committees. Solo, Mrs. L. H. Rehmeyer. Address, Miss Brenda L. Melhouse, Phil-adclphia, Pa. 12:00. Lunch by the Women of Imman-uel Lutheran Church. SESSION SESSION

AFTERNOON SESSION.

AFTERNOON SESSION. 1:30 P. M. Song Service, led by Mrs. L. H. Rehmeyer. Scripture Lesson and Prayer, Rev. Philip Bower, Emmitsburg, Md. Conference Periods. Pastors and Superintendents, Rev. W. E. Saltzgiver, Silver Run, Md. Juniors and Seniors, Rev. Amos J. Traver, D. D., Frederick, Md. Primary and intermediate, Miss Brenda Melhouse, Philadelphia, Pa. Reports of Committees. Election of Officers. Solo, Mrs. Roland Shaffer. Closing address, Rev. John L. Deaton, D. D., Baltimore, Md. The present Association officers are:

F. L., but of all classes, of workmen, ho matter, what a member's job is, in one strong central organization. This is what the Automobile Workers Union, headed by John Lewis, is. And a lot of trouble it has caused the manu-facturers, of all kinds of goods, from medicines to enterphile.

The present Association officers are: The present Association officers are: Merwyn C. Fuss, Pres., Taneytown; C. C. Hess, Vice-Pres., Taneytown; M. A. Sullivan, Vice-Pres., Westminster; H. A. Gross, Vice-Pres., Middletown; Tobias Zimmerman, Vice-Pres., Fred-erick; David Starner, Statistical Sec., Westminster; Mrs. Mervin Conover, Rec. Sec., Taneytown; Howard C. Fawley, Treas., Knoxville, Md. Registration Committee: Mrs. Mil-ton Snyder, Mrs. Harvey Miller, Mrs. Cora Hoffacker, Miss Charlotte Hoov-er. most of its activities were concen-trated, but has stirred up the A. F. L. which has been working among the smaller shops. And this past week two new organizations have come into existence—the American and Independent Labor Leagues—which the old Unions say are the creation of the capitalists who own the shops to take the place of the Company Unions, outlawed by the Wagner Act, but which statement is emphatically de-nied by the officials of the newly creat-

er. Program Committee: Rev. L. H. Rehmeyer, Rev. A. T. Sutcliffe, M. A. Sullivan, C. C. Hess, Mrs. Mervin Con-over, M. C. Fuss.

The fact is that each of the large organizations are afraid of the other, and from an outsider's view, it seems Convention Notes: Colors of the As-sociation are Red and White. Each Church is urged to send its Pastor, Superintendents and Delegates. Dinthat the A. F. L., at least, has reason to be so. But taking in all the Union men in the city, it is stated that their number will not reach more than 50,000 which leaves 250,000 still not overonized in Detroit slone ner will be provided by the ladies of the church, at 40 cents. Sessions will start promptly on the hours designa-ted. We hope to make this one of the I have given your readers, a pretty fair view of the labor situation out best Sunday School Conventions we have ever held. Talk it up and see that your school has a good represenhere, as seen from my standpoint. Of course, there are many who do not tation. agree with me. Anyhow I think it is time for me to discontinue writing about this most disagreeable subject.

#### \_\_\_\_\_\_\_ TANEYTOWN DOGS WIN PRIZES.

about this most disagreeable subject. But I want to say, that the employ-ers, are surely making the best of it; and are trying to make up for the production lost during the recent strikes. The trouble now is to do this and supply the demand, as just as soon as production is speeded up, the employees sit down again. In some J. H. Sell, owner of Sell's Kennels, registered smooth Foxterriers at the Baltimore County Kennel Club dog show, Sunday, May 2. His winning as follows:

#### THE 175th. ANNIVERSARY -11-St. Mary's Evangelical and Reformed **AROUND DETROIT.** Church, Silver Run. One hundred and seventy-five years Situation Apparently Growing

of noble history of St. Mary's Evan-gelical and Reformed Church, Silver Run, Md., will be reviewed during a three-day celebration from May 30 to June 1. In the early days when Ger-man settlers came from Lancaster County, Pa., they brought their re-ligious ideals with them. If I have not been incorrectly in-formed, there is an old saying that, "In numbers there is strength." Whether this is true, as regards the labor situation out here, remains to

On May 31, 1762 the staunch Re-formed and Lutheran people of what is now the upper part of Carroll County drew up an agreement on religious questions and built a Union Church. It was constructed of logs and had no floor nor any way of heating in winter. The first church was used by both denominations until 1821 when the second Union Church was built. This was a brick structure of a much larger dimensions than the first build-

This house of worship was the cen-ter of the religious life of the com-munity until the latter part of the last century when each denomination erected its own house of worship. To-

erected its own house of worship. To-day two beautiful churches with a combined membership of nearly 900 grace the quiet village of Silver Run. The 175th. anniversary program of the Evangelical and Reformed congre-gation includes four special services. The present pastor, Rev. Felix B. Peck will speak on the history of the church at the service on the morning of May 30th. Other services will be held on Sunday evening at 6:00 P. M. held on Sunday evening, at 6:00 P. M. when the Lutheran congregation will join with the Evangelical and Reformed congregation in a Union outdoor service, and on Monday and Tuesday evenings, May 31st. and June 1st. Ad-dresses will be delivered by visiting ministers.

#### COUNTY HOMEMAKERS' WILL MEET MAY 13th.

The annual spring meeting of the Carroll Council of Homemakers' Clubs will be held in the College Gymna-sium at Blue Ridge College, New Windsor, on Thursday, May 13. The main speaker for the morning session will be Mrs. Fred G. Holloway, West-ninster. The morning session will consist of a business meeting consistconsist of a business meeting consist-ing of all projects and activities which have been carried on during the year. There will be a report from each club. Mrs. James Snyder, of McKinstry Mills will preside over the morning session. Mrs. John D. Young is chairman of the arrange-monts and will preside during the afments and will preside during the afternoon session.

This session will feature special musical numbers and a talk on Eng-lish life, by Mrs. Victor Charles Woodbridge, a part council president, and a style show, in which garments Mrs. Carroll Hess, daughter, Doris; Miss Vivian Haines, near town, were the guests of the former's sister and family, Mr. and Mrs. Robert Pierce, at Chester, Pa., on Sunday. Mr. and Mrs. Roy Hess, Neirsville, Va.; Mr. and Mrs. Quincy Shoemak-rey; Mr. and Mrs. Quincy Shoemak-vi d. to the distribution of Taney, "and prize; Doen class fe-ney; Mr. and Mrs. Quincy Shoemak-vi d. to the distribution of the venient. I also want to tell you about the plant of Parke, Davis & Co. Nearly all of your readers have heard of this famous concern, or have used some of

## SPECIAL SESSION **READY TO ADJOURN.**

#### **Reach Agreement to Tax Incomes** one-half of one per-cent.

The legislature spent the first of The legislature spent the first of the week largely going over old grounds, and meeting with the same experience as at the regular session. On Tuesday, a new feature was agreed to in, the Senate—a tax of one-half of one percent on individual and corporate incomes; while the House stood for one percent on indi-vidual incomes vidual incomes.

Levies on beer, whiskey, registra-tion of motorists, amusements and cosmetics there was little difference of opinion.

At the close of the day the opinion was general that differences would be easily wiped out in conference, and that adjournment would quickly fol-low. The aim of the legislation was

to provide \$5,000,000 for relief. About seventy small bills were in-troduced—at least one of which was passed, \$50,000 for the expenses of the special session.

(So, after all, other matters than named in "the call" could be acted on.) Just what are the provisions in detail of the Income Tax bill, we do not know

A favorable report on it was adopted by the Senate on Wednesday, fol-lowing long and hot debate, in which two Southern Maryland Democratic leaders of the upper house locked horns. Senator Coad led the attack on the bill (favorably reported by the Finance Committee, of which he is chairman) after an opening barrage by Senator Milton L. Veasey, of Wor-cester county, another Democratic stalwart.

Senators Coad and Veasey were joined by Senator Clifford Friend, of Garrett County, a Republican, who declared that what the people of his

declared that what the people of his county need is relief from relief. Several Senators, Democrats and Republicans, argued for the bill, its champions including Miss Mary E. W. Risteau, of Harford; Raymond E. Ken-nedy and Melvin E. Fine of the Fifth and Fourth City districts, respective-ly; Harry T. Phoebus, of Somerset; Robert B. Kimble, of Allegany and Wilmer F. Davis, of Caroline. Senator Coad made three speeches against the bill. He denounced the

against the bill. He denounced the measure as oppressive to the small salaried man and wage-earner in Ma-ryland (exemptions are the Federal ones of \$1,000 a year for unmarried persons and of \$2,500 a year for mar-ried men or heads of families, with \$400 additional credit for each depend-ies and depend it would become ent) and also declared it would keep the wealthy from becoming residents of this State.

An effort was made to repeal the 48-hour marriage law, but it was de-feated in the Senate. The law stands that 48-hours must intervene between the application for, and the issuance of, a marriage license. The following program appears to

have been decided on to produce reve nue as follows: Tax on Whiskey Distilling \$500,000 850,000 Tax on Beer 10% on Cosmetics 250,000 Tax on Assessments Registration of Motorists Document Stamp Tax 200,000 425.000 Licenses on Pin Ball Automatic Music License ½ of 1% of Income Tax 60,000 1,500,000

#### \$1.00 PER YEAR

#### FARMING RELICS FOR THE CENTENNIAL.

The Agriculture Committee sponsoring the Agricultural exhibit for the soring the Agricultural exhibit for the coming Centennial, reports that they are accomplishing a great deal which will be interesting to the many thous-ands of people that will visit Carroll County during the week of May 30th., Luna 2 June 3.

The committee is, however, anxious to have information in regard to the different relics which have been used in the farming industry over a period of years, for a museum of antiques to be displayed beneath a large tent that has been secured for this purpose.

The International Harvester Company will supply a great deal of ma-terial. The agriculture representative of the B. and O. Railroad has also offered several exhibits that will be very educational.

One of the most important things, now, is to locate materials that will fit into this museum of Agriculture History so that the committee can contact people who will have the equipment and arrange for having it equipment and arrange for having to displayed. This equipment can be displayed with the name of the owner and all materials will be guarded carefully so that everything will be kept in the best of condition. Any information may be telephon-ed, written, or brought to the County Extension office and turned over to

Extension office and turned over to the County Agent, Mr. L. C. Burns, who will then have the committee arrange it for display.

#### ANTIQUES FOR DISPLAY AT CENTENNIAL.

At a meeting of the antiques and relics committee of the Carroll Coun-ty Centennial, they decided that the most desirable way of displaying same would be in the windows of the merchants in Westminster during the week of celebration, and all persons who are desirous of making the Cenwho are desirous of making the Cen-tennial a success and who have in their possession articles dated back to 1837 and prior to that date, such as furniture, clothing, documents, coins, pictures, etc., will please communicate with the Chairman, J. Albert Mitten, 62 Liberty St., Westminster, Phone 231-W. Reasonable care will be tak-on of all articles displayed and it is en of all articles displayed and it is hoped that everybody will now make a search for articles for display. Coma search for articles for uspray. Com mittee: J. Albert Mitten, chairman; J. Carbery Boyle, Richard C. Harlow, William F. Sharrer, Denton Gehr and Dr. William R. Crawford.

#### A MOTHER'S DAY MEMORIAL.

A Mother's Day Musicale is planned for Sunday evening, May 9th., at 7:30, in St. Mary's Evangelical and Reform-ed Church, Silver Run. Mr. C. Richard Main, an accomplished organist ard Main, an accomprished organist of Hagerstown, will render a brief or-gan recital. His numbers will include "March Religious" by Quilment; "Dreams," by McAnias; "Fantasia in G Minor," by Bach, and several others. The church choir of 21 singers under the direction of 12 singers under the direction of James A. Richards will sing three Mother's Day anthems and Mr. Richards will sing th and Mr. Echards will sing three Mother's Day solos. They are: "Lit-tle Mother of Mine" by Burleigh; "Mother Machree" by Olcott-Ball, and "Mother O' Mine" by Tours. These special numbers with Mother's Day hymns and a short address by the pas-tor, Rev. Felix B. Peck, will make the hour pleasing and helpful.

Mr. and Mrs. James Baumgardner, son, George, and Harry Baumgardner of Charles Town, W. Va., and Mr. and Mrs. Robert Baumgardner, Baltimore spent the week-end with their home folks here.

