DETOUR BANK CLOSED ON TUESDAY

General Depression Announced as the Cause for Suspension.

The Detour Bank closed its doors on Tuesday, after a decision by the directors on Monday night. The clos-

directors on Monday night. The closing is attributed to the general depression, and to the fact that its assets are tied up in investments not readily convertible into cash. The bank had a capital of \$25,000, and a surplus of \$26,000.

The officers are: C. Ray Fogle, president; Dr. R. R. Diller, vice-president, and E. Lee Erb, Cashier. The directors are: M. Floyd Wiley, Peter D. Koons, George U. Koons, David B. Reifsnider, Jesse P. Weybright, Thos. J. Baumgardner, Emory L. Warner, Dr. R. R. Diller, M. J. Wilhide, Harvey E. Shorb, Wm. J. Stonesifer, J. D. Adams. Adams.

According to its last statement, the bank had demand deposits of \$11,-786.08, and time deposits of \$99,784.31. The bank is not connected with any

DON'T TALK TOO MUCH.

In these times of financial stress among banks and individuals, people should be careful not to talk too much especially of things they merely "hear" and do not know to be true. A great deal of injury can be done by just "talking," for most stories grow when passed from one to another, un-til a mere rumor gets to be told as a

fact.

There are always some who appear to enjoy "telling things" around—especially things that do not concern themselves; and the wonder is that they do not get into real trouble more frequently than they do.

The person who "talks too much" may not know that he or she is a nuisance—if not worse. And just now, with more or less of financial trouble afloat concerning banks or individuals.

DISTRICT C. E. RALLY.

A fine program was rendered on Thursday night at the District C. E. Rally in the Reformed Church, Taneytown. Threatening weather conditions prevented a larger attendance, but the meeting lacked no enthusiasm nor

general interest.

Rev. Guy P. Bready made a brief welcome address, that was responded to by Mr. Paul Koons, Pres. of the County Union, who then introduded the County officers. The main address of the evening was made by Rev. Paul W. Quay, pastor of Westminster Lutheran Church, and it was a fine presen-

ging by the Sheets Quar-

Several of the State Officers presented the features of the coming State Convention in Hagerstown, on October 8-11, and urged a large attendance. Mr. Shay gave a review of the entire program.

The local arrangements, song service, etc., were excellently carried out

ATTENDED NUT GROWERS CON-VENTION.

(For the Record.) Mr. and Mrs. Upton Mehring attended the annual Nut Growers' convention, of which he is a member, held at Geneva, New York, on Monday, September 13th. Leaving Keymar on Sunday morning, going by way of Taneytown, Gettysburg, Harrisburg, Sunbury, Williamsport, (Pa.) arriving at Geneva the same evening, a distance of three hundred miles

In Northern Pennsylvania and Southern New York buckwheat was being harvested. The acreage runs from two to five acres per farm, There were some patches of tobacco

Along Seneca Lake for a distance of about fifteen miles, vineyards are planted. They are planted in rows parallel with the highway and extending up the mountain side, several hundred yards. Seneca Lake lies be-tween mountain ranges and is from one to several miles wide.

The Convention was held on Monday at the Experiment Station at Geneva. It was attended by nut growers throughout the North and East. The topics discussed pertained to walnut breeding, nut tree propagation and the culture of English (Persian) and Black walnut, Pecan, Shellbark and

A banquet was held at the Seneca Hotel. Interesting addresses were made by the President and other officers of the Association.

Leaving early Tuesday morning for home, by way of Elmira to Williamsport. It rained very heavy for about two hours. Some apples are being picked in the commercial or-chards. Most of the roads are con-crete, and many of them run along rivers, streams, and between low mountain ranges.
UPTON MEHRING.

REPAIRS TO THE JAIL.

Necessary improvements are being made to the county jail, but not of a very expensive character as compared with some estimates. The repairs mainly are; a new furnace, new cell

BOYS AND GIRLS CLUB WORK Honors and Prizes Come to Carroll County Boys.

Eleven head of purebred dairy calves from Carroll County were exhibited at Timonium, last week at the Baltimore County Fair. This is the largest and only exhibit from Carroll County, according to County Agent L. Burns, who is in charge of this

A County 4-H Club dairy judging team also competed in the State contest held on Monday for Maryland Club boys. Mr. Carlton Grim, Woodbine, Md., who is a member of the County town was high mon in the County team, was high man in the State for the judging of Guernseys and received for his good work a ten dollar cash prize, and the Gold Medal given by the American Guernsey Cattle Club for proficiency in judging the Guernsey breed.

Guernsey breed.

Frank Getty, of the New Windsor Club, had the honor to show his Guernsey heifer in the Carroll County breeders herd, and will receive his proportionate share of the fifty dol-lars awarded to the herd from Carroll County. Frank also won first place in the Club class, first place in the open class, and both Grand Champion and Junior Champion at the Carroll

The Club exhibits this year, according to County Agent L. C. Burns far surpasses any ever exhibited before in the county. Club work offers wonderful opportunities to the boys and civils of the State and County. girls of the State and County. Not only from a dollar and cents standpoint, but from the standpoint of good citizenship. Building character is more important than building a fortune. The 4-H Clubs stand for the four-fold development of the 'Head, heart, health and hand'. This will be a stimulent to agriculture in the

L. C. BURNS, Co. Agent.

OLD TIME METHODS The Log School House.

Up to about 1865, there were but few country school houses except those built of logs. The "little red school-house" was a later model, and afloat concerning banks or individuals, is a good time to keep the mouth shut, rather than open it and help to cause more trouble—or perhaps get into trouble.

Tew country school houses except those built of logs. The "little red school-house" was a later model, and that too is now rapidly disappearing as the result of the High School plan, and consolidated schools. and consolidated schools.

and consolidated schools.

These log buildings were substantial, and community built, as county schools, and county supervision was but little in evidence, and schools were maintained by "subscription" rates on each pupil.

These buildings lacked modern desks, and everything about them was primitive and pretty uncomfortable. Most of the buildings were heated by large tenplate stoves, and some had large tenplate stoves, and some had inside open fire places. Some had hardly anything in the way of desks —merely long benches—for seating as well as recitations—and such desks as were used had lids that were lifted

up in order to get at the contents.

Blackboards were much in use, and text books were few in number, usu-An enjoyable feature of the evening | ally limited to the "three r's," and of course a spelling book, slates and pentet, of Baltimore, who delighted the audience with a number of selections. cils were always a part of the equipment, and the copy books were of the home-made kind, usually formed of one or two sheets of fools-cap paper folded into 8 or 16 pages, the copies being written in by the school master, beginning with the A B C's, and progressing to short words and simple sentences. Good writing and spelling were prominent accomplishments

Going for water, chopping wood and sweeping out, were jobs apportioned among the pupils, the girls helping except on the wood contracts. Long walks over bad roads and through deep snows, many times across the fields—and with no rubber shoes or boots to wear—made "going to school" a full days work, counting work at home and lessons to prepare

Practically all of the teachers in these log school days, were men; and the "hickory" was used by them on the obstreperous. On a convenient wall near the one door were clothes pegs, and a shelf, or bench, for lunch buckets was provided. Of course, there was a bucket of water and one common tin drinking cup, and "going for water" was a favor that was passed around.

Friday afternoon was the time for spelling bees by "choosing up" sides, the broom handle usually decided who had "first choose." And singing schools, and special events were sometimes held at night, candles being used to supply light. Nobody thought that the buildings, or schools, were common, for they were the best to be had at the time, and many of them turned out well equipped graduates, depending largely on the ability of the teacher and his ability to preserve dis-

TOBACCO FARMERS HAPPY.

Tobacco farmers in Maryland are having full prosperity this year, the crop being not only the largest ever grown in the state, but the price ranges high, and the quality of the crop is such that most of it will rank in the high grades.

The Maryland crop service report,

says; "Production of tobacco is forecast at 34,000,000 pounds, which would be the largest crop that has been produced in the State. Tobacco acreage is about 18 percent larger than last year and condition of September 1 was reported at 90 percent, which is very high. The crop has made remarkably good growth this year, and good yields are indicated. Excessive rains during August caused some firing of plants in the fields and retarded harlocks, wiring, plumbing, painting, some changes having to do with the better safety of, and supervision over the inmates. The Commissioners are quality of this year's crop is said to he superior."

plants in the vesting and housing operations. Except for that part of the crop which was damaged by wet weather the quality of this year's crop is said to him arrested. A Judge cleared him, vals of silence.

GOVERNMENT WILL AID BANK SITUATION

Four Billions of Dollars to be Used to Restore Confidence.

The National administration, acting through the Federal Reserve System, proposes to put back into circulation approximately Four Billions of Dolapproximately Four Billions of Dollars of assets frozen in insolvent banks, or being withdrawn from banks out of fear of bank insolvency. Also, an effort will be made on a broad scale, to prevent the failure of banks known to be fundamentally sound, but which are threatened by unjustifiable runs on the part of scared denositors. ed depositors.

Thursday's Baltimore Sun corre-Thursday's Battimore Sun correspondence from Washington, says;
"As a means of relieving these conditions, in part at least, the Administration has proposed to the Federal Reserve Board that the resources of the Reserve System be used to the fullest extent consistent with sound fullest extent consistent with sound policy to untie this capital and make it serviceable once more.

To that end it has been proposed first by the Administration and then by the Reserve Board to the twelve Reserve banks, that quick credits be extended to the failed banks. This applies immediately to those closed institutions which are members of the Federal Reserve System and after-

ward to non-member banks.

Specifically, it is proposed that as soon as a bank has failed that an appraisal of its assets be made and that a credit of from five to fifteen per cent. be extended as a first installment.

This would make it possible for the receiver of such an institution, it was pointed out, to make a quick payment

pointed out, to make a quick payment to all depositors instead of keeping their money in bond, so to speak, for an indefinite period.

Subsequently credit installments might be made as the affairs of a closed bank were put upon a concrete basis, it was added, and each installment might be followed by further payments to depositors.

By this process, the Administration believes, from sixty to eighty percent.

believes, from sixty to eighty percent of all deposits in insolvent banks could be speedily released, thereby giving vast relief to depositors and equal benefit to the businesses of those communities crippled by bank (Calvin E. Bankert and Franklin H. Myers, eventure of Lesenbus H. Myers, eventure of Lesenbus

Also it is the conviction of Administration officials that the knowledge that the resources of the Federal Reserve System were being employed to assist banks that are in difficulties, or which may be threatened with diffi-culties, will have the effect of draw-ing out of safe-deposit boxes, from old socks or from under carpets many of the millions of dollars now withdrawn from circulation.'

HOME-MAKERS' MEET.

The Taneytown Home-makers' Club! met Friday afternoon, Sept. 11th., in the Firemen's building, with 13 members and 2 visitors present. In the absence of Miss Slindee, Home Dem. onstrator, who is on her vacation, the demonstration was given by Mrs. Samuel C. Ott and Miss Belva Koons, on suggestions for school lunches. They packed a properly balanced lunch in a metal lunch box, with a thermos The lunch consisted of two sandwiches, a relish, a dessert, sweets, fruits and sweet cakes. Several kinds of sandwiches, sweet cakes, and tarts were made, and served. The recreation period was made quite interesting by Mrs. Martin Koons, who played a violin solo, accompanied on the piano by Mrs. Mervin Conover. The Club will hold a bake sale, on Sept. 26th., in the Firemen's building, afternoon of the piano both the Firemen's building, afternoon both the firemen's building afternoon both the firemen's building afternoon both the firemen's building afternoon by the firemen's building a and evening.

METHODIST DAY.

Methodist day will be observed on Saturday, October 3, at the Straw-bridge Home for Boys, located at Eld-ersburg. Carroll County, Md.

