VOL. 33

TANEYTOWN, MARYLAND, FRIDAY, OCTOBER 22, 1926.

No. 17

THE IMPORTANCE OF VOTING.

The Election this Year, the most Important held for Years.

"No, The Record does not have the election on the brain," nor is it rooting" for any one side; but, it does want to see a big vote out; and this can be the result only if every-body is interested enough to vote, and to prepare themselves in advance for it; and this is the thing we would it; and this is the thing we would like to help to do—to arouse healthy, intelligent interest, and not let the election go by with a large percent-

The Record does not urge people to vote merely because they are Republicans, or Democrats, but because they are intelligent citizens, holding to certain principles. If voters are not in the latter class, it would be best for them to stay home, for voting carelessly, or not conscientiously, is

But, in this "best county in the state" of ours, voters in this class should be very small indeed, for even persons who may know little about politics, or voting, surely have some trusted friend by whom they are willing to be advised, and still do a fairly good job of voting.

The coming election on Nov. 2 is the biggest and most important subject before us. The result of the election this year—a large part of it

election this year—a large part of it will last four years, and part of it two years, which makes voting every two years greatly more important than when we had an election for

Some offices, every year.
We need not be much concerned about the elections anywhere but in Maryland, and in our own county; but we ought to be concerned about our own. Already a lot of vote forecasters are predicting a light vote, indicated in part by the light registration, and to the to the fact that so many people are actually concerned more about going hunting, or automobiling, or perhaps working in the corn field, than in go-

ing to the election.

We would like to help a little to Taneytown district and in Carroll County; and this can only be done by those who think as we do, becoming missionaries to help get out the vote. Nearly every voter ought to have one, perhaps two or three, public issues in mind that they are interested in and would like to see come to pass. And this interest ought to result in a detarm. determination to vote, and to be sure that their ballot is marked as they think it ought to. This is the simplest plest and truest form of good citizen-

We will have a final word to say the subject, next week, when we will attempt to give some detailed inhave not had wide experience in the mark. Talbott, deceased, reported sale of personal property.

Samuel E. and Lee C. Smith, executors of Ida M. Smith, deceased, reported sale of real estate on which the Court issued an order ni si have not had wide experience in the marking of their ballots.

The Parent-Teachers' Association.

The Parent-Teachers' Association And Parent-Teachers Association will hold its regular monthly meeting Monday evening, October 25, at 8:00 P. M. The following program will be

Recitation, "A Perfect Hallowe'en."

Recitation, "A Perfect Hallowe'en."

Recitation, "The Hallowe'en Brownies"

Leah K. Reindollar, Annie Lutz, James Baumgardner, and Elwood Crabbs.

The question for discussion will be

The question for discussion will be the betterment of our school?" After the meeting there will be a reception for the teachers. A full free, attendance is requested. Admission

Getting the Election Returns.

Just what arrangements will be hade for radiocasting the election returns, has not been announced. So as the Maryland returns are concerned, and especially from the counties, but few returns can be expected candidates that must necessarily deay the count until some time late the count until some time late

Wednesday morning. The Record has suggested to broadcasting arrangement like that the World's Series ball games, would be world's Series ball games. would be desirable; say for about 1:00 o'clock, Wednesday afternoon, by which time something like complete figures ought to be in from the coun-

es of the state. In New York, where they use voting hachines, the results will likely be sufficient by midnight, or earlier, to results; and in states like Pennsylvania, Massachusetts and Ohio, the trend of incomplete returns may orecast results for Senator and Gov-

The problem of marking the ballot, rejected efforts, or to contention should the judges as to how they be counted; and slow and inthe description officials will have their part in cutting" on county tickets, and the kelihood of numerous close votes. will berhaps Wednesday afternoon be about the earliest time that correct results can be obtained, even should they be promptly sent to a radiocasting station. DEAF MAN HIT BY AUTO.

James F. Yingling, Seriously if not Fatally Injured.

James F. Yingling, living along the state road at the junction of the Mayberry road, was struck by an auto near Baust Church on Thursday morning, while walking on the side of the road. The accident was due to two cars passing one going in the

opposite direction, and in making the pass Mr. Yingling was struck and knocked down. As he is quite deaf he did not hear the cars.

He was struck by a car driven by a man from Glen Rock, Pa. He was picked up unconscious and was taken to Maryland General Hospital, Baltimore. It is supposed that he is sufmore. It is supposed that he is suf-fering from a fractured skull, while one shoulder was dislocated if not broken. He was still unconscious at last report, and it is feared that his injuries may be fatal.

November Term Jurors.

The following jurors have been drawn for the November term of Court, that convenes on Tuesday November 9th.

Taneytown—Augustus L. Morelock, Charles R. Hockensmith, George H. Hilterbrick, Samuel L. Johnson.

Uniontown—Sterling E. Zimmerman, Harvey E. Erb, Joseph S. Coe, Jacob J. Bankert. Myers—George E. Bowman, Chas.

H. Crowl, Theodore Frank Stewart. Woolery's—John H. Conoway, Alvin B. Coleman, Michael R. Bentz, William G. Cockey.
Freedom—John T. Cawthorn, Clar-

ence A. Buckingham, R. Kenneth

Barnes.
Manchester—Henry L. Hosfeld, David F. Jones, George U. Sullivan, Wm. S. Brehm, J. Warren Strevig.
Westminster—George K. Mather, Charles W. Essom, John A. Bankert, Upton Gladhill, William R. Unger, George W. Hoff, Carl C. Twigg, James Pearre Wantz, Samuel W. Bond.
Hampstead—David K. Brown, Herbert R. Wooden, Raymond P. Buchman.

Franklin-John E. Naill, William E. Gosnell.

E. Gosnell.

Middleburg—James E. Kiser, Wellington G. Bohn.

New Windsor—Truman E. Lambert,
Edward C. Gilbert, Howard R. Brown.

Union Bridge—William J. Haines,
George E. Fowble.

Mt. Airy—Oliver W. Driver, George

A. Fleming. Berrett-Harry T. Evans, Charles

Proceedings of the Orphans' Court.

Monday, October 18th., 1926.—William L. Talbott, executor of William H. Talbott, deceased, reported sale of

Charles S. Wolbert, administrator of Alverta Wolbert, deceased, settled his first and final account.

Tuesday, Oct. 19th., 1926.—Laura Bachman and Noah Brown, administrators of Jonas Bachman, deceased, reported sale of personal property and settled their first account.

Letters of administration on the estate of H. David Hess, deceased, were granted unto Elmer S. Hess, who received warrant to appraise personal estate, returned inventory of personal estate, received order to sell same and reported sale and settled his first and final account.

Charles B. and Francis Yingling, administrators of Mark Yingling, deceased, received order to transfer mortgage.

The Taneytown Chautauqua.

Only another month until the Chautauqua will be with us again, the date being Nov. 19-22. The Company promises us an unusually good programme this year and we ask for liberal patronage and encouragement from the public.

As an educational factor it should have the support of every good citizen. The guarantors especially should use every effort to make it a success. The tickets have been received and the ticket committee will soon be active. The price of season ticket is \$1.50. Be prepared to take one or more promptly when called on.

"Taking" for "Taxing."

A part of our issue of last week, contained a typographical error in the first heading on first page when the word "taking" was used instead of "taxing" Manufacturing Machinery.
After all, "taking" is not an altogether wrong word for "taxing," for our taxes represent the "taking" of certain amounts from us for public purposes; and in this particular instance the county ought to "take" taxes from manufacturers as well as from other business concerns.

Newspaper for Baltimore Now Talked of.

Talk of a new daily paper in Baltimore seems to be growing toward fruitfulness, and surely Baltimore needs another one. We have heard, in the past, that there was difficulty attached to securing adequate telegraphic news service—that such service was limited, and that the allotments to Baltimore were all subscribed for. But, this was years ago, and

conditions have changed. A new paper in Baltimore, properly conducted, would meet with a large patronage from the outset, we be-

PRIMARY ELECTION COSTS IN STATE.

Crabbe thinks Maryland ought to be Investigated.

The Baltimore Evening Sun, last Saturday, gave nearly two columns to the primary election cost, this year, in Baltimore City and the state, a reading of which helps us to understand why such big states as Pennsylvania why such big states as Pennsylvania.

and Illinois are being "investigated."
The staff writer of the Sun says the primary cost the taxjayers of the city roughly \$385,000, and the candidates for Governor and Senator \$180,-000, a total for Baltimore alone of \$565,000, or likely over \$600,000 for the entire state, without counting the expenses of candidates for Congress, the legislature, or for county offices. Adding the costs of the general elec-tion, the whole will be a million dollar proposition.

The figures show that the cost of each vote polled for candidates for Governor, cost about \$3.00 each. The cost of registration and the election are included in the estimate, as both were necessary for the primary con-

The Sun in a later article said that a total of \$30,000 was spent by candidates who sought Congressional nominations, and revised the total spent for all candidates on account of the primary election throughout the state, to \$595,000. The greatest sums spent on the Congressional contest were, \$15,671 in the First district, and \$10,025 in the Sixth district, leaving less than \$4000. for the remaining four districts.

Whether comparison is made with the states being "investigated"— states with many times the voters of Maryland—or whether for the purpose of estimating whether the primary plan is worth its cost, there is a wide range of speculation opened up for Maryland voters.

Superintendent Crabbe, of the Anti-Saloon League, has written to Senator Reed, of Mo., that he might find some "pay dirt" should he turn his investigation of primary elections to Maryland, especially in the first and sixth Congressional districts.

Mr. Reed, according to a dispatch from Chicago, declares he is too busy there to "run around to Maryland or anywhere else" on the say-so of Anti-Saloon League officials. If George W. Crabbe, superintendent of the Maryland Anti-Saloon League, who sug-gested Senatorial investigation of the First and Sixth Congressional district primaries, can furnish evidence with some basis of fact, however, he will send some other member of the committee to investigate, Senator Reed is quoted as saying.

To this Mr. Crabbe replied:

"I will submit the names of at least fifty witnesses who claim they did not contribute either to the campaign of Franklin Upshur or George Louis Eppler, "wet," all of whom were sworn to have contributed.

"I also will furnish names of per-

sons who will throw some light on the expense accounts in the First and Sixth Congressional districts. I will co-operate with any member of the Senate committee Mr. Reed may send to conduct the investigation. Mr. Reed already has had submitted to him ample information to result in a probe if he desires to get at the truth of the wholesale frauds perpetrated in these primary elections.

Democratic Women for Law Enforcement.

The Democratic Law Enforcement Clubs of Maryland, officered and promoted by women, are working strong-ly in connection with the Law and Order League for better and more general law enforcement; and to advance that end a convention will be held at the Southern Hotel, Baltimore, October 29, at 10:00 A. M., to which a general invitation is extended to all interested persons, men or women. The announcement of the convention says;

"What we want is a tremendous crowd, and if every man and woman will begin talking about this convention from now until it takes place, telling all that it is to be a demonstra-tion for Law and Order in Maryland, you will see some good results.

Remember the eyes of the country are all turned towards Maryland, men and women from the country are asking themselves whether we will stand for another four years of the lawlessness which has pervaded our state. Show by your presence at this Convention that you are heart and soul with us. It will bring encouragement to those courageous women who for the past six months have given every moment of their time to about better conditions Maryland, and this is all we ask of you. Will you help?

A luncheon will be served for \$1.00 after the business meeting of the convention at 1:00 P. M., and reserva-tions should be sent to Mrs. E. Allen Craig, 3619 Forest Park Ave., Balti-

We cannot get any newspaper publicity and must depend upon you to help us get the Convention advertised. Do what you can please, and be sure to come to the Convention yourself."
MRS. JESSE W. NICHOLSON, Chevy Chase, Md.

The army mule is still an integral part of the United States Army, the War Department having recently set aside \$20,000 for the purchase of these worthy animals at \$165 a head. Landon Crawford Burns to beth Noel Gehr, Thurmont, Md.

VOTE SLACKING.

Hit Hard by President Coolidge in Address to Young Orators.

President Coolidge, in an address last Friday night in Washington to young orators, emphasized honesty, industry and thrift, and especially scored intelligent but careless persons who avoided the duty of voting. The address was broadcasted by radio, throughout the country.
"To fail to exercise the suffrage is

to be "disloyal to our whole system of "self-government—to neglect to vote is to adbicate" the President declared in one of his strongest addresses, delivered to the young persons striving for honors in the international ora-

torical contest.