The Colonial Restaurant, on Fairview Ave., was sold last Friday night by Miss Lottie Troxell to Raymond Ashbaugh, of LeGore. Miss Grace Bartgis has rented the property and will conduct it hereafter.

eral years, and enjoyed their humorous programs, may not have heard that "Sassafras" died very suddenly, which explains why the feature has come to its end.

Mr. and Mrs. Lloyd Bollinger, Misses Catherine Forney, Isabell Lippy, Anna Lippy; Messrs Kenneth Duvall, Wm. Forney and Roland Forney, motored to Baltimore, Saturday evening and visited Miss Susan Warner, who is a patient at the Maryland University Hospitel Hospital.

The name, "Simpson," is a very good one; and "Wallie" is all right for a nickname; but one does get weary -after about a year of it-having these names stare at us from the head. lines as though the doings connected with them were matters of first impertance. Give us a rest.

May 2nd., Robert C. Benner, student at the Gettysburg Seminary, preached the sermon at the morning service at Zion Lutheran Church, Hummelstown, Pa., Rev. C. G. Leatherman, D. D., pastor. It was a Life Service pro-gram sponsored by the Luther League. His subject was, "Making the Most of Life."

The town election, on Monday, re-sulted in the election of Dr. C. M. Benner, David H. Hahn and Merle S. Baumgardner, as members of the Orty Council. All are re-election. Messrs John Baumgardner, Samuel T. Bishop and Harry B. Ohler, the other nomi-nees, made no active efforts toward their election. Only 71 votes were Baumgardner, as members of the City cast.

Saturday afternoon, Margaret Jones (colored) was accidently shot in the left side, the bullet lodging near her BEEN ORDERED heart. She was taken in the Carroll County ambulance to the Provident Hospital, Baltimore, by Eugene Hill and Mrs. Elwood Hill. At present the bullet has not been removed, and they may not operate to remove it. She is getting along as well as can be expected.

findings, it is declared that the driver of an automobile receiving in his eyes the full force of improperly focused headlights is literally blinded for fully one second, and in that fraction-al period of time his car covers about the full force of improperly focused by Mrs. Joseph C. Byron. Both the choruses and orchestra parts were presented for the first time without rehearsal by the entire group. 60 feet when driven at a speed of ap-

proximately 40 miles per hour. "This blind period," said Garrison P. Knox, Manager of the Club, "is responsible for many accidents, but the average motorist apparently fails to realize its seriousness and conse-quently fails to adjust his driving speed to meet the conditions of night driving. Much the same fault applies to the pedestrian. Because the lights of a car illuminate the. road about him, he assumes the driver sees him. It seems to be the general plan, this struck before he has a chance to step

The Club official explained that a pedestrian is in grave danger if he is within 200 feet of a vehicle moving at the legal maximum speed at the time

the driver is temporarily blinded. "At exactly 40 m. p. h.," he said, "a motor vehicle travels 59 feet per second. The average braking distance at this speed is 109 feet. To this must be added the average "reaction" distance of 45 feet, making the average stopping distance 154 feet.

"With headlight blindness as a factor, the stopping distance is ap-preciably increased, depending on the individual's ability to recover from the blinding glare. Assuming that it requires a full second for this recov-ery, another 59 feet must be added to the stopping distance, making the to-tal 213 feet."

#### **Random Thoughts**

#### IMPORTANT DISTINCTIONS.

A large percentage of intelligent men, property owners, taxpayers, manufacturers, business men, and men who have made a careful study and practice of finance, speak of a time coming when the present trend of legislation involving immense spending, will be overruled by the peo-

pie. This may be true, but one must not forget that "the classes first mentioned are not as potent a power as the majority of voters. We are apt to idealize the one, and underestimate the quality of the other writheut taking a dof the other, without taking a definite inventory of just what class-es make up either side. Whether the majority of voters

will eventually combine against governmental spending, is the real question. Men do not now so much vote as they pray-if they do "pray"—as they vote as it "pays" best. There is a similar-ity in appearance and sound between pay and pray, but there the similarity ends.

We may yet reach the conclusion that we have too much free-dom-freedom in the use of the ballot-because the ballot is being used far differently from its earliest purposes. Whether it is good for "the people" to rule, depends on the quality of the people. P. B. E.

#### DANGEROUS MODERNISM.

We modern Americans are taking a too lax attitude toward questionssay, of general morality. We sometimes call it our liberalism, broadmindedness, or good-natured passivism-a letting down on "old-fashioned" ideas and customs.

But it is more than that. It is a temporizing with less than high moral standards, and lending encouragement to at least mild forms of lawlessness. We mean, more specifically, that we let down our best convictions through cutting corners that touch Sabbath Day | manufacturers and jobbers, and not violation, gambling, even questionable standards of dress and morals, and in the little dealers, we also do not numerous other ways.

It may be said with something like accuracy in name, that we are following what was once called the "underworld," but is now reaching the ranks of the "upperworld." Distinctive names do not now seem to mean so much in the way of difference.

But, our excuses are plentiful. We are personal-libertyites, urging that it is nobody's business but ours, what we do, and that others have the same liberty of doing otherwise-that this is a "free country."

Well, we can still be moderately liberal without being too sanctimonously puritanical. No doubt critics of the present mode have weak spots in their armor, and should more closely mind their own business. How we like the argument "mind your own business" and how we conclude that this is an unanswerable way of putting things. But, the difficulty is in fixing the line, for most of our interests are actually interests in common.

There is something in this sort of in the practice of lottery. argument, we must admit. But, those

some folks about like the laying of an ego ante un a hen-causes cacklesand sometimes, cuss-words-all of which but proves that the little weekly paper is read, and proves its value as an advertising medium.

-MORE LIGHT WANTED.

We should like somebody to put us wise on this matter of price increases. Speaking only for the printing business, definitely, one price raise is followed by a regular procession of others along the same line, from a halfdozen or more firms, all strangely similar, even to a quarter of a cent a pound.

We learn from those in other lines of business, that they have the same experience. Who starts these raises, | lief" work, and some of the unexpectand how do others get to know about them?

The experience comes along about buyer-is at a big disadvantage by its continuance. comparison with the big shop.

at the old low price, for fear they will votes. be charged by small consumers with "putting up" prices without justification.

taken for granted when coming from taken for granted when coming from know?

#### LOTTERY SCHEMES.

The Federal Trade Commission, at Washington, D. C., is continuing to actively investigate and bring complaints against those business organizations which endeavor to sell their products through various lottery schemes. According to official information the practice is widespread. A complaint was recently issued against the Penn Dry Goods Co., of Philadelphia, in which it was alleged that the firm was advertising its merchandise and sales plan by means of cards, circulars and letters, and selling their products to wholesalers and retailers, clubs, fraternal organizations, hospitals and charitable institutions for resale to the purchasing public. The methods employed clearly disclosed, in the opinion of the Federal Trade Commission, that the

Another complaint was registered who care on the right side, should all against the Dub's Sandwich Co., of Durham, N. above-named company was engaged

Finding a typographical acts on institution) there are 920 Negroes to 2121 whites. In unemployment the Negro, while but ten per cent of the population, represents fifty-six per cent and receives thirty-six per cent of the aid (representing 24,569 families)

Thus doing something to better the children and the home of the Negro, is not only adding to his happiness but putting the finger on the most needy spot in almost all phases of our city life. And what I am saying about Philadelphia could be duplicated in fact in a great many sections of our country. There was a time when the Negro was largely a southern prob-lem, but now he is to be found in greater or less numbers in practically every state of the Union and offers the challenge of a universal opportunity.'

These figures may very easily explain the advantage that the present administration has derived from "reed (by Republicans) big Democratic majorities last November.

Naturally, a great deal of "relief" every two weeks, and it has been in work has reached the Negro populaoperation for fully three months. Oth- tion, and just as naturally, they have er trade practices are along the same been grateful for it, as they had a line. For instance, there is now a perfect right to be. In fact, "relief" much wider difference between the in all directions has a strong support small lot buying, to the carton or case by all classes receiving it, resulting lot buying; and the result naturally is | in gratitude to those who supplied it; that the small dealer-the small lot and this same gratitude extends into

It is natural for voters to forget And, the big fellows-both buyers about benefits received many years and users-can and do, "stick togeth- ago. It is what is received now, that er" and get "the price." The little counts for the most; and this is merefellows-perhaps with corresponding ly human nature in action along praclittle good business sense, try to sell tical lines-and on election day, in

This is what happened on election day, not only among Negroes, but among all others of the less fortunate Just what the remedy is, we do not character, including those who are alknow. And why higher prices are ways ready to accept what they can get, whether deserving or not.

#### BUDGET NOT IN THE CALL.

The Record now has light. The reason why the Budget escaped the danger of being hurt at the Special Session is because it was not in "the call" for the session. The sole purpose of the call was to provide revenue for "relief," but not relief from the budget. Gov. Nice left the healthy child at home, in safety.

The Baltimore Sun, that featured the need of the special session, and followed up with prescribing directions as to what to do at the session in a few days, and then close up, said nothing about the budget.

"Not in the call" somehow seem to be solemn words. Something like "not wanted." Something not to be touched, and as being too fine for that. Evidently, it was a good job.

We feel chastened for our ignorance. We actually thought the budget was a co-partner in the situation that made the work of the regular session such a poor provider for the needs of relief. Some received it, and some did not. And the "call" was made to provide for the shorts, and not interfere with the longs. We are amazed a

When Indian, White Said Adieu Not infrequently an Ohio Indian tribe would permit an adopted white man or woman to say adieu to the tribe if the person, upon reaching adulthood, found life with the redskins unbearable. The departures differed, states a writer in the Cleveland Plain Dealer, but they were generally something like the one which is recorded about William Wells. Kidnaped when a boy of twelve, he lived with the tribe until manhood. Then walking with Chief Little Turtle to a clearing on the Maumee, Wells said: "I now leave your nation for my own people. We have long been friends. We are friends yet-until the sun reaches a certain height"-which he indicated by pointing to the sky-"From that time on, we are enemies. Then, if you want to kill me, you may, and if I want to kill you, I may. Wells became the chief of Gen.

#### Word Misspelled

996 Million Ways Norman, Okla.—To misspell a

"Mad" Anthony Wayne's scouts.

word is easy for most persons, but to misspell it 996 million ways required a lengthy scientific test. The word which savants found could be misspelled so often was "circumference," according to Dr. Henry D. Rinsland, of the

University of Oklahoma. Dr. Rinsland, discussing mis-

spelling, said the greatest trouble in spelling correctly came from the sound of words. He offered four suggestions for inaproving spelling:

Learn the correct pronunciation of the word. In writing, write every letter

clearly. Be on the lookout for double letters and letters that are not sounded. Observe the word carefully

when it first is seen.

the more at least stick to lesser evils, even if they can not abolish the greattate. We can not help but be examabout us-and this, is a serious truth. to one dollar.

We would no doubt be surprised if we knew how growth in character and surroundings, and how we may have been the seed planted who startwhere it led to.

What we are doing individually we are also doing governmentally. Our boast of American supremacy is losing its held on truth, in its entirety. We have either adopted many of the worst foreign examples, or are on the way to doing so.

True, we are not annexationists, so eign examples, and are insensibly becoming foreign-minded. And there ciations sometimes do corrupt.

#### 22 THE TYPOGRAPHICAL ERROR.

The typographical error will likely never cease to cause, not only its jokes but more serious reactions; and somehow, though easy to perform the stunt, it remains a more or less criminal act on the part of those responsible, or at least a blunder to deride.

Not so long ago, a near riot occurred in a Western town, in the case of a lady editor-proof reader; and for quite a while after the paper came out its greatest problem in education, red in a Western town, in the case of quite a while after the paper came out bearing the black on white evidence bearing the black on white evidence she knew that there was "something wrong" that caused part of the popu-lation of the town to look "black," white children has been 4%. About lation of the town to look "black," while others just laughed.

Her curiosity as well as dignity was naturally stirred up, and she asked questions, as to what it was all about; but it was kept a rather long drawnout secret, bringing the haw-haw answer, "you ought to know," and fin-ally one became specific and said, "it's in your local column." Thirty-five per cent of the Negro deaths is from tuberculosis. Fifty-four per cent of all Negro diseases is "it's in your local column."