At 2:00 P. M. there will be a brief but very interesting program presented. A timely and thoughtful address will be given by the Rev. Ralph W. Sockman, D. D., minister in the Madison Avenue Methodist Episcopal Church, New York. Dr. Sockman is one of the outstanding preachers of America today, and rightly deserves a

large hearing.
Former Methodist Day occasions Former Methodist Day occasions have been responsible for large crowds of people. Many will wish to bring their lunches and eat in the well shaded picnic grove. A fried chicken dinner will be served from 11:30 A. M. to 1:30 P. M., for 75 cents. The public is invited to attend public is invited to attend.

ATTORNEY BAER, BALTIMORE.

Mr. Eli Baer, Attorney, has been appointed chief counsel for the Mary-land Insuranshares Corporation and it will now become necessary for him to remain in Baltimore. While Mr. Baer's office will be closed in Westminster he will retain his membership in the Carroll County Bar.

He has requested us to state that the account of the Midland Home Building Association is in the hands of Ashby Tolsan, Esq., the standing auditor of the Circuit Court of Baltimore City, and will be prepared by him as swiftly as possible.

A SHORT STORY.

The following short story appeared

ESCAPED FROM HOSPITAL Inmate of Springfield Institution at Sykesville.

The Frederick Post says: "Believed aided by an outside accomplice, Mrs. Ruth Smith, 33-year old Knoxville resident, Monday night escaped from the Springfield State Hospital for the Insane at Sykesville, where she was committed almost three months ago following her arrest by county and Federal officials.

According to word received in this city, Mrs. Smith escaped through a window screen, which was said to have been slashed from the outside in such a way as to allow the woman to crawl through. A search is being conducted for the woman, who physi-cians declared was mentally unbalanced when they committed her to the hospital in late June, after hallucina-tions had led her to believe she was

tions had led her to believe she was related to the president.

Local officials received word of the affair Tuesday and have also instigated a search for her. Her home is at Knoxville, where her two children reside and it was thought she might attempt to visit them. She is separated from her husband, who is a civil engineer in Washington.

Mrs. Smith's claims of relationship to the president, and letters which she wrote led to her commitment in June. The letters fell into official hands and Federal agents were quickly dispatched to the county to investi-

ly dispatched to the county to investi-gate the case. She eluded them for some time, upon one occasion wading the Shenandoah river from West Virginia into Virginia after being taken in custody by county officers. She was finally arrested by Sheriff Moler in Jefferson county, W. Va.

Upon numerous other occasions.

Mrs. Smith has been a source of much annoyance to county officials.
Once before she was committed to
the Springfield state hospital, but
later obtained her release when a
jury declared her sane. Another
time, she openly admitted she carried a gun and flourished it in the
court of Magistrate Sherman P. Bowers."

THE ORPHANS' COURT.

5. Keep your body warm.

6. Do not take drugs to induce

7. Above all, do not fret because you do not sleep. There may be other things to worry over, but do not worry over not sleeping. Accept this situation philosophically. Think of pleasant things. Make them up if necessary. Lie still and rest anyhow. And the next thing you know, it will be time to get up.—The Transmitter.

BACK TO SCHOOL URGED BY SCHOOL HEADS.

An Important Question Requiring Careful Thought.

The financial depression has naturally caused tendency toward reducing the attendance at schools, the idea being to reduce expenses on the part of parents, and that wage earners may be increased. The problem has two sides, and must largely be settled by those immediately concerned. The argument in favor of continuing school attendance is well set forth in

the following: Washington, D. C.—Protestant, Catholic and Jewish Churches pledged Fred C. Croxton, Assistant Director of the President's Organization on Unemployment Relief, to emphasize a nation-wide, back-to-school movea nation-wide, back-to-school movement. The purpose, it is said, is to lessen the social service load the country will have to carry this coming winter by giving employment to adults and to better fit the children for the problems of life by keeping as many as possible in school.

Dr. Willis A Sutton a member of

Dr. Willis A. Sutton, a member of the President's organization and sup-erintendent of schools, Atlanta, Ga., asserted, in speaking through the net-work of the Columbia Broadcasting System, that children of school age could earn more actual money in the long run by returning to school at this time than by seeking work. "The present job of the child," he declared, is to attend school and the job of the rest of the country is to provide work for those without it."

Quoting from the full text of Dr. Sutton's remarks, he said in part: "Education and business are not antagonistic forces. To represent business as a merely materialistic, acquisitive enterprise on the one hand, or education as detached and valueless mental gymnastics on the cities hand the served and cookies are served with the fingers. Bread and crackers that accompany other dishes are always taken from the plate with the fingers. Bread and crackers that accompany other dishes are always taken from the plate with the fingers. GOVERNMENT BY FORCE.

Once in a while, in the discussion of one of our much opposed laws, we hear it said "I am opposed to government by force" which may sound like a statement of justifiable indignation from a citizen of this big country of ours, where we have "government of the people, for the people and by the people."

his classic address about "government by force." He was not then discussing government analytically; but no one doubts that he believed in "government by force."

It is rather an old habit that some have, of urging the "force" plea, when some law, or act of the government hits them where it hurts. As a matter of fact, laws are worthless without "force" back of them. It is an old truth in law that "a law without a penalty, is void." So, it is the "force" of the penalty rather than "government by force" that the complainants whine over, and object to, as though sensible persons do not know that without force connected with lawthere could be no stable government.

Every man convicted of crime, or who would evade laws that restrain high, and that there is practically no him in his bad habits, practices or acts is opposed to the "force" in laws. The doctrine of "personal liberty" opposes any legal force that would restrain lib- ing taxes— the "same rate as last erty of the class that would be a force | year." in itself against such liberty.

We do have "personal liberty" in our expression of political or other sentiments at the pools, an act that in itself gives us participation indirectly in the making of laws by officials, or by Congresses and legislatures; but, further than that personal liberty does not go, nor does our prating about "opposition to government by force" count for anything more than personal objection to laws that we do not like.

SOME STRANGE VALUES.

Every day, somewhere, somebody gets killed when crossing a public highway-hit by an auto, or truck going within the legal speed limits of 30 or 35 miles an hour. The verdicts usually are that no blame attaches to the motorist-merely an "unavoidable" accident—the victim should have known better, or stepped faster.

But we have had many cases—and still have—that when a cow trespasses on the right of way of a railroad Company must pay the owner the value of the animal.

In Carroll County, every year, the heat without more than one or two Commissioners pay for many sheep little whimpers. But a fourth month and turkeys killed by dogs. That the of it is cruel and unusual punishment sheep or turkeys may be trespassing on the public highways, or on private property not belonging to the owner of killed stock, makes no difference, the law makes the country responsi- calling a conference on unemployble for the killings by dogs.

They are practically always, mere trespassers, without rights of their own, especially in the open country. The motorists are provided with highcost roads at the expense of tax-payers, but the humble foot man has no narrow path even, that he can claim legal right to use, and be safe.

DEPRESSION.

Almost everybody knows what "depresssion" means. There are not many definitions to the word at any time; but now it has only one, and that one applies to all kinds of business that does not produce as much money profit as employers and emthey actually need—one or the other.

There are all kinds of explanations of this kind of depression, but not so many remedies that meet with general agreement as to their efficiency. Some are sure that it is due to the "machine age"-machines that turn out finished products that used to give employment to many individuals. Others say there are too many women in business, and holding positions, who have displaced men. There are also believers in the idea that not enough young people are getting married; that the fear of getting fat has reduced the number of bread eaters, and consequently causes the overproduction of wheat; that "the car" takes President Lincoln said nothing in that ought to go for actual living ex-

> We could name some—reliable in hibition, and many pencils are worn out figuring on the lost liquor revenue of the good old wet days, and also the number of men thrown out of employment because of the iniquitous dry law plan. Their prediction is, "give us licker, or give us more debt, and more taxes."

Some near-sighted persons point to the practical monopoly of the teaching jobs by women; that there isn't too much food raised, but that folks have made it unfashionable to eat substantial meals; that prize fights and baseball are costing the country too much money; that taxes are too let up in public expenditures, notwithstanding the low standard of the ability of taxpayers to keep on pay-

Some, or all of these, no doubt cooperate in bringing about the depression that everybody is worrying over, and seeking a remedy for; but the truth is, too, that nearly everybody wants the kind of remedy that will not but to consider the two armies faced each other on September 11, in battle formation. The story of the battle is told in the letter which Pickering wrote to Congress that night at Chester where Washington had sent his stores and distributions of the consideration of the two armies faced each other on September 11, in battle formation. not hurt, nor cause personal sacrifices.

UNFAIR HEAT.

A good many will agree to the wail made editorially by the Philadelphia Ledger, concerning the unbut why complains when it only makes us hotter? The Ledger says:

It's unfair. Here we suffered along through June and July and even a part of August and didn't say a word—well, not many words. We took our hot medicine and watched the mercury rise and the collars wilt. We took it as a matter of course. That was summer time; always is hot

But now it is almost mid-September. Within ten days even the calendar will concede that summer is gone. It is a time to begin thinking about topcoats and wool blankets and coal bins. And what have we had? Nineand gets "bumped off," the Railroad ty-seven-degree weather. A weekhas settled down on us.

We took three months of summer It's too much.'

THE LEGION'S RELIEF MOVE.

Some of the most influential leadtime. It may be that in calling this trian, has lost rights in law than a nary discussion of the bonus question, cow, sheep or turkey enjoys—so far an expression of the views of other citizens participating in that meeting, which will not be without its effect on

Any legislation instigated by the Legion involving the payment of bilis that no speed is legalized, or stip- gardless of their necessities and in

ulated, as applying to pedestrians. addition to the huge sums now being expended for the aid of their disabled members, would impose a serious handicap on the general movement for relief. The best service the Legion can render the country today is to set itself firmly against the proposals for special and enormous benefits to its members at the expense of the rest of the people, who can ill afford to shoulder any additional burden .-Phila. Ledger.

WASHINGTON'S DEFEAT AT BRANDYWINE.

At twelve o'clock at Night," Sept. 11, 1777, General Washington sat down in his improvised headquarters at Chester, within thirty miles of ployees want to spend, or as much as | Philadelphia, to write Congress an account of the battle of Brandywine which had taken place that day. But the hand which had carried the sword all day was now too tired to wield the pen, and Washington had to ask one of his aides to write the news to Con-

> Timothy Pickering, Adjutant General, prepared the account of the bat-tle which was signed by the Commander-in-Chief and sent to Congress

"I am sorry to inform you," the letter began, "that, in this day's engagement, we have been obliged to leave the enemy masters of the field."

The battle of Brandywine, as recalled by the Division of Information and Publication of the United States

Crorge Washington Ricentennial Com-

George Washington Bicentennial Commission, was the result of Washington's great effort to save Philadelphia from Howe. Handicapped as he was tion of wheat; that "the car" takes too much money out of circulation after a stubborn resistance that cost Howe many of his best soldiers.

In August General Howe had com-nenced his movement on Philadelphia. He disembarked his army near many ways—newspapers that say the head of Elk on the Chesapeake, about whole thing has been caused by proed only long enough to complete preparations for the march and started for the American capital. It was now evident that Howe meant to take the city, and Washington had either to fight or to turn Philadelphia over to the enemy without a struggle. With a force numerically inferior and poory armed, the General decided to fight.

