

THE MAN WHO SAYS HE IS "TOO BUSY" TO READ, IN THE SUMMER TIME, IS NOT A GOOD BUSINESS MAN.

# THE CARROLL RECORD

THERE IS NO BETTER MOTTO THAN—PROTECTION TO HOME, ITS INTERESTS, AND INDUSTRIES.

VOL. 37

TANEYTOWN, MARYLAND, FRIDAY, JULY 4, 1930.

NO. 1

## COUNTY GAINS 2550 IN POPULATION

Final Figures are Announced for Carroll County.

Contrary to the expectations of many, Carroll county showed a gain of 2,550 people in the past ten years, bringing her population figure up to 36,795, according to figures announced by Supervisor G. Edw. Myers of the Second Census District. The gain, however, was in several towns—most of the districts lost. This report is the last on population to be given out at the Frederick headquarters for the counties of Frederick, Carroll, Howard, and Montgomery, and completes the enumeration for this district.

1930	1920
Union Bridge	1,357
Middleburg	1,082
*Mt. Airy	1,622
Franklin	1,105
Taneytown	2,503
Myers	1,707
Berrett	1,638
*Hampstead	2,404
New Windsor	1,817
*Freedom	2,552
Uniontown	1,904
Manchester	3,069
Woolery's	2,628
*Westminster	8,900
*Springfield Hospital	2,507
Totals	36,795

34,245  
\*Shown gain.

The following are the figures for the larger towns, the other towns were enumerated with the District.

1930	1920
Westminster	4,462
Taneytown	938
Hampstead	905
Union Bridge	873
*Mt. Airy	845
Sykesville	661
Manchester	643
New Windsor	503

\*645 in Carroll, and 200 in Frederick county.

Only Taneytown district, to the northwest, and Freedom, to the southeast, showed gains in farms operated, other districts evincing a rather even decline. Berrett district gained, and Middleburg lost, by one farm. The drop for the county was 242. Figures by districts:

1930	1920
Union Bridge	49
Middleburg	122
Mt. Airy	100
Franklin	186
Taneytown	328
Myers	256
Berrett	208
Hampstead	224
New Windsor	178
Freedom	174
Uniontown	245
Manchester	387
Woolery's	391
Westminster	358
Totals	3,206

3,443

## "GOING ON" THIRTY SEVEN.

The Carroll Record had its 36th birthday with the issue of last week. We did not call attention to it then, for the reason that we felt some might take it as a hint for birthday gifts; and to have received any would have been embarrassing. But, now that the date has passed, we state the fact that The Record is now "going on" 37 years old—not so youthful, but still in the ring.

Speaking seriously, we think it about time for the Editor to be tired of the job, and for the job to be tired of the Editor. This is literally true, whichever way it is taken, though "tired" may not be the best word to use in expressing what we mean.

We feel a great deal like a friend who wrote us the other day about himself, when he said, "In these days when youth is in the saddle, it is difficult, if not impossible, for a man of my age to make good." And so it is.

## MISS LAMBERTON TO WED.

The wedding of Miss Isabel Stedman Lambertson, daughter of Mr. and Mrs. B. Paulding Lambertson, will take place at the country home, "Antrim," of her grandmother, Mrs. H. M. Clabaugh, Taneytown, on Saturday afternoon at 4 o'clock. A reception in the garden follows the ceremony. There will be a large house party over the week-end, of the wedding party and relatives and friends from Philadelphia and Washington.

## A BASE DECEIVER.

An El Dorado woman is praising her husband because she found everything about the house okay when she returned from a long visit, but what the husband hopes she won't find out, the Times says, is that he forgot to feed the goldfish and that after they succumbed he carried them to a store and matched them with six live fish which he placed in the bowl the day she arrived home.—Kansas City Star.

A Swedish genius has invented a regulation-size umbrella which can be folded and put away in an overcoat pocket. It sounds good, theoretically; but then we should probably mislay the overcoat.—Detroit News.

## EDWARD O. WEANT DEAD

Well Known County Attorney Victim of Sudden Attack.

Edward O. Weant, widely known Carroll County Attorney, member of the State Tax Commission, and Chairman of the Democratic State Central Committee of the County, died at Union Memorial Hospital, Baltimore, early Saturday morning, last, from internal hemorrhage. He was taken ill on June 10 at his home in Westminster, following a visit to Baltimore, and prior to a proposed visit to Union Bridge.

His illness was of a most serious character from the first, and his being taken to the Hospital, the evening before his death, was with the hope that an operation might be performed that would save his life; but it was not performed.

His age was 59 years and 7 months. He was the son of the late John Washington and Hannah Miller Weant, at Double Pipe Creek, now Detour. After attending the local public school and Edgehill Institute, Littlestown, Pa., he studied law under the late David N. Henning, then States Attorney, and was admitted to the bar in 1895.

He was twice elected State's Attorney of the county—1899 and 1911. In addition to his other official positions, he was president of The Birnie Trust Company, Taneytown; director of the Farmers and Mechanics Bank, Westminster; the Mutual Fire Insurance Company of Carroll County, and of the Amsterdam Casualty Company of Baltimore. He was also a member of the Masonic, Knights of Pythias and Elks Lodges, and of the Maryland and American Bar Association.

Mr. Weant had a wide legal experience, both in general practice and as a criminal lawyer, his last important case being chief attorney for Paul W. Edwards, who was recently sentenced to 18 years in the penitentiary, an appeal to the Court of Appeals for a new trial being now pending, the same having been filed by Mr. Weant.

He was married in 1904 to Miss Virginia S. Shaw, daughter of the late Dr. Frank T. Shaw and Martha C. Shaw. His widow survives him, with one daughter, Mrs. W. Dana Rudy and one son, Edward Oscar Weant, both of Westminster; and also by two sisters, Mrs. F. J. Shorb, Detour, and Miss Rhoda M. Weant.

He was a member of St. Paul's Reformed Church, Westminster. Funeral services were held on Monday afternoon from his late residence on Willis Street, Westminster. The services were in charge of his pastor, Rev. Dr. Harry Nelson Bassler. Interment was in Westminster cemetery.

Mr. Weant was widely influential as a political leader, and in every other direction in which his interests were enlisted; and although his zeal and decisions naturally conflicted at times with the interest of others, his natural geniality drew to him a large circle of friends and followers, not exceeded by that of any other man in the county.

The funeral was one of the largest ever held in Westminster, and perhaps the largest in point of well known men from throughout the state in attendance. The honorary pall-bearers consisted of the following: Governor Albert C. Ritchie, Wm. S. Gurdy, Jr., Comptroller; Thomas H. Robinson, Attorney-General; Jas. A. Young, Clerk Courts of Appeals; Senator Millard E. Tydings, Ex-Senator; Cabell Bruce, Jesse D. Price, chairman State Tax Commission; Judge Oscar Leger, Judge Francis Neal Parke, Judge Robert Moss, Judge William Henry Forsythe, Jr.; Eugene O'Dunn, A. C. Bond, Judge Eugene O'Dunn, Charles H. Knapp, William Lee Rawls, President Baltimore City School Board; John M. Dennis, State Treasurer; J. Arthur Nelson; Guy W. Steele, Michael E. Walsh, Ivan L. Hoff, State's Attorney, Theodore F. Brown; William L. Seabrook, Charles O. Clemons, O. Eugene Walsh, James E. Boylan, Jr.; A. Earl Shipley, John L. Reifsnider, Jr., Alonza B. Sellman, George A. Arnold, Arthur W. Feaser, Edward O. Cash and Henry Klebe.

## REV. WALCK, TO SUNBURY, PA.

Announcement has been made in Sunbury, Pa., that Rev. Chalmers W. Walck, pastor of Grace Reformed Church, Frederick, has personally accepted a call to the First Reformed Church, Sunbury, and will assume charge of his duties there on Sunday, September 7. Rev. Mr. Walck has not formally accepted the call, as his resignation to the consistory of the local church has not yet been presented.

Rev. Mr. Walck will succeed Rev. E. Roy Corman, who left the church early in the Spring, and according to the announcement, is expected to move with Mrs. Walck and Miss Gloria Walck the third week in August into the parsonage on Chestnut street, Sunbury, which is now being put in order. Rev. Mr. Walck has an address in Sunbury last winter and when the vacancy occurred in the Spring, he preached a trial sermon, was voted upon by the consistory of the church and later ratified at a congregational meeting, it was stated.

Rev. Mr. Walck has been pastor of Grace Reformed Church, Frederick, for the past six years coming from St. Paul's Reformed Church, Westminster, where he served for eight years. Prior to that time he had been in Dayton, Ohio.

The more friends you have, the more gossip you will hear.

## BOARD OF EDUCATION SPECIAL MEETING.

Arrangements made to Continue Union Bridge High School.

A special meeting of the Board of Education was called to order in the office of the Board, Thursday, June 26, 1930, at 7:30 P. M. Commissioner Slingluff was absent. The bills presented to the Board were approved and ordered to be paid.

The Superintendent reported having received the budget back from the County Commissioners, and called attention to several very important disallowances. The first disallowance noted was the total amount of the bid of E. E. Stuller for the Sykesville building which was \$46,670, reduced by the County Commissioners to \$45,000, making therefore, a shortage of \$1,670. The second item was the disallowance for the insurance necessary, amounting to \$2400, approximately, to cover the insurance of children on busses. As this item is a part of the contracts of the bus contractors, the Board will have to be reimbursed, for it as it is mandatory.

In spite of the disallowance in the budget the Board gave out the contract for the construction of the Sykesville building for the amount of the bid, which was \$46,670 to E. E. Stuller, of Taneytown, Md., with the understanding that work is to start at once, and that the building is to be ready for occupancy not later than March 1, 1931.

Superintendent Unger reported the securing of quarters to house the High School, at Union Bridge, through the generosity of Mr. LeForge, Superintendent of the Lehigh Cement Works, who agreed to furnish us with the necessary space in the old college building, now used for dormitories and offices, at a rental of \$50.00 a month, the Board of Education to make all alterations and keep up such repairs as are necessary; and to house the elementary school in the portables on the school ground, and on the first floor of the main building in Union Bridge; the second floor of this building to be barricaded from further use. The Board approved the above arrangement.

Since the Oak Grove School was destroyed by storm June 18 and as the building carried no storm insurance, it is a total loss. The low enrollment at this place does not justify its being rebuilt. The children of the community will therefore be transported to the Taneytown School.

The contract for the transportation of children to the Mechanicsville school was awarded to Marion B. Core, and the contract for the route from Finksburg to Westminster to Benton H. Stoner.

In compliance with an universal demand on the part of the people in Westminster that the Chemical toilet system at the Westminster High School building be replaced with a proper sanitary flush system, the Superintendent laid before the Board the conditions of the situation. In a joint conference with the County Commissioners, on June 16, the County Commissioners agreed to permit the installation on the part of the Board of Education of the proposed kind of equipment, and to construct the necessary building as an addition to the present school building, providing that the Board of Education would accept a warrant for the expenses entailed. As the proposition was placed before the Board of County Commissioners before the levy was struck, the Board of Education does not feel that it is incumbent upon it to accept a warrant, and unless the County Commissioners will furnish the necessary funds in cash, the Board can not undertake the work. The Superintendent is authorized to complete all plans and specifications and to prepare a report estimating the cost, and present it to the County Commissioners with the above understanding.

The Superintendent was given authority to include in the coal specifications, the alternate of the A. K. Althouse Company, along with the Consolidated Coal Company from the George's Creek Region, and the Washington Mine No. 5.

## MAKE FARM BUILDINGS SAFE.

An insurance agent in Stamford, New York, who does a large fire insurance business among farmers, gives the following suggestions to farmers, as to how to prevent fire losses.

Equip buildings with good lightning rods.

Salt the hay in storing it away in barns, and help to prevent spontaneous combustion.

Make all chimney's safe, especially by examining them for cracks in the attic, and above the roof.

Place gasoline engines in a separate building, and keep dust away from them to prevent back-firing.

On roofs, use good grade of slate surfaced asphalt shingles, or a metal shingle.

## WESTMINSTER MAN HURT.

Raymond Diehl, near Westminster, suffered severe scalp wounds when a small touring car in which he was riding, driven by Clarence Sies, Westminster, and a sedan driven by Henry Collins, Littlestown, R. D. 4, collided on Frederick St., Pennville, at 10:40 Sunday night.

Collins was approaching Hanover at the time. Sies claimed to have pulled out of a side alley, but was sued by several witnesses to have been traveling on Frederick streets. Both cars were badly damaged. Patrolman Cox, of Gettysburg, investigated.

## FOR GREATER ENFORCEMENT

Public Sentiment Claimed to be Helping Officials.

With the formal transfer of Prohibition enforcement from the Treasury to the Department of Justice, which marks the beginning of Amos W. Woodcock's service as Prohibition Enforcement Chief, the administration entered, on July 1, on the most complete dry-enforcement program attempted since the passage of the Volstead Act.

Dr. James M. Moran, in turning over charge of the directorship of the Prohibition Bureau, said that there had been notable advance in building up public co-operation in the enforcement of prohibition. There came a new era in public co-operation, according to Dr. Moran. Public spirited groups joined with the Federal enforcing agencies to prosecute the grafters and to dry out the speakeasies and bootleggers, he said. "From that time on the administrator's job was made less difficult," said Dr. Moran. "He had obtained tremendous moral support and thereby was stimulated to better accomplishment."

"Liquor sources which formerly were pouring out a bootleg supply in large volume prior to this administrator's appearance on the scene have been checked. There is a more wholesome respect for Federal authority and Federal law. There has grown up inevitably a better spirit of co-operation among local officials newly elected to office to supplant those who were recreant to their oaths of office."

## ONE HUSBAND TOO MANY.

Clarence Tilden Myers, Mt. Pleasant township, filed a petition with Judge Donald P. McPherson, in Adams County, Pa. court Monday asking the court to dissolve an alleged bigamous marriage performed in Lancaster more than thirty years ago.

In the petition it was stated that Myers married Lucy J. Maul, of Lancaster, in the latter city, on May 18, 1900. The Rev. Charles L. Fry, pastor of the Lutheran church there, officiated.

At the time of the marriage, the bride was already married to Louis C. Cassell, the marriage having been performed at Camden, New Jersey, June 6, 1896, according to Mr. Myers' petition. The first marriage was performed by the Rev. Sanford M. Nichols, the petition states, and was not annulled before the woman's second marriage venture.

According to the petition, Mr. Myers was "an innocent and injured party" to the marriage, and is asking that the marital band between him and Lucy J. Maul be severed.

Myers and his wife have been separated for seven or eight years, according to reports. They have four children.

The separation is understood to have resulted from Mrs. Myers asking her husband for money to secure a divorce from Cassell. That was Mr. Myers' first intimation that his wife was already married.

Mrs. Myers is residing in New Oxford.

## THE ORPHANS' COURT.

Monday, June 30th., 1930.—Elmer Walters, received order to withdraw funds.

Esty S. Abbott, executrix of E. Benton Hann, deceased, reported sale of personal property, settled her first account and received order to deposit funds.

Minnie M. Wisner, administratrix pendente lite of Lewis H. Wisner, deceased, settled her first and final account.

Lillian E. Roberts, administratrix of Walter W. Roberts, deceased, returned inventory money, settled her first and final account and received order Court.

Katharine B. Pittinger, administratrix of Milton A. Pittinger, deceased, settled her first account.

Margaret H. Bankard, Emily H. Keefer, Treva H. Bankard and Mary E. Hull, administrators of J. Cornelius Hull, deceased, returned inventor's personal property and debts due.

The sale of real estate made by J. Clarence, Fair Ruth and Roberta Blizzard, executors of John W. Blizzard, deceased, was finally ratified by the Court.

The Union Bridge Banking and Trust Company, executors of Hannah A. Dotterer, deceased, received order to sell stock (bank).

Letters of administration on the estate of Augustus E. Blume, deceased, were granted unto William M. Blume, lho received warrant to appraise personal property and order to notify creditors.

Letters of administration on the estate of Edward O. Weant, deceased, were granted unto Virginia S. Weant and W. Dana Rudy, who received warrant to appraise personal property and order to notify creditors.

## PUBLISHED ON THURSDAY.

In order not to fracture the Post-office holiday regulations, nor to impose on the good nature of postal employees by giving them extra work on a holiday, this week's issue of The Record was printed and mailed on Thursday afternoon. As we gave notice in last issue that it would be necessary to have all matters for publication in our office by "Thursday noon," we trust that nobody has been inconvenienced by publishing The Record on Thursday, following the plan of the Westminster papers.

The telephone companies require 1,000,000 new poles annually. Raise telephone poles, farmers!—Dallas News.

## THE COUNTY TAX RATE REMAINS AT \$1.65

A Summary Showing How Taxes are Received and Spent.

The County Commissioners have fixed the tax rate for the coming year at \$1.65 on assessable real and personal property, the same rate as for several years past; notwithstanding the fact that included in the levy is the sum of \$53,118.00 for schools, for capital outlay, including a new building for Freedom district. The assessable basis of taxable real and personal property is \$35,094.88, which will produce a round of \$552,686.33.