Mr. Coolidge, after extending his greetings to the speakers and commending the contest as promoting interest in the science of government minced no words in driving home his lesson citizenship.

"American citizenship," the President said, "is not something that is intricate involved and mysterious, beyond the comprehension of ordinary intelligence. Those who have had meager opportunities often times discharge their obligations to perfection, while those who seemingly have had every advantage accomplish nothing

"To provide for the economic well-being of our inhabitants only three at-tributes, which are not beyond the reach of the average person, are necessary—honesty, industry and thrift. By devotion to those people will in general be self-supporting and independent. That applies to the private affairs of our citizens, but, of course, under our institutions they are all charged with the performance of public functions. Some will be called up-on to hold office.

"But all our citizens of the requisite age and education are called to vote. I wish especially to emphasize that. Whenever a choice is to be made in electing a puble officer, all those who can qualify are under the most solemn and binding obligation to register their decision at the ballot box. To fail in that is to be disloyal to our whole system of self-government. On our theory that the people are sovereign, to neglect to vote is to abdicate.

"We do not pretend to rely for correct decision on the judgment of

the selfish and the interested few, but rather on the patriotic choice of the great body of candidate and independent citizens. We rely on the expressions of the impartial voters. A true election represents the untrammelled expression of their will. It is their voice that speaks with divine authority."

The President also emphasized the

imperative necessity of obedience to law as another requirement of good citizenship. Observance of the law, he told his youthful audience who had survived the early oratorical trials participated in more than 2500 students of secondary schools of England, France, Mexico, Canada and the United States, "is the very essence of self-government."

Swat The Autumn Fly.

Have you noticed how persistent and insistent each fly has been that has buzzed into your house or your office or into the school room, since the cooler days have come? Because the ounce of prevention in this particular case will yield such positive results, the advice of Dr. John S. Fulton Director of the State Department of Health is, to be equally persistent in getting rid of the left over flies.
"The best thing to do," he says, "if

you want to keep down next summer's crop of flies is to treat each fly of the late Fall as your deadly enemy, and swat at it until you lay it The descendents of the pair of flies that is taking up winter lodgings in some sheltered spot under your porch, in your attic, in your barn, or elsewhere around the place, will swarm down upon you next summer millions strong, unless you put an end to them now. Like the goblins in the rhyme, the flies will surely get you if you don't watch out. Don't leave a single one to live through the winter.

"A single fly lays from one hundred and twenty to one hundred and forty eggs at a time. A single pair will produce from eight to ten generations in a season. The descendants of a single pair run up into the billions. They bread in filth and they carry disease from sick to well. For every fly you kill this Fall, you can say to yourself: "That means that much less danger to the babies next summer from intestinal diseases; that much less to the grown-ups-and to the children, too— from tuberculosis and typhoid and from other catching

"Do the job well while you are at it. Don't let a single fly escape. Swat the autumn fly."

But that England has the Best Traffic Regulations.

HAVE BEST ROADS

MACKALL SAYS

John N. Mackall, Maryland's road chief engineer who has just returned from a World's road conference in Milan, Italy, has picked up a lot of information and opinions in his line of work, while abroad. He is strong on the American road building system, and says it is the best in the world, but thinks that traffic regula-tion, especially in England, is better

than here. The idea over there is to keep traffic moving, and pedestrians are expected to look out for themselves. He thinks there are less people killed in London than in any large American city, and that there are fewer accidents, due to the "take care of yourself" plan.

"This may sound like heresy or worse to some American ears," he says, "but it represents conclusions confirmed by the experience of a city having the most difficult traffic problems of any in the world. This is London with its thousands of omni-buses, its narrow streets and its al-most total lack of mechanical control.

"There I find that the business of the police primarily is to keep vehicular traffic moving. All else is secondary. The pedestrian has been taught to protect himself. I, myself, expected to get killed every time I tried to cross a street, but I wasn't, which is more I ordon vehicles. and what is more, London vehicles are killing almost nobody. It may sound miraculous, but it is true. Also traffic congestion is practically unknown.

"But when I grant the Europeans' superior skill in handling their traffic, also superior wisdom in selecting the vehicle and not the pedestrian for solicitude, I give them all that I can, as a result of my observations.

"When it comes to road work I realize that they are about ten years behind us. Before the war and up to the war, perhaps, they had the superior highway system. Certainly this was true of France. But since that time we have forged far in the lead in working out road problems."

Shakspeare, at Westminster.

Westminster will have an opportunity in the near future to hear one of the greatest interpreters of Shakspeare on the public platform. Henry Lawrence Southwick, President of Emerson College of Oratory, will read "King Lear" in Alumni Hall, at 8:00 o'clock, on the evening of October 29th. It has been said that he knows Shakspeare better than any other man in America. While attempting little in the way of impersonation his understanding of the plays enables him to show the nature of each char-acter in its true light.

The audiences that have had the privilege of hearing Mr. Southwick on his previous visits to Westminster have gone away delighted and it with the greatest pleasure that his coming this year is anticipated. Tickets can be procured at the door at fifty cents.

The Constitutional Amendment.

Almost nothing has been said about the Constitutional Amendment to be voted on at the November election; but there is an amendment, relating only to Baltimore City, that must be voted on by the entire state.

In few words, it applies to the salaries of Judges of the Supreme Bench of Baltimore—an increase in salaries. The voters of the state, not taxpayers in Baltimore, are not financially interested, as the increase, made, would be provided by the Mayor and City Council of Baltimore, entirely at the expense of the City.

Notes from the World's Series.

A man in Wilmington, Del., died from heart disease while watching the report of the game. He dropped when Ruth was passed to first, with two out, in the last inning.

In St. Louis, Sunday night, one man was killed, and a large number injured in noisy street demonstrations in St. Louis. In St. Louis, baseball fans are pro-

posing, Hornsby, Haines and Theve-now for Mayor, Governor and other big offices, while Grover Cleveland Alexander is picked for President. Out in Washington, apple picking was delayed at great loss to growers, on account of the large number of "fans" who "listened in" on the

The total amount of bets placed on the games—the amount won, and lost is estimated at \$20,000,000.

The Cardinals had a boisterous welcome on their return home, but the violence of the joy at winning was spent on Sunday night, and besides, the players themselves were tired out and in no humor for stage play. About 40,000 "fans" gathered in the baseball park for the reception to the players, about half of whom had quietly slipped away to their homes for rest and quiet.

Hornsby went at once to the burial of his mother, in Texas, the ceremony having been delayed until after the

Prisons in England have decreased by one-half and the number of inmates by two-thirds in the past few jewels are said to be very years. There are today only thirty-three prisons and 10,000 prisoners.

MARYLAND POLITICS.

As the Situation Appears to a Phila-delphia Reporter.

The Philadelphia Ledger gave Maryland politics parts of three columns of space, a few days ago. Here are

some of the paragraphs;
"Senator Weller has never been known to stray from the fold of Republican regularity. He is "ole reliable" himself when it comes to supporting Coolidge economy and Mellon tax reduction.

The Baltimore business interests, Democratic as well as Republican, are well satisfied with that kind of a record, even though it is adorned with spellbinding eloquence. It is a record that Mr. Tydings is finding hard to attack and so the Sentovial came to attack, and so the Senatorial campaign to date has been a mild-mannered, well-behaved affair. Mr. Tydings has been compelled to fall back upon his own winning personality and the strength of Governor Ritchie.

The senatorial candidates present a The senatorial candidates present a study in contrasts. While Mr. Weller is running off with honors as the soundless wonder of the Senate. Mr. Tydings ranks as one of the crack young orators of the House.

Only 36 years old, tall, handsome, sandy, thatched, his fine voice, wining smile and easy command of language, would give him an adventage on the

would give him an advantage on the stump if his taciturn adversary would only supply him with an issue to talk about. He can't even orate about liquor because both he and Weller are

He has an excellent war record. He went in as a private and came out a lieutenant colonel. But being a modest soldier, he can't talk much about that. His friends, however, are not permitting it to go unnoticed among the voters.

With issues thus virtually neutralized between the senatorial candidates, Governor Ritchie stands forth as the central figure around which all the major strategy in the campaign revolves. He is driving the bandwagon, the Democrats assert and the Republicans concede. If he can drive it thard and fast enough, he will pull Tydings and the Democratic ticket through with him.

Mullikin is rapping Ritchie hard for

permitting capitalists to divert the immense power now being developed at Conowingo, on the Susquehanna River, elsewhere than to Baltimore. If Ritchie had insisted on the power being kept for the first benefit of Maryland, Baltimore would get cheaper electricity, the Republicans contend. Ritchie defends his record by saying the current could not have been delivered to Baltimore at a price cheap enough to lower rates there, but the Republicans are keeping up the clamor about it and with considerable ef-

fect, they think.

Weller is telling his friends he was invited into the project for the diversion of the power, but he refused to

participate. Ritchie's campaign has a national aspect. If he "wins big" again and carries his ticket with him, he will become a leading candidate for the Democratic presidential nomination in 1928. If he only squeaks through he will have to put his boom away in moth balls. Ritchie is a powerful

campaigner.
Mullikin, though not exactly a newcomer in politics, is not so widely known. He is gaining for himself a reputation as a hard-hitting fighter to be reckoned within the future.

Fire at Barrick Lime Plant.

The Barrick lime plant, near Woodsboro, was partly destroyed by fire, last Friday night when about 100 feet of building was burned by a fire of unknown origin, causing a loss of between \$35,000 and \$40,000. A new addition, valued at \$25,000 was saved. A fire Company from Frederick re-

not do a great deal on account of short water supply. The loss was only partly insured.

sponded to a call for help, but could

"Nothing in the Paper." Frequently you pick up a local paper and after glancing it over wearily thrust it aside, remarking: "Nothing in the paper this week." Did you ever stop to think what that phrase "nothing in the paper" means. It means that in the week just passed no misfortune has befallen the community, that no fire has wiped out a neighbor' worldly goods; that the grim angel of death has crossed no threshold of a friend; that no man driven by liquor, hatred or fear has taken the life of a fellow human; that no poor devil, haunted by the past or the misdeeds of some other has crossed the divide by his own hand; that many things that ought not to happen have not happened. So, the next time you pick up a paper that does not announce tragedy, give a little thanks instead of grumbling because there is no news. -Waterville Advance, Kansas.

A Real Queen Visiting U.S.

Queen Marie, of Roumania, who is now on her first visit to this country, is creating quite a sensation, and is said to be enjoying herself immensely seeing the sights. So far been only in New York, Washington and Baltimore, but expects to take plenty of time and see the U. S. all over. Of course, the various cities visited will try to outdo themselves

in showing her a good time.

She is accompanied with a son and daughter, and a large retinu of attendants, and incidentally calls for quite a lot of police protection. Her jewels are said to be very numerous, as well as famous and expensive, and

People are never so stubborn and thick-headed as when you are trying to get your idea across.

State candidates in New York, are campaigning extensively through Radio broadcasting, and will likely keep it up until election day. The plan has many decided advantages.

After staging a big prize fight at the Sesqui-Centennial, in order to make a losing venture help to pay, the same authorities sold box seats at \$50.00, to see the Roumanian Queen Marie this Thursday night.

The "color line" has bobbed up in athletic games, due to Chambersburg, Pa., High having a negro student on its football team. Various teams below the Mason and Dixon line refuse to enter games with Chambersburg. There is no color line in Pennsylvania schools, but that don't go across the line. The player in question enjoys high scholastic standing.

The "drys" play execrable politics, as well as defeat their objects, when they fail to organize and act together. Pennsylvania was a specimen of how "splitting" the dry vote works, and the same situation now exists in New York and Illinois. The "wets" never play the two candidate act—they have better political sense.

The "Slush" Investigation.

There is reasonable suspicion that Senator James A. Reed, and others of the Senate Committee on the expenditure of campaign funds in the primary elections, are not wholly disinterested in the result of the coming regular election, so have planned to reopen the investigation in Illinois, and perhaps in Indiana, with the result of influencing voters on November 2nd. At any rate, the hearing reopened on Monday, ostensibly to hear testimony not heard previously.

On the ground that everything is fair in politics, even if it isn't fair from a high ethical position, the effort will apparently be to minimize the chances of election of Frank L. Smith, the Republican candidate for Senator, who is under charges for spending abnormal sums of money to secure the nomination, something like the Vare case in Pennsylvania.

