TANEYTOWN, MARYLAND, FRIDAY, JUNE 29, 1928.

REV. AND MRS. GARRETT LEAVE WOMENS SHORT COURSE AT COLLEGE PARK.

Home-makers Clubs of the State Sixth Annual Meeting.

More than six hundred rural women 464 of whom were registered for the entire week, attended the 6th. annual Rural Women's Short Course at the Rural Women's Short Course at the University of Maryland, June 18 to 23. Seventy-one Carroll County wo-men, representing sixteen of the Home-makers' Clubs in the county, were in attendance. New Windsor, Westminster, Taneytown, and Myers, Home-makers' Clubs, had the largest delegations from Carroll County

delegations from Carroll County. In spite of the disagreeable weath-er, forty-five women from the Win-field, Manchester and Hampstead Clubs attended the Home-makers' day program on Tuesday, June 19. The two dollar dress review was one of two dollar dress review was one of the special features for the day. Car-roll County was one of the fifteen counties who had three representa-tives in the review. More than 1100 dresses had been made in the Two Dollar Dress Contests in the State and those shown represented the best

from the group. Another interesting feature of Home-makers' Day was the reports of the county groups. Repesentatives fom each county gave reports of the Extension work as carried on by the Extension work as carried on by the Home-makers' Clubs in the various counties. Demonstrations and lectures were given during the week in foods, clothing, household manage-ment, house furnishings, landscape gardening, home dairying, poultry, health, parliamentary law and citi-zenship. In addition to this, special lectures and demonstrations were given. Dr. Esther Richards, Johns Hopkins University and Mrs. Evelyn Tobey, Columbia University, were auong the lecturers for the week.

One of the outstanding features of the week was the special exercises on Thursday morning when the title of Inursday morning when the title of Master Farm Home-makers' was con-ferred on three rural women, Mrs. Annette W. Smith, Westminster;Mrs. Chester R. Hobbs, Mt. Airy; and Mrs. L. A. Sutton, Chestertown. They had been nominated for the honor by five of their paciethers and wors for the top of their neighbors and were finally selected by a committee on the basis of their answers to more than five hun-dred questions. The title was con-ferred by the Farmers Wife, a national Farm Women's Magazine, in co-op-eration with the Extension Service of the University of Maryland. Miss Lenore Dunningan, representing the Farmers' Wife, presented gold pins emblematic of the honor. Following the presentation, the Farmer's Wife entertained at luncheon, in honor of the three women, thirty guests among whom were Dr. R. A. Pearson, Presi-dent of the University of Maryland, Dr. T. B. Symons, Extension Director, and Miss V. M. Kellar, State Home Demonstration A gent Demonstration Agent. Special exercises were held in the Ritchie Gymnasium Friday, June 22, for the 54 women who received certi-ficates for their faithful attendance at the Short Course during four years Women from fifteen counties were awarded certificates in recognition of their interest and attendance; fifteen from Carroll, eleven from Frederick, six from Baltimore, four from Prince George, three each from Garrett, Howard, and Montgomery, two from Charles, and one each from Anne Arundel, Cecil, Dorchester, Kent, St. Mary's, Washington and Wicomico. Those from Carroll county receiv-ing certificates were: Mrs. Edna Hewitt, Woodbine; Mrs. Frank Switzer, Hampstead; Mrs. Asa Watkins, Mt Airy; Mrs. Howard Reck, Mt. Airy; Calvin Bankert, Union Mills; Mrs. Henry Willet, Westminster; Mrs. . W. Feeser, Silver Run; Mrs. Randall Spoerlein, New Windsor; Mrs. Paul Hull, Linwood; Mrs. V. C. Woodbridge, Sykesville; Mrs. Reuben Alexander, Taneytown; Mrs. James Snyder, Union Bridge; Mrs. Ralph Hull, Westminster; Mrs. J. Edgar Hull, Westminster; Mrs. Myers, Westminster; and Miss Addie Manahan, Westminster. There were many social events during the week, including a colonial party on Wednesday evening, June 20, when treasured costumes of a by-gone day were worn. The final event of the week was a sight-seeing trip to Washington. The trip included a visit to the National Museum, Freen Art Museum, National Zoological Park, Lincoln Memorial and a picnic in the evening at Hains Point. The Boys Independent Bank, Washington D. C., furnished the music for the evening.

For their New Home and Field of Labor, Steelton, Pa. Rev. W. V. Garrett preached his farewell to the Taneytown Lutheran congregation, Sunday morning and evening, before a packed auditorium that included numerous members of other denominations. He spoke feel-ingly of the loyal support that he and

Mrs. Garrett had received in the four years and three months of their la-bors in Taneytown; of the general fine attendance, and of the interest and attendance in the state of the state encouragement that had called forth their very best efforts.

On Monday night a congregational farewell social was held, accompanied with a program, as follows; prayer, by Rev. Geo. A. Brown, pastor of the U. B. Church; vocal solo, W. Wallace Reindollar; Hess Male Quartet; so-prano duet, Misses Leah K. Reindolprano duet, Misses Leah K. Kendol-lar and Elizabeth Wilt; address by Rev. George A. Brown; violin solo, Ira Snider; vocal solo, Miss Hazel Hess; a letter of regret was read from Rev. Guy P. Bready that another engagement prevented his presence; address by Rev. Thos. T. Brown pactor of Prephytavian church Brown, pastor of Presbyterian church.

Refreshments were served in the Sunday School rooms. Owing to the rainy evening and the bad condition of some of the roads, the attendance was not up to Taneytown standard, but considering the weather it was excellent; and for an occasion of the kind, was well carried out.

The family left for Steelton, on Tuesday, the moving of household ef-fects being made by large vans sent on from Steelton.

The Fishing Laws.

Open season on Bass and other fresh water fishes, except trout, above tidewater, July 1, to Nov. 30, both lowing budget of expenses. dates, inclusive.

It is a Floating Debt, outstanding penitentiary offense to use any dyna-mite in any of the waters of this State for the purpose of killing fish. Warrants, et Penalty \$100. to \$300. All owners of dams on any of the waters of this State are required to place and maintain at least one fish ladder so as to permit the fish free access up and down the stream.

COUNTY TAX RATE IS FIXED AT \$1.65.

Statement Explaining reasons for the Action of the Commissioners.

The County Commssioners of Car-roll County have made up the county's expense budget, and fixed the tax rate for the levy of 1928. It had been their hope and desire that the rate might be made lower than of 1927, and but for the expense of the primary election in May last and the coming Presidential election in November, the rate could be lowered. They might have decreased the rate by carrying over the county's floating debt, and continuing to pay interest thereon, but they did not deem this to be good business policy, and consequently provide in the levy for a suffi-cient sum to pay all indebtedness ex-cept the indebtedness for State road bonds, which will mature in future years.

The rate has, therefore been fixed at \$1.65 on real and personal property, the same rate as that of 1927. The basis for taxation of real and personal property is \$34,270,177.00, which at the rate of \$1.65 on the \$100 will produce a revenue of \$565,457.92. Secu-rities, \$3,532,742, at the rate of 30c will produce a revenue of \$10,598.22. Banks and Trust Companies, \$3,450,-928, at the rate of \$1.00, will produce a revenue of \$34,500.18. Corporations and stocks, \$3,300,543, at the rate of \$1.65, will produce a revenue of \$54,-458.95. Insurance companies, \$156,-790, at 30c will produce \$470.17. The total revenue from taxes will be the Annual Pensions \$ 2,000.00

Robert Galt and Daughter, Doris, are Drowned while on an Outing. Robert B. Galt, of Hanover, and

A DOUBLE TRAGEDY

his daughter, Doris Galt, were drowned in Brown's dam along the Cone-wago creek, last Sunday afternoon. The double fatality is most distressing, for all reasons, and has aroused the widest expressions of sympathy, even from hundreds who did not know the victims.

Mr. and Mrs. Galt, Mr. and Mrs. Mr. and Mrs. Galt, Mr. and Mrs. Herbert M. Sterner and daughters and a party of others including Mr. and Mrs. Denton Warehime and Mr. and Mrs. Walter Warehime, near Westminster, had attended a birthday dinner in honor of Herbert M. Stern-er, at the Hotel McAllister, Hanover, and after the dinner the narty motorand after the dinner the party motored to Sterner's cottage at the dam to spend the afternoon, Mr. and Mrs. Galt being accompanied by their three daughters, Helen, Doris and Eleanor. Shortly after their arrival Mary

Sterner, Helen and Doris Galt put on bathing suits and waded into the water and on a sandbar, and as they reached the middle of the stream the Galt sisters suddenly stepped off the bar into deep water, likely due to the

wearing away of the sand by the heavy rains and high water. All of the girls could swim, but in the suddenness of their drop into the water they cried out, and other cries for help were sounded. Mr. Galt at once rushed to their rescue into the water, though he had been called to that the children would be taken from the water in safety but he likely did not hear.

He was a good swimmer and had just reached his daughters who were being assisted out by Miss Sterner, when he was noticed to stop swimming and apparently collapsed, likely due to heart failure. A number of persons brought Mr. Galt and Helen to the bank, but in' the confusion Doris slipped under the water, and her body was later found a short dis-tance away. The water at the spot was about seven feet deep.

Strenuous efforts were made by the use of a pulmotor, for about three hours, to restore Mr. Galt but the ef-forts failed. There were no signs that he had been drowned, but that

death was due to a heart attack. Mr. Galt was in his 37th. year. He 0.00 0.00 was employed in the auditing department of the Hanover Shoe Co., for 0.00 about twelve years, and was most highly regarded by all who knew him for his sterling character and general high qualities. Doris was eleven 0.000.00 years old. He is survived by his wife, who was 0.00 8.00

Miss Mamie Warehime of near Westminster, and by two daughters, Helen and Eleanor; and by his mother, Mrs. Elizabeth (Reindollar) Galt, of Tan-0.00eytown, his father James B. Galt, having died some years ago. He was a faithful and active member of Em-manuel Reformed Church, Hanover. 0.00 00.0

The news of the sad event was 2,400.00 phoned to Taneytown, Sunday eve-3,000.00 ning and was a terrible shock to all

SMITH NOMINATED ON FIRST BALLOT.

Senator Robinson, of Arkansas, likely his running mate.

The Democratic National conven-tion was called to order at 1:00 P. M., at Houston (pronounced Huceton), Texas, on Tuesday. Only the barest preliminary formalities marked the session. There was an opening invocation, the Star Spangled Banner, America and Dixie were sung, the Mayor welcomed the convention to the city, and after a few other preliminaries the National Chairman, Clem Shaver, adjourned the body until evening

At the evening session, the tempor-ary chairman, Claude G. Bowers, took charge, and delivered the key-note address, which was quite lengthy and was received with many bursts of applause. Mainly, it was directed against the Republican party as a "party of

privilege and pillage." As no committees had been announced at the noon meeting, that was part of the program of the evening meeting; and as there could be no business without the committee reports, the session closed for the day. The evening audience was estimated at 18,000. The meeting was interfered with, somewhat, because of a very heavy rain, a very leaky roof and a defective lighting system, which dis-counted the otherwise fine points of the immense specially erected build-ing. During the day, the heat was intense but the rain at night brought

relief. On the meeting of the convention, Thursday noon, Senator Robinson, of Arkansas, took charge of the convention. Owing to the numerous spe-cial reports given by the daily papers and the mixing together of the afternoon and night sections, it is difficult to give in regular order the various events of the day in the order in which they occurred. Apparently, there were too many bands, and a great deal of turbulance, all meant to show enthusiasm, but they appear to have detracted some from a fully orderly convention. Senator Robinson's address,

in which he plead specially for religious freedom, was received with the wildest applause, except by a number of Southern delegations. He also warn-ed his party against controversy over prohibition which would destroy har-mony and divide the party. He also joined the temporary chairman,Claude Bowers, in accusing the Republican party of corruption.

The discussion over the prohibition plank was easily the most bitter of the convention, and even developed into fist fights, and personal clashes of various kinds, in which Senator Ty-dings, of Maryland was one of the dings, of Maryland was one of the active participants, growing out of statements made by Bishop Cannon in his address of the difference of Health, 16 West Saratoga Street, Baltimore, Md. his address on th

NO. 53

SUMMER CAMPS

How they Should be Operated for Public Health.

The Maryland State Department of Health is attempting to supervise all summer camps along her great sys-tem of highways and on her forest reserves for the protection of the traveling and camping public.

Regulations have been passed re-quiring the managers of camps to protect the water supplies from surface pollution. Adequate provision must be made for the proper disposal of sewage and garbage. Food served in these camps must be protected by screening, and perishable food must be kept iced at all times. It would be to the advantage of the camper be-fore pitching his tent for the night, to look about for a placard showing that the State Department of Health has inspected the premises and has approved the camp. This placard is usually posted in a conspicuous place and can be seen readily, as the man-ager of the camp will only be too glad to display this placard as an evidence of official sanction.

All persons who are operating camps in the State who have not received this approval should file their applications immediately. Permits will be issued by the Department at its offices, 16 West Saratoga Street, Baltimore, Md., when all the requirements of the State Board of Kealth have been met. For the information of the opera-

tors of camps it should be stated that any premises to be used for a camp for tourists or for vacation outings for a period of six days or longer, or which are used as picnic grounds, are subject to the State regulations.

Summer camps are at best only temporary institutions and even in those of more permanent character the accomplishment of effective sanitary protection is more difficult than in a well organized municipality. Summer camps are not synonymous with better health as is popularly believed. The healthfulness of camps is dependent on sanitary protection and this should be handled by the camp management. Camps are under the direction of the County or Douty State Health Officer. Complaints of insanitary conditions should be made to the resident health officer of the county or district in which the camp is located. Prompt attention will be paid to such complaints if they reach the office of the State Department of Health.

The State Department of Health furnishes drawings of proper appli-ances for the disposal of sewage, for the construction of garbage disposal systems, and for the protection of water ter supplies. Valuable information will also be

supplied concerning proper methods of handling milk and taking care of other food supplies.

All communications concerning

A New Feature.

"The Little Band Wagon Journeys' begin in this issue. They represent short reviews of the main features connected with all of the Presidential elections ever held in the United States. They will be decidedly worth reading, especially by those interested in the political history of this country. We shall run the instalments two at time

State Road Fund Shortage.

The investigation of Maryland's road fund plundering is likely progressing, though no information is being given to the public. At last report the deficit was \$127,000, with a special committee appointed by Governor in charge. As the scandal was first uncovered last February, it would seem that ample time had passed for the affair to be brought to absolutely free; but light refreshments, like ice cream cones or pop, would be an end.

Balt.-Washington Boulevard to be Widened.

The Baltimore-Washington boulevard is to be widened from twenty feet to forty feet, the work to begin at once. It will be done in sectional units, the first being three and sevententh miles from Laurel towards Baltimore, the contract for which has been awarded to Thomas, Bennett & Hunter, of Westminster, at their bid of \$85.270.