And so, the editress performed the the population, the Negro causes task of reading for it, and found this, I twenty-five per cent of the crime. In "The cemetery will be moved, next Holmesburg jail there are 751 Negroes week." Just a case of a "v" getting in where a "w" should have been.

A complaint was also made against Miller, Bain, Beyer & Co., of Philaoriginates and grows from examples delphia. It was alleged that this company disposed of its products along lines similar to those employed by ed somebody's crooked growth-and the Penn Dry Goods Co., named above -Scottish Rite News Service.

> THE NEGRO PROBLEM-AND POLITICS.

The March number of "Lutheran Woman's Work" contains an article on "Work among the Negroes of Philadelphia" that is wider in its interest far as more territory is concerned, but than that of Church Missionary work we are becoming innoculated with for- alone. It enters very materially into the field of politics that is represented by votes on election day. We give are legitimate reasons for it. Asso- below a portion of the article that deals in population figures.

"The need of this work is better appreciated when we know that in the city of Philadelphia, to say nothing of its suburban sections, there are about 225,000 Negroes. One-tenth of the population of our city is Negro. Phil-adelphia has the third largest Negro population in the United States, only New York (327,000) and Chicago (233,000) surpassing it. During the fifteen years prior to 1930, 130,000 Negroes came to Philadelphia, an av-erage of about 9,000 a year. They came largely from the agri-

health, crime, housing and unemployten per cent of our city public school enrollment or 32,800 are negro chil-dren. The birth rate of our Negroes s 22.9 per thousand while that of the whites is but 17.7. On the other hand the death rate of the Negroes is 16.3 per thousand while that of the whites is but 10.

syphilis. While but ten per cent of to 560 whites. In Moyamensing jail there are 140 Negroes to 111 whites and in Eastern Penitentiary (a state

## **Fertilizer For Corn**

The use of Fertilizer as a plant food was first discovered by the Indians; they found that burying a fish in each hill of Corn greatly improved the crop. Just how or by what process the fish helped the Corn, they did not know, nor did they care, as all they were concerned about was raising good Corn.

This was the very beginning of the Fertilizer Industry. Since that time many things have been learned about nourishing crops by the use of Fertilizer. We can now tell by chemical analysis of the soil or by analysis of the crop, whether there is or has been any deficiency in the essential elements of plant food, and proceed from this analysis, to supply these deficiencies by the application of the proper fertilizer.

We can supply you with Fertilizer, for your every need. Our Fertilizers are carefully formulated with a definite view towards producing the Crop for which they are intended.

You can raise good Corn without Fertilizer-but you can raise more and better Corn with Fertilizer.

More production on fewer acres is economical production.

For Corn we recommend any of the following mixtures:

2-12-6 4-8-7

2-9-5

We also carry a full line of raw materials from which we can make you any formula you desire.

We are always at your service.

## THE REINDOLLAR COMPANY

#### SHOULD BREED FOR HIGH-PRICED EGGS

Size as Well as Production Equally Important.

By Dr. W. C. Thompson, Poultry Husband-man, New Jersey College of Agricul-ture.-WNU Service.

Since big eggs make for increased poultry farm income because of the emphasis placed on size in grading eggs, and since the ability to produce big eggs is heritable, poultrymen should breed for egg size as well as for production and other inherited traits.

Fresh quality table eggs are sold on an egg size quality basis. This means that price returns are, to a large extent at least, based on the egg size quality of respective packs.

The poultry breeder who is interested in improving the average egg size of the yield produced by his pullet layers should remember that there is no significant correla-tion between the number of eggs that a bird lays and the size of those eggs and that the poultry breeder must select his breeding stock both with regard to the quantity and egg size quality. He should also keep in mind that egg size quality may be very materially increased by a proper introduction of this element into the poultry breeding improvement program.

The nearer the poultryman can come to produce pullet laying flocks which yield eggs of such size and quality as will command first-grade prices, the more profitable will be the egg farming enterprise.

In the practical application of such principles two methods are of-fered: First, if trapnesting is being done, pullets which show 60 per cent or more of first-grade eggs, or eggs weighing 24 ounces or more to the dozen should be separately banded with a legband. Future breeders, other things being equal, are best chosen from that group. This involves weighing eggs produced dur-ing any 30-day period after three months of production have passed.

According to the second method, suggested when no trapnesting is being done, the breeding stock is selected with regard to all the characteristics considered to be important, and the matings are made up as usual. In any case, only eggs weighing 24 to 28 ounces per dozen are placed in the incubator.

Figures gathered on several hundred layers indicate that the adoption of the 24-ounce-to-the-dozen minimum, or preferably the 26ounce-to-the-dozen minimum, for hatching eggs will accomplish distinct improvement in the average egg size of the resultant pullet flocks.

By L. L. STEVENSON

Recently a correspondent sug-gested that I write about what high school students should see while visiting New York. It's rather a large order but I'll try to fill it in part at least. The Battery may be seen and possibly an incoming or outgoing ocean liner. The Aquarium is also at the Battery and there a boat may be taken for the Statue of Liberty, which will afford an opportunity for climbing. The boat also passes close to Ellis Island, the gateway to the New World. Or for a nickel each way, a municipal fera nickel each way, a municipal fer-ry may be taken to St. George, Staten Island, with an excellent view of the harbor. On the return, there is old Trinity church at the head of Wall street, occupying one of the most valuable pieces of land in the world and with a cemetery go-ing energy head into the pact of Nerry ing away back into the past of New York. Almost in the shadow of old Trinity is the Stock Exchange, which may be visited during market hours. Across from the Stock Exchange is a statue which marks the place where George Washington took the oath as the first President of the United States.

On the way uptown, a stop should be made at St. Paul's chapel where George Washington used to be a member of the congregation, his pew being marked by the great seal of the United States. Near St. Paul's is City Hall, which goes away back to 1812. Across from City Hall is Brooklyn bridge, the first span across the East river and still doing full service after more than 50 years. If there is time, a walk across the bridge is interesting because of views of the busy river. On the Brooklyn side, there is the navy yard. The Woolworth building, for many years the highest office building in the world, has lost that distinction but many visitors still visit the tower to get a view of down-town New York. Farther uptown is the Empire State building with a tower 102 floors above the street and with a view extending for miles. \* \* \*

A bus ride up Riverside Drive is always interesting and is even more so if there are any warships in port since they anchor in the Hudson. A bus ride up Fifth avenue is also interesting. By making a transfer, it is possible to ride through Harlem, which is the largest colored city in the world. Or, a ride may be taken up to the George Washington bridge, the first and only bridge to cross the Hudson in New York City. A view of the Palisades may also be had on that trip. On the Fifth avenue trip, the bus passes St. Patrick's cathedral and

Choosing Hatching Eggs Selecting eggs for hatching according to a definite standard aids materially in improving the size, shape and color of eggs produced on the poultry farm, J. C. Taylor, associate extension poultryman at the New Jersey College of Agriculture, Rutgers university, tells egg producers.

The standard of egg selection for hatching suggested by Taylor is that no egg shall weigh less than 24 ounces to the dozen nor more than 28. "The size," he says, "should be uniform and the shape normal. Do not use eggs which are long, short, round or oddly shaped. The color should also be uniform-no cream colored or other tinted shells in the white eggs and the brown eggs should be of a shade most characteristic of the flock."

The care of eggs before they are placed in the incubator determines to some extent the success of the hatch. Collect the hatching eggs frequently, at least two or three times a day. Store the eggs in a clean, cool room or cellar where the temperature does not go above 55 or 60 degrees Fahrenheit. Be sure that all hatching eggs are turned once a day and do not hold eggs longer than 10 days before putting them in the incubator.

#### Poultry Siftings

Johannesburg, South Africa, has stopped cruelty to poultry by banning shipments in crowded crates.

\* \* \* Cornish hens are never permitted to set. The egg production is too essential. \* \* \*

A breeder cannot sell many settings of eggs for hatching and raise a good-sized flock from a few birds unless these birds are exceedinly productive.

The principal poultry markets of the country are New York, Boston, Chicago and Philadelphia.

Chickens are kept on about 85 per cent of all the farms in the United States. That means that there are hens on more than 5.000 .-000 farms. \* \* \*

There are about 400,000,000 adult chickens in the United States each year. These produce eggs at the rate of 60,000 every minute of the day and night.

far uptown is the Cathedral of St. John the Divine. A bus top view of New York is inexpensive and worth while.

\* \* \*

As for museums, the Metropolitan is naturally the objective of those interested in art. Then there is the Museum of Natural History, which has such an array of exhibits that even days might be spent there. The Hayden Planetarium should not be overlooked by those interested in astronomy or those to whom the stars are a mystery. Still another museum is in Rockefeller Center, the Museum of Science and Industry. Instead of being a "hands off" museum it is a "hands on" place, visitors being invited to operate the various exhibits. It is also a museum of motion since almost all the exhibits can be worked by the visitor.

\* \* \*

Bronx Park zoo, with its collection of animals, is worth the long ride out into the Bronx. Downtown again, there is old Fraunces Tavern where George Washington said good-bye to his officers after the Revolution. It too, is a museum now. Uptown is the Jumel mansion, which was Washington's headquarters. Uptown also is Columbia university. Then trips through the New York Times building can be arranged. Times Square is most interesting at night when all the lights are blazing. As for a play, if it is still running, "King Richard II" should not be overlooked. It's interesting to non-Shakesperian students. And here I am at the end of the space without having covered nearly all the ground. But the suggestions made will keep the young visitors busy for quite awhile. © Bell Syndicate.—WNU Service.

#### Ban German Stamp in Czechoslovakia

Prague, Czechoslovakia. - Police confiscated the latest issue of German stamps bearing Adolf Hitler's image

They took them from stamp dealers' windows, because, they said, each block of four stamps bore a slogan from Hitler's "My Struggle," saying: "He who wants to save the people can on-ly think heroically."

Prague authorities said that was calculated t conite public irritation.

## THE CARROLL RECORD FRIDAY, MAY 7, 1937 CORRESPONDENCE Latest Items of Local News Furnished By Our Regular Staff of Writers

ed. We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary therefore, for most let-ters to be mailed on Wednesday, or by Fast Mail, west on W. M. R. R., Thurs-day morning. Letters mailed on Thurs-day evening may not reach us in time.

#### LITTLESTOWN.

Pius L. Kuhn, 74 years, Cemetery St., was stricken with a heart attack while helping to unload lumber, on Thursday afternoon, and died sudden. Surviving are his wife, Mary Gouker, four daughters and one son. Funeral was held on Monday morning with a high mass Rev. J. H. Melchoir officiated. Burial in St. Aloysius ceme-

tery. William A Smith, Lumber St., died suddenly at his home Monday afternoon. He had been suffering from heart trouble for some time. He has a daughter and two sons. The funeral was held Wednesday morning, Rev. J. H. Melchoir, officiated. Burial was made in St. Aloysius cemetery.

Mrs. Louisa Palmer, 85 years, near Harney, widow of Eli Palmer, died Friday morning in the Gettysburg Hospital, survived by three daughters and two sons. Funeral was held on made in St. Luke cemetery. Dr. C. B. Coover, W. King St., was

taken to the Gettysburg Hospital, on has been sick for some months is till confined to her home and improving.

Mrs. Irvin L. Baughman who has been a patient in the Hanover Hospital for several weeks, where she underwent an operation was discharged and returned to her home, on Wednesday.

Joseph Bowers who has been in the Gettysburg Hospital and underwent a major operation returned to his home on Wednesday.

Henry Basehoar who had been operated on two weeks ago at the Gettysburg Hospital was to be operated on again for major trouble.

Mrs. Leslie Crouse and Mrs. Geo. Kump, attended the 14th. annual Eisteddfod of the High School of Carroli Co., Maryland in the Alumni Hall of Western Maryland College. Included in the program were two selections by a combined orchestra of 60 members from every High School in Jr., son of Mrs. Lesbie Crouse.

A man who gave his name as Mil-ler with his wife and eight children were given night lodging in the borough jail by Police Roberts, Thursday night. They came to town at about 7 o'clock, and camped on the square where they attracted considerable attention. On Friday morning they headed for Hanover. They said that they lived in Pensacola, Fla., and were going to Philadelphia. The children were from two years to twenty. A group of persons were attracted to the jail. The family entertained them with songs. A collection was then taken for the travelers.

