

THIS IS FIRE PREVENTION WEEK

Will You Not Help to Decrease Fire Losses?

This is "fire prevention" week all over the country, the big idea back of it being not so much that all should be careful of fire danger for this one week, but that the education of the week should be applied hereafter, every week. Perhaps most people know how to be careful, but they do not exercise the knowledge, and the results of this carelessness amount to a tremendous total, each year, in life and property. We give below a lot of standard advice on the subject, that will be worth studying and applying.

Empty boxes, crates, barrels and like receptacles, or containing excelsior, straw or waste paper, should not be piled up at any place so as to be set off by flying sparks, or other means, and thereby endanger buildings.

In all stores, factories or workshops, there should be convenient buckets for water, and where water is not very convenient, the buckets should be kept filled.

Where gasoline is used, in either small or large quantities, it should never be used near open stoves or lights, nor any place in which the gas arising from it is apt to come into contact with fire.

"No smoking" nor lighting of matches should be indulged in, when handling gasoline; nor should empty cans of gasoline be kept in a closed room. Wherever there is a gasoline smell, there is gasoline gas—and danger.

Matches should not be thrown down until sure they are fully extinguished, nor should cigar or cigarette stubs be carelessly thrown about.

"No smoking" about barns should be permitted at any time.

Matches should always be kept in metal containers, hanging up, and out of reach of children.

The floor and walls, near furnaces or stoves, should be fully protected by metal sheeting.

Wood boxes, closets, or chimney corners, are exceptionally dangerous places for the storage of rubbish.

Do not place wood, or kindling, in the oven of stoves, for "drying out," and do not hang clothing to "dry" on the doors or arms of hot stoves.

"Making fire" with oil on corn cobs or oil sprinkled wood, is always dangerous. Never attempt to pour oil on wood in a stove.

Cleaning fabrics with gasoline should always be done out of doors, and the fabrics not brought inside until after the smell of gasoline has largely disappeared.

Hot ashes should not be kept in wooden containers—pour them out—doors on a pile.

Extreme care should always be taken of open fires out of doors, especially when there is a breeze, or the fire is near buildings.

Keep all flues and chimneys clean, also the metal pipes leading to chimneys. When at all possible, clean out chimneys in the fall, without "burning" them out—use a small bush, or a bundle of old sacks, either on a long pole, or with a rope at each end.

Kerosene lamps are dangerous when they "smoke." Buy new burners and wicks frequently, and keep lamps well filled. Burners can often be cleaned by boiling them with a little caustic soda in the water.

Never keep gasoline in a cellar, or a closet, or any tight place, and never draw it or handle it with a light, or near a fire.

On going away from a home, either day or night, always be sure that stoves are left in a safe condition; and on retiring, give the house a good once-over and see that everything is safe.

If you obey these rules, you will be reasonably safe from fires possible for you to prevent; but, make yourself doubly safe by carrying all of the insurance you are entitled to have in some reliable Company, and know just what your policy covers, and your own partnership in the insurance contract.

Look Before You Cross.

No railroad crossing should be crossed without looking in both directions, and it is particularly necessary to safety that this be done when crossing where railroad and highway parallel each other.

Carelessness on the part of the driver at such crossings is attended by great danger.

Bear in mind that gears should not be shifted on or near the track. Many machines stall when shifting gears. If necessary to shift gears, do so not less than 75 feet from track, then look in both directions before crossing.

A railroad crossing is dangerous only when made so by careless driving. No prudent person would run over a red light in the highway, for it is there as a warning, yet motorists frequently not only run over a crossing flagman and break down crossing gates warning them of an approaching train, but with scarcely less frequency run into a train from one to five cars back of the engine, and then ask taxpayers to tax themselves for grade changes to eliminate the danger, when the danger is not in the crossing but in the driver.—The Manufacturer.

CAMP VAIL TRIP.

A Reward for Work Done in Boys' and Girls' Clubs.

Eleven girls and boys from Maryland attended the Eastern States Exposition, at Camp Vail, West Springfield, Mass., two miles from Springfield, across the Connecticut river; from Saturday, Sept. 19 to Saturday, Sept. 26. We went via Hell Gate Bridge, crossed six states, saw much beautiful country and many picturesque rivers. Had the pleasure of eating my first meal on a dining car, and traveling on a special Pullman chair coach. Reached Springfield about 7:30; a trip of about 10½ hours.

We went from Springfield across the Connecticut River, to Camp Vail, West Springfield, by truck and trolley cars. We were given sleeping quarters in a very fine new building which has just been erected, about ¼ mile from the Agawam River. There are many large buildings to be used for exhibiting Eastern States products of all kinds. An immense coliseum is used for the showing of horses and cattle; this makes it very convenient for the public to see the showing and judging of the animals.

The cattle show is free, in the day; the horse show at night, unless seats in the coliseum are desired. Fireworks are shown every night. One night the Camp Vail part of the Eastern States exposition were given free seats on the grand-stand, at the Hippodrome, where open air entertainments were given. The fireworks illustrated "The Fall of Rome, under Nero's Rule." This entertainment was only one phase of the attractions for the public at the exposition. Auto races held on Friday and Saturday added to the attractions.

Every eastern state sent representatives to Camp Vail, where each demonstrated some different project which they have been working on in Club work. Maryland girls and boys killed, fried and sold, Maryland chickens; also demonstrated the making of cup cakes and beaten biscuits, besides selling them. Some evenings were spent along the Agawam River bank, holding vesper services, and camp-fire councils. The air was very exhilarating, dry, and healthful. On Saturday evening, Sept. 26, we ate dinner at a Chinese restaurant, and took a Pullman sleeper, for home. We could not see the country on our way home, for we traveled by night. It was my first experience in riding on a sleeper and was very enjoyable.

The trip to Camp Vail was given as an honor for what I have done in Club work.

I wish that many other girls and boys could see the advantage of belonging to the Boys' and Girls' 4 H Club, and have the chance of enjoying the same advantage that I have had while working with the club.

HUBERT NULL.

Proceedings of the Orphans' Court.

Monday, Oct. 5, 1925—Emma D. Maynard, executrix of Albert D. Maynard, deceased, settled her first and final account, also returned inventory personal property.

George C. Albaugh, administrator of John T. Albaugh, deceased, returned inventory of personal property and settled his first and final account.

The last will and testament of Josiah Winter, deceased, was duly admitted to probate and letters testamentary thereon were granted unto Isaac Winter, who received warrant to appraise real estate and personal property and received order to notify creditors.

Letters of administration on the estate of Ernest B. Haines, deceased, were granted unto Marrie E. Haines, who received warrant to appraise personal property and order to notify creditors.

Evelyn Haines, received order to draw funds.

Emanuel W. Haines, administrator of John F. Haines, deceased, received order to sell bonds, reported sale of bonds and settled his first and final account.

George E. Fleming and Archley R. Molesworth, executors of Samuel T. Fleming, deceased, returned inventory of personal property, debts due and current money.

Philopena Rosenberger, executrix of Mary Mengel, deceased, returned inventory of personal property.

Tuesday, Oct. 6, 1925—Harry L. Routson and Charles O. Routson, administrators of Jacob H. Routson, deceased, settled their first and final account.

Marrie E. Haines, administratrix of Ernest B. Haines, deceased, returned inventory personal property and received order to sell same.

Lana S. Stoner, executrix of Isaac N. Stoner, deceased, returned inventory personal property.

Football Death of Gettysburg Boy.

As a result of an injury received while playing football, Chester Rogers, 14-year-old son of Mr. and Mrs. A. Z. Rogers, died Sunday afternoon. The boy was a freshman in the High School, and Friday a week ago engaged in a friendly football match with some of the pupils on the school grounds. In the sport he was caught around the neck by one of his playmates and thrown to the ground, at which time his neck was injured, which, it is believed, was the cause of the lad's death.

Contrary to the impressions of some, there are conversions to Judaism, especially among women, often the result of intermarriage. In other words, one may be christian by birth, yet Jewish by religion, just as Jews become christians.

THE 1925 CHAUTAUQUA.

The advertising matter for the Taneytown Chautauqua, Nov. 5-7, has been received and ready for distribution. From the present outlook, the entertainments will equal, if not excel, anything we have had heretofore.

It should be bore in mind that the Chautauqua is not for the especial benefit of the guarantors or any particular individual. It is for the general benefit and uplift of the community, and should be encouraged by all who have any civic pride or interest in community affairs.

The guarantors simply make it possible to have these elevating entertainments and should have the encouragement of all good citizens.

The guarantors for this year are: Robert S. McKinney, D. J. Hesson, Wm. M. Mehring, W. W. Reindollar, John S. Teeter, George L. Harner, Miss Anna Galt, Mrs. H. B. Miller, Miss Amelia H. Annan, Miss M. L. Reindollar, John H. Lentz, Charles F. Cashman, Robert W. Clingan, Charles E. Ridinger, Mrs. W. A. Bower, Mrs. Ida Landis, J. E. Davidson, C. T. Fringer, G. Walter Wilt, Wm. F. Bricker and Rev. G. P. Bready.

On Saturday evening, Oct. 10, there will be a meeting of the guarantors at the Public Library, at 7:30, to arrange for sale of tickets, advertising and other necessary details. It is important that every guarantor be present.

THE FIRST GRADERS.

Importance of Proper Case of Small School Children.

Do you remember how you felt when you began "going to school?" How strange everything was? What a new world you entered? Child health specialists all agree that much of the mental mal-adjustment—the nervousness that often crops up during the later years of a child's school life, could be avoided if a little special care were exercised during these early years.

Speaking of the care needed by the little first-graders during the transition days from babyhood to childhood, Dr. J. H. M. Knox, Jr., Chief of the Bureau of Child Hygiene of the State Department of Health said: "Very few grown-ups realize the mental and physical strain the six-year-olds are under when they first start in on the great adventure of going to school. The child has some pretty hard problems to tackle, and needs all the reserve force that can be mustered for him."

"A little special care at this time, particularly with reference to regular hours of rest and sleep, and avoidance of unnecessary excitement, will do much to give these beginners at school the mental poise that is so much needed. It is equally important that care be taken of their diet; that they be given simple nourishing food, at times and in the quantities when it can be most easily digested."

For instance, because of their anxiety to get off in time, little children often neglect their breakfast, or gobble it down in a hurry. To offset this, the child should take a simple lunch to school, a sandwich made of thin slices of bread and butter, or bread and jam, to be eaten at the mid-morning recess. If milk is served at the school, a glass of milk can be taken at the same time. When the child comes home at noon, the principal meal of the day should be eaten.

"But just as important is the afternoon rest. It is not necessary that the child actually sleep, but it should be encouraged to lie down in a quiet room, for from half an hour to an hour. A child of six needs twelve hours sleep at night. After the beginning of the school year, 7:30 should be the regular bed time. And this rule should not be broken. Little children should never be taken out to evening entertainments—movies, and other exciting diversions. There will be plenty of time for them later on."

Ohler Will Set Aside.