The widening will be done by building a concrete strip ten feet wide on each side, and during the widening the centre strip will be left open for traffic.

Gifts for Johns Hopkins.

Johns Hopkins University has re ceived an anonymous gift of a half million dollars to complete the endowment of the Welch Medical Library.

This and other gifts were announc ed at the commencement exercises on June 12. Among the other gifts were \$30,000 for the study of otology, \$5,000 for a Greek scholarship, \$1700 a year for four years for the study of bio-chemistry, \$1,000 for study of neurology, \$3,000 for study in larynology, \$7,500 for study in electrical the amounts granted; A-General engineering, \$1,500 a year for three office expenses, \$1200.00; printing years for study in psychiatry and and advertising \$1000.00; \$3,800 a year for two years study in and legal services, \$500.00; Board pediatrics

THE SCHOOL BUDGET.

In the school budget handed the County Commissioners, the Board of Education estimated that the total sum required for the operation of the schools in 1928-29 is the sum of \$439, 883.78; of which the amount is estimated that \$115,009.47 would be re-ceived from the State and other sources, and \$324,874.31 requested from the county.

Of this amount asked from the county, the County Commissioners allowed all such items as are mandatory, such as costs of control, teachers salaries, supervision, etc. making only such curtailments or disallow ances in other askings as it is hoped will not seriously embarras the op-eration of the schools during the coming year. Instead of the \$324,874.31 asked, the sum of \$306,342.04 is al lowed. As over against this amount however, there must be allowed estimated receipts by the Board of Education from other sources; colored industrial fund, \$1500.00; vocational \$3025.00; equalization education, fund, \$19000.00; tuition from other counties, \$5000.00; total \$28,525.00; leaving the amount to be levied for school purposes \$277,817.04; requiring a levy of taxes at the rate of .816 per \$100 on all real and personal prop erty for school purposes

The amounts asked and granted are as follows; the first figures being the amounts asked, and the second auditing (Continued on Fifth Page.)

300.00 his friends and relatives, and indescribably so to Mr. Galt's mother, who was at once taken to the stricken home.

Funeral services for the two were held on Wednesday afternoon, at 1:30 at the home, in charge of Rev. Dr. Henry I. Stahr, pastor of the family, burial being made at Krider's cemetery, near Westminster. Masonic services were conducted at the grave

Crops Damaged by Rain.

Reports from Chicago are pessimistic over the continued heavy rains that have been general over most of the U. S. east of the Rockies. One third of the crop in Kansas and other great wheat states is waiting to be cut and the balance will soon be ready. The situation, there and here, acutely serious and requires clear drying weather at once, if wide loss to crops is to be escaped. The outlook has already been sufficient to affect the Chicago markets.

Here in Maryland the daily heavy rains have already, caused great loss to farmers, especially to the pea crop, part of which it was next to impossi ole to harvest, and much of which was lost because of the vines being beaten to the ground, the result being that

Corn fields are also in a bad way from washing, and the ground in many places is so saturated that many spots will be a total loss. Besides, hay-making, wheat harvest and corn cultivation are now all in order at one time, and even with favorable weather, crops are apt to be badly

The wheat crop especially can hardly be expected to fill and mature perfectly; and hay-making will be difficult because of the excessive rains that are bound to prevent perfect cur-

In some sections heavy falls of hail have added to the losses sustained, notably in West Virginia, where wheat, corn and grass fields were ruined, and fruit trees stripped.

General conditions have materially improved during the last few days. and hope is strong that with fair and warm weather, the conditions of the first of the week may be materially overcome.

losers certainly wasn't talking about weight.

Still a Prohibitionist. (Head-line) Well, there are stills that have done more to induce people to stop trying to drink liquor than almost any other agency one might mention .-- Nashville Banner.

(At some future time, The Record

will give in substance, the planks of both Democratic and Republican parties, relating to prohibition and farm relief)

At the night session, on the roll call of the states, Representative Crisp, of Georgia, put into nomina-tion Senator Walter J. George, of Georgia, as one who is in favor of the 18th. Amendment. This started a demonstration that lasted for fifteen minutes, and was chiefly participated in by five southern states, and several clashes occurred between rival enthusiasts.

When Franklin D. Roosevelt, New York, placed Governor Smith.of New York, in nomination, in a lengthy speech, the big demonstration of the convention occurred. It was simply indescribable, and if the slightest doubt of his being chosen as the party's standard bearer had remained, it was swept away.

On Thursday, at the opening of the session for the day, Mr. Howell, of Missouri, presented Senator James A. Reed, of Missouri, while there were only three states and a few scattering delegates entering into the demonstration that followed the address they managed to keep it up for 25 minutes.

Mr. O'Sullivan. of Nebraska. nom inated Gilbert N. Hitchcock of that state. Other nomination's were; Evans Woollen. Indiana: W. M. Ayers, Kansas; Cordell Hull, Tenn.; Senator Homerene, Ohio; Jesse H. Jones, Texas; Huston Thomson, Colorado. Before balloting the convention

adopted the platform calling for enforcement of the 18th. Amendment, and a pledge for farm relief.

At a late hour the convention bal loted for presidential nominee and Governor Smith was named on the first ballot, easily receiving a two-thirds vote, but the morning papers do not contain the figures. In all probability. Senator Robinson, of Arkansas, will be nominated for vicepresident.

Convention leaders made no effort to restrain their speakers or to enforce any limitation on the time they consumed, for the simple reason that these speakers were used to divert the delegates while the platform makers struggled to compose their differ. ences and to avoid a fight upon the floor of the convention.

Only one of the innumerable speeches really reached its audience. This was delivered by former Senator Thomas Gore, of Oklahoma, the first blind man to be elected to the Senate. He was recognized to second the nom ination of Senator Reed and for ten minutes he kept the convention in a state of hilarity with his running fire of barbs directed at the Republicans. fragile.

Moravian Society Meeting.

(For the Record.)

The young girls society of the Graceham Moravian Church wer visitors at Mr. and Mrs. Jas. Bentz' near Emmitsburg. of which Mr Bentz was one of the members of the society. The visitors were: Mr. at Mrs. Edgar Stonesifer, Mrs. Bende, Mrs. Charley Bentz, Edith, Marti, Rea Martin, Beulah Martin, Edits Crawford, Catherine Smith, Lott Dewees, Catherine Dewees, Lulu Mi ler, Mabel Arbaugh. Mildred Savlor, Dorothy and Ethel Remsburg, Helen Stonesifer, Marian Bentz, Lloyd Grushon, Arthur Miller, Harry Say-Lloyd lor, Mr. and Mrs. Allen Bentz and son, Mr. and Mrs. Bernard Bentz.

They had a nice evening. Games were played, refreshments were served, and useful presents were received.

Reformed Reunion July 19th.

The thirty-ninth annual Reformed eunion will take place at Pen-Mar on Thursday, July 19, when members of the Reformed churches of Maryland. Pennsylvania, Virginia, West Virgi-nia and the District of Columbia will meet

The program which will start at 1:30 P. M., is featured by an address by the Rev. Dr. George W. Richards, president of the Theological Seminary, at Lancaster. The choir of the Evangelical Reformed Church, Frederick, directed by Mrs. Maud Waters Dittmar, will Schubert's "Holy Lord, Most High" in observance of the 100th. anniversary of the death of Franz Schubert.

The Record's New Year.

With this issue, The Carroll Record commences its 35th. year, under the present Editor-Managership. Looking backward, and feeling the weight of hard work and effort that has accompanied all of the years gone by, it is now most natural for the writer to feel tired, and to want to take up an easier job-or what we hope is a deserved rest.

The job is becoming more difficult every year, largely because of the aggressive encroachments of daily papers; but it is altogether worth while. It is part of the fight to preserve strong local enterprises against the greedy aims of "big business" that would make small towns but dots on the map, and mere feeders of the cities and large towns. It is part of the resistance to the trend of things generally toward monopoly -resistance to the efforts of big fish to eat the little ones.

The country newspaper publisher not only has his fight to put up against such encroachments, but it must be said that it is also a fight made more difficult because the very community and individual interest that he tries to serve, are in part directed against his best efforts-a mistaken opposition as we think.

The country newspaper is as necessary in a community as the country church. In differing ways, both are preachers of righteousness-or should be-and both represent forces for the advancement and general betterment of their fields, and act as protective and enlightening agencies.

The local newspaper is also as beneficial in many ways as the local school; and the job printing facilities, and local advertising opportunities presented, are such as can never be supplied by any other agency-and without them, a town and community are seriously handicapped.

And, it is reflections such as these

ed of "horrible examples," are the more money per year than those who pay taxes. most likely not to see that the garments fit themselves.

Mostly, it is the timid, oversensitive, or chip-on-the-shoulder classes, who let their imaginations, suggest that they are the forms intended to be dressed, while as a matter of fact the dresser had only a type of individual in mind, and not the slightest thought of the one who imagines himself the special victim.

The "4th." Just One Holiday.

The multiplication of legal holidays has helped to make July 4th., just one of them, and little more. The situation has the effect of something like "supply and demand"-the increase of the "supply" lessens the quality of the "demand."

Even the small boy, and the boy of older growth, indulges less in fireworks and noise than in former times, which is a distinct advantage growing out of the minimizing of the importance of the day; and the display of flags and the parades are distinctly less in evidence.

In the country sections there was a time when the coming of "the 4th." in the midst of the grain harvest was regarded almost a calamity, for there was always some big community event that all wanted to attend, and some positively would not work on the big holiday, nor matter how urgent the demands of the harvest work might be.

But, time changes many things; and while the significance of "the 4th." must always remain an American treasure, it is just as well that we do not actually flaunt it as we once did, but realize that we live in the age of letting bygones peacefully rest, and should bend our energies toward meeting the significant issues of the present.

Light on Farmer Problems.

At least one item contained in the suggestions of the Assistant Secretary of Agriculture, in his article on the "ills of Agriculture" in our issue of last week, is highly practical as well as new to most people. At least, we do not recall ever having heard it advanced before-to cease opening new land for agriculture, by government reclamation projects, by which the water is drained off swamp lands, and water carried to arid lands by irrigation, thereby bringing many thousands of new acres of land under cultivation.

This is practical good sense, and apparently represents governmental folly in continuing to produce more acres of farm land when we already have too many now, merely for the profit of the few.

At this particular crisis in the farming industry, the reclamation of farm land should be limited wholly to private efforts, and should not be retained as a governmental policy until

Tardy Tribute Paid

A great many salaried representatives, agents, salesmen, office help, teachers, and even mechanics, are in this big class, and in justice to all, they should bear their share of the tax burden and help to equalize it.

Those who pay little or no taxes, are those who get the most out of the public properties that cost the big money that calls for the high taxes. Schools and roads are prominent examples of this fact; and there are thousands of persons in each county, perhaps, who earn anywhere from \$800. to several thousands of dollars a year, who do not pay even a small amount of taxes. Commenting on this idea, an arti-

cle in the United States Daily, says: "In the strongly industrial States

there seem to be possibilities of relieving other sources of taxation by placing more of the tax burden di rectly on income. This is of particu-lar importance in view of the decreases in the rates of the Federal ncome tax in recent years and of the further decreases that may be expected in the future as the war debt of the Federal Government is retired.

In those States in which agriculture is the predominant industry an income tax can not, except at exces sive rates, yield returns that would make possible great reduction in the burden on general property. But even in these States such a tax, with moderate rates, could be made to yield a sufficient return to reduce somewhat the direct burden on real estate and would have the advantage of making a portion of the tax system more directly responsive to

changes in ability to pay taxes. It is believed that so far as a rea-sonable income tax is concerned—and certainly none of the State systems in effect at present can be called unrea-sonable—the use of such a tax will make the State's revenue system more equitable for all groups. Its introduction may, however, have a temporary adverse effect upon industrial development if the tax is imposed before opinion becomes sufficiently informed to appreciate its fairness. The varying laws of our different States also make evasion of an income tax possible and probable if the tax is prematurely introduced. The State income tax should in all cases be preceded by extensive educational work."

Political Diet.

From now until November 6 the people of the United States will be surfeited with a political diet which will mean politics for breakfast, politics for lunch, politics for dinner and then go to bed and dream politics. Politics contains all the vitamins, proteins, fats, leans, sugars, and salts necessary for a patriot's health. Much of politics, however, is taken with a grain of salt. But on the whole the diet is wholesome and even as

"shady" as political action sometimes appears, there is much of it that is constructive and good.

It is our humble belief that if all the good in government were balanced against the bad or corrupt, the good would tip the scales sooner than the bad. If politics is crooked, the

to Unknown Teacher

I sing the praise of the unknown teacher. Great generals win campaigns, but it is the unknown soldier who wins the war. Famous educators plan new systems of pedagogy, but it is the unknown teacher who delivers and guides the young. For him no trumpets blare, no. chariots wait, no golden decorations are decreed. He keeps the watch along the borders of darkness and makes the attack on the trenches of ignorance and folly. Patient in his daily duty, he strives to conquer the evil powers which are the enemies of youth. He awakens sleeping spirits. He quickens the indolent, encourages the eager and steadies the unstable. He communicates his own joy in learning and shares with boys and girls the best treasures of his mind. He lights many candles which, in later years, will shine back to cheer him. This is his reward. Knowledge may be gained from books; but the love of knowledge is transmitted only by personal contact. No one has deserved better of the republic than the unknown teacher.-Henry Van Dyke.

Wife Impressed by

Force of "Argument" One day a rough-looking Slovak laborer accompanied by his rotund wife visited a second-hand clothing store in New York. The woman was looking for a plush coat. She had evidently dragged her husband from one store to another. The woman tried on one coat after another. She could not be suited. The man, losing all patience, picked up one at random, and said: "I like."

The woman shook her head, saying: "I no like."

But the man handed the garment to the woman, repeating: "I like."

"I no like," insisted his better half. And so the debate continued. Finally the sturdy foreigner drew back his open palm and slapped his wife with a violence that knocked her down. The woman slowly rose to her feet,

reached for the coat, turned to her husband, and said:

Impolite

A little girl lives near a dog which is loved and cared for by a childless woman. The owner of the dog came to call on the little girl's mother.