The income to be derived from taxes on banks at the rate of \$1.00 and from county securities and non dividend paying corporations at thirty cents, it is estimated will produce a further revenue of \$148,090.60; making the county's total estimated revenues for 1930-1931, \$700,776.99. There is levied for school purposes the sum of \$360,916.46 and for all other county purposes the sum of \$339,860.53.

The chief items in the levy for county purposes are \$98,002.00 to pay outstanding notes and warrants; \$40,000.00 to take up lateral road bonds; \$40,000.00 for county roads; \$20,000.00 for incorporated towns; \$15,000.00 for election expenses; \$10,000.00 for care of insane; \$9,000.00 for Circuit Court expenses; \$8,000.00 for fire companies of the county; \$7,000.00 for county home; and \$6,000.00 for jail.

In the school budget submitted by the Board of Education it was estimated that the cost of maintaining the schools of the county for 1930-31 would be \$497,188.74, of which sum there will be received from the State of Maryland the sum of \$120,978.60. This sum of \$376,210.14 was asked from the county, and the sum of \$360,916.46 granted; giving to the Board of Education from all sources for the coming year the sum of \$481,895.06 for the school purposes. Of the county's tax receipts of \$700,776.99, the Board of Education will receive 51.51 percent, leaving 48.49 percent for all other county purposes."

## THE FISH LAWS—AGAIN.

The open season in Maryland on bass and other fresh water fishes, except trout, above tide-water is from July 1 to Nov. 30, both dates inclusive. It is unlawful to take any species of fish above tidewater, except by means of rod, hook and line at any time, except bait fish may be taken by use of a dip or landing net or seine not over six feet in length nor greater than three feet in depth.

It is unlawful to take in any one day more than 10 bass. Unlawful to take any bass less than 10 inches. Unlawful to take any bass on any out line or trot line. Unlawful for any person over 16 years of age to fish in any waters of this state above a point where the tide ebbs and flows, without first procuring an angler's license.

Licenses may be secured from the Clerk Circuit Court, in person or by mail on application blanks furnished by the Clerk, provided remittance accompanies the application, and the Clerk is given the name, residence, postoffice address, age and occupation, at the following cost: Resident of State, \$1.25; Non-resident of State, \$5.50; License must be carried by the person to whom it has been issued while fishing and buton must be worn in plain view at all time while fishing.

Unlawful to loan your license to another. Penalty for fishing without license, \$10.00 to not more than \$50. Unlawful to use a gig or gill iron or have in possession with lights in or near the waters of this state above tide. It is lawful to set outline or trot line, however no one line shall contain more than 5 hooks, for the purpose of catching fresh water fish, except bass. It is a penitentiary offense to use any dynamite in any of the water of this State for the purpose of killing fish. Penalty \$100.00 to \$300.00. All owners of dams on any of the waters of this state are required to place at least one fish ladder so as to permit the fish free access up and down the stream.

Hunting licenses and tags for 1930, have been received by the Clerk of the Circuit Court and now are being issued. The license fees are: Resident of county \$1.25; State-wide license \$5.25; Non-resident of State of Maryland, \$15.50.

J. GLOYD DIFFENDAL, Deputy Game Warden.

## SPECIAL SERVICES-TANEYTOWN U. B. CHARGE.

Slough Sisters, Gospel Singers, of York, will sing. At the services next Sunday, special featured programs have been arranged. The Bair Station Union Chapel folks will be present at all the services. Special music will be rendered by the Bair Chapel orchestra, Male Chorus and Women's Chorus, in addition to the Slough Sisters, famous York County Gospel Singers.

The scheduled services are as follows: 9:30 Sunday School; 10:30 Preaching Service in the Taneytown U. B. Church. Lunch at the grove in Harney. 2:00 P. M., Open Air Service in the Grove at Harney. Evening Services will be held in the Harney Church as follows: 7:00 C. E. Society and Preaching Service, at 8. Everybody is invited to these services. Come and spend the day with us.—Earl E. Redding, Pastor.

## MONOCACY BATTLEFIELD

Gets an Appropriation of \$5,000. for Improvements.

Congressman Zihlman has notified the Monocacy Battlefield Association that the bill appropriating \$5,000 for marking the Battlefield of Monocacy has been passed by both houses of Congress and has been signed by the President. The money will be available on and after July 1. Just in what way the money will be used is not determined. The bill authorizes the Secretary of War to acquire the land, not exceeding one acre, free of cost, fence and build an approach to it and erect a marker.

The Battlefield Association will meet and determine in what way they will ask the Secretary of War to expend the money, and where the marker should in their judgment be located.

The sum appropriated is so much smaller than that asked for that it seems wholly inadequate to the purpose. However, it is believed, that if a beginning be made a larger appropriation will be obtainable in the near future.

The battle fought at Monocacy on July 9, 1864, delayed the Confederate march upon the National Capital twenty-four hours, just time enough to prevent its falling into the hands of the enemy. In that aspect it was a most important battle and besides it was a bloody engagement. The loss on each side was approximately 700 in killed and wounded, besides the prisoners taken. In his address at the unveiling of the monument at Frederick Junction on the 14th. New Jersey Regiment, on July 11, 1907, Major John C. Patterson, of New Jersey, said: "The 14th. New Jersey went into this battle with 256 rifles. The next morning only 92 answered to their names.

Out of eight captains we lost three killed, one mortally wounded, four others wounded one lieutenant-colonel and one adjutant wounded. Our color sergeant was killed and out of seven men of the color guard, two were killed and three wounded." Other regiments on both sides lost as heavily. Surely this battlefield should be recognized, and this battle given its proper place in history.

Recently the Battlefield Association has had placed on the battlefield twenty-one markers indicating what transpired at various parts of the field. These will be helpful to persons studying the different phases of the battle and the location of troops during the engagement.—Frederick News.

## PRICES OF BEEF SHOULD BE REDUCED.

Consumers should find current prices of beef considerably lower, Mr. C. B. Denman, Member, Federal Farm Board, said in a statement issued today.

"Wholesale prices of dressed beef," Mr. Denman explained, "have declined sharply during recent months and, according to figures issued by the Bureau of Agricultural Economics of the U. S. Department of Agriculture, wholesale prices of beef at Chicago, for example, are \$4.50 to \$7.00 per cwt., or 20% to 37% lower than a year ago. The greatest reductions have been on the cheaper grades of beef, which run from 25% to 37% lower, while the top and medium grades have been reduced from 20% to 28% below prices of a year ago.

"Producers of beef have taken severe losses in prices during the past months. Beef cattle are \$2.00 to \$2.50 per cwt. lower at Chicago than a year ago.

"The housewife can reasonably expect retail prices of beef to reflect the full reduction possible under present wholesale beef and live cattle prices."

Mr. Denman expressed the belief that some of the reduction in cattle prices could have been prevented if the producers are better organized for orderly marketing. During recent weeks many of the markets have had greater receipts than were needed on certain days. Mr. Denman said he thought the present condition reflected a temporary surplus of beef rather than a national surplus of beef cattle, and with consumers getting the full benefit of the lower price level, the temporary surplus would quickly disappear and more stable prices would return.—Federal Farm Board.

## FREDERICK COUNTY TAX.

The County Commissioners of Frederick County, at a special session last Saturday, fixed the county tax rate for the next fiscal year, beginning July 1, at \$1.30, the same as last year.

The rate was based on an assessment of \$65,624,441 and will yield \$948,932.74. The largest single item in the budget is \$425,000 for schools. The next largest item is \$235,000 for roads, bridges and road machinery.

## MARRIAGE LICENSES.

Samuel P. Thomas and Clara E. Fultz, Ashton, Md.  
John William Kauffman and Bertha Belle Shipley, Westminster.  
Paul L. Study and Elsie M. Bish, Westminster.  
William H. Earnest and Evelyn G. Murray, West Winfield, Pa.  
Warren E. Shamer and Lillie Miller, Patapsco, Md.  
Edwin H. George and Amy L. Zinn, York, Pa.  
John C. Doerr and Eva A. Phillips, Washington.  
George Clifford Bowersox and Florence B. Waller, Hanover.  
Robert Redding and Maryland Bowen, Baltimore.  
Horace Rogers and Marie Simpson, Cooksville, Md.

# THE CARROLL RECORD

(NON-PARTISAN)

Published every Friday, at Taneytown, Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.  
G. A. ARNOLD, Pres. D. J. HESSON, V. P.  
G. W. WILT, Sec'y. P. B. ENGLAR, Treas.  
WM. F. BRICKER, JAS. BUELLINGTON.

TERMS—Strictly cash in advance. One year, \$1.50; 3 months, \$1.00; 6 months, 75c; 2 months, 50c; single copies, 3c.

The label on paper contains date to which the subscription has been paid. ADVERTISING rates will be given on application, after the character of the business has been definitely stated together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3th, 4th, and 7th Pages must be in our office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

All articles on this page are either original or properly credited. This has always been a fixed rule with this office, and we suggest the adoption of it by our exchanges.

Entered at Taneytown Postoffice as Second Class Matter.

FRIDAY, JULY 4th., 1930.

## OUR POLITICAL UNREST.

There are a great many more or less impartial observers who take the view that our last Congress was almost a dead loss. That the tariff bill, even, represents very doubtful value to the country as a whole, and that the really worth-while acts of the two houses could have easily been accomplished in less than half of the time and discussion actually spent.

There are some who even go so far as to suggest that it would be a fine thing for the country if Congress would adjourn for about two years, after making needed appropriations to keep the machinery going, and that so doing would be accompanied by no real dangers.

There is a decided public hankering after a return to old times when there were not so many experts as now; not so many who feel competent to settle not only the big questions of this country, but of the world. To the days when established precedents had more weight, and when even "against the administration" sentiment expressed itself in a fairer and more dignified manner.

There is something like a growing feeling that the political-legislative market, like the wheat market, is suffering from an overproduction of the kind of law-makers who are taking too seriously the idea that it is up to them to "save the country," and the result is no more beneficial than is the low price of wheat.

Considering the situation below the surface, and with its bearings on the future, we may well begin to wonder what is going to happen here in our "land of the free," within the next ten years; and whether, after all, the union we once fought for is going to last—and how?

## BEING BEHIND-HAND.

Being behind-hand is a habit that sometimes grows into a reputation. It may also grow into something much worse than that—a record for slowness and general undependability. Some persons are noted for failure to keep engagements promptly; they never start anywhere, on time; their promises, even, are as slow to materialize as themselves; they rather enjoy being called lazy and perhaps also the parade of a late arrival.

All of which, as a habit, leads to being behind-hand in paying bills; in returning borrowed articles; in rendering neighborly service; in planting crops, in repairing breaks, and in placing orders for important things that we know we will need on a certain date.

The behind-hander is always depending on somebody to help him out of his own neglectfulness. He imposes on generosity, and makes himself a common nuisance. He forgets and delays, loafs and fumbles, almost as though so doing was a virtue instead of a crime.

We all know such folk, and they are not always to be taken easily as mere nuisances. Forgetfulness and neglect may easily be a crime, and often is. The "asleep at the switch" man is not a humorist. What we call "criminal neglect" does not come by chance, but is the product of somebody's lack of timely action. The person who "didn't know it was loaded" should have known.

Even when being behind-hand has no greater fault, it is at least apt to interfere with some innocent person's rights, pleasures or plans. When one person fails in a duty, he almost surely places a burden on somebody. The bill that is not paid when due, may cause another to borrow. The broken step left unrepaired, may cause somebody to break a leg. Forgetting such a simple thing as mailing a letter, may ruin the prospects of a life. No matter in how simple a form we find it, being behind-hand is a tremendous risk, both for ourselves and others.

## "Exposure" Fires Cause Most Damage.

The greatest single cause of fire loss is what is known as "exposure." This applies to any fire that extends from its place of origin to another building. Sometimes "exposure" fires are unavoidable, after all reasonable preventive measures have been made use of, but in many cases such fires are due to bad judgment in building.

A perfectly good building entitled to the lowest insurance rate standing alone, must take the rate of a dangerous building standing close to it. Even so-called "fire-proof" buildings are destroyed by dangerous exposures.

It should be understood that there is no such thing as a "fire proof" building. The most serious fire in Chicago since 1871 occurred in 1922 in a \$3,000,000, fifteen story office building constructed in the most approved modern manner. The fire started in a near-by structure and the upper floors of the modern building were subject to such terrific heat that radiation through glass windows ignited the combustible contents of offices, flattened out metal desks and cabinets, and melted glass desk tops and metal fittings.

But, it is easily possible, in many cases, to avoid the increase in danger from exposures. We are apt to build too cheaply on account of first cost. We "take the chance" that there will be no fire and add to the unsafety of our good buildings.

As a matter of fact wherever at all possible, there should be building codes enforceable by laws, having as their aim safety against fire; and where such codes are not in force, individual care should be exercised to heed them.

## EDITORIAL ETHICS SIMPLIFIED.

William H. Stuart, political editor of the Chicago American, at the last meeting of the Inland Press association, offered the following rules in newspaper work:

Don't needlessly jeopardize good reputations.

Protect no evil man.

Protect the source of information.

Give your readers all the information necessary for the proper solution of every important problem before the community. Print both sides in a controversy. You are entitled to your opinions, but the people are entitled to all the information.

Do your editorializing in the editorial, not in the news columns.

Do not permit your paper to be the agency for secret propaganda.

Do not be for an organ, or a party, person, or interest; be an evangelist for the right as you see it. Boost your community and your country.

Scrutinize every "reform" move for possible sinister or selfish motives, remembering that the wolf masquerades in sheep's clothing.

Try always to be constructive rather than destructive. Be tolerant; keep your mind clear of prejudices, race, or creed. Help as much as possible; hurt as little as possible.

Make your fights on the basis of principles, rather than persons.—The Ohio Newspaper.

## SAVING YOUNG LIVES.

One of the few bright spots in the traffic situation is the condition respecting children, says a report of the Third Annual Conference on Street and Highway Safety.

At a time when the accident toll among adults is constantly rising, the nation's children are demonstrating that they have the intelligence, stamina and capacity for understanding the laws of safety that enables them to accommodate themselves to the conditions of a more hazardous world.

Six years ago, it is said, the value of teaching safety in the schools was problematical. Today it has been established beyond doubt that such teaching is a tremendous influence in the preservation of life.

According to statistics issued by the Bureau of Census, if accidental fatalities to children had increased during the last seven years' at the same rate as accidental fatalities to adults, there would have been over 3,000 children killed in traffic accidents last year, and 3,000 more killed in other kinds of accidents, who are now living. Figures covering the last three years show a large increase in motor fatalities for adults, a smaller increase for children of pre-school age, and a very important decrease for children of school age.

This does not mean that we have solved the problem of accidents to children. Fine work has been done and is being done; still finer and more complete work should be done. Every school in America should give its pupils the teaching that will enable them to safely meet the hazards of daily life.—The Manufacturer.

## IMAGINED SUPERIORITY.

The following clipped article from a masonic publication, has such a wide application, and is so tersely and truthfully stated, that we consider it worth while to pass it along. One need not be a Mason to apply the sentiments of the article to himself.

"Masonry teaches equality among men. In the lodge all, notwithstanding their station in life, stand upon an equal footing. This ancient Fraternity would have its members learn that each individual is but a small particle in the scheme of life and should be more fortunate than his brothers, or should fate cast riches and material benefits his way, it is not a matter over which to become conceited, egotistical and arrogant, but rather something for which to be thankful and humble.

Yet, despite the teachings of the Craft, there are Masons, as there are others, who, having acquired wealth through some lucky break or streak of fortune, let it go to their heads. The pronoun "I" becomes predominant with them. Because of their money they imagine themselves to be superior to the common herd. Nor are these self-important personages satisfied to impress themselves with their imagined superiority. In an attempt to appease a warped desire for admiration, to have acknowledgment from others of their power, they flash their money in the face of the less fortunate, assert their arrogance everywhere, and proclaim to all what a wonderful fellow "I am."

Instead of praise they are awarded derision, and rightly so, which, as a rule, they are too blinded with conceit to observe and benefit by. In truth they are deserving of pity. For members of the Craft who are victims of such illusions there is no excuse. Its teachings foster an entirely different conduct. When the principles of Masonry are more widely followed, there will be less of braggadocio, arrogance and conceit—more of humility, democracy and brotherliness."

## DID YOU KNOW THAT—

A German chemist claims to have invented a filter for illuminating gas lines to make the gas nonpoisonous.

An oxygen tank has been invented to keep alive for twelve hours men who may be accidentally locked in bank vaults.

The French army is experimenting with a radio sending and receiving station carried in a motorcycle sidecar.

When a hat is hung on a new rack intended for use in closet, a spring lifts it out of the way of other clothing.

Of Poland's total area of more than 38,000,000 hectares, only about 18,000,000 can be made to produce food crops.

Operated by an electric motor, a safety razor has been invented that consists of two parallel slotted shearing plates.

Consumption of English walnuts in the United States has increased about 20 per cent in five years.

French interest claim to have developed a sound projector that will reproduce sound films of any make.

Pressing a button releases either salt or pepper from a combination shaker invented by an Indiana man.

The Brazilian state of Minas Geraes will establish a State University in the City of Belo Horizonte.

To serve as a gear shift lever knob on an automobile, a Chicago man has invented an ash receiver for smokers.