#### FEESERSBURG.

May- 'day was delightful this year, and some flowery reminders were left at the doors; but with mental vision we would see the streams of city dwellers, with their lunch baskets, go-ing to the Parks for the first pic-nic of the season, and happy to be out-'-doors for rest and play.

Some former neighbors were calling in our town last week: Mrs. Mignon Rinehart Weishaar and child on Thursday. She was born and reared in this place, and altho only been living in Keymar the past month, admits of home sickness. Her little son is suffering with tooth rash and whoop-ing cough. Our well known black-smith, J. R. Delphey, now with his son, near Ladiesburg—at 82 years of age walked out to see us. He is in good health and has been busy making such useful articles as paring knives, cake turners, tiny polished horse-shoes, etc., for which he finds

eady sale Donald Eyler, of Baltimore, was home with her father, Archie Eyler, on Sunday.

Returning from the funeral of Mrs. Jos. Shorb, a life long friend, E. O. Cash and wife called on their cousins at Grove Dale last Friday. We think t speaks well for the sons of Detour that they retain a deep seated love for their old haunts. Mr. Cash is full of interesting reminiscences of the town; and another native always refers to it as "heaven" supposing a little bit of Heaven fell along Double Pipe Creek too. Now there's Ireland, and Detour also.

A group of Mt. Union friends visit-ed Mrs. Cleon Wolfe in the Frederick City Hospital, on Monday. Her goitre was removed on Thursday of last week, and she is recovering nice-ly. She commends her Doctor and nurses, but will be glad to return home, soon.

Communion Service at Mt. Union on Sunday morning, was well attended, tho' a number were missing be-cause of illness. Three regular at-tendants were lying in Hospitals, Mrs Wolfe, Mrs. Roger Sentz, and Mrs. Eva Bair Royer. A number of re-moved members were present. There were Spring blossoms for decoration, Rev. M. L. Kroh spoke very earnestly Misses Esther and Pauline Sentz sang "Whispering Hope," for the offertory. There were no admission to the church Mrs. Mora Gilbert was granted a dismissal to unite with Baust Church,

nearer her residence. Next Sunday will be thread day in the Sunday School, when an offering will be given for the support of the India Lace Industry. Mother's Day will be observed at the C. E. Service. The District Rally of C. E., at Mt. Union on Sunday evening was not Union on Sunday evening was not largely attended. Rev. Kroh conduct-ed the Devotions, and Merwyn C. Fuss Carroll County. The orchestra was under the direction of Paul G. Crouse, on the theme: "Seek," and Howard Gray of the M. P. Society, Union Bridge sang two selections, "Confi-dence" and "In Galilee" in his fine way. F. P. Bohn, vice-pres. of this bistrict presided, and his small daugh-ter, Patsy Lee sang "Jesus Loves Me". Four young violinist of the church and pianist assisted with music, and it was good to be there.

Just now we are entertaining an at-tack of arthritis which doesn't tend to sweetness or happiness. Josh Bill-ings said, "No one has found a good place for a boil" and that applies to the above ailment too.

This called "National Music week," May 2 to 9th., so tune up if you have The end of a thunder shower on | run down on music; or give us an hour Wednesday evening will stop the each day to practice scales and finger farmers. It was a fine rain for wheat exercises, for music still hath charms for music still hath char -perhaps to soothe our shattered wet and cold weather is causing some nerves. To think we once regarded planted four or five weeks ago are not out of the ground. Maybe all will end right. Sheep shearing has been in order— and the big full animals now look bare and lank. How cold the earth must seem to them now. Recently Bucher John had 80 sheep shorn—what loads of wool! but they have 60 little lambs frisking around; then there's the geese hatching, 12 wee ones already, and guineas beside many chicks. Real farmers they. Outside the window; we see two men making fence, two hauling lum-ber, one painting fence, another painting, some one passing with a big load Study they took about 160 4-week-old of corn, two planting their flower chicks, and 18 old hens; also a box of garden, one operating the lawn mower, and there goes a large truck full of In history began this month remembering Dewey's victory at Manala Bay May 1, 1898; May 3, 1765 the first medical school in the U. S. was estab-lished; May 6th. this year is Ascension Day which we have always felt should be one of the most sacred days; May 7th., 1915 the Steamship Lus-tiania was torpedoed—and that startled, and started things.

#### UNIONTOWN.

Thirty members of the Light Brigade with their Superintendents met at the Lutheran Church, Saturday afternoon for their regular monthly meeting. After the study of the topic, "The Moslem World" they made a very effective and beautiful poster depicting the life and costumes of the Moslem World. They have recently made one of the members a life member and are preparing to place the Brigade as a whole on the life membership roll.

Attendance on Sunday, May 2 at the Lutheran Sunday School was over 100. After the close of school Thread Day was observed by the Light Brigade under the leadership of Miss Dorothy Crumbacker and Mrs. Larue Shaffer. The children rendered a very interesting and instructive program entitled, "To Live and Grow." The offering for the Lace Industry in India was \$4.65.

At the Confirmation service at Winter's Church, Sunday afternoon the pastor Rev. M. L. Kroh confirmed 11

## AIR SERVICE OVER ATLANTIC PLANNED

#### Harry Forney, East Baltimore St., was taken to a Baltimore Hospital, on Britain Gathers Data to Plot last Thursday, and operated on for Flying Charts.

London, England. -At Foynes, on the River Shannon in Ireland, imaginary flights are made daily over the Atlantic, in preparation for regular air service to America, the air ministry has revealed.

Meteorological experts of the air ministry and Imperial Airways plot a "flight" in accord with reports of wind strength and direction and other weather information received by radio from ships and transferred immediately to "synoptic" charts that give a general picture of the weather over the 2,000 miles between Ireland and Newfoundland.

The experiments were begun in London, but when they reached an advanced stage they were transferred to Foynes, near which are the land and sea bases from which the Imperial and Pan-American planes will operate across the Atlantic.

#### Accepted Theories Erroneous.

The work has shown that generally accepted beliefs about Atlantic weather must be radically revised. Prevalent, for example, is the theory of a constant west to east wind, making all flights from Europe to America difficult and dangerous. This is generally true, but the weather men have discovered that there are many days when conditions favor rather than hamper the westward flight.

On a day in last December, for example, the wind was blowing so strongly from the east all the way across the ocean that a flight to America could have been made in record time.

In addition to constant weather information received from transatlantic steamers the Foynes station has a weather expert journeying back and forth constantly across the north Atlantic on board the steamer Manchester Port. His duty is to discover all he can about prevailing air currents and conditions in the upper air. His work will be continued for a year.

Looses Small Balloons.

He releases small colored balloons of hydrogen, which rise at the rate of 500 feet a minute to the limit of visibility, which is about 10,000 feet. Variations of their course show the direction and strength of winds affecting them. After lightning calculations and comparisons with weather reports received by radio from other ships this data is flashed to Foynes. Upper air temperatures also are taken to combat the problem of ice formation on the planes.

The work has thrown into prominence the need for a meteorological station between the British isles and Greenland, to cover a zone which few ships visit and where no trustworthy source of information exists.

The goal of these efforts is the establishment of an organization capable of handing the commander of a transatlantic air liner, before he takes off, a complete, dependable analysis of weather then prevailing and likely to prevail for the duration of his flight across the ocean. Experimental flights by special transoceanic land planes, sea planes and the Mayo "composite," or "piggy-back," ships will be carried out during the next few months. Informed British aviation opinion, however, believes that regular airmail flights will not be begun until some time in 1938 and that passenger schedules will not be possible before 1939 or 1940.

#### U. S. PLANS TO CUT FARM FIRE LOSSES

Toll Last Year 3,500 Lives and \$100,000,000 Loss.

4 3

Washington. - Due to enormous fire losses on farms, the Department of Agriculture has instituted a program designed to reduce the deaths and damage from fires in agricultural areas. Here the greater part of the country's loss occurs because of the absence of fire protection comparable to city control.

The expert in charge of the work for the department is Dr. David J. Price who is directing research work on farm fire prevention in the chemical engineering division of the bureau of chemistry and soils.

"The loss from fires on farms and in the rural sections of the United States," said Dr. Price, "is more than 60 per cent of the total national fire loss; and in 1936 placed a \$16 'fire tax' on every farm in the country."

More than 3,500 lives were lost in farm fires last year, while property damage has been approximately fixed at \$100,000,000 by Department of Agriculture experts. The Structural Clay Products Institute, spokesman for the brick and building tile industry with headquarters in Washington, is co-operating with department engineers in advocating fire-proof construction on farms.

"It is highly important that farm buildings be of fire-proof materials," said J. J. Cermak, secretary of the institute. "Usually, a fire on a farm means total destruction because of the remoteness of fire - fighting agencies. The great loss of property and even of life in farm fires last year demands that prompt steps be taken to curb the wasteful practice of exposing isolated farm structures to the hazards of uncontrollable fire. The best way to do this is to build with fire-proof material. Fire-proof construction makes unnecessary the wide separation of farm buildings to prevent the spread of flames, thus making for more compact and efficient farm operation and less loss of land to cultivation.

The institute reports that brick and building tile are coming into increasing use for barns and silos, as well as hog, sheep houses and other farm buildings.

## Tarantula Bite Holds

#### No Fear for Zoologist

Minneapolis.—John A. Cederstrom, zoology instructor at the University of Minnesota, is the university's unofficial tarantula keeper.

Excited grocers who have found a tarantula spider in a stalk of bananas are referred to Cederstrom. "They keep coming in, five or six every year," Cederstrom said. "Every one who finds a tarantula seems to think he has to turn it over to the university."

The instructor explained that either he is immune to the bite of the big spider or its sting is not as poisonous as is popularly supposed. He has been bitten three or four times with no more ill effects than that of

#### Financial Usage of the

Term "Stocks and Bonds"

Stock is defined as shares or holdings, collectively, in a corporate business enterprise, attested by certificates of ownership, which usually carry on their face a statement of the sum (known as the par of the stock) which purports to represent the actual investment of money or its equivalent on each unit share. The aggregate par value of all shares outstanding constitutes the capital stock of the company. Certificates having no face value are called "no par stock."

Bonds are given by a government or corporation as an evidence of debt, usually for the purpose of borrowing money; also, any one of a series of instruments evidencing an integral part of such a debt; as, a \$1,000 Liberty bond. Hence, loosely, any interest-bearing certificate ration, especially when a date is set

The bonds issued by corporations, property; those by governments are not, as a citizen could not enforce his lien. Many forms or kinds of bonds are sufficiently described by their names, as coupon bonds, mortgage bonds, first-mortgage bonds, sinking-fund bonds and so on .- In-

Those taken in fresh water are all females. The males never remain in salt water. They feed and grow until maturity is reached and then this life cycle is repeated.

#### Auto Mechanic Is Awarded Title of Baron by Court

San Jose, Calif.—Ernest Siber. twenty-four-year-old auto mechanic has demonstrated that while the Constitution prevents any foreign country from conferring a title of nobility on an American citizen, there is nothing to prevent an Amer-

ican court from doing so. As a consequence, Siber is now Baron Ernst H. Von Schanenflugel. Siber explained his desire and predicament to the Superior court about the title as follows:

His father, Harold Siber, is chief engineer at the San Jose hospital. His grandfather, however, who died in Germany a number of years ago, was authentically Baron von Schanenflugel.

However, as the latter name was entirely too much for the average American to pronounce, his father had his name changed to "Siber." The son, however, desirous of pre-

serving his grandfather's name and the title, asked the court to restore him the family title, name and all, regardless of the difficulties of pronunciation, and the court complied.

#### Old Settlers Remember

How Two Men Won Strike Rapid City, S. D.—An outmoded street car, exhibited in a park here, calls to mind among old settlers one of the most unusual strikes in the state's history. The old street car company here owned one car, a horse drawn vehicle. It was operated by two men. They formed a union. The management objected. And so the men struck. They demanded union recognition and no reduction in salary. Their salary was 75 cents a day. The strikers were victorious.

a mosquito bite.

Cederstrom permits tarantulas to crawl contentedly on his white laboratory jacket.

"I just put them in jars and watch them," Cederstrom said.

He explained that they escape oc-casionally by pushing off their jar covers and he has to turn his office upside down to recapture them.

The instructor believes the tarantulas in laboratory jars become homesick for their banana stalks. Many starve themselves to death, he said. Some specimens eat nothing for months, but drink water.