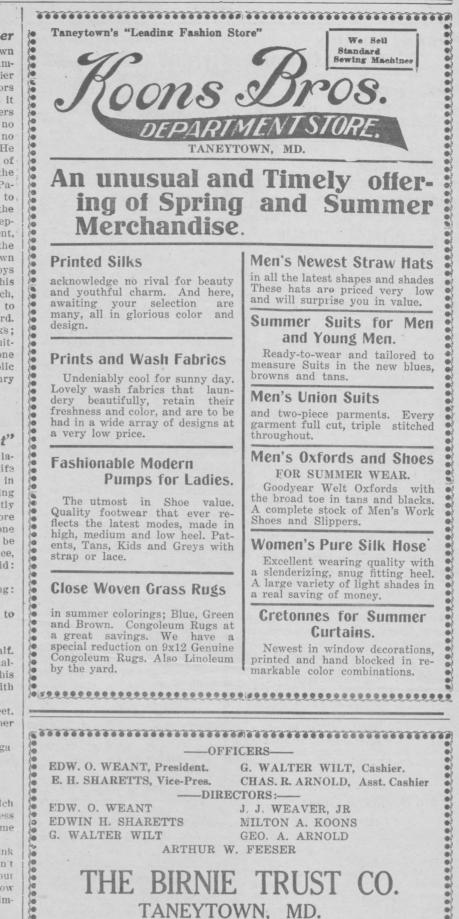

"Mrs. Blank," she said, "I think Mary is changing so much. I don't want to have any hard feelings, but I really thought you ought to know that I overheard her being very impolite."

"Sure, I want to know, and thank you for calling my attention to the matter. I shall speak to Mary about it What did Mary say?" asked the agitated mother.

"My dog was out in front as she went to school and she said, 'You dirty cur, don't you dare touch me.""

Saturday as a Holiday

Miss Freygang of the New York city department of education, says: "It is my understanding that the Saturday holiday never began in the cities, but in the rural sections of country. It is my understanding that it originated in the Colonial days, when there were very few Jews in the community. I believe Saturday began as a holiday in schools because the children on the farms had to help with the work, so that Sunday might be observed by the family. They had to bring in provisions for the Sabbath and help in the home so that they might start out to the nearest church which was usually miles away."

ON THE HONOR ROLL OF BANKS

The Open Door

China needs the "Open Door" so that all nations may trade with her on an equalfooting. It is a good policy.

This Bank of ours always has this policy of the open door to everybody in this community. All are given the same courteous treatment. The size of the account is not

"Me like, too!"-Pathfinder Maga zine.

that help to make the Editor-Manager's job harder, and to bring to the front that "what's the use" feeling, or that other one that no one wants to admit-the arrival of another backumber-perhaps unnecessarily hast-

Especially in writing, or public speaking, it is difficult to generalize without first specializing. We mean this. In writing a story and picturing characters in it, it is usually the case that the writer is describing certain persons that he, or she, personally knows. In describing localities or certain scenic effects, one can best do this by having definitely in mind, actual copies of the scenes staged.

So, when we come to writing character sketches, while always intended to be general in application, we are quite apt to have before us one or more actual persons who pose as our models.

Really, this is writing from experience and observation, which is the only way to write truthfully. While we sometimes think that characterizations are overdrawn, we must allow for the bigness of the world that we do not know. Like the man who on his first sight of a graffe, exclaimed-"There ain't no such animal," we simply deny the existence of types of character for the reason that our intellectuality is not finely or widely enough adjusted to recognize the characters, when we have them right hefore us.

when we mean to be impersonal-we may "hit" an individual, when we mean only to "hit" a class of individstood, because just one person would hardly be worth the time and effort would be magnifying the importance that the cost of collection would be of himself, even as a mark.

or those who are intended to be warn- er sources of income, actually make

more land is needed for the profitable production of crops.

Another item, we think, is also new so far as the consideration of the general topic is concerned-that the displacement of millions of horses and mules has not only added to the acreage of farm products, but has cut off as well the revenue heretofore derived from the raising of animals for sale. There is possibly no remedy for this, but it at least helps to explain why there is too much overpro-

duction, and low prices. Still another important item is,

that taxes have increased-largely for schools and roads-just at the time when the farmers are the least able to pay them; and it may be added to this, that the cost of automobiles has greatly helped to take farmers money.

In general, the whole subject of farming depression is due to perfectly simple causes; once we find them out, and it is the sheerest folly to expect the government to cure the depression by any one act of legislation or price-fixing, or on any one or few public officials.

The legislation of states, the desires and habits of individuals, what we call "living up to the times," and the simple fact that production of crops is greater than the need for them, are all practical explanations.

State Income Taxes.

No doubt there will be considerable future agitation of the question of how to relieve farmers of a portion of their present taxation, and thereby So, we may be said to be personal, help to solve the difficulties attaching to the present unprofitableness of their occupation; and this agitation seems to have already commenced, in uals; and this should be easily under- the direction of state income taxes. The Record has frequently expressed the opinion that most people required to do him justice; and for should pay taxes, perhaps omitting one to think himself so singled out, only those who would pay so little

greater than the amount of the taxes; But, the pastime of writing-up but certainly including those who queer, or perhaps crooked, folks, own no real estate, and perhaps no rarely pays; for the simple reason personal property of value enough to that those intended to be dressed up, tax, yet who through salaries or oth-

most that can be said of it is that it is an institution of the people, by the people and because of the people. No man will ever admit that he is crooked. He will justify himself at least in his own mind and among certain of his friends. Besides, who is a politician? Is it only he who gains political preferment or public office, or does the appellation run down to the uttermost precinct?-Ellicott City Times.

Have to Sit and Watch

If you can have your short life and a merry one, and then be snuffed out suddenly while sleeping, without suffering, it wouldn't be so bad, so far as that is concerned, but it seldom works out that way. You have your short, merry life and then-pop! goes a kidney or your gall bladder or your stomach, and you spend what seems to be the longer part of your life ruminating ruefully, and not so merrily. It isn't so pleasant, after having indulged yourself without stint for a number of years, to sit by and see those around you enjoying their viands while you have to pass up everything except a piece of dry bread.-Physical Culture Magazine.

Vigornians and Others

The people of certain cities in England have curious names to describe themselves. Sometimes the name would not in the least suggest to a stranger the city to which it refers. For example, a native of Worcester is a Vigornian and a native of Barnstaple is a Barumnite. The people of Manchester, Liverpool and Glasgow are described respectively as Mancunians, Liverpudlians and Glaswegians. The natives of Plymouth hesitate between Plymouthians and Plymouthonians.

Our Rapid Age

"Is this a genuine antique?" "It is, madam," replied the dealer. "Why, here's a mark that indicates it was made less than twenty-five years ago."

"Oh-er-exactly. You must remember, madam, that we are living in a very rapid age. It doesn't take nearly as long to make an antique as it used to."

Literary Touch

Possibly it was the first breath of spring in the air that sent a certain unknown author skipping into the offices of Simple & Simons, book publishers.

"How long should a novel be?" asked the tyro of the first man he saw. It happened to be Mr. Simple. "There is no statutory limit," answered the latter.

But the would-be author pressed him for some suggestion, and the publisher finally admitted that most standard novels were about eighty thousand words long. "Thank heaven !" declared the oth-

"I've finished, then." er.

First Aid for Goldfish

The life of a goldfish was saved recently by artificial respiration similar to that used to revive human victims of drowning, asphysiation, or electric shock.

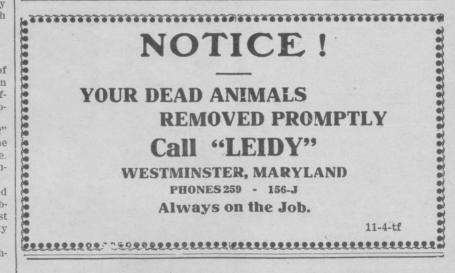

On returning to her home one evening a woman found one of her goldfish lying on the floor apparently dead. She held the fish under water with one hand and, grasping it with the other just behind the gills, applied intermittent relief pressure. After five minutes the fish showed signs of life, and at the end of twenty minutes it was swimming about quite normally.

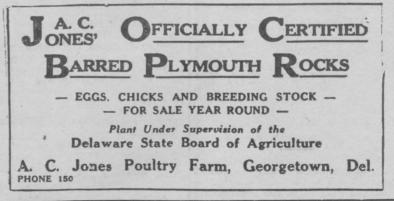

Obeying Orders

Mrs. O called Ruth from her play in the front room. Though Ruth was only three years old she knew that that call was the summons to dinner. She trotted into the dining room, clambered into her chair and prepared to eat. Mrs. O, wishing to teach Ruth good manners, said: "Now Ruth, let's bow our heads and say a little prayer."

Ruth folded her hands on the table, bowed her head, and said: "A little prayer."

same courteous treatment. The size of the account is not important. Our facilities are at your command. We can invite you—that's all. The rest is up to you. Ample se-curity and reliable service await you. Come. **Resources Over \$1,400,000.00.**

Foolish questions sometimes provoke

Gas Once a Curiosity

When the first gas lights were introduced in Baltimore, in 1816, they were placed on exhibit in the museum there and crowds paid admission to see them. Newspaper accounts de scribed them as marvelous "lights without oil, tallow, wick or smoke." The exhibit proved so successful that a gas company was formed the next year, and the streets of the city were soon lighted by the lamps. This was one of the first commercial installations in the United States .- Popular Mechanics Magazine.

PEAKS "SHRINK" AS FABLES FADE

1

Mounts Once Called Tallest, Far From It.

Jasper Park, Alberta .- Today it is a matter of common knowledge to every school child that the highest peak in America, excluding Alaska and the Yukon, is Mount Whitney, 14,501 feet in California.

Twenty years ago, when their elders were going to school, it was equally certain that the highest altitude on the continent was attained by either Mount Brown or Mount Hooker, high above Athabasca pass, in what today is Jasper National park, Alberta, but in what at that time was but a dimly known north country.

So much can fable do even for the height of a mountain. These twin peaks, which stood guard over the pass that was the gateway between the valleys of the Columbia river and the prairies to the east of the mountains, became endowed with marvelous proportions by the early travelers, unaccustomed to the spectacle of height, who passed beneath their shad-OWS.

David Thompson, noted explorer and geographer of the West, estimated their altitude to be about 18,000 feet. In 1836 James Renwick, professor of chemistry and physics at Columbia college, communicated his belief to Washington Irving, the writer, that these mountains compared in height with the Himalayas.

David Douglas, distinguished botanist from whom the Douglas fir of the western coast receives its name, when making the overland journey about 1825, placed the height of these peaks at close to 17,000 feet. He named them Hooker and Brown after two botanists he had admired.

And so the legend persisted until close on to 20 years ago. It was dissipated by expeditions taken by Prof. Coleman of Toronto, which settled the altitude at something close to that given by the interprovincial boundary survey in 1920, namely Mount Brown, 9,-156 feet; Mount Hooker, 10,872 feet. Man's zeal for precision had toppled another fond illusion persisting through the years.

Find Brains of Great

Like Those of Small Philadelphia .- The brains of the great do not vary so greatly from those of the small.

Post-mortem examination of the For instance, a Kentia three feet tall brains of G. Stanley Hall, eminent with five or six leaves should be in psychologist; Sir William Osler, for a six or seven-inch pot. Indications many years an outstanding figure in of good health are the dark green the field of medicine, and Edward S. color of the foliage and the fact that Morse, widely known naturalist and the new sword-like leaf, as it pushes zoologist, did not show striking variup from the center and unfolds, is ations from the normal, Dr. Henry H. larger than the one that precedes it. Donaldson of the Wistar Institute of A good, healthy plant should make Anatomy and Biology, told members two or three leaves a year; if the of the National Academy of Sciences newest leaf unfolds before attaining here. They were, however, slightly heavier than the brains of more near. sign of something wrong. The cause ly average individuals studied for comparison.

"The variations in the form of the convolutions," said Doctor Donaldson, "may mean something but they do not explain that for which explanation is sought, for in their fundamental structure human brains are remarkably alike, and the variations in the convolutions are incidental, as the several measurements show."

WHY_____

HOW=

CEREMONY OF SOUNDING

"TAPS" BECAME CUSTOM .-

"Taps" is the name of a military signal sounded in the evening by

drum, trumpet or bugle to an

nounce that it is time for sol-

diers to be in their quarters and

all lights extinguished. The

word is probably not related to

the plural of "tap," meaning the

simple act of tapping. It is

supposed to be derived from

"taptoo," the old signal that the

tap (tap-room or public house)

was to be closed for the night.

Apparently the call as now used

originated in the American

army. There is no similar call

in any other military organiza-

tion. Taps, like last post, is

also sounded over the grave of a

deceased soldier. Its exact ori-

gin in this connection is not

known. According to a popular

story, the custom originated in

1862 during the Peninsular cam-

paign in Virginia. A soldier in

Tidball's battery, it is said, was

buried when the battery occu-

pied an advanced position in a

clump of trees. To fire the ordi-

nary three rounds over the

grave would be unsafe. It oc-

curred to Captan Tidball that

sounding taps over the grave

would be an appropriate substi-

tute for the customary cere-

mony. The practice thus begun

spread through the Army of the

Potomac and was finally con-

firmed by general orders. This

story may be substantially true,

but it was not the origin of the

practice. Records of the War

department show that taps was

sounded over the graves of de-

ceased soldiers in some Ameri-

can regiments during the Mexi-

can war of 1846-47. There is a

tradition that the practice exist-

ed before the Mexican war and

that it was introduced at West

Point about 1840, although it did

not become general until after

the Civil war. It is not known

who composed the call .-- Path-

How to Keep Potted

Light Is Moving Force of **Migratory Birds**

Migratory birds, says a writer in Tycos, come and go with blind punctuality. They may be seen starting south in the heat of the dog days, and many a first robin arrives north in a blizzard, when by stopping 100 miles further south he could have had warm weather.

Recent discoveries by ornithologists show that it is not the weather which starts the birds on their travels, but the shortening of the hours of daylight.

Birds are very sensitive to light changes. They show restlessness at the first signs of dawn, and nest with the first coming of darkness. It is not that they go to rest after being awake just so long, for they are easily fooled by an eclipse, and poultrymen now use artificial light to stimulate egg production.

The Arctic tern is the world's champion migrant. It nests as far north as land has been discoveredsometimes only 71/2 degrees from the pole. When the young are fully grown-usually about August 25-the hirds leave the Arctic and a few months later are found skirting the edge of the Antarctic continent-11,-000 miles away.

This gives the Arctic tern more hours of daylight than any other animal on the globe.

On June 21, about the time the terns arrive at the Far North nesting site, the sun has reached the tropic of Cancer and the Arctic region enjoys 24 hours of daylight. When the sun starts its trip back toward the equator, the days begin to shorten, and soon the flight southward is in full swing.

Then, on December 21, the sun reaches its southernmost point at the tropic of Capricorn, and the Antarctic is illumined by the midnight sun. And shortly after the sun turns, the birds are again racing northward.

Why Habit of Frowning Should Be Corrected

Nothing mars a good appearance more than the nervous twitchings of the facial muscles to which so many people are subject, points out Eileen Bourne, well-known authority on beauty subjects, in an article in Liberty. She gives the following directions for the correction of such unsightly habits:

"First of all," she explains, "try by a little self-analysis to find out why you do these things. Remember that no muscular action is habitual until it becomes unconscious. Therefore, to cure a bad habit, one must first learn to realize every time it is demonstrated.

