

A VACATION TRIP TO MEXICO.

From Hermosa Beach, Cal., to Ensenada, Mexico.

The following account of a recent vacation trip by H. Clay Englar, wife and daughter, from their home at Hermosa Beach, will no doubt be read with interest...

We left La Jolla shortly after noon and reached Pacific Beach, about 8 miles from San Diego, early in the afternoon, camping there on the ocean's edge over night.

Next morning we left for San Diego intending to remain there for a few days, but did not stop except for direction to the border.

Tia Juana, (te-a-wan-nah) is just across the border from California. This is the famous or perhaps I might say, the infamous resort known pretty generally throughout the United States by its unsavory reputation.

The lines of business that support the town are American, or other foreign interests, and American money is used exclusively. We could not secure Mexican coins except at the curio shops and at curio prices.

Tia Juana, a crucible into which pours the elite and the scum of America. Out of the pot comes only evil, absolutely nothing good.

On this particular trip we did not stop in Tia Juana, but what I have written is from observation on a previous trip.

The first stopping place below the border is Roserita Beach. Here is a fairly good beach, like those in California, and a saloon and gambling house, with a few shacks for those who wish to remain over night.

From Roserita Beach to Ensenada is about 50 miles, most of which is over a continuous chain of small mountains, up and down over a snake like road which sometimes reminds one of a cork screw standing on end.

ARE THEY READY.

If You Don't Know, then Ask Your Doctor?

The responsibility rests with the parents. Every child should be taken to the family doctor before he is enrolled in school and the following questions should be asked:

- 1-Is my child up to the standard in weight and height for his age? 2-Are his tonsils or adenoids enlarged or infected so as to be dangerous? 3-Are his teeth in good condition? 4-Are his vision and hearing normal? 5-Is his posture correct? Does he stand and sit and walk correctly? 6-Is the food my child eats, proper in kind and in amount?

Berrett Calf Club Show a Success.

The unseasonable rainy weather did not prevent the boys and girls of the Berrett 4-H Club from holding their annual exhibit on Tuesday afternoon.

Not only were the merits of the individual animals judged by Mr. Munkwitz of the Dairy Department, University of Maryland; but the youngsters all competed for the coveted honor of having the best fitted calf and showing it to the best advantage.

The farm, young or dairy were represented—all with splendid individuals. In the order named the following won places in the respective breeds—Jerseys: 1st. James Bushey; 2nd. Frank Bushey; 3rd. Franklin Pickett; Holstein: 1st. Harold Goodwin; 2nd. Calvin Talbot; 3rd. Margaret Beck; Guernsey: 1st. Alva Conway; 2nd. Nellie Conway; 3rd. Naomi Shoemaker; 4th. Robert Conway. Ayrshire: 1st. Willard Miltner; 2nd. Edwin Miltner; 3rd. Gladys Miltner.

This group of youngsters are all members of the Berrett 4-H Club under the leadership of Marion Prough, of Eldersburg. Not only do they actually own their pure-bred heifer which they are raising, but the club holds regular meetings to consider the problems incident to their project.

At Club week at College Park this year, one of the members of this Club, James Bushey, won the coveted honor of election to the All-Star group for his leadership and outstanding service to the boys and girls of Carroll County.

Basehoar Reunion.

The 7th. annual reunion of the Amos Basehoar family was held at Piney Mt. Inn, near Caledonia Park, August 26th. About thirty-five members of the family were present. After a bounteous dinner was served a program was rendered which consisted of scripture reading and prayer, an address of welcome by Rev. I. M. Lau and other impromptu speeches. Also songs and recitations by the kiddies. After a business meeting all joined hands and sang "Blest be the tie that binds." At 5:30 lunch was served, at which all expressed themselves as having spent a most enjoyable day.

Automobile Accidents.

On Saturday afternoon during the rain, three men in an auto, one of them was Senator Frick, of Baltimore met with an accident near Wm. Flickinger's on the Westminster state road. The accident was due to a car in front of the Baltimore car slacking up suddenly, causing the rear car to swerve aside to escape a collision, which threw Senator Frick into the windshield, cutting him severely about the face and head.

On Sunday evening a car coming in the Emmitsburg road, near Sauble's occupied by two doctors and two nurses from a Baltimore Hospital, collided with a car driven by Harry Mort going in the opposite direction. Both cars were considerably injured, the Baltimore car getting the worst of it. One of the doctors and one nurse were severely hurt. Fast speed and glare of headlights were likely responsible.

Dorchester County Tax \$1.70.

Dorchester county beats Carroll 5 cents in its tax rate, having made a levy of \$1.70 for county purposes. The taxable basis of the county is \$18,974,475 which will yield \$322,566.07 in taxes.

The combined circulation of America's 13,400 newspapers is 45,000,000 copies.

CANDIDATES FOR STATE AND COUNTY.

List of those who have Filed to this Date.

Below is the list of candidates who have filed to date, for state and county offices. There are several vacancies that will likely be filled by other means, or be left vacant;

For Governor—Democrats—Albert C. Ritchie and William Milnes Maloy; Republicans—Marion T. Humphreys and Addison E. Mullikin. For Comptroller—Democrats—William S. Gordy; Republican—Charles E. Goodell. For Attorney General—Democrat—Thomas H. Robinson; Republican—William F. Broening. Clerk of Court of Appeals—Democrat—James A. Young; Republicans—Mrs. Eva C. Chase, and A. Kingsley Love. Chief Judge—Democrat—Francis Neal Parke; Republican—unopposed. Associate Judge—Democrat—William H. Forsythe; Republican—unopposed.

United States Senator—Democrat—Millard E. Tydings; Republicans—John Phillip Hill and Ovington E. Weller. For Congress—Democrats—William P. Cole, Jr., and William D. Iverson, Jr.; Republican—none. For State Senator—Democrat—Daniel J. Hesson; Republican—Geo. P. B. Englar. For Clerk—Democrat—Jacob H. Sherman; Republican—Edwin M. Mellor, Jr.

For Register of Wills—Democrats—William H. Bowers, R. Lee Myers; Republican—William F. Bricker. For House of Delegates—Democrats C. Scott Bollinger, Frank A. Dorsey, Geo. R. Mitchell, Harry B. Summers, George W. Rill, Harry A. Cratin; Republicans—Melvin W. Rouston; C. Ray Barnes, Jesse P. Weybright, Charles B. Kephart, Rebecca W. Hobbs.

For Judges of Orphans' Court—Democrats—William H. Buckingham, J. Ezra Stem, William N. Yingling, William H. Lippy, Charles S. Marker, Wilson L. Crouse; Republicans—J. Webster Ebaugh, Lewis E. Green, J. Frank Hoffman, John W. Flickinger, John K. Miller. For Sheriff—Democrats—Ray Yohn Augustus G. Humbert, Harry D. Hesson, W. Oden Barnes; Republicans—E. Edward Martin, George C. Fowble, William H. Bloom, Henry D. Gentzler.

For State's Attorney—Republican—Theodore F. Brown. For County Commissioners—Democrats—George W. Jenkins, Elmer F. Logue, Howard H. Wine, Peter A. Rineman, John W. Weaver, O. Edw. Dodder, Henry Klee, Edward Harner, George E. Benson; Republicans—Jas. M. Hann, William T. Phillips, John H. Repp, Charles H. Spicer, Charles W. Melville. For Treasurer—Democrat—Samuel J. Stone; Republican—Herbert G. Mathias.

Proceedings of the Orphans' Court. Monday, August 23, 1926—Clarence T. Wantz, administrator of David E. Myerly, deceased, returned inventories of personal property, current money and debts due and received order to sell personal property. Charles E. Royer and Robert Gist, acting executors of Ezra M. Bish, deceased, returned inventories of personal property and current money. Paul E. Robertson, administrator of Jeremiah W. Robertson, deceased, returned inventory current money and report of sale of personal property and settled his first and final account. W. Frank Thomas, guardian of William B. Thomas, Francis W. B. Thomas and Elizabeth C. Thomas, settled his second account.

Letters of administration on the estate of Ablynone Stambaugh, deceased, were granted unto Jacob M. Stambaugh, who received order to notify creditors under Chapter 146 Acts of 1912. John C. Krebs, executor of Emma J. Keefer, deceased, returned inventories of personal property, debts due and current money and received order to sell bonds.

Tuesday, August 24, 1926.—The sale of real estate of William K. Lepo, deceased, was finally ratified by the Court. The sale of real estate of William H. Brown, deceased, was finally ratified by the Court. Walter R. Poole, Peyton H. Poole and Reuben E. Poole, executors of H. Peyton Poole, deceased, reported sale of real estate. John H. Elgin, surviving executor of Jacob F. Elgin, deceased, reported sale of real estate. Edith A. Shorter, guardian of William A. Shorter, infant, settled her first account. Westminster Deposit and Trust Company, guardian of Herman F. Logue, settled its first and final account.

American marble firms are complaining because the Government is considering awarding to foreign companies the contract for furnishing crosses for the graves of 30,000 American soldiers buried in France. The bids were \$14.50 each for Italian marble and \$35 for American marble.

The State Camp of Pennsylvania, P. O. S. of A., at its annual session in Philadelphia, passed resolutions strongly opposing Sunday baseball, and the opening of the Exposition on Sunday.

WHEAT SMUT CONTROL.

Treatment of Seed with Copper Carbonate Dust is Method.

Treatment of seed wheat with copper carbonate dust will be advisable in most sections of the State this year for the control of the stinking smut of wheat.

Last smut was found to be more prevalent in the State than for some years previous and numerous farmers took precautions to treat seed wheat before planting it.

Conditions in the State this year were investigated several months ago by F. W. Oldenburg, extension agronomist, and Dr. R. A. Jehle, extension plant pathologist, who examined 635 fields in 17 counties of the State. Fields in Anne Arundel, Prince George's, Howard, St. Mary's, Talbot, Queen Anne's, Caroline, Dorchester, Kent, Cecil, Harford, Baltimore, Worcester, Wicomico, Montgomery, Washington and Frederick Counties were examined. In some fields no more than a trace of the disease was found while in others the infection reached one percent or more. Considerably more than half of the fields examined revealed evidences of the disease.

Dusting the seed wheat with copper carbonate dust is recommended for the control of the smut. Treatment of the seed wheat is neither difficult nor expensive if proper apparatus is provided. The apparatus is important. It should be so constructed that the dust will be mixed with the wheat thoroughly, covering each kernel completely. Furthermore it must be airtight to prevent the dust from being inhaled by the operator. Copper carbonate dust is poisonous and may cause chills and other forms of illness if breathed in to any extent.

A barrel churn, which can be made airtight, or a 30 or 40 gallon barrel converted into a churn-like apparatus with a door in the side and a baffle board inside, will be found suitable. The dust is used at the rate of two and a half ounces per bushel of wheat. With a 30 or 40 gallon apparatus and one bushel of wheat at a time, a little more than a minute is necessary for each treatment.

Additional information on the use of copper carbonate dust can be secured from the county agents or from the University or Maryland Extension Service, College Park, Md.

France Practicing Economy.

French financial troubles have been more or less aired ever since the war especially concerning the payment of the French debt to the United States, about which there has been a vast amount of difference of opinion, and as to which it may not be generally known that this government has never asked of France any return for money loaned during the progress of the war—only loans since the war.

And now, France announces that certain regulations must be enforced in the direction of economy, in order that the country may "save up" and become financially sound again; so, the government has issued a lot of decrees, largely in the direction of food consumption.

For instance, the use of fresh bread is prohibited, which is expected to cut down consumption so that the need for foreign wheat will be reduced 25 percent.

Other measures control wholesale and retail prices, so far as food is concerned, and restricts restaurant service to two dishes at any one meal. Special rules are placed over all markets and the police are ordered to hold down prices.

Possibly in harmony with the economy idea, a general increase has been made in the cost of tobacco of various kinds ranging from 20 to 60 percent, except in the cheapest brands of cigarettes used by working men. The cost of tobacco is always regulated by the government, and is a source of income.

These regulations are not as yet being taken very seriously, but there is an impression afloat that the government means business and is going to do its best to effect real economy.

"Inside" Information for Women.

Winter squash, or cymlins, can be sliced and fried like egg plant. To remove a light scorch stain from a cotton fabric moisten the stain with water and place in the sun.

Left-over hominy grits may be cut into slices and browned in butter or other fat to make a most appetizing dish good to serve at any meal. The slices should be at least a half inch thick, dipped in flour, and fried a delicate brown on both sides. Have the fat hot enough to form a brown crust quickly on the grits before the inside soaks up the fat. Also time the cooking so that the fried grits can be served as soon as they are browned.

The wearing qualities of pile fabrics depend very largely upon whether or not sufficient extra yarn has been used to hold the pile into the body of the fabric. It is always well to examine such fabrics very carefully and note how readily the pile can be pulled away from its foundation.

The prevailing idea that it is necessary to remove food products from cans as soon as they are opened is erroneous. For a reasonable period incident to its utilization it would be safer to allow the food to remain in the can. Transferring to another receptacle only adds to the danger of contamination.

Only one person in four, in Mexico, is able to read or write.

STATE FOREST NURSERY STOCK ON HAND.

Trees Sold at Cost to Residents of the State.

Since the establishment of the State Nursery some years ago tree planting has gone forward at a rapid rate. Each year the applications for trees have exceeded the supply, notwithstanding the fact that the capacity of the nursery has been increased every year.

Two classes of stock are grown—one, small trees suitable for forest planting, the other, larger trees suitable for roadside planting. The trees are sold at cost to residents of the State, under a signed agreement that they shall be used for either forest or roadside planting.

The conditions in Maryland are variable, both as to soil and climate, extending over a range from the seaboard of the southeast to the mountain altitudes of the west of the State. It is the policy of the nursery to provide a variety of trees suitable for the various conditions.

A recent inventory taken at the nursery shows forest planting stock on hand, available for distribution, this fall and next spring, consisting of loblolly, white, red, and Scotch pine, Douglas fir, Norway spruce, arbor vitae, and European larch, to the extent of 250,000. Hardwoods for forest planting include red and chestnut oak, black walnut, black locust, tulip poplar, and sugar maple, of which 150,000 trees will be available for fall and spring planting. In addition to the forest planting stock about 9,000 larger trees, from 6 to 12 feet in height, suitable for roadside planting are now available. These include American elm, white ash, green ash, tulip poplar, pin oak, willow oak, black walnut, black locust, honey locust, sweet gum, and bald cypress.