After a short deliberation Wednesday afternoon, of last week, the jury in the case of Mrs. Emma A. Ohler, Emmitsburg, against the Central Trust Company of Maryland, executor of Isaiah J. Ohler, deceased, returned a verdict in favor of the plaintiff. The verdict sets aside a paper writing purporting to be the last will of the deceased, dated June 19, 1924, which left one-half of his estate to his widow. The entire estate will go to the widow, under the will made shortly after they were married in 1897.

A number of witnesses testified on both sides. The plaintiff contended that Mr. Ohler was not capable of making a valid deed or contract at the time of his last will, June 19, 1924. After the testimony and argument, the case was given to the jury and the latter reached a unanimous verdict, it was said, on the first ballot. The value of the estate, it was said is about \$2,500. The case was taken up Tuesday morning.

Mrs. Ohler, widow of the deceased, testified that she knew nothing about the will dated June 19, 1924. She stated that prior to this time her husband, who was 82 years of age, suffered from an impaired mentality. She related instances, which conveyed the impression that his mind was not active. He also suffered from a stroke of paralysis, after which and up to the time of his death he was in feeble health. George L. Wilhide, assistant cashier of the Emmitsburg bank; Joseph R. Hoke and Frank Shuff, of Emmitsburg, testified that they did not think Mr. Ohler was capable of making a valid deed or contract at the time of the last will, June 19, 1924. Mrs. Ohler, in her testimony, said she was married in 1897 and that her husband made a will soon afterward.—Frederick News.

A Young Men's Club, in Leipzig, Germany, pledges each member not to marry a girl who "smokes, drinks, bobs her hair, or uses a lip-stick."

CANADA DROPS WHEAT PRICE.

Enormous Crop Influences Price in the United States.

A great Canadian wheat crop, much of which is piling up in the markets, has hit the price in this country very hard, and as most of the big mills are located convenient to the Canadian border, the result on the market is the same as though there was overproduction here, which seems to be practically the case, as the visible supply in this country is about 2,000,000 bushels greater than a year ago.

There is also persistent talk that Europe will not be a heavy buyer here, owing to good crops over there and as Australia and the Argentine offerings on the open market will be large, there appears at present very little hope that wheat in this country will go back again to the after harvest price, or even that it will hold at about the present price.

Another Mr. Airy Auto Victim.

Jesse E. Spurrier, 19, son of Mrs. Mary Spurrier, Mt. Airy, was instantly killed, and his three companions badly injured, when a roadster in which they were riding ran off the state road near Plane No. 4, about 12:30 o'clock Sunday morning. Edgar Harry, 30, also of Mt. Airy, is at the Frederick City Hospital in a serious condition with concussion of the brain; J. Herman Davis, 17, and Ira Bridges, 18, both of Mt. Airy, suffered cuts and bruises.

All four occupants of the machine were thrown from the automobile when it swerved from the road into a roadside ditch, turning on its side. Spurrier is thought to have struck his head against a fence post, and was found lying motionless against the fence by Anthony Nusbbaum, of Poplar Springs, who reached the scene soon after the accident occurred. Mr. Nusbbaum took Davis and Harry, both of whom were unconscious, to Frederick Hospital, where Davis was dismissed, after treatment, and Harry is now confined.

Officer Parker, of the state police, was notified of the accident and arrived soon after the machine turned over. He stated that no one saw the accident, and no reason as to why the machine left the road was given. The State Police Investigation Bureau will take up the case, it was said, and further information secured. Justice of the Peace W. E. Falconer, of New Market, was also called to the scene, and decided an inquest was not necessary.

What This Farmer Learned About Running a Newspaper.

Once a farmer had 1,800 bushels of wheat, which he had sold, not to one grain merchant, but to 1,800 different dealers, a bushel to each. A few of them paid cash, but far the greater number said they would pay later. A few months passed and the man's bank account ran low. "How is this," he said, "my 1,800 bushels of grain should have kept me until another crop is raised, but I have parted with the grain and instead I have a vast number of accounts, small and scattered, that I cannot get around and collect fast enough."

So he posted a public notice and asked all who owed him to come and pay quickly. But few came. The rest said: "Mine is only a small matter and I will pay you some other day." Though each account was very small, when all were put together it meant a goodly sum to the man, and enough to enable him to pay his own bills and meet his needs. Things went on thus. The man got to feeling so badly that he fell out of bed and awoke. Running to his granary he found the 1,800 bushels of wheat still there.

The next day he went to the publisher of his home-town paper and said: "Here, sir, is pay for your paper, and when next year's subscription is due you can count on me to pay you promptly. I stood in the position of an editor last night, and I know how it feels to have his earnestly earned money scattered all over the country in small amounts."

The moral is: "Go thou and do likewise."—Chatsworth (Ill.) Plaindealer.

Another moral; when you have anything to sell, a bushel at a time, to patrons all over the country, get the money in advance.

"Miss America" pronounced the most beautiful girl in the Atlantic City bathing beauty contest, is now ill with pneumonia in New York. Wonder whether scanty attire had anything to do with her illness?

PAGAN NEW YORK.

New York City Religiously is a Big Mission Field.

A recent issue of the Dearborn Independent contained a lot of startling statements concerning the religious or church situation in New York City, the leading one of which is that "Protestant Churches in New York City are for the most part supported by missionary collections taken up in other parts of the country—New York is now on the mission map of the great Protestant denominations, along with India, Zululand and Turkey."

Some of the details are: "Out of 40 Presbyterian Churches, 21 are being supported by missionary funds; out of 26 Methodist churches, 21 are being supported and maintained by missionary funds; out of 21 Baptist churches, 12 are being supported by Missionary funds; in all, there are 61 churches being so supported."

Other statements are, "Within ten years Manhattan will be a Jewish City, due to increase in birth rate alone."

"New York is the world's largest Jewish city, Negro city, Italian city and Irish city."

"There are 36 less Protestant churches on Manhattan island than there were 25 years ago. Not a single outstanding new church has been created in greater New York in 15 years."

There are one million young people in this city who are growing up with no more religious education than if they were reared in the jungles of Africa."

"Church leaders frankly and openly admit the situation. New York has been drawing on the denominations at large—upon Kansas farmers and California fruit growers, and Chicago workmen, and the nation and churches out in what New Yorkers call 'the Provinces'—for help."

The article goes on to point out that New York is a mission field, even for the Catholics and Jews, which religiously dominate the situation. That even these churches are not numerous enough to answer the needs of the big population. It gives the following figures of "church composition" in 1920.

Roman Catholic	1,943,730
Protestant	1,941,847
Jewish	1,643,012
Greek Orthodox	91,459

Within the past twenty years the Catholics have gained 733,452, the Protestants 312,607, while the Jews gained 1,065,338. We assume that "composition" means population, rather than actual church membership—merely a division into classes, including also the unchurched. The article, throughout, is full of startling statements, and if even only approximately true, we can well ask whether we should not pay greatly more attention to Missionary work in Pagan New York.

State Egg Laying Contest.

College Park, Md., Oct. 7—Maryland poultry raisers still have time to enter fowls in the Maryland State Egg Laying Contest which will begin at the University of Maryland with the first egg produced on the morning of November 1, according to Roy H. Waite, contest supervisor.

Entries from out-of-State breeders, however, are coming in rapidly, it is said, and under the rules of the contest some of the restrictions are off so that from now on breeders will be permitted to enter more than one pen in the competition. The necessity for quick action on the part of Maryland breeders is therefore apparent, it is pointed out.

Entries thus far have been accepted from Maryland, New York, Delaware, New Jersey, Pennsylvania, Michigan, Connecticut, and Massachusetts. "It is rather significant," says Mr. Waite, "that entries are coming in most rapidly from those states where egg laying contests have already been conducted and where breeders have discovered the benefits of such competitions."

Five entries have been received from the State of Michigan alone, two of them from the Michigan State College where an egg laying contest has been in progress for a number of years. As the head of the poultry department at the Michigan State College has written for more entry blanks, it is possible that more Michigan breeders will send pens to the contest.

The contest affords Maryland breeders the best possible opportunity to get a line on the laying ability of their fowls, according to Mr. Waite, and a winning pen, a high pen for the breed, a high pen, or even a better than average laying record will be a big advertisement for the breeder. The man with the high pen, or the best laying hen, is in a position to sell all the stock he can raise at a good price.

Selecting suitable birds for the contest is not so much a matter of genius as the use of a little common sense and good judgment, says Mr. Waite. Vigorous, thrifty pullets that have matured early and at the same time made good weight for the strain are the most likely prospects. The smaller, nervous pullets may lay better for a time, but it is the experience in contests in general that these birds do not hold up over a long grind.

T. B. SYMONS, Director.

John Hopkins, a bachelor and Quaker, established a University and a Hospital, because he believed in their permanency, for there will "always be youth to train, and always suffering to relieve."

DIFFERENCE IN FINANCIAL METHODS

Cattle Testing Provided for, but Needy Teachers Not.

The state is having the problem before it of figuring out how to finance the cattle testing project now under way. The last legislature appropriated \$125,000 a year for three years, or of \$375,000 for the testing. In addition, the budget carried appropriations of \$28,300 a year for inspection and expenses, or a total of \$153,300 for each of the three years.

According to a letter from Gov. Ritchie to Dr. A. F. Woods, president of the University of Maryland, only \$73,000 of the \$375,000 for the three years remains unexpended, and no one can give an idea of the cost of the inspection yet to be done. In addition, an appropriation for 1914 for the same work, totaled \$103,060.

The Governor further says that the expenditures in excess of the appropriation were made without his knowledge or consent, the University having borrowed funds from a bank with the understanding that the legislature of 1926 would reimburse the bank through an appropriation that year, notwithstanding the fact that the Board of Public Works had notified Dr. Woods that the work for the three years would have to be done within the appropriation.

The Governor appears to have advised Dr. Woods that, considering the expenditures already made, beyond recall, the best thing to do now is to go on until the remaining \$73,000 has been used up, which will not be available until Oct. 1, 1926, if the University can arrange to finance the sum.

"Perhaps nothing would be gained," the Governor wrote, "by comments from me upon the university's action in, first, exceeding its 1925 appropriation to the extent of \$52,000 without at least advising the Governor, who is responsible for the budget, of the situation, and, secondly, in continuing the process while the matter was under consideration and when the university authorities knew of the Governor's disapproval of what had been done until the 1926 appropriation of \$125,000 was all used up before that year was begun and \$25,000 of the 1927 appropriation had been obligated."

"I am quite willing to concede that the university authorities believed that in so doing they were acting for the best interests of the important work they are carrying on, but how they can reconcile it with any principle of budget making or safe finance I am at a loss to know. What would happen to the finances of the State if departments generally followed a similar course can easily be imagined."

Commenting on the situation above outlined, The Record cannot help but notice the difference in the course pursued by the University of Maryland in this instance, and the State Board of Education in the matter of the payment of pensions to eligibles added to the teacher's pension roll, for which no appropriation was made. In the cattle testing case, large sums of money have been borrowed, depending on appropriations by the legislature of 1926, while the few needy teachers unprovided for, must wait for their pittance until the appropriation is actually made. Quite a radical difference in the point of view, as to the relative importance of the two situations!

Baseball Near Season's End.

For the general newspaper reader who does not care for baseball, and would like to see the big space taken up with something else, will now have his wish granted pretty fully, after this week, as the big post season contests will then be winding up, and baseballs and bats be packed away until next spring. But, there's football, that will be in season for some time yet.