In his general orders of September Washington appealed to the army support him to the utmost in the "Two years," he wrote, "have we maintained the war, and struggled with difficulties innumerable, but the prospect has brightened." He suggested that if they were successful in this campaign the war would be con-

Howe moved forward slowly with the Americans withdrawing ahead of him, harassing his troops and in every way possible impeding his progress. General Washington at last took his position on the Brandywine, at Chad's Ford, directly in the Briton's path twenty-six miles from Philadelphia. Here the two armies faced each other

"Unfortunately the intelligence re-ceived, of the enemy's advancing up the Brandywine and crossing at a ford about six miles above us, was uncertain and contradictory, notwith-standing all my pains to get the best. This prevented my making a disposition adequate to the force with reasonable heat we have been having; which the enemy attacked us on our right; in consequence of which, the troops first engaged were obliged to retire before they could be reinforced. In the midst of the attack on our right, that body of the enemy, which remained on the other side of Chad's Ford, crossed it, and attacked the division there under the command of General Wayne, and the light troops under General Maxwell, who after a severe conflict, also retired. The militia under the command of Major-General Armstrong, being posted at a ford about two miles below Chad's. had no opportunity of engaging.
"But although we fought under

many disadvantages, and were, from the causes above mentioned, obliged to retire, yet our loss of men is not, I am persuaded, very considerable; I believe much less than the enemy's. We have also lost seven or eight pieces of cannon, according to the best in-formation I can at present obtain. The baggage having been previously moved off, is all secure, saving the men's blankets, which being at their backs, many of them doubtless were lost. I have directed all the troops to assemble behind Chester, where they are now arranging for this night Notwithstanding the misfortune of the day, I am happy to find the troops in good spirits; and I hope another time we shall compensate for the losses now sustained. The Marquis de Lafayette was wounded in the leg, and General Woodford in the hand; divers other officers were wounded, and some slain; but the numbers of either can-not now be ascertained."

Story of Samson Found in Oriental Literature

Discoveries on the site of the ancient city of Beth-Shemesh, in Palestine, by the Haverford college and archeological expedition, confirm the

scientific supposition that this gray mound on the border between Dan and Judah was once a part of Egypt's domain, once Philistine, once Hebrew, once Roman, once Byzantine; but it would have been more interesting if the American archeologists had found something like a visiting card of the giant Samson, or a bit of jewelry with the monogram of a lady named Delilah, in the ruins. For it is supposed that it was here, at Beth-Shemesh, that the famous betrayal of Samsonthe shearing of the luxuriant locks, which resulted in the loss of his Herculean powers-took place. Modern criticism is inclined to make rather light of the feats of Samson, as recorded in the Scriptures. Similar tales of a gigantic hero-even of his temptation and fall-are found in oriental literatures that go before the Hebrews.

Great Issue Provoked

Passions of Statesmen The startling declaration of Bob Toombs, of Georgia, that he proposed to call the roll of his slaves from the base of Bunker Hill monument—this in derision of the Massachusetts representatives who were fighting the slavery, was made in congress when the slavery question was incidentally raised in the discussion of a measure to purchase Cuba, writes J. H. Galbraith. Ohio historian. It was on February 25, 1859, and Gen. I. B. Sherwod, who told the story, said it was the occasion of his first visit to Washington. He was in the senate that night and heard the sensational debate. Over the thrilling memories of four years later in the Civil war the memory of what he saw that night stood out clear and fresh to his last

days. Toombs supported the purchase bill and made a vicious attack on Senator Seward, who opposed it. Senator Benjamin said that unless the purchase was made, Spain would free her colored slaves and there would be no tropical fruits, as these could be raised only by slave labor. Seward moved to tack on the homestead bill as an amendment. That roused Toombs to anger. That "land for the landless" argument was a scheme of the demagogues. "I despise a demagogue," he said, "but I despise still more those who are driven by demagogues."-Detroit News.

How City of Portland

Was Named by Chance The name of Portland, Ore., was decided by flipping a coin. Although a cabin or two had been previously built on the site, the founding of the present city of Portland dates from 1843, when William Overton and Amos L. Lovejoy, ascending the Willamette river in a canoe on their way from Fort Vancouver on the Columbia to Oregon City, selected the site as an ideal location for a town. Soon after the tract was acquired Overton sold his interest to Francis W. Pettygrove. In 1884 the land was surveyed, the boundaries determined and the first log house built, and the following year a portion of the tract was laid off into streets, blocks and lots. When the problem of naming the embryo city came up Pettygrove, who was a native of Maine, wanted to call it Portland, while Lovejoy, who was a native of Massachusetts, favored Boston. The two New England real estate men finally decided to settle the matter by tossing a penny-heads,

won and the city was named Portland. How Student Made Discovery

Portland, and tails, Boston. Heads

The principle of the selective irradiation of food was discovered by a young student of electrical engineering at the University of Cincinnati, named George Sperti. He was working on the electrical aspects of the production of ultra-violet rays. His interest was diverted to the effects of these rays on living substances, and he interested President Herman Schneider of the university in installing a biophysical laboratory. The foundation of their research was the application of the quantum theory of physics to organic matter. A large sum of money has been paid for patents on the discovery. Professor Sperti, at thirty, is director of the Basic Science Research laboratory. The University of Cincinnati and the General Foods corporation, which acquired the patents, have organized a joint holding company, and a new laboratory is to be erected at the university from funds accruing to it from the discovery.

How to Stop Coughs

A teaspoonful of glycerin in a glass of cold milk will stop that irritating cough that attacks you when you lie down at night. Take a few sips at a time until relief is obtained.

How Icebergs Are Formed

When a glacier reaches the sea the end of it flows slowly into the water. From time to time pieces break off and float away. These are called ice-

Shreds, Pulverizes and Makes an Even Distribution of any kind or condition of Manure.

EASY TO LOAD—Low down; can be backed into corners of barnyard; pivots on either rear wheel, turning auto guide permits the front wheels to turn at right angles to the bed. Both wheels will whee furning

EASY DRAFT—Roller Bearings and "Non-Wrapping" assure a very light draft. So constructed that all bearings remain in complete alignment. The pull or draft is direct through draft braces pulling from center of bed. CANNOT WRAP-The oscillating

CANNOT WRAP—The oscillating tooth bars prevent all wrapping by the simple application of an old principle well known to our grandfathers and yet it absolutely prevents any wrapping. Has a 16-point distributor which aids in pulverizing and makes a wide but very even spread.

Has attachment for spreading lime and top dressing fertilizer. If you want the biggest returns apply the manure with a Farquhar "Non-Wrap" Spreader—fully described in Bulletin 330. Send for a copy today.

FIT CHICKENS FOR EXHIBIT AT FAIRS

Must Be at Their Best to Carry Off Prizes.

Before chickens can win many prizes at fall fairs, they must be carefully selected and fitted for the show. It is only by a careful, systematic examination that one can find all the faults of a bird.

entered, place the males in individual coops and the females either in these | 25-lb. Box Dynamite, \$5.00 individual coops or small group coops," advises C. F. Parrish, extension poultryman. "Those having many birds to Women's Night Gowns, 39c condition may equip a building for the purpose, though most small exhibitors use temporary quarters. The important thing is to have the birds where they may be handled easily at any time without the possibility of making them wild or breaking the plumage."

Mr. Parrish does not advise force feeding to get the birds in shape. There are times, however, when a few extra ounces of flesh may turn a decision in a bird's favor. Extra feeding may also help to develop a better plumage. The best way to go about getting these desirable attributes is in the addition of a more concentrated and palatable feed to the regular ra-

Practically all white birds are washed before exhibiting. One that has not been washed looks out of place in strong competition. Four tubs are needed to do this effectively. 6-lb Can Chipped Beef, \$1.98 In the first, the water must be warm and plenty of soap suds used. This is rinsed off in gradually cooler water in the other three tubs, with bluing added to the last one. After washing, allow the bird to stand in a dripping coop for 30 minutes before going into the exhibition coop to dry completely.

Use of Artificial Light

in Henhouse Indorsed The use of artifical light in the houses of the laying hens in September and October is proving a profitable practice on many New Jersey farms, reports C. S. Platt, research specialist at the state college of agriculture, New

Brunswick. It has, explains Mr. Platt. the advantage of prolonging the length of the day in the early fall and seems to give an increased egg production in the months when large eggs are demanding a premium price. This is an extension in the use of artificial lights, which heretofore have been used exclusively on pullets and solely in the

Any system of artificial light may be used, starting it when the daylight or working hours for the hens fall below thirteen. If the morning system is used, the lights are put on from 4:30 a, m. until daylight. The evening system calls for lights from dusk until 6:30 or 7 p. m., and the evening lunch system from 8:30 to 9:30 p. m.

The purpose of the light, of course, is to increase the food consumption. For best results 100 birds should consume from 10 to 12 pounds of grain daily and an equal amount of mash. Moist mash may be fed to good advan-

The light should be discontinued about November 1, and the birds allowed to go through a resting period of two or three months.

No Place for Roosters

Among the Laying Hens "Farmers of the central states lose \$30,0000,000 to \$50,000,000 a year on account of producing eggs that are fertile. When they move into commerce they are removed and destroyed," says Paul Mandeville, secretary of the United States Egg so-

"A more serious loss occurs," Mandeville says further, "from slowing down consumption of all eggs while these poor eggs are being forced on unwilling buyers. It is well known that a chief advantage of handling California eggs is the fact that they are in-

Remove all roosters, young and old, from the laying flock.

Poultry Hints

Unless the range is clean, chickens may be kept in a house as surgically clean as an operating room yet die from filth diseases. Not the food put before them but what they can ger outside is responsible for intestinal disorders of poultry.

The use of barley to replace yellow corn in poultry rations should be determined by the relative prices of the two grains and the availability of sources of vitamin A.

In the opinion of many poultry specialis's broilers should be sent to market as soon as they are salable. As the chick makes the most rapid growth during the first few weeks of its life. it costs more and takes longer to put on weight after it has reached a pound in weight.

Ground barley is a satisfactory substitute for ground yellow corn in a standard laying much when the scratch grain is composed of a large per cent of such d yellow carn and green feed is available for the birds.

Officers were elected as follows: Pres., John Harman; Vice-Pres., Howard Harman and Isaac Rickell; Sec., Edith Heagy; Treas., Frank Harman; Historians, Oscar Dell, Howard Harman and W. S. Harman; Nominating Committee, Helen Trone, Annie Gahl and Mary Agnes Harmon; entertaining commit-tee, Helen Shipley, John Harman, Harman Dell, Pauline Rickell and

Margaret Gesell.
"Why palaver about disarmament if we cannot disarm the highwaymen who daily plunder and kill, in the bosom of our own country"—Wm. Cabell Bruce.

Surprising Anger

speak to me," confided Mabel. "Really!" said Ethel. "What is she

angry about?" "I haven't the slightest idea. We met a couple of days ago, and we were talking as friendly as possible, when suddenly she flared up and hasn't noticed me since."

"What were you talking about?" "Nothing in particular. I remember she said: 'I kiss my husband three or four times a day." 'And what did you say?"

"I said: 'Why, I know at least a dozen women who do the same,' and then she nearly had a fit."-London Tit-Bits.

MARRIED

CAMERON-ENDY.

Tuesday evening, Sept. 15, at 7:30 P. M., Adelaide Virginia Endy and Lawrence Westwood Cameron were united in marriage. The service took place at the Lutheran Church of Our Saviour, in Baltimore, by Rev. Luther Rhodes, the pastor of the groom's church.

The bride is the daughter of Mrs. Florence A. and the late Rev. George P. Endy, of Guelph, Ontario. She is a graduate of the Bridgewater High School, Nova Scotia, and also of the Lutheran Deaconeess' Mother House and Finishing School, of Baltimore. The groom is the son of Mr. and Mrs. George W. Cameron, Baltimore. He was a graduate of the Y. M. C. A., where he had taken a business course, and is a student of the Peabody School of music in Baltimore.

The bride looked very sweet in gray with white roses, while the groom wore dark blue. After the ceremony they left for a short tour through the mountains and the west. Upon their return they will live in Baltimore where the groom is employed.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MRS. CLARA KNOTT FISHER.

The funeral of Mrs. Clara Knott Fisher, formerly of Bruceville, but of late years a resident of York, Pa., will take place from the Reformed Church at Keysville, on Saturday morning,the services beginning at 10:30 o'clock. Rev. Guy P. Bready will be in charge. Interment in the Keysville cemetery.

MRS. MARY JANE HAWK.