Coffee is made under heavy steam pressure in a French inventor's pot.

The United States is the largest consumer of coal among the nations. Almost exactly one-third of the area of Czechoslovakia is covered by forests.

Illuminated cap badges are used by the messenger boys of a wireless telegraph company in London.

## Old, but Apt Phrase

Few phrases are more apt than "All his geese are swans," which has come down to us through more than 300 years, and which we understand to be practically synonymous with the line "He is prone to exaggerate."

Like so many other idioms now a solid part of our daily conversation, this one was originally found in a book now considered a classic.

It was first used in none other than the famous "Anatomy of Melancholia," by Robert Burton, over three centuries ago.—Kansas City Times.

## Pepper Production

Black and white pepper comes from southern India, Sumatra, Java, Ceylon, Slam, Borneo, Penang and other parts of the Malay peninsula. Black pepper consists of the dried immature berries of a perennial climbing shrub called Piper Migrum, native to the forests of western and southern India. White pepper is practically the same product as black pepper except that the outer shell of the berry is removed to a greater or less extent by friction following soaking in water. Red pepper is the powdered ripe pod, both flesh and seeds of any variety of capsicum, the plant which gives us the edible fresh pepper, but which bears no relation to the true pepper plant. Cayenne pepper is, by ruling of the board of food and drug inspection of 1906, distinguished from red pepper as being obtained only from small-fruited varieties of capsicum.

## Sand of Sahara Desert Carried Far by Winds

It is now well recognized that the falls of colored rain and also of dry dust that occur at rather frequent intervals in southern and central Europe are due, in most cases, to windborne material blown up from the Sahara desert.

Several cases in which enormous quantities of solid matter have been carried great distances by the winds have formed the subject of elaborate investigations on the part of meteorologists. Thus during the three days, March 8 to 10, 1901, heavy dust storms occurred in the deserts of southern Algeria, and the sequel of these storms was carefully studied by Hellmann and Meinardus. A widespread cyclonic storm, centered over Tunis at the time, sucked up the dust, which was carried northward by the winds at high altitudes.

Deposits from this dust cloud occurred over an area extending as far as 2,500 miles from the place of origin. Reports collected from hundreds of observers indicated that 1,800,000 tons of dust fell over the continent of Europe, and one-third of this fell north of the Alps. As much more is believed to have fallen over the Mediterranean, while on the African coast itself the deposit is supposed to have amounted to 150,000,000 tons.

## Maiden's Heart Won by Suitor's Bank Balance

Bill and Jack, living in the same Long Island town, were rivals for the hand of pretty Betty, but, although she remained neutral and showed no preference, each considered himself the favored one. They remained friends, having made a gentleman's agreement that there would be no hard feelings on the part of the unsuccessful suitor.

However, there was no curb on the manner of courting her—and that's where fate stepped in. Bill continually sent Betty flowers and candy and took her to theaters and the opera. Jack, on the other hand, was decidedly stingy. But one night, after a pleasant visit, he managed to leave his bank book behind him in a chair, as if it had fallen out of his pocket.

Betty, being human and feminine, could not resist her curiosity—and that is why she married Jack. Flowers and candy can be forgotten, but real money in a bank speaks volumes.—New York Sun.

## Franklin's God

Benjamin Franklin's god resembled a Jehovah, surrounded by his cherubim, a deity that might have been dreamed of by a disciple of Plato. . . . The supreme being of Franklin is separated from us by a series of beings, superior to us, inferior to him, each installed in a planet of its own, and ruling over the satellites which belong to it. As an inhabitant of the earth, Franklin thought himself obliged to worship the god who lived in the sun, and he made a liturgy for him—a kind of abbreviation of the Anglican prayers—to which he remained faithful. Like a good Platonician, he demanded of this god virtue, knowledge, an after life.—Baltimore Sun.

## Pressure of Water

Iron vessels and other heavy vessels sink to the ocean bed, and the water pressure has nothing to do with holding them up. Water is practically incompressible, so that even at the greatest depths the water of the ocean is very little heavier than the water near the surface. The volume of the ship is therefore much heavier than the same volume of water at any depth, and the ship will sink. The pressure of a fluid is exerted equally from all directions and not simply upward on the vessel. For a ship to remain suspended halfway between the surface and the bottom, it would have to be constructed of some light material and have a very light cargo.

## Rewarded

Russell Gordon Carter, famous as a writer of stories for boys, said it was his experience that boys seldom remember the names of the authors, but never forget the stories that they like. "One of my neighbor's boys once read a story of mine and told me about it. The fact that my name was on the cover had been entirely overlooked and he was much surprised when I told him I had written the story and pointed out my name. "Well," he said with a grin, 'don't waste time bragging about this one, but get busy and write some more like it.'"

## Just Like a Man

Little Johnny is just picking up slang expressions. The other day the three-year-old was playing with his sister. He came to her side and put his arms around her and in a cooing way said to her: "I 'love 'ou 'titter dear, I 'love 'ou," and then quite suddenly he burst out "bology."

The astounded little sister came to life in time to say: "Just like a man."

## Musical Trees

One of the curiosities of the West Indies is the musical tree. This species is a member of the great pea family. On ripening the great pods split open at the edges and the wind, passing through the openings, creates the sound which gives the tree its name. In Barbados there is a large valley of these trees, and the natives, naturally enough, believe the place to be haunted.—St. Nicholas Magazine.

Taneytown's "Leading Fashion Store"

We sell Standard Sewing Machines

# Roons Bros.

DEPARTMENT STORE.

TANEYTOWN, MD.

NEW SUMMER MERCHANDISE of Unusual Value at Prices that are Very Low.

## LADIES' DRESS MATERIALS

for Summer in Voiles, Tubillias and Prints. Newest colors and designs.

THE BIRNIE TRUST CO.  
TANEYTOWN, MD.

The Carters were going out for a ride. What more natural than to want their friends the Kennedys to enjoy that beautiful Sunday afternoon with them. But, (and it was just too bad) the Kennedys had no

# TELEPHONE!

## Road Builders of the Past

Nobody knows who built the first road but remains have been found of a highway laid out by Cheops, builder of the great pyramid in Egypt, says the National Geographic Magazine. Babylon had three great highways, and the first levying of tolls in the history of highways took place on one of these Babylonian routes. The Carthaginians were the most scientific roadbuilders of ancient times, but the details of their construction have been lost.

## "Dragon's Blood" in the Arts

The "Dragon's Blood" of commerce is a red gum made from the ripe fruit of palm trees growing in Siam and the Dutch East Indies. It is used in the pharmacy and finds its way into the arts as a means of coloring varnish and also for use in photo-engraving. It is secured from the nut by a process of steaming and crushing. The product is sent to Penang and Singapore and thence it is shipped half way around the world to points in Europe and America.

# POULTRY

FINDS NEW WAY  
TO STORE EGGS

Small Amounts of Carbon  
Dioxide Will Be Big Aid.

Eggs can be better preserved if they are stored where there is a certain amount of carbon dioxide in the air, according to Paul F. Sharp of the New York State College of Agriculture, who has just published the results of some experiments on eggs in Science.

Eggs stored in ordinary air spoil rapidly after they lose the carbon dioxide which is a part of the egg. As soon as an egg is laid it starts to become more alkaline and this hastens decay. This alkaline tendency, however, can be easily and conveniently neutralized and controlled if the eggs are placed where the air contains small amounts of carbon dioxide.

This discovery has a practical result because carbon dioxide can be introduced into cold storage rooms in amounts which greatly retard the destructive changes in the eggs and yet the amount in the air will not be enough to prevent workmen from entering the storage rooms. Carbon dioxide can be used also in shipping containers and in refrigerator cars.

A convenient source of this gas can be used, such as the solid form or the gas form in cylinders. Professor Sharp says the only method of preserving eggs which approaches this one in cheapness and practicability is the oil dipping method in which eggs are dipped in a suitable oil which very nearly seals the pores. The carbon dioxide method is superior to the oil method, because the whites of the oil-dipped eggs become cloudy in storage. Those preserved by the carbon are not cloudy after the eggs are removed from the air which contains the carbon dioxide.

## Concrete Runs Outside

Brooder House Are New

Concrete runs outside of the brooder house are a comparatively new addition to poultry farm equipment but are coming into use because of several advantages. They enable one to use a brooder house without danger from contaminated soil near them, save the labor of moving portable buildings and make it possible to keep chicks near the dwelling or barns, says a writer in the Rural New Yorker. As they do not have to bear heavy weights, a two-inch thickness of concrete is sufficient, except at the edges, where double that thickness is needed to prevent breaking.

They should be smooth for easy cleaning, have a slope for drainage, two or three inches, according to size, and need not be roofed. They, of course, may be of any desired size, so that they give an ample outside run, preferably not less than that required inside for the same number of chicks. They may have permanent fences or movable wire covered frames to set upon the concrete. Movable frames will facilitate cleaning. They may be lightly covered with sand, loam or litter, though the essential thing is that they be kept clean to prevent infection from droppings picked up by the chicks running upon them.

## Poultry Hints

Early-hatched pullets produce fall and winter eggs.

Overcrowding in the poultry house discourages production of eggs.

Sitting hens should be dusted with sodium fluoride before being put on the nest.

Gather the eggs frequently to avoid the dirt that may be carried in on the hen's feet.

Chicks hatched so as to begin laying the first of October are usually the most profitable.

As many farmers have found, profits with poultry can easily be increased by better feed and care.

When possible it is well to have a pen where the little pigs can go for food but to which the sows do not have access.

A colt may be fed on cow's milk provided the milk is not too rich in fat. Use the milk from a cow that does not give very rich milk.

Unless pullets are laying by October 1 they will miss a great deal of the high-priced egg period. If they start laying much earlier than this, there is danger of a fall moult.

A small poultry flock properly fed and cared for is more profitable than a large flock given indifferent care.

Protein is a constituent of feeding stuffs which is used by chickens for building muscles and tissues. In addition to the production of eggs.

Early feathering and early crowing mean early maturity. Early maturity means early profits. Always select the cockerels that feather first and then select from them the one that grows first.

## WORTH MILLION AND FORGETS IT

Someone Fails to Claim For-  
tune in England.

London.—Could you forget that you had a million dollars?

Someone in England has, and the sum total of fortunes that he and others have "overlooked" amounts to \$20,000,000.

This vast sum lies in the hands of the officials of the national exchequer, which every year benefits to the extent of approximately \$1,000,000 by the failure of an army of stockholders to claim the interest on their government stock.

That this figure is underestimated is admitted by the officials of the exchequer. It is done so purposely to avoid a flood of spurious claims. The present practice of the Bank of England is to wait until one claimant appears for a hitherto unclaimed stock, and then advertise for all other claimants to the same stock.

One reason that people forget such valuable property is that many stockholders go abroad and are never heard from again. Then there are aged or ailing persons, who forget that they possess stock, and there are the hundreds of persons, who when they die, neglect to leave any mention of their possessions.

A claim recently brought out the fact that an English woman, who had died at Marseilles at the age of ninety-eight, was entitled to \$280,000 in stocks, and \$100,000 in accumulated dividends, yet she had been constantly borrowing from her relatives.

The finance act of 1921 gives to the national exchequer all dividends unclaimed after five years, although the stocks remain in the holders' names for another ten years.

## Dr. Carter to Seek Tomb of Alexander the Great

London.—Howard Carter, archeologist and discoverer of the tomb of Tut-Ankh-Amen, plans to embark on his most sensational exploit—search for the tomb and body of Alexander the Great.

Upon completion of his work at the sepulchre of Tut-Ankh-Amen in Egypt he said in an interview with the Daily Mail, he will proceed with the infinitely more difficult attempt to find the resting place of the young man who came out of Macedonia to conquer the entire known world of 22 centuries ago.

Alexander died at Babylon in 323 B. C., but one of his greatest generals, the satrap Ptolemy I, later ruler of Egypt, contrived to procure the body and is said to have given it burial in a golden coffin at Alexandria. The discovery of his tomb, Carter believes, would far overshadow in importance the finding of Tut-Ankh-Amen's last resting place.

"According to Plutarch," he said, "the exact position of Alexander's tomb in Alexandria was unknown. However, it may possibly be found in one of the royal cemeteries, but I anticipate a long, difficult and expensive search."

The preliminary work, he said, will consist of probing the ground by sinking tubes and shafts, then working toward the center of the supposed royal cemetery.

Regarding Tut-Ankh-Amen, Carter admits there is still much work to be done, although he hopes to remove four great shrines from the tomb in October, when the Egyptian excavation season begins.

## Hardy Constitutions of Dogs Seen in Operations

London.—The cat is not the only member of the animal family which has nine lives. Through scientific aid and operations, the dog is now enjoying several lives. Many operations performed in the Royal Veterinary college have saved the lives of numerous canines which ordinarily would have expired. A recent operation was performed on a greyhound with a dislocated neck. Shortly afterward the dog resumed its racing. At the college dogs have been provided with false teeth and limbs and even rejuvenating operations have been performed on them.

## Times Certainly Have Changed in Forty Years

Kansas City, Mo.—There has been a change of views in the last 40 years. The following item appeared 40 years ago in a Kansas City newspaper: "A peculiar incident happened at the public library today. A young woman reading a periodical at one of the tables had her left leg accidentally (?) exposed so that a pink stocking was visible up to her knee. She was quietly asked to leave."

## Women Soldiers Unpopular With Reds

Moscow.—Women soldiers are unpopular in the eyes of the Russian government. "Female rifle squads" from the Red army were sent to the villages in discontented districts to protect communal farms from being plundered by opposition peasantry engaged in private enterprise. But, states the Soviet cabinet in an official announcement, "the rifle-women have fraternized with the peasant."

## Wife in Poorhouse, Husband Asks Divorce

Great Falls, Mont.—One of the most unusual divorce cases ever filed in a Montana court comes to issue when Solomon T. Niles, eighty-one-year-old Civil war veteran, attempts to secure legal separation from Mrs. Johanna G. Niles, seventy-nine, on the ground of desertion. The wife, forced to live in the poor farm, denies her husband's allegations. In her answer, she asks that her husband be compelled either to take her back or to provide for her.

Bed Springs, \$2.98 each  
Bed Mattresses, \$4.98  
Dynamite, 12c stick

### Dynamite Caps, 2c each

Fuse, 1¼c foot  
Lamp Chimneys and Burners, 5c each  
Lime, \$10.00 ton at Plant  
Lime, \$12.00 ton delivered at Farm  
3 pair Child's Bloomers for 25c  
Wall Paper, per double Roll, 7c  
3 Cans Sterno for 25c  
Galvanized Roofing, \$3.75 square  
6 dozen Jar Rubbers for 25c  
Cigarettes, \$1.11 carton  
5-lb. Pail Lake Herring, 75c  
10-lb. Pail Lake Herring, \$1.39

The Medford Grocery Co.  
Medford, Maryland.

Water Glass Eggs  
According to the findings of the home economics students at the Wisconsin college of agriculture, eggs stored in water glass are as rich in vitamin D as fresh eggs.

## State of Maryland STATE ROADS COMMISSION

NOTICE TO CONTRACTORS.  
SEALED PROPOSALS for building one section of State Highway as follows:

Carroll County, Contract No. Cl-85-511. One section of State Highway along the Westminster-Taneytown Road, from Bear Branch to Fountain Valley, a distance of 4.87 miles (alternate bids for resurfacing with hot and cold bituminous mixtures).

will be received by the State Roads Commission at its offices, Federal Reserve Bank Building, Calvert and Lexington Sts., Baltimore, Maryland, until 12 M. Eastern Standard Time, on the 1st. day of July, 1930, at which time and place they will be publicly opened and read.

Bids must be made upon the blank proposal form which, with specifications and plans will be furnished by the Commission upon application and cash payment of \$1.00, as hereafter no charges will be permitted.

No bids will be received unless accompanied by a certified check for the sum of Five Hundred (\$500) Dollars, payable to the State Roads Commission.

The successful bidder will be required to give bond, and comply with the Acts of the General Assembly of Maryland, respecting contracts.

The Commission reserves the right to reject any and all bids.

By order of the State Roads Commission this 17th. day of June, 1930.

G. CLINTON UHL, Chairman,  
L. H. STUART, Secretary. 6-20-2t

## Attention Life Insurance Men.

OLD COLONY LIFE INSURANCE COMPANY, of Chicago, Illinois, offers agents a wider field and increased opportunity by writing man, woman and child from date of birth to age 60 on the annual, semi-annual or quarterly premium plan, for amounts going up to \$5,000 as regards children, while for adults the limit is \$30,000. The Company will give a very liberal commission contract (direct with the Home Office) to a good personal producer. 6-13-3t

# THE VALUE OF SOUND DESIGN

New Ford engine gives outstanding acceleration, speed and power without sacrificing reliability or economy

THE good performance of the Ford car, so apparent on every highway, is due largely to the sound mechanical design of the engine.

It has outstanding acceleration, speed and power, yet that is only part of its value to you. Greater still is the fact that it brings you all these features without sacrificing either reliability or economy.

That is the reason the Ford car has given such satisfactory service to millions of motorists all over the world and has been chosen by so many large companies that keep accurate cost figures. In every detail of construction it has been carefully planned and made for the work it has to do.