The nursery is located on the Baltimore-Washington Boulevard at Paint Branch, near College Park, and is an interesting place to visit. There are about 40 different species of trees to be found there and Mr. C. H. Rockwell, the Superintendent, will be glad to show visitors around who are particularly interested in nursery operations.

The nursery at College Park covers 8 acres of ground under intensive management. About one-fourth of the space is devoted to forest planting stock, and three-fourths to roadside planting stock. This nursery is small as compared with several of the nurseries of the larger states, such as New York and Pennsylvania, where they turn trees out by the millions, but it is being developed to meet the needs of a small state with diversified conditions. Plans now contemplate increasing the output of forest planting stock to a million capacity in the next three years.

Cornerstone for Parochial School.

Bishops of two dioceses separated by 8,000 miles took prominent parts in exercises at Littlestown, Sunday afternoon in connection with the laying of a cornerstone for St. Aloysius' parochial school. They were the Rt. Rev. Hugh MacSherry, Bishop of Capetown, South Africa, and the Rt. Rev. Philip R. McDevitt, Bishop of Harrisburg.

On account of the threatening weather the speaking was held in St. Aloysius' Catholic Church, Rev. E. O. Flynn, pastor of the church, was master of ceremonies. Twenty priests from many neighboring parishes were in attendance. The church was filled to overflowing. The new parochial school, which is being erected at a cost of \$40,000 is to be completed by January 1, 1927.

Size up Each Ear.

The best way to select seed corn is from the stalks standing where they grow. As soon as the crop matures and before the first hard frost, go through the field with a picking bag and husk the ears from the stalks that have produced the most good corn without having had any special advantages, such as excess of space, moisture, or fertility. Avoid late-maturing ears which are heavy because of excessive sap and ears from down, smutted or otherwise diseased plants. Select seed from normal, healthy plants that have produced most heavily in competition with a full stand of vigorous plants, and from plants that are neither too early nor late maturing for the conditions where the corn is to be grown.

Carroll County W. C. T. U.

"The thirty-third annual Woman's Christian Temperance Union Convention will convene in the Lutheran Church, Union Bridge, Thursday, September 2, beginning promptly at 10:00 o'clock, A. M. Two sessions, morning and afternoon, will be held. Beside department reports, by the various superintendents, addresses will be made by Mrs. Mary R. Haslup, State W. C. T. U., President, Baltimore, and Rev. Charles M. Elderdice, of the M. P. Church, Westminster. The choir of the church will render special musical numbers. Luncheon will be served by the Ladies Auxiliary. Everybody is cordially invited to attend."

Refrigeration experts say that in the future the same pipes that heat a home in the winter, will cool it in the summer.

MEMORIAL TO BRYAN.

At Least Two Elaborate Structures to be Erected.

Plans are under foot for the erection of a structural monument in Washington to William Jennings Bryan almost as elaborate as the Lincoln Memorial. It will be in the form of a great carillon tower, surmounting what is to be called a "William Jennings Bryan Commons." Plans are being submitted, but no definite design has yet been selected. The project will be financed by friends and admirers.

The proposed memorial is in addition to the plans already under way by fundamentalists in Tennessee and elsewhere to erect a \$10,000,000 "Fundamentalist University" on the hills of Dayton, Tenn., to commemorate the "Great Commoner's" last battle to prevent the teaching of evolutionary science in public schools.

Potatoes in California.

Production of potatoes and onions is a very thriving industry on McDonald Island and other islands in the delta region of northern California. McDonald Island contains about 2,300 acres, and three brothers have revolutionized potato growing in that territory. One of them has perfected and patented a potato digger and washing machine, which are used on all the potatoes marketed from that island. The digger lets the potatoes run into field sacks at the rear of the machine, and thereby avoids troubles usually resulting from tubers lying on the ground in the hot sun until picked up by laborers. The potatoes are promptly taken to washing tanks along the water's edge and are placed in running water for about two minutes, after which they pass to an antiseptic tank, containing a lightsolution of chlorine water. Then they are graded and sacked for market. These washed potatoes make a very attractive appearance, and were bringing a premium of 15c per 100 pounds in San Francisco.

Marriage Licenses.

Lyman Wilson and Adelle Mae Gue, Sykesville. Joseph Buckner and Gladys Crane, Baltimore. Charles R. F. Frizell and Evelyn L. Garver, Westminster. Clarence E. Fogle and Evelyn C. Creager, Woodsboro. John H. Sicking and Elizabeth A. Hoern, Catonsville. Paul Schrum and Elsie Altland, of Pennsylvania. Howard B. Shipley to Mirian L. Sterling, Washington. Morilla E. Eckard and Stella McLaughlin, Emmitsburg. Lester H. Folcemer and Elizabeth Brennen, Spring Grove, Pa. John A. Shade and Emma May Leppo, Hanover, Pa. William N. Dorsey and Martha Newton, Sykesville.

Preparation for Recitation Requires Nearly an Hour.

To determine the time actually required by high-school students for preparation of their lessons outside the recitation period, a questionnaire was sent to students by the commissioner of secondary schools of California. Replies were received from 95,000 students. Of these, 4.2 percent frankly admitted spending no outside time in preparation; 9.6 percent reported spending from 1 to 15 minutes for a single recitation; 31.6 percent, 16 to 30 minutes; 44.5 percent, 31 to 60 minutes; and 10.1 percent claimed to devote an hour to outside study for each recitation. From these replies the inference was deduced that an average of from 45 to 60 minutes would be required for thorough preparation of a high-school recitation.—Bureau of Education.

Seven for Sheriff, in Frederick.

There are seven candidates for Sheriff in Frederick county, as follows: Democrats—Charles W. Smith, Charles S. Houck, Lawrence R. Fagan, Samuel E. Davis, John E. Crum, Harry C. Dorcus; Republicans, Charles W. Crum, William C. Rhoderick, John J. Wimpigler.

Maryland Wheat New Record.

Baltimore, Aug. 26.—Maryland's wheat crop for 1926 has set a record for the average yield per acre, which is the largest East of the Mississippi, according to the report of John S. Dennee, Federal statistician of the Department of Agriculture.

This year's average yield is said to be the largest in the sixty years that crop statistics have been compiled by the Government. While the average yield was 22.6 bushels per acre, many farmers reported yields up to fifty-five bushels. Estimated value of the Maryland crop was fixed at \$16,079,000 by Mr. Dennee. The total crop was estimated at 12,181,000 bushels from a wheat acreage of about 539,000 acres.

Wheat crop conditions have been favorable all year, although there has been some loss due to rain and moisture damage since wheat was cut. Standing shocks were wet by July rains, and in some cases, wheat was ruined before it could be dried.

Over 18,000 cars of watermelons have already been shipped from Georgia, this season. Railroads will not handle melons unless the freight is paid in advance. Prices have been as low, to growers, as 5c for 30 pound melon.

THE CARROLL RECORD

(NON-PARTISAN)
Published every Friday, at Taneytown, Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.
G. A. ARNOLD, Pres. D. J. HESSON, V. P.
G. W. WILT, Sec'y. P. B. ENGLAR,
JOHN S. BOWER. JAS. BUFFINGTON
WM. F. BRICKER.

TERMS—Strictly cash in advance. One year, \$1.50; 6 months, \$1.00; 3 months, 75c; 4 months, 50c; single copies, 3c.

The label on paper contains date to which the subscription has been paid.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 6th, and 7th pages must be in our Office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

FRIDAY, AUGUST 27, 1926.

Entered at Taneytown Postoffice as Second Class Matter.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

Advertising Did It.

Unquestionably, advertising saved the country from a big business slump following the war. Business men simply declined to accept the usual thing, and broke a world's record by going after business, and more business, war or no war. The reaction, following a big war, has simply failed to materialize.

Perhaps there is a paying-up time to come yet—there are many indications that this may be the fact—but, it will not be due to the world war, but to the extravagant financial operations of people who seem to act as though there is no bottom to their purse.

Advertising certainly must bring business; at any rate there has been more advertising and more business within the past ten years than within any other period in the world's history, and it is hardly likely that business men spend money for advertising after they have made money, and want to get rid of a lot of it.

Good business men who know how to advertise, would as soon think of quitting the practice as they would of failing to accept good buying opportunities. Advertising value is not a theory, but a proved sure thing—with the know-how back of it.

"Against" the Government.

It used to be said, years ago, that the reason why the Irish, when they came to this country, invariably became Democrats, was because the Republican party was mostly in power; and as they were "against" their government at home, the same feeling influenced them on coming here.

In fact, many immigrants—other than Irish—came here to secure greater freedom from governmental restrictions, and many of them for a freedom to which they were not entitled. So, many of our immigrants have not been of the best class of citizens, and have done this country more harm than good, for much of our criminality, wrongdoing and discontent, has come to us from over the sea.

Whether it be foreign or not, or just natural inclination, there always is more or less of an "against the government" feeling. No doubt this is perfectly natural, for we have a government and laws especially because we have those among us who will not behave unless compelled to do so; and there is always more or less of a feeling that the government requires us to pay too much tax, or in some way prevents us from going ahead and bettering our condition and having more of our own way.

Then there is the fact that government represents politics, and politics is a business, and business involves self-interest, and conflict between the "ins" and the "outs" comes naturally. Government also means partyism, and issues are created, varying public sentiment is lined-up, and we have our campaigns and elections and more or less strenuous partisanship.

General business also enters into politics and government. Private interests can be advanced by political influence and power. What we call "political pull" and "inside jobs" belongs to the wrong sort of government. So, we may easily have an "against the government" feeling, and strange to say it may be "against," both because the government is right, and because it is wrong. We must be "against" the government, in order to keep up our system of elections, and keep political parties alive.

Dry Victories in Primaries.

The primaries held up to August 15th, tell the familiar story of overwhelming dry victories in all parts of the country. The places of twelve dry Senators and three wet Senators have been at issue in the primaries so far held. Of those renominated or nominated for the first time, ten are dry and practically sure of election; there are four contests in prospect

between dry and wet senatorial candidates, with dry victories practically certain in three States and probable in the fourth, and in only one State is a wet nominee sure of election because there is no dry opposition. The senatorial contests are in Illinois, Pennsylvania, Kentucky and Ohio.

The primaries so far have afforded the seats of 270 Representatives of whom 223 have been dry from record, 43 wet, with 4 unclassified. There have been 215 drys renominated, or drys have been nominated for their places; 41 seats have been retained or gained by the wets, while 14 are uncertain.

It is apparent that the forthcoming Congress will almost certainly be dry in just about the same proportion as the present Congress.

A Ghost that will not Down.

The issue raised by the huge expenditures in the Pennsylvania and Illinois primaries walks as a ghost that will not down through the summer campaigns. There are mutterings in Pennsylvania. In Illinois there is a movement for a protest candidate, since Colonel Frank L. Smith, Republican senatorial nominee refuses to withdraw.

In several states the question of what shall be done in the case of any Senator who has spent large sums in reaching the Senate has been made an issue. Senatorial candidates have been asked to declare whether they would or would not favor the seating of any Senator whose election expenses have been unreasonably large.

As a natural result of these primary scandals, there is formidable movement for the modification or abolition of the system as it now exists. Outspoken enemies of the primary are multiplying. For the first time since its general acceptance, the whole system is under fire.

In a speech before the Young Republican Club of New York Colonel Roosevelt joins the chorus of critics. He assails the Pennsylvania and Illinois primaries as a "burning disgrace," and he sees in them, as does many another American, a peril to the democratic form of government. Both friends and enemies of the primary system will agree with his assertion that—

Great sums of money must not be spent to control an election. It makes but little difference whether they are raised from big corporations or levied as the price of protection on illegal operations. * * * * * When public office is for sale to the highest bidder, democracy will cease to exist in the United States.

How to end these vast and legally proper but morally improper expenditures is the question involved. It is one with which the Federal Government is not able to deal directly. The States must solve it if it is solved.

Colonel Roosevelt wishes to keep the primary as a part of the nominating system, combining it with the convention. He would have delegates chosen by local committees meet in a regular party convention to designate or nominate candidates. Following a designating convention, the candidates so named would be approved or rejected by a primary. Or, if direct nominations were made, then, on the petition of a required number of voters objecting to these nominations, a primary might be held.

These alternative proposals are typical of many put forward for a combination of the old convention system and the present direct-primary plan. The convention is a deliberative body. It develops political leadership and makes the party and its leaders responsible. The primary is, in theory, a direct expression of the voter's will. But it evades and, in fact, breaks down party responsibility and does not develop genuine political leadership.

The Roosevelt suggestion is not new. It follows the plan of Charles Evans Hughes, put forward years ago, in its essentials. It would balance the primary against the convention and use the convention as a check upon the primary.

This would not remove the ever-present temptations to wholesale, lavish and improper spending of money. So long as the State-wide primary is kept that temptation must remain. The Roosevelt and similar plans would be both burdensome and cumbersome.—Phila. Ledger.

Redwood Log "Gold Mine"

Lumber valued at \$3,000 and 30 circular dining-table tops, each worth \$75, were cut from a redwood log found partly buried in the sand by an Oregon man, who declared that the discovery was almost as good as a gold mine. Two days' work with team and scraper were required to unearth the huge log, which was 8 feet in diameter and 50 feet long. According to the rings, it was 527 years old and had lain in the same place for many years before anyone had thought it worth the trouble to remove it.—Popular Mechanics Magazine.

Creation of Mankind

Flattering to Indians

An ancient Sioux legend of the creation is a popular story in the West today. Chauncey Yellowrobe, son of a Rosebud Sioux chieftain and a teacher in the federal Indian school at Rapid City, S. D., always includes this story in his repertoire. "When the Great Spirit had created his wonderful land here of mountains and prairies and streams and trees," he tells his pupils, "he sought to fashion a human being worthy to enjoy its grandeur. He shaped the clay in his hands and baked it in his campfire, but when he drew it forth it was pale and had not baked rapidly enough, and he threw it behind him.

"He molded another form and laid it in the hot ashes, but when he drew it out it was blackened and crisp. So he tossed it to one side. Then he modeled a new figure, even more carefully than before, packed the red coals around it, and when he lifted it from the fire it was red and sound and perfect.

"And he put it into the great wilderness of the West, and it multiplied its kind and was the tenant of the Great Spirit's own garden."—Pathfinder Magazine.

"Message Sticks" Open

Books to Aborigines

One of the mysteries of the aboriginal of Australia is the ease with which he reads "message-sticks" regardless of whether they have been written by one of his own tribesmen or a member of a distant tribe with which he has never come into contact.