As the Senate itself has the power to take up charges reflecting adversely on the election and qualifications of its newly elected members, and as this testimony could be presented before the Senate, after the November election it must be assumed that the investigators prefer to try to kill off the chance of the election of Mr. Smith, rather than depend on the Senate unseating him.

The plan may work well, or it may not. Sometimes, when a man is prosecuted too strenuously, and especially when there is another object in view, public sentiment turns to the "under dog." Perhaps the indorsement of Smith by the Anti-Saloon League may have something to do with the reopening of the "slush" charges at this time?

This primary election investigation bug is a new one; but the thing being investigated is not new—the great cost connected with the invention of our "progressive" plan for arriving at nominations. The law has always cost barrels of money, everywhere. Even here in little old Maryland, the cost of the primary election—to the taxpayers and candidates—is estimated at \$565,000 in Baltimore City alone, and over \$700,000 in the whole state—and that it cost something like \$3.00 for each vote cast.

These estimates are given in an article in last Saturday's Baltimore Evening Sun, by a staff writer, who fixes the cost of the primary and general election at approximately \$1,000,000—and Maryland is very small, by comparison with Pennsylvania and Illinois, where investigation bugs are hunting for campaign thunder. Perhaps in proportion to the vote cast, as much money was spent this year in Maryland as in either of the large states named.

Unquestionably, the tremendous expenditures in election campaigns is a great evil, and there seems little doubt that this has been practiced in several states; but, it also seems equally true that before any candidate should be penalized for such expenditures, the general laws should at least approximately fix the proper amount per 1000 of voters that can be legitimately spent. This has never been done by law, and until it is done, it would seem "ex post facto" to punish men in the absence of such law, for so doing opens the field to prejudice and factionalism.

Official Salaries.

The President gets a salary of \$75,-000 a year. He lives in the White House and pays no rent. In addition, he gets an allowance of \$25,000 a year so he may live as a President should live.

Cabinet members get \$15,000 a year They have the use of a motorcar. That is about all the Government does for them. Therefore it is argued in Washington that the Government they serve should build and maintain homes for them. It is said no man of moderate means can afford to serve his Government. Salaries are not high and living expenses are not low.

Possibly; but what about the Justices of the Supreme Court? Or the United States Senators? Or the heads of the many even multifarious, permanent bureaus in Washington? And if Senators and Cabinet members are entitled to homes, maintained rentfree, why not the 435 members of the House?

Since there are so many other deserving servants of the Government, all of them protesting they are underpaid, why draw the line with the House? Why not everybody and his wife and his men-servants and his maid-servants—everybody who works for Uncle Sam?

Why not a great barracks of an apartment, with its units all cut to a pattern and standardized to a farethe well? Then with a life job for everybody who wanted it and frequent and generous salary increases, bigger and better vacations and less work, everybody could or should be reasonably happy.—Phila. Ledger.

No Verdict Reached.

The government's suit against former Attorney General H. M. Daugherty, and former Alien Property Custodian Thos. W. Miller, has ended in disagreement on the part of the jury. Just how the jury stood, is not definitely known, but report has it that it was 10 to 2 for conviction in the Miller case, and 6 to 6 in the Daugherty case. At any rate a "hung" jury does not satisfy either Justice or the public, in such important cases.

Much of the testimony against the defendants was of a most damaging character, and the public will not soon forget it. The destruction of records and checks, and the juggling of Liberty bonds from hand to hand, apparently in order to cover up the payment of criminal fees, leaves an ugly picture.

Unfortunately, some of the transactions could not be positively proven, as to their exact character, and it may be that the measure of inexact evidence caused the disagreement; but, if our laws, Courts and juries, can not get at such big cases, then there is much that is lacking in them.

We have never believed in the justice of unanimous verdicts of juries. We settle our other big problems either by majorities, or two-thirds votes, and see no reason why juries should not return verdicts in the same manner. This case should not end with this one unsatisfactory attempt at settlement.

Pleasure.

There is a vast mystery about the way some words get into our language. Pleasure, for example, is a word of such strange import that it is almost impossible to trace it to any root origin; and that is because it expresses an emotion or feeling or thought that defies definition. Pain is a simpler word, because it expresses a more definite emotion. It is traceable and has location that is bluntly physical and only vaguely moral and spiritual. But pleasure is of many kinds and so intricately interwoven with both physical and mental states and so diffused and subtly elusive, while at the same time all-pervasive that no psychology so far has been able to account for it or even to describe it.

For causation it is wholly miraculous. Every sense feeds it. The eye, resting upon some simple thing or sublime, as the case may be; the petal of a rose, the deep blue of a lake hidden among the hills, the bars of many-colored clouds that lay at the gate of dawn-any one of a thosand simple sights by day or night will bring its full flood of rapture pouring through nerve and pulse and thrilling body and mind with sensations no language can describe. But the ear also is its servitor. What a mystery is this of the happy elevation of feeling, the sheer delight and joy which spring instantly at the appeal of sounds conveyed through the air to such a simple physical contrivance as

And so of touch and taste and smell. By what magic is it that a whiff of cool air upon the cheek can lift the whole spirit and purify it with some haunting nameless sense of relish and relief? Where is the science that can explain why a bit of toast and egg and bacon produce not only nourishment but pleasure? And see what power resides in the blossom and the wheat and corn and the more ravishing odors of attar and rose to fill the whole being with a rare and happy sense of charm and delight.

But the sources of pleasure seem to be yet more numerous and mysterious than these. What a multitude of thoughts and feelings, fancies and reveries, dreams and hopes, vague musings of the night and ordered reflections of the day, sensations that do not seem to travel along any route of sense and yet come charged with the swift dynamics of ecstasy or the milder and gentler rapture of mere healthy contentments and good cheer! Of course, for every such strangely tuned capacity for pleasure there is a weird capacity for pain to match; but the wonder of it is that the pleasure seems, on the whole, to so far outweigh the pain, to be rather the normal experience, while pain is the occasional interruption. But, altogether it is a part of the great mystery of life and being. -Phila. Ledger.

First Paper From Wood

"According to an old, old legend, the Chinese first learned to make paper by watching the wasp build her nest," one learns from "Modern Aladdins and Their Magic," by Charles E. Rush and Amy Winslow. "A Chinaman, watching the wasp one day, discovered that she took a bite of wood, chewed it into paste, and smeared it on her nest. When the paste became dry it turned into something like our paper. Thus the Chinese' learned to make paper from wood long before any other people in the world."

Rich Strike, After All

Way back in the fifties gold pros pectors took a look at Big bend in the North Fork of the Feather river in California and decided the stream bed must be full of gold in the wide horseshoe watercourse that skirted a mountain. So they undertook—and finished -the herculean task of driving a tunnel through the base of the mountain, permitting the river to flow through the ground, leaving the stream bed bare. But there was no gold! Today gold has been struck in a new way at Big bend. The water that flows through the tunnel has been put to work producing electric power that has helped develop the great Sacramento valley and the San Francisco Bay region.

Getting Into a Scrape

The word "scrape," meaning a difficulty or some unfortunate predicament, has several synonyms, as "rub," a "squeeze," a "pinch," etc., all of which are younger than the term "scrape," and of slightly different interpretation.

"Getting into a scrape" came from Scotland, and the expression is as old as the ancient and honorable game of golf. In Scotland a rabbit's hole or burrow is called a "scrape." When a player's ball rolled into one of these holes it was manifestly impossible to play it, and the rules of the game recognized this fact by naming but a slight penalty for the player. He merely "got into a scrape."—Chicago Journal.

Transparent Steel

A sheet of steel so thin as to be as transparent as a pane of glass has been made by Dr. Karl Muller of the Physical Technical institute of Berlin and the feat is expected to be of great commercial and scientific interest. As a test of the clearness of this sheet of metal a photograph was made through it of a surface ruled with very fine lines and when the print was examined it showed the lines perfectly without the least distortion. The sheet is slightly flexible. The sheet is made by depositing the metal electrically upon a smooth surface and then removing it from the

Aviators to Uncover Gold It is confidently expected that army aviators will be the means of revealing rich deposits of gold in the Philippines, which is said to exist in a part of the island of Mindora which has long defied the efforts of explorers. It is hedged in by mountain peaks, and the few trails leading into it are hard and dangerous. Besides this the country is infested with serpents and ferocious anima!s. The name is really "Mina de oro," meaning gold country, and it is thought that aviation will open up a way into its interior which could not be accomplished in any other manner.

Rooster's Rig Appetite

A seven days' wonder among Spurgeon Bay (Wis.) folk was a rooster that had eaten 936 kernels of corn at a meal. E. G. Druding, a grocer in the neighboring town of Ellsworth, had a big rooster that he believed could beat that record and invited his customers to guess how many kernels it would eat. They gave him their estimates, the rooster started eating and in 20 minutes had consumed 1,480 kernels, by actual count.

High Cost of Harbors Construction of a harbor for Tokyo,

Construction of a harbor for Tokyo, a pending problem for many years, will now be actually undertaken, according to the Jiji. The total cost of the work is estimated at \$50,000,000. When Baron Sakatani was mayor of Tokyo, the cost had been estimated at only \$15,000,000. The city, it is said, will ask for a government subsidy of one-third this amount, and another third of the sum is to be secured on the pledge of reclaimed ground, while the remainder is to be repaid out of receipts collected from ships entering the harbor. Bonds may be issued to raise the necessary amount.

The port of Nagasaki is being improved at a cost of \$1,000,000.

Good taste and good health demand sound teeth and sweet breath.

The use of Wrigley's chewing gum after every meal takes care of this important item of personal hygiene in a delightful, refreshing way—by clearing the teeth of food particles and by helping the digestion.

The result is a sweet breath that shows care for one's self and consideration for others—both marks of refinement.

Hesson's Department Store

Taneytown, Md.

Are you Ready for School?

This is the question that is being asked very often these days. We are prepared to help you answer this question in the affirmative, with a full stock of Merchandise for school requirements.

Ginghams for School Dresses

A large assortment of standard qualities and brands of Dress Gingham, in 27 inch and 32 inch width to select from. Pretty patterns, newest shades, and lowest prices, according to the quality.

McCall Dress Patterns.

The McCall Dress Patterns are very popular, because of the simple manner in which they can be handled, and the latest styles. Our September patterns are just in, and have new snappy styles for school.

Shoes for School.

A large stock of reliable Shoes for Boys and Girls. The best quality leather and new styles in Oxfords and Top Shoes, in the best colors. Our prices are always very reasonable, and the Shoes noted for their wear-resisting qualities.

School Suits for Boys, \$5.98

A large stock of Boys' Knee Pants Suits of quality, that cannot be beat for the above price. In fact, the quality is extraordinary for the price of \$5.98. Don't fail to take advantoge of this opportunity to save money on these Suits.

School Hosiery,

We have a large assortment of Hosiery in Silk Lisle threads in all the late colors and various prices. Three-quarter and % length Hose for Boys and Girls.

s School Blouses and Shirts.

A very nice assortment of Blouses and Collar-attached Shirts for the school boy. They run full cut, in good patterns for boys, from 8 to 16 years. Also a full line of Neck-band and Collar-attached Dress Shirts for young men. New patterns and colors that are guaranteed not to fade.

Sweaters for School. Our line of Sweaters for Fall

has just arrived, and we are now in a position to take care of most any requirement in the Sweater line.

Dress Caps for School.

A full assortment of fine quality Dress Caps, in the new shades and designs, at very popular prices.

Fountain Pens and Ink. A good reliable Fountain Pen.

filled with good ink, is quite an asset towards perfect work in school. An L. E. Waterman Ideal Fountain Pen and a bottle of Waterman Ink is the choice that will help towards the goal. A size and design in our stock suitable for every requirement.

School Supplies.

Just received a large supply of Ink and Pencil Tablets and Composition Books. Loose Leaf Books, Pencils, Pens and Holders, Companions, Rulers, Erasers and Companions. Lunch Boxes, School Bags, etc.

Taylor-made Clothing For Fall.

We are now displaying a very nifty assortment of samples for Suits for this Fall. You are cordially invited to call and look them over. We'd be glad to show them to you and take your measure for that new Fall Suit. There is some distinction in having a Suit made to your own measurements, from all wool materials that make a smart appearance. The greatest care is given in the making up of our Suits, and perfect satisfaction is guaranteed. The prices range from

\$22.50 to \$60.

Investigate So-Called

New Breeds of Poultry (Prepared by the United States Department of Agriculture.)