Their favorite food is grasshoppers, with cockroaches second choice.

#### 'Rustlers' Using Trucks **Increase Raids in West**

Oklahoma City.-Cattle rustling in Oklahoma has been increasing with the more up-to-date method of using trucks to haul the cattle away instead of a horse to drive them.

Col. Charles W. Daley, chief of the state crime bureau, said rustlers using trucks had stolen 1,000 head of cattle in the state during the last six months.

He explained that modern rustlers work at night in the thinly settled sections of the state. They concentrate on cattle found wandering along the highways.

"In some ways the problem is greater than in the old days," Daley said. "Then the rustlers drove off the cattle in big numbers. Vigilantes could follow their tracks and sometimes catch up with them.

"But now the trucks enable the rustlers to whisk their loot to market before the ranch owner discovers his herd has been reduced."

## Hobos Now Pass Up

City With Woodpile Springfield, Ill .- A huge pile of wood is now used to lessen the stream of transient hobos into this city.

Any itinerant who is given a night's lodging is required to chop wood at the city woodpile, which stands in the Salvation Army's yard.

Before the advent of the woodpile an average of 100 hobos daily were bedded at the cost of the city. Now there are about a dozen each night.

dianapolis News. Peculiarities of the Eel The eel is a peculiar aquatic creature.

leave the brackish coastal waters. When the spawning urge sets in the breeding females leave fresh water and travel to the ocean, if the can make it. Here they meet the males and a strange migration sets in to great ocean depths. The young fry, hatched in salt water, begin their journey to the coastal waters when about one year old. At this time they are transparent and known as glass eels or elvers. The females ascend fresh water streams and rivers, while the males

issued by a government or corpofor payment of the principal. private or municipal, are usually secured by a lien or mortgage upon

MINING OF METALS **IN MONTANA BOOMS** 

World Rearmament Opens Up

Steady Market.

Butte, Mont.-Montana mining of numerous metals is enjoying a heartening boom engendered by high gold prices, industrial recovery, and demand for raw materials to supply world armament needs.

Franz Schubert, Composer, Started Career When Ten Franz Schubert, Austrian com-

poser, was born January 31, 1797, at Lichtenthal, a village just north of Vienna. From early childhood he had a phenomenal intuition for playing instruments and for composition, but his father, who was the parish schoolmaster, did not have the means to give him a musical training. He did, however, guide his son's talent, and with the aid of the local choirmaster, Franz was

Church, 7:30 P. M, at Uniontown. The names of remembered mothers will be read.

\*\* **Perry Brought Steam to** 

#### Navy Over 100 Years Ago

Commodore Perry, who died in New York in 1858 at sixty-three, supervised at the New York Navy yard in Brooklyn a century ago the building of the first steam craft with a hull of ordinary type ever constructed for the United States Navy. This vessel was the paddle-wheeler Fulton, of 1,200 tons. Perry directed her construction as commandant of the navy yard, a post he held from 1833 to 1843, says a writer in the New York Herald Tribune.

Fulton, for whom Perry's vessel was named, seems to have been the first man to conceive the idea that steam might be as practical for warships as for commercial and passenger vessels. In 1813—the year in which Perry's older brother, Commodore Oliver Hazard Perry, wrote, "We have met the enemy and they are ours," at the Battle of Lake Erie-Fulton submitted to President James Madison plans for what he called a seagoing steam battery, as distinguished from a craft with a hull of the usual type. Congress authorized construction of such a battery, which had successful trials in the summer of 1815. Fulton died a few months before completion of this craft, the Demologos (Voice of the People). But her powers were never proved, the War of 1812 being over; and the conservative naval authorities regarded her only as an interesting

experiment of little practical value. Construction of another steam battery was voted by congress in 1816; but because ranking naval officers could not or would not grasp the importance of steam-propelled ships, no steps were taken until 1835 to carry out the provisions of the law. In that year the Navy department ordered a steam manof-war to be built. This was the vessel construction of which Perry superintended at the New York Navy Yard.

ora of 35 er cent increased | composing songs and violin solos production in 1936 over 1935 was at the age of ten years. Also at attained and even greater increase is considered by mining experts to be in the making for 1937.

Pay rolls are near World war and predepression highs. In tiny, remote mining camps high in the mountains, as well as in the famed super-diggings here on "the richest hill on earth," the boom is on. The new-found prosperity has brought a resurgent optimism and capital is finding its way into the development of new workings and in increased operation of established properties.

Changes in the law which enable the lone miner or prospector to sell in small quantities to the mints without employment of a middle-man have led many veterans and novices of the pan and pick into the hills and along the streams in quest of gold and silver. A gold price of approximately \$35 an ounce makes small operations profitable.

According to the United States bureau of mines, Montana in 1936 produced \$41,857,000 worth of gold, silver, lead, copper and zinc. The 1935 values were \$30,918,000. Last year's gold production was \$6,265,-000, about 179,000 ounces. The 1935 values were \$5,258,081-about 151,-000 ounces. Nearly all of the increase was believed to have come from two huge placer properties, the Porter at Helena and the Humphrey at old Virginia City, of pioneer vigilante fame. The Humphrey concern, operating the world's largest dry land tractor gold recovery dredge, originally was financed at Virginia City by a New Deal industrial loan.

Proportionate increases were registered in silver, lead and zinc.

#### SHYLOCK!

Two Broadwayites sat in a restaurant. At the end of the meal, one requested a loan.

"Can I borrow twenty bucks for a week?" he asked.

"Sure," replied the other, counting out the money.

As they arose, the latter man spoke again. "Remember."

"Remember," he reminded, "that's only for a week." The borrower turned a livid red.

"You'll get your money," he screamed, "stop hounding me!"-New York Daily Mirror.

this age he was made first soprano in the choir of Lichtenthal Later he was admitted to the Imperial Konvikt, a school in Vienna, where he received a further education in music.

In 1818 Schubert spent some months at Zelesz, Hungary, as music master in Count Estrehazy's family. After his return to Vienna in 1819 his song, "Schafers Klagelied," was performed in public. In 1825 he and his friend, Vogl, made a tour in which his songs were given to the public, Vogl singing them to Schubert's accompaniment. and have been been been been been been

Schubert next directed his att tion to dramatic music, and in his prospects had decidedly br ened. He worked ceaselessly compositions surpassing his for achievements and bringing n demands from foreign publish But poverty and hard work ha weakened him physically that became ill with typhoid which caused his death. He die Vienna on November 19, 1828.

#### How Puritans, Pilgrims Differed in Early D

During the Sixteenth century name Puritan was applied in I land to all persons who urge reform in the ritual of the es lished church. They were so-ca because, as they expressed it, wanted to "purify" the church, a writer in the Cleveland Plain D er. The Pilgrims, as they st themselves, who first formed a ony in Holland and subsequently igrated to America, were Sepa ists, so called because they separated themselves from Church of England and wished maintain a distinct organizat These formed the Plymouth cold which settled in New England 1620.

In 1628 another company of P tans came out and formed the M sachusetts Bay colony. The claimed to be members of Church of England, and to have desire to separate from that be but to be unable conscientiously conform to the established rit They sought in America liberty hold their connection with church, and yet to adopt a simp ritual.

THE RABBIT HAWK 88 By VIC YARDMAN © Associated Newspapers. WNU Service.

OUNTED over the fireplace in the living room of Bar 7 ranch in Wickenburg, Ariz., is the head and neck of a rabbit hawk.

The rabbit hawk is not only peculiar to southwestern United States, but is so rare as to be seldom seen, much less captured.

In fact, aside from this specimen, it is doubtful if there is another in existence.

Hence it is only natural that the Bar 7's trophy has become the object of much comment and awesome stares. Indeed, it was the comments made by one Tex Fletcher that first excited my curiosity in the strange bird. Tex Fletcher is an ex-cowboy re-

siding near Wickenburg.

He is a man of vision albeit possessed of a personality that at once arouses feelings of disgust and repugnance in those with whom he comes in contact.

For Tex is the typical "know-it-all' sort of person, and his manner of impressing you with his vast fund of knowledge, which, actually, encompasses a limited field, makes you itch to feel the man's neck between your hands.

Tex gave up being a cowboy when the government built the state highway from Phoenix to Los Angeles

via Wickenburg. He found that acting as a guide for tourists was much more profitable. And he found, too, that tourists were much more readily impressed by his knowledge than citizens who abided in and about Wickenburg.

And so Tex set up a stand on the edge of the highway and painted a sign advertising his new profession. And motorists from the East would read the sign and draw up to inquire about the price of a "per-sonally conducted tour of the real wild west, visiting many ranches and other points of interest."

Tex would gauge his price ac-cording to how he sized up his prospects, and frequently he'd succeed in getting a couple of customers.

One of the first points of interest which Tex visits with his tourists is the Bar 7.

Jack Birdsill, the ranch owner, resents the ex-cowboy's intrusion and has long looked for some excuse to put a stop to it without embarrassing the tourists, who after all, are innocent victims and many of whom are genuinely enthusiastic and sincere in their praise of the ranch's set-up.

Tex appeared at the ranch one afternoon shortly after I arrived there for my annual month's stay. Five of us, including Jack himself, were grouped about the living room,

when the door opened and in strode the ex-cowboy, followed by three wide-eyed and much interested tourists.

Tex nodded to us briefly and as-

tured it, Mr. Birdsill. I should think you'd make an effort to catch more."

Jack was about to reply, but Tex interrupted with loud laughter. "Catch 'em! Haw! That's rich! Why, ma'm, rabbit hawks are as hard to catch as eagles. Harder. They fly so fast you can't shoot 'em, and trappin' 'em is next to impossible . . . Well, folks, we'd better be gettin' along if we want to see anything else today."

Tex began herding his customers toward the door, and Jack and I exchanged glances.

The tourists looked as though they'd like to know more about the rabbit hawk, and it was quite plain that Tex's information was limited.

Jack got to his feet. "Just a minute," he called, and Tex and the tourists paused and turned. "Perhaps," the ranch owner went on, "you folks would like to have me tell you exactly how I happened to capture this rare bird. As Tex has said, they're difficult to catch.'

The tourists were delighted and came back into the room.

Tex appeared a little more hesitant, but presently returned and stood near the group. "You see," Jack explained, "Tex

is a little embarrassed. Rabbit hawks are so scarce that few people have ever had the thrill of capturing one. However, I'm sure he won't mind if I offer to help him out." He smiled at Tex, and Tex immediately brightened. For a moment he looked almost grateful.

So Jack reached up and took down the trophy

"First," he said holding it up for inspection, "you must shoot a hawk. Then you must catch a rabbit. Next you mount the hawk's head on a board like this and then pin on a pair of rabbit's ears to give the impression that the hawk really grew the ears. The result is rather weird, don't you think?"

As Jack finished talking he unpinned the rabbit's ears and held them in the palm of his hand, leaving on the board an ordinary head of a chicken hawk.

There was a moment's blank silence.

Tex's face went red, then white, then red again.

The tourists stared at him, then at the hawk, then back at their guide.

Finally one of them exclaimed: "Imagine! A bird with ears! And we believed it!"

"Moreover," said the tourist's companion, "this chap here expect-ed us to believe it. Why damn it, he actually believed it himself!"

Whereupon, to the accompaniment of derisive laughter and grins, Tex, the know-it-all tourist guide, turned and bolted. And that was the last time he ever brought a group of tourists to the Bar-7. In fact, shortly after, when Jack and I told the story down town, he went out of the tourist-guiding business, and is now working for Jack in a range camp, 30 miles north of the main buildings, and rarely shows his face in town.

CHICKS AND HENS NEED VITAMIN G

Poultry Scientists Stress the Value of Diet.

Supplied by the New York State College of Agriculture.-WNU Service. Chicks need vitamin G to grow, and hens need it to produce eggs that will hatch, according to poultry scientists at the New York State College of Agriculture.

The scientists found that the developing chick embryo dies when not enough vitamin G is deposited in the egg; and that a smaller can't stand and stale scenery, are amount of this vitamin is required steadily increasing in numbers.

much greater than on the floor inside the car. If the hatching eggs are hauled in a wagon or truck the bed should be matted with straw, which serves as a shock absorber. In the early part of the hatching season it is necessary to gather eggs often as hatching eggs should not be allowed to chill. They should be stored at a temperature ranging from 50 degrees to 60 degrees Fahrenheit. A frost-proof cellar or basement is usually a good place for storage.