The signs and symbols apparently are the same among the aboriginal tribes, according to a writer in the Sydney Bulletin, who asserts that he has "seen an old aboriginal, to whom a stick from another tribe many miles distant had been shown, translate the strange markings with fluency, and when some time afterward the same stick was shown again to another native, the second one's translation agreed with that of the first."

A few white men have learned to decipher the conventional markings and symbols on the "message-sticks."

Brought Back Old Times

Curiosity is certainly what makes the world go round and keeps people prying into things and learning something new all the time.

The other day a little boy busily engaged in passing time by playing around the parking space was seen to put a box and a paper bag underneath one of the windows of one of the shops that face on the space. Several people saw him leave this little bundle and walk away. One after another until three had done it, some men walked up to it and peeped in. They closed it up and walked away. The fourth could stand it no longer. He also walked up and on examining the contents laughed loud and long. The bag and box contained bits of iron and nails and other mysterious treasures dear to the child's heart.

The curiosity of these people had brought back to them memories of their own hoarding days.—Lawrence Telegram.

Turning the Tables

A class of children were wrestling with a lesson in arithmetic, and the scholars found that fractions were too much for them. The trouble started when little Doris declared that she would rather have half a pie than two-thirds of it.

"How often have I tried to drive it into you," said the exasperated teacher, "that two-thirds of anything is more than a half? Now you all know," she went on, "that Doris prefers a small portion of pie to a large piece. Funny child, isn't she?"

Doris, having been held up as a model of stupidity, put up her hand. "Well," asked the teacher, sharply. "Please, miss," said Doris, in a small, clear, piping voice, "I don't like pie."

Too Much Service

"An elderly gentleman was having lunch in our grill," said the hotel manager, "and, as was customary when his water glass showed evidence of use, a passing waiter or bus boy refilled it. After the fifth or sixth refilling the diner let out a roar. 'Stop!' he cried. 'I've been trying to get that water glass to the proper level ever since I came to this table. My doctor ordered me to take a pill in a third of a glass of water. Now I feel like an overloaded water-wagon and I still have the pill to take.'—Boston Transcript.

Not Used to Refined Fires

In her country home a woman has a number of open fireplaces. One chilly day she asked her negro maid to make a fire in the drawing room, and entering a few minutes later she saw Hannah hopelessly contemplating the andirons and tongs. "Have you never made a fire before?" she asked, somewhat sharply.

"Well, ma'am, I ain't never made what 'yo call a refined fire—no, ma'am!" was the puzzled reply.

Long Trail of Trees

A tree trail, 500 miles long, stretches across the bleak Alaskan hills as a tribute to the native's ingenuity. The trail was made by setting willow posts, which took root and grew into trees. Every now and then along the route native characters and English words denote distances from various camps and villages.

CREDIT MOSES WITH SCOOP ON CALENDAR

Nothing New About Change Proposed Today.

Old Moses of Biblical fame, away back some 3,497 years ago stole the thunder of the calendar reform commission of the League of Nations, who instilled by a desire to do something to justify their existence, aspired to remake the table by which days, and weeks, and months are calculated, A. E. Johnson comments, in the Detroit Free Press.

The elaborate scheme worked out by the league's experts, it transpires, was originated by Moses in the year of 1401 B. C., and recent translations of Egyptologists disclose the fact that at the Exodus, Moses had designed the fiftieth day after the Passover as the seventh Sabbath day, which he gave the name of Pentecost.

The discovery was made through investigations which confirm the text of Leviticus 23:15-16, which reads:

"Ye shall count unto you from the morrow after the Sabbath, from the day that ye brought the sheaf of the wave-offering, seven Sabbaths shall there be complete . . . even unto the morrow after the seventh Sabbath shall ye number fifty days, and ye shall offer a new meal offering to Jehovah."

According to Doctor Marvin, chief of the United States weather bureau, and Moses B. Cotsworth, director of the International Fixed Calendar league, the investigations show that Moses inserted the day of Pentecost as the eighth day of the week to absorb the odd day beyond fifty-two weeks which now changes the day names for dates throughout every following month of the year. The calendar reformers propose that the last day in every year be made an international holiday, so that every year will repeat exactly the same day names for dates, as Moses did when he placed the day of Pentecost in his perpetual calendar.

Other results of the investigations prove beyond doubt that the first and true scriptural calendar was derived from the Egyptians and was entirely based upon solar equinoctial observations which Moses learned from the ancient Egyptians.

The Mosaic calendar, like all ancient calendars, was kept a secret by the priesthood for about 1,000 years, until the priests were killed during the capture and sacking of Jerusalem by the Babylonians about 600 B. C. When the temple and archives were destroyed, the Jews, without priestly guidance, were led captive to Babylon, and there they learned the origin of their present calendar, which is not nearly so useful as the Mosaic calendar.

The league committee will recommend that time be turned back centuries and the handicraft of Moses given due, if belated recognition.

Ancient Flappers

A mass of evidence testifying to the fastidiousness of Germanic tribeswomen 3,000 years ago has been unearthed in the graveyard of a village of the Bronze age, in southern Bavaria. The finds have enabled scientists to assemble entire wardrobes of women of the period. The up-to-date girls among them wore a tight-lacing corset of reindeer skin, a woolen skirt reaching to the ground, and a hair net, which evidently covered only the braided knot at the back of the head. The crowning glory of her coiffure seems to have been a double-toothed horn comb studded with copper nuggets.—Pierre Van Paassen, in the Atlanta Constitution.

English Dogs in Demand

In Great Britain about 150,000 persons are engaged in the dog industry, directly or indirectly, and the value of the pets is estimated at nearly \$10,000,000. Every day dogs are shipped to foreign ports; Bagdad, Kashmir, Berlin, Australia and Patagonia being among the most remote. The animals frequently bring huge prices, \$5,000 having recently been paid for a British-bred terrier and nearly double that amount for a Chow. So that the dogs will suffer no ills during the transportation special kennels are provided for taking them to cold regions and to the tropics.

Women Auto Mechanics

Turkish feminism has taken another leap forward with the decision of the automobile mechanics school at Constantinople to open a branch for women. This decision was the result of multitudinous requests of women to become chauffeurs and automobile mechanics. The minister of hygiene and education approved.

Travelers to Turkey within the next year will receive a new shock to their preconception of the veiled moslem lady, when it dawns upon them that their knickered and very much un-veiled taxi driver is none other than she.

Unusual Laboratory

An island midway between the Atlantic and Pacific in the center of the Panama canal is the unusual location of a laboratory of tropical research. The scientists in charge, while living in the heart of a primeval tropical forest, enjoy the comfort of shower baths and ice delivered three times a week by passing steamers, Dr. Frank Chapman, ornithologist of the American Museum of Natural History, New York, has reported to the National Academy of Sciences.—Washington Post.

POULTRY

DIVIDE HEN FLOCK FOR BEST RESULTS

Separate pullets from hens, say poultrymen from the New York State College of Agriculture at Ithaca. Older hens are apt, if allowed, to keep the pullets from their feed and boss them around so that they do not get a fair chance to develop as they should. Separation also lessens the risk from disease spread.

Skim milk is one of the biggest known aids to egg production, and should be used to the limit. Every pullet should always have all the milk, sour or sweet, that she can drink. Cleanliness is a big factor in handling poultry successfully, and the college poultrymen suggest not only washing the milk dish every time before use, but also cleaning the roosts, the floors, and the self-feeders frequently. Some men clean the dropping boards every day, but this is not absolutely necessary.

With plenty of milk, the hens do not need so much water, and a few farmers claim better results when no water at all is given if the hens always have access to milk. The milk gives them not only water, but also much-needed proteins and minerals.

Whole cabbages hung in the scratch pens make fine green feed, but other greenstuffs are also good. It is a serious mistake to throw any large quantity of green roughage on the floor where it is apt to be wasted by getting moldy and dirty.

For the mash which pullets should always have before them, equal parts of bran, middlings, yellow corn meal, ground heavy oats, and beef scraps generally give the best results. If the chickens have all the milk they can drink, the meat scrap allowance can be cut in two. The house itself should be dry and well-ventilated. Every poultryman knows the importance of keeping his stock free from lice and mites. Litter in the scratch pens should not be too deep at first, as the pullets do not know how to scratch deep yet. Yellow cracked corn is as good a scratch feed as any other needs, but one-third of any other wholesome grain can also be added.

Add to these aids and precautions a good culling program, say the state college men, and any poultryman should be able to get both pleasure and profit from handling his flock.

The little things count in egg production, they say. They believe these practices, if followed, will increase noticeably the production of every hen in the state. They are not, of course, in favor of a greater total production of eggs, but less hens and more eggs is the combination that means money in the poultryman's pocket.

Select Best Layers by Use of Good Trap Nest

A good trap nest provides the one accurate method of determining exactly how many eggs a hen has laid in one year. There is no short cut or easy way to figure from part of a year's trap-nest record what the total for the year will be, nor to cull carefully enough to estimate what it has been or will be, say poultry specialists at the Kansas State Agricultural college.

The highest type of brooding for egg production may be secured only by trap-nesting every breeder throughout every day of her first laying year, and every day throughout the brooding season, as long as she is kept. In addition, both male and female birds must be selected which have the ability to transmit high production to their offspring.

The best poultry breeders are searching for the pullet that lays not only during the spring, but is also an early maturer and heavy winter layer, as well as a persistent summer layer. These characteristics, coupled with intensity of production, are found only in the best hens, the poultrymen claim.

Care of Breeding Stock Is of Great Importance

Apparently much of the trouble we have each year with poor incubator results is traceable to the condition which the breeding stock has been in for several months previous. A study of the results which some of our hatcheries are obtaining with eggs from different flocks hatched in the same machine indicate the great importance of this factor.

The hens should have plenty of grain in addition to the regular laying mash. Five per cent of linseed oil meal may be put in the mash to help the late molters in refathering. Green feed is particularly important to breeders. Do not use lights on the breeding stock.—O. C. Krum, Poultry Extension Specialist, Colorado Agricultural College.

Cause of Diseases

Most farm poultry houses lack effective means of removing moisture and impure air. Accumulated moisture in the poultry house and an overcrowded condition are directly responsible for the colds and roup which weaken the vitality of the birds, causing them to easily succumb to other diseases. To remedy this, use the open-front type of house, which has become universally adopted, and allow at least three square feet of floor space per bird.

Treating Potatoes Destroys Diseases

Corrosive Sublimate Kills Germs of Spores.

Treating seed potatoes with corrosive sublimate before planting kills the germs or spores that cause scab, Rhizoctonia, and blackleg diseases. Although the tubers appear free from disease it is safest to treat all seed, says Paul E. Tilford, potato disease specialist at the Ohio experiment station, as even a small amount of disease in the seed with a favorable season for its development is likely to produce a loss of marketable tubers.

Seed potatoes are treated by soaking them in a corrosive sublimate solution for an hour and a half. Corrosive sublimate may be bought at a drug store. A stock solution is made up by dissolving the powder in hot water at the rate of four ounces per gallon. A gallon of the solution is diluted to 30 gallons with water. The strength of the solution depreciates with use so that three-eighths to one-half ounce of the powder or a little less than a pint of the stock solution should be added after each batch of potatoes is treated. Even with this precaution the solution should not be used more than four or five times until it is discarded and a fresh supply made up.

As corrosive sublimate reacts in metals, it must be handled in wooden vessels, such as candy buckets or barrels. A convenient way to handle the potatoes is to place them in bags, which may be lowered into and lifted from the barrel of solution by an overhead rope and pulley. After treatment the potatoes may be left in the bags or spread on a floor to green if greening is done before late planting.

Fertilizer Experiments Conducted in Wisconsin

Some very interesting data are to be found in research bulletin No. 65, "Fertilizer Experiments," issued by the agricultural experiment station, Madison, Wis. For example, it was found that much greater results are to be obtained when the commercial fertilizer is applied one-half inch above the planted corn. Fertilizer mixed with the seed often retards or eliminates germination. For this reason many users of commercial fertilizer have been disappointed in the results secured. They got the fertilizer too close to the seed.

Oats, as a rule, do not need applications of commercial fertilizer. Some fields were benefited, though not many.

In the case of a peat soil, 300 pounds per acre of 0-10-10 fertilizer applied in the row increased the yield of cabbage more than when 1,200 pounds was applied broadcast. Application in the row seems to be more economical than broadcast application for cabbage.

Application of fertilizer below or to the side of the potato seed usually results in a much better stand and yield than application with or directly above the seed.

Potato sprouts are very tender and are easily injured if they come in contact with high concentrations of fertilizers as occurs with applications directly above the seed.

Fall or Spring Plowing for Improved Corn Crop

Whether fall or spring plowing is better for corn depends on soil conditions to a large extent. Soils that are heavy and approximating the gumbo types are better plowed in the fall so the elements will act on them in the winter. On the other hand soils which have but little humus in them and which run together badly before spring will do better when plowed in the spring. One purpose of plowing is to aerate the soil so as to let air in to hasten the decomposition of humus for the liberation of plant food, but when this aeration is given too far ahead of a growing crop the aeration may lose its action before the crops begin to grow.

There are not many soils of this type, however, so as a rule it is better to plow in the fall when the soil contains a fair amount of humus or when it is dark in color; or when a good amount of fresh organic matter, such as clover or manure, is to be plowed under. The action of the organic matter or humus is to keep the soil from running together. Fall plowing also serves to spread a large part of heavy work over a longer period of the year instead of having so much just at planting time.

Farm Hints

It's weather, not wear, that destroys machinery.

Heavy-weight hens will usually bring more on the market than they produce in eggs.

The time to prune fruit trees is here. This work can best be done during open weather.

Just as water cannot rise higher than its source, so no farmer is ever richer than his land.

Two or three days spent in building a dropping board for the poultry house, more convenient roosts, and a poultry self-feeder will soon be repaid in time saved and production in crease.

PRIVATE SALE OF VALUABLE Real Estate

Formerly owned by W. M. Mehring.

The undersigned, widow of the late W. M. Mehring will sell at Private Sale, the following Valuable Real Estate:

A LARGE DAIRY FARM,
2 miles from Keymar on the road leading from Crouse's mill to the Keymar and Taneytown pike and consisting of

191 ACRES
25 acres permanent pasture meadow, 10 acres Alfalfa, good stand, 15 acres timber, 10 acres new ground for pasture, leaving 130 acres for farming purposes.

A LARGE STONE HOUSE,
56-ft. front just rebuilt three years ago, nearly all buildings recently roofed. Nice new dairy with water, all cemented, making this an ideal dairy farm.

This farm was formerly the homestead of Luther T. Sharetts. Plenty water in kitchen and cellar.

