alike to the little cottage, the modern bungalow and the stately mansion.

Take the most unattractive house you can find, study its architectural lines, use care in the selection of the colors and the transformation will be so great that you would scarcely recognize it as being the same house.

Campaign to Clean Up

Approaches to Cities

The brokers' division of the National Association of Real Estate Boards has instituted a national campaign to clean up the approaches to our cities, according to a circular recently issued by this group. Real estate boards throughout the country are requested to appoint committees to work in cooperation with other organizations in cleaning up and properly maintaining attractive approaches, both by way of railroads and automobile roads.

The circular points out that railroad sites and industrial locations can be made very attractive by developing a dumping ground for the city's refuse. with comparatively little expense, and it is the purpose of this realtor movement to encourage this improvement.

Home Grounds Important

All city improvement work should begin at home. The first essentials are neatness and cleanliness of the grounds. Keep all irrelevant things away and out of sight. A front yard is no place for unused tools, brokendown equipment, or castaway household goods. The lawn must be good and, which is imperative, must be made and continually improved. good lawn can seldom be found; it must be established. A good lawn is the foundation of every successful garden. It must be made in a rich soil, with a thick, even stand of lawn grass and a firm, even surface. It is well if the land slones gently away from the house.

Make Repairs Now

If repairs to the house or lawn remodeling are necessary it is well to get it over with and get the lawn straightened up afterward. There is always plenty of necessary work on the flower beds and the lawn in the spring without postponing that which could have been done in the fall or winter months. Then, too, a foresighted man asserts, workmen are less busy on repairs at that time, so that it is easier to get work done well.

Raising Home Quality

"Those who insist on good, honest standards in the houses they build or buy not only benefit their families and themselves but perform a broader service," says John M. Gries, chief of the division of building and housing, Department of Commerce. "They help raise the quality of homes in the United States and provide a sound basis for wider home ownership."

Driveway

In building a macadam driveway, that is, a driveway of crushed stone, it will be found very effective in keeping the small particles from being scattered around the lawn if a concrete curbing is built on both sides of the driveway. This not only protects the lawn, but is very artistic and prevents the driveway from spreading.

Give Thought to Cellar

The cellar is as important as the rest of the house. Coal bins near the furnace, ventilation, cold storage, drainage, lighting and other points cannot be too carefully thought out to insure comfort.

Small-Town Men Succeed

At the president-day lunchean of an Eastern Rotary club recently, the program was given over to stories of success after forty. There were 120 men who testified that at forty they were failures, whereas at the time of the luncheon they were considered successes, the aggregate number of their employees being 50,000. Their formulas differed widely and among them were: "Constant industry," "never work too hard," and "don't do anything that can be put off."

People of All Periods Have Prized Cinnamon

Cinnamon is the inner bark of a small evergreen tree that is a native of the island of Ceylon, south of India. The tree is now also grown in Java, the West Indies, Brazil and Egypt, but no other cinnamon approaches in quality that grown in Ceylon.

Its history takes us back to remote antiquity and it was held to be a present fit to give to kings and other potentates. It was known to the ancient Hebrews and is mentioned in Exodus 30:23 as one of the component parts of the holy anointing oil, which Moses was commanded to prepare, and in Proverbs 7:17, it is mentioned as a perfume. Revelations 18 describes the fall of the Great Babylon, and in the enumeration of the merchandise of the doomed city, cinnamon is mentioned in verse 13, and it is connected with "odors and anointments, and frankincense."

Cinnamon was imported into Judea by the Phoenicians or by the Arabians. The best cinnamon from Ceylon is a thin, smooth bark, of a light yellowish brown color, highly fragrant, and to the taste sweet, warm and pleasingly aromatia, the taste being due to the presence of an aromatic oil to the extent of from one-half to 1 per cent. Cinnamon is used as a condiment in cooking and as a flavoring in medicines.

"For the Merry Heart Is a Gladsome Thing"

Fortunately for the world its supply of Bottled Sunshine far exceeds that of its Wet Blankets. If this were not so what an unbearable place the world would be! Some lands, peoples and centuries are richer in it than others. Children and puppies and kittens and lambs and all young things (unless they be ill) are Bottled Sunshine. Precious stones and coal, flower buds and seeds and the kernels of fruit are Bottled Sunshine. Flashes of kindly wit and peals of laughter from out a merry heart are its very essence.

Beautiful, bewitching, attractive in an unstable, uncertain sort of way, are the dispositions of some people, of whom it may be said, "They have a mercurial temperament."

Better to be merry, to be known as Bottled Sunshine, with a heart as full of the joy and gladness of living as are the woods of singing birds in the springtime.—Montreal Family Herald.