New Oxford Item Enlarges.

The New Oxford Item has enlarged to a seven column paper. It is widely read and carries a very large amount of advertising, its location between Hanover and Gettysburg making it a desirable medium for advertisers in both places. It also carries a very liberal home patronage. In general, it is an excellent home, weekly newspaper.

Marriage Licenses.

John A. Frisby and Beatrice Summers, Westminster.
Ellis C. Bowers and Gladys L. Gilbert, New Windsor.
Calvin M. Bixler and May I. Kiler, York, Pa.
Delbert V. Beaver and Thelma M. Luigee, Harrisburg, Pa.
Jesse C. Royer and Ruth L. Helwig, Westminster.
Bernie M. Staley and Viola G. Bowers, Harney, Md.

A Big C. E. Rally.

Will be held Sunday afternoon in the M. P. Church, Westminster, at 2:30. This is a County Rally open to all Endeavorers and their friends. Fine addresses will be delivered by Rev. Edw. R. Hamme, Rev. J. L. Nichols. Special music will be furnished by Carrollton Male Chorus and the Finksburg Male Quartette. Attend this excellent rally and enjoy this splendid service.

THE CARROLL RECORD

(NON-PARTISAN)

Published every Friday, at Taneytown, Md., by The Carroll Record Company.
P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.
GEO. H. BIRNIE, Pres. JOHN S. BOWER.
E. A. ARNOLD, V. Pres. D. J. HESSON.
JAS. BUFFINGTON. P. B. ENGLAR.
G. WALTER WILT, Secretary.

TERMS.—Strictly cash in advance. One year, \$1.50; 6 months, \$1.00; 3 months, 50c; 1 month, 25c; 4 months, 50c; 3 months, 40c; single copies, 5c.

The label on paper contains date to which the subscription has been paid. All subscriptions will be discontinued on expiration, according to Governmental orders.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 4th, and 5th pages must be in our office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

FRIDAY, OCTOBER 9th., 1925.

Entered at Taneytown Post-office as Second Class Matter.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this office, and we suggest the adoption of it by our exchanges.

Signs of the Time Casting Shadows Before

Signs are increasing that the Civil War-time "state's rights" doctrine is again gaining in strength. Not only is it the chief argument of "wet" states that such states are entitled to "home rule," and a lot of other more or less plausible argument that is attractive to certain minds, but the tendency of the times is for states to jealously watch each other, each trying to "get theirs" in any distribution of National political gifts.

This "states rights" doctrine appeals insidiously to state pride. It appeals in numerous ways to the boosting of state enterprises and to the development of national products of each state. The character of the population in states—especially states having within their borders large foreign elements—has a great deal to do with the trend of the times, as the force of sentiment of these foreign bulk units has control over the influence of politicians and newspapers.

Largely, the lack of the old-time cohesion in the two great political parties is due to these elements, or "blooms," working for their "personal liberties," so-called, and their personal interests. Lack of unionism in the parties, merely means lack of unionism among the people. "United we stand" does not now so much mean united as states, or as a whole people as it does a lot of small unions each united for what they individually want.

And, there is danger—serious danger—in the outlook for the future National concreteness of the United States. When states openly refuse to accept amendments to the Constitution of the United States, this is startling evidence that our old-time National foundations are assailed. There is further evidence of this, in the freedom of criticism—not always temperate—of the President, or of high officials. The newspapers of the country are self-presuming, as never before. Violators of law, and of social decency, are rampant, especially in our large cities.

Almost everywhere, and in every line of activity, thought and habit, there is an insurgency that betokens lack of union, and lack of regard, for laws, principles and customs, that united to make this country great. As we disregard "united we stand" so we are approaching the "divided we fall" danger, and we ought not deceive ourselves as to this trend. We dare not be blind to the signs of the times, that are casting their shadows before.

Civilians as Cabinet Members.

There are great political reasons why civilians should head the great departments of this government, like the State, War, Navy, Treasury and Postoffice departments, but good business sense says that these heads of departments should know fully as much, if not more, than subordinates in the departments. In effect, that they should be men trained in each branch of the service, from apprenticeship up to master workman.

This is especially true of the War, Navy, and now the Air Service. In all of these departments, a great deal of inside information, based on much study and experience, is required, as the work is very special and quite outside of the ability of most men of very intelligent, business, legal or financial minds and training.

There is, of course, something to be said on the other side; that men who are engaged in the study of war, and preparations for war or defense, are apt to be inclined to be over-enthusiastic and extreme, and perhaps to invite war; that these men are trained in the machinery and discipline of war and too far removed from sympathy with, or knowledge of, preponderating public sentiment; and that fairly well qualified civilians have the broader

minds of the citizenry of the country, yet have access to the information and advice of the large body of departmental specialists and experts, who know no partyism but continue often for a life-time, in the country's service, no matter what the political complexion of administrations may be.

Notwithstanding this, we incline to the belief that these three departments, at least, should be headed by men, specially qualified for their job, and not be appointments made largely to "divide up" the big jobs among the various sections of the country, for political fence-making.

Even in the Postoffice department, so much of the actual management of affairs depends on inside information and experience, that a trained head would be desirable. However, Congress has the power to at any time "spill the beans," no matter who, or how especially qualified, the head of a department may be. The making of postal laws, by Congress, is an illustration of how expert information and ability cuts but little figure, as every Congressman has a constituency interested in how rates should be made—to their business advantage.

The Lure of the Moving Picture.

The Lutheran Church Herald prints this bit of interesting information and comment which thousands of foolish girls may well take to heart:

"About thirty thousand people are employed by the motion picture industry. Miss Mary VanKleeck of the Russell Sage Foundation recently visited Hollywood to investigate conditions and found that the emotional lure of the movies brought many more applicants to Hollywood than can possibly be engaged. Each year thousands of boys and girls throng to this Mecca of the movies to become stars over night. They have had small successes back home, have sung in the choir and acted in amateur theatricals, and have been recipients of flattering encouragements from friends and relatives. They got to Hollywood determined to 'get into the movies' and will not be discouraged. Questionable agencies have arisen to attract them to the coast where they spend their money in schools for acting, make-up schools, and employment bureaus, the accomplishments of which have been, for the most part, as barren as their promises were glittering. To save them from all these agencies the Association of Motion Picture Producers in California have now established a free central bureau in Hollywood from which all employees will be taken thereby automatically eliminating all these fee-charging agencies.

"The churches, the Y. M. C. A., and other charitable agencies have had a big task to do something for these disappointed aspirants who recklessly flock to this place to become Mary Pickfords and Douglas Fairbankses. Some of them may be fortunate enough to earn a few dollars by serving in a mob scene, but there is no permanent employment. We print this as a warning to the young people who may be lured away from home by misdirected aspirations. But the main reason for keeping away should be that the business is, to say the least, one which offers an unusual amount of temptations.

"We would by no means cast aspersions upon all those connected with the film-producing business, but the moral standards set by some of the leading film stars, should not be encouraging to the young men and women who are desirous of living a pure moral life. The many salacious productions now on exhibit cannot be produced without a degenerating effect upon the actors. Mr. Hays has still on his hands an unfinished job."

The Farmer Stands His Ground.

In the unceasing struggle between the individual and the corporation for industrial supremacy the farmer is one of the few of the former class who are successfully standing their ground. Organized enterprise, the corporation, the modern economic giant, has swallowed up many individual manufacturers and other producers, but the farmer has demonstrated that he is more than his equal.

The idea that the farmer is a slipshod business man is a delusion, W. I. Myers, Professor of Farm Finance of Cornell University, told a group of America's leading business men attending the annual meeting of the Chamber of Commerce of the United States.

"The American farmer," he said, "is the most efficient food producer that the world has ever known. The decrease in the proportion of workers engaged in agriculture from 87 percent in 1820 and 26 percent in 1920 is a concrete expression of this efficiency. In spite of this decrease in the proportion of workers engaged in agriculture, American farmers produce enough food and clothing for the

nation and a large surplus for export."

This is one reason why the corporation, which has made individual enterprise a practical impossibility in many industrial fields, has never been able to overcome the farmer who is more efficient than the large-scale producer.—Financial World.

Will of the Driver.

"A sweeping and effective reform in the driving of automobiles could be effected by the insurance companies by the adoption of a rule which would refuse liability insurance, for a term of years, to any owner of an automobile whose negligence in any manner contributes to an accident resulting in injury to any person.

"There is a close psychological bond between liability insurance and unreliability in driving. The man who settles back with the contented feeling that he is 'covered' may get careless and reckless, often without realizing it. The man who knows he is personally responsible for all consequences of his driving is almost invariably careful.

"The tide in the number of accidents and fatalities, increasing daily, will never be turned except by reaching the will of the man behind the wheel. Penalties, regrets, funerals, come at the wrong end of accidents to be effective preventives."—Tampa Morning Tribune.

Just what legal restrictions insurance companies might encounter by such a policy is a question. But the suggestions of the Tribune is a good one as the starting point toward accident prevention. Some responsibility required on part of driver makes him more careful.—The Manufacturer.

Something to Think About.

Much has been said pro and con about the prohibition question since the passage of the Eighteenth Amendment. Some would lead you to believe that it is only a farce and is a miserable failure. Propaganda has been spread concerning various things with the aim of weakening the enforcement of the law. Chief among these statements are such things as the enormous wealth of bootleggers; the immense quantity of whiskey that is being smuggled into the United States; the general unrest of the masses of the people about the Eighteenth Amendment and various other things of like nature. These statements are put out in such a manner that a great many people believe them.

Bringing the question home we ask the following questions: How many bootleggers do we know who are rich? Are they selling enough whiskey to make themselves independent? Are there as many illicit distilleries now as there once were? Do we absolutely know that such immense quantities of whiskey are being smuggled into the United States? How many people do you know that are dissatisfied with the Eighteenth Amendment? Are these people in a very small minority?

Look around you on all sides and size up the situation. Are things not in a much better condition today with regard to the whiskey situation than ever before? How many people have you seen lately in a drunken condition on the streets?

It is the duty of every loyal citizen to refute, as best he can, all propaganda that is being put out by the whiskey interests, and in so doing a service will be rendered the country.—Editorial, Pickens (S. C.) Sentinel.

To Renovate Velvet

When renovating velvet brush out all the dust. Hold the right side over steam until quite moist and iron on wrong side, or the velvet can be thoroughly brushed on right side and stains removed, then moistened on wrong side and ironed. Never lay velvet down when ironing. Stand the iron firmly on end, or have some one hold it for you, and, holding the velvet taut with both hands, pass it across the iron, having back of velvet against iron. If the garment is large it may be more convenient to fasten one end firmly, or have an assistant hold it, then holding the other end tightly, up high, with your left hand iron it on wrong side. This treatment will make velvet look like new.—Kansas City Star.

Golf Bulbs

Little Joan had been promoted to a garden of her own, and Joan's father had been using strange oaths about the diminution of his stock of golf balls. He was perambulating the garden when he noticed a curious whitish protuberance in Joan's section, and investigated. The culprit was summoned. "Well," she said, "you did say that you wished you could grow golf balls in the garden 'cos they're so dear, so I thought I'd try for a surprise. And I've watered them every day, and now you've gone and spoiled everything." And Joan's father, regarding half a dozen muddy objects, stole away with a sense of guilt—to buy more balls and to find a hiding place for them.—London Chronicle.