Also, a small farm of 5 acres situated 3/4 mile from Keymar, station, all buildings in good shape being recently roofed, plenty fruit of all kinds good water, etc.

Also 300 bushels Kanoda Oats, these oats were bought in Kansas, is a very heavy producer very rich in protein. Price \$1.00 per bushel, for less than 10 bushels, 90c over 10 bu.

BESSIE DERN MEHRING,
8-20-tf Keymar, Md.

PUBLIC SALE

The undersigned will sell at public sale on the premises at Harney, Carroll Co., Md., on

SATURDAY, SEPTEMBER 4, 1926,
at 1:00 o'clock, P. M., this desirable home situated on the Gettysburg road joining land with Benjamin Marshall, Chas. Hoffman and others, containing

18 ACRES OF LAND,
more or less. This land is in a high state of cultivation, improved with a good

7-ROOM FRAME HOUSE,
also good barn and all necessary out-buildings, a never-failing well and cistern at the house, also water at the barn.

TERMS and conditions made known on day of sale.

ANDREW H. WALKER,
8-6-4t

PUBLIC SALE

The undersigned will sell at public sale on the John D. Grushon farm, 1/2 mile east of Motters Station, on the hard road leading to Stoney Branch School-house, on

SATURDAY, SEPTEMBER 4, 1926,
at 1:00 o'clock sharp, the following:

25,000-ft. OF LUMBER
Boards, 2x4's, 4x4's etc.

50 CORDS OAK SLAB WOOD,
40 ACRES TREE TOPS.

Immediately after this sale we will sell part of the above lot of wood at the Edward McLaughlin farm, better known as the Stewart Annan farm 3/4 of a mile from Motters Station along the private road leading from Dry Bridge to the Edward Long farm.

TERMS made known on day of sale
STOUTER & RIFFLE,
C. P. MORT, Auct.
P. F. BURKETT, Clerk. 8-20-2t

RATIFICATION NOTICE.

In the Orphans' Court of Carroll County: **AUGUST TERM, 1926.**

Estate of Amanda M. Shoemaker, deceased. On application, it is ordered, this 9th day of August, 1926, that the sale of Real Estate of Amanda M. Shoemaker, late of Carroll County, deceased, made by William L. Shoemaker, Vertie Hahn, Alice V. Reifsmider and Flora M. Hiltbride, Executors of the last Will and Testament of said deceased, and this day reported to this Court by the said Executors be ratified and confirmed, unless cause be shown to the contrary on or before the 2nd day of September, next; provided a copy of this order be inserted for three successive weeks in some newspaper printed and published in Carroll County, before the 1st day of September, next.

The report states the amount of sale to be \$3480.00.

SPECIAL \$1.00 Stationery Offer.

It is socially proper as well as business-like to use printed stationery. It is also economical and apt to result in having paper and envelopes on hand, when needed. We have filled hundreds of orders received by mail for our \$1.00 offer, and have not had a single complaint.

200 sheets Hammermill Bond paper, 5 1/2 x 8 1/2 unruled, padded on request, with 100 size 6 1/2 envelopes to match. Printed either in dark blue, or black. Not over 4 lines neat type, the same form on both paper and envelopes. Envelopes printed on back or front. Unless otherwise directed, orders for ladies will be printed on back, and for gentlemen, on front.

Instead of name, an Old English initial letter can be used, if desired. Initial stationery should have a box number, or street address.

When desired, ruled paper will be furnished (107 sheets) with 100 size 6 1/2 envelopes. We do not print envelopes alone, or paper alone, at 50c. Cash with order, when sent by mail. Write instructions, and copy for the printing, very plainly. When mailed to 3rd and 4th Zones, add 5c; to 5th Zone, or further, add 10c.

Tornado's Odd Action Revives Indian Legend

Indian superstitions, many of which have gone with the red man, often reappear and their return sometimes is strangely linked with scientific phenomena.

Centuries ago when tornadoes swept through the forests and erased Indian villages a belief grew up among the Indians that certain areas were protected from the dread destroyer.

Indians held to a belief that tornadoes were powerless against territories immediately surrounding the junction of rivers; that the river gods protected these spots.

The legend was revived among old settlers in the vicinity of Fort Wayne, Ind., in 1920 when a tornado swept through Allen county, destroying two small towns and doing millions of dollars' worth of damage. Thirteen persons were killed by the twister and thirty-four injured. The revival of the legend came when the tornado, sweeping on a straight line toward Fort Wayne, suddenly lifted, passing over the city, only to drop to earth again fifteen miles away to destroy a village. Fort Wayne stands at the junction of the St. Joseph's and St. Mary's river, which together flow into the Maumee.

Patrick McDonough, government meteorologist at Fort Wayne, said that any influence that rivers would have upon a tornado would be atmospheric, and discounted the Indian legend that rivers ward off heavy winds.

"There are tornadoes in the spring and early summer every year," he said, "and Indiana has had several which took many lives and razed much property. In every tornado there is a freak or series of freaks. As a matter of fact, the tornado itself is a freak, of which we know little. If there is anything to the legend it is due to atmospheric conditions existing in those localities which the storm missed."

But the old-timers who saw the black funnel bearing down on Fort Wayne, saw it lift and sweep over the city, to dive earthward beyond the city, still believe in the Indian legend.

His Uncertainty

"As I was driving along towards town yesterday," in the crossroads store related Lum Dumm of Slippery Slap, "I heered a hooraw at the Toad Rock school house. I took a look and couldn't detect a thing amiss, and then, just as I was about to drive on, I seed the young lady schoolma'am come crawling out from under the building through a hole in the foundation that didn't look nigh big enough for her; or, anyhow, although I had never laid eyes on her before, I 'lowed it was the school ma'am."

"What was her object, do you reckon, in crawling out from under the school house?" asked the proprietor of the emporium.

"I hain't the least idy in the world. Didn't you hear me say that I just 'lowed it was the school ma'am?"

—Kansas City Star.

Autos Help Feed Sparrows

Throughout the inland empire, according to W. J. White, salesman for a Portland (Ore.) paper house, the sparrows apparently have learned a new source of subsistence, cooked bugs in the interstices of automobile radiators.

"I have been observing the birds for several trips," said Mr. White. "At Walla Walla, where I usually spend several days, keeping my car in a private garage, I found a flock of sparrows waiting for me to open the door each morning. They proceeded at once to feast on the bugs. I noticed that the sparrows were thick at points along the street where automobiles were parked. The arrival of a new car was always greeted by a mob of feathered chatterers."

Religious Ban Lifted

The abolition of a law in force for fifty years has given Turkish women a new right—that of marrying Persians. The former ban against Persians as husbands possibly was due to the fact that the Persians belong to the Shiite branch of the Moslem religion, while the Turks belong to the Sunnite branch. Certain former customs among the Persians, such as the system of trial marriages, were also repugnant to the Turks and probably led to the passage of the prohibitive law. They are still forbidden under the new civil code to marry any but Moslems, however, though Turkish men are free as of old to marry women of other religions.

Auto. Phones in Paris

The French government has appropriated 210,000,000 francs for an automatic telephone system in Paris. The first contract will be for 40,000 lines, and ultimately there are to be 130,000. Eleven new exchange buildings, to supplement the present fourteen, are now under construction. The administration estimates that in 1940 there will be a total of 300,000 or more subscribers in that city alone.—Indianapolis News.

Farm and Other Workers

From the farm census taken in 1923 it has been determined that there are 6,500,000 productive farms in the United States on which 11,000,000 workers produce about \$12,000,000,000 worth of products. This does not include the work of women and children. In the manufacturing field in that time 9,000,000 workers produced about \$25,000,000,000 in products.

CORRESPONDENCE

Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department must be signed by the author; not for publication, but as an evidence that the items contributor are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted. We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. E., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

DETOUR.

Mrs. Howard Thompson, of Florida, is visiting at the home of her parents, Mr. and Mrs. Clinton Kaufman.

Mr. and Mrs. P. D. Koons and daughter, Jennette, of Frederick, spent the week-end at the home of Mr. and Mrs. P. D. Koons, Sr.

Master John Saylor is spending a week with Mr. and Mrs. Robert Myers, at Mt. Airy.

Misses Ada and Edith, and Lewis Yoder, of Long Green, Md., are spending some time at the home of Mr. and Mrs. E. L. Warner.

Miss Amanda Schilt and Chas. Rupp are on their vacation, and are taking a sight-seeing trip to New York State.

Mr. and Mrs. E. L. Warner returned home Tuesday evening, after having a very pleasant trip to Altoona, Pa.

Mrs. E. Lee Erb, Mrs. Frances Rinehart and son, Billie, and Miss Vallie Shorb spent Monday in Baltimore.

Carroll Flohr, of Washington, has returned home, after spending his vacation at the home of Mr. and Mrs. E. D. Diller.

Mr. and Mrs. Edward J. Clabaugh spent Sunday at the home of their daughter and son-in-law, Mr. and Mrs. James E. Coshun.

Luther and Charles Clabaugh, Albert and Mehrlie Wilhide and Charles Stansbury, have returned home, after having a very enjoyable trip to Philadelphia, Reading, and other points of interest in Pennsylvania.

Visitors at the home of Mr. and Mrs. John Lawrence, on Sunday, were: Mr. Krom and Miss Besie Marshall, of Woodsboro.

Vacation Bible School will close Friday. There was very good attendance, considering the rainy weather.

Mr. and Mrs. M. J. Wilhide and children, Dorothy and Mehrlie, are spending a few days in Washington.

Little Edna Mentzer is spending two weeks with her grand-parents, Mr. and Mrs. John Lawrence, while attending Bible School.

Week-end visitors at the home of Mr. and Mrs. M. J. Wilhide were: Rev. and Mrs. I. W. Funk, daughters, Miriam and Mary, sons Richard and John, and Mr. Funk's father, Rev. John Funk, of Elizabethtown, Pa.

EMMITSBURG.

Mrs. Ann Elizabeth Rowe, widow of the late Charles Rowe, died Saturday noon, after having been an invalid for a number of years, at the home of her niece, Miss Grace Rowe, postmistress at the local office. She was aged 90 years, and is survived by one son, Victor Rowe, of this place, and several nieces. The funeral was held on Monday afternoon, at 2 o'clock, with services in the Lutheran Church, officiated by her pastor, Rev. Phillip Bower, assisted by Rev. E. L. Higbee; interment in cemetery adjoining.

Rev. J. O. Hayden, C. M., pastor of St. Joseph's Catholic Church for about twenty-four years, has been transferred to Visention Seminary, Germantown, Pa. Rev. Conroy, C. M., of Germantown, will be his successor. Rev. Hayden will leave on Saturday.

Sister Marguerite, Principal of St. Euphemia's School, has been transferred to St. Joseph's School, Baltimore. Sister Mary Albert, of that school will succeed her.

Twenty-two members of the Men's Bible Class of the Lutheran Church were entertained by the Men's Bible Class of the Lutheran Church, Waynesboro, on Sunday morning. Service was held in the church, after which a delicious luncheon was served them in the Sunday School room. A large number from the Lutheran Bible Class, Shippensburg, were also present.

Rev. E. L. Higbee and sister, Mrs. Lucy Galt, spent several days in Mercersburg, Pa, last week.

Mrs. Elizabeth Bollinger is spending several days in this place.

Messrs Dorsey and Harry Boyle are spending some time in Ohio.

The Misses Lillie and Lottie Hoke are spending several days at Atlantic City.

PLEASANT VALLEY.

Those who spent Sunday at the home of Mr. and Mrs. Paul Myers, were: Mr. and Mrs. Sylvester Clingan and daughter, Margaret, Mr. and Mrs. Vernon Myers and daughter, Betty Jane and Miss Edna Wells.

Miss Myrtle Myers and Clarence Ricketts, visited Miss Ruth Frock, on Sunday afternoon.

Mr. and Mrs. Claude Myers and daughter, Elva, visited Mr. and Mrs. Samuel Kauffman and family, on Sunday afternoon.

Lewis Beard and daughter, Minerva attended Church services at Smallwood, on Sunday.

Harry Blizzard, Mr. and Mrs. Irvin Blizzard and children, Wilbur, Melvin and Mavis, visited at the home of Mr. and Mrs. Gorman Rigler, Baltimore, on Sunday.

Miss Georgia Bixler is spending her vacation with relatives and friends, in Baltimore.

Sunday School Sunday morning, at 9 o'clock, followed by church services, at 10 o'clock, by Rev. A. G. Wolfe. Young People's Meeting in the evening, at 7:30.

NFW WINDSOR.

Miss Hattie Ecker, of Baltimore, who has been visiting with Mrs. T. J. Stouffer, left for Linwood, on Monday last.

John Jones and Carroll Creeger, of Thurmont, were callers at M. D. Reid's, on Sunday last.

Miss Virginia Bullock is visiting relatives in Pennsylvania.

Mrs. Blanchard Martin, of Union Bridge, visited her parents, Charles Banker and wife, on Tuesday.

Dr. Emerson and family, of Orange N. J., are visiting at Walter Banker's.

Rev. Harry Ecker, of Reading, Pa., is spending the week, here with his mother, Mrs. Jennie Ecker.

The B. F. Shriver Co., started to can corn this week.

Mrs. Charles Otto moved her household effects to Baltimore, on Tuesday, where she will make her future home.

Prof. Kinsey and family, who have been visiting in Virginia and Pennsylvania, returned home on Monday.

Joseph Howe, who has been attending school in Chicago, Ill., this summer, returned home this week.

Charles Devilbiss and family, of Baltimore, are spending the week here, with his mother, Mrs. Virginia Gates.

Rev. Tolly Marsh, of Reisterstown, is visiting his son, Dr. James T. Marsh and family, this week.

I. W. Bitner and wife are spending a few days in Philadelphia, Pa.

Cyrus W. Flook, of Frederick Co., gave a splendid talk in the M. E. Church, on Wednesday evening, in the interest of the Law and Order League.

Mrs. Virginia Getty moved from G. C. Devilbiss' house, to the home of her son J. W. Getty, on Thursday.

Miss Evelyn Haines is visiting at Brunswick, Md.

Mr. Winters near town, is critically ill, at this writing.

The Presbyterian S. School, have reservations at Druid Hill Park, for a picnic, this Friday.

UNIONTOWN.

Miss Mabel Rentzel has returned from her visit to York Haven.

Mrs. G. W. Baughman, is visiting her sister, Mrs. Hattie Cantner, of Huntingdon, Pa.

Rev. J. H. Hoch and family, are spending some time in Pennsylvania. He will attend Central Manor Camp Meeting.