During the past few months the United States Department of Agriculture has received many requests from all parts of the country for information concerning two so-called new "breeds" of poultry, the "Turken" and The department has been aware of advertisements concerning these new and novel "breeds", for which some rather remarkable claims have been made. The advertisements and literature describing the origin and qualities of these "breeds" seem to have aroused much interest on the part of the public, since the department has recently received several urgent requests for an explanation regarding the reliability of the claims

The statements in the advertisements and literature claim that the "Turken" was originally produced by crossing a male turkey with a female chicken, and that the "Kiwi" was produced by crossing a male ostrich with a female chicken.

Successful crosses have been made between the pheasant and the chicken, and in practically every case the Progeny has been of the male sex and sterile. Also, successful crosses have been made between the guinea and the chicken and here, again, the sex of the Drogeny has almost invariably been male and the hybrids have been sterile. Both of these crosses have been made With great difficulty and, so far as known, no cross giving any progeny has ever been reported between the turkey and the chicken. Furthermore, it is highly improbable that the Progeny, if any have ever been secured, would breed at all, and certainly not readily. In such wide or violent crosses the progeny is always sterile, and the claim that the "Turken", which is reported to be the hybrid progeny of a cross between the turkey and the chicken, is in all probability not founded on fact.

One other point must be made con-Cerning the so-called "Turken", says the department. The illustrations accompanying the advertisements and literature are in all probability photo-Traphs of the Transylvania nakedheck chickens. According to the best Information obtainable this odd-looking breed originated in West India and the characteristic naked-neck has bred true for many years. It is a distinct character of the breed. The department believes that the so-called "Turken" is nothing else than the Transylvania naked-neck chicken, which ap-Darently possesses no qualities superior to the more important standard breeds and varieties and has not been shown to be particularly well adapted to conditions in many parts of our

As far as the reported cross giving rise to the "Kiwi" is concerned, there is much less evidence in support of such a cross than in the case of the 'Turken". This is too violent a cross to produce any results whatever.

The burden of proof that such crosses as those giving rise to the "Turken" and the "Klwi" must remain with the sponsors of such novel productions. In the meantime, the interests of the public should be safeguarded.

Much Depends Upon Care

When Pullets Will Lay At what age should pullets begin laying? It is commonly acknowledged that Lieghorn pullets on the average Will begin laying at the age of 5 to 51/2 months. Wyandottes and Rhode Island Reds usually start at 6 to 61/2 months and Plymouth Rocks around 7 months.

Of course there are exceptions where better records are made. Much depends upon the care and attention given during the months of growth and development. If properly fed and used, they should be in a laying condition at the age mentioned above.

Timely Poultry Hints

Fall-hatched chickens are in good demand from Januray 1 to April 1.

bound for each bird shipped. Ship adult fowls in a box 20 by 18

Count on a shrinkage of a half-

12 inches, to hold 24 birds. All animal heat must be out of the

earcass before packing for shipment. Young fowls in the same package with old stock, will command the pre-

vailing prices for the latter. The regulation box, for a dozen brollers measures 17 by 16 by 4 inches, inside measurement. It is made of half-inch lumber.

For shipping one dozen roasting towls, the box should measure 20 by by 6 inches, of half-inch stuff.— Farm Journal.

Cockerels that develop head points and begin to crew early in life are apt to be the best breeders. Breed the best ones before selling too many

Ensilage Corn Best for Silo

Results of Tests Made With Two Varieties at Different Stations.

Is it more profitable to plant ensilage corn for the silo than ordinary field corn? is the question that presents itself to many silo owners at this time of the year. In Iowa few are growing special varieties for the silo, the majority of farmers believing that the regular field corn, taking everything into consideration, can be more profitably handled than some special ensilage variety that grows more forage and less grain per acre.

Larger Amount of Water. There is no doubt but silage made from ensilage corn contains a larger amount of water than that made from field corn. In other words, that the former is more succulent than the latter or that it contains less dry matter per pound or per ton. On the other hand, ensilage corn produces a larger tonnage than field corn and the question arises whether the greater tonnage containing less dry matter per ton is more economical for the dairy cow than field corn silage, which is more concentrated.

The Indiana experiment station has been testing this matter for a number of years and has come to the conclusion that field corn silage produced approximately 1.5 per cent more milk and 3 per cent more fat than ensilage corn silage. Ton for ton, in other words, the field corn produced slightly more milk and fat than ensilage corn silage, but the yield of dry matter or of total nutrients per acre from ensilage corn was much greater than from field corn. The difference in yield of the two kinds of corn was large enough so that ensilage corn proved the more profitable. Similar results have been obtained at the Ohio and Connecticut experiment

8110 Any Part.

There is another factor aside from yield per acre to be considered in connection with this problem of whether to plant ensilage or field corn for the silo. If the entire corn crop is of the same variety, any part of it can be put into the silo. If, on the other hand, ensilage corn is raised for the sllo, the particular field that is set aside for that purpose must be used. There are times, owing to late planting or to excessive moisture in the spring, when some part of the corn crop cannot be cultivated as thoroughly as some other part, and may on that account mature a week or so later. In such a case the late corn may be put in the silo, and the handicap due to late maturity partially avoided. Such late corn might not mature, and, unless it could be put in the silo, much of it would be wasted.

Too Early Grazing Sets

Back Average Pastures "Pasture for three and two to eat it," is the recommendation of a veteran live stock breeder who believes in the policy of keeping the growth of grass ahead of the grazing. By this plan, he says, the greatest total yield is secured and the pasture is

left in the best shape for winter. Stock men at Minnesota university farm deprecate the practice of turning out farm animals on pastures too early in the spring. Often one week's delay will give the grass such a start that the pasture season under normal conditions will be materially lengthened. Trampling of the wet and loose soil by the farm animals is destructive of pasturage.

Two acres of average pasture are required for each horse or cow. Six to eight sheep should be allotted about the same pasture as one horse

Raising Feed for Cows

The dairy farmer who can raise all or almost all of the feed for his cows has a distinct advantage over the dairyman who has to purchase his feed. It is cheaper to raise the feed than to buy it. Such a farmer has two opportunities to make a profit, first, in getting market price for his feed at his farm, and second, he should make a profit on his dairy products. As a matter of fact, a man who has to purchase all of his feed must have an exceptionally good market and efficient cows to make a profit.

Giving Dairy Cows Rest Giving the dairy cow a rest of four to eight weeks is a matter of common practice among dairymen everywhere, and when we come to study the newer facts of nutrition we are impressed with the necessity of such a period for recuperation. The dairy cow is a hard-worked machine. Many of them give their own weight in milk month after month, and from year to year, and once a year give birth to a calf that may weigh close to 100 pounds.

Cheapen Milk Yield

The cost of milk production depends largely upon the cost of foodstuffs. Therefore, to cheapen milk production dairymen should feed large quantities of leguminous roughages, such as alfalfa, clover hay, bean pods, possessing high digestible content. Corn silage and leguminous roughages should form the basis of the dairy ration. With this source of high digestible materials the grain ration can be materially cut dewn and the cost of the dairy ration

TOOLS HAVE STOOD TEST OF CENTURIES

Workers of Long Ago Not So Unscientific.

Modern civilization is very proud of itself for its achievements in technology. Everything, from the modern steam shovel to the tool that fashions mainsprings for watches, is hailed as proving how far advanced we are over the benighted, unscientific workers centuries ago. But an English scientist recently summed up the things wherein we use the same old methods employed hundreds and even thousands of year ago, and the list is a revelation.

Bricks furnish perhaps the most striking example. About 3,000 years ago a certain method was found for making bricks-the best method available then. We use practically the same composition today. An Egyptian brickmaker's mold of the Nineteenth dynasty is precisely the same in shape and construction as those which are used today in fields where bricks are still made by hand.

The modern square and plummet are also exactly like ancient Egyptian specimens, and the stone mason's mallet still retains the shape it had in 2350 B. C. Even the composition of the mortar has not changed for at least 2,000 years—lime and sand, with the addition of hair as a binding ma-

terial, were used by Roman builders. Consider the hide tanner. The chemist has made many changes, but oak bark is still the best-as it was almost the earliest tanning substance.

Even linen has the first stage in its manufacture the same as it was in primitive times—the "retting" of the flax, either by steeping it in water or by simply exposing it to the dew, in order to remove the softer tissues

and leave the fine fibers. A humble thistle is still the best tool with which to raise the nap on woolen cloth, the nap being the external covering of fine short fibers that lie smoothly all in one direction. It is so expensive, however, that the machine process is usually preferred.

The origin of the potter's wheel is lost in antiquity, but those used today, although driven by electricity, differ practically not at all in pattern from those of ancient times.

From wall paintings found in Europe, it seems almost certain that the pipe of the modern glass blower has a direct descent of at least 4,500 years without essential change.

Machinery is all right for producing second-quality gold leaf, but the finest English gold leaf is still beaten by hand. The small pellet of gold is placed between layers of goldbeaters' skin (the prepared outside membrane of the large intestine of the ox) and hammered and rehammered with a wooden mallet, just as the best method has always been.

There are many more examples to this unending list of things where the tools of a past era are still supreme today-the snowshoe, the pestle and mortar of the chemist, the carpenter's nail, the navvy's pick and—add your own observations.

Swinging Baskets Puzzle

For several months scientists have been puzzled by swinging baskets brought from Borneo and set up in the Peabody museum, Cambridge, Mass. As soon as they were in place reports Popular Science Monthly, they began their peculiar swinging, which suggested perpetual motion. Many explanations for this phenomenon were offered, but none seemed to cover it satisfactorily. Some thought there was something supernatural about the baskets, since they were originally "grave offerings." Finally two young scientists succeeded in stopping them by putting a kink in the wire from which they hung.

Useful Organization

The organization known as P. E. O. was founded January 21, 1869, at Mount Pleasant, Iowa, by seven girls. At first it was simply a secret society of a local school, but spread until at the present time it is reported to have 30,000 members scattered through the different states. Its present object is the acquisition and disposition of an educational loan fund whereby young girls past high school, who have not the means to secure higher education, may make a loan for one or two years to carry them through the preparatory college

One Possible Place Left

In one household in the city a favorite expression used by one member is 'under the circumstances.' But the user didn't know she was overworking it until recently. She was looking the house over for a portfolio, with everybody in the family assisting, including a three-year-old niece. nally she sank down on a chair in desperation.

"We've looked everywhere," she groaned. "Can anyone think of any place we haven't looked?"

"Oh, auntie," said Janie, suddenly struck with a thought, "have you looked under the 'circumstances'?"

Inherit Color Blindness

Color blindness, recent studies seem to indicate, is hereditary and is the result of a defect in the central nervous system says the Popular Science Monthly. It occurs oftener among boys and men than among girls and women, but in boys it is frequently only color ignorance, rather than an inherent defect.

As a corrective, special attention now is being given in the public schools to developing color sense among all the pupils.

Valuable Dust

A fan effectively collects the filings and grindings in a shop where valuable metals are worked, and saves the portion usually lost in the cracks in the floor. The electric motor and controller operate the grinding wheel. At the left is a small motor-operated exhaust fan which draws the particles into a funnel-shaped opening, placed discharges into a sack on the floor.

The simplicity of this arrangement and the savings resulting from its use recommend it highly wherever precious or semi-precious metals are worked.

Most jewelers do not heed the arrangement because the saving would be too small, but manufacturers have found the investment paid beyond all

Horse Still Holds Place

The American horse was for 200 years the sole means of inland travel and the great essential to all business in and between the various colonies made him a driving horse and none of the inventions of modern times, from the introduction of railroads to bicycles and horseless vehicles generally, has affected his popularity or his value. To the superficial observer it would appear as if improved means of vehicular transport would diminish the breeding of horses as well as decrease their value, but thus far such has not been the case. Good horses have a higher value than ever, and as the demand for cheap or poorly bred horses diminishes, the better bred ones survive.

Bones of Prehistoric Men

Interesting discoveries of the remains of prehistoric men are being made on Dunstable downs in one of the mounds known as the Five Knolls.

The skeleton of a bronze age man associated with a cremation burial was found near the surface of the mound. Subsequently traces of two further cremations and parts of four more skeletons were discovered. Eleven in all, some of them 3,000 years old, have now been unearthed .- London Tit-Bits.

Where America Is Behind

Little New Zealand, an island under British domination, on the other side of the globe, has an infant mortality rate of 39.96 for every 1,000 live births, the lowest of any nation on earth. In Wellington, its important city, the rate was 35, and in Dunedin 33. In the United States the rate for 1925 was 72, nearly twice that of New Zealand. Despite American progress, we still have much to learn from our neighbors.—Capper's Weekly.