Simple Reason for the Change in Name

The ease with which many of the recent accessions to our population change their names is illustrated by the following true anecdote: The teacher in a South Boston school became so interested in a little Polish girl that she was anxious to learn of her progress after she was promoted to a higher grade and asked her new teacher concerning her.

"There is no such child in my room," answered the one so questioned.

"No Marie Levenski! Why! I know that she was sent to your room, for I asked about it at the time."

"There is no Marie Levenski in my room. I am very sure," persisted the other.

"But I have seen her go in the door, and there she is now," darting as she spoke toward a small girl approaching from the opposite direction. "Isn't your name Marie Levenski?" she demanded.

"It used to be, but now it is Mary Jones," was the calm reply.

"Mary Jones! How can that be?"

"Why, father buys and sells old junk, and one day there was a door plate with the things, and the name on it was Jones. Nobody would buy it, so we put it on our door, and now my name is Mary Jones."—Youth's Companion.

Semi-Savage Chileans Serve as Stevedores

Colonel is the principal coaling port on the west coast of South America and there it is customary for freighters to ship 20 or 30 stevedores in addition to the regular crew to break out the cargo when it is consigned to various ports further up the coast, the New York Times states.

These men are mostly Chileans and a tougher-looking company than these seagoing longshoremen could not be found, even among the bandits of southern Europe and Asia or the old-time pirates of the West Indies.

Swarthy, undersized, dirty and clothed in rags, they seem to touch the bottom notch in the scale of humanity. What they lack in intelligence is apparently made up in animal cunning and ferocity. Even a crew of Kanakas refuse to berth or mess with them. Every one carries a knife, which he can throw with the speed and accuracy of a bullet.

They are commanded by an overseer who is addressed as captain and who exerts a certain degree of authority over them. They do their own cooking aboard ship, each man serving as cook for a week, at the end of which time he resigns in favor of the next in line. Of course the captain never descends to menial labor, not even to work the cargo.

Wasps Build Strong House

Scientists claim they have learned some important secrets from the work done by the paper-making wasp. It constructs its houses from paper of its own making that is durable to an unusual degree. The wood pulp paper made by man today is modeled exactly after the paper made by the wasp and the two qualities are almost identical, the Ohio State Journal says.

The paper is strong, so that when the large wasp house, with its many six-sided cells, is completed, the edifice swings from two or three twigs. It is held there safely by paper cables and anchored so firmly that winds are unable to dislodge it for years after the wasps have deserted it, leaving the top-shaped bag swinging in the winds.

Easily Settled

A lady artist was giving a studio dinner with the usual Bohemian twist to it. Approaching a guest she asked in a kitchinish manner: "What is the difference between imported caviar and hash?"

Taking this for a playful riddle the guest replied: "I don't know."

"Then you'd just as soon have hash," said the hostess, serving him with a large portion.

Hall's Catarrh Medicine

will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

A Vision of the Months to Come

The future of a pair of Humming Bird Pure Silk Hose is clear to read.

For months, they are with you through thick and thin—the "thick" of your stout little walking boots, the "thin" of your dancing pumps.

The slender ankles, tapered in knitting, lose nothing of their caressing fit, nor do the winsome colors fade with the seasons. Seamless underfoot, they remain throughout, the very sole of comfort.

Lady of vision, look months ahead when purchasing silk hosiery for yourself or for others. All the newest shades—frequently many weeks in advance of the mode.

\$1.50 Per Pair

Our Hosiery Departments features only the most dependable brands of hosiery.

ON THE HONOR ROLL OF BANKS

Stewed--Then Canned

There is a whole temperance lecture in old Si Chestnut's short paragraph. He says: "Remember the fate of the tomato—it got stewed and then canned."

Of course it doesn't pay to get "stewed." Most of us found that out long before the Volstead Act. It pays to be temperate, conservative, in all things, but more especially in banking. People who trust their funds with a bank, demand security above all things. That is why our bank has the confidence of the people.

Resources Over \$1,200,000.00.

SHOULD BE TRAINED

Wife—I don't think I approve of this movement to train young people for marriage.

Hubby—What! Ain't pugilists and soldiers and all other fighting people trained?

It is socially proper as well as business-like to use printed stationery. It is also economical and apt to result in having paper and envelopes on hand, when needed. We have filled hundreds of orders received by mail for our \$1.00 offer, and have not had a single complaint.

200 sheets Hammermill Bond paper, 5 1/2 x 8 1/2, unruled, padded on request, with 100 size 6 1/2 envelopes to match.

Printed either in dark blue, or black. Not over 4 lines neat type, the same form on both paper and envelopes. Envelopes printed on back, if desired.

Cash with order, when sent by mail. Write instructions, and copy for the printer, very plainly. When mailed to 3rd, and 4th, Zones, and 5c; to 5th, Zone, or further, add 10c.

To Our Success

Stewart & Co. of Baltimore Celebrate Their 24th ANNIVERSARY SALE

THURSDAY, OCTOBER 8TH, TO
SATURDAY, OCTOBER 24TH

FOR THIS SALE we have provided values that will make this event one long to be remembered.

1. Everything is fresh Fall merchandise of Stewart quality.
2. Sale prices are for fifteen days only. (Some quantities may not hold out that long). After the Sale prices go back to regular.
3. The Sale is storewide; every department contributes.
4. We have shopped and compared our values—we know that they are exceptional.
5. Considering the importance of the Sale, we advise early selections.

Your good will is appreciated and we extend a cordial invitation to share in this big sale.

Shopping Service Bureau

If unable to come in person, write immediately.
We will fill orders as long as quantities last. See
Baltimore papers daily.

Practicing Law at 92

Northern Ireland has still in active practice a lawyer who has reached the age of ninety-two. He is George Hill Smith, who was born in 1833 but did not go to the bar till at the age of forty-four. He practiced in Dublin and on the northeast circuit and on the setting up of a separate Ulster judiciary confined himself to Belfast where he acts as one of the crown counsel.

Ornate Telegraph Pole

Because the old telegraph pole in front of the city hall at Aberdeen, Wash., was ugly and not in keeping with the city hall architecture, Councilman James Empey succeeded in getting the railway and light company of his town to remove it and replace it with a new one of becoming design, brightly painted. The pole will carry a brass plate giving the distinction of its choice to the councilman.

POULTRY

TAKING ADVANTAGE OF HIGHER PRICES

The high egg market last fall was in the latter part of November. The records indicate that the tendency is for the high spot in the market to advance earlier in the fall. The problem of the person who is interested in making his poultry pay, is how to prepare to take advantage of these high prices.

Pullets which began laying late in October frequently lay during the entire winter. Pullets which are developed too early begin laying early in October and then begin to molt, and unless they are exceptionally well fed they will not begin laying again until spring.

If Leghorns are hatched before April 1 and are well grown they will likely start laying early in October. Under good growing rations a Leghorn will mature in about 200 days. Some growers can carry their early hatched pullets along more slowly and prevent them from laying much before the first of November. In order to do this they feed very little meat scrap and other high protein feeds and feed considerable ground oats and other bulky feeds which grow a good frame but which do not hasten the maturity of the birds.

The heavy breeds which are slower maturing will lay better in the fall if hatched earlier than April. February and March pullets of the breeds such as Plymouth Rocks, Rhode Island Reds and Wyandottes will be about the right stage of maturity for November eggs if they are grown on a good ration.

One trouble with a good many producers is that they do not feed their pullets so that they mature quickly enough so as to start laying in the fall. In other words you have two sources of trouble in getting pullets to lay in November. One is the hatching of Leghorns too early and thereby having them go into a molt, thereby losing production in the winter from that source. The other trouble is on account of late chicks and slow development which results in the pullets not laying until the greater part of the winter is over and the period of high egg prices has passed.

Hens Should Be Fed So

That They Molt Quickly

The old hens should be fed so that they will molt quickly. Eggs will be high in price this fall and winter and we should feed the flock so as to obtain every possible egg, suggests D. H. Hall, extension poultry husbandman at Clemson college.

The molt is a natural thing and the hen must be allowed time enough for it. We can help them through the molting stage by feeding. The mash feeds are very beneficial in growing feathers, therefore, these hens should have all the mash they want. A pound of sulphur added to each 100 pounds of mash will also aid the hens in growing new feathers. Sulphur is also a mild tonic and aids in keeping the hen's body in condition.

During the molting period, the hens need a large amount of grain feed for the upkeep of the body. The molt is a severe drain on the hen and a good strong body, with plenty of extra energy should be kept by the hen. The hen is also laying up surplus energy for next year's laying. The best feed, care, and attention should be given them at this time. It will always pay you to send your hens to roost with a full crop each night.

Potassium Permanganate

Good as Water Purifier

Dr. S. Erikson of the Mountain Grove (Mo.) experiment station has carried on experiments to determine the value of permanganate of potash as a purifier of water for poultry, and has found that it is very efficient. The germs of cholera and of other intestinal diseases are destroyed in a few hours. The quantity to use is 14 grains per gallon of water. This quantity can be measured with sufficient accuracy with a ten-cent piece as measure, about 14 grains being carried on it. Permanganate soon loses its strength, which is indicated by loss of the purple color. When this occurs a new solution should be made up. Erikson's experiments show that small chicks are not injured by drinking permanganate water over a period of nine weeks. It can be safely used when sour milk is being fed, but it is not recommended to be added to milk.

Poultry raisers should not place dependence on permanganate as a cure for any disease. Its use is not intended as a cure but as a destroyer of germs that gain entrance to the drinking water from sick birds, thereby lessening the chance of the disease spreading in the flock.

Egg-Eating Habit

The habit or vice of egg eating is difficult to break, once it has been established. It usually starts from the birds getting a taste of a fresh egg when it is broken. Sometimes fresh egg shells thrown to the chicks without being heated gives them a taste of the raw, fresh egg. Darkened, large, roony nests, the frequent removal of eggs and the immediate removal of any broken shells are the most dependable methods for breaking up this trouble.

SUCCULENT CABBAGE HAS LONG HISTORY

Its Origin Lost in the Mists of Antiquity.

Should the history of the cabbage ever be written, it may prove to be unexpectedly thrilling. Remarkable facts concerning that humble vegetable have been discovered by Prof. Rugles Gates, the botanist:

"Cabbages, kales, cauliflowers and brussels sprouts," says the professor, "all originated in the wild cabbage, a native of the coast and the south of England. The cabbage as we know it was the first development of the wild plant, and from it appeared the cauliflower and the sprout.

"The origin of the species is lost in antiquity, but the Romans appear to have cultivated it. The remarkable thing is that each type entered more or less suddenly into the vegetable garden.

"A gardener in these ancient days may have planted a cabbage on a certain spot and have awakened up some morning to find a cauliflower or a stalk of sprouts in its place.

"There was no gradual development. It happened spontaneously. In the case of the cauliflower, there was an inflorescence, and the green flower became white, succulent and fleshy, though not to the degree that we know it today.