Mr. and Mrs. Frank Zepp and daughter, Mrs. Miller, Florida, stopped in town last Friday, to hunt up some familiar places. Mr. Zepp lived here in his earlier life, and of course found many changes.

The week's guests were: Mr. and Mrs. Carroll Weaver and daughter, Mary Louise, Baltimore, at H. H. Weaver's; Mrs. Mary Dunsing and daughter, Miss Lena and George Hiltz of Baltimore, at Charles Waltz's;

Mrs. M. H. Tagg, Littlestown, at George Selby's; Mrs. Roy Roberts and children, St. Louis, with her sister, Mrs. W. L. Rentzel and family; Prof. Norman Eckard, at Miss Laura Eckard's; Mrs. James Butler and son, Charles, Washington, at D. M. Englar's; Mrs. John Blaxten, at Mrs. Fannie Haines'; Mr. Orville Yingling and son, of Battle Creek, Mich, and Mrs. Ione Yingling Smith, son and daughter, of Baltimore, at L. F. Eckard's; Mrs. Norman Myers and son, Billie, of New Windsor, at Frank Haines'; Cortland Hoy, of Philadelphia, at Mrs. C. Hann's.

Rev. and Mrs. J. E. Lowe and Mrs. Mollie Crabbs, spent Tuesday afternoon with Mr. and Mrs. Vernon Schaeffer, Littlestown. Rev. Lowe baptized their son, Vernon LeRoy Schaeffer.

Charles and Horace Simpson, Harvey Erb, Thomas Devilbiss and H. B. Fogle, took an auto trip Tuesday of 360 miles through Southern Pennsylvania, enjoying the scenery very much.

W. G. Segafosse is slowly improving at the Md. General Hospital. Mrs. Segafosse remains with him.

HARNEY.

The constant rainy weather has greatly interfered with the canning industry, farmers being unable to get on the fields to haul sweet corn. We are told that many tomatoes are beginning to crack open and rot on the ground.

Mrs. Jones Ohler, of this place, has sold her property to H. F. Angell.

Howard Kump purchased the Jacob Stambaugh property, on Gettysburg St., at public sale, for \$870.00. This is a cheap property and a nice home. Next comes the Andrew Walker property, Sept. 4. Everyone is anxious to know how much this nice little farm will bring.

Mrs. Walter Shriver, of St. James' Reformed Church, Miss Isabelle Eckenrode, Marian Reck and Elmer Shildt, attended the Union Sunday School convention at Arendtsville, Pa., on Tuesday and Wednesday, and report having a fine time and a most excellent session.

The recent rains have put our roads in a very bad condition. Some say they are nearly as bad as they are in the spring of the year.

H. W. Null, of Baltimore, spent a few days here recently, and is looking well.

The Ruhr sisters, of Baltimore, are visiting their uncle, J. D. Hesson. Mrs. Menchey and Mr. and Mrs. Ruhr also spent several days at Mr. Hesson's.

E. R. Kiser and wife and Joseph Snider recently visited G. W. Haines, at Bristol, Pa. They also visited the Sesqui-Centennial at Philadelphia.

Harry Mort had the misfortune to get into an automobile wreck, on last Sunday evening. The machines ran together on the State Road, near Geo. Sauble's, and both were badly damaged, and two of the Baltimore people were hurt; to what extent we have not learned.

We are informed that the tomato cannery at this place will start on Friday.

(Continued from First Page.)

of the turns are dangerous, being cut out of solid rock and not room for two cars to pass. The grades are fairly good and except for a few sharp turns the entire trip can be made in high gear. You come upon the little city of Ensenada before you realize that there is any town, dropping down from quite an elevation right into the town.

Ensenada, Baja (lower) California, Mexico, is very old having been established in 1543. I am of the opinion that the first adobe house erected there is still standing. A sleeping, restless little city nestling among the hills and skirted by the most beautiful body of water I have ever seen. The people are Spanish and Mexican, peaceful, indolent and happy to live in such a delightful place. The intelligent people of the town are Spanish and they know how to be hospitable. What a contrast between this lovely place and Tia Juana. There are many saloons here but no gambling nor boisterousness nor drunkenness. Everything is orderly and quiet among the native population. The only disturbance is from American tourists, and they are not given free rein either. Ensenada is determined to not become a second Tia Juana. We met a few unmistakably refined Spanish people and would have enjoyed our stay there much more had we understood their language better, and had they understood our's better. As it was we have nothing but praise for the people of Ensenada.

We pitched our tent right at the water's edge, and stayed ten days, happy days. The beach line extends in the form of a crescent a distance of 17 miles. I have seen Atlantic City, Miami and Palm Beach, and all of the beaches on the Pacific Coast, and there is nothing on either coast of America to compare with the beach at Ensenada. You can wade into the ocean for any depth going in by inches and the bottom of the ocean is visible as far as you can wade. On the shore lines two automobiles may drive side by side on hard sand for miles, and indulge in speed to the limit of their car. I have never seen a single breaker come in to shore, the water is smooth as a lake and always of an even temperature.

In the morning about 5 o'clock the sun would come up and this was the signal for us to get up and go in before breakfast, which we did every morning, as well as several other times during the day. The afternoon winds which prevail all along the Pacific Coast were not cold like they are in California and neither did they bring breakers with them. You can take a row boat and go for miles on as smooth water as one could wish for, and catch fish to your heart's content providing you do not get sick. Mrs. E., spoiled a perfectly good fishing trip for us, and we thought it a good joke on her. When the time came to return to the States we were loth to go, but we made a solemn pledge to return again one of these days."

H. C. ENGLAR, Hermosa Beach, Cal.

BRIDGEPORT.

Miss Carrie Naill visited Clarence Weybright and wife, on Sunday, near Fairplay. Elmer Hess and children, Wilbur Hess, wife and family, were guests at the same place.

Mrs. Mary Cornell and son, Harold, of Baltimore, are visitors at the home of H. W. Baker and wife, this week.

Mrs. Harry Baker and daughter, visited friends in Thurmont, on Monday afternoon.

NORTH EAST CARROLL.

Preaching at St. David's (Sherman's), Sunday morning, at 10:00, by Rev. E. M. Sando. Sunday School, at 9:00; Christian Endeavor, at 7:00. There will be a congregational vote for a pipe organ, on August 29, at the afternoon services.

Miss Annie Monath spent the week-end at the home of her brother, Parker Monath and family, at Hampstead. The community was shocked to hear of the death of Levi Starner, who died suddenly, Sunday morning. He was a life-long citizen of this community.

Wesley Crumrine spent Monday with his sister, Amanda Rinehart, of Cherry Hill.

Archer Zentz, Ralph Leppo, Chester Masemore, Wesley Horich, and George Bowman, motored to Philadelphia, Wednesday to visit the Sesqui-Centennial.

Mr. and Mrs. John Thieret visited at the home of their daughter and son-in-law, Paul Wentz, on Sunday.

We surely had lots of rain the last 10 days or more. Everybody is looking for sunshine.

The Lutheran Missionary Society had their outing at the Fraternity Hall, on Wednesday evening; about 100 were present.

It is estimated by the government that not less than \$25,000,000 worth of farm produce is now being sold each year by roadside markets to motorists, and that the business is only in its infancy.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MR. THOMAS R. ANGELL.

Mr. Thomas R. Angell died at his home, along the Taneytown-Keymar road, on Wednesday, August 25, 1926, aged 59 years, 2 months, 25 days. He was the son of the late Samuel and Mary Angell, and is survived by his wife, who before marriage was Miss Mary Weant, and three sisters, Miss Annie Angell, of Baltimore; Mrs. Eli Fogle, of York, and Mrs. Laurence Hahn, Keymar.

He had been in ill health about a year, and after returning from the hospital, where he was under treatment, he suffered several strokes of paralysis.

Funeral services will be held at Keyville Lutheran Church, on Saturday morning, meeting at the house at 10 o'clock, in charge of Rev. W. V. Garrett.

ANCIENT INDIANS INVENTED BUTTON

Turquoise Inlaid Artifact Is Found in Mesa Verda Park.

Washington.—Archeological exploration work carried on by representatives of the Department of the Interior in Mesa Verde National park recently has brought to light some interesting and valuable prehistoric relics. Among these are a large cooking jar with sandstone cover and a fine, large water jar. These jars are decorated black and white ware reinforced by a netting made of yucca fibre. Bone awls and one of the finest bone scrapers ever found in the Southwest were also discovered.

The most spectacular find, however, was a button made of jet about seven-eighths of an inch in diameter, with a turquoise inlay in the center. Two holes were drilled through the back of the button at an angle to make a slot through which a sinew or cord could be passed. It is probable that the prehistoric owner of this ornament wore it as a pendant around the neck rather than as a button. These artifacts have been placed in the park museum.

The ancient Indian homes of the Mesa Verda, abandoned before the days when the early Spanish adventurers explored the Southwest, are a never-ending source of interest to archeologists and ethnologists. Many spectacular cliff dwellings, termed the first apartment houses of America, are found in the canyons that cut the mesa, while mounds on top of the plateau indicate the presence of pueblo or other surface structures. A few of these latter have been excavated.

PAY CHECK FOR CAL

Mrs. K. A. Shea is always a welcome visitor at the White House. An employee of the treasury, she has been trusted for ten years to carry the President his pay check each month.

Fashion Introduces Necklet to New York

New York.—Smart New York women are sporting a brand new sign of their slavery to fashion. It is a solid gold or silver necklet, in its plain metal design much like the iron "wedding ring" worn by brides of certain primitive African tribes. In fact, it has been called the "twentieth century wedding ring," or by rapid alteration, the "alimony ring."

Introduced in Paris by Raquel Meller, French singer, the necklet was brought here by Gertrude Lawrence, English star in one of the Broadway revues. One fashionable shop alone reports that it sold more than 2,000 of the necklets to debutantes, young society women and matrons, during January.

Shell-Shocked Veteran Claimed by 15 Families

Paris.—The job of choosing his family from among 15 families who claim him as husband and father faces Antheleme Mangin.

Mangin suffers from loss of memory as a result of shell-shock suffered during the World war. He is not sure of his own name. But 15 widows, each with several children, have claimed him as their missing husband. Mangin has asked the authorities to help him decide the problem.

Try to Popularize Posy-Studded Vests

London.—Silk manufacturers are trying to popularize evening vests for men, which have tiny pink roses and other flowers in their natural colors on a background of white or cream.

A similar style was started in the time of King Edward's youth, and the then prince of Wales wore the bright vests in an effort to boom the dying silk industry in certain parts of England. But the style was short-lived. It was too Pickwickian for the Victorian age, and West end tailors now say that vests in the pastel shades will never be used by modern men of taste.

Merrily they roll along on Winchester Skates

The happy carefree days of growing children are made even more pleasant with a pair of Winchester Roller Skates—And it's healthy exercise—the kind they need.

No Wonder.

A North Carolina editor put it up this way. He came into the office Monday morning with what he called a "news item." It was really a writeup on his married daughter's second child's birthday party in a distant town. We agreed to print it for him.

Then he asked us if we had some old papers he could use under a carpet. We gave him an armload. He wished to know next if we had some old scraps of carboard that his

daughter could use in her school work and we gave him some. And then he asked for a copy of last week's paper. We gave him that. And then he asked what we would charge him for 500 printed letter-heads. We told him. "That's too high," he said, "I'll use a rubber stamp."

And then we killed him and tenderly deposited the remains in the alley back of Jones' store.—Mountain Grove (Mo.) Journal.

SOMETHING TO THINK ABOUT

By F. A. WALKER

VANISHED YESTERDAYS

IF YOU have lived one score years beyond the day you were first taught at your mother's knee the difference between right and wrong, you have had in that time to do with as you pleased, over seven thousand yesterdays, gone to return no more.

What did you do with them? What formidable columns of yesterdays confront you when you set them off on the debit and credit sides of your life-book, and take account of your past behavior!

There are yesterdays blotted with tears, recalling sorrows and disappointments; there are yesterdays filled with joyful anticipations, courage and earnest endeavor, still suffused with the fine spirit in which they were recorded, but you cannot stop now to catch their old-time thrill!

Not can you feel their exaltation lost somewhere along the road you never again can retrace. You must cast up your account and get your bearings. You must know before night whether you are solvent or bankrupt.

So you add up the days of obstinacy and pride, and those still more wanton days of idleness, which you suspect now are at the bottom of your anxieties.

There are pages and pages of them. As you turn leaf after leaf, you wonder whether others in their experiences have faced so many blots, erasures and unkept promises as are now mocking you in your day of trial. Alas, yes!

The world contains many such men and women, who, like you, would gladly give all they have if they could turn backward and reclaim their vanished yesterdays, and transform them by some magic touch into days of beauty and loveliness.

With all the wrecks of these vanished yesterdays before you, you must be rather a poor sort of human being if you cannot turn the lessons they teach to profitable account.

It is not possible to recall them, but it is possible to patch up your strength and brace up your courage.

Nor can you help some emotion when you read of the lost battles, but you can buckle on a new armor and begin a new fight, which by watching the todays, and turning each one to real account, you can yet win victory and wear a crown of honor!

The Hotel Stenographer

By Roe Fulkerson

"HOT cat," exclaimed the House Detective slapping the newspaper in his hand. "The political pot is boiling."

"Sort of tempest in the tea-pot dome," agreed the Hotel Stenographer. "But I am glad it all came out. Now we know why we pay twenty cents a gallon for ten-cent gasoline, and why the gentle flivver mopes in the garage because an honest owner is unable to take his family out for an airing."

"Engines and their owners both knock about the quality and price of gasoline, Kelly. The oil magnets say they cannot produce it for less than twenty or twenty-five cents a gallon. But nobody ever realized until now there was such an overhead of salaries in the oil business."

"All you needed was a second cousinship to a prominent politician, and you could get on the pay roll of an oil company."

"My cousin married a policeman, and I know how it is. Every time anybody gets pinched for wrong parking on our block they come to me to go see Mary and get her to use her influence with her husband to speak to the captain of the precinct to get 'em let off for a two-buck collateral forfeited. They always invite me to a party or give me a theater ticket when they come to see me about it."

"This oil game seems about the same. If you are kin to somebody who is high up in official circles, you get on the pay roll which is the oil man's equivalent to the theater tickets, and the party invitation I get for seeing my policeman cousin-in-law."

"If long usage makes right, then this is, but it looks to me like a lot of politicians had started something they cannot stop. If they get a lot of the high-salaried people on the pay roll who add so much to the cost of flivver feed, I should worry."