The design of the compression chamber is an important factor in the efficiency of the Ford engine. It is built to allow free passage of gases through the valves and to thoroughly mix the fuel

by producing turbulence within the cylinders during compression. The spark thus flashes quickly through the whole fuel charge, resulting in quieter and more effective engine performance. Other factors are the direct gravity gasoline feed, the specially designed carburetor, the new hot-spot manifold, aluminum pistons, chrome silicon alloy valves of larger diameter, statically and dynamically balanced crankshaft and flywheel, the simplicity of the electrical, cooling, lubrication, and fuel systems and accuracy in manufacturing.

## CORRESPONDENCE

Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department must be signed by the author; not for publication, but as an evidence that the items contributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted.

We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

### UNIONTOWN.

Mrs. S. A. Macis and children sailed from New York, Saturday, for Honduras, to join the Dr. in their future home.

Mrs. C. E. Myers, who was visiting near Hagerstown, the past week, returned Sunday.

Little Bettie, daughter of Mr. and Mrs. D. M. Englar, was taken to the University Hospital, last Wednesday, and had her tonsils and adenoids removed, and was brought home the following day. She is doing nicely.

Last Saturday evening, Clifford Bowersox, Hanover, and Miss Evelyn Weller, Bark Hill, were married by Rev. J. H. Hoch, at the parsonage.

Mrs. Lillian Harbaugh Coley, this place, left here last Wednesday evening, for Baltimore, where she expected to take a position; but early Thursday morning she was found dead in bed. Her body was taken to Maurice Routson's funeral parlors, and was buried from there, Monday afternoon, in Woodlawn cemetery. H. H. Harbaugh is a brother and Mrs. Annie McAllister a sister.

Word received here from Washington, gives account of an operation for Miss Sallie E. Weaver, at the home of her niece, Mrs. S. N. Otto, last Saturday morning, when her remaining eye was removed, the first one was taken out several months ago. At last account she was doing well.

Doris Haines, who spent a week with Mr. and Mrs. Nicholas Young, Philadelphia, returned Wednesday with them to her home here, on Saturday.

Visitors have been: Mr. and Mrs. Bernard Devilliss, at W. G. Segal's; Ray Mering, Kansas City, Kenneth Mering, Baltimore, at H. B. Mering's; Mr. and Mrs. Roland Caylor, Detroit, Mich., at E. C. Caylor's; Thomas Hoch and family, Washington, at Rev. J. H. Hoch's; Evelyn Beard, at U. M. Bowersox's; Thomas Haines, with his father, Wm. Haines, Mr. and Mrs. Conkling, Howard Haar and children, Baltimore, at J. E. Heck's; Mrs. Wm. Stremmel and grandson, Billie Myers, at Frank Haines's; Mrs. Mollie Englar, at B. L. Cookson's; Mr. and Mrs. E. G. Cover, Dr. Sidney Cover, Mrs. Irene Shreeve, Mr. and Mrs. Roscoe Wheatley, Easton, Mrs. Jennie Gilbert, daughter, Miss Edna, Mr. and Mrs. Horace Gilbert, Baltimore, at Roy H. Singer's.

### MANCHESTER.

The Musical, at Trinity Reformed Church, Sunday evening, was a success. The audience was not so large as one might have expected.

Miss Agatha L. Warehime, daughter of Mr. and Mrs. Denton Warehime of Lineboro, Md., and Marion Kaltrider, son of Mr. and Mrs. George Kaltrider, of near Miller's, were united in marriage by the Rev. Ivan G. Naugle, at the home of the groom's parents, on Sunday, at 7:45 A. M.

Supt. Fultz preached in the Manchester U. B. Circuit, over Sunday.

Rev. John S. Hollenbach, attended a meeting of Md. Classis, in Hagerstown, on Friday afternoon.

Prof. and Mrs. George Shower are spending some time with the former's parents, Mr. and Mrs. Robert M. Shower.

Mrs. Richard Walters and children, are spending some time with relatives in Manchester.

### "INSIDE" INFORMATION FOR WOMEN.

Paint or varnish spatters on glass may be dissolved with turpentine or alcohol or may be rubbed off with a dull knife.

Has your dustpan a firm straight edge which fits the floor so that part of the dust is not brushed underneath? A long-handled dustpan saves much stooping.

Strong soap powder should not be used on dishes decorated with gilt, because these cleaning materials may contain substances which are injurious to gilt.

Do you ever cook cucumbers? They are delicious when peeled, cut in halves or quarters and steamed; or cut in lengthwise sections, stuffed with a vegetable mixture, and baked.

Vary the tartness of your French dressing occasionally by using in place of plain vinegar lemon or grape fruit juice, or tarragon vinegar, or spiced vinegar from pickles.

A few grains of pop corn on top of a plate of corn soup gives an attractive appearance. A spoonful of whipped cream is a good garnish for clear and cream soups, and adds to the food value.

Designs for small boys' suits originated by the home economics specialists of the U. S. Department of Agriculture combine self-help features with smart style. A free leaflet pictures and describes these suits and suggests fabrics for summer and winter wear.

Prepare spring onions this way: trim off the green tops and cook the onions in lightly salted boiling water in an uncovered vessel until tender. This will take about 20 minutes for fresh young onions. Drain, add more salt if necessary, and pepper, arrange on toast like asparagus, add melted butter, and serve at once.

The modern home is a place where nothing can be accomplished if the electric current goes off.—Nashville Banner.

If there is anything in a man, his opportunity will come sooner or later.

### FEESERSBURG.

June favored us with 22 clear days and 8 of cloudy or rain, against 25 clear last year, and now summer is here.

E. W. Harder has rented his furnished home to John Chase, of Baltimore, a war veteran, who took possession on Tuesday. Mr. Chase, with his wife and cousin, Miss Sibyl Kennedy, intend, with Mr. Harder's help, to conduct a poultry business.

Miss Emma Ecker, of New Windsor, who spent the past season as teacher at Bark Hill, is spending some time with the Birleys.

James Bohn, of Washington, D. C., in Government employ, is spending part of his vacation with relatives in this locality.

Chester Wolf and family, of Philadelphia, and his father, Edward Wolf, and sister, Erma, of Bark Hill, spent Sunday evening with his brother, Cleon and family.

Mignon Rinehart, who spent last week with her sister, in Baltimore, has returned home, and Adele Rinehart is visiting Mrs. Florence Hyde, near Medford, this week.

Mr. and Mrs. C. Wolf and mother Gilbert visited their cousin, Mrs. Lydia Shelly and family, near Fairfield, on Sunday afternoon.

Mrs. Frank Davis, nee Erma Harman, is recovering nicely from the mastoid affliction. She paid a visit home on Sunday, but is now with her sister-in-law, Mrs. Flora Zimmerman, in Frederick, under treatment at the Hospital.

Mr. and Mrs. Frank Koons, Mrs. Rosa K. Bohn, with James Bohn, spent Tuesday with relatives in Waynesboro.

The children of Middleburg Sunday School rendered a fine program on Sunday evening. The new pastor, Rev. C. Archer, made a brief address, and his four children sang in a pleasing way. The offering was for Ministerial Students' support.

Relatives and friends of the Bohn family, in this vicinity, attended the Bohn reunion at Mt. Tabor Park, Rocky Ridge, on Sunday. After the large company of relatives had enjoyed their picnic lunch, they turned to the program. Devotions, reports and addresses were followed by music. In closing, Messrs James and Frank Bohn gave a violin duet and Mrs. Harry Bohn accompanied with the organ. "Blest be the Tie that binds" was sung while all stood with clasped hands and the benediction by Rev. D. O. Metz closed the day. The next meeting is to be held the last Sunday in June, 1931.

We are in receipt of a fine copy of "The Missionary Visitor," presenting the Brethren and containing a "Record of Progress of 1929 by our friend and former neighbor, Rev. Holly P. Garner, in India. We notice he reports a revival of effort, new interest, and from nearly every station additions by baptism. Church buildings, and some systematic giving. The Church at Bulsar reports an average of five and one-half rupees per member or about two dollars per year; the total membership nearing the four thousand mark. Bible Schools have been opened at other places and "the beginning has been good." Temperance and Medical work have also been rendered.

Rev. Archer will preach at Middleburg Church next Sunday afternoon. The threshing machine is making its round again—at Frank Lowman's and at Bucher John's this week.

### KEYMAR.

Pearre Sappington, of Hagerstown, who had been spending some time at the home of his grand-mother and aunt, Mrs. Fannie Sappington and daughter, Miss Cora, this place, and at the home of his aunt and uncle, Mr. and Mrs. Sterling Grumbine, Unionville, left last Sunday with his aunt, Mrs. Artie B. Angell, Baltimore, where he will spend until Wednesday evening, then he will take the boat for Ft. Eustis, Va., where he will go in training camp for thirty days. Good luck to you, Pearre.

Mrs. Bessie D. Mehring, who was confined to her bed for several days, last week, is able to be out and around again.

Mrs. W. H. Otto spent several days at the home of her sister and brother-in-law, Mr. and Mrs. Harry Stonieser, near Emmitsburg.

Mr. and Mrs. J. R. Galt, son Albert, of New Windsor, spent last Sunday in Keymar, at the home of Mr. and Mrs. R. W. Galt.

Mrs. ——— Clark, of New York, who had been spending some time at the home of Miss M. C. Kraig, Bruceville, returned to her home, Wednesday.

Mrs. Angell and Mrs. Held spent last Sunday at the former's mother, Mrs. Fannie Sappington. Miss Margaret Angell, who spent last weekend at the Sappington home, returned home with her mother, Sunday.

Messrs Charles Garber, E. Scott Koons and George M. Koons attended the funeral of Mr. E. O. Weant, Westminister, last Monday afternoon.

A. S. Burkholder and son, Fred, of Owings Mills, were callers at the home of Mr. and Mrs. Walter Stiffon on Monday.

Mr. and Mrs. Walter Stiffon and family, spent last Sunday in Baltimore.

Mrs. Annie Sharett's, this place, accompanied by her nephew, David Rinehart, of Union Bridge, were recent visitors in Washington.

Mr. and Mrs. L. Hartsock, of near Taneytown, sold their home to Mr. and Mrs. George I. Harman, and have bought a property in Johnsville, and moved there last Monday. Mr. and Mrs. John Harman moved to the home vacated by Mr. and Mrs. Hartsock.

Mr. and Mrs. Charles Kiser, near Keyville, have improved their home by putting up a new porch the length of the house, which adds greatly to the appearance of the home.

George Clutz is painting the buildings on his farm, near Keyville.

Mrs. Wm. Cover is still confined to her room, unimproved.

What a jolly old world this would be if we could see others as we see ourselves.

### EMMITSBURG.

The Woman's Club of this place met at the home of Mrs. Wm. Nail, near Taneytown, on last Thursday afternoon. Thirty-eight members and guests were present.

Mr. and Mrs. Nathaniel Kershner and family moved from the Mottier house to the Hoffman house, last week.

Mr. and Mrs. Hoffman and daughter have taken rooms at the Emmitt House and moved their household furniture to their house in Washington, D. C.

The Baltimore Evening Sun News Boys' Band has arranged to give a free public concert on Center Square here, on Monday afternoon, July 7, at 4 o'clock.

On Tuesday evening, June 24th, a delightful party was held at the home of Miss Barbara Hoffman.

The Vigilant Hose Co., of this place, will hold a picnic and fair at the Firemen's Field, on Friday and Saturday, July 4th and 5th.

Mr. and Mrs. Harry Baker and daughter recently visited Mr. and Mrs. Marker E. Lovell, near New Windsor.

Mrs. Laura Devilliss spent several days, last week, with relatives in and around Keyville.

John Six, of Tom's Creek, was operated on for appendicitis, at Frederick City Hospital, last week.

Mr. and Mrs. A. A. Horner and family, of Washington, formerly of this place, recently visited Mr. and Mrs. Thomas Baumgardner and family.

Master Vincent Brooks, of Baltimore, is spending a few weeks with his grand-parents, Mr. and Mrs. Harry Boyle.

Mr. and Mrs. J. T. Gillelan and son; Mrs. A. P. S. Waltham, of Baltimore, spent several days with relatives here.

Miss Rhoda Gillelan left, last Friday, for New York, where she will sail with a party of friends, on the S. S. Majestic, for Europe. Miss Ruth Gillelan, of this place; Mrs. Robert Billingslea and Margaret Gillelan, of Westminster, accompanied Miss Rhoda to New York City where they spent the weekend.

Rev. Earle Hoxter, Thurmont, and Dr. Vernon Rigely, of Baltimore, were entertained by H. W. Baker and family, on Saturday.

Announcements were received here of the marriage of Anna May Naylor, daughter of Mr. and Mrs. George C. Naylor, this place, and Dr. William J. Sullivan, St. Louis, Mo., at St. Louis, June 14th, 1930. Mr. Sullivan is a graduate of Frederick City Training School for Nurses, and for the past four years has been supervisor of the Medical Department of South Western Bell Telephone Company. Dr. Sullivan is an Alumnus of St. Louis University. They will reside in St. Louis.

Mr. and Mrs. Harry Topper and grand-daughter, of Waynesboro, were visitors at the home of Harry W. Baker and family, on Sunday.

Preaching services at Tom's Creek M. E. Church, Sunday morning, July 6th, at 10 o'clock. Mr. and Mrs. Sheets, of Baltimore, will be present and render the gospel in songs.

Guy Nunemaker, who has been sick, is improving.

Miss Agnes Carlins, of Springfield, Mass., visited friends here, over the week-end.

### RODKEY FAMILY REUNION.

(For the Record.)

On Saturday, June 21, the descendants of the late George Rodkey held their first annual reunion, in Rodkey's grove, at Tyone, Md. A very delightful day was spent in the grove with a regular family dinner at noon. About 90 relatives and friends were present, among which were Mrs. Ella Fells, of California, and Isaac Rodkey, of Oklahoma, who were in the east on a six weeks' visit. Mrs. Elizabeth Keefer, of Mayberry, was the oldest person present.

In the afternoon a short program was given with Mr. Earl Bowers, of Taneytown, in charge. Singing America; prayer, Rev. Earl Redding, of the U. B. Church, Taneytown; vocal trio, Mrs. Monroe Wentz, Mrs. Denton Wentz, and Miss Alice Rodkey; address Rev. M. S. Reifsnnyder, of Baust Reformed Church; violin solo, Alice Rodkey; vocal trio, Rev. Redding, C. G. Bowers and Earl Bowers; address, Rev. Redding.

A business session followed with the election of Jacob Rodkey, Pres.; Ira Rodkey, Treas.; Wm. J. Flohr, Sec.; Mrs. Lloyd Humbert, Cor. Sec.; Mrs. Harry Fowler, Historian.

Those present were: Mr. and Mrs. Isaac Rodkey Mrs. Elizabeth Keefer, Isaac Rodkey, Mrs. Ella Fells, Mrs. Katie Hunter, Mrs. Jennie Myers, Mrs. Upton Lemmon, Mr. and Mrs. Ira Rodkey and children, Mr. and Mrs. Howard Rodkey, Mr. and Mrs. Raymond Rodkey, Mr. and Mrs. Rex Lamar, Mr. and Mrs. Norman Lemmon, Mr. and Mrs. Ralph Snyder and daughter; Mrs. David Myers and children; Mr. and Mrs. Earl Bowers, Mr. and Mrs. Lloyd Humbert, Mr. and Mrs. Wm. Bucher, daughter, Geraldine; Mr. and Mrs. Cyrus Leppo, Mrs. Roger Leppo, and children; Mr. and Mrs. Harry Warehime and son, David; Mrs. Jennie Rodkey, Mrs. Harry Haines, Mrs. Harry Fowler, Mrs. Wm. Caylor, son James, daughter, Elizabeth; Mrs. Cora Hoff, Mr. Ezra Caylor, Mr. and Mrs. George H. Rodkey, Mr. and Mrs. Maryland Rodkey and son, Miss Fern Rodkey, Mrs. Monroe Wentz, Mr. and Mrs. Denton Wentz, Mrs. Willet, Mr. and Mrs. Daniel Willet and children, Alice Rodkey, Helen Bittle, Martin Rodkey, Luther Rodkey, Mrs. Thomas Yingling, Mrs. Clark Mathias, Wallace Yingling, C. G. Bowers, Wm. J. Flohr, Lawrence Smith, Rev. and Mrs. M. S. Reifsnnyder, Rev. Earl Redding.

The highways of Massachusetts, stretching for sixteen hundred miles through the state, are undergoing a "progressive" landscaping. Trees are being planted where they are needed, and removed to show the beauty of mountains or streams; bare spots are being filled in with ferns, clover, or low shrubbery; harsh outlines are being softened.

Courtship is a misfit training school for what comes after.

### NO MORE AUTO RACING IN BALTIMORE COUNTY.

There is to be no more automobile racing in Baltimore County on Sunday.

This was the decree of the County Commissioners on Wednesday, following a protest from a group of clergymen, representing the Lord's Day Alliance, who told the commissioners that the selling of parking space was but a camouflage similar to that used in other commercialized Sunday sporting events.

A definite promise was made by the commissioners that Sunday automobile racing would be discontinued as a commercial proposition, at least.