Engraving Process

If an engraved surface be covered with ink or wet colored paper or the like pressed upon it it will take the impression of the parts remaining untouched, while the hollowed out (engraved) parts will not print off. This is called relief engraving, and its most important variety is wood engraving; if the ink or color be forced into the hollowed parts, while the smooth part is wiped clean, the paper, usually wet, will draw from the engraved line and spaces the ink which they have contained while the rest of the paper is left white. This process is properly called line engraving; if the lines are eaten into the plate by means of an acid the process is called etching; if the surface is merely roughened without incision of lines it is called mezzotint.

"Third-Degree" Methods

There is no law preventing the administration of the "third-degree" to women. In cities where this system is prevalent it is applied to men and women equally. It is not possible to say definitely when the custom originated. Various forms of torture for the purpose of extracting confessions have been employed from very early times in history. In America, after the Revolutionary war, a number of criminals and suspects were subjected to various kinds of inquisition. The practice has continued in this country. -Washington Star.

When Chocolate Was New

France has just been celebrating the third centenary of the arrival of chocolate in 1624. The Spaniards brought it from Central America, and soon it was the rage in Paris.

Chocolate took a long time, comparatively, to reach England, but in 1657 there appeared the following advertisement in London: "In Bishopsgate street, in Queen's Head alley, at a Frenchman's house, is an excellent West India drink called chocolate to be sold, where you may have it ready at any time, and also unmade, at reasonable rates."

Pastor Easily Supreme

Three small boys were talking about their fathers. The son of a writer said: "My father just writes a few words on a piece of paper and gets \$25 for it." "Oh," said the lawyer's son, "my daddy just sits in a room and tells people what to do, and they give him \$50 for it."

"That's nothing," said the parson's son. "My dad gets up in the pulpit, preaches for a few minutes, and when he's finished it takes eight men to carry the money to the vestry."

Rather Cynical Text

The subject of text-finding was being discussed by two clergymen in regard to addresses of married couples at wedding services.

"Do you have a text as a rule?" asked one of the other.

"No; I never have had one," was the reply, "but I know what I should choose if I did have one. It comes from Psalm 2, verse 7-'Abundance of peace, so long as the moon endur-

day evening, Feb. 5. Harney—S. S., 9:30; Preaching, at

Presbyterian, Town—S. School, at 9:30; Christian Endeavor, at 6:45; Evening Worship, 7:30. Piney Creek-Preaching, at 10:30.

HOW TO DROP OFF

A man called upon his medical adviser and said: "Doctor, I can't get to sleep at night." "Insomnia, eh?"

"That's it," asserted the patient. "There are ways and means of combating that," declared the doctor. "You think you are hopelessly wakeful, but mental effort has a great deal to do with getting you to sleep. Just imagine you are walking a tight rope 1,000 feet from the ground. Step by step you advance on this tight

"Yes?" the patient inquired. "You'll soon drop off."

HAPPY PROSPECT INDEED

"You say they anticipate a very happy married life?"

"My dear, all their relatives are so angry with them because they got married they've vowed they'll never visit them."

Afraid to Come Home

Father's gloom is sad to note, The orators controlled him

And made him quite forget to vote

The way that mother told him.

Inviting Contrast

"All the boys are bragging about what a safe and orderly place Crimson Gulch is."

"Yep," said Cactus Joe. "There was a good deal of complaint till I worked out a scheme that 'ud make the old home town shine out by comparison.

"What's the scheme?" "The city gives an annual excursion to Chicago.-Washington Star.

Where Do Pills Go?

"Well, here you are," said the doctor, "a pill for the kidneys, a tablet for the indigestion, and another pill for the nerves."

"But, look here, doctor," said the patient, "how will the little beggars know where to go when they're in-

Punctilious

"I have enjoyed this bridge game, but I must get home now."

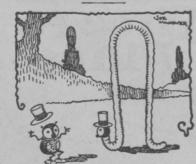

"Why, it is only five o'clock, dearie." "True, but I always make it a point to wash the breakfast dishes in time for supper."-Louisville Courier-Jour-

Complexion to Preserve

Miss Muddie-Do you know anything that is really good to preserve the complexion?

Miss Knox-Why, dear? Are you interested in somebody who has one?

Resourcefulness.

Did you ever try a plan, or experiment, that looked good, but in its trial absolutely failed? If so, what did you do about it. Good plans are sometimes used at wrong times, with wrong details, and their failure is not always due to the plan itself. It is well in such cases to consider well, whether to drop the idea, or try it over, with changes. At any rate, failure should not prevent "going after" desirable ends.

This may apply to a business man, farmer, or to one in charge of any line of activity. Invention and resourcefulness alone often makes the difference between a successful and an unsuccessful manager. There are certain rules—in business life, that are demonstrated helps. Advertising is one of them. Industry, economy, grit and stick-to-activeness, are others.