(Copyright by the McNaught Syndicate, Inc.)

Among the NOTABLES

TRAJAN

THE year of Trajan's birth is variously given as 52 and 53. He was the son of a man who had been a common soldier and who had fought his way up to be governor of Asia. Trajan was educated in strict fashion as a soldier and carried on the military successes of the family. Nerva, being emperor of Rome and not a strong power, decided to adopt this favorite son of the army as his own son and successor, hoping to gain more popularity with his people and a stronger hold over his own soldiers.

At Nerva's death, Trajan was near what is now the city of Cologne, in Germany, and he decided to make the strengthening of the northern frontier his life work. He stayed on two years, subduing the German tribes, and when he returned was greeted with real love by the people.

He was simple and democratic, he held no expensive courts, kept no useless courtiers, so there were no plots against him. During his reign, he had trouble with the Dacians in the north, again and again, and carried on wars fought over the ground where many of our own soldiers fought south of Verdun. An unsuccessful campaign in the East broke his heart and his health, and he returned to Italy, and died in the year 117.

Besides military victories, he built roads and bridges that still survive in France and southern Germany, and strengthened the republican spirit of the great Roman empire. Undoubtedly he was one of the greatest emperors.

MYTH ABOUT GIANTS HARD TO OVERCOME

Scientific Refutation Has Been Passed Over.

For the third time within a year dispatches from northeastern Mexico record the finding of ancient bones supposed to belong to a vanished race of giants, men and women who must have stood nine or ten feet tall. A half-century ago similar reports were frequent in the eastern states, although our own discoverers were less modest than the Mexicans. Some of the giants reported from New York and New Jersey were twenty or thirty feet tall instead of a more plausible ten. All over the world these tales of giants exist. Nearly always they can be traced to some find of prehistoric bones. And always, when some competent scientist has made the journey to see these remarkable bones, the bones may have remained, but the giants have vanished into nothingness.

The case of the supposed giants of New York state was simple. The bones found were those of the prehistoric animals who once roamed up and down the Hudson valley. Many of them were the bones of the mastodon, a variety of elephant which was once common in North America but became extinct before the arrival of the white men. Many animal bones are so similar to the bones of the human skeleton that they are likely to deceive any one except an expert, provided, of course, that only a single bone is available for examination, not a complete skeleton.

The explanation of the Mexican stories seems to be a different one. The bones found are undeniably human. Skulls have been found with the other bones, and the human skull is unmistakable. Nevertheless, the able scientists of the Mexican department of anthropology, who examined previous finds of this kind in the region from which the new stories come, have found no evidence at all for believing in a former race of ten-foot humans. The error seems to be in estimating the height of a living person from the bones left after he dies. These bones are laid out on the ground in what are believed to be the proper positions. The spine is joined to the large bones of the hip and the leg bones are placed next to the joints which formerly connected them with these same bones. This is natural procedure, but it is wrong. It will give a measure of height which is far too great.

In life the bones of the hip form a horizontal girdle. The leg bones join this well above its lower surface, and the spine projects down into it from the top. Thus the spine and the leg bones overlap considerably, the hip-girdle holding them in their proper positions. In reconstructing the bodily form of a vanished race from their skeletons this overlap must be taken into account, as is done by the expert anthropologists. The inexpert are less likely to think of this or to be able to compute it accurately. Hence the idea that the bones which are found and then laid out lengthwise, without allowance for the overlap, indicates a race of extreme stature stretchable, by a little optimism, to as much as nine feet or even more. This was the explanation of the Mexican finds last year and is doubtless that of the new ones.

Remains of prehistoric man have now been found on every continent. Some of these remains are supposed to be nearly a million years old. Many of them are quite bestial in aspect, much more so than is true of any living race. Among all these finds of ancient humanity there is no indication that men were ever any larger, on the average, than they are today. Indeed, the average stature of modern man is greater than that of any of his predecessors. The verdict of anthropology is clear. There were no giants in those days, or ever.

Studying Favorite Foods

What is the favorite food for each section of the United States? The Department of Agriculture is going to undertake a survey in July to determine the kinds of food eaten throughout the United States, the quality and the quantities consumed in various sections. There are said to have been no adequate figures on food consumption available, and there is a demand for such information for scientific research and various other groups. It is planned to determine also whether an adequately nutritive diet is within the incomes of large groups of people.

As We Are Done By

A Marion mother saw her six-year-old son chasing a playmate down an alley. She called to him, but he hurled a stone at the playmate before stopping to reply to his mother. He marched rather slowly to the door, where his mother was waiting for an explanation of his conduct.

To the question: "Richard, why did you throw that stone?" he replied: "Well, he threw a stone at me, and doesn't the Bible say 'To do unto those as they do unto you?'"—Indianapolis News.

Hit the Pocket

"Ambassador Houghton's report seems to show that disarmament is a long way off," said President Theodore E. Burton of the American Peace society at a luncheon in Washington. "I'd like to suggest a disarmament idea that I'm sure would work. My idea is that each and every nation agree to support its army and navy exclusively by popular subscription."

"Get Together" Spirit Makes for Friendship

There is something more to the word "neighbor" than appears on the surface. It sounds merely geographical, but that is only one phase. Two men occupying adjoining farms have much in common. They may have individual characteristics which differ, but in the main they agree.

For this reason petty differences are forgotten when they cross the line which separates their property and visit each other. Each learns first hand what sort of person the other is, and imaginary misunderstandings disappear.

Of even greater value is a day together in the open with rod or gun, for there is something about woods and water which draws men together and helps them to understand each other. Such a day will do more to settle disagreements than a score of lawyers.—Sportlife.

Humorous Episode the Result of Tardiness

Absentmindedness, that classic affliction of college professors, is an impartial ailment which does not restrict itself to any class of individuals, as was proven at a recent meeting held in one of the city's hotels.

A young lady, arriving shortly after the meeting was called to order, became embarrassed at her tardiness and, when called upon for her ticket of admission at the door, handed the required pastebord to the ticket-taker and hurried to her seat.

Shortly afterward the chairman of the meeting called for order and explained that he had a short announcement to make. "If Miss Smith will call at the door, on her way out," said the chairman, "we will be glad to return her automobile license in exchange for her ticket of admission."—Philadelphia Inquirer.

Rather a Giveaway

Times were hard and bill collectors came nearly every day to see Ole, the Norwegian. This annoyed him very much. Every time a collector came he threw up his hands, shook his head, and talked in his native tongue. One day a mowing machine collector called and found another collector ahead of him, also trying to get money from Ole.

"I've been talking for nearly an hour, but the poor fellow can't understand a word of English," said the first collector, "so it's useless wasting any more time on him."

"That's too bad," returned the other. "I wanted to tell him that as I was coming up the road one of his cows broke through the fence and is—"

Before he could say another word, Ole jumped three feet from the ground and shouted, "Good heavens! vare she go?" and disappeared down the road in a cloud of dust.—London Tit-Bits.

World's Greatest Novels

Lists of greatest novels are often compiled by literary authorities. They vary somewhat, as is natural where taste is a factor in the selection, but any comprehensive list of the world's greatest novels would include the following: Fielding's "Tom Jones," Richardson's "Clarissa Harlowe," Flaubert's "Madame Bovary," Hugo's "Les Miserables," Hawthorne's "The Scarlet Letter," Dickens's "David Copperfield," Thackeray's "Vanity Fair," Tolstoy's "Anna Karenina," Dostoevski's "Crime and Punishment," Balzac's "Eugenie Grandet," Turgenev's "Fathers and Children," and Romain Rolland's "Jean Christophe."—Kansas City Star.

Egyptian's Sleeping Jar

In some of the remote parts of Egypt, there are to be seen small communities where just outside of each house or hut is a huge earthen jar shaped somewhat like a teacup with large outstanding ribs at regular intervals on the outside. Notwithstanding the temperature, the entire family crawls into this jar at night to sleep. It is thought to be necessary to do this to protect themselves from the lizards, snakes and other pests of this kind which would make sleep impossible under the usual conditions. The ribs on the outside of the jar prevent the night crawlers from finding their way into the interior of the jar.

No Innovations for Him

The vicar of an English parish had decided to use the revised version of the Bible instead of the authorized version in reading the lessons. At the end of the evening service on the first Sunday he had made the innovation, the vicar was waylaid by a member of the congregation. "Didn't care much for them these lessons you read tonight, sir," he exclaimed. "Oh," said the vicar, "I suppose you prefer the authorized version. Now, why do you?" "Well, sir," was the reply. "It's like this; the authorized version was good enough for St. Paul, so it ought to be good enough for us."

Portrait Won Fame

When Moroni, a Sixteenth century painter, did his now celebrated picture, "Portrait of a Tallor," he achieved a work that was destined to bring him distinction if it did not at first place him in the circle of the world's greatest. Strangely enough, many of his other works were credited to other painters. Recently he has been brought into the National gallery in London, the Metropolitan and Boston museums in America, and in some other European galleries, including those at Milan, Florence, Vienna and Berlin.

The Barrier to Accomplishment Extravagance.

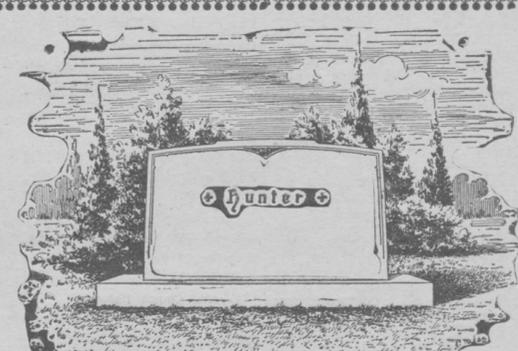

Extravagance has ruined the chances of many capable men. It proved a barrier too difficult to overcome.

If you really desire to accomplish something worthwhile, stop your extravagance and get right down to regular savings. It's the best way.

Your savings account here will make you think of a brighter future with purpose in it, and the means to accomplish that purpose.

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of Day and Evening Schools, Moody Bible Institute of Chicago.)
(© 1926, Western Newspaper Union.)

Lesson for August 29

THE TEN COMMANDMENTS—DUTIES TO MAN

LESSON TEXT—Exodus 20:12-21.
GOLDEN TEXT—Thou shalt love thy neighbor as thyself.
PRIMARY TOPIC—The Commandments About Men.

JUNIOR TOPIC—How to Serve Men.
INTERMEDIATE AND SENIOR TOPIC—Loving and Helping Others.
YOUNG PEOPLE AND ADULT TOPIC—Ideal Human Relationships.

I. The Fifth Commandment (v. 12).

1. How this commandment may be broken.

(1) By showing disrespect to parents. Disrespect is shown to parents—
(a) By speaking of them as "the old man" and "the old woman."
(b) By being ashamed to be seen in their company.

(2) By disobedience.
(3) By not supporting them in their old age.

2. Promises annexed to this commandment.

(1) "That it may be well with thee" (Eph. 6:3).

(2) "That thou mayest live long upon the earth."

II. The Sixth Commandment (v. 13).

This is a bulwark thrown around human life. Man was created in God's image. Every attempt to take human life is a thrust at God. This commandment may be broken:

1. By sinful anger (Matt. 5:22).
2. By hatred (I Jno. 3:15).
3. By immoderate recreation.
4. By employers having unsafe surroundings, thereby causing the death of their employees.

5. By sending children to toll in shops and factories before maturity.
6. By suicide.
7. By infanticide.
8. By wars.

III. The Seventh Commandment (v. 14).

This is a bulwark thrown around the home. This commandment may be broken:

1. By unclean thoughts, affections, purposes and imaginations (Matt. 5:27, 28; 15:19).
2. By unchaste conversation.
3. By wanton looks (Isa. 3:16; II Peter 2:14).
4. By immodest apparel.
5. By actual adultery.
6. By divorce.

IV. The Eighth Commandment (v. 15).

This commandment strikes at the sin of theft. This commandment may be broken:

1. By taking that which actually belongs to another.
2. By false weights and measures.
3. By extortion.
4. By employers defrauding employees and the employee failing to do honest work or put in full time.
5. By borrowing and not returning.
6. By going into debt, knowing that payment is impossible.
7. By usury.
8. By graft.
9. By lying advertisements.
10. By making assignments to escape payment of debts.
11. By strong nations oppressing the weaker ones.

V. The Ninth Commandment (v. 16).

The sin aimed at by this command is a most deadly one—that of lying. This commandment may be broken:

1. By actual open lying.
2. By perjury—swearing to falsehoods by the name of God.
3. By slander.
4. By tale-bearing (Lev. 19:16). This is commonly done by repeating a report without investigating its truthfulness.
5. By creating a false impression (Ex. 23:1).
6. By a breach of promise.
7. By withholding the truth.
8. By exaggeration.
9. By flattery.

VI. The Tenth Commandment (v. 17).

This commandment strikes at the desire for that which is unlawful for one to have. The sin does not lie in the desire to possess things, but in the desire to possess that which belongs to another. It is not wrong to have lands and personal property which one may have acquired honestly, but it is wrong to have the lands which belong to another. It is right for a man to have a wife, but it is sinful to have another's wife. This commandment goes back of all the rest. It deals not only with the open violation, but with the inner desires and motives. It strikes at the very purposes of the heart.

Nowhere Else to Go

I have been driven many times to my knees by the overwhelming conviction that I had nowhere else to go. My own wisdom and that of all about me seemed insufficient for that day.—Abraham Lincoln.

Cure for Depression

The best cure for depression is to look around and see what is happening to other people. You are not hearing all the misfortunes of the world.

THE CHRISTIAN ENDEAVOR TOPIC

From Moody Bible Institute Monthly Chicago, Ill.

August 29 How Can We Make Business Thoroughly Christian? I Timothy 6:17-19

Business can be made thoroughly Christian only by making the men who do the business thoroughly Christian. This is no easy task. Before men can enter the kingdom of God that kingdom must first enter into them. As another has well said, Jesus presented the kingdom as something which man had to enter, not as something which He expected them to establish. This necessitated so radical a change as to be the new beginning of life, for except one be born from above he could not even see the kingdom of heaven.

In order to make business thoroughly Christian the business men who are Christians must be led to the source of power. Men know with aggravating clearness what is right, nevertheless they often fail to do right through lack of sufficient motive power. Knowledge is power, yet not always an impelling force. Authority may be found in rules and regulations, nevertheless, motive power may be absent. A Christian man must discover the hidden resources of grace and power that are in Christ and avail himself of them if he is to make good as a Christian. Outstanding Christian business men like the late John Wanamaker, were and are men of the Spirit as well as practical men of affairs. This involves Bible study, prayer, yieldedness to God and the exercise of gifts in doing the work of God in the world. From this type of men we may expect business that is thoroughly Christian.