"The sprout was the result of the cabbage, instead of confining its efforts to the attainment of one large bloom, determining to multiply itself into a numerous clump of tender heads.

"It is in this way that we now think evolution has taken place—the production of new and marked varieties with fully developed characters.

"What causes the transformation? Interesting developments may result from the experiments. Why not, for example, a 'cauliflower' from the parent cabbage, or perhaps a 'carnip' from the carrot or the turnip?"

"As a food the cabbage has a long and honorable career," says the commissioner of health, New York city, "It has graced the tables of kings. The favorite dish of Emperor Pompey was cabbage. I have no doubt that many another ruler, if he admitted the truth,

would confess a yearning for corned beef and cabbage. It must be terrible to live on ambrosia and nectar!

"The cabbage is a valuable food because it is rich in lime and potash.

"Humans require roughage, coarse indigestible material, just as animals do. Every farmer can testify to the necessity of such foods for his stock. Every dietary expert agrees that roughage must be supplied if we are to be healthy.

"Cabbage is important, then, because it supplies lime and because it furnishes roughage. When it is served with delicious dressing it makes a fit dish for any table.

"In Scotland the oatmeal is cooked in the cabbage water, making a dish called 'kale brogue.' In this way the mineral elements are saved.

"Almost everybody can eat raw cabbage, but the cooked vegetable disagrees with many. As a matter of fact, too, when the cabbage is boiled much of its valuable material is carried away. Steaming, instead of boiling, guards against the calcium loss."

—Cleveland Plain Dealer.

Fattening Broilers in Crates Is Best Plan

Best results in fattening broilers can only be reached by feeding them in confinement, and for this purpose special fattening crates, or at least a small brooder house or room, should be used. Groups of not over 50 birds to a house or six or eight to the crate should be used. After confining the birds, do not feed them for 24 hours, and then feed a mash twice a day in troughs and all they will eat in 30 minutes. No water should be necessary, as the mash is to be fed wet. A good and simple fattening ration would consist of 20 pounds of yellow cornmeal, 10 pounds of wheat middlings or shorts, 10 pounds of fine ground oats and 10 gallons of buttermilk. Mix the mash and milk the day before it is to be used and let it sour. Market after ten days or two weeks of this feeding.

Very Sick

"My lawyer," said a European tenor, "he writes me that my contract is sick."

"Sick? How do you mean sick?"
"The tenor pointed to the word 'invalid.'"

Possible to Have Too Many "Irons in Fire"

If this ever comes to the knowledge of your young friend in the outer office, he probably will urge that I pay more attention to my own business and less to his. And, in a general way, he will be right. No one ever lost money, time or public esteem by letting the other fellow run his own works. But I like the young friend. And he is toting too big a stick, "J. P." writes in the Kansas City Star.

"How's your pep?" I asked. And he said impatiently that his pep was all right.

"It's gotta be all right," he said. "I've got too many irons in the fire to let down."

As long as I have known the young friend he has had an awful lot of irons in the fire, and half the time the fire wasn't very hot and he had to spend his spare hours blowing it. He began as an amateur champion in one of the walloping classes. Had a kick in each mit, his little playmates said, and might by this time have been fighting for stakes beyond the dreams of his youthful avarice if he had been content to become a professional man. But no. He must go into business.

"He'll get there, too," his friends say.

Very likely he will, if his wagon does not break down. As long as I've known him he has been the wheel-horse in his office. He was the one who did important tricks on Sundays and holidays, when the rest of the force could not be found by blood-hounds. He was always willing to stay up and get up. If any one had a job too much the young friend took it over. By and by he began to branch out and run businesses on the side.

Of course, he also has indigestion and his color is not what it should be.

There are lots of arguments favoring a modified and conservative laziness. One has a better time and probably lives longer. Of course, the granite tombstone will not be so tall as it would be if one had consistently overloaded all his life.

Earth Fires Cause Alarm

Villagers are alarmed at Pourtemue, France, by a natural phenomenon occurring in a ravine close to the railroad of Beziers, where the ground has become so hot that it burns the feet

of anybody trying to stand still. Clouds of heavy black smoke are rising from fissures in the rocks, while in some spots a thick, oily substance oozes from cracks in the ground and evaporates as soon as it gets in contact with the air, leaving everything covered with a shiny black, hard coating. The geological formation of the Aveyron district is volcanic in origin, but this appears to be the first sign of subterranean activity since prehistoric times. Scientists are proceeding to the spot to investigate. Pending a report, it is suggested that a stratum of lignite which exists in many parts of Aveyron may have become incandescent.—Family Herald.

Building Smaller Houses

Dwellings planned during the first three months of this year are not as large as those projected during the first quarter of 1924. The difference in size is almost as much as a good-sized living room. Comparison shows that the average area of the first group of 1925 houses is 371 square feet smaller than the dwellings planned during January, February and March of 1924. The conclusions are that more one-family dwellings have been planned during the current year than were planned during the first quarter of last year.

More residential projects have been filed through the country this year than were filed last year. This supports the opinion that the individual house rather than the larger unit is now engaging the attention of the builder.

Give and Take

Representative Clint Cole was talking about the aircraft controversy: "First one side scores," he said, "then the other side scores. It's like the doctor and the man with the mumps."

"The man with the mumps halted the doctor and said:

"Doc, what ought a chap to do when he's got the mumps?"

"The doctor's lips closed tight at the thought of being buncoed out of a free prescription, and then he gave a harsh laugh and said:

"Such a man, my friend, ought to consult a good physician."

"The man with the mumps laughed harshly in his turn.

"Thanks, Doc," he said. "That's what I'll do, then. So long!"

MARRIED

STALEY—BOWERS.

Birnie Miletts Staley and Viola Grace Bowers, both of near Taneytown, were united in marriage on Saturday, October 3rd. The ceremony was performed at the Lutheran Parsonage in Taneytown by Rev. W. V. Garrett.

BANKARD—SLAYBAUGH.

Miss Margie Irene Slaybaugh, Gettysburg, and Geary W. Bankard, 717 Capitol St., Harrisburg, were married Saturday, September 26, at 8:00 o'clock, at the Camp Curtin Memorial Church, Harrisburg, by the Rev. Geo. Henry Ketterer, pastor. The ring ceremony was used.

The attendants were Miss Betty Downie and R. C. Keller, both of Harrisburg. The bride, daughter of Garfield Slaybaugh, York St., Gettysburg, graduated from Gettysburg High School with the class of 1924. Since June of that year she had been employed in the office of Phillip R. Bickle, insurance agent of Gettysburg.

The bride wore a henna colored gown with trimmings of silver lace and carried a bouquet of sunburst roses. Miss Downie's gown was of green georgette over a slip of green satin. Her flowers were tea roses.

Mr. Bankard was formerly of Taneytown. Having left there he entered the service of the U. S. Army, which he served for four years. After being discharged from the service, he made his home at Harrisburg, where he is now employed at Weaver's confectionery, Harrisburg. Mr. Bankard is a son of Mrs. Walter Selby, of Union Bridge. Mr. and Mrs. Bankard will reside in Harrisburg.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MR. EZRA FLEAGLE.

Mr. Ezra Fleagle who had his limb broken several months ago, while on a visit with his brother, Obedia Fleagle, Uniontown, died at a Hospital, in Baltimore, Tuesday, Oct. 6, 1925, aged 83 years. He had improved sufficiently to be out in his chair, when paralysis followed.

He is survived by five daughters, Mrs. H. H. Harbaugh, Mrs. John Harbaugh, Mrs. Eva Henry, Mrs. E. C. Alderdice, and Mrs. Harry Barnes; two brothers, Obedia Fleagle and Benjamin Fleagle, and a sister, Mrs. Annie Shriener.

Funeral was held at the Bethel, Uniontown, Friday, Oct. 9, at 11 A. M., by Rev. J. H. Hoch. Burial by his first wife in the Hill cemetery. His second wife died the past year.

MR. WILLIAM D. COLLIFLOWER.

Mr. William D. Colliflower, died at his home in Emmitsburg, on Oct. 4, about 11:30 P. M., from paralysis, after an illness of nine weeks. He was aged 60 years, 3 months and 12 days. Funeral services were held on Wednesday, at 1:00 P. M., in the Presbyterian Church, at Emmitsburg, by his former pastor, Rev. J. T. Chase, of Baltimore, assisted by Rev. Philip Bower, of Emmitsburg and Rev. Wade Stoner, of Baltimore. Interment was made in the Presbyterian Cemetery, near Emmitsburg.

Mr. Colliflower is survived by his wife, by second marriage, and one son, Alexandria, of Altoona, Pa., by first marriage; one sister, Mrs. George Rightly, of Baltimore; three brothers, Milton and Lean, of Altoona, and Howard, of Graceham, Md.; also two grand-children, of Altoona, Pa. He was a member of the Masonic Lodge, and was very widely known as a traveling salesman. The Masonic Lodge had charge of the services at the cemetery.

Are Aluminum

Pure aluminum, the goal of many years of research, soon will be available in commercial quantities through the development of a new refining process, says Popular Science Monthly for August. This product has a beautiful silver color and luster which it retains very well.

A Surprise Party.

(For the Record).

The home of Mr. and Mrs. William Frounfelter, of near Littlestown, was the scene of a pleasant gathering on Sept. 29, when their relatives and friends gave Mr. Frounfelter an entire surprise. The evening was enjoyably spent. Music was furnished by the Frounfelter brothers orchestra, Taneytown, accompanied by Mrs. Chas. Shoemaker. Also duets, vocal solos and music on the victrola. At the conclusion of which all were invited to the dining room where refreshments of all kinds were served.

Those in attendance were: Mr. and Mrs. Wm. Frounfelter, Rev. and Mrs. J. I. Hummer, Mr. and Mrs. Joseph Frounfelter, Nahia Arter, John Lepo, Wm. Menges, Milton Flickinger, Edw. Formwalt, Charles Tressler, Alva Arter, John Mummert, Willis Study, Harry Bloom, James Hill, Chas. Shoemaker, Roy King; Mrs. Earl Shryock and Mrs. Harold Dutera; Misses Ruth Leppo, Etta Wantz, Thelma Lambert, Clarence Shoemaker, Helen Tressler, Evelyn Asper, Helen Frounfelter, Florence Asper, Carrie Frounfelter, Pauline Sheaffer, Norma Frounfelter, Catherine Arter, Dorothy Flickinger, May Belle Hill, Hazel Mummert, Hazel Hill, Edna Frounfelter, Marian Leppo, Ella Frounfelter, Pearl Shryock, Helen Shoemaker, Freda Mummert, Vivian Dutera; Messrs Chas. Frounfelter, Paul Hummer, Ray Frounfelter, Ralph Forry, Richard Garrett, Russell Frounfelter, Robert Crouse, Alvin Gerrick, Alvin Groft, Ralph Shoemaker, John Bloom, Irvin Hill, John Shoemaker, Edwin Flickinger, Fred Bloom, Bernard Flickinger, Orville Mummert, Carroll Arter and Burrell Arter.

Havre de Grace Bridge to be Widened

The Baltimore Sun says that Gov. Ritchie announced, on Wednesday, that the Havre de Grace toll bridge is to be widened to nineteen or twenty feet, giving room for two trucks to pass. The expense, which is estimated at about \$200,000, is to be paid for from the tolls, and no appropriation will have to be made by the State. The Governor said it was believed that it would postpone the final payment for the bridge only about one year.