SCHOOL SHOES!

Look over our line of Children's Shoes for school. They are the kind that will wear; if they do not, we will make it right. Prices are reasonable. What more could you ask?

MR. ROBERT ARTHUR.

Mr. Robert Arthur, formerly of Carroll County, died at his home in York, Pa., on Tuesday evening, Oct. 19, after a long period of disability.
Funeral services were held this
Friday morning, at the home, followed by interment at Baust Church cemetery, at 2 o'clock in the afternoon.

Mr. Arthur was a highly respected citizen, well known in York, and re-membered by many in this county and particularly in Taneytown, as for years he tenanted the present Harvey

FIND FOOTPRINTS 25 MILLION YEARS OLD

Marks Made by Animals Long Since Extinct.

Washington.-Footprints made in the sand approximately twenty-five million years ago by animals long since extinct have been discovered in the Grand canyon of the Colorado river. They have been preserved indelibly in the record of the rocks, in this instance the Coconino sandstone of Arizona.

Dr. Charles W. Gilmore, the paleontologist who uncovered many of these ancient tracks, has brought specimens of them to Washington. He describes the unique exhibit for the first time in a bulletin of the Smithsonian institution.

Hard to Grasp.

The human mind, according to Doctor Gilmore, can scarcely grasp the idea of the vast age of animal life on the earth that is presented by these strange footprints. Some tracks of extinct quadrupeds were first discovered in the Grand canyon in 1915 by Prof. Charles Schuchert. In 1924 Dr. John C. Merriam, president of the Carnegie institution of Washington conceived the idea of having a permanent exhibit of the footprints in place, just as they were found, so that the tourist that visits the Grand canvon may see them.

Such an exhibit has been prepared on the Hermit trail by Doctor Gilmore, in addition to the specimens brought to Washington. The tracks include those of new and unknown species that lived in the wet sand of this region when the earth was much younger. The Smithsonian institution hopes later to do similar work in other localities and to take steps to preserve such natural phenomena.

"The great antiquity of these footprints, which occur from 900 to 1,080 feet below the level of the present rim of the canyon," says Doctor Gilmore, "is clearly demonstrated at this

Beyond Comprehension. It is obvious that since the day when those animals impressed their feet in what at that time was moist sand, more than 1,000 feet of rock-making materials were piled up in successive strata above them, and this does not take into account many hundreds of feet more that have been eroded off from the present top of the canyon wall.

"The great length of time required for the cutting away or erosion of the rock to form the deep canyon, and the even longer time necessary for the original deposition of this great mass of stone is, when translated into terms of years, if that were possible, so stupendous as to be almost beyond human comprehension.

"It is hoped that the object lesson so graphically taught by this unique exhibit may serve as an example to stimulate the preparation and preservation of other natural phenomena to be found in our government controlled parks, monuments and reservations."

Radio Heat for Homes Next Step for Science

Pittsburgh, Pa.—The broadcasting of heat by radio is only a matter of years, in the opinion of Prof. S. E. Dibble of Carnegie Institute of Technology, who, it became known, is making a study of the problem.

Mr. Dibble, president of the American Society of Heating and Ventilating Engineers, and holder of the Ahgens professorship in plumbing, heating and ventilating, believes "It is no more improbable to broadcast heat waves than it was to broadcast sound waves."

Sending heat to consumers via the air is now the problem of research men and laboratory workers, who must "discover instruments to control heat waves, especially a detector which will pick them up and hold and amplify them," says Professor Dibble.

Transmission of heat by atmospheric conductivity is essential because of the gradual exhaustion of the elements of fuel, said the professor, adding, "The day is not far off, in my opinion, when we will see huge centralized heating plants broadcasting heat to homes, industries and office buildings."

Plans to Blow Coal From Mines to Mills

Pittsburg, Kan.-Coal, pulverized at the mines here and blown to Kansas City through pipe lines for fuel for steel mills and other industrial purposes, is the prediction made by Ira Clemens, one of the leading coal operators of this field. Clemens estimates that from the un-

claimed coal lands in this district there is sufficient to produce 400,000 tons annually, which will last for more than half a century. He also has visions of gas plants built to generate gas from the coal and by a redistilling process make gasoline from it. Coal hauled by trucks from here to the nearby large cities will be seen in a few years, he states, and predicts a bright future for the Kansas coal industry, which this winter is enjoying unusual prosperity.

Blinded by Hawk

Canby, Ore.—After shooting a large hawk T. P. Lee stooped over the bird to pick it up. The hawk, still alive. thrust his bill into one of the man's eyes. Doctors said Lee would lose

Mary Astor *****

This is the latest picture of charming Mary Astor, the motion picture actress, beloved by the thousands who are witnessing "The Wise Guy," in which she has a prominent part.

OT cat!" cried the Hotel Stenographer with enthusiasm. "I met him last night for sure and certain. He is handsomer than Rudolph Valentino, braver than Bill Hart, can outdance Ted Shawn and every petal on his daisy reads 'he loves me.' I am for him big!"

"He must be a wonder," laughed the House detective. "Did he kiss you good night?"

"He did, finally," answered the girl. The others were how-de-do, good evening, glad to meet you, and all the greetings anybody ever said to anybody."

"Little promiscuous, ain't you?" "Nix, Kelly," assured the girl. "I am just a poor working girl. The only blessings working girls have are love and kisses. We can spend these like a sailor ashore. Where rich women spend cash or credit for fine clothes and Peek dogs, limousines and private bathing pools, afternoon teas and saddle horses, country homes and Palm Beach trips, all we can spend freely is love and affection. I intend to be the grandest little spender who

ever danced a hole in a slipper. "That's the reason a poor little chorus girl who marries a wad blows the money like she had dreamed it. affection and she thinks money is as easy to get as these. WHEN I WAS TWENTY-ONE

At 21:- "Holworthy Hall," the Novelist, Desired to Be a Publisher.

T THE age of twenty-one I was a senior in Harvard university and my ambition was to become a publisher.

"I cannot remember that at this time I drew any distinction between magazine and book publishing-or between editorial and executive work. I merely knew that the appeal of printer's ink was irresistible.

"Within a few months of my twenty-first birthday, however, I realized that I wanted to write fiction. Accordingly, I began to write, but without losing my earlier desire to be a

"For the next eight years I was a publisher—and I am still writing fiction. But perhaps I should add that this fulfillment of ambition was hardly accidental; for I had been brought up from childhood in the atmosphere a magazine office.—Holworthy Hall."

TODAY:-"Holworthy Hall" is a familiar name to magazine readers. The real signature, however, should be Harold E. Porter, for that is the novelist's name.

Mr. Porter is one of the best known fiction writers in the country, and there are few magazines which have not published a series of his stories. He is also considered an expert on the theoretical side of short-story writing and is said to have proved that a formula can be used for writing (© by McClure Newspaper Syndicate.)

LIGHTING HISTORY TRACED BY EXPERT

Shows Development From Days of Torch.

Washington.-The history of lighting from such crude beginnings as when the Shetland islanders made a torch-lamp by sticking a wick in the throat of the very fat stormy petrel forms the subject of an interesting manuscript just completed as the fruit of years of research by a Smithsonian scientist. The author is Dr. Walter Hough, head curator of anthropology in the National museum, which is administered by the Smithsonian.

Doctor Hough's account reveals that animals have played a surprisingly large part in furnishing light to man. A very fat little fish called the candle fish is burned like the stormy petrel by the Indians of the Northwest coast of America. In the tropics of America the natives used to build cages to hold the great light-bearing beetle or firefly for illuminating purposes.

Largest Contributors.

But whales and seals have made the largest contribution, of course, in supplying lamp fuel. Up to the discovery of petroleum in quantities in 1859, they provided the major portion of the world's lamp oil, "with the result," as Doctor Hough puts it, "that the lamp was rather a device for increasing Christian fortitude than a dependable producer of light."

Doctor Hough has devoted years to the collecting and study of artificial lighting objects until the collection now in the National museum is probably without a peer. Henry Ford has made a hobby of the collecting of such objects and he now has a very excellent series of specimens.

The revolutionizing factor in illumination Doctor Hough finds to be the solution of the problem of draft for lamps by a Swiss engineer named Argand in the year 1782. George Washington had some of the Argand lamps at Mount Vernon. These are now in the National museum historical collections.

The Torch. "The torch," says Doctor Hough, "is associated with war, destruction, pomp and barbaric festivities. The candle symbolizes peace, domesticity and contemplation of religious things. The lamp in turn stands for wisdom, furnishing feeble light to aid the keen eyes of philosophers and poets. In modern times the torch becomes a pictograph of the adventurings of science into new fields of research, the lamp stands for education, while the candle is sidetracked to the service

of luxury and ritualism." Doctor Hough is also an authority on heating and on the broader subject of fire. He has prepared a monograph on fire with a fascinating body of folk lore and mythology, which now awaits a publisher. In a paper on heating he gives first credit to Benjamin Franklin for the adaptation of the stove to coal. "Franklin," he All her life she has spent love and says, "saw that the problem was to provide an efficient draft and proceed-

Monte Carlo Reforms Favored by Prince

Monte Carlo.-A campaign is on to

clean up Monte Carlo. A new weekly newspaper, Tout Va, meaning "Everything Goes," says Sir Basil Zaharoff, one of the richest men in Europe, and Paris bankers are the actual rulers of the little principality of Monaco.

"Blow the Casino into the sea and Monaco would be a better place for all," is a remark frequently heard, even among business men, although the receipts from the Casino go to pay the entire taxes of the principality.

Tout Va declares Monte Carlo politics the worst in the world. It is charged that the Casino special police are able to rule despotically in Mon-

The Casino, headed by Director General Vendenpush, has aroused resentment because of its efforts to constitute the Casino the center of all Monte Carlo amusements.

Democrats seeking to change the system of control of the Casino have the support of the prince. Without curtailing gambling, which the people do not consider bad for the country, the National Democrats favor a system of civil service appointments to the lucrative Casino positions.

Toss of Coin Settles Case in Detroit Court

Detroit, Mich.—The flip of a coin between attorneys for plaintiff and defendant in a case appealed from justice court and heard before Judge Ira W. Jayne resulted in a judgment for \$175 for the plaintiff who had been only granted \$25 in the lower

Levison & Co. sued in justice court for \$250 from Labadie Bros. of Wyandotte for plaster delivered to them. Labadie Bros. claim the plaster was worthless and refused to pay. The plaintiff received a judgment of \$25 and appealed to Circuit court.

Judge Jayne advised the attorneys to effect a compromise and Sidney A. Jacobs, for the plaintiff, asked for \$200, and Leo Cahalan, defense attorney, said his client would settle

The two attorneys stepped outside the courtroom and flipped a coin to determine whether Labadie Bros would pay \$150 or \$175.

SOMETHING TO THINK ABOUT By F. A. WALKER

DEFENSE AND OFFENSE

THEY took an old battleship out to sea and bombed her to the bottom from flying ships.

When it was all over a naval officer engaged on the test was asked what had been proved.

Being a cautious man he said that it had been shown that the ship could be sunk, for she had been sent to the bottom.

Perhaps the old problem of how nations are to defend themselves is no nearer solution than it ever was.

There is a general feeling all over the world just now that less should be spent on armaments than formerly.

That makes it all the more important to find out whether an attack is to be expected in the future on the sea, under the sea, or in the air.

Every now and then some one impressed by the marvelous development of aviation has a bright idea.

Why spend millions upon a superdreadnaught when that boastfullymanned craft can be sent to Davy Jones' locker by means of a little package dropped from the sky?

So there you are! All that is necessary to do is collect fleets of the winged air boats that cost comparatively little, and so be prepared for any emergency. That is the way to save money!

The inventive ingenuity of man is always warring on itself. In fact, one discovery, in the way of defense, or destruction, is good only until another is made.

Armor plate was evolved that no shell could pierce. Then a big gun was built that could drive a projectile through anything.

And so the indefinite competition went on between the two. But as soon as one became superior to the other the inequality was offset by a discovery in the other direction.

A scientific man displayed a device recently which seemed to open up amazing possibilities.

It was claimed for it that, on a large scale, it would throw shells weighing many tons for fabulous distances. In a small shape it could be used for driving rivets into the hardest steel.

And all this without noise or recoil. It looked as surprising as the discovery of the philosophers' stone would

It was disquieting because it indicated once more that you never can tell what may turn up at any moment.