"In the case of a frown or a squint," the writer continues, "a primary measure is to visit the oculist. Perhaps some defect of your vision makes you screw up your eyes. When that has been corrected, purchase some court plaster. With pieces of it stuck between the eyes or at their corners, you can neither draw together your brows nor lift the cheeks in a squint without knowing you do it. When all by yourself, put on the court plaster Follow this by a gentle massage with cold cream, and that by an application of ice. Probably it will help to control your facial muscles if you give them daily gymnastics. Also, you must learn to rest the face whenever possible."

LOW QUALITY AT COST

North Sea Island Milk **Contains Iodine Property**

Wyk-on-Foehr .- The healing properties of the North sea air are due to strong emanations of salt, radium and especially iodine, and now a scientist of the Island of Foehr has established the fact that the milk of cows, goats and sheep on the North Sea islands and the coastlands also contains a surprisingly large amount of iodine. As much as 210 millionths of a gram per liter has been found in cow's milk.

Iodine is the sovereign remedy for hardening of the arteries, and milk with an iodine content is also indicated for various children's diseases. It has long been known that the inhabitants of this part of Germany are almost never afflicted by hardening of the arteries.

10

Wow! High Trousers

With Plaits for Men New York .- There has been comment from time to time on the popularity of high trousers. profusely plaited and short double-breasted waistcoats.

With the coming of spring the odd waistcoat is prominently mentioned, chiefly in tattersall flannel. For the extreme dresser the fancy waistcoat of the variety mentioned might be recommended as timely.

A prominent clothier, in commenting on the rather bizarre trousers the men are wearing, remarked that he would not be surprised at anything the men might do.

"A great many of us hesitated to accept the theory that the men would ever take trick trousers seriously, but they seem to have done so. They have also gone back to suspenders, a rather startling revelation in itself.

"As a finishing touch the double-breasted waistcoat offers a "daring background and is being liberally boosted by the makers of such novelties.'

are plant troubles caused by worms or insects at roots. Palms are patient under suffering and do not snow the results of neglect for days or weeks, but on the other hand they are slow to recover. They will endure and even thrive in a position quite removed from a window, if the room is fairly well lighted, and after they are accustomed to a position they

should be allowed to stay there. Goldfish should not be kept at a sunny window, not because the light blinds them, but because in the sunlight they swim continually and, therefore, do not get sufficient rest through the day.

How Soap Originated

Soap is an article which was unknown to most of our ancestors. In early days people had to be content with water and certain mineral earths with which to wash themselves. The discovery of the art of making soap was brought about through its being observed that the ashes of the wood fire and the fat which fell from the food roasted thereon formed a substance which would form a lather when mixed with water. This was the first form of soap. Soap is first mentioned by Pliny, who states that it was prepared from a goat's tallow and beechtree askes, and was employed for giving brilliance to the hair. The excavations of Pompeii brought to light a complete manufactory containing quantities of well preserved soap.

How Beetles Send "Messages"

Through his work in reconstructing the roof of Westminster abbey, in London, which had been damaged by beetles, Sir Edward Baines became interested in the habits of the creatures and now announces he has succeeded in getting them to talk with him. By raising themselves on their hind legs and beating time with their heads the insects tap out messages, he says, that follow accurately in any combinations the raps he makes near them.

How to Develop Hedges

To grow a hedge in a shady position two things are necessary: heavy fertilization, and very severe pruning. Prune hedges early and often to keep the bottom dense. Thin hedges with slightly sloping sides, A-shaped, that is, to give the base sunlight and air so necessary to dense

Why Inns Were Made

To get the full savor of an old inn you should come to it at night, and best of all, winter night, or twilight, when the mists are rising ... and a log fire and a dinner seem to be the twin stars of human aspiration. All of us know those moments, and that is why inns were made-to stand upon the pilgrim's way with an understanding smile for the pilgrim's weakness. They are a sign to us to shed austerity and vigilance, and to meet and mingle with our fellows; to turn from our various occasions, lofty or low, and to ease our common needs and common anxieties in kindly communion .- From the Preface of "The Book of the Inn," selected and edited by Thomas Burke.

Why Music Is Valuable

Good music is a maker of men. of manners, of minds and of homes. I have watched good music work on child life, and on grown-ups, for thirty years and I am as sure as that I am writing this that one of the greatest sources for good in our homes and in our lives is good music. Music from a radio or from a player piano or phonograph is very much better than no music, but music played or sung by oneself or by someone in the home is far better. So make your home a singing, playing home, for you will be more successful, happy and healthy if you do. -Henry Purmort Eames in Child Life Magazine.

Why Raven Is Black

Noah was not the only mariner who sent out ravens. Norse navigators used to carry them in cages and set them free to be followed as guides. If the birds came back, there was no land near; if they did not return, the ship was steered the way they had gone Iceland and Greenland are said by some to have been discovered in this Noah was less wise, or more way. timid. The raven is reported to have been pure white until he failed to return to Noah, when "the blackness of death was put on him."-Louise Driscoll in the Yale Review.

CORRESPONDENCE Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department must be signed by the author; nor for pub-heation, but as an evidence that the items contributer are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted. We desire correspondence to reach our effice on Thursday, if at all possible. It will be necessary, therefore, for most let-ters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thurs-day morning. Letters mailed on Thurs-day evening may not reach us in time.

THE AWAY FROM HOMERS.

The chief concern of correspondents should be, that by far their most interested readers are the away-fromhomers. From every section represented by our correspondents, there are many subscribers far from home -in the far west, in some other state, or in some large city-who eagerly read everything about their old home neighborhood.

Those nearby may be interested in visits and socials, but the others mentioned want to hear of the more J. Newcomer, Overlia, Md. important happenings; so those who write for The Record should not think that the do so for The Record itself-they do that, too, of coursebut in a larger and more important way they do it for the information of the away from homers.

Just have one of these, whom you will help a lot to decide what to write will help a lot to decide what to write about. There are more of these on our mailing list than you may know of.

Misses Hannah and Rhea Warren, of Keysville, spent a few days, recently, with Mr. and Mrs. James Warren. Mrs. Reuben r'ogle and children, of York, are visiting at the home of Mr. and Mrs. Frank Albaugh.

course at Baltimore.

Lloyd Hess and family. of near Taneytown spent Sunday last here with H. C. Roop and family.

FEESERSBURG.

Vacation days have come. Some of our friends are off to the sea shore, others enjoying the mountains, and still others touring the country, while the rest "keep the home fires burn-

The Harbaugh-Carbaugh party returned home safely on Saturday eve-ning, having motored as far as western Indiana, visiting relatives en route. They report a fine tour, fine roads, fine scenery, fine hospitality. Miss Duana Garber assisted "Uncle

Frank" drive the car. Miss Sudie Barnhart, of the San Mar Home, for the aged, near Boons-boro, Md., is visiting this locality, in the interests of the Home, soliciting funds from members of the Brethren Church, for a better water system. She is staying with Mr. and Mrs. John Starr. Mrs. Carty, matron of the San Mar Home, spent the weekend with the Starr's also, by invitation. They took their guests to Frederick, on Friday afternoon, and to

Gettysburg, on Sunday. Mrs. Dorothy Littlefield Hamilton and child, spent last week with her uncle, Fred Littlefield and family, and had a grand surprise, when her husband and mother arrived, one evening. They all returned to New York on Sunday.

Mr. and Mrs. O. G. Jeffries, of Hagerstown, with George Anderson and wife, of Williamsport, were week end guests of Ornie Hyde and family. Mrs. Eliza Koons is spending this week with her son, Frank and wife, in

Union Bridge. Mr. and Mrs. C. Wolfe, accompan-

ied a family party of their friends, himer, deceased, was ratified by the near Woodsboro, to White Rock, on Court. Sunday, and report a lovely place and good time.

Esther and Pauline Sentz, little daughters of Mr. and Mrs. Luther Sentz, are visiting their great aunt, Mrs. Amanda Bair, in Littlestown, and Cased, reported sale of real estate on attending the Daily Vacation Bible School.

Word was received that Mrs. Lillie B. Parker sailed from New York, on Saturday, for a two month's tour of western Europe. This is the third season she chaperoned a group of Smith College girls, on Summer tours,

visiting seven countries. The men and women of Mt. Union are busy preparing for the festival, on the Church lawn, on Saturday eve, 20th 30th. There will be good things to eat, and the Union Bridge' Band to furnish music.

Mr. Union rejoices in the return of the Carroll Co. Missionary banner to their C. E. Society. As there has been some wonder expressed, we feel an explanation is in order. According to the C. E. topic card, one lesson each month is missionary, and the missionary committee has charge of that meeting, and the activities of their denomination rehearsed, as well as the study from the C. E. world; suitable hymns sung, and a special offering for missions. The money is forwarded to the Synodical treasurer of Wo men's Missionary Societies of Md. This is the only organized missionary effort of this church, and we have often wondered why more societies don't try this plan of work. Yes its true there was various modes of return from C. E. on Sunday night. After all that down-pour of rain, of course, the cars skidded, and some stuck fast in the ditch. The occupants alighted in the mud. while fellow travelers literally "put their shoulder to the wheel" Some waded onward, and didn't we

her hand? The strawberry festival, to be held on the school ground at Middleburg, high as seven or eight. on Saturday evening, was postpone

Proceedings of the Orphans' Court.

Monday, June 25, 1928.—Ivan L. Hoff, executor of Frank J. Sneeringer, deceased, reported sale of person al property, inventory debts due, settled his first and final account and received order to deposit funds.

Herbert G. Englar, administrator of Lillian W. Englar, deceased, returned inventory personal property, received order to sell stocks, reported sale of stocks and settled his first and final account.

Westminster Deposit and Trust Company, guardian of William O. Devilbiss, settled its first and final

account. The last will and testament of Mary L. Richards, deceased, was admitted to probate and letters testamentary thereon were granted unto Calvin R. Chew, who received warrants to appraise personal property and real estate and order to notify creditors.

Letters of administration on the estate of Charles C. Utermahlen, deceased, were granted unto Harry E. Utermahlen, who received warrant to appraise personal property and order to notify creditors, inventory debts due and money returned.

estate of Julia R. Stone, deceased, were granted unto Maurice T. Wilhelm, who received warrant to appraise personal property and order to notify creditors.

Tuesday, June 26, 1928.—The sale of real estate of Charles M. Masen-

Laura V. Harrison, administratrix of William H. Harrison, deceased, settled her first and final account.

which the Court issued an order ni si. William H. Zeller, executor of David A. Zeller, deceased, reported sale of real estate which was immediately ratified by the Court.

Almo L. and Kelso E. Ecker, received order to draw funds.

Big Strawberry Crop Losses.

The Seaford, Del., correspondent of the Baltimore Sun furnished the following write-up concerning the recent loss to truckers on account of the strawberry crop. What is true of Delaware, is true also of the Eastern Shore Md., counties that specialize in berries

The 1928 strawberry crop cost Delaware \$288,800. This is the estimate of the farmers who raised it and the

brokers who sold it. Opening in the middle of May and closing this week, the season's crop has been a bumper one, but with every quart returning a loss to the grower for planting, raising and marketing. As a consequence many of the ber-

ries were permitted by the Delaware farmers to rot. It only increased the loss to have them picked, as the sales return often failed to meet the packing and crating bill.

Two thousand farmers were engaged in growing strawberries this year The average loss sustained is \$100. This is not a true indication of the crop's effect upon the grower's financial condition because among the 2,000 growers are men who only planted one or two acres as an experiment or see one fat lady carrying her shoes in speculation. The real strawberry farmer stocked at least four to five acres. Many of them cultivated as

The financial failure of the Dela-

QUICK CHANGES

"Did you ever hear," inquired a waggish acquaintance, "of the American who, owing to an accident to his airplane, suddenly changed his nationality-he came down a Russian." "Yes," we replied, falling in with his humor, "but we heard further that this aviator carried a passenger

who also changed his nationality-he landed on some telegraph wires and came down a Pole."

One Method

One Maiden Sister to Another Maiden Sister-It would seem so good to hear a man's voice 'round the house.

The Other Maiden Sister-Well, let's get a radio.

Changed Days

She-Love-making is the same as it always was.

He-How can you tell? She-I've just read of a Greek maiden who sat and listened to a lyre all night.

Nor Far Now

Flannagan-Since his little windfall O'Gay has been going some. Hooligan-Yes, and this morning he

bought a second-hand car. Flannagan-Well, then there is no

knowing how far he will go now.

WRONG GIRL

Mamie, I love you!" "You may love both me and Mamie, but my name's not Mamie."

Parental Estimation

If we had all the wondrous sense Our parents thought we had, Our glory would be so immense That no one could be sad.

The Real Culprit

Last Tuesday evening, Mrs. L. H. Brumbaugh, delightfully entertained the Ladies' Aid Society. Miss Ger-trude Leedy, of Winona Lake, Ind., was present, and gave a very interesting talk.

"Church Night," was observed at the Linwood Brethren Church, last Wednesday evening, with a good at-tendance. The meeting, in charge of C. W. Binkley, was very helpful.

Our idea of a contented man is the one, if any, that enjoys the secenery Advertisement | along the detour.

ware crop is ascribed by those engaged in the industry to the rainy season vitiating the quality, satiation of public taste by the early Louisiana, Kentucky and Virginia berries; glutting of the market by the bumper crops of Delaware, Maryland and Virginia, lack of the usual Canadian market and the partial buyer strike occasion-

MARRIED

FISSEL-OHLER.

ed by unemployment.

Miss Marie E. Ohler, Littlestown, and William B. Fissel, son of Mr. and Mrs. Harner Fissell, of near Taneytown, were married at the parsonage of the Mt. Joy Lutheran Church by the Rev. L. K. Young, on Wednesday evening, June 20, at 8:30 o'ciock. They were unattended The couple will reside in Littlestown.

GRIMES-HAHN.

On June 21, at Thurmont, by their pastor, Rev. Charles S. Harrison, James Edgar Grimes and Gladys Luella Hahn, both popular young people of near Emmitsburg, were united in marriage, the beautiful ring service of the M. E. Church being used.

After several days stay in Baltimore they returned home to be greeted by the calithumpian band and a host of friends who wish them a long, happy and prosperous married life. The groom is the youngest son of Mr. and Mrs. James E. Grimes and the bride a daughter of Mr. and Mrs. Maurice Hahn.

BOSTION-MEHRING.

Miss Mildred Bostion daughter of Mrs. Chas. E. Bostion and Dr. Wilbur B. Mehring, son of Mr. and Mrs. D. M. Mehring, were united in Holy mat-rimony, Saturday, June 23, by Dr. Burke, in George Washington Mem-orial Chapel, Valley Forge, Pa. Miss Bostion sister of the bride and Mr. Theron Veit cousin of the groom were their only attendants.