Although the British Constitution is for the most part unwritten and a result of custom, its development is marked by certain fundamental written laws, says a writer in London Tit-Bits Magazine.

It was Magna Charta, signed in 1215, that secured for the nation the system of annual parliaments, and the free and unfettered administration of justice. The habeas corpus act of 1679 secured to the people the liberty of the person-no longer could a man be imprisoned at the whim of a feudal lord or sovereign; a magistrate's warrant was required.

In 1701 the act of settlement pro-vided for the Protestant succession to the throne, which later became hereditary in the British house of Windsor. The sons of the sovereign and their descendants have precedence over daughters; the daughters and their descendants having preference over all lateral lives.

•No Window Service or Rural Carriers on Legal Holidays.

Helidays for Rural Carriers are, New Year's Day; Washington's birthday; Me-morial Day, May 30; July 4; Labor Day, 1st. Monday in Sept; Thanksgiving Day, and Christmas. When a heliday falls on Sunday, the following Monday is observed.

sumed a prominent position in the center of the floor. "And this, folks," he said, address-

ing his customers, "is the living room of the Bar 7 Dude ranch, one of the finest in the state of Arizona." He paused and favored Jack with

a smile. I remembered then that Tex always began his recitations with a complimentary remark of this nature; he felt, I think, that in bestow-

ing the word of praise Jack should feel repaid for allowing him to make of his home a sight-seeing point.

Jack didn't return the smile, but sat silently until Tex had finished his long harangue.

The guests, exclaimed with pleasure and delight and were obviously much impressed and pleased.

Presently one of them chanced to see the rabbit hawk trophy and asked Tex what it was.

Tex glanced up over the fireplace. and suddenly I knew that this was the first time, despite his long existence in the southwest, that he had ever laid eyes on the rare bird. For a moment he merely stared blankly. Then he cast a quick, desperate look of appeal at Jack. For once the man's self-confidence was shaken.

Much to my astonishment Jack

came to Tex's rescue. "Why, ma'm," he said, smiling at the tourist who had asked the questions, "that's a rabbit hawk. It's probably one-"

But here Tex interrupted. His face cleared.

He smiled, and was once more the same arrogant, conceited, loudtalking know-it-all as before.

"Ma'm," he said, "I'm glad you asked that question. Rabbit hawks are scarce in Arizona. They're scarce everywhere. You can count yourself lucky that you have this opportunnty to see one. Why, I was nearly twelve years old before I seen my first rabbit hawk!"

"Indeed?" said the tourist. "Most interesting. What a strange sort of creature it is. I suppose it gets its name from its long ears?"

"Yessum," said Tex. "Its ears, if you'll notice, are exactly like those of a rabbit. Besides that, the rabbit hawk is the deadly enemy of the cottontail. In fact, it lives on cottontails almost exclusively. Many's the time I've seen one swoop down and pluck a little bunny right off the desert and fly away with it.'

"How awful! I'm so glad you cap-

in the Large Libraries

A book-detective is a man who protects a library from all the cranks who infest it; from persons who mutilate books, be they college professors or mischievous school children, and, in particular, from persons who steal books, whether they are occasional pilferers or professional book-crooks. There are six of these detectives in the United States: Boston, Newark, Cleveland and Los Angeles have one apiece. New York has two, one in Queens, one in Manhattan, who effectively protect the 4,000,000 volumes and the 60 branches and sub-branches of the New York public library, writes Thomas M. John-

son in Today. The spoils of that war are huge The professional book-crook doesn't steal a popular novel and sell it for a quarter; he tries to steal a literary jewel and sell it for a fortune

There is money in rare books. The French government recently paid \$800,000 for the original La Fontaine's "Fables," illustrated by Fragonard. A "prime" Gutenberg Bible, the first book ever printed, is valued at \$300,000, a Shakespeare first folio at \$100,000. Relatively modern books like "The Last of the Mohicans," "Tom Sawyer" and Audubon's "Birds" may bring from \$2,000 to \$6,600. Such prices have been paid, not in the boom days of 1929, but within a few months. At last fall's book sales in New York, rare books drew bigger crowds and higher prices than at any other time since the beginning of the depression. They are not merely the hobby of fusty old parties in long-tailed coats. One thousand dealers in them are officially listed. All of which makes more work for the booksleuth.

#### Fossil of Great Age

Fossils of fresh-water fish, found abundantly in tertiary deposits in Alaska, have been brought back by an expedition headed by Dr. Erich Maren Schlaikjer of Brooklyn college, to be classified and studied at the American Museum of Natural History here, says the Kansas City Star's Science Service. The formation where they were found is approximately 30 million years old. Dr. Schlaikjer also brought back a very large collection of plant fossils from the Alaska tertiary. Flying over territory as yet unexplored, he saw further deposits which he wishes to visit and excavate.

for egg production than for hatch ability.

Their experimental work dealing with hatchability shows that the vitamin G content of eggs is determined by the amount of this vitamin in the hens' diet. Eggs with the largest amount can be had only when hens are fed a diet rich in vitamin G. They say the degree of yellowish coloration in the egg-white is evidence of the richness of the hens' diet in vitamin G.

Substances containing vitamin G and used in feeding poultry include dried yeast, dried whey, dried skimmilk, dehydrated alfalfa meal, suncured alfalfa meal, and white fish meal. Other animal by-products contain appreciable amounts, but cereals have relatively little. The amount contained in cereals, however, is especially important, according to the research men, because grains compose such a large part of poultry rations.

They also point out that the requirement of chicks for vitamin G is closely related to the rate of gain in weight of the chicks, indicating "that the vitamin is intimately connected with growth processes and is not required in any great amount for maintenance.'

## "Large End Up" Is Best

to Save Hatching Eggs Hatching eggs to be hauled or packed snugly into the case with the large end up, says Berley Winton, in charge of the poultry office of the Bureau of Animal Industry, as hatching eggs are less likely to be broken when in this position than if they are packed with the small end up.

Each normal egg has an air cell at the large end, Winton explains, and it is necessary that the mem-brane separating the inner portion of the egg from the shell membrane neither be broken or shaken loose. Research at the National Agricultural Research Center, Beltsville, Md., has shown that eggs with tremulous air cells hatched only twothirds as well as the eggs which had normal air cells. Packing the eggs with the large end up removes the pressure from the inner membrane.

Winton cautions that the egg case should never be placed on the bumper of an automobile, as the vibration at this point is possibly

Close to a million of these ga line pioneers are now riding the roads of the country in nomadic fashion.

Jumping at the chance to see the country at a minimum of cost, entire families are deserting the old homestead, packing their belongings aboard modern prairie schooners and joining America's new army of tourists.

It's the promise of romance, adventure and a more economical mode of living that is swelling the ranks of these permanent wanderers.

The trailer-be it ever so humble-can house three and even four in comfort. Add to this the fact that for a few dollars a week the occupants receive light, heat, entertainment and service at any of the numerous trailer camps scattered all over the country, and you have the answer to the trailer's popularity.

From here to the West Coast cities and towns are preparing to receive this new traffic. Many towns are converting parks and vacant lots into camps for these highway homes.

A survey recently conducted by the Automobile Club of Southern California showed the establishment of a thousand of these camps is being contemplated along the West Coast

But it isn't all smooth sailing for trailer owners. Some communities have posted the "no trailers wantshipped to the hatchery should be ed" sign before their gates and refuse to admit this type of traveler.

#### **Royal Palace**

Until the Eighteenth century the royal palace of Whitehall occupied most of the land between Charing Cross and Westminster, London. It was known as York place when Cardinal Wolsey owned it, and it was not until it passed into the hands of Henry VIII, that it became known as Whitehall. Wolsey fell from his eminence in 1529 and Henry seized his property and converted it into a palace. For more than 150 years after that it was the chief residence of the court of London. King Henry married Anne Boleyn there in 1533. In later years Queen Elizabeth maintained the grandeur established by her father. Charles I was executed in front of the palace in 1649. Charles II made it the scene of revelry and intrigue.

Other notable landmarks in the development of the British constitution are the act of union with Scotland (1707); the government of Ireland act (1920); and the statute of Westminster, passed in 1931.

England's Tiny Churches

England claims some of the smallest churches on record. A claim to be regarded as the smallest church has been advanced for the church of Cullone, on Ex-moor. The measure of 30 feet long and 12 feet wide challenges the little Dorset church which is 23 feet by 14 feet, thus it is doubtful if there is any church in England smaller than this. Upleatham church in Yorkshire, whose present dimensions are given as 17 feet by 13 feet, is easily the smallest, but it is only a fragment of the original church.

Birds Return to Old Homes It is the practice of certain birds to return to their former homes every spring, repair the damage done to their nests by winter storms, and so re-occupy them repeatedly, and their young con-tinue this economy. This is espe-cially the habit of birds of prey. Eagles, duck-hawks (peregrine falcons), fish-hawks and the like often thus utilize their property during scores of years, as also do ravens and various crows. An historic eyrie of peregrines in Lapland was tenanted unbrokenly from 1736 to 1885. Until a few years ago baldeagles had occupied their ancestral home in a great tree near Cleveland, Ohio, for a century, annually renovating it.

The "Elastic Clause"

"Elastic clause" is the name given to Clause 18, Section 8, Article I, of the Constitution, which reads: 'The Congress shall have power . . To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof." Although this clause does not grant any new power, it gives Congress wide latitude in choosing means and passing laws for carrying out the powers granted elsewhere. Hence, the name "elastic clause."

#### Lesson for May 9 ABRAHAM A MAN OF PRAYER

LESSON TEXT—Genesis 18:17-32. GOLDEN TEXT—The effectual fervent prayer of a righteous man availeth much. James 5:16.

PRIMARY TOPIC-Abraham Praying for His Neighb

JUNIOR TOPIC-A Great Man's Prayer. INTERMEDIATE AND SENIOR TOPIC-Praying for Others. YOUNG PEOPLE AND ADULT TOPIC-

The Ministry of Intercession.

Prayer-how many are the books that have been written on that subject and the sermons preached, and yet how little it is actually practiced. One can attract an audience to hear it discussed, but only a handful will come to pray. We as Christians agree that it is God's appointed way of blessing. We put up mottoes such as "Prayer changes things," or "More things are wrought by prayer than this world dreams of," and then (may God forgive us!) we try to change things ourselves. We struggle with problems when we ought to pray.

The lesson of today, from the life of that great hero of faith, Abraham, stresses the importance of intercessory prayer, that is, the giving of ourselves to pray for the temporal and spiritual welfare of others. In an age characterized by a grasping spirit of acquisition for personal advantage it is like a breath from heaven to read of this man's prayer for others. I. The Nature of Intercessory

Prayer.

1. It is a Privilege. Abraham had been honored by a visit from God. The covenant had been renewed, a son had been promised. The three visitors looked out toward Sodom. God who had thus appeared to Abraham in visible form and had shared the hospitality of his home now extends to him the privilege of sharing in God's purpose. How glorious to be on such terms of confidence with God, to know him and to know his will and purpose!

2. It is a Responsibility. "Abra-ham stood yet before the Lord"why? To pray for Sodom and Gomorrah. Privilege and responsibility go together. Those who have audience with the King of kings are there to carry the blessed burden of prayer for others. Are we praying for our children, our families, our church, our nation? If not, who will pray?

3. It is Objective, not Subjective. Some modern "religious" leaders would devitalize prayer by making it a sort of spiritual exercise which has only the value of developing our own soul. The prayer room is to them a sort of spiritual gymnasium where the soul develops its strength and a spiritual sense of well-being floods the soul.

## White, Green, Red, Purple

The intrepid English and Dutch sailors who searched for the northwest passage, a supposed water route around the northern end of North America, failed in their main objective, but nevertheless supplied scientific men with a wealth of me-teorological information. The one phenomenon that most impressed them, and one that has come to be regarded as typical of northern latitudes, is the aurora borealis or northern lights, observes a writer in the Chicago Tribune.

This is an unear hly display of light that appears in the sky at night. It may be seen as far south as the northern part of the United States. In the eastern hemisphere, however, it is rarely seen farther south than the northern parts of Norway, Sweden and Russia. It usually appears as one of several distinct patterns of light. It may be an arch, the lower side of which is sharply defined, with the upper gradually fading into darkness; or the lower edge, instead of being arched, may be curved in irregular folds like the edge of a draped curtain. Sometimes it takes the form of radiant beams which may seem to spiral upward toward an infinite point at the zenith.