Dr. F. J. Pretzman was spokesman for the group of ministers, and Dr. W. W. Davis, was also present. The others in the group were Rev. C. E. Wise, of Baltimore; Rev. Dr. J. Franklin Bryan, Towson; the Rev. H. R. Spangler, Lutherville, and the Rev. John E. Holt, Riderwood.

Commissioners Robert Clarke and J. Howard Milling were present when the delegation arrived but Frank S. Given, the remaining member of the board was not present. Although the commissioners stated nothing official had been decided, the promise to the ministers indicated the future course of the board on Sunday sports, it is believed.

The officials of the association which operated the races last Sunday have not definitely stated what they intend to do about the matter.—Towson Union.

We accept the report of the Department of Agriculture that fewer persons are leaving the farm. There are fewer persons on the farm to leave.—Topeka State Journal.

Speak kindly at all times if you would hear only pleasing echoes.

### MARRIED

#### REDDING—BOWEN.

A very pretty wedding was solemnized Saturday, June 28, at 6 P. M., when Mr. Robert L. Redding, son of Mr. and Mrs. Wm. A. Redding, Baltimore, and Miss Maryland Bowen, daughter of Mr. and Mrs. Richard A. Bowen, were married. Miss Mary Elizabeth Redding, sister of the groom was bridesmaid and Mr. Lewis Flater served as bestman. The ceremony took place in the U. B. Parsonage, Taneytown, and was performed by the pastor, Rev. Earl E. Redding, a brother of the groom. The ring ceremony of U. B. Church was used.

#### WESCOTT—FLEAGLE.

Miss Helen Fleagle, daughter of Mr. and Mrs. Edward Fleagle of Yonkers, New York, was married on Wednesday morning, July 2nd, to Mr. Gerald Richmond Westcott, of Newburgh, New York. The ceremony which took place at the Dayspring Presbyterian Church, of Yonkers, was performed by the Rev. Wm. Crawford pastor of the church.

Miss Mary Brundage, a former room-mate of the bride, at New Paltz Normal School, was the maid of honor; Mr. Edward Fleagle, Jr., brother of the bride, was bestman. Mr. Douglas Frazier, of Yonkers, played the organ.

The bride, who was escorted and given in marriage by her father, Edw. W. Fleagle, wore a long gown of white lace and carried a shower bouquet of white roses and lilies of the valley. The maid of honor wore a gown of blue organdie and carried a bouquet of pink roses and delphinium.

Following the ceremony a luncheon was held at the home of the bride's parents, after which Mr. and Mrs. Westcott left for a motor trip through New England.

Mrs. Westcott is a graduate of the Yonkers High School, and New Paltz Normal School, where she was a member of the Arctura Sorority. She also attended Cornell University at Ithaca, N. Y. For the past two years Mrs. Westcott has taught in school 3 of Yonkers, New York; preceding this with three years as a teacher in the Nyack Grammar School, at Nyack, New York.

Mr. Westcott, son of Mr. and Mrs. Arthur C. Westcott, of Newburgh, New York, attended Newburgh Academy, Bridgewater College, in Virginia, and Cornell University. On their return from their wedding trip, Mr. and Mrs. Westcott will reside in Newburgh, New York.

### DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

#### MR. FRANKLIN F. REAVER.

Mr. Franklin F. Reaver died at his home near Taneytown, July 2, after being ill for some time, aged 75 years, 11 months, 27 days. He is survived by his wife, who was Miss Sarah Jane Shriner, and by two sons, Norman E. and Charles M., at home, also by two sisters, Mrs. George Eckernode and Mrs. Clayton Hahn, near Uniontown.

The body was brought to the funeral establishment of C. O. Fuss & Son, where funeral services will be conducted on Friday, July 4, at 1:00 o'clock, in charge of Rev. Guy P. Bready. Interment in the Reformed cemetery.

#### MRS. BEN. D. KEMPER.

Mrs. Ellen J. Kemper, wife of Benjamin D. Kemper, well known lumber dealer, died at her home in Westminster early last Sunday morning, after an illness of several weeks from pneumonia. Her age was 65 years, 10 months, 15 days.

She was a daughter of the late George and Lucinda Moose, and leaves her husband and seven children: Mrs. Sara May, Mrs. Emma Massicot, Miss Mary Kemper, Miss Esther Kemper, Clarence, Benjamin and John, all of Westminster; two sisters, Mrs. Calvin Fair, Greenmount, Pa., and Mrs. Harry Fair, Benderville, Pa.; two brothers, William Moose, York, Pa., and John Moose, Silver Run, Pa.

Funeral services were held on Wednesday morning, in charge of her pastor, Rev. Paul W. Quay, pastor of Grace Lutheran Church. Interment was in Mt. Carmel cemetery, Littlestown, Pa.

### CHRISTIAN ENDEAVOR TOPIC.

Topic: Joys and Dangers when away from Home. Gen. 28:10-22.

Written by—John S. Hollenbach, S. T. D., Social Service Supt. Carroll Co. C. E. Union.

Modern ways of travel and the greater wealth of the average person have greatly increased the amount of travel. Many trips of varying length are taken. These have a tendency to break the drudgery and monotony of life, and if not excessive should fill people with a greater zest for higher things. Breadth of vision, and depth of understanding, and a consequent enlargement of sympathies are among the beneficial results of modern travel. Knowledge by direct contact with other persons and places is definite and concrete, and develops greater mutual respect.

The automobile has been a great blessing to many. But it has also been a bane and a curse. While the auto is a mechanical thing without any purposive power, it has been the means of leading many folks away from the higher spiritual values, and of hurling them on the way to damnation and destruction. The automobile is a good servant, but a poor master. It is fine when used for good ends, but an instrument of Satan when used for selfish and sinful purposes.

The home life is suffering from too much gadding about. Many families are rarely ever together at one time. Rich folks may have several places where they reside, according to the weather, but they are not always home. A hotel, a camp, or an auto is no substitute for a home.

Absence from home causes a break in the normal routine of life which often is more injurious than beneficial. We go to excess in things and return more wearied and worn, than rested and recuperated.

Some folks abandon all moral and spiritual restraints when among folks to whom they are strangers. They will not attend worship and will indulge in practices which they would not think of pursuing around home.

While I do not believe it necessary to live cramped up in a moral straight jacket in order to be righteous, yet I contend that there are certain vital principles that can not be even temporarily cast aside without suffering irreparable loss.

During my trip to the Coast in 1928, there was one Sunday I did not get into any worship service because of their sparseness in the country through which we were traveling at the time, enroute to the World's Sunday School Convention. I made up for it at the Convention, manifold.

Do not leave your religion at home when you go on a vacation. You are liable not to desire it when you return, or you may be unable to find it. If you are not sure of a trip contributing to your moral and spiritual welfare, as well as to your physical good, stay at home. It is better to deny oneself of a trip than to risk losing one's soul.

### Face of Dead Empress

#### Reproduced on Carpet

Of all the carpets in creation, the most famous in that known as the Mumtaz Mahal carpet, which was made to order at the earnest desire of Shah Jehan, says an article in the Illustrated Weekly of India. Soon after the untimely death of the beloved empress, Shah Jehan commissioned his court painter to reproduce her likeness on paper to be used in the painting and so contemplated having the likeness of his dearly loved wife reproduced on a carpet. He himself drew a rough sketch of the design meant for this carpet. The materials for the carpet were also imported from that country. The most rigid secrecy in the execution of this project was necessary lest the religious prejudices of the orthodox subjects be aggravated.

The Taj or the Mumtaz Mahal carpet measures 20 feet by 20 feet and contains 57,000,000 knots. It took 20 years for its accomplishment. The likeness of the empress was reproduced on this carpet and also that of the principal members of her family.

The Taj or the Mumtaz Mahal carpet measures 20 feet by 20 feet and contains 57,000,000 knots. It took 20 years for its accomplishment. The likeness of the empress was reproduced on this carpet and also that of the principal members of her family.

### Ancient English Bridge

#### Credited to Evil One

Tradition credits the devil with the construction of Tarr steps, a prehistoric "clapper" bridge which crosses the River Barle in a remote part of Exmoor, and said to be the largest and probably the oldest of its kind in Britain.

The legend says that it was built in a single night, and the devil, reserving the right of way exclusively to himself, proclaimed that he would destroy the first living thing that attempted to cross.

A holy man, who dared to flout the evil one, cunningly sent a cat first across the bridge, whereupon the unfortunate animal was torn to pieces. The spell was broken and the holy man took possession.

Whatever the origin, the bridge is of wonderful construction, considering it was built in an age when mechanical power was unknown. It measures 120 feet across, and has 17 spans, resting on piers of unhewn stones piled one on another. Not an atom of cement was used in the whole structure!—London Tit-Bits.

#### Why Not

Little Helen was sitting on Uncle Charlie's lap. He had been entertaining her, as uncles sometimes do, by drawing pictures for her.

"Now, Uncle Charlie, draw me a dish of mashed potatoes."

"Child," he laughed, "I can't draw that."

Helen looked quickly up at him, saying: "I don't see why. You know what they are. You have eaten them at our house, haven't you?"

### For Meditation

By LEONARD A. BARRETT

### OPPORTUNITIES IN AMERICA

TWO persons visiting America from foreign lands take away different impressions. One is impressed with our cultural advantages, music, architecture, parks, museums, colleges, economic resources, etc., while the other person is impressed only by the sordidness and extravagance of our large cities. The interesting fact is that each person saw just what he

looked for. In other words, the impressions were but reflections of inner impulses and desires. A striking case where opportunities were eagerly sought and deeply appreciated, was that of Edward William Bok. He came to this country at the early age of six. Born of distinguished parents (his father having been minister to the Court of William III) he began his career as a messenger boy in a telegraph office. After graduating from our schools he entered upon a literary career and rose rapidly until he became editor of the Ladies' Home Journal. He also wrote books and many magazine articles. Perhaps his most important book was "The Americanization of Edward Bok," published in 1920.

In addition to his distinguished success both as a writer and publisher, he will be remembered for two outstanding acts. His gift of \$100,000 as a prize for the best treatise on the establishment of international peace; the other was the erection of the Singing Tower in Florida. He was a lover of the beautiful and this tower will remain an expression of the beauty that lived within his own soul.

Mr. Bok died recently and his remains rest at the base of the Singing Tower he built.

Here was a man who saw opportunities for service to his fellow man. He achieved a remarkable success from a very humble beginning. He will always be remembered as a self-made man. Opportunities like those which came to Mr. Bok are all around us today. Whether we seize them or even see them depends not so much upon outward conditions as inner impulses.

What we earnestly desire to see determines what we are. (© 1929, Western Newspaper Union.)

### Beauty

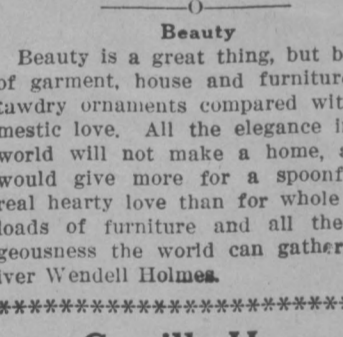

Beauty is a great thing, but beauty of garment, house and furniture are tawdry ornaments compared with domestic love. All the elegance in the world will not make a home, and I would give more for a spoonful of real hearty love than for whole shiploads of furniture and all the gorgeousness the world can gather.—Oliver Wendell Holmes.

### Camilla Horn

Charming Camilla Horn, German film actress, was most favorably received opposite John Barrymore in "Eternal Love." She was also his leading lady in "Tempest."

L. A. Barrett.

Charming Camilla Horn, German film actress, was most favorably received opposite John Barrymore in "Eternal Love." She was also his leading lady in "Tempest."

## SPECIAL NOTICES

Notice is hereby given to the Stockholders of The Carroll Record Company that an election for Directors of the Company, to serve for the ensuing year, will be held at the office of the Company in Taneytown, Md., on Saturday, July 5, between the hours of 1 and 3 o'clock, P. M.

GEORGE A. ARNOLD, Pres. G. WALTER WILT, Sec'y.

## Private Sale

**FINE TANEYTOWN PROPERTY.**

The undersigned offers at private sale his desirable property on York St., Taneytown, improved by a LARGE BRICK DWELLING, and an addition suitable for business purposes. The property is in excellent repair and equipped with bath room, hot water heat, electric lights, hard-wood floors, etc.

Possession given when terms of sale are complied with. 6-27-2f DR. R. F. WELLS.

## NOTICE!

**A Sure Way To Sell That Farm**

I wish to call your attention to the fact that I am listing farms right along. How about yours? Only those listed will appear in the Polish papers of the Eastern States. Those papers are getting results when others fail.

The Poles are basically a farming people, with an inborn desire for farm life. They have the money and are buying. There are thousands of Polish who can't read the American papers, and for that reason I'm running an ad in a Polish paper.

D. W. GARNER, Real Estate Broker, 6-27-2f TANEYTOWN, MD.

## Get Your Dog License At Once

Under the law, all dog owners failing to get licenses on or before July 1st., are subject to prosecution. They should attend to the matter promptly and thus save themselves trouble and expense.

THE COUNTY COMMISSIONERS SAMUEL J. STONE, Clerk. 6-20-3t

## ADVERTISE

your merchandise and it will sell!

J. EDWARD ADAMS. CHARLES P. MORT, Auct. J. WARD KERRIGAN, Clerk.

D. J. HESSON, C. T. FRINGER, N. R. BAUMGARDNER, Directors.

### By EDWIN F. HILL

If there is any question in the public's mind about thrifit among employees of utility corporations, they would only have to see the quarterly summary of telephone statistics issued by the American Telephone and Telegraph Company to ascertain that one organization at least are thrifit.

The Bell Telephone System now has more than 500,000 stockholders, of which about 105,000 are employees. At the present time 325,000 employees are subscribing to the stock of the American Telephone and Telegraph Company under the company's payroll deduction plan. In the past four years the number of employees subscribing to this stock has increased about 96 per cent.

In Maryland, Virginia, West Virginia and the District of Columbia, territory operated by the Chesapeake and Potomac Telephone Companies, 3,309 employees now own 26,622 shares of American Telephone and Telegraph stock, while 10,224 employees are subscribing to 40,471 shares.

President Lloyd B. Wilson made the statement recently that stock of the American Telephone and Telegraph Company owned by employees of the Chesapeake and Potomac Companies was worth at the present market price, approximately \$6,000,000, and that the rights which they will receive in connection with the new issue of stock about to come out, would be worth more than \$450,000.

Under the payroll deduction plan for life insurance, Mr. Wilson said that employees have taken out insurance amounting to about \$4,000,000 and have permitted over \$36,000 due them as dividends to remain with the insurance company and accumulate. Many of the employees taking this insurance previously carried none.

## U. S. Leads World In Telephone Use

America continues to lead the world in telephone development. The United States not only has more telephones than all the rest of the world, but it is also foremost in the number of telephones relative to population with 16.3 instruments for each 100 people. This was nearly ten times as many telephones for each 100 people as there were in Europe or all over the globe, according to the American Telephone and Telegraph Company's world census of telephones as of January 1, 1929. The only country with a telephone density approaching that of the United States is Canada with 13.7 telephones per 100 population. New Zealand comes third with 10.2, followed by Denmark with 9.4; Sweden with 7.9 and Australia with 7.6 telephones per 100 population.

Germany ranks second to the United States in absolute number of telephones, but has only 4.6 per 100 population. Great Britain has 3.3 and France 2.3. Argentina, with the same telephone density as France, outranks the rest of South America. Japan and the Union of South Africa lead their respective continents, each with 1.3 telephones per 100 population.

Smaller cities, towns and rural districts in the United States are exceptionally well provided with telephones. In this country communities of less than 50,000 population average 12.6 telephones for each 100 people. This is greater than the total telephone density of any other country except Canada, and exceeds the telephone facilities of most European cities.

Telephone statistics of the world are of increasing importance with the rapid growth of international telephone service. At the present time nineteen countries comprising most of Europe, four countries which make up the greater part of North America, three countries in South America and one district in Africa, can be reached from any Bell System telephone.

## ENGLAND CALLS U. S. MOST FREQUENTLY

English speaking nations utilize transatlantic telephone service to a greater extent than do other nationalities. The distribution of transatlantic calls by countries recently reported by the American Telephone and Telegraph Company shows that in the past year England made fifty-two per cent of the calls; France, thirty-two; Germany, eight, while the remaining eight per cent were made by the other countries to which the service is available.

The twenty-six countries with which the United States converses is growing steadily. The countries now connected by telephone, wholly or in part are: Argentina, Austria, Belgium, Canada, Chile, Cuba, Czecho-Slovakia, Denmark, Finland, France, Germany, Great Britain, Holland, Hungary, Irish Free State, Italy, Luxemburg, Mexico, Norway, Poland, Spain, Spanish Morocco, Sweden, Switzerland and Uruguay.

## Old English Custom of Wassailing Apple Trees

During the month of January, Somerset (England) farmers participate in the time-honored custom of "wassailing" the apple trees so as to insure a bumper apple crop. The ceremony takes place at night by the flickering and uncertain light of a lantern. The villagers gather in each orchard in turn, round the largest apple trees they can find. A bucket of cider accompanies them, in which a small piece of toast is dipped and placed in the branches. Then an old chant is sung, starting: "Old apple-tree, old apple-tree, we've come to wassail thee." This song concludes with an exhortation to the tree to:

grow apples enow;  
Hats full, caps full, three bushel bags full,  
Big barn floors full, and a little heap under the stair.