Mrs. Mary Jane Hawk, widow of the late Calvin Hawk, died at her home, in Philadelphia, on Thursday morning, Sept. 17th., 1931. Funeral services will be held at 2:30 o'clock, from Grace Reformed Church, Taneytown; interment in the Reformed cemetery. She is survived by the fol-lowing children: Albert Hawk, of Reading, Pa.; Atvill, and Misses Eli-zabeth and Adelaide Hawk, of Philadelphia, and several grand-children.

MRS. VASHTI HORTON.

Mrs. Vashti Horton departed this life at the home of her son-in-law and daughter, Mr. and Mrs. Joseph Bradshaw, of near Alesia, Md., on Sept. 3, at the age of 80 years, 9 months and 14 days. She leaves another daugh-ter, Mrs. James I. Bradshaw, of Erwin, Tenn., 5 grand-children, and 2 sisters, Mrs. Desdamona Phillips, of Robins, N. C., and Mrs. Mary Burd Green, Cocoanut, Fla. The funeral was conducted at the home and concluded in Trinity Reformed Church, by Rev. Dr. John S. Hollenbach.

MRS. SOPHIA R. DAVIS. Mrs. Sophia R. Davis, wife of Mr. T. Allen Davis, of Beltsville, Md., died on Sept. 7, 1931, aged 57 years, 11 months, 8 days. Death was due to hemorrhage of the brain causing a

paralytic stroke. She was a continuous sufferer for four and a half years. Mrs. Davis was a daughter of Mr. and Mrs. Harry F. Fink, of Taneytown. Her husband who survives her will be remembered as Allen Davis, also formerly of Taneytown. She is also survived by three sons and two

daughters. Burial was at St. Joseph's Catholic Church, Annandale, Md., Father Fely, her pastor, officiating.

MRS. EMANUEL W. HAINES.

Mrs. Alice Anna (Jones) Haines, wife of Emanuel W. Haines, died at their home near Röller, Carroll Co., Md., on Sept. 3, at 10:00 P. M., from Md., on Sept. 3, at 10:00 P. M., from a complication of diseases. Mrs. Haines was aged 78 years, 6 months and 7 days. She is survived by her husband, 5 children: William E. and John S., Lineboro R. D.; Luther C., Manchester, R. D.; Mrs. George Nonemaker, New Freedom, and Mrs. Miles Routhey R. D. 17 grandschildren and

The funeral was held on Sept. 6, at 1:30 at home and concluded in Line-boro, Union Church, conducted by the

In Loving Remembrance of my dear Sister, LAURA B. BAIR, who died five months ago, April 16, 1930.

What is a home without a sister! Tis now robbed of its flowers, There is a broken-hearted brother, Who spent many a lonely hour.

How much I miss her kind advice, In this great struggle of life; How different do I find things now Than when she was here in life.

A happy home we once enjoyed How sweet the memory still, But death has left a vacant chair, This world can never fill. Rest on, dear Sister, thy labor o'er Thy willing hands will toil no more A faithful sister, both true and kind, A truer sister we could not find.

Weep not for me my brother, dear, I have gone to rest, you need not fear; My stay on earth was short with you, Therefore, prepare to follow me. Prepare in time, make no delay, For I was quickly called away.

By her brother,

SAMUEL E. CLINGAN & WIFE.

"Mrs. Wilson is so angry she won't HIGH SCHOOL NEWS TANEYTOWN.

At the end of last week, it was found that the enrollment had passed the 400 mark, no less than 405 being on the roll for all grades. Of these 114 are in the High School, 12 more than the total High School enrollment

for last year.

The first joint faculty meeting of the year was held on Wednesday af-ternoon of this week. Mr. Wooden and Mr. Null were the speakers, the subject under discussion being "lesson plans." Light refreshments were served.

At the assembly period last week, the Classes organized, and made plans for their Class activities for the year. The first issue of the "Flame," Tan-The first issue of the "Flame," Taneytown High Schools paper, will be out toward the latter part of the Star's Science Service.

The first meeting of the Parent-Teachers' Association during this school year will be held in the auditorium, on Tuesday evening, Sept. 29.

Magyar Girls in Duei:

Both Hurt; Shake Hands Budapest.-Maria Fuelsep and Rosa Golity, pretty Magyar girls, fought a

duel with swords at Szeged. Each of the girls had believed Emmerich Farkas, a city employee, intended to marry her. They purchased sabers and fought in a forest with the result that both are in the hospital, seriously hurt.

"I've said I intend to marry," Farkas said, "but the girl I love doesn't live here. She's in Budapest."

The girls, lying side by side in the hospital, upon learning of his remarks, shook hands.

Government Finds Thief, but Can't Punish Him

Honolulu, Hawaii.—A strange fraud case in which the offender can neither be punished nor spend the money involved, was disclosed recently with discharge of the postmaster on leper isle of Molakai.

Government officials said the postmaster, a leper, had defrauded the government of \$1,800, but that he could not be punished because he cannot be removed from the island and the island has no jail. On the other hand the leper cannot spend the \$1,800 on the island and he cannot get away

because of his disease.

Apatite, appropriately enough, is one of the constituents of teeth, it ap-

Apatite in the Teeth

pears from a report of the superintend of the physics department of the National Physics laboratory, London, England. In normal teeth the enamel consists of apatite crystals together with a second crystalline substance, at present unidentified, the report states. The National Physics laboratory has been making a preliminary study of the crystal structure of teeth at the request of the dental research board.

Apatite is not an emotion, but a mineral made up of calcium, fluorine and phosphorus. It occurs in various colored six-sided crystals. It is a common source of phosphorus and the mineral is exported as fertilizer by Norway and Canada.-Kansas City

Whitman and Lowell

At last Walt Whitman is safely ensconced in the hall of fame. He enters that airy colonnade 24 years after James Russell Lowell, who once called Whitman a "rowdy."

Lowell's epithet was applied at a dinner in Cambridge, given for a visiting nobleman. The guest mentioned that he had a letter to Whitman from some English notable. "For God Almighty's sake don't deliver it!" cried Lowell. "Do you know who Walt Whitman is? He is a rowdy, a New York tough, a loafer, a frequenter of low places, friend of cab drivers."— New Republic.

Habit

One of the commercial bowling eagues was playing off a tie in Pasadena and the score of the odd game was even when the last man of the team representing an automobile firm stepped up to the line. It was the crucial moment and the team captain, unable to control himself, shouted:

"Come on now, John! Only one more installment and the game is ours!"-Los Angeles Times.

Rivalry Never despise or become angry with the fellow who gives you a battle. Your most feared antagonist can become your useful helper. For, as Burke once phrased it, "He who wrestles with us strengthens our nerves

and sharpens our skill."-Grit.

at 11 A. M., over Station WCAO, Baltimore, 499.7 W. L., 600 K. C. Christian Science Services will be Broadcast the first and third Sunday of every month.

Old Gardener Says:

THE autumn flowering crocuses, which are very much like the spring crocuses but bloom late in the year, come into flower only a few weeks after they have been planted. They are choice subjects for the rock garden but may be scattered through the border, too. These autumn flowering crocuses are often confused with other autumn flowering bulbs called colchicums but the latter have very much larger leaves, and for that reason are not as well suited for the rock garden because the heavy foliage interferes with more delicate rock plants. Colchicums, however, are very handsome in the border.

HOW= MODERN CHEMISTS MAKE USE OF THE CATALYST .-When the chemist looks to the future use of catalysts he is not indulging in a dream. Many chemical processes now employ catalysts. These have simplified old manufacturing processes, and in many cases made possible processes which were previously impossible.

The manufacture of sulphuric acid makes use of platinum as a catalyst. The reaction by which sulphur dioxide is changed to sulphur trioxide in the manufacture of sulphuric acid is a difficult reaction to carry on. But it is easily carried out in the presence of platinum.

Catalysts also play an important role in the hydrogenation of fats by the addition of hydrogen. But under normal conditions oils will not react with hydrogen. Nickel, however, is the catalyst in this case. In the presence of nickel the oils and hydrogen react to form solid fats.

Other processes in which catalysts are used include the manufacture of ammonia, synthetic wood alcohol and acetic acid.

Wealth of Historical

Interest in Old Boston Boston is one of the oldest cities in the United States and few are possessed of greater historical traditions than this, "The Hub." Founded in 1630 under the lead of Gov. John Winthrop, it is a city in which landmarks, known to every school boy, abound.

To mention a few, there are Faneuil hall, "The Cradle of Liberty," the Old South Meeting house, the Old State house, the home of Paul Revere, the site of Griffin's wharf, where the Boston tea party was held, and the old North church, where the lanterns were hung out for Paul Revere.

Boston common, with its famous frog pond, remains intact, and the "Sacred Cod" still hangs in the hall of the house of representatives in the State house on Beacon hill. On School street is the site of the first public school in America, established in 1635.

The tourist will also wish to visit Charleston and see Bunker hill monument, dedicated in 1843. At the Charlestown navy yard may be seen the United States frigate Constitution, "Old Ironsides." And, of course, the visitor will wish to see Cambridge across the river, where Harvard university is located.

Lexington and Concord, famed sites of Revolutionary war battles, lie within easy ride of Boston.-Boston Her-

******** The Unanswered Letter

By DOUGLAS MALLOCH

********************** (Suggested by G. M., Springfield, Mass.) THE mailman comes, the mailman goes,

The postman passes by, And someone only can suppose, And wait, and wonder why. Today no letter, and tonight A silence hard to bear. We wonder if they cannot write, Or simply do not care?

The little note is laid away. The letter put aside, Yet someone hoped to hear today An answering voice denied. You may be busy, well we know, So many things you're at. You may be busy-are you, though, As busy as all that?

Oh, keep the tree of friendship green When friends are far apart. How much a word of yours may mean To cheer some absent heart! The rose unwatered droops and dies, Yes, dies in some sad hour: The letter that unanswered lies Is love's unwatered flow'r. (C), 1931, Douglas Malloch.) - WNU Service.

How to Silver Mirror

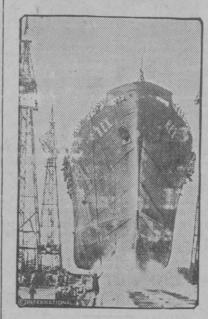

Make first solution by boiling eight ounces distilled water and adding twelve grains each of silver nitrate and Rochelle salts; allow to boil six or seven minutes, then cool and filter. Make second solution by dissolving nineteen grains of silver nitrate in a little distilled water, then adding several drops of 26. deg. ammonia until solution clears; then sixteen grains more of silver nitrate, stirring well. Add balance of eight ounces distilled water and filter. Clean the glass for mirror with ammonia and wipe with wet chamois. Take half and half of. the solutions, stirring well, and pour on the middle of the glass. It will spread over the surface and precipitate the silver.

WIDER SHOULDERS

A new drop shoulder yoke gives the wider shoulder line to this jacket suit in caronle brown spongy woolen with overblouse of green wool mesh and skirt blouse of white crepe.

FASTEST LINER

The giant Italian liner Rex, named in honor of the king of Italy, splashing into its element during the launching ceremony at Genoa that was attended by King Victor Emmanuel, the and officials. The new 50,000-ton liner is heralded as the fastest vessel on the Atlantic ocean.

"Some people are so dumb," says Erudite Eureth, "they think hookworms are what you use when you go

A THUMP AND A SLAP

IT ALL sounds like a dreadful quarrel, doesn't it? But there wasn't any quarrel at all. You see it was this way, Peter Rabbit sitting on guard near the pond of Paddy the Beaver, where Honker the Goose and his eleven followers were sleeping, saw something moving among the Black Shadows which filled the Green Forest. "Hello! What is that moving over there?" thought Peter, but he was far too wise to think it out loud. He just thought it inside and kept stiller than ever, if that were possible. And all the time he looked very hard in

Once More He Sat Tight and Held His Breath While Granny and Reddy Fox Passed.

the direction where he had seen, or thought he had seen, a something moving.