The thing—the right thing for the nation as well as for the individual is to be prepared for any emergency. Keep ahead of the other fellow. The man in front or the nation in front is the one who has the least to worry about.

English Alphabet Puzzles

It wasn't the big things-the realization of the nearness of death and suffering and the like-that bothered the first American aviators to go across; it was the little things. The young flyer whose war diary is published in Liberty, complained of the cut of his uniform or the cut of a commanding officer's jib. The English worried him with their traffic keeping to the left. And their alphabet drove him to despair. About the latter, he wrote:

"What confuses us is this English alphabet. Instead of saying: A, Bee Cee, Dee, they have a different way of designating the letters. They say: Ak, Beer, Cee, Don, E, F, G, Haiches, I, J, K, Ella, Emma, N, O, Pip, Q, R, Esses, Toc, U, Vic, W, X, Y, Zed. And as they call everything by initials, it's very confusing."

Mother's Cook Book

No matter how beautiful the homes, or how exquisite the furnishings, if pure air does not circulate in every room, the family suffers.

WHOLESOME DISHES

THE summer squash provides another vegetable to add variety. Cook it, peeling and all, as long as it is tender enough to pierce with the thumb nail. Cook in as little water as possible after slicing; do not remove seeds. Season well with plenty of butter and salt and pepper. Serve hot and the whole family will enjoy it. Do not serve summer squash if you cannot afford plenty of butter on it, as otherwise it is flat and taste-

Rice With Pineapple.

Cook rice slightly salted until tender and flaky, adding a little milk at a time after it has been cooking until nearly dry in water, season with butter, and sugar, a bit of grated nutmeg and the yolks of two eggs. Heat in a mound and serve garnished with rings of pineapple. If the crushed pineapple is used stir it into the rice and serve a spoonful or two on top.

Shred a firm hard head of cabbage and crisp it by covering with cold water. After an hour or two drain well and cover with thick cream, a tablespoonful or two of vinegar and three or four of sugar, with a dash

French Method of Cooking Peas. Put two large lettuce leaves in the bottom of a kettle or saucepan; on these place the peas to be cooked, Unfortunately it is not so simple as | with one small onion. The flavors of these vegetables do not predominate, but only enhance the flavor of the peas. Pea pods are saved and cooked and the water used to cook the peas in, which makes a much more pronounced flavor.

Cherry Fritters.

Make a batter of a cupful and a half of flour, two teaspoonfuls of baking powder and a half teaspoonful of salt, one-half cupful of milk and an egg; beat until smooth, adding more milk if needed; lastly add a cupful of pitted cherries which have been covered with sugar for an hour, then drained from the sirup. Drop by spoonfuls into hot fat and fry a golden brown. Serve with the sauce made from the juice of the cherries.

How It Started

By JEAN NEWTON

PARCHMENT

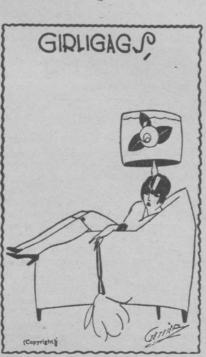

WE ARE all familiar with parchment and its imitation parchment paper from their use in making lamp shades and for other decorative purposes. The original use of parchment, however, was strictly utilitarian, the genuine and original parchment being the skin of a sheep or goat which men in an early period of our history prepared for material to write

The invention of parchment is credited to Eumens II, king of Pergamum, in Asia Minor, in the Second century B. C., the circumstance being the prohibition by Ptolemy of Egypt of the exportation of papyrus, the contemporary writing material. In other words, the invention of parchment was the outcome of Egyptian conservation of home products!

The manufacture of parchment rose to great importance in Rome and its use spread all over Europe and continued until the invention of paper made from rags. It is from its birthplace, Pergamum, that the name "parchment' 'is derived, through the Latin "pergamina," and subsequently the French "parchment." (Copyright.)

Drew Revolver Only With Deadly Purpose

The old-time cowboy seldom touched his weapon or its holster unless to draw and shoot, for witless fondling might invite a shot, and, unlike the bad man, he almost never carried more than a single gun. Not only was a second gun cumbrous, but it denoted a state of war or of armed neutrality. Getting the drop and then not firing was what the Texan and the westerner, unlike the synthetic puncher, rarely bothered to attempt. Usually the Texan or the westerner, when he seriously drew a weapon, did so with the purpose of giving "a lead ticket to Gehenna Junction." Employment of the pistol as a means of admonishing strangers' feet and inviting them to dance, or as an instrument for either lancing hats or snuffing barroom lamps occurred so seldom as to have amounted to little more than the foundation of amusing legend, but it has become, upon both the motion-picture screen and the printed page, one of the cowboy's diurnal functions.-Saturday Evening Post.

"The fact that there are two sides to every question isn't anything to brag about," says sapient Sally, "That's just what causes all the

Burr's Law Strategy

Outwitted Hamilton

Aaron Burr, the oracle of Richmond Hill, was always given credit for a cullefulness which to his enemies amounted to nothing short of black

Consequently, little surprise will be feit in the announcement that he was the first slick corporation lawyer on record and that by founding a water company he got his Bank of Manhattan company to function despite the opposition of his mortal foe, Gen. Alexander Hamilton.

The cleverness of Burr no longer strikes terror in the breasts of American historians. He is beginning to appear less black than he was painted. And so there is a measure of poetic justice in the manner in which he became a banker in New York, the story of which is recalled by the uncovering of the old well and pump machinery in the basement of the old building in Lafayette street.

In 1798 citizens of the city had become so alarmed at the spread of yellow fever that they met to do something about it. Burr had already tried to open a bank, but Hamilton was in the saddle in the state and had no desire to set up a new competitor to his Bank of New York.

Aaron attended the mass meetings, spoke, it is to be presumed, with impassioned oratory generously sprinkled with Greek gods and dryads, and the Manhattan company was formed. The charter passed through Burr's hands and he craftily inserted a clause which permitted his water company to use its surplus funds for banking purposes.

Hamilton was asleep. He let the charter go through. And so we have today the Bank of Manhattan company, with the old water company and its pine log pipes and rates fixed according to the number of fireplaces in consumer's houses long since passed from the sight of man.

The tragedy of so clever a performance was that it helped later to confirm in the American mind the fact that Aaron was too slick, always a major offense in American politics. The bank of the water company also increased the personal rivalry between Burr and Hamilton and was another step in the long march of events which were later to defeat Burr for the Presidency and cause the quarrel which killed the general and forced the colonel to flee the state-Brooklyn Eagle.

First "Copper Toes"

Do you remember the copper toes? The snowstorms sort of bring them to mind, as the overshoe was almost an unknown quantity at that time.

George Turner originated the copper toes. Discouraged because his many children wore the toes of their shoes out faster than he could afford to buy new ones, he cut some pieces of copper he had handy, and fastened them onto the shoe. He found the shoes outwore any three pairs he ever bought. He patented the idea, making his claim cover copper, silver and other metals for shoe tips, and made more money from it than he could have wrestled from his farm in a lifetime.

Copper-toed shoes became the rage; children cried for them. For many years they were in use, especially in the smaller towns and rural communities .- Peterboro Transcript.

Gas Bombs for Colds

Two San Francisco chemists have fust perfected a chlorine gas bomb which makes possible the use of chlorine gas for the treatment of colds in the home, where the same results are obtained as with more elaborate apparates-in fact, eliminates the necessity of going to some central source for treatment, with possible exposure to bad weather and further lowering of body resistance. The chlorine gas bomb is made of glass and contains nothing but pure filtered

To use it the patient takes the bomb in a closed room and breaks off the ends of the bomb, thus permitting the gas to escape and mingle with the air in the room. The patient remains in this gas-filled room for one hour.

Another Sugar Libel

George L. C. Spreckels said at a sugar men's banquet in Los Angeles: "The way sugar's lied about is incredible. Sugar turns all connected with it into flends. Sugar is the most maleficent thing known to man. So the lies go.

"Take the story about the old Louisiana mammy. You know how during the grinding season down in Louisiana the pickaninnies all chew sugar cane. Well, the old mammy thought her little grandson was taking a superabundance of cane sugar into his system, so she warned him:

"'Chile, ain't I done tole you time an' ag'n you eatin' too much cane? Don't you know, chile, cane killed Abel?"

Aiding Research Work A clearing house for research work in secondary education will be estab-

lished in the Interior department bu-

rean of education. More than seventy institutions of learning in the United States, including teachers' colleges and schools of education, as well as research bureaus and organizations. have agreed to file with the bureau a copy of each research study completed by them. The material collected will be made available by the bureau either through loan of these studies or by providing rooms where research workers may come and examine the material. This co-operation will make possible also the publication from time to time by the bureau of abstracts of

secondary education research

Lesson for October 24

JOSHUA, ISRAEL'S NEW LEADER LESSEN TEXT-Num. 27:18-20;

Joshua 1:1-9.

GOLDEN TEXT—Be strong and of a Sood courage; be not afraid, neither be thou dismayed: for the Lord, thy God is with thee withersoever thou goest.
PRIMARY TOPIC—Joshua the New

JUNIOR TOPIC—The Task of Joshua. INTERMEDIATE AND SENIOR TOP-C—The Secret of a Strong and Useful

YOUNG PEOPLE AND ADULT TOP-IC—Preparation for True Service.

The book of Joshua, from which our lesson is taken, is a history of the conquest of the promised land and its division among the tribes of Israel. It takes its name from its principal character, Joshua.

I. Joshua, the New Leader of Israel (Num. 27.18-20). The people were not to be left in

doubt as to a leader when Moses was gone. The leader was to be appointed and given recognition before all the congregation.

During the wilderness journey Joshua was Moses' minister and the captain of his army. When Moses was denied the privilege of going over the Jordan, Joshua was appointed to the leadership of Israel. Moses, the representative of the law, brought Israel to the borders of Caanan. Joshua was the man chosen to lead the people into the place of rest. The name "Joshua" has the same derivation as the name "Jesus."

II. Joshua Commanded to Take Charge (Josh. 1:2).

Moses was dead, but God's work must go on, therefore God issued the command for the new leader to assume his duty.

III. God Renews His Promise to Israel Concerning the Land (Josh. 1:3, 4).

This promise had been given to Abraham and renewed to Isaac, Jacob and Moses. It is now renewed to Israel as they were about to enter upon its possession. The borders of the land were "from the wilderness and this Lebanon even unto the great river, the River Euphrates, all the land of the Hittites, and unto the great sea toward the going down of the sun." The nearest this territory was ever possessed was during the reign of David and Solomon, though not then fully realized. This land still belongs to the Jews, and in God's own time they shall possess it. Their possession of this land was due entirely to themselves. God promised them that wherever their feet stood upon the land it was theirs.

IV. God's Presence Promised (Josh.

Joshua was entering upon a perilous and difficult enterprise, but the Lord would be with him. The difficulties before him were:

1. The Jordan river (v. 2).

This river was now at its flood (Josh. 3:15), making it impossible for armies to cross.

2. The people were living in walled cities (Num. 13:28). Notwithstanding this, God was ready

to insure success. (1) "I will not fail thee, nor for-

sake thee" (v. 5).

(2) "There shall not any man be able to stand before thee."

(8) "As I was with Moses, so I will be with thee." Joshua had been with Moses throughout their forty years' experience from the Egyptian deliverance to the time of his death. Because he believed that God was with his master, he was willing and ready to cross the Jordan at its floodtide and courageously meet the enemies on

V. Conditions of Blessing in the Land (Josh. 1:6-9).

the other side.

1. "Be strong and of good courage" (v. 6).

His mission was to go in and divide the land among the tribes for an inheritance. It required strength and courage to do this.

2. "Unwavering obedience to the Word of God (v. 7).

In a land of idolatry it required much courage to be true to God. Prosperity and success were conditioned upon unswerving obedience to God's commands. In all his work he must conform his life to the law of God. To pass from the path outlined therein would bring disaster and ruin. In order to accomplish this the law of the Lord must be in his mouth continually. He was to meditate therein day and night.

Joshua rendered prompt obedience, he did not stop to cavil, but at once gave order for the march. God made the plan and gave the directions.

Culture

We hear so much nowadays about "culture." Culture is all right when you have something to cultivate. First make sure that you have the divine nature, then cultivate it !- D. L. Moody.

Day and Evening Day, like a weary pilgrim, had reached the western gate of heaven, and Evening stooped down to unloose the latchets of his sandal shoon.-Longfellow.