Central Control for All Factory Windows

Anyone who has got up in the middle of the night to open and close windows would balk on being required to open a mile of windows; but if he were a night watchman in a certain Eastern factory, all he would have to do would be to press a button, and electric motors would open or close all the windows without any further attention on his part.

This factory has a building four stories high and more than 500 feet long, equipped with steel sash windows which open at the top, and an electric motor to turn the shafts upon which the windows are swung. It is so arranged that the windows on any side of any floor can be opened by separate controls, or the windows of the entire factory can be simultaneously closed. This system permits of a very considerable saving of individual labor and at the same time assures a maintenance of adequate ventilation and protection against the weather.—American Mutual Magazine.

New England Rag Dolls

Old rag dolls were treasured heirlooms of many New England homes. Of all sizes, and attired in many sorts of quaint costumes, they had some points in common. Their faces were invariably flat, their hands were stiff and rigid, their toes turned out in a most alarming manner. Sometimes they had black button eyes; frequently their prim faces were painted with beet and fruit juices; occasionally eyes, nose and mouth were embroidered. For hair they wore toupees of yarn or hemp or wisps of real hair. Their garments were full-skirted gowns of sprigged muslins or prints and they often wore sunbonnets of the same materials as their dresses. In one New Hampshire family still lives an old rag doll who for over 80 years has pleased its daughters. True, she has become somewhat the worse for wear, but her bleached features have been renewed by the simple expedient of recovering her face with a piece of fresh cloth.—Antiquarian Magazine.

Troth

Man's idea of pledging himself to marriage, according to some sources, comes down to us from the Roman ages. "Treaty," which was what the Romans called the pledging of oneself, is still ours in the shape of the English word "troth."

In the Roman era great ceremony was attached to the act, but these traditional rites have been simplified gradually until today about the only thing remaining is the giving of the ring, this having persisted through the centuries. As originally practiced, the ritual included troth rings for both maid and man and this double ring custom is still preserved by some European peoples.

Famous Old English "Beau"

The sobriquet "Beau Nash" was bestowed upon Richard Nash, a fashionable personage of the eighteenth century. He was born in Wales in 1674, and studied law, but later became a gambler, for which he seemed to have a greater liking and aptitude and from which he derived an ample revenue. In 1704 he transformed Bath from a vulgar and neglected watering place into a gay and fashionable resort. The city of Bath, in gratitude for his services, placed his statue between those of Newton and Pope. He lived to be eighty-seven, but his last years were spent in poverty, owing to the act of parliament that suppressed gambling.—Kansas City Star.

INSECTS GUARD VAST TREASURES IN MINES

Efforts to Reach Riches Are Unavailing.

An old Mexican gold mine, all trace of which had been lost for more than a hundred years, has been rediscovered in a curious manner.

It was one of the many prolific sources of treasure worked by the Spanish adventurers in the days of Cortes, and had been given the name of the Cockroach mine on account of the large numbers of these insects that infested its immediate neighborhood. It was afterwards sealed up and its site forgotten.

Recently, after the lapse of more than a century, a prospector in the district, noticing a rock swarming with cockroaches, remembered the story, followed the trail of the insects, and found the mine, which is again being worked.

Strangely enough, there is in Mexico another ancient mine known to only a few Indians and to one or two white prospectors, who have been lucky enough to return unscathed from the region.

This mine is situated in the mountains near Durango, and still bears traces of the operations conducted by the long-dead race whose civilization was hardly less advanced than our own.

The Spaniards in their turn made attempts to raise the precious ore, specimens of which have proved the mine to be the richest of its kind in the world, but the chief obstacle in the way of further development is a vast horde of death-dealing scorpions which swarm in the workings.

So large and venomous are these specimens that many lives have been lost by the numerous exploring parties who have tried to reopen the mine, and although organized measures have been taken to deal with the pests, there has been no apparent diminution in their number. Thus a vast treasure will probably lie untouched for all time.

In South America, near the source of the Quibo river, deep in the fastnesses of the Andes mountains, there is another ancient mine, similarly guarded by the terrible tarantula spider, which has denied mankind approach to the mine for generations.

The tarantula is a fierce and horrible insect, whose bite means death to a human being, since there is no known antidote for its poison. According to native legends the ancient Peruvians, and latterly the Spaniards, when working this mine, employed special battalions to wage warfare against the spider, with orders to keep the immediate surroundings of the workings clear of the pests, regardless of the number of lives lost in the undertaking.

Got Even With Squire

The story is told on a Western pioneer justice of the peace who fined a man \$50 for some offense, and then as the culprit had no money sentenced him to jail till the fine and costs were paid, says Capper's Weekly. There was no jail, so the justice chained the fellow in his cellar at night and put him to work on the justice's farm where he worked for 100 days for the justice in payment for fine and costs. When his time was out the prisoner ran away with the squire's daughter, married her and came back and made his home with the justice. . . . He got even with the squire, all right.

"Witches' Dozen"

Many tourists in London have wondered just how Covent garden got its name and why. In the Middle Ages "covent" or "convent" was used to describe a religious assembly. Hence "Covent Garden," from the garden of a convent that once stood on the site of the famous fruit and flower market. By degrees "covent" came to be used to describe any gathering of 12 people with a leader. In the case of the witches, it came to stand for a company of 12, with their chief impersonating or representing the devil.

Awful, Anyway

Mother had read an item in the newspaper, "Beware, the Measles Are in Town," to her two children. Bobby, age three, evidently took the article seriously, for when his daddy came home, he rushed up to him and said: "Oh, daddy, you must be careful; there is something awful in town."

The father asked, "Well, what is it, son?"

"Oh, I don't know whether it is weasels or skunks, but it sure is awful."

Baffling Raffle

Rastus and his wife, driving to town in their decrepit flivver, had parked it casually in the first available space. While they were away a traffic officer attached a numbered tag to the vehicle for parking in a prohibited zone. On their return, Rastus noticed the tag and was for throwing it into the street, but Rebecca restrained him. "Sabe de ticket, honey," she said. "Dat number might win sumthin'."—Life.

Making Good Use of Time

S. E. J. Cox, who was convicted with Dr. Frederick Cook, "discoverer" of the North pole, now is editor of the New Era, the federal prison paper at Leavenworth, Kan. Cook is an attendant in the prison hospital. He is said to have welcomed the opportunity to "brush up" on his profession. He served as surgeon for several arctic expeditions.

SINCE I HAVE YOU

By DOUGLAS MALLOCH

SINCE I have you I find a deeper azure
In bending skies, I had not seen before,
And every hour I find a deeper pleasure

In every woodland and on every shore,
What once were ferns are now the fairest laces,
And fields have roses, and the roses dew—

Ah, there is sweetness in the quiet places
I never knew.

Since I have you I find a sudden kindness
In other hearts, and kindness in my own.

Yes, now I know the depth of human blindness,
And know that I myself had never known.

I draw long breaths, for life is now like wine is,
All women beautiful, all brothers true.

If life is ever like to heaven, mine is,
Since I have you.

I never knew—but should the skies be thunder,
The woodland dark, the shore a stormy sea,

Still would my heart be filled with radiant wonder
At this new world that you reveal to me.

For, should the world, the world of men, desert me,
The skies be leaden now so fairly blue,

No storm could frighten me, no hurt could hurt me,
Since I have you.

SAWS

By Viola Brothers Shore

FOR THE GOOSE—

IT USED to be easier to get a proposal out of a man in the old days. By the time he sat on one of them horsehair sofas long enough, the poor guy had to have some outlet for his feelin's.

Women like the raw recruits to fall in love with them. But they fall in love with the trained campaigners.

There's one woman that always thinks the bride is doin' well and that's the groom's mother.

When a feller serenades you, it might on'y mean that his father just give him a new ukulele.

FOR THE GANDER—

Women don't always love the men that can do things for 'em. But they hate to give 'em up.

These days a handful of wise cracks seem to get you farther than a bushel of real learnin'.

A cheap way to get rid of a guy that wants to borrow a hundred dollars off you is to give him a present of ten.

A cat has nine lives. But even a cat's got more sense than to try and lead two of them at once.

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says she's for a tax on gasoline as the consumer has to pay enough already and those great rich oil companies ought to be made to help lighten his burden.

FARM FACTS

Corn, kafir, sudan, and cane seed should be tested for germination.

The old saying that a bushel of corn before a cow freshens is worth two bushels after freshening is true.

Milk is about 90 per cent water. The body weight of a cow is over 80 per cent water. To give a maximum of milk, cows must drink plenty of water.

The Kansas State Agricultural college poultry department recommends an egg-laying mash composed of equal parts finely ground corn chop, middlings, wheat bran, finely ground oats or barley and high-grade tankage, or meat scraps.

Look over the breeding flock and make sure you have a sufficient number of good male birds to insure high fertility and hatchability the coming season. Five or six well-matured, vigorous males should be sufficient for every 100 hens in the flock.

Important Factors in Care of Bees

Much Depends on Activity of Bees and Weather.

(Prepared by the United States Department of Agriculture.)

The annual crop of a colony of honeybees is dependent upon a considerable number of factors, part dealing with the activities of the bees and part resulting from the various external factors influencing the secretion of nectar by the honey plants of the locality. Weather suitable for the secretion of nectar and the storing of it by the bees is one of these important factors. Although the weather is beyond the control of the beekeeper, a knowledge of the influence of weather factors upon honey crops in various parts of the country will be of great value in developing the best beekeeping region of the United States.

To gain this knowledge it is first of all necessary to keep certain colonies under observation, recording at frequent and regular intervals the weight of each, and recording such accompanying phenomena of the weather as may reasonably be supposed to influence either the secretion of nectar or the activities of the bees. The results of making a careful record of this kind with two colonies of bees at the bee culture laboratory of the bureau of entomology, and the mathematical analysis of the records kept, are included in United States Department of Agriculture Bulletin No. 1339, "The Effect of Weather Upon the Change in Weight of a Colony of Bees During the Honey Flow," by James I. Hambleton, apiculturist in charge of the bee culture investigations of the department. The bulletin is of technical interest to beekeepers and others working on beekeeping subjects, and is available upon application to the department while the supply lasts.

Missouri Demonstration on Reducing Chick Loss

Thirty-two farms were used by the poultry department of the Missouri university last year in a demonstration of methods of reducing the annual losses in raising chicks. It is reported that these farms raised 88.7 per cent of all the chicks hatched. This was an unusually good showing as compared to a much heavier loss by farms which were not in the demonstration.

Five essentials were adhered to in the demonstrations, namely: hatch early, brood each hatch separately for four weeks, range on fresh ground, feed balanced rations constantly and separate pullets and cockerels.

Undoubtedly the third essential, that of ranging on fresh ground, had a great deal to do with the success of the demonstration. It has been adequately demonstrated in recent years that successful brooding cannot be carried on in old poultry lots. Farmers could greatly increase their poultry returns this year by remembering the above essentials. Fresh ground is sometimes hard to supply and, as a result, the most important essential is often overlooked.

Get Rid of Roundworms for Success With Pigs

Success in raising pigs will depend to a great extent upon proper housing and freedom from parasites, especially roundworms, says W. C. Skelley, assistant animal husbandman at the New Jersey State College of Agriculture.

The roundworms can be controlled by the following treatment. Withhold all feed for about 18 to 24 hours and for 50 pounds of live weight give a capsule containing 2 grains santonin, 2 grains calomel, and 5 grains sodium bicarbonate. In about 12 hours after giving this capsule feed a light soup containing a tablespoonful of epsom salts, well dissolved, for each 50 pounds of live weight. Repeat this treatment in about 14 days.

The housing need not be expensive, but should be kept clean and warm. Small portable colony houses that are tight and dry and provided with plenty of clean, dry bedding make very satisfactory quarters. Under these conditions, with plenty of good feed, fall pigs will make good gains and be ready to go on the market in the early spring.

No Old Maids in Tibet

Tibetan nuns excepted, no Tibetan women go through life unmarried. Tibetan women see to that. According to their ideas the average European is not good looking. Europeans, they say, have too large noses, "like kettle spouts," and ears too big, like pigs' ears; eyes blue like children's marbles; eye sockets too deep and eyebrows too prominent. On the other hand, an average American seeing a Tibetan woman for the first time, would be likely to say, "There ain't no such thing."—Capper's Weekly.

Uncomplimentary

Little Dolly knew all about the hand organ and its accompanying monkey, for she had been amused by them frequently in the street.

When she heard a church organ for the first time she watched the organist long and earnestly. Finally she caught sight of the blower, who was pumping up and down in the background.

"Mother!" she exclaimed, "that's the biggest monkey I ever did see!"

Literal Truth

The familiar sign, "Shoes Repaired While You Wait," lured Norman Kerry into a little Hollywood shop.

"I can't do them till Wednesday," said the cobbler as Norman laid down his package.

"But the sign says, 'repaired while you wait,'" protested Kerry.

"Sure," was the cheerful reply. "And you'll have to wait till Wednesday."—Los Angeles Times.

Death Hastened by Cup of Cold Water

When General Kieber was assassinated at Cairo by an Egyptian fanatic in 1800 the French authorities condemned the murderer to be impaled alive. The sentence was duly carried out, and the punishment was borne by the criminal with true oriental stoicism. The French account of the execution states that soon after his impalement the wretched man asked for a drink. A French soldier was about to hand him some water, but was prevented by the chief of the Mamelukes, who cried—"Gardez-vous en bien vous feriez mourir a l'instant ce criminel." It is a widespread idea that a cup of cold water drunk while undergoing extreme torture, such as impalement, causes instant death. Moore in his "Velled Prophet of Khorassan" speaks of

Such treacherous life as the cool draught supplies
To him upon the stake, who drinks and dies.

The Egyptian lingered in torture for four hours, till the Mamelukes left, and the French soldier was able to accede to his request unchecked. He gave him a cup of water, and the poor creature expired immediately.

Moved by Conscience to Make Restitution

The American treasury derives a certain amount of pin-money from restitutions made by persons who are troubled by the prickings of conscience. In one year the amount received from this source exceeded \$5,000. Among the contributors to this fund are taxpayers who have minimized their incomes, importers who have evaded customs duties, letter-writers who have used stamps that have done service before but had not been defaced, government clerks who have exaggerated their expense accounts, and old soldiers who wish to make amends for a saddle blanket stolen long ago.