Sure enough in a minute or two he saw it again. He saw it steal across from one Black Shadow to another and he didn't need to be told what that something was nor who it was. Oh, no, Peter didn't need to be told. Peter had seen that shadowy form too often not to know it at the very first glimpse. It was Old Man Coyote. Peter felt little prickles of fear all over him.

"He knows I am over here and he's hunting for me," thought Peter. "Oh dear what shall I do? It is a long way to the nearest bramble-tangle and I don't know a single hollow log or hole any nearer. I wish I'd stayed at home. That's what I do-I wish I'd

stayed at home." He crouched down, making himself as small as possible under the thick branch of a low-growing hemlock tree, and stared out with eyes wide with fear. Nearer and nearer came Old Man Coyote. Peter sat tight. It was the safest thing to do. He just longed to run, but if he should do that Old Man Coyote would be after him in a flash and Pete knew how Old Man Covote can run. So he sat tight, though it was the hardest kind of hard work. He held his breath. Old Man Coyote was so near that Peter was afraid he would hear the thumping of his heart. And then Peter gave a soft little sigh of relief. Old Man Coyote had passed without so much as a glance his way. In fact, Old Man Coyote was watching the pond of Paddy the Beaver, and his eyes fairly burned with eagerness. Silently, but swiftly, he stole along. He was making his way around to the other side of the pond. Then Peter understood. He was after one of those geese who, fast asleep, were drifting nearer and nearer to the other shore.

Peter was just trying to make up his mind what he ought to do when his wabbly little nose caught a familiar scent. Once more he sat tight, it was the safest thing to do. Granny and Reddy Fox passed. They, too, were stealing along very softly, with their eyes fixed on the pond. They made their way around the other end of the pond from the one Old Man Coyote had gone around.

Peters' heart went pit-a-pat, pit-apat with excitement. What should he do? What ought he to do? If he should thump and try to waken Honker and the other geese he would give himself away. Would he be able to reach the nearest bramble-tangle before Old Man Coyote or Reddy Fox could catch him? Perhaps those sleeping geese would not drift any nearer to shore and then they would he safe and he would not need to give warning. Perhaps they would not hear him even if he did thump and he would run all that dreadful risk for nothing. Anyway, there was no need of doing anything just yet.

So Peter watched. Little by little two or three of those sleeping forms drifted nearer and nearer to the other shore. By and by they were so near it that Peter knew that something must be done at once or it would be too late. Somewhere over there three pairs of hungry eyes were watching those geese just as he was. Peter made up his mind. He would thump, and then he would run with all his might.

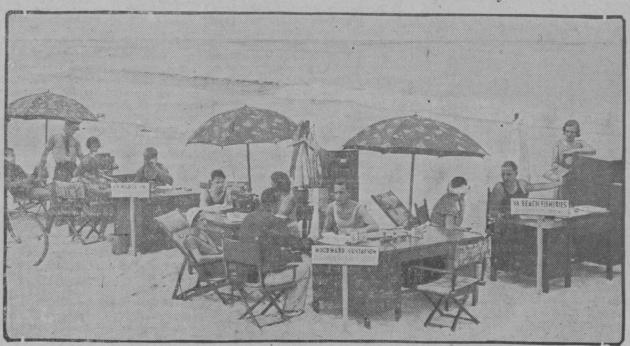

hump! Thump! Peter hit the ground with all his might and hoped it would waken Honker. Then without waiting to see he started for the nearest bramble-tangle as fast as he could go.

Slap! That was the tail of Paddy the Beaver hitting the water. He had heard Peter's thumps and knew what they meant. And at the sound of that slap Honker the Goose awoke.

Give Him the Limit DEPORT

Virginia Beach Office Hours on Hot Days

WHEN members of office staffs of various businesses of Virginia Beach, Va., started complaining about the heat, executives of the concerns were struck by a brilliant idea. So the next day they quietly moved their entire staffs, including desks, typewriters, files, phones, etc., right down to the water's edge. Proper apparel for emplevees and emplevers is, of course, a bathing suit.

SERVICE— THAT WAS COXIE

By FANNIE HURST

(© by McClure Newspaper Syndicate.) (WNU Service.)

TN THE eyes of the world, Coxie was somewhat of an enigma. He was one of the most successful life insurance agents in his district, a large metropolitan one, and yet he never seemed to get anywhere. That is, he never seemed to get anywhere in the sense that his less successful-colleagues did. People in a position to capacity, what with the policies he was writing from year to year, should have carried him to a high-figure in-

The jolly little fellow, worming his president of the huge company that ture the liking of the theatrical profession. Most of his policies were confined to the people of the play world. He had a way with them. He loved their emotional, volatile, friendly qualities and they in turn, because of those qualities, reacted with enthusiasm to Coxie.

round, good-humored face radiated amiability and something strangely deeper. Coxie had a soul. He felt it. And here let it be said that there were those in the profession who knew, almost reverently, that Coxie had a soul. These were the people who knew why Coxie, unlike his colleagues who drove cars and bought country homes, continued to live, a somewhat reluctant bachelor, in a rooming house and use the subway.

It was said of Coxie by one of these clients of his who had reason to know that he had a soul, that it was simply impossible for the little insurance agent to sit by and see a policy lapse for want of funds. His faith in human nature was so enormous. His confidence in the ultimate decency of human beings was infallible. If his confidence in these dealings had on various occasions been undermined, Coxie was the last to confess it. He went on believing and he went on digging into his own pockets to meet payments that for one reason or another could not be paid-and all these reasons were passionately poured into Coxie's sympathetic ears.

Men and women died blessing Coxie in sentimental and unashamed gratitude. Coxie had saved many a gay Thespian from a pauper's grave; and many a Thespian's child from the pinch of poverty.

And the little man himself, known to all Broadway, loved by Broadway, loving it in return, gloried in his job. Service . . . that was Coxie.

The fly in the ointment, however, was as big as a frog in the puddle. Coxie's heart and the reason was Annabelle Evans. Strangely enough, she was not of the theater. She was a forelady in an artificial flower factory. She and Coxie had met at a theatrical benefit for disabled children and for twelve years had been unofficially engaged, as the saying goes.

Twice a week, Coxie took Annabelle, who was pretty in a birdlike fashion, to a theater or to a motion picture and on Saturday night spent the evening with her in the prim parlor of the prim little flat she shared with a prim little aunt. Coxie loved Annabelle and, in what was becoming a tearful, patient and almost hysterical fashion. Annabelle loved Coxie.

The fact of the matter was that Coxie could not afford to marry. That is, unless he permitted Annabelle to continue her work in the flower factory. That prospect was abominable to both of them. Not only did Annabelle dislike her work, but she had developed a curious racking cough from her surroundings.

Time and time again, Coxie, who bore with her beratings because he felt he deserved them, promised to conserve his income which in its entirety was more than sufficient for them to start life together in comfort and even a small degree of luxury. But year after year showed a deficit in Coxie's finances. He could not let a policy lapse and since his writings were in the name of the most improvident people in the world, constant and multiple were the demands upon him.

And then the inevitable happened. It had not ever occurred to Coxie that is could happen, but it did and that was probably the reason that this little man of indomitable good faith, good will and good heart, found himself crushed.

A rival for the hand of Annabelle Evans stepped in. It had all happened so quickly that Coxie walked

Charleso

POOR POLLY

ALAS

eth

around Broadway for two days thereafter with his moon-round face all fuddled with daze,

A young shipping clerk in the factory where Annabelle was employed had fallen heir to ten thousand dollars. To Annabelle's astonishment, it seemed that he had looked upon her with yearning for years and now it had all come about and was possible. The young shipping clerk wanted to marry at once, and suddenly, after vears of the procrastination, the delay and the disappointments and the deferred hopes that went with Coxie; here was a concrete opportunity to salvage happiness.

A home of her own. Freedom from the work that she hated. Freedom from the worrisome cough that racked her health.

It was a tempting chance. For years Annabelle had confused her love of Coxie with a love of home-of comfort, of safety. To her, marriage meant freedom from the misery of judge estimated that Coxie's earning daily grind in a factory. Freedom to make a home that would bring happiness not only to herself, but to the man who provided it for her.

And now here was her chance. At once, without further delay, she could way up from office boy of the vice have her home, freedom from work she hated, a chance to regain the employed him, had managed to cap- health she was afraid of losing. It was too good a chance. Annabelle's longing hopes were dazed with this chance of fruition.

Coxie was terrified by this blow more than by anything that had ever happened to him, feeling the entire meaning of life slipping between his heart and his fingers, but he dared He was so downright likeable. His ont intercede. Annabelle was right. Annabelle's aunt, who had long since lost patience with Coxie, was right.

The young shipping clerk's name was Macy. A nice enough boy with a lean face and a nervous habit of blinking his eyes. When Coxie first laid eyes on him the evening that Annabelle had told him her decision, it seemed to him almost more than he could bear. This young man was about to inherit the earth. Coxic must go out empty-handed, emptyhearted.

And then, as if Fate had not been sufficiently content with handing him this wallop in the abstract, there developed, in the course of the brief conversation Coxie had with Macy, this ironical fact: The money which young Macy had inherited was from a distant uncle whom he had never seen. This uncle was an actor whom Coxie had insured ten years before.

Time after time. Coxie had met these premiums, reluctant to let the old man's policy lapse. Meanwhile his wife and those immediately dependent upon him died and in stepped this lad as the only surviving relative.

Life had played boomerang to Coxie, except that the story does not end here. Curious thing. When Annabelle, who was not present during the conversation between the two men which brought about this disclosure, came back into the room, that new look of decision which had been on her face for the last few days was suddenly removed from it. Looking at her, the two men seemed to know almost simultaneously that Annabelle was not going through with the engagement to Macy.

That is precisely what happened. Annabelle and Coxie are together three evenings a week again Coxie. with his kind, round face fairly bursting with determination, promises that this year his deficit in his income is to be a surplus.

They plan to be married on New Year's eve.

"Changing Britain," as

Seen by German Writer I have the impression that the phrase "changing England," or, better yet, "changing British empire," really holds good, for a great transformation has begun whose end no one can fore-

At the beginning of the World war, Bernard Shaw said that it was terrible difficult to hammer a new idea into the heads of the English, but that it was utterly impossible to dislodge an idea once it had entered there. It was vears before England recognized the significance of the decision it had made when it declared war and came to understand that things would never take care of themselves again in accordance with the old-fashioned belief to that defect.

In like manner, it has taken England years to understand that the end of the war did not mean a return to prewar conditions. Things were allowed to proceed of their own accord, and at first they went well enough, but presently they began going from bad to worse, yet nobody grew excited. Up to a year ago most people believed that time would adjust everything, and only a few private individuals or politicians thought that radical measures

were necessary or even desirable. Now, however, opinion has altered fundamentally, and the English no longer say: "It will all come right in

be done." This is a vague enough conviction, to be sure, but it signifies a tremendous change. England has a new idea in its head, and Shaw knows his fellow countrymen.-Paul Cohen-Portheim in the Tagebuch, Berlin.

Famous Painting Restored

In the baptistry of the cathedral of Seville is a famous painting of "St. Anthony and the Christ Child" by Murillo. In 1874 the kneeling figure of St. Anthony of Padua was cut from the canvas. Soon it was offered for sale in New York by a Spaniard, who sought out a well known collector, Mr. Schaus. The latter, who knew of the theft of the figure from the Murillo painting, paid \$250 for the work. He then notified the Spanish consul. The figure was returned and amid public festivities it was restored to the bap-

Many Scotch Pews Empty

Religious leaders in Scotland are becoming alarmed over the decline in church attendance. Congregations in some parts of the country are dwindling to only a faithful score or so. Churches capable to seating 500 or 600 worshipers are attended by a few dozen. It is predicted that a number of places of worship must be closed for lack of support.