In color the aurora varies from pearly white to a pale green, although it has on occasion shown shades of red or purple. It may be easily the brightest object in the nocturnal sky, or it may be barely visible. It may last for only a few minutes or for many hours.

#### Frogs Have Teeth, but

the Toad Is Toothless The eyes of toads and frogs have movable lids which are closed when swallowing and when swimming.

The ear (timpanum) of the toad or frog is the round disk situated directly behind and a little below the eye.

The tongue of a toad is attached at the front of the mouth instead of at the back of the mouth as with human beings. The tongue of a toad is long and thin, thickened at the end, which is covered with a sticky mucus.

The frog's tongue is attached a little way back from the front of the mouth and cannot be protruded a very great length. As the frog has teeth on the upper jaw and the toad is toothless, it is fair to suppose that the frog depends more on his jaws than on his tongue to keep body and soul together. A big bull frog, and they do grow to be a foot in length from the tip of the nose to the end of the outstretched legs, has been known to eat small birds and rodents.

The Earliest Diamonds

It was a Dutch farmer who discovered the first diamond, says a writer in the Philadelphia Record. To him it was simply a pretty stone with which some children were playing. He showed it to a trader. Neither of them knew what it was. But the French consul in Cape Town, a jeweler, pronounced it to be a diamond and valued it at \$2,500. At this price it was bought by the governor of the colony. The profits were honorably divided between the owner and the trader. The same farmer paid all that he had-500 sheep, 10 oxen and a horse, to a native witch doctor for a stone four times as heavy which he was using as a charm. This the farmer sold for \$56,000. It was the famous 'Star of South Africa," valued at \$125.000.

#### Spring Scene in a Paris Zoo.

Prepared by National Geographic Society, Washington, D. C.-WNU Service. > PRING flows across Paris in waves of joy. Tender leaves bring shade to the boulevards.

Horse - chestnut candelabra lighten the masses of new green. Ir. the Jardin des Plantes, the Luxembourg Gardens, and the Bois hoops, skipping ropes, and all sizes and colors of balls give outlet for a new surge of energy and delight.

At Pre Catelan and Armenonville tables and chairs, reappearing after their annual hibernation, invite conviviality. Along the boulevards unscientific but heart-warming braziers, around which cafe patrons clustered all winter, give way to green tubs of pink hydrangeas. Overcoats are laid aside. Windows open wide in unconditional surrender to spring.

Along the Seine the workmen's clubs shine up their houseboats, and ragged laborers, stripping for a sun bath, become as well dressed as any man.

Poor devils along the quays lie for hours on the warm stone stairways, savoring the blessed novelty of being neither cold nor wet. In the industrial suburbs, mild weather lessens the misery.

In the Tuileries Gardens, human beings suddenly outnumber the stat-ues, and at the Palais Royal, where John Howard Payne wrote "Home, Sweet Home," little boys welcome staunch sailboats after adventurous voyages amid the waterspouts of the fountain.

The Gingerbread Fair, with its roaring lions, skin-deep beauty shows, merry-go-rounds, wheels of fortune, and photograph shops, starts its annual round under many aliases

As the "Fair of the Throne" on the Place de la Nation, this street carnival has its biggest success, for there it is among its own, the common folk who get a thrill out of hav-ing gingerbread pigs "baptized" with the names of their proud youngsters.

#### How Pain and Pleasure

Vary With Individual Pain, obviously, is an extreme quality or quantity of the same reaction that gives pleasure in its milder intensities. The amount of pain or pleasure that is derived from a reaction varies with the individual. One person can be thrown into ecstasies by the same stimulus that leaves another person unmoved. All persons do not experience pain to the same extent when the producing cause is the same in both cases, according to a writer in the New York Herald-Tribune.

The erroneous assumption that we all experience the same pain from the same cause is responsible for the belief that some persons are better able to stand pain than others. Some persons get almost no sensation reaction whatever to causes that produce excruciating pain in others

Almost all the pain we feel is carried to the centers of consciousness in the brain over the sensory nervous system. The motor nerves take no part in conduction of the sensation of pain. Parts of the autonomic nervous system, which automatically controls our internal affairs without aid from the consciousness, functions at times to block or inhibit pain. In hypnotism a blocking or inhibiting action takes place which makes it possible for painful stimuli to be applied to the body without the sensory centers in the brain becoming conscious of pain.

There is another situation which is the converse of this. A person can feel pain when there is no painproducing stimulus acting on the peripheral nerves. Sir James Paget has pointed out that, if a person expects pain and looks forward to experiencing pain, that person will experience the pain even though there be no pain cause, the pain being produced entirely in the sensory centers of the brain, and the effect is just as keen and real as if caused by stimuli that came over the nerves. This is known as subjective pain.

#### Ancestry of Chow Dogs Is Traced to Far North

The ancestry of the chow or chowchow dog is traced to the dogs of the Far North and it is said that this particular breed was kept by the Buddhist priests in Northern China. Stories are told of their edible qualities but from Chinese, states a writer in the Los Angeles Times, we have heard how this type of dog was kept as guard dogs, that the red specimens were classed as ordinary, the black as rare and allowed special privileges. They were fed a diet of rice and vegetables as the priests were noted vegetarians and as meat is the natural food for dogs it is believed that they would form bands and swoop down on the live stock of the near-by farms.

Naturally this created ill feeling toward all dogs and a certain number of them were destroyed. The scarcity of food in China and dire necessity no doubt forced many a native to sacrifice a pet for the sake of his family but the Chinese do not eat dogs, this or any other breed.

N EAL likes to take long Sunday morning hikes, and he always wants Nina to come along tramping through the woods with him.

"But, goodness," said Nina, "Neal can sit down when he gets back, and I have to start dinner. That means I'm walking just about all day long. I'd like to have a speedometer to see just how many miles a day I do!"

Men never realize how much exercise a woman gets just in the course of an average day. Or maybe they do, because they are responsible for most of the step-saver appliances. We've just been seeing a lot of those metal cupboards and cabinets that fit together in units

A Lady With a House Is Quite an Athlete if You'd Count the Miles She Runs in Her Own Kitchen.

and make the most convenient places to work with wide counter tops and fine vermin proof storage cabinets, plate warmer cabinets and towel drier compartments. Then there is that very impressive new garbage disposal affair that now comes with some of the new sinks. You just dump your garbage down the drain and it is mechanically pulverized and washed away.

But there are a lot of step-savers you can introduce that won't cost as much as these, such as having racks for kitchen towels in reach of working centers and arranging for the storage of various articles of food in reach of the place you prepare them for cooking. And having plenty of traps handy to make one trip take the place of three in carrying dishes in for setting the table or in assembling the ingredients for a recipe, or collecting pots and pans to wash: Little changes but they'll save you miles.

\* \*

More Lady-Like Fashions. We're back at our swishing and rustling, even in home decorations -fashions this spring are much more lady-like and prettier than they've been-not so athletic looking. This mood is translated into contemporary settings in a revived interest in French and Victorian styles in furniture. Not the froufrou versions though.

Florence Field has just bought new furniture for her living room and it's traditional French and Victorian (the two go well together). but used with subdued modern colorings that make it very interesting. The walls are that lovely new dusty pink, or pinkish beige, and the rug is peacock blue but toned down a bit. The furniture is covered in shades of dusty apricot, honey color and greyed turquoise. Glass cur-

scarcely raising their heads as prize-seeking hoofs pound by. The Buttes Chaumont.

Courcelles as well as children from the aristocratic Avenues Velasquez, Ruysdael, and Van Dyke.

Strangest of the Parisian parks is the Buttes Chaumont, laid out by Haussmann, the boulevard builder, on the site of the old plaster-of-Paris quarries. Rising in the middle of its artificial lake is a seeming mountain, and surrounding verdure glorifies what was once a hideous hole. It is pleasant to think that Haussmann, ruthless wrecker of medieval buildings, could create as well as

destroy. Baron Haussmann did to teeming Paris what L'Enfant had done on paper for a nascent Washington, destined to be the beautiful capital city of a new republic. Haussmann thought in terms of boulevards, with the result that whole regions fell. before the hammer of the auctioneer and the onslaught of the house wrecker. But, thanks to him, motorcars move. He was one of the few road builders of his day whose mind was broad enough for anything but pedestrians. His boulevards have brought new notes to a city whose very cobbles have been cemented with human blood.

Spring brings life to the parks and visitors to the Place de l'Opera. People think of the Opera as having always stood there. Yet when the Germans entered Paris in 1871 Garnier's masterpiece was not finished and the Communards, who wreaked their vengeance on hundreds of buildings, spared this splendid structure, down whose grand staircase not an aristocratic evening gown or shirt front had yet passed. The three-acre opera and ballet school, library and museum is younger than many of the specta-

tors.

Homes of the rich overlook the Parc Monceau, but "Liberty, Equal-ity, and Fraternity" obtain in the park itself. Working people come in from across the Boulevard de

ibtedly the very fellowship with God which is inherent in prayer is spiritually beneficial, but prayer actually deals with such things as cities, men, sin, sorrow. It concerns men's physical well-being. their material prosperity, as well as their spiritual welfare. It is the means designated by God for the release of his power on behalf of the object for which we pray.

II. Characteristics of Intercessory Prayer.

Unselfish. Abraham already had his promise and his blessing. The cities of the plain were wicked, yet he prayed for them. Those who know the spirit of God are not selfish in prayer.

2. Courageous. Note the reverent boldness with which Abraham pleaded the cause of the condemned cities. The Bible reveals that God honored men who had a holy courage. History tells the same story. We celebrate this year the centenary of one who prayed boldly-and believed, and labored-Dwight L. Moody.

3. Persistent. No one likes a "quitter." Christ spoke of a man who was heard for his importunity (Luke 11:8). See also Luke 18:1-8. Some one has said that when we pray we are all too often like the mischievous boy who rings the doorbell and runs away without waiting for an answer.

#### III. Results of Intercessory Prayer.

The cities were destroyed, but the righteous were saved. God hears and answers prayer. This is the testimony of His Word, of countless Christian men and women of all ages, yes, of the men and women of our day. We know by experience that it is true—"I cried; he an-swered." He says to you and to me, "Call unto Me and I will answer thee and show thee great and mighty things, which thou knowest not" (Jer. 33:3).

#### No Reason for Anxiety

Anxiety is the poison of life; the parent of many sins and of more miseries. Why, then, allow it, when we know that all the future is guided by a Father's hand!-Blair.

A Long Life He lives long that lives well, and time misspent is not lived, but lost. -Fuller.

They Also Serve They also serve who only stand and wait .- Milton.

Many Species of Eucalyptus

The eucalyptus hemiphloia, Australian Graybox, attains a height of 90 feet, and is distinguished by its persistent, grayish and somewhat wrinkled bark, which often peels in long strips from the branches. There are about 300 species of eucalyptus, all native to Australia. Considering that a tree can acquire a height of upward of fifty feet within so short a span as five or six years, it is no wonder that it has a personality of great appeal. The name is derived from eu, well; and kaluptos, to cover as with a lid. It refers to the calyx, which covers the flower before expansion and afterwards falls off in one piece in the shape of a lid or cover.

Colorado's No-Man's Land

No-Man's Land in Colorado is a tract of about 1,300 square miles in the north central part of the state, about 50 miles from Denver. Lying between lands included in the Louisiana Purchase and in the Texas Panhandle purchase, it is not part of either, but was obtained in the cession of the Ute Indians under the treaty of March 2, 1868. It was included within the boundaries of Colorado when that state was admitted to the Union in 1876. On August 9, 1936, at Breckenridge, Colo., Gov. E. C. Johnson proclaimed American sovereignty over this land.

#### Hairless Squirrels

Hairless fox squirrels are not unusual, although they are not common. Generally they are alone while feeding or resting. Others of their family seem to shun them. They are not as active as squirrels in good. fur and are constantly scratching themselves. Some have been found even with their tails devoid of hair and they appear more like a light brown rat than a squirrel.

other titles, the Gingerbread Fair later spreads its tents before the Invalides and paves the Avenue de Neuilly with pleasure from the Porte Maillot to the Seine. Along the outer boulevards it competes for custom with cinema and cabaret.

How long it can last, none of the sellers of nougat or spinners of fortune wheels can say. "People don't seem to buy live turtles any more," one veteran sighs.