Then guns are fired and the villagers drink the health of the trees in cider. It is a quaint custom, and has been kept up for centuries.

## Fertile Nile Valley

The waters of the Nile, which attain their greatest height in September, commence to recede in October, leaving behind them a rich, fertile soil, which first appears in the form of islands. To these the canny Egyptians moment to plant melon-seeds, so that the melon-plans may mature, and fruit ripen, before the waters begin to rise again in June. One of the commonest sights in Egypt in the spring is a long string of camels roped nose-to-tail, and led by a small boy; each animal bearing on its back a huge netful of round green water-melons.

## 'Til Next Time

Although she has an assortment of hats, she wants a new one.  
(That's the woman of it.)  
He says he thinks she can get along without it.  
(That's the man of it.)

She insists that she can't, and she's going to get it.  
(That's the woman of it.)

He says "not if he knows it."  
(That's the man of it.)

She breaks down and weeps.  
(That's the woman of it.)

He gives in.  
(That's the end of it.)

—The Kalends.

## One's "Birthday"

The word birthday designates primarily the day of one's birth. Colloquially, the term is used to designate subsequent anniversaries of that day. Dictionaries emphasize this use defining the day as, "the day of one's birth or its anniversary." An anniversary is defined as, "a commemorative observance or celebration of an event separated by one year, or by an exact number of years from some past event." On one's first anniversary, one is one year old but celebrates what is colloquially accepted as one's second birthday, but one's first birthday anniversary.—Literary Digest.

## Caesar's Profound Rebuke

The following quotation is from "Plutarch's Lives": "Caesar once, seeing some wealthy strangers at Rome carrying up and down with them in their arms and bosoms young puppy dogs and monkeys, embracing and making much of them, took occasion, not unnaturally, to ask whether the women in their country were not used to bear children; by that price-like reprimand gravely reflecting upon persons who spend and lavish upon brute beasts that affection and kindness which nature has implanted in us to be bestowed on those of our own kind."

## Model of Ex-Kaiser Is Target in Gallery

Trondheim, Norway. — Trondheim will be boycotted by German tourists unless the shooting gallery here ceases to use models of the ex-kaiser and the German crown prince as targets.

This step is threatened by the German Traveling association in a written protest demanding the demolition of the figures, but the populace of Trondheim is having a good laugh, for investigation proved that the targets in question were made in Germany and exported to Norway.

## Measuring Moonlight

We grumble at our constant changes in temperature, yet on the moon the noon temperature is hotter than boiling water, and at night it freezes solidly in the deadliest cold imaginable, about 458 degrees below zero. This is because the moon does not retain heat, throwing the sun's rays back into space, like a mirror reflects light.

These facts have been revealed by an instrument invented recently. It is so sensitive that it even measures the heat of moonlight when it reaches the earth, so small a fraction of a degree that it can hardly be imagined.

## The Poker Faces

When Dillon, Read & Co. refused that \$100,000,000 loan to Germany some one revived an old story of Clarence Dillon's proficiency at poker. He will—or at least he would at one time—when the betting had grown two-handed and fairly stiff, show his hand to the company:

"Do you think that's good enough to call on?"  
Then he watched the faces of his adversary and others. Usually he found out what he wanted to know.—Boston Globe.

## Causes of "Blood Rain"

There are many cases of so-called miraculous showers in which the substances found on the ground did not actually fall from aloft. Thus some alleged rains of blood are due to the deposit of red fluid ejected by certain species of lepidoptera emerging simultaneously in large numbers from their cocoons, and others to the rapid multiplications in rain pools of algae and rotifers containing red coloring matter. The well-known red snow of polar regions results from the presence of similar organisms.

## MICKIE SAYS—

"WHEN YOU NEED A JOB OF PRINTING IN A HURRY, CALL US AND WATCH US HURSTLE! WE'RE SPECIALISTS AT GETTING OUT WORK QUICKLY, AND WE WON'T DISAPPOINT YOU—JUST GIVE US A RING AND WE'LL BE OVER."

## Why We Do What We Do

by M. K. THOMSON, Ph. D.

### WHY WE HAVE A TEMPER

I KNOW only one man who does not seem to have a temper. I have known this man under all sorts of conditions. I have wintered and summered with him but I have never seen him ruffled. He is an exception I am sure. The overwhelming majority of human beings have temper.

Of course we do not all have the same kind of temper. Some have their temper pretty much under control and others let it get away with their judgment, while not a few apparently have no control at all.

Temper is usually regarded as an evil. But my calm and placid friend has taught me that the lack of temper may be a serious handicap. This man lacks the punch and pep that gives force and character to a normal personality. He is tasteless and colorless, like ginger with the taste of sawdust.

Temper, like all other inborn human traits of disposition, is a necessary ingredient of personality, but like any other ingredient there must be just the right amount—not too much or not too little. It is the abuse or the extreme display of temper that is bad as is the extreme of any trait likely to end in disaster.

Temper was more useful to our savage ancestors than it is to us, and yet we cannot dispense with it.

Temper under control is like a dynamo. It drives the personality and aids him to make something of himself. We have temper because on occasion we need to be aroused from our indifference and really to something violent, something strong and effective, something that will call forth every ounce of strength in our body.

Temper is violent because it needs to be for the purposes for which it was intended. It is too useful to eliminate or to let run wild. We need better and stronger tempers constantly under leash and harnessed to will and personality.

(© 1930, McClure Newspaper Syndicate.)

## NUTTY NATURAL HISTORY

BY HUGH NUTTON

### THE HOOPSMUH DEER

THE hoopsmuh deer, which formerly was quite plentiful around Jackson's Hole, Wyo., is named from the peculiar whooping-cough sound with which it calls its young. The fawns, imitating the hoopsmuh sound in the vicinity, pass the time by taking their tails in their mouths and whirling at an amazing speed. Hunters become so dizzy that they fall to hit them, but by the time the tails are worn off,

the adult deer, nor having learned to be wary, fall an easy prey to the hunters.

We are here shown one of the few tallest adult deer that has survived, having single and double peanuts for head and body. Ears are popcorn and horns are cloves, and the legs are made of toothpicks. The parts are fastened together with chewing gum.

(© Metropolitan Newspaper Service.)

### Too Deep

"Are you interested in Professor Einstein's theory of relativity?" "No; I don't believe in ancestor worship."—London Tit-Bits.

## THE WAY WE MEET

By DOUGLAS MALLOCH

I'VE been "presented" many times to many folks in many climes. But I can't just recall today, Just anyone I met that way, That is, not anyone, no doubt, I care so very much about, Or cares, as far as I can see, So very, very much for me.

It's strange, the people we recall We never really "met" at all. For some we just were talking to, And knew before we hardly knew, And some we picked like picking flowers, We liked their ways and they liked ours, And some our grief brought to our door And made them friends forevermore.

And so I never really fret If folks I've met or haven't met. If you're the kind I understand, I sort of like, then here's my hand, If I'm the kind, I hope that you Will come right up and howdy-do. I've met a lot, all good friends now, But, my, I couldn't tell you how!

(© 1930, Douglas Malloch.)

### Remark That Silenced Silly Women at Opera

Who says that American men are lacking in cultural instincts and confine their conversation to the three prosaics—business, sports and prohibition? During intermission at a Philadelphia orchestra concert the other night this reporter, seeking enlightenment, joined a group of veteran music-lovers.

He heard this: ". . . So I turned to those two chattering women behind me and said, 'Ladies, you are barbarians.' And they didn't talk again that night while the program was on."

"Well, you made out better than I did once at the Metropolitan. I guess I was too polite. I said: 'Pardon me, ladies, but the music has begun.' They talked more and faster than ever."

"Aw, you don't know how. I certainly squelched two girls sitting beside me at a German opera one night. I said: 'Excuse me, girls, but Wagner didn't write any parts in this opera for female voices in the gallery.'"

"Gee, you know how to do it, all right."—Philadelphia Record.

### Awful Threat Brought "Half-Croon" in Hurry

Grim was the reply of the Scottish gravedigger when a certain nigardly farmer was haggling about the charge for his wife's interment. I will remember the gravedigger recounting the incident. I had asked him if he ever had had any difficulty in getting payment for his rather trying work.

"Only yince," he said. "It was when Ewan Swan buried his wife. Ye mind her with the guid gaun tongue. Efter I had raised my kep, as a signal to the mourners to gang, Ewan stayed ahint. Says he to me, 'What will I be aw'n ye, John?' 'Seeven and six,' says I. 'It's ower much,' says he, 'in licht sandy soil like that,' and he hands me a croon. 'Sandy soil or hard clay, it's seeven and six,' says I, 'and don with another half-croon or up she comes!' And I niver seen a half-croon come sae smert out o' a farmer's pouch."—Scots Observer.

### Ceylon Great Trading Port

Spices, plumbago, pearls and rare woods, the export commodities which brought fame to Ceylon, have been superseded by tea, rubber and coconut products as the island's leading exports. More than one-fourth of the world's commercial crop of tea is produced there. In the two chief coconut products, copra and coconut oil, Ceylon's contribution forms a tenth of the aggregate world exports. One-tenth of the total rubber supply is produced there.

### Radium Disintegration

Atoms of radium are distinguished from atoms of non-radioactive substances by the property of spontaneous disintegration, which, in the case of radium, consists in the ejection of an alpha-particle, which is a small piece of the central core or nucleus of the radium atom. This process transforms the radium atom into another chemical element. During disintegration atoms of radium also emit a radiation similar to X-rays.

### English in Switzerland

A traveler recently returned from a six months' holiday in Switzerland gave two quaint examples of English as she is written in out-of-the-way mountain chalets. One notice, taken from a hotel frequented by rock-climbers, runs as follows: "It is defened to circulate in the corridors. In boots of ascension before seven hours of the morning." The other is a warning to travelers not to appear at dinner in evening dress. It says: "Strange gentlemen are requested not to dress for dinner, as their costume flatters the souls of the maid folk, and no work is resulted." Which implies that Swiss girls are more susceptible than is generally imagined.

### Intelligence of Trees

Trees have almost as wonderful a sense of direction as birds. Should there be a leak in an underground water pipe in a park or garden, a neighboring tree is almost sure to find it out, and, extending its roots in that direction, project a shoot through the break into the pipe. Even more extraordinary is the performance of the rattan, a climbing palm common in tropical countries. When it has climbed a tree, it goes over the top and comes down again to the ground. Then, growing at the rate of a foot every 24 hours, it sets out straight for the next tree, which may be over 50 yards away.

### Tastes Smart

A little animated question-mark was curious as to the contents of a bottle that his mother was using to cure a headache. He wished to smell it, too. He persisted until he got one whiff from the smelling salts bottle. After recovering enough to talk, he said: "Whew, that tastes pretty smart in my nose; how does it taste in your nose, mother?"

### Frankness

Little Jane was visiting one of the neighbors, and talking all the time, finally got to comparing the neighbor's home with her own. "We have a nice dining room, too," she said with frankness, "but we only eat in it when we have company."

## Through a Woman's Eyes

by Jean Newton

### WHY DO WE DIET?

WE HAVE a letter inveighing against "this reducing business" which has now become so common with us.

"Wherever you go," she says, "you find women trying to look thin and to be thin. Styles are made for thin women and to make them look thinner; and the dieting reverberates all over. Why, I went hungry at a luncheon the other day because it had been planned for women, the majority of whom were on a lettuce-buttermilk diet. And when I entertain, I'm at my wits' end neither to starve my guests nor to offer delicacies which those dieting may not have."

"And it seems to me we're all following like sheep the edicts of the Paris fashion makers. Just as they tell us how we shall wear our skirts they tell us how we shall have our figures."

I think there is more to it than Paris dressmakers. I think the vogue for slenderness is an expression of the age. I think it is perhaps an outgrowth of as well as in keeping with the present spirit of movement, activity, speed. It isn't only that women go more than ever they used to, and go faster; it's the complexion of this age. Men, too, are concerned now about their figures as they never were before, and regular exercise, combined with restrained eating for the purpose of avoiding fat, of keeping thin to keep fit, is practiced by them to an extent that would have been undreamed of in the days when buxom beauties took pride in their curves.

Leanness is, to my mind, a physical manifestation of an age that is personified in the airplane, the wireless, the radio. The portly, settled look that was in keeping with a slower tempo is today an anachronism. This isn't a "settled" world today; and, in my opinion, the regime of exercise and restricted diet which is practiced in the name of modernity and by many women in pursuit of today's ideal of feminine smartness or beauty is the best thing that could possibly have happened, barring extremes, from the viewpoint of health, of longevity and of greater enjoyment of life.

### Coming Alibi

"Well, Useless, what made you late tonight?"

"I got a moon rocket by mistake and it was some time before I could get an earth rocket back."—Louisville Courier-Journal.

## SUPERSTITIOUS SUE

### BROTHER BERTIE SAYS THAT—

If a guy chalks the big end of his billiard cue—unclear rests the crown on the champ's head—for it's bound to bring him success.

### Franklin's Precocity

It was in 1772 that Benjamin Franklin tried his hand at journalism for the first time, writes Nathan G. Goodman in the Baltimore Sun. Without their being identified he slipped articles into the Courant under the name of "Mrs. Silence Dogood." Parading behind the mask of a shrewd middle-aged widow this sixteen-year-old boy carried on a moral and intellectual crusade, including an attack on "scolars" at Harvard college. Already Franklin knew how to mix light, amusing observations in serious discussions without falling into burlesque, and he avoided bitterness.

### First Uses for Sideboard

The dining room sideboard once served a different purpose from that of holding the family silver or glass. The sideboard, known first as a credence table, held all the dishes that were to be served at a dinner. An underling of the house then, in the presence of the guests, tasted each dish of food on the credence table to make sure there was no poison that might be fatal to the guests. But gradually, as people became less vicious and the desire to poison one's enemy, or friend, became less customary, the credence was utilized for the display of silver and table service.—Brooklyn Eagle.

## Mother's Cook Book

"Life is grand, and so are its environments of Past and Future. Would the face of Nature be so serene and beautiful if man's destiny were not equal to it?"

### SANDWICHES FOR LUNCH

A GROWING boy and a man in active work should have substantial food to supply waste and build the body. Hearty sandwiches are needed for the lunch basket.

#### Mutton Sandwich.

Mix one cupful of chopped cold mutton with a tablespoonful of ground mint, two tablespoonfuls of chopped pickles, two tablespoonfuls of lemon juice, one tablespoonful of chopped onion, and salt and pepper to taste. Mix well and spread on dark or light bread.

Another of mutton: Mix finely chopped roast mutton with thousand island dressing and use with lettuce on buttered rye bread.

#### Veal Sandwich.

Take one cupful of chopped veal, one small carrot, one small onion, a few sprigs of parsley, chop, season well with salt and pepper and moisten with olive oil and lemon juice or a simple french dressing. Use on any kind of bread.

#### Veal Loaf Sandwich

Take a slice or two of leftover veal loaf, break it up with a fork and mix with salad dressing and chopped olives. Mix to spreading consistency and use with crisp lettuce on buttered white bread. The sliced veal loaf may be used itself as sandwich filling, adding a little lettuce for moisture and a bit of mayonnaise on the lettuce.

#### Spiced Veal Sandwich.

Take one cupful of minced veal and one-half teaspoonful each of vinegar, horseradish and dry mustard, one tablespoonful of tomato catsup, a drop or two of tobacco sauce and mayonnaise to spread.

#### Mock Chicken Sandwich.

Take one and one-fourth pounds of lean veal, cook with one onion in water until tender. Put through the food chopper with one bunch of celery, one green pepper and two hard-cooked eggs. Mix with salad dressing and spread on buttered slices of whole wheat bread.

#### Mock Chicken.

Take one pound of lean pork, boiled, put through the food chopper with four stalks of celery, three sweet pickles, one-fourth of a pound of nuts. Mix with mayonnaise. This mixture keeps well and tastes much like chicken.

#### Mock Chicken Sandwich.

Take one pound of cold roast pork, four hard-cooked eggs, one cupful of nutmeats, six stalks of celery. Grind the ingredients and add enough mayonnaise to moisten. This will be sufficient for two loaves of bread.

"Honor," says Moralizing Mona, "can't be bought but it's often sold." (Copyright.)

### Labor First

An Episcopal missionary in Minnesota visited one of the outlying districts in his territory for the purpose of conducting prayer. He inquired of the lady of the largest house there if he might hold the services in her home. Not being noted for her great piety, she murmured something about: "Going out to see about it." Going out to see what detained her after a long wait, the missionary found the men busy. He went up and said: "Aren't you coming in? Don't you care anything about your souls?" "Souls?" asked the head of the family, slowly. "We bane na got time for heem, when the bees they swarm."—Pathfinder Magazine.