— THE — CHRISTIAN ENDEAVOR TOPIC

— From ---

Moody Bible Institute Monthly Chicago, Ill.

October 24 Lessons from Great Athletes

Corinthians 9:24-27; Hebrews 12:1-3 From the athletic games and contests in his day Paul learned many lessons. In the Scripture given above he applies these lessons to the spiritual life and to the Christian career and draws a close parallel between a successful athlete and a successful Christian. The virtues of patience, perseverance, self-control and absence from harmful things are common to

The application of the truth contained in our Scripture lesson to the spiritual realm is easily made. The Christian career is like unto a race in which a prize is given to the winner. The prize is an incorruptible crown given not to faith but for faithfulness The apostle himself was striving for this crown and realized the ever present possibility of losing it. This fear finds expression in verse 27, "I keep under my body and bring it into subjection, lest that by any means when I have preached to others I myself should be a castaway," that is, should fail of the prize. It would be well for every Christian to be possessed of this same holy fear. This is not the fear of losing one's soul in the sense in which this phrase is often used, but the fear of losing the reward for service well done. There is always a present reward in service well done, and many people object to the thought of future reward, nevertheless it the clear teaching of Scripture that rewards await the faithful Christian in the ages to come.

In this matter we must make clear distinction between "eternal life" which is the free gift of God to faith and the doctrine of rewards for faithful service. "By grace are ye saved through faith; and that not of yourselves; it is the gift of God: not of works, lest any man should boast." The grace that saves us also teaches inward operation, and "abounding in the work of the Lord" brings its own

abundant reward.

The athlete goes on a diet, does not drink or smoke, and keeps himself well in hand. The Christian athlete who seeks the prize from the hands of the Judge must bar every element of weakness, doubtful company, dancing, impure literature or pictures, any-thing and everything that would decrease his strength or divert him from

Meditate on the words of verse 24, "So run that ye may obtain."

Former Rail Worker Worshiped by Subjects.

"The Island of Women," in the South seas, is one of the strangest of all monarchies. Its inhabitants comprise few men and many women, so that the native women constantly are involved in a struggle to win husbanes, making polygamy expedient.

The monarch is an Irishman, possessed of a long red beard and a name said as He was with Moses, so He typical of his ancestral country-Michael O'Shaughnessy, says Robert Dean Frisbie in Wide World.

"King Mike," as he is widely known, was a section hand on the Southern Pacific railway in California when his attention was attracted by a picture in a newspaper of a beautiful South Sea island girl and he embarked for Papeete.

O'Shaughnessy had heard of the mysterious Island of Women where men are so few that they are worshiped by the women, and he made it his objective when later he left Tahiti aboard a small trading

Ships engaged in trading in the South Pacific seldom visit the Island of Women and those that do put into the deep-locked lagoon which serves as the island's port seldom leave for some time. Life for the sailors is easy and luxurious and it is infrequent that the captains of such vessels do not have to resort to trickery to lure members of their crews away from the native women, who idolize all men.

O'Shaughnessy was the second white man to take up his home on the Island of Women, the first having been a veteran of the World war who went there on a trading ship he had boarded without knowing its destina-

The future King Mike went to the island with a determination to become its monarch, but little did he surmise that it would be his bright red beard which would cause the old native king to abdicate in his favor. The women were deeply impressed by the young American's beard and they came to regard him as being a sort of a deity.

"I found Mike in his luxurious town palace (he also has a simple little villa up one of the valleys, and a more pretentious bamboo abode on the cliffs)," says Mr. Frisbie reviewing his visit.

"Greatness, it appeared, had been thrust upon him. When the people heard his full baritone voice, saw him dance an Irish jig, and felt the red bristles on his broad chin, he was accepted as a superman and regarded as the equal of the native king. But when he took unto himself six wives and later as he became familiar with the language, preached the doctrine of polygamy as he saw it, the old king abdicated and Mike ascended to the throne."

AMOUNT OF RUBBER IN MAN MEASURED

Scientist Tests Elasticity of Cells.

Philadelphia. - Stretching human and plant cells to determine their elasticity is no longer a stretch of imagination.

It is under the microscope, working with glass needles with microscopically fine points, that Dr. William Seifriz, professor of botany at the University of Pennsylvania, is appraising how much "rubber" there is in man's make-up, just as the engineers have tested the coefficient of the elasticity of steel and other structural materials.

So far, among other results, Doctor Seifriz has determined that the blood cell, or corpuscle, of the frog can be stretched to ten times its size. The human blood cell, however, is more stubborn. It stretches to only three

times its original size before it breaks. The extremely delicate nature of the experiment is apparent when he tells that the human blood corpuscle has a diameter of one two-hundred-thousandth of an inch. The stretching, too, is accomplished by hand-made

glass needles manufactured by himself. Glass threads are held over a small flame and suddenly snapped. These are then inserted in two holders on each side of the microscope. Then, as he peers through the lens of the instrument, they are gradually screwed toward the lone cell held in a minute drop of water hanging from a cover of glass under the instrument.

The needle points catch. They are screwed up to pierce the membrane. Then, with almost painful slowness. the distance between the needle points is widened, the distance being measured on a fine scale.

"We don't know yet just what the full value of this study will be," said Doctor Seifriz. "Science knows now that many diseases are due to leaky membranes losing salts necessary for proper functioning.

"A membrane of high elasticity is fairly watertight; conversely, a membrane of low elasticity is leaky. Leaky membranes in humans mean all sorts of trouble. They are porous and lose their necessary constituents.

"The human protoplasms-cellsare not as elastic as rubber. They are like bread dough in more ways than one. They have the same sticky consistency and many of the same characteristics. Muscle and nerve fibers are being subjected to the same scrutiny by scientists. Nerve fibers have been found to be highly elasticconsiderably more so than muscle

"It may be that a great deal may be learned of cancer caused through such experiments. There are scientists who are working on the cells with

Says First League of Nations Was 546 B. C.

London. - Those concerned over placing the honor of having first conceived the idea of the League of Nations have been astonished by the suggestion of Prof. H. A. Giles of Cambridge, noted student of the culture and history of China, that China made an attempt to create such a league 546 years before Christ.

What is now China was then divided into a number of separate independent states, several of which were larger than France or Germany of today. A covenant was signed by representatives of various states with a view to putting an end to war but two states held out and the league failed. Three hundred years later the states were brought together by warlike methods under the Ch'in dynasty.

Bear Cubs in Virginia Sold at \$1 Per Pound

Luray, Va.-Bears have become so numerous in parts of Highland county -50 miles southwest of Luray-that cubs are being sold for \$1 per pound at Monterey, the county seat. Hunters a few days ago found a number of cubs at a point near where Augusta. Highland and Pendleton counties adjoin. The mother bear was routed, leaving her offspring.

After being captured the bears were placed "on bottles," drinking the milk with relish. They have become so docile that little girls fondle them in their laps. After being supplied with milk the cubs invariably drop into deep slumber. A few minutes that are allowed to extend over the stated hours for their meals bring sharp and ominous growls from the cubs.

****** Bering Sea Hero Has Merit for Auto Driver

New York .- Magistrate Giorgio in Ridgewood court fined Frank Roberts, a sailor, \$50 for having driven a car without a license. As Roberts had only \$25, he was about to go to jail, when he mentioned that the ship on which he served was the President Roosevelt.

"The one that rescued the Antinoe crew?" asked the court. Roberts admitted to being one of the heroic Roosevelt sailors. who later shook hands with the mayor and was many times decorated. The magistrate apologized for having previously held him. The fine was revoked and a suspended sentence sub-

Scientist Writes of

Progress of Evolution Man's ears are becoming smaller and his wisdom teeth are disappearing with the course of evolution. These signposts toward man's future are observed by Dr. Adolph H. Schultz, associate professor of physical anthro-

pology at Johns Hopkins medical

school, who is engaged in studies of

physical variation. The chief changes now taking place in man's anatomy are in those features which are being affected by evolution, Doctor Schultz finds. The troublesome last molars, commonly known as the wisdom teeth, are tending to disappear entirely, not merely in man, but in most mammals, said Doctor Schultz. And the structure of these teeth varies greatly in different indi-

He has also observed that the ears of man and the orangutan are much smaller than the ears of other primates, and that there is greater variation in the size of the ears of man, both before and after birth, than in most of man's other features. From this he concludes that there must be an evolutionary tendency toward a decrease in the size of the ear. Even ears on the same head are frequently of different sizes, measurements show

Doctor Schultz's sudies also indicate that it is heredity, not environment, which has the greater effect on the variability of physical structure. As a result of his studies in the relation of these variations in physical structure to evolution, Doctor Schultz Pays, "Variability is certainly connected with, if not responsible for, evolution,"-Kansas City Star.

The New Comet

The discovery of a new comet by a Pretoria amateur astronomer, Mr. G. E. Ensor, who is the X-ray specialist in the Pretoria hospital, has been confirmed by the astronomers of the Johannesburg observatory. During the past year Mr. Ensor has been making regular observations on behalf of the South African Astronomical association and made the discovery.

The comet is approaching the sun and at present is midway between the Magellanic clouds and the white star Anchenor. It is estimated that the comet will pass the sun at a distance of 30,000,000 miles and will probably become visible to the naked eye in the latter part of February. At present it is easily seen through small

Musical Saw's Origin

Both in America and in Europe the "musical saw" is the latest popular fancy of the jazz orchestras. The idea of extracting music from such a harsh medium as an ordinary wood saw is said to have originated over thirty years ago in Argentina. There a drunken violinist playing in a lumbermen's camp stupidly selected a saw and, placing the handle under his chin, drew his bow across its smooth edge. Muddle-headed as he was, he was sober enough to appreciate that the freak instrument possessed deflnite musical properties. Recently the idea has been revived and now it is not uncommon for musicians of high reputation to demonstrate their genius by playing on the "musical saw."

Doug's First Speech

Douglas Fairbanks, who was a schoolboy in Denver, so persisted in his appeals for a position in Warde's company that the actor was finally persuaded to give him a chance in one of the Shakespearean plays. He was one of the guards of a funeral procession, and his line was, "Stand aside and let the coffin pass."

For days Fairbanks recited the line, giving it every possible inflection, and embellishing it with gestures.

When the "big night" came, however, and Douglas got his cue, he sputtered and stammered a few times, then blurted out in commanding tones: "Stand aside and let the parson

cough!"-Youngstown Telegram.

Inventions by Women

Among the patents taken out by English women during the last year is a tray on which to stand perambulators in order to prevent water from dripping off the wheels to the floor. There is also a device for mashing potatoes in an easy and convenient way. There are besides a continuously acting candle-making machine, a device for the inside of gas ovens which can be easily and quickly cleaned, a scooter propelled by the weight of the body and a device for automatically cutting off the gas when the flame is accidentally blown out. Necessity in England is the mother of some inventions.

Big Time

Little Billy Kent, tiny movie actor, went to a big party Christmas day, at which he was the guest of honor. Everything came Billy's way, and his small stomach was tested to capacity. A few days later, a small friend said enviously:

"Gee, that was an awful big party you went to. I bet you had a good

"You bet I did," agreed Billy. "I ain't hungry yet."-Los Angeles

Giant Electrical Machine

An electrical company in Philadelphia received an order to build a frequency charger weighing more than 600 tons, which will be the largest piece of electrical machinery designed. Eight large oil breakers with a 73,000volt capacity of 1,500,000 kilovolt amperes is included in the order.

Immediate Ignition Maximum Mileage Plentiful Power

No other motor fuel offers as much real value for every gallon used.

It is socially proper as well as businesslike to use printed stationery. It is also
economical and apt to result in having paper and envelopes en hand, when needed
We have filled hundreds of orders received
by mail for our \$1.00 offer, and have not
had a single complaint.

200 sheets Hammermill Bond paper,
5½x8½ unruled, padded on request, with
100 size 6¼ envelopes to match.
Priated either in dark blue, or black.
Not over 4 lines neat type, the same form
on both paper and envelopes Envelopes
printed on back or front. Unless other
wise directed, orders for ladies will be
printed on back, and for gentlemen, on
front.

Instead of name, an Old English little

front.

Instead of name. an Old English initial letter can be used, if desired. Initial stationery should have a box number, or street address.

When desired, ruled paper will be furnished (167 sheets) with 100 size 6½ envelopes.

velopes.
We do not print envelopes alone, or paper alone, at 50c.
Cash with order, when sent by mail.
Write instructions, and copy for the printing, very plainly. When mailed to 3rd and 4th. Zones, add 5c; to 5th. Zone, or further, add 10c.