"I have had a conference with John N. Mackall, the State Roads Engineer, on the widening of the Havre de Grace bridge over the Susquehanna river," the Governor said. "The roadway of this bridge is barely thirteen feet wide. This is sufficient for two cars to pass each other, but not sufficient for two trucks to pass, or even for a car and truck to pass. In the interest of both safety and convenience it is most advisable to widen the roadway by at least six feet, and Mr. Mackall and I have decided that the State will be justified in paying for this work out of the tolls collected."

"The act providing for the purchase of the bridge requires the bridge to be toll free when it has been paid for. The total cost was about \$585,000. The gross tolls collected during the fiscal year just closed were \$205,000 and the net was \$186,000. It is expected that the tolls will be sufficient to complete the payment for the bridge not later than January 1, 1927, and perhaps before."

"In addition to that, when the bridge is widened, an annual expense of about \$12,000 will be saved the State. This sum is paid now to about ten men who are employed because of the narrowness of the bridge in order to direct traffic. But with the bridge widened to nineteen or twenty feet, these men can be dispensed with. Twelve thousand dollars is four percent on \$300,000, so that the item is quite a considerable one."

Notice to Milk Patrons.

I am pleased to inform my patrons in Bruceville and Keymar, to whom I have been furnishing fluid milk, that in the recent Federal Tubercular test of my dairy herd, there was only one reactor, which has been disposed of. I can now assure them the satisfaction of continual service with a rich, wholesome product from disease-free stock. Sold in sealed bottles only, in compliance with the state law regulations. Eat more milk. It is nature's food for both young and old. Eat more milk. New patronage solicited.

J. RAYMOND ZENT,
Keymar, Md.

Wife and Husband
Both Ill With Gas

"For years I had gas on the stomach. The first dose of Adlerika helped. I now sleep well and all gas is gone. It also helped my husband." (signed) Mrs. B. Brinkley. ONE spoonful Adlerika removes GAS and often brings astonishing relief to the stomach. Stops that full, bloated feeling. Brings out old, waste matter you never thought was in your system. This excellent intestinal evacuant is wonderful for constipation. R. S. McKinney, Druggist.

Tuberculosis
All animals have a certain degree of resistance to the attack of the germ of T. B.; in some this power is low and others very high. The guinea pig, for example, has almost no resistance to this disease, while the goat has so high a resistance that it is very hard to infect it at all. Among human beings the Indian and negro usually show a very low resisting power and when infected are apt to have the rapid and dangerous form of the trouble. The average white man, on the contrary, has considerable resisting power.

Special Exhibit

You are Invited

to take a picture trip through an automobile plant

Learn how quality is attained with modern production methods! This week we are making a special photographic exhibit illustrating the precision methods by which quality is achieved in the manufacture of the modern motor car.

Showing the Reason for Quality at Low Cost

The exhibit consists of 40 remarkable photographs of the most interesting processes in modern automobile manufacture. It will provide the same interesting knowledge that you would get by taking a trip through the plants where Chevrolet cars are built. Each picture is accompanied by a full description of the operation it illustrates. It is an exhibit of unusual interest and value. Bring the children.

The W. M. R. R. Situation.

The union is still awaiting a reply from President Byers of the W. M. R. R. A joint conference was held, the first of this week, between union heads and railroad representatives that apparently accomplished nothing. Notices were posted in R. R. terminals, this week, announcing that all who failed to report for duty would be considered as having left the service, and would lose certain Seniority rights.

No intimation has been given as to what has been done in the way of plans for continuing traffic, in case a strike is ordered. It seems to be the

common belief that the Company will not accede to the demands for increased pay, without compensating changes in working rules.

BEFORE THE ALDERMEN

Alderman—I desire to present a petition.

Presiding Officer—The clerk will read.

Clerk—To the honorable board of aldermen, a petition from the inmates of the almshouse, asking the board to provide parking space for their automobiles.

Among the NOTABLES

ANTOINE LAVOISIER

ANTOINE LAVOISIER was one of the greatest of the French scientists, a man who aided the rapidly progressing civilization of his time in a hundred small but important ways. He was born in Paris August 26, 1743, and, like most unusually brilliant men, showed his genius at an early age. The trend his early thoughts took is shown by the school essay for which he won a prize, the subject being the best lighting system for a large town. There was a belief then that by repeated distillation water could be converted into earth, and in his early experiments Lavoisier showed this belief to be false.

He made several improvements in the manufacture of gunpowder, then started a model farm along the lines followed now by our most up-to-date farmers—and which was a revelation to the peasant farmers of his time. Holding one public office after another, he used his genius in building canals, organizing insurance companies, savings banks, starting a new and better system of accounts for the nation and perfecting the weights and measures systems. He discovered, with Laplace, that gases could be reduced to liquids and solids. But political troubles were brewing, which finally culminated in the revolution in 1792. At first it seemed that Lavoisier would not be touched, but in 1794 some fanatics, the Bolsheviks of the French revolution, declared the new republic had no need of savants, and Lavoisier, too, was beheaded on the guillotine.

(© by George Matthew Adams.)

Mother's Cook Book

And this for comfort you must know
Times that are ill won't still be so:
Clouds will not ever pour down rain
A sullen day will clear again.

SOMETHING TO EAT

SOMETHING new is hard to find; something different will depend largely upon the ingenuity of the cook. When we are thinking about foods new combinations will suggest themselves.

Pineapple Salad.

Arrange slices of pineapple in nests of head lettuce, sprinkle with cream cheese which has been put through a ricer, fill the centers of the pineapple slices with large yellow cherries and serve with:

Golden Dressing.

Take one-fourth of a cupful each of pineapple juice, orange or cherry juice, heat in a double boiler, beat two eggs lightly, add one-half cupful of sugar, pour over the hot juice and cook until smooth; remove to a dish to cool.

Virginia Baked Ham.

Soak six or eight pounds of smoked ham over night, drain and bring to the boiling point. Remove the skin, dot over with peanut butter and stick in a dozen cloves. Place the fat side up in a roasting pan. Put a little peanut butter with some celery or celery seed in the pan with four bay leaves, add a little water, baste occasionally, and roast three hours. Use half a pound of peanut butter; this gives the flavor so well liked in peanut-fed hogs.

Cymlings or Summer Squash.

Cook, mash and season them generously with butter, salt and pepper. Place in a baking dish, cover with buttered crumbs and slices of bacon. Bake until the crumbs and bacon are brown. Serve from the baking dish.

THE FAITH AT HOME

By DOUGLAS MALLOCH

I WANT the folks at home to know,
Whatever others say about me,
That what I do or where I go,
The home-folks have no cause to doubt me.

I want the folks at home to feel
Tonight, when down to pray they kneel,
Though father may be far away
There is no stain upon this day.

I want the folks at home to trust;
I want it not for my sake only;
For some stay home, for some folks must,
And children want, and wives are lonely.

I want the folks at home to keep
One joy when they lie down to sleep,
The peace of knowing that the name
They bear has not a mark of shame.

I want the folks at home to say,
Whatever others say about me,
That here or there or far away
There is no need for them to doubt me.

However separations grieve,
Or slander hurt, if they believe,
A fellow still can do his best
And not care much about the rest.
(© 1925, McClure Newspaper Syndicate.)

Heraldry at Bottom of Ophelia's Remark

Many who have seen the tragedy, "Hamlet," and heard Ophelia say to the queen, Hamlet's mother, "You may wear rue with a difference," must have been mystified as to her meaning, although the poignancy of the mad act causes the mind to pass it by as one of Shakespeare's inexplicable problems.

Yet it is not inexplicable. In heraldry "differences," or "marks of cadency" indicate the various branches of a family. During the lifetime of his father, the eldest son bears a label, the second a crescent, the third a mullet, the fourth a martlet, the fifth an annulet, the sixth a fleur de lis, the seventh a rose, the eighth a cross moline, the ninth a double quatre foil.

Ophelia says both she and the queen are to wear rue, herself as the affianced bride of the eldest son of the king, but the queen with a "difference," indicative of the fact that, although she was Hamlet's mother, her status was that of her present husband, Claudius, the cadet branch of the family.—Cleveland Plain Dealer.

Evil Spirit of Sea

Feared by Sailors

Punta Flechas, a promontory on the northeast coast of Palawan, Philippines, has become a well-known landmark to Yankee skippers voyaging to minor ports of the Philippines to pick up cargoes of sugar, coconuts dried into copra to be shipped to vegetal oil mills, and Manila hemp and other fibers for the cordage industry. An interesting superstition of Filipino sailors attaches to the name Punta Flechas, which means in English Arrow point. The granite cliff figures in Philippine mythology as the dread abode of an ogre of the sea who could conjure winds and typhoons to trouble the water of Dumarang channel and wreck the little navies of those who refused to pay him homage. He demanded prowess in his worshippers, and the way to appease his wrath was to sail close under the cliff and launch arrows into it. Shots falling short were an evil omen—if they are not yet.

Fled From Native Land

The name "emigres" is given to those persons who left France at the time of the revolution. The royal princes fled in 1789, in consequence of the fall of the Bastille, and were followed, after the adoption of the constitution of 1791, by all those who felt aggrieved by the extinction of their privileges. The greater number of these refugees returned in 1802, after the peace of Amiens, owing to an amnesty grant by Napoleon Bonaparte, while first consul. Many, however, remained abroad until after the fall of Napoleon. According to the charter of 1814, the emigres were unable to recover their estates or their privileges. In 1825, however, a compensation of 30,000,000 francs yearly was granted those emigres who had lost their landed estates. This grant was annulled after the July revolution of 1830.—Kansas City Star.

Auctioneer's Find

Some time ago a man sent a parcel of books to a London salesman. They proved mostly of little value, but among them the auctioneer discovered a rare leather-bound volume containing specimens of Caxton's press. The contents comprised a fragment of the "Royal Book," a perfect copy of which is worth over \$10,000, nearly all "The Book of Good Manners," and about half of "The Doctrinal of Sapience," a complete copy of which has realized \$3,000 at auction. The only perfect copy known to collectors outside the Bodleian library at Oxford, of the "Songs and Sonnets" by Henry Howard, earl of Surrey, published in 1587, was found in the old oak wainscot of a bakery at Chatham. How long it had lain there is a mystery.

Term Used by Masons

The name "Cyclopean masonry" is given to walls constructed of large, irregular, but closely fitting stones, un-hewn and uncemented, specimens of which may still be seen at Mycenae and Tiryns and other parts of Greece, and also in Italy. These walls were probably built by the Pelasgians, a race anterior to the Greeks and Romans, about 1000 B. C.; but later generations, struck by their vast proportions, ascribed their construction to the fabulous race of the Cyclopes, whence their name. Examples of Cyclopean masonry exist also in Sicily, Ireland, Peru and Africa.—Exchange.

London's Big Reservoir

As a means of increasing the fresh water supply for the city, London built the world's largest artificial reservoir. It is capable of holding about 7,000,000,000 gallons of water. It has a surface of more than 700 acres, larger than a section of land. It is about one and a quarter miles in diameter, and is a seven-sided polygon in shape. Its location is north of the Thames between Staines and Shepperton.