### Loved 'Em All

The second grade teacher was seated at her desk. Up came a little girl with a note which read, "I love you," signed Carl A.—. Another girl ran up with a note just like it. The teacher stood up, saying: "All the children who received notes bring them to me." It seemed as if the whole school arose as 23 little girls came forward with notes, all reading: "I love you. Carl A.—." "Why did you write to every girl in the room, Carl?" the teacher asked. By this time the little fellow was crying, but blurted out: "I just loved them all, and I thought they ought to know it."

### Airplane's "Flying" and "Cruising" Speed Differ

Cruising speed of an airplane is the speed at which it runs to best advantage considering oil and fuel consumption rate, vibration, laboring of and strain on motor. In other words, the speed one would care to run the motor (or airplane) on a long trip so that one would not burn up too much gas per hour at, perhaps, a slightly lower motor speed at, perhaps, no decrease in airplane speed; so that the motor would not waste oil; so that the motor would vibrate least; so that the motor would take it most easily. Comparable to an automobile there is top speed—say 65 miles per hour—and cruising speed (speed at which a car runs most smoothly with not too much care in steering, say at 30 miles per hour). In a plane, top speed might be 105 miles per hour; cruising speed, 90 miles per hour. Speed necessary to keep the plane in air is called flying speed. Minimum flying speed is called stalling speed. Landing speed is usually about two miles per hour greater than stalling speed.

### Harvest Home Festival Great Scottish Event

The annual "Kim" or Harvest Home, is a settled institution on Scottish farms. These events are usually held in the granary of the farm, which is suitably decked for the occasion. The floor is none too smooth; but the tackety boots of the dancers are quite able to contend with it. The band consists of a fiddle and melodeon, and the dances bear such weird titles as "Petronella," "Rifeman" and "Drops of Brandy." The most amusing part of the proceedings comes when the steward returns thanks to the farmer for giving the "kim." It is the one speech he makes in the year, so it is a great event for him. He usually begins in high-flown English, to the admiration of the company, but invariably fails to keep it up, and ends in braid Scots.

### Tiger China's King of Beasts

To the Chinese the tiger, not the lion, is the king of beasts. From childhood they are taught to fear the tiger, and he is made the bugaboo to frighten youngsters. If they are naughty they are told that the "tao-hu" (tiger) will catch them. Paper tigers are pasted over doors in China, so that the evil spirits, seeing the beast, will flee away.

The Chinese have great faith in tiger bones, claws and snaws as medicine. Since the tiger is so strong, they say, medicine made of him must make one strong. Traveling medicine men with tiger skins stretched on their poles as signboards rarely wait long for purchasers of their wares.—New York Times.

### Early Arctic Voyages

The Arctic regions were explored as early as 1588 by John Davis, who in that year reached latitude 72 degrees 12 minutes north. He was followed by William Barents in 1596, Henry Hudson in 1607 and William Baffin in 1616. The North pole was reached by Peary on April 6, 1909. The south polar regions were explored by Capt. James Cook in 1774. The South pole was discovered by Roald Amundsen on December 14, 1911.

### Hint for the Home

Women may lead in literature, divorce, glass blowing, fat girls, etc., but there is still one province where man reigns supreme.

When I got home last night Mrs. B was listing about 30 degrees to the starboard and complaining of severe pains in her left side.

After much coaxing I got her to tell me what the trouble was. She said she had carried in a bucket of coal.

I lit into her good. I was furious. I told her never to let me hear of her carrying in another single bucket of coal as long as she lived.

Her lips quivered and I thought that perhaps I had gone too far.

Then I told her that if she wanted to carry in the coal it was all right with me, but I wanted her to carry two buckets at a time in the future. I don't want no lopsided wife.—Spokane Spokesman Review.

## CHILLED MILK BRINGS TOP PRICES

Shipments chilled to 40°  
3 minutes after milking  
—by OIL HEAT!

THINK of it! Your entire milking ice-cold, ready for shipping, 3 minutes after drawing the last pail. The amazing new Superfex Oil-Burning Milk Chiller cools 20 to 30 gallons (larger size 25 to 45 gal.) from animal heat to 40°—as fast as you can milk—by burning a few cents' worth of kerosene. Safe and sanitary. No moving parts; completely enclosed self-extinguishing burners.

Superfex chilling insures your milk reaching market at its best—properly cooled at a cost of about 2c per can. Prevents hot weather spoilage; ends rejections. Pays for itself in ice savings alone. Insulated storage box for holding chilled milk well below 50° until shipment easily built from plans furnished free with chiller. Telephone today for further details, or come in and see Superfex work.

Two sizes: \$350 and \$385, f. o. b., Cleveland. Easy time payments.

## Lesson for July 6

### ABRAHAM, A PIONEER OF FAITH

**LESSON TEXT**—Genesis 12:1-3; 13:1-2; 14:14-16; 17:1-8; Heb. 11:8-10.  
**GOLDEN TEXT**—By faith Abraham, when he was called to go out into a place which he should after receive for an inheritance, obeyed; and he went out, not knowing whither he went.  
**PRIMARY TOPIC**—Pleasing God by Obedience.  
**JUNIOR TOPIC**—Abraham, the Pioneer.  
**INTERMEDIATE AND SENIOR TOPIC**—Pioneering in an Unknown Country.  
**YOUNG PEOPLE AND ADULT TOPIC**—A Man Who Found Friendship with God.

**I. Abraham's Call (12:1).**  
Abraham's ancestors were idolatrous. God came unto him in Ur of the Chaldees and said unto him, "Get thee out of thy country." It was necessary for him to break the strong attachments which bound him.  
2. Get thee out "from thy kindred." He was not only to leave behind him his native land, but his relatives as well. His kindred being idolaters, he must separate himself from them.  
3. "Into a land that I will show thee." He was not told what or where the land was.

**II. God's Covenant with Abraham (12:2, 3; 17:1-8).**  
1. What God promised to Abraham.  
(1) To make him the father of a great posterity (v. 2). This has been literally fulfilled. (2) To make his name great (v. 2). No name in all history equals that of Abraham in its honorable influence. It is revered among Jews, Mohammedans and Christians. They all acknowledge him as father.  
(3) A blessing to others (vv. 2, 3). He was not only to become great and share God's blessings, but to be a blessing to others.  
2. The land given unto him (17:8). Although Abraham was a pilgrim, he was permitted to sojourn in the land. The land itself was given to his seed, Israel—God's chosen and most favored nation. The nation to which He came nearest and gave most, in order that it might pass on his goodness to the other nations of the world, was given the most strategic position in the earth.

While the Hebrews have failed in the fulfillment of their divinely appointed task and the world is in chaos because of it, they shall go back to their old land and fulfill their divinely appointed task.

**III. Abraham's Generous Treatment of Lot (13:1-12; 14:1-6).**  
While Abraham sojourned in Egypt, having gone there because of the famine in Canaan, he grew rich in worldly goods. Because of his deception of the king, he was thrust out of Egypt when the truth became known.  
1. Abraham and Lot separate (vv. 5-12).  
Seeing that their temporal relations would engender strife and provoke quarrelling, and knowing the disastrous effect upon the heathen round about, Abraham gave Lot his choice. Though Lot owed everything to Abraham, his selfish heart moved him to grasp for the best, and his decision ultimately brought him to grief. He prospered for awhile, but eventually not only his goods, but he himself and his family were taken away by the confederate kings who came against Sodom.

**IV. Abraham's Faith (Heb. 11:8-10).**  
1. Its source (v. 8).  
The word of God. Faith takes God at His word.  
2. Its practice (vv. 9, 10).  
Abraham never settled down, even in the land of promise. He was a true pilgrim. He was content to pass through the land because his eyes were fixed on "a city which hath foundations, whose builder and maker is God."  
3. Abraham Tested (Heb. 11:17-19).  
1. At the command of God he offered up Isaac (v. 17).  
He went out from the country in obedience to God. He laid down his son on the altar in obedience to God.  
2. The promise of blessing was wrapped up in Isaac (v. 18).  
The promise involved this particular child, not just any descendant.  
3. The supreme venture (v. 19).  
He so completely trusted God that he went all the way. He believed that God would raise up Isaac from the dead in order to make good His promise.

**One of His Heroes**  
To go on cheerfully with a petty round of little duties, little avocations, to smile for the joy of others when the heart is aching . . . who does this, his works will follow him. He may not be a hero to the world, but he is one of God's heroes.—Doctor Farrar.

**Asking God's Guidance**  
There is nothing so small but that we honor God by asking his guidance in it, or insult Him by taking it into our own hands.—John Ruskin.

## Through a Woman's Eyes

By Jean Newton

### A SENSE OF VALUES REGARDING YOUNG MAN

"I AM concerned about my daughter," says the young and modern mother of grown-up children. "An unusual girl in many ways, she has several admirers, and there is one young man whose courtship is of long standing of whom she is very fond—so fond, in fact, that though her interest turns elsewhere, it always veers back, as to a steady anchor, to him."  
"He is a splendid young man and they seem ideally suited to each other in the big things. She admits this, as well as her affection for him, but says she feels she should not consider marrying him because their tastes are different."  
"I like the opera," she says, "while he likes musical comedy. I like serious books, while he reads hardly anything but trade magazines and the newspapers. He has the same resources and background for those interests that I have, but he just doesn't care for the same things. How would we get along?"

My first reaction was one of pleasure that young girls today should give thought to such a matter as compatibility, congeniality of taste in marriage. And yet there comes to my mind that theory of Schopenhauer, who said that we humans do not map our lives in a course charted by our minds, but that it is invariably our impulse that sways us, and our mind that justifies the impulse. In other words, we do as we wish to do and then use our minds to figure out that it is right.  
That, it seems to me, is what this daughter would do or will do if she loves the young man in question—marry him and tell herself in the meantime the many ways in which they are congenial. If she does not, then her mother need not be concerned about the waste of a match that was made in heaven!

Incidentally, it seems to me that while we laud the trend which leads a young girl to know what she wants and to consider what marriage involves, at the same time, we must not go to the extreme of losing our perspective and our sense of values. If two persons meet "in all the big things," if their hearts meet and their minds meet and their natures meet, the various details of their taste in the drama or in music or in books, while pertinent, need not loom so large, unless, of course, these assume proportions of the greatest importance in the life of either. It is true that the little things make up everyday living, but they are the little things of love and consideration and tact and understanding and compromise, not the little things of a particular book review or dramatic criticism. A man might share all your tastes in literature and yet not be the man with whom you would care to spend your life. If he is the man with whom you want to spend your life, a difference of opinion in some abstract matters may well be of minor importance.

## NUTTY NATURAL HISTORY

By HUGH HUTTON

### THE CHILEAN NORK

THE nork gets its name from its peculiar habit of forming in line with other norks, each seizing the tail of the one in front, and norking up and down the sidewalks. When such a line of norks have been sufficiently stuffed with corn flakes, they form an excellent picket fence to keep the hoboes from the tramp steamers in the harbor from climbing into the n-

trate beds. The nork would make a fine riding horse if it were not so uncomfortable to sit on.

Here we see a young nork mischievously about to pull a spring out of a nitrate bed.

His body is a Brazil nut heavily spiked with popcorn. The face is a peanut with split navy bean ears and macaroni neck. The legs are tooth-picks and split beans, and the tail is a clove.

(© Metropolitan Newspaper Service.)

### Ancient Use of Perfumes

Perfumes in ancient times were often used for reasons other than their sweet, fragrant odor. Spicy perfumes were used by the ancient Hebrews for fumigating their beds and embalming dead bodies. People were executed on piles of burning aromatic wood. In India perfumes were used in the form of incense. They were offered as sacrifices in their temples and upon their altars. It was the custom for priests to color their faces with ointment of saffron.

### France Has Monopoly on Roquefort Cheese

The pilgrim father of all cheese in America today is Roquefort, which can trace its "blue blood" as far as the First century, when Pliny remarked about its excellent flavor.

Attempts have been made in the United States to duplicate the famous French product, but such experiments have been fruitless, as the ideal curing conditions of Aveyron, France, cannot be reproduced anywhere in the world. The wholesale price of the imported Roquefort is so low, and the flavor so appetizing that American hostesses are purchasing it in greater quantities than ever before.

Epics bow their heads in respect to the shepherd whose misfortune was responsible for its origin. He left his lunch of barley bread and native cheese made of sheep's milk in a cave near the town of Roquefort, in southern France, to keep it cool until noontime. A sudden storm arose which forced him to forget about his lunch. Two weeks later he passed that way again, and thought about his abandoned food. He found the bread worthless, and the cheese covered with a curious culture mold. His curiosity and hunger being great, he nibbled a bit, and found the cheese had a flavor surpassing any food he had ever eaten.—Chicago Evening Post.

### Three Idioms of Latin Tongue Long Employed

Ecclesiastical Latin differs from classical Latin in various ways, these changes being due principally to the origin and derivation of ecclesiastical Latin. Originally the Romans spoke the old tongue of Latin known as the prisca latinitas. In the Third century B. C., Ennius and a few other writers trained in the schools of the Greeks made certain changes and, encouraged by the cultured classes, thus developed the classical Latin. The mass of the Roman people, however, continued to speak the old tongue, and after the Third century there were two separate idioms. The necessary contact between the two classes produced still a third. When the church developed a Latin it was necessary to employ a language which would appeal to the masses as well as to the literary class; hence some of the factors of each idiom were used. St. Augustine says: "I often employ words which are not Latin, and I do so that you may understand me. Better that I should incur the blame of the grammarians than not to be understood by the people."—Washington Star.

### Effect of a Yawn

One day doctors will be able to tell us why yawning is so infectious. The other morning a woman sitting opposite me in the bus gave vent to a prodigious yawn, writes a well-known practitioner. Within a few seconds both her neighbors were yawning also, and shortly afterwards I began to yawn myself, although I felt quite fresh and wideawake. I made a deliberate attempt to check myself, but could not succeed, and it was only when my mind had been occupied by some other matter that I forgot to yawn. Probably by now you are yawning yourself. The very word "yawn" seems as infectious as the habit.—Exchange.

### To Preserve Custer Memento

To preserve an old inscription cut in a rock on Mount Inyan Kara in Wyoming by Gen. George A. Custer, representatives and senators from a half-dozen middle western states are being asked to obtain funds from the federal government. The inscription was cut by Custer two years before the massacre of Little Big Horn. It is endangered by destructive relic hunters.

### Breton Peasant Takes Holiday Fun Seriously

If you are in France and in Brittany and in Quimper over a holiday, says a traveler, you will discover that festivities begin at sunset the night before. Peasants from all the country "round dress in their best and come into town in their carts and wagons. The small corner cafes in the old part of town are full of them.

Everyone drinks cider—it is the national beverage of Brittany. Outside in one of the open squares a couple of sturdy barrels are set up with chairs upon them for the musicians.

From these precarious perches the bagpiper and the fiddler and the fellow with a horn play fast and furiously for the dancers. As the dance gets more and more exciting some of the young men kick off their wooden shoes and hop around in their socks, but every one is most skillful in keeping on their heavy wooden sabots.

They stay up late the night before a holiday. There are sounds of clapping shoes and singing and laughter all night—getting even louder toward daybreak. Then the real holiday begins.

### What a Penny Can Do

I heard a wise man say: "Give crown and pounds and guineas, but not your heart away. . . ." Young men, however, are apt to be careless of their hearts, mindful of their pounds and guineas, but rarely, very rarely, mindful of their pennies. A penny, they know, will tell them their weight, will purchase exactly one stick of chewing gum. Some may even know that a penny will light a 40-watt bulb for three and a half hours. But pennies are generally a nuisance. You get them when you buy a newspaper. You can never tip with them.

But this a penny can do, so scorn it less: one penny can move a ton of coal one mile, almost, by rail. By sea one penny can move a ton of coal fifteen miles, which, incidentally, is 70, 200 feet.—Fortune, the Business Magazine.

### The Last Scrivener

"I am the last public scrivener in Paris. . . ." A serious little man was speaking to a representative of the Paris Soir. "Things have changed," he continued, "and when the buildings about here are torn down I shall have to move. There are not so many letters to write now, for even the little maids have learned to pencil their own love missives. I still have, however, enough clients to earn my living." Over his modest office is the sign: "Public Scrivener." The profession was legalized in France by Charles V during the latter part of the Fourteenth century.—Exchange.

### Average Printed Word Not Long Remembered

In a work published in 1822 it is said there were at that time 1,000 books published yearly in Great Britain, on 600 of which there was a commercial loss, on 200 no gain, and only on 100 any considerable profit. Of the total, 750 are forgotten in a year, another 100 within 2 years, another 100 in 3 years, not more than 50 survive 7 years and only 10 are thought of after 20 years.

Of the 50,000 books published in the Seventeenth century, the volume states, not 50 are remembered. Of the 80,000 published in the Eighteenth century, not more than 300 are considered worth reprinting.

Since the first writings, 1,400 years before Christ, in 82 countries, only about 500 works of all writers had sustained themselves against the devouring influence of time.

## THE WHY of SUPERSTITIONS

By H. IRVING KING

### SCISSORS

IN MOST sections of the country scissors falling on the floor and coming open wide—lying in the form of a Greek cross—is considered an omen of dire import. Some even consider it as a prognostic of a death in the family. From ancient times shears—or scissors—have been considered as possessed of more or less mystic qualities, a considerable part of such reputation probably arising from the fact that, being made of iron, they necessarily attached to them the supernatural qualities of that metal. The fact that they could cut, or sever, also gave them, by the homeopathic magic of "like causes like" a potentiality for working evil. With a pair of scissors the ancient magicians worked a charm of black magic against bridegrooms, and with the idea of giving her a dose of her own medicine a witch was branded with a pair of scissors upon the forehead—"above the breath."