One of the most curious recent examples of penitence was that of a Washington woman who was "in desperate need" of a story which could be procured only from a newspaper in the files of the Library of Congress. It was several columns long, and she felt unequal to the labor of copying it, so she took the paper away with her. Thereafter her conscience gave her no rest until she sent four cents in payment of her debt.—Manchester (England) Guardian.

Wood for Newsprint

Since the customary units of wood measurement—cord, log measure or lumber scale—do not represent an exact quantity, the cubic foot solid wood is used. Even this unit is variable as to pulp yield according to the character of the wood as to species and rate of growth. However, taking the dry weight of spruce as 24 pounds per cubic foot the commercial yield of 100 cubic feet would be about 2,300 pounds of mechanical pulp and of sulphite pulp, 1,030 pounds. Commercially, newsprint is made from a mixture of 75 per cent mechanical and 25 per cent sulphite. Consequently, a ton of newsprint would contain 1,500 pounds mechanical and 500 pounds sulphite. Then 1,500 pounds mechanical would require 68.2 cubic feet wood; 500 pounds sulphite would require 48.5 cubic feet wood; one ton newsprint would require 113.7 cubic feet or 2,728.3 pounds oven-dry spruce wood.

Two Centuries of Crusades

The objects of the religious wars called the Crusades were originally to insure the safety of pilgrims visiting the holy sepulchre and to set up Christian rule in Palestine. Later on the attack was directed against Egypt and even Constantinople, and in the Fourteenth century the conquests of the Ottoman Turks turned Crusading into a defensive movement. It is usual to speak of the Crusades as six or seven in number, but actually the movement was continuous for over two centuries, hardly a decade passing without one or more expeditions.

No Old Maids in Tibet

Tibetan nuns excepted, no Tibetan women go through life unmarried. Tibetan women see to that. According to their ideas the average European is not good looking. Europeans, they say, have too large noses, "like kettle spouts," and ears too big, like pigs' ears; eyes blue like children's marbles; eye sockets too deep and eyebrows too prominent. On the other hand, an average American seeing a Tibetan woman for the first time, would be likely to say, "There ain't no such thing."—Capper's Weekly.

Uncomplimentary

Little Dolly knew all about the hand organ and its accompanying monkey, for she had been amused by them frequently in the street.

When she heard a church organ for the first time she watched the organist long and earnestly. Finally she caught sight of the blower, who was pumping up and down in the background.

"Mother!" she exclaimed, "that's the biggest monkey I ever did see!"

Literal Truth

The familiar sign, "Shoes Repaired While You Wait," lured Norman Kerry into a little Hollywood shop.

"I can't do them till Wednesday," said the cobbler as Norman laid down his package.

"But the sign says, 'repaired while you wait,'" protested Kerry.

"Sure," was the cheerful reply. "And you'll have to wait till Wednesday."—Los Angeles Times.

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Miss Mary Ellen Eyster, of Emmitsburg, was the guest of Virginia Ott.

Miss Corrine Little, of Hanover, spent the week-end with Miss May Sanders.

John H. Shoemaker, Jr., of Yonkers N. Y., has been visiting his aunt, Mrs. Maurice Hawk.

Miss Clara Reindollar, of Baltimore is spending her vacation with Mr. and Mrs. M. A. Koons.

An exchange of properties took place, this week, between L. J. Hemler and I. Lewis Reifsnider.

Miss Bessie Kiser, of York, is spending her vacation with her parents, Mr. and Mrs. William T. Kiser.

Mrs. George A. Shoemaker, is spending a few days with her aunt, Mrs. J. Ross Galt, at New Windsor.

The Hamilton Baseball Team, of Baltimore County, will play here on Wednesday, September 1, at 3:00 o'clock.

Mrs. Clotworthy Birnie and son, Clotworthy, Jr., are spending a few weeks with Mrs. Elizabeth Birnie and family.

Wm. Galle, who for several months has been making his home at Walter T. Hape's, in Frederick, has returned to Roy B. Garner's.

Ernest Hysler received a badly dislocated wrist and several fingers torn, while attempting to crank his auto, on Sunday evening.

Mr. and Mrs. Robert R. Fair, and two children, of Baltimore, spent last Friday evening, with Mr. and Mrs. M. Ross Fair and family.

Mrs. Guy P. Bready's mother, Mrs. Elizabeth Schuler, died at her home in Lancaster, Pa., on Thursday morning, from paralysis, aged 80 years.

Mrs. C. E. King and daughter, Charlotte, of Merchantsville, N. J., are visiting Mrs. King's parents, Mr. and Mrs. Wm. Stouffer, East End.

The Bankard cannery opened on Tuesday, for tomatoes, and the A. W. Feeser cannery, on Wednesday, for corn. The season is late for both.

Mr. and Mrs. George Baker, of Conneville, Pa., and Dr. and Mrs. Francis T. Elliot, attended the Philadelphia Sesqui, on Thursday and Friday.

Edgar Thompson and son, of Niles, Ohio, spent Saturday evening with Mr. and Mrs. R. S. McKinney, and Sunday with his mother-in-law, Mrs. Laura Reindollar.

U. Grant Yingling was operated on, last Saturday, at West Side Sanatorium, York, for gall stones and gravel. He is getting along as well as can be expected.

Mr. and Mrs. M. Ross Fair, daughter, Anna May, and son, Franklin, spent Saturday evening and Sunday, in Annapolis, Md., with Mr. and Mrs. Robert Sherald and family.

J. E. Davidson, who had recovered sufficiently from his recent illness to be able to sit on the porch, suffered another stroke of paralysis, on Saturday, and is in a serious condition.

Mr. and Mrs. Conrad Hohing and daughters, Betty and Jane, of Frostburg, Md., and Norman Smyth, of Bluefield, W. Va., have returned home after visiting with Mr. and Mrs. Stewart King, near town.

Mr. and Mrs. John Griesmer and Miss Roberta Griesmer, of Hamilton, Ohio, Mr. and Mrs. Charles Hess and sons, Franklyn and Charles, Jr., of Baltimore, were guests, this week, at the home of Rev. and Mrs. T. W. Null.

Noah Witmer, wife and sister, Miss Elizabeth Witmer, of near Landisville, Pa.; Miss Anna Witmer and brother Jacob Witmer, of Elizabethtown, Pa., spent the week-end with their aunt, Mrs. Jesse Myers and family.

Mrs. Agnes Hammond, of Baltimore, is spending some time with her sister, Mrs. Minerva Harman. Mr. and Mrs. Charles Albaugh and sons, of Walkersville, spent Sunday with Mrs. Albaugh's mother, at the same place.

Miss Mary Hesson and Mrs. Margaret E. Nulton, who are on a New England and Canada trip, report that the steamer trip to Boston was unusually rough, and that they lost four meals in succession before they learned how to be good sailors. From 340 on board one day, only 6 appeared for breakfast and 12 for dinner.

Mrs. John Hockensmith, who has been quite ill for several weeks, is improving slowly.

Miss Isabelle Marker, of Frizellburg, spent several days this week, with Mrs. Charles Welk.

Mrs. Samuel Boyd and Mrs. Harry Deberry, spent Monday with their aunt, Mrs. Alice Harman.

Mrs. Charlotte Leister, of near Westminster, spent Thursday with Mrs. Jesse Myers and family.

Rev. and Mrs. W. V. Garrett and son, Bobby, returned home this week after spending their vacation.

Mrs. John Garner, of Baltimore, and Mrs. Ralph Sell, of near town, spent Tuesday with Mrs. Sarah Fogle.

Miss Mildred Stambaugh, of near Harney, spent the past week with her uncle, Jacob Stambaugh and family.

The Home-makers' Club will meet at the Firemen's Building, Thursday, Sept. 2, to make plans for the exhibit at the Fair.

Mr. and Mrs. D. W. Garner and Miss Nellie Selby, attended the funeral of Paul Garner, at Meadow Branch Church, on Saturday.

Mr. and Mrs. Joseph Harner, Mr. Emanuel Harner, and the Misses Maggie Jane Yingling, attended the 16th Anniversary of the Hoffman Orphanage, Thursday, Aug. 26th.

Miss Mary Elizabeth Shriver accompanied her aunt, Mrs. Scott O. Clemson, and daughter, Mary, of Union Bridge, to Philadelphia, and the Sesqui-Centennial, the past week.

Mrs. McKindless and daughters, Alice and Ruth, of New York; Mrs. Zepp and Mr. Zepp, of Copperville, and R. A. Waltz, of Westminster, spent Wednesday with Mr. and Mrs. Emory Flickinger.

Mr. and Mrs. Samuel C. Ott, Mrs. J. W. Witherow and Mrs. John Shreeve, attended the funeral of Mrs. Ott's grandmother, Mrs. Charles F. Rowe, which was held on Monday afternoon, at the Lutheran Church, Emmitsburg.

Mrs. G. I. McKindless, New York City, daughters, Alice and Ruth, spent a few days with his sister, Mrs. Emila L. Zepp, of Copperville. Miss Ellen Harrison, of Washington Park, Baltimore, also spent Tuesday with her aunt, Mrs. Zepp.

Hezekiah Stuller and daughter, Mrs. Keithley, of Center, Mo., are on a visit to Mr. Stuller's sister, Mrs. B. O. Slonaker and family, Detroit. This is the second meeting together of brother and sister in fifty-five years. Mr. Stuller is in his 81st year.

The Ladies' Aid Society of Grace Reformed Church, will hold its monthly meeting at the home of Mr. and Mrs. Arkansas Fink, on September 2nd. They will meet on the church lawn at 7 o'clock. Anyone not having a way will please notify the President.

CHURCH NOTICES.

This column is for the free use of all churches, for a brief announcement of services. Please do not elaborate. It is always understood that the public is invited.

The United Brethren, Presbyterian and Reformed Churches will unite again in a series of weekly prayer services during the Fall and Winter. The first service of the series will be held on Wednesday evening, Sept. 1, at 7:30, in the Reformed church.

Taneytown U. B. Church—Sunday School, 9:30; Jr. C. E., 6:00; Sr. C. E., 7:00; Evening Worship, 8:00.
Harney—Sunday School, 9:30; Morning Worship, 10:30.

Reformed Church, Taneytown—No Services, Church closed.
Keysville—Sunday School, 9:00; No Service. Harvest Home Service, Sept. 5, at 2:00. Special open air service in Stonesifer's Grove, Sunday evening, Sept. 12. Music by Rocky Ridge union tabernacle choir.

Manchester U. B. Church, Bixler's—S. School, 9:30; Preaching, 10:30.
Mt. Zion—S. School, 1:30; Preaching, 2:30; C. E., in the evening, 7:30.
Manchester—Preaching in the evening, at 7:30; A week of special services beginning, Sept. 26th.
Miller's—S. School, 9:30.

Trinity Lutheran, Taneytown—9:00 Sunday School; 10:00 Morning Worship; 6:30 Christian Endeavor; 7:30 Evening Worship; Meeting of Church Council after morning service. Harvest Home Service, Sept. 19th.

Presbyterian Piney Creek—Sabbath School, 9:30; 10:30 All the congregation requested to be present to hear report of committee on arrangements for church supper to be held Sept. 10th. September 5th. Old Friends and Rally Day with Harvest Home Service, at 9:30. Box luncheon. 1:30 Women's Missionary Society will hold a Praise and Thank-offering Service.

Uniontown Lutheran Charge, St. Paul's—S. S., 9:30; Worship and Sermon, 10:30; C. E., 7:30. Woman's Missionary Society, Thursday, Sept. 2, at 7:30, at Miss Ida Mering's. Emmanuel (Baust)—Union S. S., 1:30; Worship and Sermon, 2:30.
Mt. Union—S. S., 9:15; C. E., 7:30. St. Luke's (Winter's)—S. S., 9:30.

Presbyterian Town—S. School, at 10:00; Christian Endeavor, 6:45; No Preaching Service.

LAST PAGE EDITORIAL.

Buy a Farm.

This seems to us to be a good time to buy a farm; not so much for a mere investment for somebody else to work, but as a home and plant for the purchaser to work. There are already too many farms not occupied and worked by owners; but even so, at present low prices, the average well located farm ought to be a good investment, even for renting.

There are a number of large farms on the market that can be bought low enough to let a large portion of the land lie idle, or be sold off at a low figure after the buying. This is better to do, we think, than wait for a small farm and pay a good price for it; buy a big one, cheap, then save the buildings and make a small farm out of it by selling off the unwanted land to somebody who in turn may own a small farm. It is more farms, and smaller ones, that will eventually save farming as a profitable business—and it takes land to make a farm.

When a farm with good land and buildings, fairly well located, can be bought at from \$40.00 to \$60.00 an acre, or more, it is a pretty sure thing that no money can be lost on the investment, especially when one is willing to work. The fact is when farms can be bought, at or near the present value of the buildings alone, we must wonder why people keep on buying and building town homes, that cost more than a home and farm together.

Headquarters Gets a Letter from Soldier's Wife.

Among the humorous letters bearing a serious vein, received in Washington during the war, was the following:

Mr. Headquarters,
U. S. Army,
Dear Mr. Headquarters:

My husband was induced into the surface long months ago and I ain't received no pay from him since he was gone. Please send me my loppent as I have a four-month's-old baby and he is my only support and I need it every day to buy food and keep us enclosed I am a poor woman and all that I have is at the front. Both sides of my parents are very old and I can't suspect anything from them as my mother has been in bed thirteen years with one doctor and she won't take another. My husband is in charge of a spittoon. Do I get any more than I am going to get? Please send me a letter and tell me if my husband made application for a wife and child and please send me a wife's form to fill out. I have already written to Mr. Wilson and got no answer and if I don't hear from you I will write Uncle Sam about you and him.

Yours very truly,
MRS. PAUL QUINN.

P. S.—My husband says he sets in the Y. M. C. A. ever nite with the piano playing in his uniform. I think you can find him there.—Ex.

What She Wanted

Customer—Have you any colanders?
Clerk—Yes, we have them in enamel. What size do you want?
Customer—I mean one with the months on it, like I had last year!—Good Hardware.

Just an Impression

"Did you get the number of the car that hit you?" asked the traffic cop.
"Look at my back, officer," replied the victim weakly. "I think you'll find the number stamped there."—American Legion Weekly.

Ever Thus!

"How did the collision occur?"
"A fast driver with the right of way and another fast driver who was sure nobody would be using the main thoroughfare."

FOR COUNTY COMMISSIONER.

By the urgent request of my friends both Republicans and Democrats, I announce myself as a Candidate for the office of County Commissioner for Carroll County, at the Republican primaries. Your support will be greatly appreciated.

JAMES M. HANN,
Manchester District.