But Robert Will Learn

Little Robert, age, three, and his mother were visiting his aunt. His mother was the fortunate possessor of an abundance of hair, but the aunt was not so fortunate. One evening Robert was in his aunt's room when she took her hair down (or rather off) for the night, and greatly excited he ran and called: "Oh, mama, come quick. Auntie's hair has all broken off."

CARROLL RECORD,

PUBLIC SALE

— OF A —
Desirable Farm

near Westminster, Carroll Co., Md.

The undersigned, desiring to discontinue farming in the spring, will offer at public sale, on

SATURDAY, OCTOBER 17, 1925,
the farm consisting of
57½ ACRES OF LAND,

all in a high state of cultivation. Two permanent pastures of five acres each. This farm is situated on the Taneytown State Road one-fourth mile from Westminster—right in the shadow of Western Maryland College.

The farm has all necessary out-buildings in good repair. A large roomy barn, and 7-room house with wash-house, dairy attached, and 3 chicken houses. A good never-failing well of splendid water in wash house, with pitcher pump in the kitchen. Also running water at house, dairy, barn, and chicken house, from a never-failing spring, gravity flow.

Concrete walk from house to barn and chicken house. A young orchard started, with a variety of fruit—peaches, pears, apricots, cherries, damson and quince; also blackberries. This is the first farm on left-hand side of road, outside of city limits, and has a seven acre field adjoining town that is desirable for developments for building lots next year. Wheat crop is included with the place.

Sale begins promptly at 2:00 P. M.

TERMS—One-third cash; one-third payable in 6 months, without interest. The other left in the place, at 6 percent interest, if so desired.

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(©, 1925, Western Newspaper Union.)

Lesson for October 11

PAUL IN CORINTH

LESSON TEXT—Acts 18:1-11.
GOLDEN TEXT—"Be not afraid, but speak, and hold not thy peace."—Acts 18:9.

PRIMARY TOPIC—God Protecting Paul.
JUNIOR TOPIC—Paul in Workshop and Pulpit.

INTERMEDIATE AND SENIOR TOPIC—Paul's Experiences in Corinth.
YOUNG PEOPLE AND ADULT TOPIC—Paul Plants the Church in Corinth.

I. The True Missionary Method (vv. 1-3).

Paul came to Corinth a stranger in a strange city. He did not have an advance agent to do his advertising. His method in gaining a foothold in Corinth was as follows:

1. Finding a Home (v. 2).
This he found with Aquila and Priscilla, Jews, who were recently expelled from Rome by the cruel edict of Claudius.

2. He Tilled for His Daily Bread (v. 3).

He was of the same craft with them, being a tentmaker. Every child among the Jews was taught some trade by means of which he could gain a livelihood, should occasion require.

3. Preaching in the Synagogue at Corinth (vv. 4-8).

1. Though Compelled to Tilt for a Living While Getting a Foothold in Corinth, He Did Not Lose Sight of His Main Work (v. 4).

He reasoned in the synagogue every Sabbath, persuading the Jews and Greeks. While the missionary should not be above honest toil when necessity arises, he must not allow toil to interfere with preaching the gospel.

2. His Activity Was Increased When Silas and Timothy Came (v. 5).
This resulted from three causes:

(1) They brought good news from the church at Thessalonica (1 Thess. 3:6).

To hear of the steadfastness of those who had confessed Christ under his ministry, put new vigor into his labors.

(2) They brought pecuniary gifts from the Macedonian church (Phil. 4:15; 11 Cor. 11:9).

Being relieved from the necessity of toiling for a living, he could now devote more time and energy to the preaching of the gospel.

(3) Silas and Timothy became assistants to Paul in the work.

3. Paul Opposed (v. 6).

His increased activity was met with increased opposition. As the Lord's ministers become more aggressive in their work, the ministers of Satan put forth corresponding efforts in opposition.

4. Paul Announces His Purpose to Turn to the Gentiles (v. 6).

Because of their blasphemy and opposition, he ceased to work among the Jews. There is a time when good judgment causes one to abandon work where efforts have been fruitless, but it is difficult to know just when to do it. Oftentimes lasting harm is done to the work by pressing efforts when people have turned against the truth. Paul's declaration, "I am clean," was a most solemn one.

5. He Did Not Go Far Away (v. 7).
He remained sufficiently near those whose hearts God had touched that they could easily find him. It is likewise true that although Christ is obliged to depart from the soul that refuses Him entrance, He lingers with yearning love around that heart.

6. His Success (v. 8).

Crispus, the chief ruler of the synagogue, was converted. Perhaps Paul's severe action in turning away from them moved Crispus to act.

III Paul's Vision (vv. 9-11).

His experiences since coming to Europe were very trying. He needed encouragement at this time. It is just like the Lord to come at the time of the servant's greatest need. Note the Lord's words to him.

1. "Be Not Afraid." When one is executing the commission of the Lord, he need not be afraid.

2. "Speak and Hold Not Thy Peace." The one who has heard the voice of God cannot refrain from speaking. He cannot be still.

3. "I Am With Thee." The Lord is with every one who faithfully carries out His commission.

4. "No Man Shall Set on Thee, to Hurt Thee."

The one sent by the Lord to do a work is immune from danger and harm until his work is done.

5. "I Have Much People in This City." It is most encouraging to know that in the great cities the Lord has His own people, and that the one who goes in His name shall have fruit for his service.

All Are His

It is not the high summer alone that is God's. The winter also is His . . . and all man's winters are His—the winter of our poverty, the winter of our sorrow, the winter of unhappiness, even the winter of our discontent.—George Macdonald.

Character

Character requires a still air. There may be storm and upheaval around, but there must be peace within for the soul to thrive.—Rev. T. T. Munger.

THE CHRISTIAN ENDEAVOR TOPIC

From—
Moody Bible Institute Monthly
Chicago, Ill.

October 11

"They first gave their own selves"
A Stewardship Meditation—
2 Corinthians 8:1-15

In the fifteen verses assigned for this topic, there will be found an example of stewardship and an admonition to follow the example. The churches in Philippi and Thessalonica abounded in the grace of giving, a fact full of interest and challenge. The values for us lie in the source and method of their generous giving. Its source was the grace of God. They had clearly apprehended it as it is presented in verse 9. That wonderful example of grace on the part of our Lord had become a working force in their lives. According to verse 3 and 4 they were willing to give beyond their power and entreated the apostle and his helpers to receive the gift of their sacrificial love.

The abiding and operating principle of Christian giving is clearly seen here. It lies in the clear apprehension of the divine sacrifice as set forth in the six words—"For your sakes he became poor." Apart from the apprehension of this truth and the experience of its power in the life, giving will be an ungrateful task, something done to keep up appearances. In seeking to lay hold of this principle of giving, read verse 9, Philippians 2:5-11. In this will be found additional inspiration, to Christian giving.

The method of giving is explained in the words of our topic taken from verse 5, "They first gave their own selves to the Lord." When this becomes true in life, nothing is really withheld. An intelligent surrender to God will be followed by an intelligent service for man and a glad willingness to pay the price of such service. To give ourselves to the Lord involves the placing of all that we have at His disposal, time, talents and money. It is simply the recognition of His ownership, the acknowledgment of the fact so clearly stated in 1 Corinthians 6:19, "Ye are not your own."

The admonition to follow the example of the Macedonian Christians occupies the place of prominence in verses 10-15. "A willing mind" is emphasized in verse 12, while in verse 11, the appeal is to "complete the doing." In the Revised Version this verse reads: "But now complete the doing also that as there was readiness to will so there may be the completion also out of your ability."

CHARACTERISTICS OF NON-LAYING CHICKEN

August and September are the best months in which to cull flocks. Hens that have the characteristics of good layers and that are laying in August and September have been invariably the best producers throughout the year. In order to cull a flock properly it is necessary to handle each hen and put her through some tests such as the following, suggested by G. A. Schmidt, Colorado Agricultural college.

One of the outstanding characteristics of a non-laying hen of the yellow-skinned varieties is the deep yellow color found on the shanks, on the beak, around the vent, around the inner edge of the eyelids and on the ears of the white-lobed varieties. When these hens are laying, this yellow pigment is all needed to form the egg yolk and none is deposited on the body, and consequently the parts just enumerated are faded or whitish in color.

The pelvic or pin bones of non-layers are thick, curved in and close together. On laying hens they are thin, straight, flexible and wide apart, three fingers' breadths or more. Measure each hen for this distance between the pin bones when culling.

When a hen is laying heavily her body is deep, a condition brought on by the enlarged intestines and egg mass. This depth of body is measured from the pin bones to the end of the keel and a good layer shows a depth of more than four finger breadths from the pin bones to the keel. Test each hen for this depth.

Non-layers generally have a firm, drawn-up, meaty or fleshy abdomen and differ from high producers much as a fat beef cow differs from a good dairy cow. Feel the abdomen of each hen.

The vent of a good laying hen is large, open and moist, while that of a non-layer is small, closed, puckered and dry. Look at the vent of each hen when you handle.

The comb of the non-laying hen is dry, pale, hard, and often covered with small scales. On a laying hen it is red, soft and larger. Look at the combs and feel them.

Contrary to popular opinion the early molting hen should be culled. Under normal conditions, hens that molt early are not very high producers. The early molter is much like the cow that goes dry three months too soon. Mark the hens that start molting first and get rid of them.

At all times cull all sickly, inactive hens. Good layers are active healthy birds always looking for something to eat. In careful culling all the factors mentioned should be considered and only the best birds held over the winter for breeding. If flocks are carefully culled each year, and if the birds are given good care egg production can be considerably increased.

Ford

INCREASED values recently built into Ford cars are particularly noticeable in this attractive, compact Ford Coupe.

All the practical advantages which have made this car so universally popular, are here in greater measure, every added feature giving comfort, style and good looks in addition to remarkable utility.

See your nearest Authorized Ford Dealer for a practical demonstration.

Firestone

Why Gum-Dipping is so Important to Car Owners

GUM-DIPPING—the Firestone extra process builds into tires extra quality by impregnating and insulating every fiber of every cord with rubber.

This exclusive method is carried out in special Gum-Dipping plants, after which the cords are put through the usual calendaring process.

By this method, added strength and flexibility are imparted to the cords, making Gum-Dipped Balloons most serviceable and enduring over rough roads.

Save money—buy Gum-Dipped Balloons now—while prices are low.

AMERICANS SHOULD PRODUCE THEIR OWN RUBBER.... *W.B. Sullivan*

Caught Eagle in Hands

A story comes from Appleton, Maine, to the effect that when Elden Maddocks and his family, of that town, were on their way to visit friends in Center Montville, Mr. Maddocks caught an eagle with his hands. The eagle was flying very slowly and Mr. Maddocks stopped his car and caught him very easily, as he seemed nearly helpless, for some reason. The eagle's spread was 6 feet 2 inches. He did not appear to be injured externally. Mr. Maddocks took him home to try to bring the bird back to his full strength.—Indianapolis News.