The bride is a graduate of Taneytown High School and Millersville State Normal School, and for the past two years has been a teacher in the schools of Camden, N. J.

The groom is a graduate of Taney-town High School and the University of Maryland.

Dr. and Mrs. Mehring left immediately after the ceremony on an auto trip to Niagra Falls and Canada. They will be at their homes in Taneytown after July 1st., until early fall.

months."-Sydney Smith's Weekly Paul-He can't sing. Who egged him on?

"I don't know. Brown is looking for the man who egged him off."

Assurance

"And will you love me as much as this when we are married?" "Darling, how can you doubt me?

I've always liked married women best."

Impossible

"So you think you know as much about it as the instructor?" "Well, he just said that it was im-

possible for him to teach me anything."

Pretty Thin

Landlady-How did you find your bed, Mr. Newbord?

Newbord-Well, I don't think the mattress will ever need to be treated for the removal of superfluous hair.

THEY'RE STILL COMING

"Willie, you have a new brother, just arrived from a foreign land." "Huh, thought they were going to

stop these darn immigrants from coming in!"

Music Mysteries

Why is it that the tenor, Of thin and silky tune, Has gen'rally a waistband That rivals a balloon?

Utilitarian

"My boy," said the old gentleman, "save your money; you will find it your best friend."

"But," queried the young man, fast! "what good is a friend you don't use?"

Rabbit-1 never had any trouble with arithmetic at school. Turtle-No wonder. I always heard that rabbits multiplied very rapidly!

Laugh Heartily

It takes a lot to cheer me up When I am in a hole, But that's a time I sure could smile Should I see a bank roll.

A Lot to Do

Billy-How do you like your new job?

Teddy-It's a hard job. The boss always says, "Con't you find work to do?" I've got to find work and do it also.

The Big Scene

Magistrate-Come, we will reconstruct the action and scene of the crime.

Criminal (proudly)-Wid pleasure, your honor. Is dis for de movies?

Slow But Sure

"What is the gentlest way of breaking the news to the chief that the cashier has absconded?"

"Let the bookkeeper tell him-he stutters."-Passing Show.

Evolution

The Snob-The Fitz-Smythes come of very old stock.

The Cynic-Yes. Their family tree goes back to the time when they lived in it.

Lots of Time Yet!

Mabel-I simply must buy Dorls

Harry-Oh, that clock is 15 minutes

a birthday present before it's too late.

"Inside" Information for Women.

If a woman's hips are large in proportion to her waist and bust, she should choose long vertical lines from the shoulder to the floor in designing her dresses. These lines may be stripes in the material, bands, or rows of trimming, rows of buttons, tucks, and so on.

To whip cream successfully you must have the cream and the bowl very cold. If the kitchen is hot, it is better to whip the cream out of doors, using a dover beater. Or stand the cream bowl in a pan of cracked ice. To obtain the best whip it is well to use cream that contains at least 30 percent butterfat and that has aged at least 24 hours.

An easy dinner menu for wash-day may be acceptable: Cold sliced corn beef or other meat; vegetable curry; radishes; baked bananas. You can use various vegetables in the curry, 6-22-2t but a good combination contains rice, onion, carrots, fresh or canned peas has celery, in about equal amounts, and seasonings. Cook the rice first. Cook the vegetables the necessary length of time for each in a small amount of water. Make a ring of the rice, and put the vegetables in the middle, pouring over them a sauce made of the vegetable water, seasoned with curry, salt, pepper, or Worcestershire sauce, and butter.

Obey Life's Laws and. Keep Spirit of Youth

There has been no improvement in the longevity of human life in the last one hundred years for those who reach the age of fifty, a writer in Physical Culture Magazine maintains. By improving the montality record of the earlier years of life, he admits, the average span of life has nearly doubled in the last two or three centuries. But, he says, the chances for life for a man of middle age have not improved in the last century. "The proper way to prolong life," he

declares. "is to get more life, to live more completely, to make yourself more alive in every part of your bodily organism.

"There is much about the human body that is beyond our understanding. The most learned anatomical expert finds that the more he studies the body the more he realizes how numerous are the unsolvable mysteries that are hidden within it. Then why tamper with this marvelously constructed organism? Why not try to interpret the laws of life and health as indicated by the endeavors of the body itself to build and maintain health? "Then the spirit of youth can be re-

tained on and on, at times even to old age; for life is worth little or nothing when the decrepitude of senuity creeps upon you."

Old Year Dead When

Harvest Is Gathered? That the calendar by which we count our days does not fit in harmoniously with the seasons is pointed out by an editorial in Liberty Magazine.

"It has long been obvious," explains the editorial, "that starting the calendar on the first of January is all wrong. The year ends with the harvest, when the last grain is in, the leaves are fallen, and the earth has gone to sleep. The closing day of the calendar might well be that one on which we turn away from outward things and ask about the chances of having a little steam heat.

"It is unlikely on the whole, that the calendar makers will agree to end the year with the fall and begin it with the spring, as is meet and proper," concludes the editorial. "We must take January 1 as the beginning of the year because Julius Caesar fixed it that way and nobody has changed it."

Averages Untrustworthy

Recent insurance experience has shown that average tables are often misleading. The average weights are by no means the best weights. At ages under thirty the best conditions apparently exist among those whose weights are from five to ten pounds above the average. After age thirty the most favorable conditions are found among those whose weights are below the average. The amount below average increases with advancing age and at age fifty persons seem to be at their best when their weights are as much as twenty or thirty pounds below the average. Insurance experience shows that underweight is definitely an advantage so far as long life is concerned.

Fish Easily Gathered In

It may be a slander that the ostrich buries its head in the sand when frightened, but a correspondent of the Sydney Bulletin swears there is a fish that does that and more. The blackspotted sea perch, Lutianus fulviflamma, when approached stands on his head and wags his tail so violently that he is driven clear out of sight into the sand. The Australian fishermen, however, just wade in and mark the spot with a piece of white shell where each fish has buried himself and then make the rounds with a long sharp spear, jabbing the sand around each sign post, quickly gathering them in.

The Doctor's Ruse

The doctor of a lunatic asylum was in the bathroom one day watching a number of his patients, when one of them called out suddenly: "Let's duck the doctor !'

Seeing his danger, the doctor, with great promptitude, said: "All right, boys, but suppose, now, you give the doctor a cheer before ducking him."

This reasonable proposition was at once acceded to, and a ringing cheer resounded through the building, which at once brought the keepers, as the doctor expected, and he was saved .--Yorkshire Post.

When Washington Relaxed

Irving says that Washington on rare occasions was "surprised into hearty fits of laughter." One such instance occurred at the return of peace, when he was sailing in a boat on the Hudson, and was so overcome by the drollery of a story told by Major Fairlie of New York that he fell back in the boat in a paroxysm of laughter.

"In that fit of laughter," remarks Irving, "it was sagely presumed that he threw off the burthen of cares which had been weighing down his spirits throughout the war."-Gas Logic.

Large Peach Crop Predicted.

The Department of Agriculture has issued the following statement concerning the outlook for the 1928 peach

"If present prospects are fulfilled, the 1928 peach crop will be next to the heaviest ever produced. It may slightly exceed the 1915 crop of 64,-097,000 bushels and may be only 5,700, 000 bushels or 8 percent lighter than the record crop or two years ago. According to June 1 condition, ther were prospects of 64,186,000 bushels of peaches this year.

It will be remembered that the June forecast of the 1926 crop was 59,000,-000 bushels, but that conditions so improved later that the final estimate for 1926 was nearly 70,000,000. If similar improvement occurs this season, the 1928 peach crop may yet exceed all previous records. There is an almost equal chance, of course, that condition of the crop may decline from the 73 percent of normal, as indicated on June 1; in which case the production figure will be decreased.

In any event, the crop will require careful grading and wide distribution to insure a successful season, for ship ments of possibly 55,000 cars, besides thousands of carloads by truck, have to be marketed during the next four months. If the volume closely approaches that of 1926, as many as 45,000 cars may require handling during July and August, against25, 000 cars, during those two months from the light crop of 1927. Active competition is expected from heavy crops of other fruits and melons."

Source of Vocabulary

Wesley or Wessey is only a little chap. One day his mother heard him: using some very forceful language. When questioned by her as to when and where he had heard such talk he said:

"I heard daddy say it when he was down firing the furnace."

Someone Else Would

Wear Nether Garment

The henpecked man came into a department store, majestically led by his wife. Their errand, if you want to use the plural form instead of the feminine singular, was to buy Mr. Henneck a suit of clothes.

About 118 different suits of clothes were taken off the racks, and the coats, at least, tried on Henpeck. He said not a word and although his legs got trembly and wobbled, when he looked at his spouse out of the corner of his eye he saw he must stand up under the ordeal until unconsciousness gave him rest and relief.

The clothing salesman was getting more frazzled and worn down than any of the three. He had a boiler-factory perspiration and his temper was beginning to say, "I don't want to be good much longer."

So finally he blurted out to Henpeck, "Say, friend, why don't you buy this suit. You can wear the coat ef it, anyhow?"-Exchange.

each other, and the young girl had but recently accepted an engagement ring from her sweetheart.

Although everything was perfectly planned for their future, the young man was inquisitive to the point of folly.

"Tell me, dear," he pleaded, "have vou ever been kissed before?"

The girl blushed. She did not know what to say for the best. "Well, ye-es; only twice," she can-

fessed reluctantly. "What?" he shrieked. "Who by?"

"Don't be ridiculous; dear," returned the girl. "It was only the church choir and the baseball club."

Trying to Help

Mrs. Blank returned home one afternoon after consulting a physician with the announcement that she had been advised to reduce the amount of carbohydrates in her diet. A few hours later the family assembled for dinner prepared by the cook, when all at once Mrs. Blank looked up to see Mandy lifting some of the vegetables off the table

"Why, Mandy, what's the matter. Don't we get anything to eat?" some one asked the cook.

"No, siree, you don't get this. It's got too many hydrophobias in it," she answered quickly.

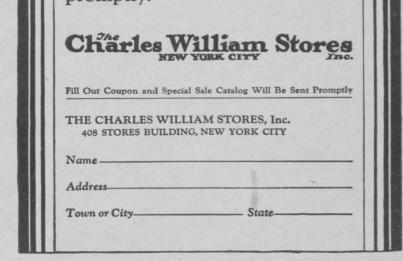

Frugality

As boys should be educated with temperance, so the first greatest lesson that should be taught them is to admire frugality. It is by the exercise of this virtue alone that they can ever expect to be useful members of society. It is true, lectures continually repeated upon this subject may make some boys, when they grow up, run into an extreme, and become misers; but it were well had we more misers than we have amongst us.-Goldsmith.

What's the Use?

The American book canvasser tackled a solemn-looking negro elevator man.

After listening imperturbably while the canvasser enlarged on the vast stores of knowledge to be derived from the work he was offering on the installment plan, the negro remarked quietly: "'T'ain't no use to me, boss; I knows heaps more now than I gets paid for."-Exchange.

Cultivate a Smile

The serious things of life are sometimes inclined to give us a set, forbidding expression. It may be possible to have too much determination, too much power of concentration. And then there are people who cling to the memories of unhappy experiences. They live over and over again the tragedies of their lives. Their thoughts are stamped on their features; everybody can read their troubles. Such a countenance is repelling and distasteful. Therefore, whatever you do, try to cultivate the smiling habit. No one can estimate the value of a smile. There are times when it is worth as much as life itself. It has even saved life in serious emergencies .- Dream World Magazine.

Historic Tablet

A plate attached to a large rock on the road betwen Newcomb and Minerva, in Essex county, New York, states that this is the place where Theodore Roosevelt became President, due to the death of President McKinley. The inscription reads: "Near this point, while driving hastily from Tahawus club to North Creek, at 2:15 a. m., September 14, 1901, Theodore Roosevelt became President of the United States as William McKinley expired in Buffalo. Relay drivers-David Hunter, Tahawus club to Tahawus; Orrin Kellog, Tahawus to Aiden Lair; Michael Cronin, Aiden Lair to North Creek. Erected 1908 and presented to the town of Newcomb by H. V. Radford."

Blame the Women!

"Poor George!"

"What's his latest hard luck?" "After saving tobacco coupons for seven years he figured that in a couple more years he'd have enough to get a fishing rod he coveted."

"What happened?"

"His wife and daughter started smoking, and in three months they all had enough coupons-"To get the fishing rod?"

"No; to get a hand-carved incense burner."

Wise Man Wasn't Talking

"Sleep," said the pessimist, "is but a foretaste of death-that divine nepenthe for which we poor mortals yearn."

"Sleep," said the chemist, "Is caused by such an accumulation of toxins that all organic activity must be suspended or minimized pending their elimination through chemical change."

"Sleep!" said the poet, fervently. "Ah, poppy and mandragora and all the drowsy sirups-"

"Sleep," said the business man, "if I can get a good solid eight hours of it, makes me show up at the old desk feeling like a-er-fighting cock!"

"Sleep," said the philosopher, "is a phenomenon which-

The wise man sat in the corner and said nothing. He was taking a little nap.

Little Band-Wagon Journeys

By L. T. MERRILL

(C). 1928. Western Newspaper Union.)

1.—The Only Unanimously **Elected President**

THE founding fathers, who framed the Constitution in the belief that our Presidents would be elected by a group of staid and steady councilors of state, the electoral college, uninfluenced by partisanship. would be surprised and dumfounded by the hurrah and hullaballo accompanying the modern American party nominating convention.

The first national party convention was not held for more than 40 years after the founding of the republic. Prior to that time various expedients to place the names of available men before the electoral college were employed-congressional caucuses, legislative resolutions, state conventions, mass meetings.

But all these were of gradual evolu-None of them was ready for use in picking the first President.

The Constitution had not provided for any nominating methods. Possibly this was partly because of a general expectation that Washington would be the first President and would continue to hold office as long as he wished.

There was hardly time, in any event, to develop uniform nominating methods between the date on which the government was formally declared in operation and the date set for the first election. Before news got around to the farthest states, by the slow means of communication of those times, that congress had declared the states must pick Presidential electors in January, 1789, it was almost time to select them if they were to function.

Political attention in the states had been monopolized by the struggle over ratifying the Constitution. No preparation had been made for the first election under it.

In five of the eleven states entitled to participate in the election (Rhode Island and North Carolina not yet having ratified the Constitution) governors did not summon the legislatures in time to provide for an election by the people. Thus, in Connecticut, New Jersey, Delaware, South Carolina and Georgia the legislatures made the selections of Presidential electors.

Pennsylvania, Maryland, Virginia, New Hampshire and Massachusetts provided for popular election. But the vote polled in all five was very light.

New York politicians wrangled so long about the means of choosing electors that the state lost its chance to have any part in the election.

Fortunately, in this more or less unsettled condition of affairs, there was almost universal agreement upon the eminent availability of George Washington to be the first peacetime leader of the republic that had been founded as result of his wartime leadership.