No piece of valuable machinery was ever invented in its finished stage, all at once. Patience, continued trials, numerous tests, are always essential to success. When we make a big bit, all of a sudden, it is likely only mere luck—an accident, and no credit to us.

All of this has been written up, in thousands of ways, since the time of Adam; and yet, it is occasionally worth rewriting, because it is always worth remembering, and there are always new ones coming along to

There are always certain men in every community who can't be kept down. Failure is rather a stimulant to them. There are likewise men who are down once, and always down, because they lack proper spirit to "come back." Largely, we have it within our power to choose the class we will be in —always providing we have the spirit of resourcefulness developed.

Once in a while a man attempts the undoable—trying to invent "perpetual motion," for instance. And men have spent years trying to invent "patents" and never succeeded. Merely "keeping at" a thing, like most other practices and rules, has its exceptions; but, in all such instances the failure has been in the man himself, and not in his efforts, for all men are not qualified to fit into the same place, nor the same work, and it is often the most difficult thing in life for one to find his right place. He needs "resourcefulness" even in this-to know himself.

An Honest Laying Mash

strictly high-grade, always fresh made, high in protein, Rein-o-la Laying Mash excels in the results it produces. Try it-Reindollar Bros. 11-14-tf —Advertisement

A Greater Western Maryland College

The General Education Board of New York City (The Rockefeller Foun dation) has announced a conditional gift of \$125,000 to Western Maryland College, to be applied to endowment. The condition attached to the gift is that the College is to raise \$375,000 additional for endowment, making a total of \$500,000 for endowment including the Rockefeller donation. The Maryland Legislature has also made an appropriation of \$125,000 for a building, conditioned on the College raising additional endowment. In other words, a total of \$250,000 is to be piven the institution provided the in-stitution raises additional endowment to the arount of \$375,000. Three years are given in which the conditions may

This is a distinct challenge to the friends of the College. The Board of Trustees, at a meeting held recently, accepted the conditional gifts and authorized a campaign to be put on to raise the amount necessary to meet the conditions imposed by the Rockefeller Foundation and the Maryland Legislature. This campaign will likely be carried on in May of this year. The friends of the institution are much encouraged at the prospect of a successful campaign for funds. West-ern Maryland College has had a remarkable history and has done a great work in education for the citizens of Maryland and other states. The institution is making great strides along all lines, and the outcome of this campaign will place the institution in the forefront among the colleges of the country. .

Hens Will Lay

if you feed them a good high-protein laying mash. Rein-o-la Laying Mash has proved itself to be a big egg producer. Ask us about it—Reindollar Bros. & Co. 11-14-tf

Hobson's Choice in West.

An Easterner, on a business trip in the West, stopped at a country hotel. He entered the dining room and was shown to a table by a rather eccentric looking waiter.
"Will you have pork and beans,

sir?" asked the waiter, as he brought the customary glass of water.
"No, I don't care for them," answered the guest. "I never eat pork

and beans.'

"Dinner is over, then, sir," replied the waiter as he moved away.—Kansas City Star.

Her Favorite.

Miss Teachem, wishing to arouse the interest of her Sunday School class, asked the scholars to write down the names of their favorite hymns. All bent their heads over pencil and

paper for a few minutes and then handed in their slips. All except Mary "Come, Mary," said the teacher, "write down the name of your favorite hymn and bring the paper to me."
Mary wrote, and with downcast eyes and flaming cheeks, handed the teacher a slip of paper bearng the words, "Willie Smith."—Youth's Companion.

Interesting Novel

Hostess-I hope you found that novel interesting, Mr. Paterson?

Mr. Paterson-Well, I must confess it wasn't quite so interesting as the letter some one left in it as a bookmark.

SHE HATED TO LOSE

"How long do you want to rent one of my electric vacuum cleaners?" asked Mr. Hammerstein, the hardware dealer.

"Oh, not for more than five minutes," replied the economical Mrs. Savorley. "I spilled a pound of powdered sugar on my kitchen floor and I can't recover all of it with just a broom and a dustpan."-Good Hard-

Indoor Holdup

"I've got you at last," he cried; "move, if you dare, move! It's taken me many years, but at last I've got you where I want you! Now I dare you to move!"

"Yep, you're right," replied his friend, "it's the first game of checkers you ever did win from me."-Treat 'Em Square.

Trying to Console Him

Mrs. R. M. writes. "Not long ago I remonstrated with my negro maid for openly encouraging the attentions of the janitor next door. 'Mary,' I said, 'don't you know that he is a married man?

"'Yes'm,' she replied, 'I knows it. But'm hes dissatisfied."

THE NEXT GENERATION

Bobbie (motoring) - Oh, daddy, what's that queer animal? It looks like something I've seen in my natural history book

Dad-Why bless me, Bobbie, if it isn't a horse! I'll slow down a bit so you can get a good look as we