Wins High Honors

The highest military honors possible in the corps of cadets at the United States Military acadamy have been won by Cadet John P. McConnell, who has been appointed first captain and regimental commander in orders issued by Maj. Gen. William R. Smith, superintendent of the academy. Cadet Mc Connell is an outstanding athlete, having won his letter as a member of the track team, and he is also manager of the football team. His home is at Booneville, Ark.

EX-CONVICT KILLS HIMSELF FOR LOVE

Attempt to Regain Lost Happiness Is Failure.

Pittsburgh, Pa.-The last chapter in an ex-convict's attempt to regain the happiness he once had known was written with the man's spicide in the home of the woman he had loved in

Nathan Corna, forty-five, Pittsburgh, paroled last December from Marquette (Mich.) prison, where he had been sentenced for killing a woman in Detroit, killed himself in the home of Mrs. Dora Ritt, a widow. For six weeks Corna had sought to win the love of Mrs. Ritt, she said. Corna told her of his prison sentence, Mrs. Ritt said.

"If I had loved him, I could have forgotten and forgiven-but without love, it was hopeless," she said.

As Corna finished his story and was about to leave, he slashed his throat, Mrs. Ritt said.

"Corna told me he had gone to Detroit from Pittsburgh when a young man and met a former Pittsburgh girl who was married and had one child." she added. "He said he fell in love with her.

"One day the woman was found dead and Corna was accused of the crime. For two years the case was fought in Michigan courts and he finally was sentenced to life imprisonment. He begged me to believe him innocent."

"A Man Must Live"

The famous question and answer, "Sir, a man must live"-"Sir, I do not see the necessity for it," are attributed to various celebrities. Voltaire quoted them in 1776. But they go back at least to Tertullian (150-230 A. D.): "The ordinary objection is, of course, raised, 'I have not the wherewithal to live.' To this it may be somewhat sharply retorted, 'Is there any reason why you should HOW=

WINDS CAN BRING ABOUT EXTREMELY HOT WAVES .-The dreaded hot waves of summer are caused by the relation of high and low pressure areas over the United States. When an area of high pressure covers the southeastern states, while a low pressure area advances from the west across the northern states, the stage is all set for a hot wave.

It will be remembered that air always flows from an area of high pressure into an area of low pressure. The flow is not directly into the low due to the rotary movement of the winds which is a result of the earth's rotation. Consequently as the "low" moves across the northern states, heated air is constantly poured in to the right of the "low" from the "high" in the south.

'The hot wind of summer usually is accompanied by an increase in humidity. The heat evaporates local moisture and the winds bring in additional moisture.

After three or four days of a hot spell the moisture accumulated is so great that a local thunderstorm usually results. The fourth or fifth day usually sees the end of a hot spell.

This is caused by the arrival of a "high" which has been traveling some distance behind the "low." The contact of the cool front of this "high" with the warm area results in thunderstorms of great violence along what is known as the "wind-shift line." This is the line where the hot winds of the "low" meet the cool winds of the "high."

The windshift line thunderstorms usually are very violent. -New York World-Telegram.

How Group of Papallea Acts in Human Tongue

#**********

In the back part of the tongue near the root is a group of large papallea, numbering from seven to fifteen, and arranged in an inverted V fashion. In these larger papallea the ends of the nerves lie among groups of cells, called taste buds. The cells of these buds are arranged so that they taper, resembling the end of a watermelon. The ends of the cells do not meet at a point, but are separated just far enough to leave a little canal open, the same as would be present if a pencil were pushed into the melon at the end. The cells of the buds are merely supporting beams for the nerves. From each nerve a small hairlike filament protrudes into the canal. These are extremely sensitive, and are specialized to transmit the impulse of taste to the brain. In order to be tasted a substance must be in solution. Solids not already dissolved or which cannot be dissolved in the saliva are tasteless.

How to Save Bearings

One of the most unfortunate mising. A Scotch engineer has invented an ingenious device that will prevent the excessive overheating of bearings and, incidentally, the damage caused thereby. It consists principally of a metal cartridge filled with a special lubricant. This cartridge is attached to the bearing, and, in case of failure on the part of the regular lubricating system, will flood the bearing with grease. Instant warning of the trouble is given by a strong odor thrown off by the grease the moment it comes in contact with the hot bearing. This emergency lubricator, it is said, should engines.

How "Manna" Is Explained

"The Realm of the Air" says: "It is not uncommon to find the earth or pavement under the trees sprinkled with drops, apparently due to miniature rainstorms, but actually consisting of honey dew ejected by swarms of aphids, scale insects or leaf hoppers. The stuff is sweet and sticky and explains the showers of 'honey' recorded in old chronicles. The manna of the Bible was thus produced by scale insects, which exude from their bodies a clear juice that falls to the ground in drops. These drops harden into sugary grains, which the Arabs of the Sinai peninsula still gather for use as food and medicine."

How Airplane Collects Water

The water recovery apparatus used on airships consists of a condenser which collects the water of combustion formed by the combination of the hydrogen in the gasoline with the oxygen of the air. When ordinary aviation gasoline is used, about 140 pounds of water is formed in burning 100 pounds

ply cools the engine exhaust gas to within a few degrees of air temperature and separates entrained moisture from the gases as they leave the ap-

How to Clean Leather

A solution of soap and water to which oil and alcohol have been added will give a good cleaner for leather. To prepare, use one bar of white soap dissolved in one cupful of water; then add one cupful of alcohol and two cupfuls of light oil. This will not only clean the leather, but will help to supply some of the oil it naturally re-

Why Peppercorn as Rent

A peppercorn is the dried berry of the black pepper. During the Middle ages it was customary to charge a nominal rent in kind in order to keep the title of land from passing to the renter. The most usual nominal rent of this kind was a pound of peppercorns to be delivered at stated in-

Why Engine's Many Wheels

Extra wheels are used on locomotives to reduce the weight at any one point on the rails.

How Fishes Use Sense

of Smell to Get Food

The sense of smell is highly developed in fishes, and this sense probably plays the leading role in obtaining food. Scientists, however, have not yet been able to determine accurately the relative extent and intensity of perception of the various sense organs in fishes. "From what is known at present," says the United States bureau of fisheries, "it is believed that the sense of smell, along with that of touch, plays a greater role in the life of a fish, as far as obtaining its food is concerned, than that of sight. The sense of sight in fishes seems to be limited more to the perception of changing lights and shadows, since a fish will snap more quickly at a moving object." There is a common but erroneous notion that fishes smell with their gills. They smell with their noses.—Pathfinder Magazine.

How Electric Current Acts

Quoting from Thomson's "Outline of Science": "In itself an insulated conductor carrying current is not dangerous. A bird may perch on it with immunity, and men who repair the overhead wires of tramways handle them safely with bare hands, because the platforms on which they work are insulated from the ground. But if a person touches both the insulated conductor and the earth or the other conductor, he completes the circuit and may be killed at once. In continuous-current circuits for traction purposes it is usual to insulate the positive conductor and use the rails as the return or negative conductor."

How Neon Signs Are Made

Neon is a colorless, inactive gas, which occurs in the atmosphere. Neon has the property of glowing with a peculiar brilliant fiery-red tint when an electric current is passed through haps of motoring is a burned-out bear- it in a near vacuum. For advertising purposes the gas is put into hollow glass tubes, which are twisted by a combined heat and blowing process into the required shapes to make script letters. The air is removed by a vacuum pump. If a few drops of mercury are inserted in the tube of neon, the light becames a brilliant blue. In a yellow-tinted tube it appears green.

How Fog Can Be "Lifted"

Fog is one of the motorist's worst enemies. But by means of an attachment to the exhaust of a car, it prove of value particularly to marine has now been found possible to create a rising current of heated air which literally lifts the fog for about 10 feet before the front wheels. The process is rapid enough to allow a forward speed of about 15 miles per hour, no matter how dense the fog may be. This invention for dissolving fog can be attached easily to the car, and is even simpler in operation than the ordinary windshield wiper

How to Test Water

Here is a simple way to test the purity of water: Put half a pint in a clean bottle, and add a few grains of lump or loaf sngar. Make the bottle tight-a glass stopper is preferred. Place the bottle in a warm, welllighted room. If it remains clear after an exposure of eight or ten days it is safe to use; but if it becomes turbid. it is impure and unsafe to drink.

How Patent Grant Operates A patent grant conveys to the owner of the patent the exclusive right to

make, use and sell, and to grant to others the right to make, use and sell the thing patented within and throughout some specified part of the United

WHY =All Money Is Not, Strictly, Legal Tender

Legal tender is money which a debtor may legally require his creditor to receive in payment of a debt in the absence of any special agreement in the contract or obligation itself, says Pathfinder Magazine. No circulating medium is lawful money in the United States unless it has been given the legal tender quality by congress. Not all kinds of money possess legal tender qualities, yet all kinds circulate freely at par and are convertible into standard money. Since the gold dollar is the standard unit of value in the United States, gold coins and gold certificates are legal tender in payment of all debts, public and private. United States notes popularly known as greenbacks, are full legal tender for all debts except duties on imports and interest on the public debt. Treasury notes of 1890 and standard silver dollars are legal tender for all debts, public and private, without regard to the amount except where otherwise expressly stipulated in the contract. Silver certificates, Federal Reserve notes, National bank notes and Federal Reserve bank notes are not legal tender. Subsidiary silver coins-halfdollars, quarters and dimes-are legal tender for amounts not exceeding \$10 in any one payment. Minor coinsfive and one cent pieces-are legal tender for amounts not exceeding 25 cents in nickels or pennies; it merely means that a person is not under legal obligations to accept more than that sum in such coins in single payment.

Why Weather Conditions Affect Tidal Movements

Contrary to a popular belief, especially that long cherished by many seamen, tides do not exert any influence on the weather, according to reliable meteorologists. As a matter of fact, careful observers have discovered that certain extreme weather conditions affect the tides to some extent. Tides ebb and flow at every point on the coast with clocklike regularity. Nevertheless, the weather continues to be fair or foul, irrespective of those tides. On the other hand, conditions of very low barometer pressure and very strong winds from favorable directions cause either unusually low or unusually high tides as the case may be. This is the influence of the weather on the tides, and the weather is not the result of any tidal influence. Even when there is a very insignificant outflow of air from a region into which the tide is rising, or a corresponding inflow of air as the tide subsides, this does not constitute a significant feature of the weather.

Why Japanese Are Short

Science has long sought an explanation to the stunted statures and bowed legs of Japanese born in Japan. Why should native Japanese be short when children of Japanese born and reared in the United States and the Hawaiian islands are much taller and stronger? Climate and food have been blamed, but now Dr. F. Ishihara, of the medical school of Tokyo Imperial university, after a tour of America, says these have little to do with the shortness of the "Japonians." He blames the Japanese custom of squatting on the floor instead of sitting on chairs, for both crooked legs and the shortness of stature of his fellow coun-

Why Glass Retains Water

Glass is generally more or less completely covered with a greasy film. When water drains from it, most of the surface (where the grease film is) will become dry, but at the spots that are wetted some water will be held. The water remaining on the glass is pulled more or less into drops by the surface tension. This formation of drops is the most delicate test for freedom from surface grease. By most careful cleaning, it is possible to remove the grease so completely that when water drains from the surface only a thin uniform layer of water will remain. This will quickly evaporate if the air is dry.

Why Ivy Can Live in Water

The bureau of plant industry says that ivy planted in water gets its sustenance from the air, the water and from the stored-up material in the plant itself. Ivy planted in water will not continue to grow indefinitely. It will, however, under favorable conditions, thrive for quite a while, the length of time depending upon how much plant food there is in the plant and in the water.