A few, it is true, thought of wise

Little Band-Wagon Journeys By L. T. MERRILL (C. 1928. Western Newspaper Union.)

2.-President by One Vote A LTHOUGH bickerings between Jefferson and Hamilton within Washington's cabinet and barbed partisan newspaper attacks made the "Father of His Country" weary of the Presidency before his first term had expired, he was persuaded to stand for re-election, and again scored a unanimous vote of the 132 members of the electoral college, with John Adams re-elected as his vice president.

The bickerings increased, the factional warfare became more intense as Washington's second administration progressed. The President was made the victim of violent diatribes in scurrilous newspaper articles and pamphlets. "Tyrant," "imposter," "embezzler," "crocodile," "hyena" were "imposter." pamphlets. some of the epithets of his traducers.

When in 1796 Washington issued his famous farewell address, urging partisans to sink their differences, it fanned rather than quenched the blaze of acrimony. Jefferson charged that Washington was unwilling to run again for fear of being beaten.

For the first time the Presidential office was a prize open to real competition. There were no nominations by caucus, convention or mass meeting. But John Adams for the Federalists and Thomas Jefferson for the Anti-Federalists soon emerged head and shoulders above the others as the leading contenders.

These two presently became the targets of bitter attack and counterattack. Adams was inconsistently assailed as an aristocrat and derided for being the son of a shoemaker. It was recalled to his discredit that he had acted as legal counsel for British soldiers involved in the Boston massacre.

He was roasted for his alleged monarchist sympathies. "Liberty, equality and no king!" became a slogan of the Jeffersonian Republicans, paraphrasing it from the motto of the French revolution, with which at the time they were fervidly in sympathy. The tricolor cockade of France became a campaign badge of Jefferson's friends.

Jefferson, on the other hand, did not escape condemnation. He was berated for many things he had not done. Utterances in his books and letters were deliberately garbled.

In the first contested Presidential election, the religious issue played a prominent part. Thrusting at Jefferson's deism, his opponents demanded the election of a "Christian President." He had a reputation as a philosopher, but to what ill use had he not put his philosophy! He had refuted Moses and tried to disprove the Bible story of the deluge! If he had tried to establish religious freedom in Virginia, they said, it was because he desired not freedom of worship but freedom from worship. He had wasted his time, that should have been better uses, they asserted, in idly speculating about why negroes were black and white men white, and in perfecting eccentric inventions, such as whirligig chairs.

TERESTERIES STATES STATES OLD SWORD RECALLS **CE SOTO EXPEDITION**

Part of Ancient Blade Dug Up in Georgia.

Washington, D. C .- Part of a rusty sword recently dug up in northern Georgia is believed to have been lost by the expedition of Hernando De Soto nearly 400 years ago.

"If this was the origin of the weapon," says a bulletin from the Washington headquarters of the National Geographic society, "it is a relic of an expedition that was a tragic mistake from first to last, and the only important accomplishment of which was the discovery of the lower reaches of the Mississippi river.

Had Helped Conquer Peru.

"De Soto had amassed a fortune by his association with Pizarro in the conquest of Peru," continues the bulletin. "He prevailed upon King Charles V of Spain to grant him the right 'to conquer Florida,' and threw his fortune into the enterprise. The whole matter was approached on the basis of the conquest of South America and Mexico. De Soto thought the present southern states of the United States constituted a land of superlatively rich Incas and planned to loot their 'temples' and 'palaces' of gold and precious stones.

"When he had wandered over what is now Florida, Georgia, Alabama, Mississippi, Arkansas and Louisiana, killing thousands of Indian agriculturalists and hunters, finding only towns of huts and wigwams and losing hundreds of his men and scores of his horses, he came to the realization that there was nothing in the region worth 'conquering.'

"De Soto's expedition was not the first to reach Florida, but it was the first to go in on a large scale, and the first to penetrate westward through the Gulf states. His bestknown predecessor in the peninsula was Ponce de Leon, who searched not for gold, but for the 'fountain of youth.' It was he who gave Florida its name.

"De Soto's party, including foot soldiers, cavalry, and servants, left Havana, Cuba, in May, 1539, and is believed to have landed on what is now Tampa bay. They pushed north through swamps and forests, always harassed by the Indians and spent their first winter near the present town of Pensacola.

"In 1540 they went into the northern part of the present state of Georgia, still fighting and oppressing the Indians and still believing that gold lay just ahead. The wanderings turned westward and southward to the vicinity of Mobile. The following winter was spent in the Yazoo valley in what is now Mississippi.

Found Mississippi Muddy. "Soon after camp was broken in 1541, the westward-pushing wanderers came upon the 'Great River' as they named it. Paintings have represented this as something of a gala occasion, with De Soto taking possession of the stream in shining armor. In reality it was a ragged, unkempt, rusty crew of discouraged men which found its

somewhere south of the present Ten-

America's Great Debt to Pioneer Motors

Pioneer mothers played a great part in American annals. Following the ones they loved they made homes spring up in the wilderness. From helping to build the cabin, raising the little crops, weaving the clothes. down the long range of ceaseless toil which frontier life holds, they were co-work ers with the men who gave America 48 states instead of 13, Leah A. Kazmark writes, in the National Republic. Around the wide-mouthed fireplaces at night in the isolated cabins these mothers of American yesterdays laid the foundation stones of Twentiethcentury progress. Here they taught before the coming of the lessons schoolmaster; here they taught religion from the precious family Bible long before the steeples of white churches dotted the landscape. All the seeds of civilization they planted on each new frontier, as the men planted the wheat in the newly turned soil, drained the swamps and felled the forests. Toiler, mother, teacher, preacher-all these in one was a typical pioneer woman who furthered the cause of America.

Incorrect Belief as to Growth of Trees

A marked oak tree began growing on April 17, and grew regularly until May 23. Then it began a rest period of 32 days. On June 24 it started to grow again and continued until July 13.

At the beginning of the season it grew for 36 days, then rested for 32 days, and thereafter grew again for 20 days. During the first growth period it grew ten inches, an average of about one-third of an inch a day. This proves that the belief that trees

grow from early spring, when the leaves begin to come out, until the first frost, when they start to show their autumn color, is not correct. For instance, in the latitude of southern Pennsylvania the native forest trees make 90 per cent of their height growth in 40 days of spring and early summer. Trees are fighting for their lives all the time.

Women Geographers

The Society of Woman Geographers is a society organized in 1925 by a group who felt that there should be some medium of contact between women distinguished in geographical work and its allied sciences-ethnology, archeology, botany, natural history, sociology, folklore, arts and crafts, etc. For active membership in this society only those women are eligible who have done distinctive work whereby they have added to the world's store of knowledge concerning the countries in which they have trav-Corresponding members are eled. those who fulfill the requirements for active membership, but who reside outside the United States of America and Canada. The associate membership admits widely traveled women who are interested in furthering all

Distinctive Brigade

HOTEL'S MISTAKE

The departing guest had been given his bill, and shortly afterwards the manager said to the head waiter: "You gave the man in room 29 his bill, didn't you?"

"Yes, sir," was the reply.

"I didn't forget to charge for anything, did I?" inquired the manager. "Not that I know of," answered the waiter.

"Strange, very strange," muttered the other; "I can still hear him whistling."—Stray Stories.

been practically destroyed through the ravages of distemper and accident. Credit is likewise given the English mastiff and the bloodhound, used in bringing the St. Bernard to its present stage of development. The outcome of this heterogeneous mixing of the blood of various breeds has been the producanimal in which size, strength, bravery, loyalty and devotion are traditional characteristics.

Tree Always Extreme in Matter of Thirst

Trees are confirmed drinkers. No solids for them. They have no temperate habits. They drink continuous-ly or not at all. Thus they live and grow as extremists and are either destroyed or die of old age unreformed, says the New York state college of forestry. In fact, the older they are the harder they drink and the greater their thirst. But no tree was ever found the worse for drinking. When they sleep in winter they go to the other extreme and are teetolars, but with the first sunshine and thaw of spring they resume their bibulous habits.

-

The liquid food of the tree is brewed in the ground. Water is the important ingredient. Billions of bacteria work to make soluble many substances so they may be dissolved by water and taken into the circulatory system of the tree. The tiny roots of the tree drink this life fluid, which is lifted hundreds of feet as if by a miracle, defying the laws of gravity without any moving machinery. This fluid is distributed to the branches, thence to the leaves, the stomach of the tree, where another miracle is performed when the liquid is digested and made ready to be formed into wood.

The tree grows year by year, like a person, in height and girth. If the tree falls in the forest billions of bacteria will get hold of it, and with the help of air and sun and moisture its substance will eventually be transformed into the liquid food for other trees.

Making It Plain to the Youthful Mind

Like all people whose work brings them into close relation with the human side of things, Sir Herbert Barker, the famous manipulative surgeon, has a great liking for children, and many of his best stories are about them. Here is a good one.

"Daddy, is today tomorrow?" asked little Willie.

"No, my son, of course today isn't tomorrow," answered his father. "But you said it was," objected

Willie. "When did I ever say that today

was tomorrow?"

"Yesterday," answered Willie. "Well, it was. Today was tomorrow yesterday, but today is today, just as yesterday was today yesterday, but is yesterday today. And tomorrow will be today tomorrow, which makes today yesterday and tomorrow all at once. Now run along and play."

St. Bernard Mixed Breed

If tradition may be accepted as authentic, the St. Bernard dog is a product of the Alpine section of Switzerland. There, about 600 years ago, the monks of the Hospice of St. Bernard are said to have created the original type from the cross of a mastiff dog of the Pyrenees with a Danish bulldog bitch. Later it became necessary to outcross with the Newfoundland and the Pyreneean sheep dog in order to refill the hospice kennels, which had tion of a very extraordinary dog, an

old Benjamin Franklin for the honor. But he was then in his eighty-third year. Most agreed that was too old. Alexander Hamilton, on the other hand, was too young, being still under the constitutional limit of thirtyfive. But he was not too young to pull wires skillfully.

The Constitution originally, before adoption of the Twelfth amendment, provided that each Presidential elector was to cast two votes. The candidate receiving the largest number was to be declared President; the next highest, vice president.

John Adams of Massachusetts was most generally considered the proper man for vice president. Adams himself thought he had as good a right as Washington to the Presidency.

If all the electors had divided their two votes apiece between Washington and Adams, the result would have been a tie, throwing che election into congress. To avoid this, and insure the immediate victory of Washington, Hamilton discreetly and quietly passed around the suggestion that each elector cast one vote for Washington, but that a few throw their second votes to some favorite sons of their several states.

This advice was followed more extensively than Hamilton expected. When the ballots were counted it was found that Washington had been the unanimous choice of the 69 electors participating. One of the 71 electors who should have had a part in the procedure was kept at home by gout, and another was icebound.

Adams, by contrast with Washington's 69, received only 34 votes, the other 25 being widely scattered in accordance with Hamilton's , little scheme.

That "black intrigue," as Adams called it, was a sorry blow to the pride of the rather vain and stolid son of Massachusetts. He did not forgive Hamilton for meddling with what he thought would have been his chance to contest with Washington on equal terms for the honor of being the first American President.

No Joke

"An apartment with four bathrooms," exclaimed Mr. Mittelbaum, as he sat reading the paper. "How can people use four bathrooms?"

"And why not?" demanded Mrs. Mittelbaum. "One for coal, another for the dogs, one to keep the fish in and the other for a bath, maybe. What's so funny about four bathrooms?"-Vancouver Province.

Besides the newspaper attacks, handbills, postbills and broadsides were got out in great quantities on both sides. Charges of fraud and of ballot box stuffing were bandied about with spirit.

Then the dust settled. and the ballots cast by the 138 members of the electoral college were counted. The Massachusetts man was found to have received 71 votes and his Virginia opponent 68. Adams' total was only one vote more than the number requisite to elect him, while Jefferson's fell just two short of the number that would have made him President.

The clumsy old provision which made the candidate receiving the next to the highest number of votes the vice president saddled President Adams with a vice president who was then his principal political foe-though in times past they had been collaborators in drawing up the American Declararation of Independence.

The counting of the votes was a scene of dramatic interest, not only because of the closeness of the contest, but because one of the two leading contenders, by virtue of being vice president, presided at the meeting, opened the certificates, read them, and finally declared himself elected.

A question had been informally raised regarding the validity of four Vermont electoral votes cast for Adams. Had they been disallowed, the victory would have gone to his op-No one formally, however, ponent. objected to the Vermont votes being counted in, though there was ample opportunity for the Jeffersonian adherents to do so.

The inauguration took place in the house of representatives. "All agree," President Adams wrote to his wife, "that, taken altogether, it was the sublimest thing ever exhibited in America."

Strange!

Customer-That ice box you sold me yesterday doesn't do any good. The ice melts and runs all over the flcor."

Clerk-You should put a pan under it.

Customer (next day)-Well, 1 put the pan under it, but the ice melts just the same!

way blocked by the muddy, drift-The name "Orphan Brigade" was strewn waters of the lower Mississippi.

research.

nessee line. "Barges were built, and the adventurers ferried themselves and their horses into what is now Arkansas. They scouted as far north as the pres ent situation of New Madrid. Missouri, and still finding no gold. turned westward. The next winter was spent in the neighborhood of what is now Joplin, Mo.

"No gold was found in this region. and the party turned south and followed the Red river back toward the Mississippi. They became involved in the swamps and bayous of the Red river valley, but finally won their way through to the Mississippi near the mouth of the Red. There they encamped in an Indian town, with the natives rather unwilling hosts, and prepared to build boats.

"But this was to be the end of De Soto's wanderings. He sickened, and within a few days died. His body was buried temporarily, and was then sunk, in the early summer of 1542. in the great river which he had discovered.

"After wandering westward for several months the survivors of De Soto's expedition returned to the Mississippi, built seven brigatines, and floated down the river. They first killed all their horses and dried the meat for provisions. In the frail boats, the last of the party of adventurers en-tered the Gulf of Mexico, and skirting the present Texas coast, finally arrived at a Spanish settlement in Mexico, near the present port of Tampico."

Watch Still Ticking Found Inside Fish

Cape May, N. J .- A chronometrical croaker was hauled in recently by Capt. Francis Holmes, of the Reeds Beach fishing fleet, along the Delaware bay shore here. The captain was dangling his line over the side of his boat when the croaker, a fish which noses among the clam beds for dainty morsels, bit and as he was brought up his captor could hear a distinct tick, tick, tick.

The four-pound fish was opened and inside of him was a watch, which one of the party with Captain Holmes had dropped over the side a little while before. Despite a plunge of several fathoms and its incarceration inside the croaker, the timepiece had not missed a tick.

forms of geographical exploration and

given to a body of troops because they had to leave their own state to join the Confederacy. "Different accounts have been given as to how the command acquired the designation of Orphan brigade. Its attitude towards its native state-expatriated by reason of identification wth a cause which Kentucky had not formally approved; its complete isolation from its people; its having been time and again deprived of its commander by transfer to other service, or death in battle-these, all and singular, may have suggested the name which soon fixed itself in the popular mind, and has come to be the real one by which it will be known in history.'