May Revive Old Court

An Oxford (England) undergraduate is to be tried in the ordinary courts of assize on a charge of manslaughter arising out of a motor accident. The frequency of motor smashes in which undergraduates are concerned and the gravity of their attendant consequences has led a famous law don to suggest that the court of the lord high steward should try and punish the offenders.

This university court has been in existence since 1404, although it has not tried a case since a century before the days of Blackstone.

A Hint to Epicures

Wife—Have you really told the cook that she and her sweetheart are to dine with us? Is that quite the thing?
Husband—No. It isn't the thing, but I'm getting tired of his always having the best of all the food!—Vikingsen, Oslo.

It Must Have Been

"Do you remember Mrs. Smith?"
"No, I can't say I do."
"Oh, you must remember her. She was the plainest girl in the village. But I forgot; that was after you left."—London Tit-Bits.

Rural England in 1825

Had Little Over China

The Chinese minister of communications sent from Peking a long cablegram of poetic prose felicitating the managers of the Darlington railway exhibition in England on their centennial of George Stephenson's "Locomotion No. 7."

Unless the railway track was laid over the graves of ancestors in an inland province, the spectacle of the puffing monster, once regarded as first cousin to the earth-dragon, would excite far less confusion in the celestial republic today than it did among the honest English yokels of Stephenson's era.

Then, according to contemporary report, "in many bosoms the arrival caused the greatest consternation. They fled in abject terror, many hiding themselves in the church, others seeking consolation in the bottle, while some of the more courageous climbed into trees and at a safe distance from the monster's claws watched it pass."

Reading that account one is inclined to believe that Europe in 1825 was not many leagues in advance of the cycle of Cathay, remarks the Philadelphia Ledger.

Old English Dog Law

Had Sound Reasoning

There was a great fear of dogs among the people of England when Edward I was reigning, in which time was established a most extraordinary law affecting dogs, according to a writer in the Ohio State Journal.

Only those people living a considerable distance from the large forests in that country were permitted to own and keep dogs, particularly large dogs, the lawmakers, with great wisdom, reasoning that a large dog near the forest, where there was much wild game, would join with other large dogs and follow the call of the wild.

A great pack of wild dogs would be developed, game would be destroyed and grave danger developed for human life. So the law provided a dog-gauge, an opening of prescribed size, and only such dogs as could squeeze their way through the legal measuring gauge were permitted to be kept at a home within 10 miles of the forests. And the law never has been repealed, but it has not been used for generations.

Fear Was a Friend

A few weeks before his death Lord Leverhulme, in his presidential address to the Institute of Certified Grocers at Scarborough, said that he felt sure that the greatest help to any of them was fear, and that fear had been his best friend. His first recollection was fear. He had fear of continuing a clerk at his father's business, and that fear persuaded his father to put him on the road as a commercial traveler at the age of nineteen. He married at the age of twenty-two, and then fear came as to whether the profits would keep a wife.

Later fear drove him into soap. His soap, widely advertised, was floated as a company in 1894. In the words of one of his numerous obituaries: "The years that followed marked the growth of a business ideal that was almost-epic in its triumphs and ramifications."—Spectator, London.

"System" Fell Down

Johnson prides himself on having a "system" for betting on the races that can't be beat. He frequently makes queer bets and sometimes that god of chance that favors those who rush in where angels are conspicuous by their absence smiles upon him. But the other day he tried one and failed.

There was a four-horse race and Johnson conceived the brilliant idea of betting on each of the four horses to win. Perhaps he didn't stop to think that it would take a 4 to 1 shot winner for him to break even. In any event, at the last moment there was an added starter—and the added starter won.

Johnson doesn't think so much of his system.

Rare Exhibits of Pearls

In a shop in Regent street, London, is being shown a remarkable collection of pearls gathered from fisheries all over the world. There are white Austrian pearls with their silver sheen very beautiful, but cold in color, that can be worn triumphantly by the pale blonde. The warm magnolia-tinted pearls from Ceylon, or the golden and brown pearls found in the depths of the Red sea are ideal for darker women, as are the rare black pearls found only in the Gulf of Mexico by pearl fishers searching for black mother of pearl.

The Hegira

The Mohammedan calendar, by which time is reckoned in Turkey and all lands adhering to the religion of Islam dates from the Hegira, or flight of their prophet from Mecca, July 16, 622. The Mohammedan calendar is divided into 12 months; the first month has 30 days, the second 29 and so on through the calendar, except that the eleventh and twelfth months both have 30 days respectively.

A Big One

Little Mary's father is a teacher and keeps pretty close tabs on her school work.

Her arithmetic gives him more concern than anything else. At lunch time on the day when she had her final examination in arithmetic he asked her what mark she got.

To which she mournfully replied: "The biggest nought I ever saw."

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Mrs. Samuel Crouse who has been ill with acute indigestion, is able to be about.

E. O. Weant, of Westminster, spent Monday evening with Mr. and Mrs. M. A. Koons.

Mrs. Margaret Stott and son, Robert, and Miss Anna Galt, are visiting friends in Philadelphia.

Miss Mae Sanders left this Friday morning to spend a week with her sister, at Pottsville, Penna.

Apple picking time is here; some have good crops, and some have not, and the fruit is mostly under size.

Mr. and Mrs. John Swigart and five children, Mr. and Mrs. Kagle, of York, Pa., spent Sunday with M. Ross Fair and family.

Recent visitors at Wm. Airing's were Nahia Arter and wife, Albert Hess, Aaron Null and O. Bowman, of Silver Run, Md.

Read the announcement of Taneytown's Chautauqua course, on first page, this issue. The write-up is not ours, but it has our indorsement.

R. H. Alexander attended a sale at Rockville Fair ground, last week, and purchased 15 Registered Holstein and 1 Grade Cow. These Cows are doing fine.

The rain of last Friday and Sunday, helped the drouth situation materially, but much more is needed to soak the ground and reach the well supplies.

Miss Ada Reindollar, who has been visiting her sister here, returned to her Fairfield, Pa., home, on Wednesday with her nephew, Robert S. Reindollar.

Miss Mildred Annan attended the funeral of her grandfather, Bradley Hering, at Hagerstown, on Saturday. Her sister, Little Miss Amelia Annan returned home with her.

Mr. and Mrs. Mahlon Brown, of near town, and Mr. and Mrs. Vernon L. Crouse, attended the funeral of Mr. William D. Collofflower, in Emmitsburg, on Wednesday afternoon.

Mrs. Jacob D. Null, Mrs. Margaret Nulton and Miss Ada R. Englar, attended the annual Women's Missionary Society meeting, at the Lutheran Church, Thurmont, this week.

Taneytown baseball fans enjoyed the "World's Series" games, this week, at the various radio receivers, with almost as much enjoyment as though actually seeing the games.

Rev. L. B. Hafer, Past Grand Master of Maryland I. O. O. F., has been appointed a member of the committee to plant trees and shrubbery at the new Odd Fellows home, at Frederick.

It is reported that the testing of cattle has ended in Middleburg district before the district was cleaned up; perhaps due to the problem of financing the cost, as outlined on first page of this issue.

Rev. T. D. Ritter attended U. B. Conference, this week, at Shippensburg, Pa. It is generally understood that he will not return to the Taneytown charge. William Copenhaver was the lay delegate.

George Brining and Miss Agnes Murphy, of Boonsboro, were Sunday guests of Mr. and Mrs. Benton Brining and family. Miss Mary Brining accompanied them to Taneytown, having spent some time with friends in Boonsboro.

We have received a copy of the Elsinore, Cal., Leader, a new weekly that presents a very creditable appearance. Our valuable subscriber, John T. Kuhns—an old Taneytown boy—is a resident of Elsinore, and we suspect that he takes more than passing interest in the new paper.

Harry Koons and wife, and David Newcomer, George Ruby, wife, son and daughter, and Leonard Hiltgardner, wife and two daughters, all of Baltimore; Grier Keilholtz, wife and daughter, Keysville, all spent Sunday with Mrs. Alma Newcomer. Mrs. Amos Hilbert and daughter, Ruth, spent Sunday evening, at the same place.

Abbie Dryad, owned by Clarence E. Dern and driven by E. L. Crawford, won the 2:19 pace in three straight heats at Bedford, Pa., last Thursday. Abbie Dryad is entered at Hagerstown and Frederick in the 2:18 pace, and will start on Thursday of each week. Abbie Dryad, Hale Bond, Country Girl and Devil Patch leave for Hagerstown on Saturday of this week.

Robert Eckert and family have moved into half of Wm. Hocken-smith's dwelling, on Middle St.

W. Wallace Reindollar, his mother and sister, Mary, and Miss Mary Hesson, left for a visit to Ohio, this Friday.

Very little construction work was done on the High School building, this week, and part of last week, due to delay in needed material coming along promptly.

Those who spent Sunday with Albert Simpson and family, were: Mr. and Mrs. John Smith, of Hagers-town; Mr. and Mrs. William Simpson and daughter, Mildred, of near town; Mr. and Mrs. Samuel Crouse and daughter, Edna and Mr. and Mrs. Milton Crouse.

Don't forget the Firemen's Bazaar, this Friday night and Saturday. This is the one local object that should always meet with very liberal financial support—and don't expect to get too much for your money. The best plan would be, just to give, and not expect anything, other than the help of the firemen when they are needed. We think the firemen ought to be compensated, personally, for the clothing they ruin, even if no more.

A man has brought suit against the Ford Motor Co., for \$100,000 because he caught a cold at the Company's assembling plant, due to which he later had an operation performed, and lost his power of speech. When looking for damages, it is a good idea to bring suit against somebody who has the money.

A wealthy Englishman has bought a castle on an island, to get away from the noise of automobiles.

A Board of Trade.

One of the hardest jobs, in the average small town, is to form, and harmoniously maintain, a Board of Trade, or business men's association—by whatever name it may be called—notwithstanding the truth that there is no other organization that the small town more urgently needs. The main reason for this is, there is too much jealousy and suspicion and selfishness, manifested between local business men.

There is widespread complaint of credit conditions, and of certain business practices, but the getting together that might cure these troubles is about the last thing that business men will engage in. This is the purely individual side of a Board of Trade, but not at all the most important one. There is a pulling together with a broader purpose, that will indirectly benefit the home town and all of its interests, without counting exactly which of the members are apt to "get the most out of it."

It is "getting something," first of all for the town and community. Business men must get a vision of things, not too directly connected with their own daily increase in business. It is

the realization of the fact that a bigger town, more population, more industries, is bound to bring more business—to somebody. Just who the "somebody" may be, need not be figured out in advance—a melon must first be secured before it can be divided up.

The only effective way to talk "big business" is to have a lot of people acting together, talking about it, and planning for it. No town ever amounts to much until it can work itself into a spirit of co-operation, and "go after" things hard. It takes money, too, to do this—talk, investigation, then action backed by responsibility and capital.

The purely local and detail matters—like the extension of credit, and protection against "bad pay"—are too small, even though important, on which to build the foundation reason for a Board of Trade. There are many matters of this kind that can be handled, after the organization is formed; but, the big idea is to "boost" the town, first and foremost, without carefully counting quick individual profits. Big, far-sighted men, liberal men, those who can put aside the little complaints and jealousies, are the ones who can make a Board of Trade an effective force for any town.