Why Known as "Corned Beef" Corned beef is salted beef. It got

its name from an old verb to corn, meaning to season, cure or sprinkle with salt. The verb in turn came from the noun corn, meaning any small hard particle such as a grain or seed. "Peppercorn" is a survival of the old noun. Corned beef was so called because originally it was prepared with coarse grains of salt.

Lesson for September 20

THE COUNCIL AT JERUSALEM

LESSON TEXT—Acts 15:1-35.
GOLDEN TEXT—For, brethren, ye have been called unto liberty; only use not liberty for an occasion to the flesh, but by love serve one another.
PRIMARY TOPIC—Christians Working Together

JUNIOR TOPIC-The First Mission-

ary Convention.
INTERMEDIATE AND SENIOR TOP-IC—Christian Freedom.
YOUNG PEOPLE AND ADULT TOP-IC—Christianity at the Crossroads.

I. The Controversy in the Church at Antioch (vv. 1-5).

This difficulty was a most serious one, for it threatened the disruption of the church into Jewish and Gentile divisions. It was not a question of the admission of the Gentiles into the Church; that had been settled some

years before when Peter received Cornelius and his household. The question now was, On what ground could they be received? Should Gentile converts be required to keep the Mosaic Law as a condition of salvation? This issue was brought on by the coming of certain men from Jerusalem who declared, "Except ye be circumcized after the manner of Moses, ye cannot be saved" (v. 1). The question was so difficult that Paul and Barnabas were unable to put them to silence. These Jewish legalists had the letter of the Scripture on their side. They could point to the command enjoining this rite upon the male children of the covenant people (Gen. 17:10-14). Paul could not point to any scripture where this obligation had been abrogated. If Paul should plead that Abraham was justified before he was circumcized, his antagonist could answer, "Yes, but after justification the

rite was divinely imposed." The brethren at Antioch decided to refer the matter to the mother church at Jerusalem. Accordingly, Paul and Barnabas and others were sent as a deputation to Jerusalem. 11. The Deliberations of the Council

1. Peter's speech (vv. 6-11). He argued that God had borne witness to the acceptance of the Gentiles by giving the Holy Spirit to them as unto the Jews (Acts 10:34-47). Since, therefore, God had not put a difference, it would be folly for them to

(vv. 6-21).

2. Paul and Barnabas rehearsed their experience (v. 12). They told how that God had set his seal of approval on their preaching of salvation by grace through faith apart from the works of the law by the working of signs and wonders through them.

The argument of James (vv. 14-21). He took the fact declared by Peter and showed how it harmonized with the prophecy of Amos (Amos 9:11-15). He showed that the receps was not in conflict but in strict harmony with God's plan. As set forth in the speech of James, God's plan is as follows:

a. To take out from among the Gentiles a people for his name (v. 14). This is what is now going on-the preaching of the gospel to the ends of the earth, and the calling out of the Church.

b. After the Church is completed and removed, the Israelitish nation will be converted and restored to their land and privileges by the Lord himself at his return (vv. 16, 17).

c. Following this will be the conversion of the world through the agency of converted Israel (v. 17 cf. Rom. 11:15-17). He showed that there is no conflict when the Scriptures are rightly divided.

III. The Decision of the Council (vv. 22-29).

The mother church came to a unanimous agreement and accepted the resolution offered by James. They not only sent a letter stating the decision of the conference, but took the wise precaution to send influential men along with Paul and Barnabas to bear the same testimony by word of mouth. This letter denied the authority of the Judaizing teachers (v. 24) and declared the method by which this decision had been reached (vv. 25-27). They put the Holy Spirit. first. They were positively instructed to abstain from meats offered to idols, from blood, and from things strangled, and from fornication.

IV. The Decision Delivered to the Church (vv. 30-35).

Upon their return to Antioch, the church was called together to hear the report. Its reading brought great rejoicing. Judas and Silas, who had been sent as confirmatory witnesses, being prophets, now exhorted the brethren with many words, confirming the decision of the Jerusalem church.

Abiding in Christ

Abiding in Christ does not mean that you must always be thinking about You are in a house, abiding in its enclosure or beneath its shelter, though you are not always thinking about the house itself. But you always know when you leave it .- F. B.

God Is in All

Be he nowhere else, God is in all that liberates and lifts, in all that humbles, sweetens, and consoles .-Lowell.

NAVY, OLD LINERS IN GRID CONTEST

Game on October 10 Promises to Match Thriller of Last Season

Hot Battles Characteristic of Middy-Maryland Meetings

COLLEGE PARK, MD.-Although the Naval Academy and University of Maryland football teams both will see action before their big game in Griffith Stadium in Washington on October 10, it is this contest that they have mainly in mind at present and for which they are training their guns.

Last Fall the Midshipmen and Old Liners provided one of the classic struggles of the season in this section of the country before all the people that could be packed into Farragut Field at Annapolis. This year's game promises to be a replica of that gruelling battle and doubtless will attract all the grid fans that Griffith Stadium can hold.

Navy won last season's heated and stirring game, 6 to 0, on a touchdown scored by Louis Kirn, fleet halfback. who dashed almost the length of the field in the first few minutes of the contest. Maryland had its chances to turn the tide later in the fray, knocking at the touchdown door no less than four times.

In fact, the game between Navy and Maryland will be a continuation of a series of hard battles that have taken place in the last several seasons, although, it will be only the second grid meeting under modern conditions.

During the 1930-31 term of school of the two institutions, Navy in addition to the football game, won a basket ball duel and track meet from Maryland, while the Old Liners retaliated in a great measure by scoring in baseball and lacrosse. The lacrosse game drew the largest crowd to see a contest in that pastime during the 1930 season. The basket ball tilt also packed Dalghren Hall at Annapolis.

Both the Navy and Maryland elevens should be on a par, if not better, than the ones that battled so closely last Fall and the contest has taken the top place among all those to be staged in 1931 in the South Atlantic Area.

Applications for tickets are being received both at the Naval Academy and Maryland athletic offices so that the alumni and regular followers of the two schools may have a chance to get choice seats. However, all tickets not applied for within the next few days will be placed on public sale.

How Teas Are Prepared

For green tea the leaves are withered by steaming in a perforated cylinder or boiler, thus retaining the color. In black tea the leaves are dried and

How Quakes Affect Earth

The surface of the earth is variously affected by an earthquake. In some of the greatest earthquakes, there are no features more remarkable than the dislocation of the crust. The displacement along the fault may be mainly horizontal, mainly vertical, or partly vertical and partly horizontal. In a few earthquakes, such as that at Messina in 1908, the movement takes the form of a warping of the crust, no actual fault being visible on the surface. When the movement is horizontal, the fault may appear as a crack or fissure, or may be revealed by the severing of roads, fences, etc., the ends of which may be separated by several feet.

MOTHER EARTH RECEIVES HEAT FROM SUN'S RAYS .-The earth's heat and light come from the sun's rays and not from the interior of the earth. The earth is dependent on the sun for both heat and light, and no form of life could exist if the influence of the sun were withdrawn. There are several reasons why high altitudes are colder than low ones, even though they are nearer the sun in the daytime. The air in high altitudes is thinner, absorbing less heat from the direct rays of the sun because it has less carbon dioxide, water vapor and dust; being thinner, it is less effective in retaining the heat radiated from the earth below. The wind in high altitudes keeps the air in contact with the heated mountain sides in constant motion. There are likely to be many cloudy days in mountainous regions and the clouds shelter the mountains from the sun. The side of a mountain toward the equator may receive the sun's rays more perpendicularly than a flat surface and may become very hot in the daytime, cooling off rapidly at night. The side turned away from the equator receives the sun's rays more obliquely than a flat surface and for a much shorter time. This tends to reduce the average temperature of mountain regions.

Across Afghanistan

Motor Car of Trans-Asia Expedition.

(Prepared by the National Geographic Society, Washington, D. C.)
RAVELING along a route made famous by Alexander the Great

twenty-two and a half centuries ago, the Trans-Asia expedition has Just crossed isolated Afghanistan from west to east. The expedition, with which the National Geographic society is co-operating, found the caravan tracks in poor condition for wheeled vehicles in many places; but even the worst stretches were traversed with relative ease by the special cars equipped with a tanklike band drive in place of rear wheels.

The three major stops in Afghanistan were made at Herat, metropolis of the western part of the kingdom; Kandahar, in the south; and Kabul, the capital, in the east.

To locate distant Herat on the world map an American may start in known territory at Knoxville, Tenn. A line drawn due east will almost bisect Herat, seventy miles from the western Afghan border.

No one knows how long Herat has been dominating the broad plain in which it is situated. Remains of buildings strewns over the plain nearby were ancient to the ancients. Alexander the Great is credited with the building of the Herat walls. If that is a fact, Herat is at least two thousand two hundred and fifty years old.

A sort of hub for caravan routes leading to many parts of central Asia, and one of the so-called doorways to India by land, Herat has been a tempting "plum" for rulers of nearby countries and imperial strategists of the eastern hemisphere bent upon annexing portions of southern Asia to their

Herat Often Besieged and Taken. As a result its 25-foot walls surmounted by 150 towers, have withstood many sieges, but it also has often fallen before attack. In the Thirteenth century Genghis Khan and his horde of Mongols swept down upon the city, leaving only a half hundred of its hundreds of thousands of inhabitants alive; and these survived only because they feigned death. One hundred and fifty years later Tamerlane, no less merciless, nearly duplicated the an-

The Persians frequently took Herat and remained in control for many years at a time. Today Persian blood flows in the veins of about one-half of the Heratis. In 1837, some 35,000 Persians set out to take Herat. After a siege of ten months, the Heratis. with the help of British forces, defeated the Persians. Herat then became an independent city, but in 1861 a quarrel between the rulers of Herat and Afghanistan resulted in the city's

passing of the latter. Despite frequent revolts and attacks, Herat continues to rank with the greet cities of central Asia. Frequent rebuilding of the city within the walls has brought little change to its people and daily life. No railroad approaches nearer than 80 miles; the telegraph key has never clicked within the city's walls. Unsightly ancient graveyards outside the walls have been put in order, new defense works have been built, and a new extension of the city with broad streets flanked by modern shops is rising outside of the north wall; but the original moat, 45 feet wide and 16 feet deep, still is

there today as it was centuries ago. Inside the walls Heratis live in low mud and sun-dried brick buildings as did their ancestors. The streets are mere passageways. They are playgrounds for children and stages for debate by bewhiskered, beturbaned men. Some of the streets are covered to keep out the sun. One chronicler was not far wrong when he compared them with rabbit warrens.

Hard Route to Kandahar. South and east of Herat the expedition encountered difficult terrain over which few motor cars have passed. Many swift streams had to be forded and three mountain ranges crossed. The only major river encountered, the Helmand, had to be crossed by means of an ancient ferry. The transfer of the 21 cars, trailers and trucks across the Helmand consumed two days.

To Kandahar, important trade center of southern Afghanistan, caravan roads converge from several gateways into Persia from Turkestan, from Herat and Kabul in Afghanistan, and from Baluchistan and India. Geography has given it trade value for two millenniums.

The town lies on a level plain be-tween two rivers, the Tarnak and Arghandib. To the north and northeast lie barren hills, but south and west of the city the plain is irrigated by numerous canals and is highly productive and thickly settled. This irrigated land about Kandahar is one of the best fruit growing regions of the Middle East. Peaches, apricots, grapes, figs, melons, and pomegranates grow to perfection. Fruits, both fresh and

dried, make up prominent items in the city's exports.

A ditch and a mud-brick wall extending for more than three miles surround Kandahar. Outside the east gate is a large caravansary where are often to be found huge stores of wool and other products destined for India.