Stone With a Legend

There is only one stone to be found in all Lithuania, where even the paving cobbles for the town streets have to be imported from abroad. This solitary stone, a relic of the Ice age, lies in a forest, and being unique has a name of its own, "Puntukas." The country people say that the devil picked up the stone-one can still see the marks of his claws-to destroy Anyksciai church. He hurled it, says the Washington Star, at the church, but missed, and only broke off the tops of the two steeples. And two truncated steeples-the only ones in all Lithuania-are there to this day

Earliest Newspapers

to prove it.

An authority is inclined to give the credit for the earliest European newspaper to The Netherlands. A Newe Zuytung, or New Newspaper, was found dated in 1526 and telling of the great battle with the Turks. But back in the days of old Rome there were the Acta Diurna, or Daily Events, which regularly chronicled battles, elections, games, réligious rites, etc. That daily paper, or bulletin, lasted to the fall of the western em-Ni

Her Brass Band

The young married couple were having lunch at a modest eating-house. The woman was grumbling because they were unable to afford the luxurious restaurants which had been a feature of their honeymoon.

"You can't have a brass band everywhere you go," said the man, crossly. "Oh, yes, I can." snapped his wife I've got it on me now-on my finger."

my toes were 5 below."-Washington Star.

Captain-Well, what did that road hog do when you pinched him? Cop-Squealed, of course.

It leaves you feelin' sore. And even when you're gettin' out, You're gettin' into more,

Just a Shell

Weste-I hear you've built a new home.

Easte-Yes, but I don't know whether it's going to be a manor, villa, hacienda or igloo-my wife hasn't bought the furniture yet.

Glad Surprise

"You were going 60 miles an hour," said the traffic cop.

"Lead me to the fine," said Mr. Chuggins, proudly. "I didn't think the old fliv could do it !"

Taking Her Pick

Mr.-Will you be long? Mrs. No, dear. I'll be ready in a minute.

Mr.-Well, please pick a minute that's not more than 30 minutes away.

"Your wife wants you on the phone." "How do you know it's my wife?" "She started off, 'Is that you, bum'. and I knew."

More Than Fur Deep

Mary Katherine had a little alley cat on which she lavished all her young affections, and when it was lost she refused to be comforted. Grandma bought her a beautiful Angora kitten, but Mary Katherine was still loyal to the loved and lost.

"See, dear," grandma said one day, stroking the thick yellow fur, "isn't this one much prettier than the other little kitty?"

Mary Katherine gulped and her brown eyes filled.

"But, grandma," she quavered, "it's the inside of a cat that counts!"-Kansas City Star.

Mightier Than the Purse

How a California newspaper man's pen became as mighty as a wellfilled purse is told by V. C. of Hay. ward, Calif. Scouring the town for stories, the reporter came upon a poverty-stricken little family occupying two rooms, with no beds and very little of anything else. The children slept huddled on the floor. Into his column next day went a faithful and graphic description. The following day he spent the later hours declining furniture, bedding, clothing and food for the family, for the proffered supply soon exceeded the immediate needs.

Watch Your Weight

The best index of good health, says the Kansas City Times, is the weight. Mothers know this and weigh their babies regularly in order to be sure that they are well. People who are ill usually lose weight. But it is not healthful to be overweight. Fat people are less resistant to disease. To be too fat results in strain upon the heart. Watch your weight; keep it near the average for your age and height and you will have good health.

Lesson for July 1

THE EARLY LIFE OF SAUL

LESSON TEXT-Deut. 6:4-9; Phil. 8:4-6; Acts 22:3, 27, 28. GOLDEN TEXT-Remember also thy Creator in the days of thy youth. PRIMARY TOPIC-The Story of Paul as a Child.

JUNIOR TOPIC-The Boyhood of a Great Preacher. INTERMEDIATE AND SENIOR TOP-

IC-Saul's Training for Service. YOUNG PEOPLE AND ADULT TOP-IC-Influences Shaping Saul's Early

I. Israel's Responsibility With Reference to God's Laws (Deut. 6:4-9). 1. Central truths to be taught (vv.

4, 5) (1) Unity of God. "The Lord our God is one Lord." He is God alone, therefore to worship another is sin.

(2) Man's supreme obligation (v. 5). God should be loved with all the heart, soul and might, because He is God alone and supreme. This being the first and the great commandment, we know what is man's supreme duty. 2. How these truths are to be kept

alive (vv. 6-9). The place for God's Word is in the

heart. In order that it may be in the heart (1) "teach it diligently to thy children" (v. 7). The most important part of a child's education is that given in the home in the Word of God. How sadly this is neglected today! (2) To talk of them in the home (v. 7). This is the right kind of home life. How blessed is that home where God's Word is the topic of conversation. (3) Talk of here when walking with our children and friends (v. 7). (4) Talk of them when retiring for the night (v. 7). The last thing upon which the mind should rest before going to sleep should be God and His truth. (5) Talk of them when rising in the morning (v. 7). How fitting that God should speak to us the first thing when we awake! (6) Bind them upon thine hand (v. 8). This was literally done by the Jews even to the wearing of them in little boxes betweer their eyes. (7) Write them upon the posts of the houses and on the gates (v. 9). Such a remembrance of God's words would create a spiritual atmosphere most desirable. II. Saul's Ground of Confidence

(Phil, 3:4-6). He had everything a true Jew

gloried in. 1. Circumcized the eighth day (v. 5).

This was the literal requirement of the law for those born under the Abrahamic covenant.

2. "Of the stock of Israel" (v. 5). This shows that he was a true Jew, related to the choser people by blood and birth.

3. Of the tribe of Benjamin. Benjamin had always remained loyal to the national customs. The first king of Israel, whose name he bore, was of Benjamin.

Trace Art of Weaving

to Prehistoric Times Spinning was the invention of Minerva, the goddess of wisdom, in he lore of the ancients, and 'Arcas, king of Arcadia, developed the art about 1500 B. C.

The wife of Tarquin was credited with being an expert spinner, and a garment that she wove was worn by Servius Tullius and afterward preserved in the Roman Temple of Fortune.

According to Pliny, the honor of inventing weaving belongs to the Egyptians, but its origin is prehistoric, relates Dr. Frank H. Vizetelly, managing editor of the New Standard dictionary. There are many Biblical references that indicate that the Israelites were expert at this intertwining of threads to form cloth, but so also were the Persians and Babylonians, as well as other ancient nations, all of which earned fame through their products. Even the ancient Britons seem always to have had some knowledge of clothmaking, probably derived from the Gauls; who once peopled England. According to the Roman historians, Caesar's legions, when they landed in Kent, found the natives well advanced in the arts. The inhabitants of southern Britain were familiar with the dressing, spinning and weaving of flax and wool before the arrival of the Romans, but their neighbors, the Gauls, had practiced them even longer.

Marriage Makes for Lengthening of Life

-Detroit News.

Dr. Henry Fairfield Osborn, head of the American Museum of Natural History, New York, is all for the wedding bells and orange blossoms. He believes from a study of the facts and figures that a man has a much better chance married to survive the terrific strain of modern existence than if he stavs single.

Doctor Osborn bases his theory on a study of the careers of graduates of the class of 1877 of Princeton university. He had a record of those who married in the last 50 years and of those who remained single. Fortytwo per cent of the married graduates survived their fiftieth anniversary, while only 25 per cent of the bachelors are living today.

The graduating class of 50 years ago averages seventy-two years; with only 52 of the 172 men who matriculated with the class still living. Once married, the men of each profession not only lived 12 years longer on the average than the bachelors, but 45 per cent of them still survive, as opposed to 25 per cent of the single men.

"Some credit for this record must be given to the good housewives," says Doctor Osborn, "and to their ceaseless vigilance over overcoats and rubbers."

Fish Long Used as Food

From the misty past we can see an example of how much fish was relied on for food for the toilers of time. In Egypt, before 1463 B. C., the consumption of fish as a regular article of food was confined to the workers on the land and the foreign captives who had been made the industrial slaves of the nation. The workmen who constructed the Pyramids-those gigantic memori-

Periods of Rest, With Music Are Beneficial

Music twice a day has proved a remedy for "that tired feeling" in cotton mills.

WHY====

After three months' experiment, a textile company finds that fatigue is reduced among its machine operatives by stopping all work for 12 minutes at mid-morning and again for 12 minutes at mid-afternoon, and listening to music during these rest periods.

The music treatment has toned up the operatives so that the same number of employees produce as much, with two hours a week of time out for musical numbers, as they did formerly when they worked without rest periods. The music periods amount to 3 per cent of the working time of the employees.

Detailed studies had shown that weariness resulting from concentration at the machines showed most conspicuously about two-thirds through the afternoon. The music program was inaugurated to offset this fatigue. At ten o'clock and at three o'clock

work stops for twelve minutes. The power is completely shut off. In place of the whirring of machinery, the harmony of lively airs pervades the plant for the rest periods. Any form of relaxation is permitted to the tune of the latest song hit. The music is supplied by a reproducing phonograph, amplified and distributed through all the floors of the plant by loud speakers in each department.

Why Person Can Seem to Be Reliving Past

Dr. W. A. White, superintendent of St. Elizabeth's hospital, Washington, says that for one to feel suddenly that he has been in exactly the same situation before, with identical surroundings and people, is a common experience and is technically known as "paramnesia." Briefly explained, the reaction depends upon a little trick of the mind manifested by a momentary loss of a sense of time and space. The individual enters into an experience or a situation, obtains a fleeting impression of this situation, then the attention is momentarily attracted to something else. The period of time may be almost infinitesimal. Then upon the return of the attention to the original situation this lapse of time is lost to the individual and the period between the two experiences seems occasionally to expand into a long period, even into the remote past. Another explanation, which is based on more recent psychological investigations, holds that one's unconscious mind sees much more than the attentive conscious one and that a situation, even to its details, may be taken in without paying direct conscious attention to it. Then a moment later when the faculties of the conscious mind are at work on the situation, the experience seems to have been experienced before. Here again the lapse of time between the two impressions may be greatly overestimated and expanded.

Why Moth's Odd Tongue

The moth has a most peculiar tongue. It is rolled up in a tiny coll which looks like the hairspring of a watch, and this is on the under side of

Definite Pattern for

Cities Seen as Vital The growing practice of fitting American cities to a definite pattern rather than allowing them to grow as they will is disclosed in a report of the civic development department of the Chamber of Commerce of the United States on city planning and

zoning accomplishments. This practice, which originated twenty or more years ago, has steadily grown until at the present time more than 600 American cities have adopted some form of city planning.

"City planning," the report explains, "is the proper co-ordination of civic development, to the end that a city may grow in a more orderly way and provide adequate facilities for living, working and recreation.

"To serve the community best a comprehensive city plan must co-ordinate all physical improvements, even at the possible expense of subordinating individual desires. City planning applies the fundamental principles of business corporations to civic development. It means the budgeting of future improvements to obtain an orderly and uniform growth for the entire community and prevent overexpansion of one phase of development-at, the expense of others."

Health Department Is County's Great Need

Are you living in a county without an organized health department? asks Dr. R. G. Beachley in Hygeia, the health magazine published by the American Medical association.

If you do, you, are not receiving proper health protection from your local government. State departments of health cannot carry on intensive health work in every county in a state. Therefore the only way to maintain proper health standards is to have an efficient health department in every county.

No investment can yield greater dividends than money for public health, Doctor Beachley continues. A whole-time health department will reduce the amount of sickness from such diseases as typhoid fever, diphtheria, smallpox and scarlet fever by almost 75 per cent during the first five years of its existence, he declares.

The typical health department consists of a physician who is a graduate of a medical college with special training in public health work; one or two graduate nurses who have studied public health; one or two sanitary inspectors and a clerk-stenographer. If possible, a laboratory should be provided.

Shade Trees a Necessity

"The city of fine shade trees is the city beautiful" - Charles Lathrop Pack talking-"When the traveler gives thought to the world's most beautiful cities, he thinks instinctively of Washington and Paris; and in

you can really enjoy

> IF YOU smoke for pastime, most any cigar may often do. But if you want a cigar that really puts taste enjoyment into your smoking - and saves you money besides !- here's one that will doit: Havana Ribbon. And this is why:

> Havana Ribbon contains no bitter under-ripe top leaves of the tobacco plant. No flat-tasting over-ripe bottom leaves. No "clippings" or short ends to crumble and come out in your mouth. . . . But only long, true-tasting, flavorladen, fully-ripe middle leaves of choice tobacco plants.

> You naturally expect such tobacco in a higher-priced cigar. But have you ever heard of such a thing in a five-cent cigar? Isn't it just about the biggest piece of smoke news that has ever come before you? No wonder today's Havana Ribbon is riding the biggest wave of popularity in all the thirty years it has been on the market! At cigar counters everywhere-

MADE BY BA

Keep Plants Healthy

12

CICAL

"Many women do not realize that their indoor plants need baths almost as often as do their children, if they are to thrive," declares Prof. O. A. Johannsen af the entomology department af the Cornell university. Plants as well as persons need ular cleansing to keep them healthy. Some sort of spray must be used at fairly regular intervals to kill the insect parasites which constantly infest them. "Plant lice are especially common and threaten all varieties of growth. They attach their little white eggs to the under veins of the leaves, and the parasites suck out the juices from the stems and stalks. The plants, thus robbed of their nourishment, soon turn a pale yellow and die. "One of the best home treatments for plants, not only because it is cheap and accessible, but also because it is effective, is soap solution, which can be made at home in five minutes." This solution is made by shaving a quarter of a pound of soap or putting a quarter of a pound of soap chips into a gallon of boiling water. Allow it

Less Bickering With Fifty-Fifty Marriages

(Londres)

Work has replaced bickening in the home of the economically independent wife. according to at least one husband who calls his marriage a "fiftyfifty" proposition.

Writing in the Woman's Home Companion he says that instead of destroy-

by Frequent Bathing

4. "Hebrew of the Hebrews" (v. 5). This showed that he was of Hebrew parentage and not a proselyte.

5. Touching the law, a Pharisee (v. 5).

The Pharisees were of the sect most zealous for all the rites and ceremonies of Judaism.

6. "Concerning zeal, persecuting the church" (v. 6).

He proved his zeal by positive effort to stamp out that which was threatening Judaism.

7. "Touching the righteousness which is in the law, blameless" (v. 6).

So exactly had he conformed to the outer requirements of the law that he was consciously blameless.

III. A Sketch of Saul's Life (Acts 22:3, 27, 28).

In this sketch he gives us a glimpse of his birth, education and citizenship.