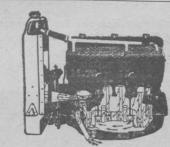

THE CARROLL RECORD CO., TANEYTOWN, MD.

NOTICE TO CREDITORS. This is to give notice that the subscribers has obtained from the Orphans' Court of Carroll County, the last will and testament upon the estate of

ROBERT A. HARNER, late of Carroll County, deceased. All persons having claims against the deceased, are hereby warned to exhibit the same, with the vouchers properly authenticated, to the subscribers, on or before the 29th. day of April, 1927; they may otherwise by law be excluded from all benefit of said estate.

Given under our hands this 1st. day of October, 1926.

FRANKLIN G. HARNER, EDWARD WENSHHOF, Executors.

The Buick Vacuum Ventilator pulls noxious engine vapors out of the crankcase.

New luxury is added to Buick ownership by this remarkable device. It keeps the air inside the car free from disagreeable engine fumes.

And it prevents dilution of crankcase oil.

Every Buick model has the Vacuum Ventilator, and many other vital improvements.

CARROLL RECORD

The Bankert Brothers canning factory closed on Friday, for this season.

Miss Helen Roop, of the Women's Hospital, Baltimore, spent Sunday in town with friends.

Miss Jane Dern, of Hagerstown, was the guest of Mrs. Mary Stover, on Tuesday afternoon.

Mrs. Clara Bricker and Mrs. Daniel Crabbs, spent the week-end in Baltimore, with relatives.

Norman Baumgardner and wife, Mrs. G. Walter Wilt and Miss Mary Fringer, were visitors at the Sesqui, this week.

Mr. and Mrs. Fern Weaver and children, of Baltimore, spent Sunday with the former's mother, Mrs. Nettie

Rev. William Hess and wife, of Hagerstown, spent several days this week, with George W. Hess and wife, near Harney. They are still playing baseball now

in Adams County, and at McSherrystown-perhaps trying to develop another Sherdel? Mr. and Mrs. Harry Reindollar and

family, Wallace and Mary Reindollar, spent Sunday in Baltimore, with Miss Nannie Buffington.

Mrs. Jesse Myers and family, entertained to dinner on Sunday, Miss Anna Null, of Hanover, Mr. and Mrs. Hubert J. Null and Paul Angell, of near town.

Mr. and Mrs. Clarence LeGore and Mr. and Mrs. Mahlon Brown, of near town, visited Mr. and Mrs. Charles W. Koontz and family, at Silver Run,

Just one more reminder about engraved Christmas Cards! We are taking orders for lots of 25 and more, printed with name of sender. Order now, if interested.

The season has so far advanced that it is a sure thing a considerable acreage of wheat in this section will not be sown, due to recent rains following a wet September.

Mrs. Martha Fringer visited the Britt family and Miss Savilla Humbert, in Chicago, on her way home from Oregon, and found them all well, and glad to see a Taneytowner.

Oliver E. Lambert has purchased a property on Carroll Street, in Westminster, and expects to remove to it with his family some time late this year, after having sale of farm personal property.

Mr. and Mrs. Walter Crapster spent from Thursday until Sunday with friends in Philadelphia, and attended the Sesqui-Centennial, also the 6th. annual Military Police banquet, held at Kuglers Hotel, on Oct. 16.

So far as we know, there is no applicant for appointment as J. P., in Taneytown. Men who are competent for such a job, are hard to get, and there is not enough pay connected with the office to make it attractive.

A double birthday dinner was given at the home of Mr. and Mrs. Raymond J. Ohler, on Sunday, October 17, in honor of Mrs. Samuel Null and her great-grand-daughter, Miss Virginia Ohler. Mrs. Null is eighty-one years old and Miss Ohler is ten years old. There were thirty-four guests

Every now and then a "new one" in the application of the English language, comes along. The latest appears in a big real estate poster advertisement printed in red ink, announcing the sale of the "newest edition" to-a well known town. On a guess, we should say the job was produced in Baltimore.

Two expert "radio trouble" finders were sent to Taneytown, last Friday, by the Potomac-Edison Co. They found the trouble-plenty of it-and located its origin. With the facts in hand, the Company will no doubt proceed to make the necessary improvements in the handling of the current, which seems to be too heavy for the equipment. We will be interested in watching results.

Light users are still wondering about the activity of their meters, last month, and some are suspicious that the meter tester who was here recently "did something" to them that was not to their interest. The bills for this month will be examined pretty closely, and if they are still so high, action of some sort, in the way of investigation, will be taken. The jumps in many cases, were not small, but very large. The street lights, also, are still weak.

Rev. and Mrs. W. V. Garrett, spent the week in Philadelphia.

Dahlia growths are very profuse and handsome, this year, and Mrs. C. W. Winemiller has left some specimens at our office that are perfect.

Mr. and Mrs. R. H. Alexander, have returned home, after spending several days in Philadelphia, visiting the

Mr. and Mrs. Samuel Stover and Miss Dorothy Eyler, visited Dr. and Mrs. C. L. Nuckols, at Baltimore, on

A special meeting of the Interstate Dairymen's Association will be held in the Firemen's building, Tuesday evening, October 26, at 8 o'clock.

Do not forget the meeting of the Parent-Teachers' Association, Monday evening. There will be an interesting meeting, and afterwards a reception for the teachers. Everyone welcome.

The following were visitors at the United Brethren Parsonage, Sunday: Mr. and Mrs. Frank Martin, Genevieve and Wilbur Martin, Mr . and Mrs. Alson S. Little, Francis Alson, Jr., and Robert Little, all of Waynesboro, Pa.

Those who spent the week-end with Mr. and Mrs. James Reir, of York, were: Mrs. Alma Newcomer and grand-daughter, Rosanna, Mr. and Mrs. Harry Koons, Mr. and Mrs. Leonard Hildgartner and daughters, Thelma and June, of Baltimore; Mr. and Mrs. Grier Keilholtz, and David Newcomer, spent Sunday at the same

The October issue of "The Flame," the present High School year's paper, is out. This venture of the students should be liberally supported, with cash subscriptions from the patrons of the school, and not let the entire burden rest on the business men to finance. The paper costs only 5c per month, or 50c a year. Show your interest in our excellent school, by helping the school monthly along!

Another Florida Storm.

Florida is presented with destructive storms, this year, the third one having reached Miami, and Key West, on Wednesday, from Cuba, causing a great amount of minor damage Florida, but was more severe in Cuba, where 20 are reported killed at Havana, many buildings destroyed, and shipping wrecked. Florida losses were largely to trees and temporary structures.

Beethoven in Film

Beethoven is to be brought before the eyes of living generations in a film which now is being prepared in and around Vienna. The master spent the greater part of his life in Austria, living in many houses in Vienna that still are standing. He composed for Vienna's churches, visited the homes of many of its noblemen, frequented its inns and taverns and spent his summer in many places nearby which are preserved in their former condition by admirers of the

How Paris Does It

This is the way Paris keeps her great vegetable market, Market Central, clean. Rubbish carts are stationed at each street intersection in the market area and when the market days are over the refuse is loaded into these carts. Then an electric tractor comes along and hauls these rubbish-ladened carts, in train formation, to the point where heavy trucks are waiting to carry the waste to the

LAST PAGE EDITORIAL.

Buying A Home.

Lots of people are not worrying over the question, likely because they consider other things of more importance—an automobile, for instance. And there are a good many who do not feel ready to do it, and many more think it cheaper to rent, than buy. But, it seems to us that at some time in life, everybody must want to belong somewhere, and not be subject to the uncertainties of renting, nor the annoyance of moving.

Owning a home, and especially bringing up children in a really owned home, ought to be more an object in life than it is. Of course, the question is debatable and there are many things to consider that do not come within the scope of this little come within the scope of this little 2 brood sows, will farrow in February; article, so we more especially want to 16 shoats, weighing, from 40 to 60 lbs. speak of "buying" a home—after one has decided to "own" one.

Having made the mind up to buy, the important time comes—the actual investment. Sometimes it appears that although the "making up" time was long, the buying time was too short. Getting the job over, as though it was something to be done quickly, is apt to be a mistake.

For instance, if one has lived, a long time at one place and removes to another-perhaps without being sure of how the change is going to turn out-it is unwise to buy, right away. Renting for a year or two until one gets his bearings, is apt to be wisest; for he may not like the changed location or business; and even if he does, he may later see how he could have settled himself down to

better advantage. Even when one does not buy out of community—say for instance when farmer buys a house in town-even then it is good business for the pur-chaser to ask town people about the property; just as it is good business for a town resident, when buying a farm, to ask creditable farmers in the community about a farm. There are often little objections to a property that are not widely known, and do not plainly show on the outside.

Of course, a prospective home should be thoroughly looked over, inside and out, from cellar to attic. very important consideration is the cellar, and whether the sills, foundations and drainage, are good. Needed repairs are an important consideration; also features connected with location, exposure to other buildings, the insurance rate and other things.

the insurance rate and other things.

Taxes, insurance, repairs, interest on the money invested—all of which counts as a rental to the home owner—should be gone into thoroughly. So, while home owning is very desirable for a long list of reasons, the buying of the home is a matter for very careof the home is a matter for very careful consideration.

The United States Army, during the past fiscal year, sold rags, rubber, tin cans, bottles, and other junk valued at more than a million dollars.

Work left not mentioned. TERMS CASH.

MRS. JAS. B. REAVER. 10-15-2t

ADVOCATE'S STATEMENT UNTRUE. AUDITOR WOODEN NAILS IT.

Westminster, Md., October 21st., 1926.

The following letter of Auditor Wooden proves that the statement of Mr. George E. Benson, a Democratic candidate for the office of County Commissioner, that when he ceased to be a County Commissioner in 1910 the county had no debt is not correct. In 1910 the county owed a debt for schools of \$22,000.00; \$6000.00 of which amount is still part of the county's indebtedness MR. WOODEN'S LETTER.

Baltimore, Md., Oct. 20th., 1926.

Mr. Charles W. Melville, President The County Commissioners of Carroll County,

Westminster, Md. My attention has been called to the advertisement appearing in the Democratic Advocate of October 15th., 1926, which purports to show the financial condition of Carroll County for the years 1917 to 1926 inclusive, which

advertisement states that the 1926 figures were taken from my report of

Published by authority of

Republican County Central Committee,

John H. Cunningham, Treasurer.

This statement on the part of those responsible for the advertisement is incorrect, as I have not yet submitted my report. I have, however, submitted to you by letter a Preliminary Statement of certain liabilities, but the figures used in the advertisement are not in accordance with the letter submitted to you, and from the information in my possession I can say definitely that these figures are not correct.

The advertisement states that for the years 1918, 1919 and 1920, the county did not have any debt. This statement is incorrect as there has been outstanding since 1900 a school bond issue, a portion of which is still unpaid. I will endeavor to complete the audit as soon as possible, and send you a

complete report, so that the correct figures will be available to anyone who is entitled to same. Very Truly Yours

ERNEST E. WOODEN,

Certified Public Accountant, Member American Institute of Accounts.

The undersigned intending to quit arming, will offer at public sale on his arm, 3 miles north of Taneytown, near fainut Grove School-house, on

6 HEAD OF HORSES AND MULES. 1 pair roan mules, 10 years old, one an extra leader, the other one an offside worker; one bay horse, 7 years old, an extra good saddle and lead horse; 1 black mare, 14 years old, offside worker. These horses are all fearless of road objects; one black colt, 3 years old; one black colt, 2 years old

Guernsey and Durhams; 5 will be fresh by day of sale; 3 Spring cows; one white heifer and 1 registered Guernsey bull.

SPECIAL NOTICE TO VOTERS.

As it will be impossible for me to see all my friends before the election, Tuesday, November 2nd. I ask of them their support and vote at the coming election, which I will appre-ciate very much. Thanking you in advance,

I am respectfully, C. RAY BARNES.

Delegates, of Franklin District. 10-22-2t

Taneytown Grain and Hay Market.

HARD TO BREAK.

A friend of ours who married a telephone operator was told by the nurse that his wife had presented him with twins. "Still giving me the wrong number," he exclaimed. Hab-

its are hard to break. If you'll get the habit of dropping Republican Candidate for House of around to see us whenever you want the best market can offer in green vegetables or fresh fish, you'll find you don't WANT to break it. When you buy here you can be sure of the same high-grade quality at all times.