Kandahar shows its trade importance and the cosmopolitan character of its 31,000 inhabitants in its bazaars. Hindu, Afghan, Persian, and Baluchi merchants handle goods from Europe, Central Asia, Turkestan, and India. The Hindu merchants predominate and are shipping agents as well. Their outgoing caravans carry, in addition to wool and dried fruits, evil-smelling asafetida for the drug trade, indifferent tobacco, madder for the outside world's paint tubes and dye vats, silk, and cleverly carved prayer beads for devout Moslems from Java to Mo-

The dwelling houses of Kandahar are built of sun-dried brick with flat roofs. Most of them are small and of one story. But the houses of the wealthy merchants have upper floors and are inclosed by high walls. A few have spacious courts and elaborate fountains and gardens.

Plenty of Sunni Mosques. The Afghans belong to the Sunni branch of Mohammedanism, a rival creed to that of the Shiahs, accepted by the Persians. There are 180 Sunni mosques in Kandahar and not one Shiah mosque, although many of the city dwellers from outside Afghanistan are Shiahs. Topping the town's skyline is the lofty dome of the tomb of Ahmad Shah Durrani, which may be seen by the traveler while he is still far from the outer wall.

Kandahar is in the same latitude as Dallas, Texas, but because it is surrounded by deserts and mountains its climate is more nearly comparable to that of the drier portions of northern Mexico. There is little rainfall, and in summer the temperature rises to most uncomfortable heights.

East and north of Kandahar better roads were encountered than those of eastern Afghanistan, and the expedition had little difficulty in reaching Kabul. It found that the ambitious modern capital city which former King Amanullah had almost completed on the outskirts of Kabul before his visit to the United States in 1928, is now deserted. Governmental activities, as during past centuries, are carried on in old Kabul.

Kabul Big and Busy.

Kabul is one of the three of the least known capitals in the world today. The others are Lhasa, capital of Tibet, and Riad, capital of the newly recognized country, Nedj, in central Arabia.

Kabul granted the Trans-Asia expedition permission to enter, but customarily it hangs out no "welcome" signs to visitors, distinguished or otherwise. The Afghan capital, like the rest of the Asian monarchy of which it is the largest city, asks little from the outside world, and would like the attitude reciprocated.

Yet Kabul is far from crude or primitive. It has electric lights from a hydroelectric power plant, telephones, many automobiles but few roads, machine shops, munitions works, and factories for making soap, shoes, and cloth, all built under English supervision. Its tanneries, established through the co-operation of outside experts, are sources of especial

Kabul itself is a busy city of about 100,000 people. One can only guess at the population because the single effort at a census failed before the innate exclusiveness of the Afghan. Rather than tell their names and ages so many Kabul residents either left the city or hid away that business was disrupted and the census was abandoned.

Kabul's flat-roof dwellings rise in sweeping tiers from the banks of the Kabul river to sun-parched foothills, 7,000 feet above the sea, higher than the peak of Mt. Mitchell, loftiest of the Appalachian chain. The peaks of the Hindu Kush, three times as high, jut into the skyline not far away. Hence its winters are cold and its summers

Piano players and phonographs give the ear an inkling of the home life of Afghanistan's capital—a home life which is screened from the eye by interminable mud walls. Probably nowhere in the East is the seclusion of women more complete than in Kabul. The extent of man's walls is the barometer of his social station.

When a western idea finally reaches the Kabul home the impact often leaves a strange anticlimax. The story is told of one wealthy Kabulian who would have nothing less than a grand piane in his home. After many months it arrived, but minus a bench for the player. "That's all right," said the purchaser. "I'm accustomed to sitting on the floor. Saw off its legs!"

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, ares, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

This column is not for use in advertising any money-making program, fair, supper, party or sale; except for non-denominational charities or special benefits, Fire Company or Public Library support. Churches, Lodges, Societies, Schools, etc., are requested to use our Special Notice Department for money-making events.

W. Wallace Reindollar and mother left, Monday morning, on an auto visit to their folks in Ohio.

Mrs. Sarah J. Keefer returned to Taneytown, on Monday, and is living with Mrs. Ida Landis, on George St.

Dr. and Mrs. Percy Mehring and daughter, of Philadelphia, visited the former's home folks here, on Sunday.

The Taneytown Home-makers' Club will hold a cake and candy sale in the Firemen's building, on Saturday,

Miss Mary C. Reindollar suffered a stroke of paralysis, last week, and is Sunday. critically ill at the home of her nephew, Luther Mehring.

Miss Mary Isabel Elliot is spending the week with Miss Ada Beal, a Western Maryland College schoolmate, at Libertytown.

Mrs. Isamiah Hawk, left, Wednesday on a visit to her niece, Mrs. W. M. Longley, at Edgewood, Harford County. Mr. and Mrs. Longley came for her in their auto.

George C. Overholtzer showed a cucumber at this office, that measured 16 inches in length, 11½ inches around, and weighed 31/4 lbs. He is British Isles and the Continent, resaving it for the seed.

Theo. C. Fair, who for a good many years has travelled for the Myers Grocery Co., Carlisle, Pa., has resigned and accepted a like position with O. J. Stonesifer, at Union Bridge. the Harrisburg Grocery Co. His home will still be in Carlisle. Mr. and Mrs. Fair visited Calvin T. Fringer's last Saturday.

Visitors at the home of Mr. and Mrs. James Rodgers, near town, during the week, were: Mr. and Mrs. John Bowman, of Littlestown; Mr. and Mrs. John Bachman, daughter, Geraldine, and Mr. and Mrs. Theodore Brown, of Hanover, and Mr. and Mrs. Wilmer Myers and children, of Pleasant Valley.

Corn cutting is progressing as rapidly as possible, some scarcity of help being reported. Cutting of corn in the great heat of the past week, is about the hardest job there is on the farm, and this year the fodder is heavy. The redeeming feature about harvesting corn is that it will wait longer than any other crop.

ed, on Wednesday evening, in honor of their son, Eugene's fifth birthday, the following: Mr. and Mrs. Harry G. Sell, Mr. and Mrs. Paul Sell and son, Paul; Mr. and Mrs. Curtis Reid, Miss Ruth Hyser, and Mr. Herman Schmidt Refreshments, including a birthday cake, were abundantly served.

Mr. and Mrs. Claude Biddinger, of near town, entertained the following on are requested to call at our office guests at dinner, on Sunday, in honor and make selection before so many of Mrs. Biddinger's birthday: Mr. and Mrs. George Humbert, and Mr. and Mrs. John Bloom, of Littlestown; Mr. and Mrs. Lewis Boyd and granddaughter, Virgie Boyd, near town, and Mr. and Mrs. John Sauble, of town.

The Christian Endeavor Society of Grace Reformed Church will hold its special monthly meeting, in the church, Sunday evening, at 7:30 P. M., September 20, 1931. There will be several interesting talks on the topics: "Our Share in making Christ known to the World." Special musical selections will help make the program an interesting one. Ruth Stambaugh will have charge of the meeting. Come and enjoy the meeting with us.

Specimens of a new, and so far unnamed, garden product, grown by Jesse Stonesifer, near Tyrone, were shown a few days this week at The Record office. The curiosity was shaped something like a saxophone, or a combination of neck pumpkin, squash, gourd and calabash. The neck was long and curved, and solid, while the bulk end was large enough to contain a small quantity of seed. On trial, one of them proved to be very much like a squash, and quite good eating when fried.

The ball game, last Saturday, was not the "last of the season" after all, for the Hanover "Fleetwings" are coming back, this Saturday, to winmaybe. Storm, semi-professional, and pitcher in the former Blue Ridge League, will be in the box for the visitors. The home team will be the same as last Saturday, and will do their best, win or lose, to give Taneytown a real ball game. The attendance last Saturday was good. It should be better for the coming game. As usual, 2:30 at the High School ground.

given a birthday surprise party last Friday evening.

Ernest Graves, Jr., Washington, D. C., is visiting at the home of Miss Amelia H. Birnie.

Misses Myrtle Morris and Nell Hess, of Baltimore, are visiting at the home of Elmer S. Hess.

Mr. Earle T. Vavrina has been visiting Mr. and Mrs. Allan P. Sanders for the past two weeks.

Miss Mildred Annan left, on Wednesday, to enter the School of Religious Education, in Philadelphia, Pa.

Miss Edna S. Calvert, of New Market, Virginia, was the guest of Miss

Hagan.

Mrs. George Mitten, Washington, who had been visiting her sister, Mrs. Roy B. Garner, left for home last

Mr. Robinson Squibb and Mr. John Squibb and Rogers Birnie Horgan, were over night guests at Miss Ame-

and Mrs. Wilbur Hahn, of Hanover, spent Sunday with Mrs. David Eyler,

Mr. and Mrs. Harvey Ohler entertained, on Sunday: Mr. and Mrs. Martin Blum and Mr. and Mrs. E. B. Conover, of York, Pa.

Miss Elizabeth Annan who has spent the summer traveling in the turned home Monday evening.

Mahlon T. Brown, of near town, and Mr. and Mrs. Vernon Crouse, spent Sunday afternoon with Mr. and Mrs.

Margaret Englar Nulton is still at the Church Home and Infirmary, Baltimore, but is slowly improving. She may be there another week or more.

Mr. and Mrs. John Snook, Mr. and Mrs. John Etzler and Mrs. E. C. Valentine, of Frederick, spent Sunday at the home of Mr. and Mrs. M. C. Dut-

> A very wonderful double rainbow appeared in the Eastern sky, Monday evening, following a slight shower. It was not only very clearly defined, from horizon to horizon, but lasted about fifteen minutes—a picture that no arist could even closely imitate.

Mr. and Mrs. Luther Albaugh, of Ladiesburg; Mr. and Mrs. Harvey Albaugh and son, near Frederick, and Mr. and Mrs. Clarence Albaugh, and daughter, near town, were entertained at supper on Sunday evening at the home of Mrs. Sarah Albaugh.

The following spent Sunday at the home of Elmer Reaver and family, on George Street: Mr. and Mrs. Harry Eckenrode, sons, Edward and Claude: Mr. and Mrs. Henry Storm, Littlestown; Mr. and Mrs. Cyril Bunty and son, Arnold, of Centennial; Mr. and Mrs. — Storm, Hanover.

Samuel H. Ott, of Panora, Iowa, and Clarence W. Ott, wife and son, of Ames, Iowa, paid Mary M. Ott a flying visit on Thursday, and called on other relatives in town. Mrs. Ott returned to Mercersburg with them. Mr. D. W. Ott and wife and daughter, Isabell, returned with Mrs. Ott, on Sunday.

Mr. and Mrs. Jacob Strawsburg, near town, entertained the following guests on Sunday: Mr. and Mrs. Edw. Strawsburg, Union Bridge; Mr. and Mrs. Oliver Miller and grand-daughter, Dorothy Shryock, near Littlestown; Mr. and Mrs. Alvie Miller, son Buddy, of York; Mr. and Mrs. Carroll James, son Fred, and daughter, Freda, of Littlestown.

"Any mind that is capable of real sorrow, is capable of good."—Mrs.

Mrs. George Baumgardner was FIVE COWS DIE MYSTERIOUSLY.

Five cows died in a mysterious manner on the Gettysburg-Fairfield road and the cause of their death remains unsolved. Mr. Redding placed his loss at about \$500, as the animals that died were the best in his herd of nine. According to the Reddings, the cows had been in pasture all summer and for the first time Friday night in months they were stabled for the night. All appeared to be in the best of condition when they were driven into the barn. The next morning, when the barn. The next morning, when Beatrice P. Clemm, his wife, to Orest Mr. Bedding went to the barn to milk the R. Koontz and wife, dated Janu-

CULLINGTIME IS WORMING TIME

Soon you will be culling your chickens and putting them in winter quarters. This is the time to give each one a Gizzard Capsule for worms. Rid your hens of round worms and tape worms and you will get more

GIZZARD

eggs.
Your poultry profits are largely determined by your attention to culling and worming your flocks. Don't put it off. Worming by the Gizzard Capsule way is the easiest and most efficient way. The cost is small, only about 11/2c per bird. One extra egg will more

than pay the cost. Come in today and get a sample package, free.