1. His birth (v. 3).

Though born at Tarsus, a city outside of Palestine he had been brought up in a strict Jewish home. Tarsus was the capital of the province of Cilicia. It was a city of prominence because of its commerce and culture. It was one of the three principal university cities of that period.

2. His education (v 3).

Born out of Palestine, he was sent to Jerusalem for his education. This fact shows that he belonged to a zealous family of Jews. His teacher was the great Gamaliel, a doctor of the law and the leader of the strict sect of the Pharisees.

His citizenship (vv. 27, 28).

He was by birth a Roman citizen because Tarsus was the capital of a Roman province. In the providence of God the great apostle to the Gentiles was given the prestige of a freeborn citizens of the empire. He was loyal to his country and proud of his citizenship.

The Joy of the Lord

Oh, believe, the joy of Christ is within you; give it room, let it spring up within you like a well of living wa ter, and you will rejoice in the Lord always, and again rejoice.-G. H C. Macgregor.

Conversing With the Angels There is no power on earth can prevent me from holding converse

with the angels, even though with my hands I feed pigs.-1.ydla Marie Childe.

als of the past-were fed almost exclusively on fish, and it was not till 200 years later that it became a food of luxury for the rich.

In "L'Alimentation Animale," by Monsieur Husson, an accepted authority in France, it is stated that Monsieur Mouchardat, who was entrusted with the drawing up of a report on hygienic progress, divided fish into different categories, according to their nutritive qualities.

Wild Animals Take Toll

In spite of constant warfare waged against the predatory animals by federal and state officials, hunters and trappers, predatory animals cost the farmers and stock raisers of the United States more than \$10,000,000 every year. These animals are coyotes, wolves, wildcats, mountain lions and a few bear, together with smaller animals commonly termed 'vermin," which include foxes, weasels, mink and skunks. Of these losses, the permitees grazing live stock on the national forests in 1926 lost more than 150,000 head of sheep and cattle, valued at more than \$2,-000.000

The Salesman Type?

Two men were sitting opposite each other in a Tube train. Presently one of them produced a notebook and proceeded to make a sketch of the other. After he had completed the drawing he closed the book and put it in his pocket.

The man opposite was both interested and gratified by this attention. and, leaning forward, said. "I presume you are an artist, sir?"

"No," replied the other, "I'm not exactly an artist, I'm a designer of door-knockers."-Pearson's Monthly.

Family Suicide

There is much less danger for the future of the race in overpopulation than in our present system of birth control for the fit and unlimited procreation for the unfit. There is practically no danger of race suicide, but there is great danger of family suicide. The human race will go on for millions of years, but it is certain that some of our finest and best families will leave no descendants and have no part in the future of America. -Anonymous Author in Harper's Magazine.

the insect's head. It looks quite small when rolled up,

but it can be uncoiled in a flash into a straight tube an inch or more in length.

Watch a moth visiting flowers, and you will see how it is used. The insect either remains hovering in the air or alights upon a petal; then the tongue straightens out suddenly, and is thrust into the innermost recesses of the flower to obtain the honey which is hidden there.

A few moments are spent in sipping, and then the tongue springs back into its coil and sway goes the moth to seek another flower.

The length of the tongue depends upon the flower visited by the particular kind of moth. Those which feed on the honey of sweet williams or stocks require only a short one; but a long tongue is needed by the species which visit Canterbury bells, lilies, or any other deep-petaled flower.

Why Cat Is Called "Tabby"

A tabby was originally a brindled or striped cat. The word is derived from Attabieh, a section of Bagdad formerly noted for the manufacture of watered or moire silk. This silk has an undulating or wavy surface produced by pressure after damping and heating. In England such silk was called "attabi," of which "tabby" is a corruption. Certain striped cats were called tabbies from their supposed resemblance to attabi silk. Strictly speaking, "tabby" has no reference to the sex of the animal. In modern usage, however, the term is applied to a female cat. Sometimes it is applied to cats in general, just as Dobbin is applied to horses .- Exchange.

Why Lyric Was Rejected

An Australian poetess has decided that it is a tough trick to write for a practical minded government. A school teacher, she wrote some verses about various native birds and forwarded them to the education department in the hope that they would be included in some of the elementary school readers. One of her characters. a crow, was made to say, "This lamb looks weak, I'll whet my beak." After three months' wait this particular lyric came back with the following official notation: "Statement regarding crows not approved. Suggest lines be altered to show value of crow as check to blowfly pests."

thinking of them he delights in the memory of their wealth of trees. In each of these cities great architects and gifted artists have created buildings of rare splendor and stately grace. The chief charm of both cities, however, is found in the magnificent shade trees which line their streets and beautify their lawns, parks and public grounds. Who can picture Sixteenth street or Massachusetts avenue, or any of the streets of Wash-ington deprived of shade tree beauty! Visualize without their trees the city streets and parks with which you are familiar, and see what becomes of the City Beautiful !"

Western Architecture

The western, or prairie, type of architecture derives its chief characteristics from the western prairies on which it originated; the horizontal elements in the design being heavily accented, as against the more usual practice of emphasizing vertical lines, such as is done in French and English small home planning.

The western type of home usually is built in square, box-like shape, the roof low-pitched and with a widely spreading overhang.

Detail work is heavy, and the windows carry out the squareness of the home in their own shape. They are used with or without dividing mullions.-Exchange.

No Aid to Walls

Bureau of standards tests have demonstrated that wetting the bricks will not add to the compressive strength of brick walls. Clay brick walls will be as strong when aged in air for 60 days as they will be if kept damp for a period of about one week after construction, the tests reveal.

Unfair to Home Town

When a boy from a country town goes to a city and makes good, his neighbors seem to think that some miracle has been performed, or that he acquired all his prowess away from home .- Waldport (Ore.) Tribune.

Resists Rot and Vermin

Sheet steel, because of its resistance to rot, is coming into wide useage for pergolas, trellises and other garden furniture. Bugs and gnats do not infest the steel products and boring birds have no effect on them. to simmer slowly until the soap is dissolved, then remove it to cool. This will keep for a long time, and can be used at regular intervals. A whisk broom will serve as a sprayer. Dip it into the solution and give the plant a good bath, shaking the soapy water under and over the leaves. The soap cleans the leaves, but a film remains

over the breathing apparatus of the bugs.

Many Old Cloisters

in City of London Ancient cloisters, or parts of them, are still to be found in many parts of Loidon; they are reminders of the days when the city boasted spacious monastic establishments.

In St. Bartholomew-the-Great at Smithfield-relic of a wealthy priory -are some bays of the old cloister. A Zeppelin bomb in 1915 helped to reveal a further portion of this, buried under the present ground level. Cloisters in miniature, with wooden archings, may be seen at Ely place. adjoining the chapel-all that remains of the palace of the bishops of Ely. The cloister-garth is planted with fig trees.

St. Paul's has only a few fragments of its old cloisters. They were destroyed with the fabric of old St. Paul's in 1666. It is at Westminster abbey that you may see the finest cloisters in London. Besides the Great cloisters there are the Little cloisters, where the monks' infirmary once stood, and the Dark cloister that leads to the Norman undercroft.

ing the home the maintenance of marriage as a union of two economically independent persons causes the home to be even more appreciated than it was under the old idea of matrimony. Since both husband and wife are away from their home all day, it is his contention that both appreciate its comforts more when they return to it together at night.

"It seems to me that a fifty-fifty husband's greatest reward," says this fifty-fifty husband, "lies in being married to a woman who, because she has found a satisfactory channel of expression, is a well-balanced personality. The fifty-fifty husband is spared emotional crisis. I trace this to the fact that both of us are workers in the same world and there is no chance for imagination to function overtime." When babies come, the writer concludes, his wife will remain with them until they reach school age and then will return to her work.

Watercress Good Food

The list of foods the doctor says you should eat has been augmented by a new one, watercress. This familiar garnish for meat and salad is a remarkably rich source of the vitamine necessary for growth and of the scurvy-preventing vitamine C., Dr. Katherine H. Coward and P. Eggleton, of the University of London, have found. It contains small quantities of vitamine D as well in its small green leaves. The green shows considerable seasonal variation, however, in its growth-promoting properties, the investigators have found, being more effective with laboratory animals in this respect in spring and summer than in winter.

Breaking Ocean Cables

Researches with reference to the breaking of telegraphic cables have revealed the facts that there are parts of the ocean bed, particularly on steep slopes along the edges of the continents, where great changes frequently occur. The importance of properly selecting the location of a cable is shown by the fact, cited often in this relation, that the military and naval reserves were called out in Australia once, when the simultaneous interruption of two cables cut off communication with the rest of the world for 19 days and gave rise to the fear that war had broken out in Europe.

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especial-ty accidents, sales of real estate, fires, im-portant happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Miss Margaret Shreeve, Ambler, Pa., and Miss Estella Essig, Keans-

Mrs. Geary Bowers, returned home on last Saturday, from Hanover Hospital, very much improved.

With the wheat about ready to cut, the hay to be made, and corn fields needing cultivation, the farmers are facing a discouraging situation on account of the almost daily rains and the saturated condition of the fields.

Henry Clay Englar, wife and daugh ter, Margaret, of Redondo Beach, Cal. arrived by auto at the home of the former, in town, Tuesday evening, at Littlestown, Pa., visited Mr. and Mrs. 9 o'clock. The trip was made in 9 days actual running, a distance of over 3300 miles, averaging over 350 miles a day. They exepect to remain until July 10. The Southern route was taken via El Paso, Texas; Mem-

Union Services During July.

The Lutheran, United Brethren, and Reformed Churches, of Taneytown, will unite in a series of union services during the month of July, each ser-vice to begin at 8:00 P. M. The schedule so far as arranged is as follows:

July 1-Lutheran Church. July 8-United Brethren Church, ermon by Dr. Charles F. Sanders, of

Gettysburg. July 15-Reformed Church, sermon by Rev. George A. Brown.

Announcement of the services for the remaining Sunday evenings of the month will be made later.

Home From California.

(For the Record). Robert Fuss, of Emmitsburg, arriv-ed home Friday from an eight months trip to California. He was accompanied by his cousin, Miss Maud Ed-wards. They drove through in an automobile, making the entire trip in 25 days having traveled 5500 miles in that time.

They visited all points of interest on the way including the Yosemite Valley, Muir Woods, San Francisco, and the big trees along the Redwood Highway in California. Having reached Portland, Oregon, they traveled east over the Columbia river highway to Spokane, Wash., and from there to Glacier Park, Mont. In crossing Idaho they were within a few

miles of the Canadian border. From there they traveled south to the Yellowstone Park where they

found the weather very cold, requir-ing the wearing of winter clothing. In crossing the Dunraven Pass the road was cut through the sonw banks three feet higher than the car.

After a few days of sight-seeing in the Park they started east over the Custer Battlefield Highway which lead into the A. Y. P. highway through the Black Hills of South Dakota, Minnesota, Wisconsin and into Chicago, Ill. From there they traveled over the Harding Highway to Pittsburg, Pa., and the Lincoln Highway to Gettysburg. The entire trip was made without

any trouble except three punctures. Most of the roads in Montana and Wyoming were in very bad condition owing to heavy rains. They had 2000 miles of paved roads, about 1500 of good gravel and the rest ungraded dirt roads.

LAST PAGE EDITORIAL. Known "By their Fruits."

It is strange, but true, that some of the most conspicuous failures as financiers in their own behalf, are the most knowing advisors for the finances of others-those who assume to advise big deals and investments as though they know by actual experience just how such matters can be surely and most successfully handled. Frest of the day and evening. Grocery stores to close at no

It certainly must take a lot of nerve for such folks to pose as pace setters and path-finders, as well as have a lot of dependence on the blindness of others. As a matter of fact; they deceive but few, for every community knows its ne'er-do-wells, and it is largely only the ill-informed who are for a time ,taken in.

But, they can, and do, represent a dangerous influence. Not being responsible, themselves, they may at times mislead others into the making of wrong steps. Their lack of knowledge of good business sensethe life-long practice of which has kept themselves at the bottom of the heap—is sometimes so attractively and confidently bawled out that others are carelessly misled, and take steps into dangerous ventures that are followed by long-standing bad results.

So, it is always best to examine the record of those who are so long on advice, and find out how many successes are plainly in evidence back of the advice given. "By their fruits" is the best proof of the goodness of trees-and of men.

by order of the State Roads Com-mission this 21st. day of June, 1928. JOHN N. MACKALL, Chairman.

6-29-2t Can't Talk To Wife,

Too Cross and Nervous "Even my husband couldn't talk to me, I was so cross and nervous. Vinol has made me a different and happy voman."-Mrs. N. McCall.

Vinol is a compound of iron, phos-phates, cod liver peptone, etc. The very FIRST bottle makes you sleep better and have a BIG appetite. Nervous, easily tired people are surprised how QUICK the iron, phosphates, etc., give new life and pep. Vinol tastes delicious. Robert S. Mc-Kinney, Druggist, Taneytown, Md.

burg, N. J., and Miss Beulah Englar, New Brunswick, N. J., returned to their homes here, last week, from their teaching positions.

Considering the cold, rainy weather we have had this year, it is difficult to realize that 1928 is already half gone, and that we are about to make the tunrn to another Fall and Winter season, and a new year.

Mrs. R. H. Alexander was one of the fifteen Carroll County ladies who received a certificate for attendance and interest for four years at the Rural Women's Short Course, at College Park, University of Maryland.

During the heavy rain on Monday afternoon, a heavy local windstorm developed along the Monocacy at Bridgeport, which uprooted trees, and did considerable damage to buildings at Russell N. Eckard's and the Arnold farm.

Mr. and Mrs. Carroll Feeser, Miss Margaret Shipley, of Pikesville; Mr. and Ms. Will Gren, sons Billy and Grayson, of Park Heights, Baltimore, visited at the home of Mr. and Mrs. B. J. Feeser, Taneytown.

Due to a broken rail, eight cars of our freight train south, on Wednesday night were derailed and track torn up, near Harmony Grove. This resulted in the train service from Littlestown south, being annuled on Thursday, until evening.

Independence Day (July 4th.) being a National Holiday the Postoffice will only be open for the regular dispatch of mails. Money order window will be closed during the day. The rural carriers will not go over their routes. -Harry L. Feeser, Postmaster.

Mr. Wm. E. Conaway, owner of the Conaway Motor Company, of Westminster, has just returned from Ohio with two new White DeLuxe Motor Coaches to add to his fleet of transportation vehicles operating between Emmitsburg and Baltimore, via Taneytown and Westminster. These coaches are of the latest design, very striking in appearance and being equipped with balloon tires and dual spring cushions are the last word in riding comfort.

Far in advance in washing design and construction, the beauty of Dexter, with its all-nickeled copper tub, remains unmarred by years of service. Its super-agulator creates an agitation unsurpassed by any other method-flushing the dirt from the meshes of the fabric by a combination of aeration, suction and compression-washing a tubful