Now a pair of scissors open is a pair of scissors prepared for action, ready to work evil magic by cutting or severing. Hence when they fall open of themselves they mean mischief—they are prepared to cut the strands of fortune.

The latter idea is inherited directly from the fact that in Greek mythology Atropos, one of the three fates, severed with a pair of scissors the thread of life which her sisters spun and measured. In Roman mythology it was the same. The cult of the Parcae disappeared amid the ruins of the Roman world; but the scissors of Atropos, lying open upon the kitchen floor, are still capable of giving a farmer's wife the "shivers."

# The SANDMAN STORY

### ABOUT THE BIG TREES

BILLIE BROWNIE had always wanted to see the big trees of California. Many had been the sights he had seen, many were the trips he had taken.

He had talked to so many creatures, too, and he had heard their stories. But always he said to himself that one of these fine days he must take a trip to see the big trees of California.

"Well," said Old Mother Nature, "which of the fine days are you going to choose? People say that they will do something or other one of these fine days, and I never know what they mean."

"At least I do not see why they wait so long after saying that."

"They let one after another fine day pass them by without doing what they have said they were going to do."

"So long as they are planning to do such and such a thing one of these

"There Are Few, If Any, Trees Such as We Are Anywhere."

fine days why let so many fine days go by without starting?

"Although, of course, I suppose, they have other things to do," Mother Nature continued, "and they like to dream of pleasant times ahead quite awhile before they can make their dreams come true."

"But can't you go any time, Billie Brownie?"

"I can," Billie Brownie said, "and I would love to go as soon as I can."

"How about this very fine day?"

"Good," said Mother Nature, "and you will be able to understand the language of the trees, not only by their rings but by their tree talk."

"They sound as though they were in the jewelry business," laughed Billie Brownie.

So off he went and so that he could

## How It Started

By JEAN NEWTON

### "A HOT TIME IN THE OLD TOWN TONIGHT"

THE story is told that this song was so popular with our soldiers during the Spanish-American war that the Spaniards in Cuba were convinced that our national anthem was named "There'll Be a Hot Time in the Old Town Tonight!"

We have an anecdote, too, with regard to its name in Europe at that time. In describing the entrance of the American troops into Manila, after its surrender, a leading Parisian journal related with the utmost gravity that the bands played the two national hymns of the United States, "The Star Spangled Banner" and "There'll Be a Hot Time in the Old Town Tonight," which they translated as "Il fera chaud dans la vieille ville ce soir," literally, "It will be warm in the old city this evening."

It was doubtless because of its frolicsome tune and gay lines that this song achieved the great popularity which made it the best known song during the Spanish-American war. Most of the songs of the day being of the doleful, sentimental ballad type, like "Just Break the News to Mother" and "Good-Bye, Dolly Gray," it is not surprising that the soldiers liked "A Hot Time in the Old Town."

Although it was the fame of the song during the Spanish-American war probably, which gave it its permanent place among American songs, it was not in wartime circumstance that it had its origin; the war rather, fell heir to it. The song had its debut in 1896 with the then famous McIntyre & Heath minstrels, its author being Joe Hayden, a member of the company and the music for it being composed by Theodore A. Metz, the orchestra conductor.

In addition to singing the song, the McIntyre & Heath company rendered it as a march for a year and subsequently the melody was featured by the McNish Johnson & Slavin troupe and the famous George Thatcher minstrels. It was fairly well entrenched as a popular song when the Spanish-American war broke out and the expeditionary troops made it internationally famous, putting it for a time in a class with "The Star-Spangled Banner."

(Copyright.)

see the trees all the sooner he took his little airplane.  
At last he stood in a forest of great trees.

Oh, no wonder they called them the big trees! Never had Billie Brownie seen such a forest.

Never had he seen such mighty, mighty trees. Never had he been so thrilled and so excited by the sight of trees.

There they stood, many, many, many trees, and all so magnificently large and strong and handsome.

"Oh, Trees," said Billie Brownie, "you're so beautiful! You are more beautiful than I dreamed you would be, and I always have thought you would be very beautiful."

"I have heard so much of you—but I have heard nothing to tell me half how wonderful you really are."

"You can't imagine what it means to have heard of great big, beautiful trees, and then find they are so much more beautiful than you've been told."

"Mother Nature said you would talk to me, Big Trees."

So one of the oldest and the biggest of the trees spoke to Billie Brownie:

"Yes, we are very big. There are few, if any, trees such as we are anywhere."

"The Blue Gum Trees in far-away Australia, they say, are our only rivals."

"And we're very old, hundreds and hundreds of years old. We've seen so much. We've been through so much."

"Sometimes we have been sick. Fires have given us bruises and wounds. But we act as doctors and nurses to ourselves."

"We fold some of our living tissue over the burnt and wounded part and even though it may take a long time to heal we are patient."

"I heard about your rings," Billie Brownie said.

"Oh, yes," said the Big Tree, "we have rings about our tree bodies to show how old we are. We don't add rings as some ladies might do as they get more money—we add them with our age."

"But, Billie Brownie, we like to have people see us and admire us. It seems a pity, at times, that the country is so big. It makes it so hard for people in one part to see the beauties in another."

"All I say," answered Billie Brownie, "is that I hope people all get to see you, Big Trees, some time or other."

"I wouldn't have missed this for anything." And the Big Trees bowed in a dignified fashion.

## ALONG LIFE'S WAY

By Lawrence Hawthorne

These are the things I ask of each new day:  
A happy heart to cheer me on my way;  
The chance to do some deed of helpfulness,  
And work that brings a measure of success;  
Enjoyment of the beauties Nature traces  
In wood and field and restful wayside places;  
The comfort that a cozy fireside lends;  
And joyful comradeship of loyal friends.

## TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Taney Rebekah Lodge No. 83 will install their new officers on July 18th.

Miss Mollie Wheatley, of Elorado, is visiting her sister, Mrs. Charles L. Stonesifer.

Little Miss Dolores Troxell, of Thurmont, is visiting her aunt and uncle, Mr. and Mrs. C. E. Dern.

Mrs. Charles O. Fuss, who has been seriously ill for the past ten days, remains in much the same condition.

Mr. and Mrs. Francis E. Shaum and family, and Miss Rita Shaum, are spending the week-end in Atlantic City, and New Jersey.

The heavy rain on Tuesday evening delayed the wheat harvest and threshing, but was a help to corn, potatoes and other growing things.

The Brady-Birnie wedding of which there was an account in last week's paper, took place on Saturday the 14th., not Sunday the 15th.

Mrs. Frank Null, who has been ill and confined to bed the last five weeks, was taken to the Gettysburg Hospital for treatment, Tuesday.

Miss Wanda Troxell, of Paris, Missouri, spent last week with her cousins, Mr. and Mrs. Wm. W. Troxell and Mr. and Mrs. C. E. Dern.

The next meeting of the Lutheran Synod will be held in Taneytown, on May 25-27, 1931. The last meeting of the body in Taneytown, was in 1911.

Rev. and Mrs. W. O. Ibach, of Salona, Pa., visited their daughter, Mrs. George L. Harner and son, this week, and also Mr. Harner, at Frederick Hospital.

The Reindollar Co., has built an elevator on top of their fertilizer warehouse, and installed a new mixing machine, greatly increasing their manufacturing facilities.

The first big event of the year, at the Fair Ground, following the County High School Athletic meet, will be the annual pic-nic of the Taneytown Jr. O. U. A. M., this Friday.

Mrs. David W. Hess and Mrs. Oscar D. Sell attended the funeral of Mrs. Benjamin Kemper, Westminster, on Wednesday. It was one of the largest funerals ever held there.

The Boys' Band of the Baltimore Evening Sun, that visited Taneytown two years ago, will be here again on Monday, July 7, at 2 o'clock, and will give a concert on Brining's lawn.

Wheat commenced coming to the Taneytown dealers, on Tuesday. It is of fine quality, good and hard, and the yield above the average. Some reported over 25 bushels to the acre.

Mr. Clifford A. Taney, of St. Paul, Minn., a former resident of Taneytown, who is visiting relatives near Emmitsburg, paid a brief visit to Taneytown and renewed past acquaintances.

Emory Hahn has been appointed town bailiff, and it is his duty not only to make arrests in cases of disturbance of the peace, but for violation of the motor traffic laws. He is equipped with a policeman's badge and whistle.

Taneytown was well represented at the funeral of Col. Edward O. Weant, in Westminster, on Monday afternoon. Outside of Westminster, and Middleburg district, he was perhaps more widely known in Taneytown than in any other section of the county.

Taneytown is handicapped now, and will be for some time, due to extensive work on three roads. The concrete has been laid on the Littlestown road as far as the Galt farm; grading is under way on the Keymar road; and the Gettysburg road from Harney to Round Top, is being graded preparatory to making it a state highway. Naturally, these roads are now being used with difficulty, and detouring is necessary.

On Sunday, June 22 a birthday dinner was given by Mr. and Mrs. Birnie Staley in honor of Mrs. Staley's mother, Mrs. Geary Bowers. The guests surrounded the table laden with good things. In the center of the table was placed a cake containing forty-one lighted candles which seemed to set off the beauty of the occasion. Those present were: Mr. and Mrs. Birnie Staley and son Francis; Mr. and Mrs. Geary Bowers, sons Donald, Robert, Herbert; Mr. and Mrs. John Staley and son Earl; Mr. and Mrs. William Fissel; Mr. Frank Currens and son, Donald; Mr. and Mrs. Franklin Fair and son, Jimmie; Miss Margaret Phillips, and Mr. Curtis Fissel, of Altoona, Pa.

Mr. Burton Kephart, spent Saturday and Sunday with Stanley Satton, of Chestertown.

Mrs. Charles Miller and daughter, of Chestertown, are visiting Mr. and Mrs. Carroll Hess.

Mr. and Mrs. Arda Thomas, of Baltimore, visited Mr. and Mrs. Lewis Boyd near town, on Sunday.

Miss Jane Long has returned home after spending several weeks with her aunt, Miss Bertie Long, at Baltimore.

Miss Oneida Fuss is spending some time with her grand-parents, Mr. and Mrs. John H. Marker, at Littlestown.

The pic-nic of the Taneytown Lutheran Sunday School will be held in Flickinger's Grove, Wednesday, July 16th.

Mr. and Mrs. Frank Crouse and Mr. and Mrs. George Overholzer, spent Sunday afternoon with Mr. and Mrs. Merle Conover, at Pennville, Pa.

Rev. and Mrs. A. T. Sutcliffe and children, visited the former's mother, Mrs. Alfred Sutcliffe, at Hummelstown, Pa., on Tuesday and Wednesday.

Miss Bessie Kiser, accompanied by Marie and Minnie Livingston and two other girl friends, of Harrisburg, spent Sunday with Mr. and Mrs. William T. Kiser.

Mr. and Mrs. Charles Horst, of Greencastle, Pa., and Mrs. Charles Campbell, of Westminster, spent Monday evening with Mrs. Mary Stover and family.

Mrs. Sarah Albaugh, spent several days this week, with Mr. and Mrs. John Miller and family, at Frederick, Mrs. Miller who has been ill continues about the same.

The Oak Grove school-house, recently destroyed by storm, will not be rebuilt, but the pupils of the neighborhood will be transported to Taneytown. The building was not insured against storm.

Mr. and Mrs. Wilmer Myers and children, Pleasant Valley; Mr. and Mrs. James Rodgers and Mrs. Rebecca Brown, near town, called to see the latter's sister, Mrs. Eliza Gerick, near Ladiesburg, on Sunday.

Charles E. H. Shriner, daughter, Alma; Miss Beulah Forney, of Philadelphia, and Frank Waybright, of Gettysburg, left on an auto trip, last Sunday, to the Pacific Coast. They expect to be gone about two months.

Recent visitors at the home of Anamary Whimert, were: Mr. and Mrs. Maurice Overholzer and son, Robert, and daughter, Helen; Ida Clark, Taneytown, Mrs. John Stambaugh and sons, Ervin and Hershey, Littlestown.

Mr. and Mrs. Wm. J. Stover, near town, entertained on Sunday; Mr. and Mrs. Clarence Albaugh and daughter, Esther, near town; Mr. and Mrs. Vernon L. Crouse, Mrs. Mary Stover, Mrs. Sarah Albaugh, Paul and Mary Kooztz, of town.

The corporation authorities are now engaged in completing the improvements on the bridge. A 4-foot concrete sidewalk is being laid on the south side, the bed of the road will be macadamized, and a street light will be placed at the bridge.

Mr. and Mrs. James Rodgers, near town, entertained on Sunday afternoon: Mr. and Mrs. Bruce Brown and son, Junior, of Williamsport, Pa.; Mr. and Mrs. Milton Brown, of Hanover, and Mr. and Mrs. Wilmer Myers and children, of Pleasant Valley.

Mrs. William B. Nail near Bridgeport, entertained the Emmitsburg Home-makers' Club on the lawn, at her home, last Thursday afternoon. Mrs. Norman Baumgardner, Mrs. Clyde Hesson, Mrs. Walter Wilt and Mrs. Carroll Hess, of the Taneytown Club, were the guests of Mrs. Nail.

Mr. and Mrs. Marlin E. Reid and son, Edward, and Mrs. Reid's sister, Mrs. Nellie Wolfe, of Detroit, Mich., arrived in Taneytown by auto, this Thursday morning, on a visit. Mr. Reid has a vacation of two weeks, and will spend part of it around Taneytown. Mr. and Mrs. Reid have not been here since they moved to Detroit, thirteen years ago, and Mrs. Wolfe has been away twenty years.

Mrs. Orpha J. Williams, wife of Charles G. Williams, a cousin of the late Dr. F. H. Seiss, died June 25, at her home in Washington. Interment was made at Rocky Ridge, June 27th. Mr. and Mrs. Williams frequently visited at the homes of Dr. Seiss and Geo. K. Duttera. Mrs. Williams was a member of the Order of the Eastern Star (Masonic) which conducted the funeral services.

**How to Live Long**  
The trouble with the rules for longevity suggested by centenarians is that they are contradictory. Their habits of life differ. All they seem to have in common are sound constitutions and a good deal of luck.—Louisville Courier-Journal.

## PINCHOT-BROWN CONTEST FOR GOVERNOR.

Certification of the Luzerne County Penna., primary election vote, long delayed by the battle in court over the validity of the perforated ballots used in 373 election districts, was authorized by the County Commissioners Monday afternoon giving evidence of a plurality of 26,559 in favor of Gifford Pinchot for the gubernatorial nomination, in Pennsylvania, insuring his nomination on the face of the returns.

Action by the Commissioners to certify the vote came after Judge B. R. Jones had handed down a decision dismissing the appeal of Francis Shunk Brown, who contended that certain perforated ballots were illegal, and should be cast out, giving him the nomination.

The jurist explained that the relief sought was the rejection of the returns in every precinct in the county where perforated ballots were used and that the relief had been refused in the case cited and that in the present appeal "there is no evidence in the records showing perforation of ballots in the election districts where paper ballots were used. Hence we have no jurisdiction to pass upon that question in this proceeding."

With his decision, Judge Jones handed down an order granting to counsel for Brown "the privilege of filing additional petitions under the act of April 22, 1927, which means that counsel for Brown may proceed anew to open ballot-boxes to show the use of perforated ballots.

As a result of the turn the perforated ballot proceedings have taken, the Brown forces insist they have paved the way for an appeal of the whole election, as concerns the 373 election districts, to the Supreme Court. The Pinchot camp contends that all that will be before the Supreme Court is the matter of the legality of the perforated ballots as used in a single district.

"Yes, my friends," said the theological lecturer, "some admire Moses, who instituted the old law; some Paul, who spread the new. But, after all, which character in the Bible has had the largest following?"

As he paused, a voice from the gallery shouted "Ananias!"—Columbia State.

The piano, it is announced, is now fighting for its life in the American home. And one we heard the other night was taking a terrible beating.

## THE KEY FEEDS

Some day we probably will make The Key Feeds better than they are now. But that will be when science has developed better methods of producing feed, such as better ingredients and better machinery.

But with the methods available today, we cannot make The Key Feeds any better than we are now.

They are just as good, as feed can be made - and we can give you reference from several old customers who fed the first tons.

LEADING HARDWARE DEALERS

**HIGH SCHOOL 18—FIREMEN 6**

The Taneytown Firemen, playing without their full team, were easy victims of the High School boys, last Saturday afternoon, as after the third inning the Firemen were not in the running. Neither side played a good fielding game, and errors were plentiful. The game was won by the batting of the High School boys. The score by innings was as follows:

High School	1-4-5-0-2-3-0-3-x=18
Firemen	0-2-0-1-1-0-0-2-0=6.

Hits H. S. 16; Firemen 8; struck out by Bricker 5; by Weaver 3; left on bases H. S. 7; Firemen 8; base on balls off Weaver 2; off Bricker 3.