#### Plenty of Zoos There.

There are zoos from one end of Paris to the other. Giraffes brush at the clouds with inadequate ears; a fat sea elephant tips its head back like a man gargling, in order to eat fish from the hands of a keeper standing on its back; monkeys chase fleas, lions obey a trainer, and elephants, doing elephantine tricks, collect tips in their trunks.

As for donkeys, ponies, and goats, there are squads of them, each ready to go into action any time a pair of chubby legs straddles its back or a dainty miss of four takes the reins.

Paris offers its children countless simple delights. A youngster can ride a camel, drive a llama or an ostrich, lance rings from a merrygo-round, whirl to music inside a miniature plane, dig in the sand. sail a yacht, or forget the world at a puppet show.

Then there is the Zoo of the Little Ones. Any city might have one. A Cozen lambs, two dozen pigs, six donkeys, twenty kids, rabbits, ducklings, guinea pigs, and monkeys to suit the taste-this is the recipe. Paris adds a baby camel and its mother. But that is mere swank.

The magic lies in those mutually timorous contacts through which confidence and companionship are established between a child and a pet. Tiny children feed woolly lambs from bottles and squeal with delight when the little beggars suck the nipple off and spill milk down mother's black dress. There is something enormously appealing about being allowed to feed another person's livestock when you are young in Paris in the spring.

Every afternoon, governesses and their well-dressed charges invade the generous expanses of forest, park, and square. On Thursdays, when the schools are out, and Sundays, when everyone is, Paris goes sylvan to an unbelievable degree. Lying on the grass is a major sport. Within smart race tracks at Longchamp or Auteuil, nature lovers stretch out under the sun, some

In this Parisian show place, where evening dress is again compulsory in the best seats three nights a week, you are quite likely to hear Tannhauser singing German to Elizabeth's French, a use of harmony which shows how far art outruns politics. As ballets, "Coppelia" and "Gisela" are much beloved.

#### On Two Famous Streets.

From the opera, two famous streets lead south. The Rue de la Paix passes Cartier's jewels, Coty's perfumes, the Ritz, and the Hotel du Rhin, now empty, once leased by a Boston club for its members to use whenever they came to Paris. The Avenue de l'Opera passes Brentano's and the Comedie Francaise on its way to the Louvre.

From the Louvre a broad band of beauty-like the Mall in Washington-stretches westward to the Seine, hurdles a few smokestacks, and continues to St. Germain, St. Cloud, and Versailles, 12 miles away.

Standing in the Place du Carrousel and looking up that incomparable vista past the obelisk in the taxi-infested Place de la Concorde, one can almost forgive the destructive mania of the Communards, for it was they who, by burning the Tuileries palace, opened this view toward the sunsets.

The Tuileries gardens seem to have been laid out with square and compass. As if fresh from a beauty shop, Paris here challenges "Am I not fair?"

Yes, more than fair, for this combination of promenade and garden, forest and art gallery, playground and yacht pond, woos with friendliness as well as artifice.

Children adore that honest artisan Pere Guignol, who carves and paints his puppets, including Punch and Judy, and then gives them voice and action in his little theater among the trees.

Conspicuous in Paris in the spring are the students. Paris is the Mecca

spread to the Left Bank. Poor but proud, this republic of scholars made Paris the intellectual capital of the Middle Ages, the leavening pan of the Renaissance. The person of a student was sacred, as the Count of Savoisy learned to his cost when his residence was destroyed. and he was banished because his lackeys started a brawl with the devotees of Latin and learning.

In many parts of China they were used as a sled dog, also as a hunting dog, and as a result of some early training or instinct they have an uncanny ability of always finding their way. You never see a chow out alone with a lost look. Rather he trots along paying strictly to his own business (expecting you to do likewise) and they are master hands in crossing a street amid busy traffic. They have many peculiar characteristics unlike other breeds which extend to their physical conformation.

#### "Reading the Riot Act"

The original Riot Act was an English law passed in 1715, in the reign of George I, at a time when there was some apprehension of a Jacobite conspiracy against the reigning house. It provided that when 12 or more persons unlawfully assembled and refused to disperse within an hour after the reading of a specified portion of it by a magistrate or other competent authority, they should be considered as felons, liable to be fired upon by the military, etc. In the popular sense "to read the riot act" is to offer a strongly worded reproof or warning. In this country most states' laws forbid unlawful assembly, etc., but these usually differ from the English Riot Act and in some of them only two persons are required to constitute such assembly.

#### Bald Eagle Not Bald

The bald eagle isn't actually bald, but white head and neck feathers make him appear so. It is among the largest and keenest-eyed of all birds, sometimes with a wingspread of eight feet. Old Baldy is a homebody, using the same nest year after year, adding only new layers of sticks and branches. One such, in use 35 years, finally grew to 12 feet in height, 81/2 in width. When it fell, its weight was reckoned 4,000 pounds-two tons.

#### Love Curls

Women love curls. They've always loved them. Years ago, a woman got kinks in her hair by putting a slate pencil in the kitchen range and twisting her tresses around it. She used quince seed juice to make "beau catchers," and when she combed them out they looked as if they had been starched.

We're Back at Our Swishing and Rustling Again, in Both Fashions and Home Decorations.

tains the color of the walls and draperies in a French flowered chintz on a greyed turquoise ground bring distinction to the windows. Lamps, candlesticks and accessories are all in silver finish-altogether it's a lovely room. And can't you see how becoming it would be to a woman like Florence who wears ivory and rusty browns so much? She tries to keep the flowers mostly in yellowy pinks, such as tea roses and gladioli, with sometimes sprays of lavender-blue flowers.

Florence's room is rather subtle in its appeal—there's nothing there to stop you in your tracks as you enter. But it gradually envelopes you with its charm (and comfort, to because there are deeply comfortable easy chairs and enough occasional tables in reach). Florence is like that herself-it takes a while before it dawns on you what a perfectly stunning person she is. It's right and proper for her house to have that same illusive fragrance of beauty.

#### Way to Tell

It isn't hard to tell when the outside of your house needs painting. If the surface is glossy and smooth, you may be sure that your house is well protected against the constant attack of the elements. But if the gleam has gone out of the paint, if the surface is dry and chalk-like and there are places where the coating has washed off altogether, it's high time to call for the painter.

for students from all over the world. Near the Sorbonne or Polytechnique one can eat soup in many languages and curdled milk in many more. University education, born in the cloisters of Notre Dame, soon

## **FINGER PRINTS TO** PROTECT CIVILIANS

#### Increasing Number Being Recorded in Washington.

Washington, D. C.-""Realizing that finger prints may be an effective means of identification in case of death or amnesia, increasing numbers of civilians are having their prints recorded at the federal bureau of investigation, a division of the United States Department of Justice that is perhaps better known as 'the G-Men,'" says the National Geographic society.

"Visitors are conducted on tours through the identification division at the rate of several hundred a day. Many remain to have their fingerprints taken. In long chattering lines, business men and their wives, giggling girls, and solemn small boys pass before the recorder with his yellow stamp pad and small white cards marked off into spaces for each finger's print.

"A young girl approaches, hold-ing out red-nailed white hands. The recorder presses her right thumb firmly on the stamp pad and then down on the card, rolling it from right to left. 'Just relax, don't try to help me,' he instructs her, for if she presses with her thumb, it overinks and smudges the pattern.

#### Offer Telltale Evidence.

"He takes the marks of her right hand's fingers, one after another, and then those of her left hand, individually.

"Next he records, at a single impression, all the fingertips of her right hand, and, with another impression, all those of the left, as a check upon the sequence of the preceding prints. She stares amazed at the dark whorls on the card made by her unstained white fingertips. The colorless chemical solution on the stamp pad acts on the chemically-treated card, but remains invisible on the hand.

"The federal bureau of investigation, with 267,000 sets of fingerprints in its civilian files, is increasing them at the rate of almost 800 a day. The bureau does not search for fingerprints of criminals among the prints in these files, but it may search for them among the prints of civil service employees, which are filed to keep men with prison records from holding positions of public trust.

public trust. "Exhibited on the wall of the federal bureau of investigation is a device like a large automobile-mileage-meter. Each time the last number on the right changes, it marks, not another mile, but a new set of criminal fingerprints received at the bureau. The number changes about 175 times an hour. The bu-reau, on duty twenty-four hours a day, receives during that time about 4,200 new records of people under arrest. These are sent in from more than 10,000 law enforcement agencies all over the United States and from eighty foreign countries.

## SEN. BYRNES FOR ECONOMY

Senator Byrnes, (Dem. S. C.) in a speech in the Senate said in part: "The strategic moment to strike for economy has arrived, Senator Byrnes

said. Unless cuts are made, he asked what the effect on prices of Govern-ment bonds might be, and since more than \$17,000,000,000 in such bonds are held by the banks, figured that a decrease of five points would mean a loss to the banks of \$850,000,000. A balanced budget, he reminded,

can be reached by increasing revenues or cutting expenditures. "We have increased taxes," said Senator Byrnes, 'on the larger incomes and on estates and we now find a falling off in a rev-enue expected from these sources. We must conclude that we have gone the must conclude that we have gone the limit—if not too far. It is proposed that additional revenue be secured by either lowering the income tax exemp-tions or levying a sales tax. If I had to choose, I would lower the exemp-tion. But I am opposed to both pro-posals. The budget should be balanc-posals. The budget should be balanc-

ed by reducing expenditures, not by levying more taxes." His plan for a 10 per cent cut would apply to about half of the present budget, exempting fixed charges,mak-ing possible a saving of \$350,000,000. Department heads would be permitted

to make adjustments within their de-partments. The plan, said Senator Byrnes, would not require a reduction in compensation of employees. But it would require dispensation with services of some unnecessary employees. The budget would not be balanced

The budget would not be balanced by the 10 per cent cut alone, so Sena-tor Byrnes proposes to take \$500,000,-000 from the relief appropriation. "If to you" said Senator Byrnes, \$1,000,000,000 seems a small amount it is only because the expenditures of recent years have caused us to lose our perspective. It has not been so many years since \$1,000,000,000 would have covered all expenditures of the Feder-al Government. Next year it would al Government. Next year it would be one-seventh."

#### SUPREME COURT DECISIONS DUE THIS MONTH.

The Supreme Court is now reported to have delayed, at least until May 17, a final decision on the constitutionality of the Federal Social Security Act, in order to hand down at the same time order to hand down at the same time, order to hand down at the same time, other decisions along the same line, involving Old Age Pension Insurance and old age provisions of the Security law. After these decisions, and per-haps a few others, it is said that the Court will adjourn early in June, for the Summer, according to custom.

Student to a servant at the door; "Is Miss Brown in?" Servant "She is engaged." Student, "I knew it— I'm what she's engaged to."

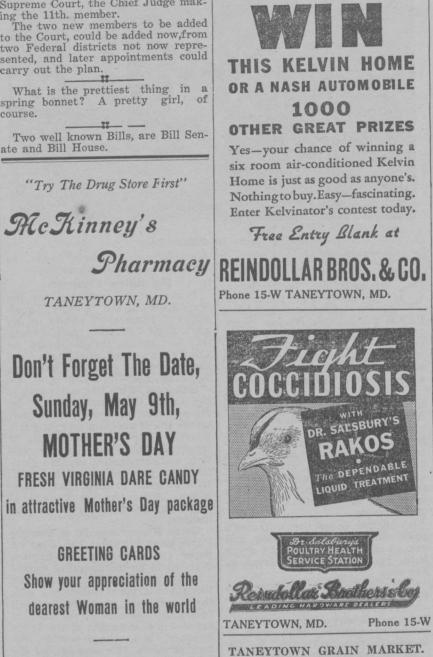

Senator McCarran, (Dem., Nev.) bresented a new plan concerning the Supreme Court to the Senate Judisupreme court to the senate Judi-ciary Committee, which would provide for two new judges, making a court of 11 members instead of 9. As there are ten Federal Court Districts, he would provide that each of the dis-

would provide that each of the dis-tricts be given representation in the Supreme Court, the Chief Judge mak-ing the 11th. member. The two new members to be added to the Court, could be added now,from two Federal districts not now represented, and later appointments could carry out the plan.

#### It Works This Way.

"Imagine that a suspect, Bill Smith, is arrested in Los Angeles. His fingerprints are taken with printer's black ink, which, with his photograph, are rushed to Wash-ington to the federal bureau of in-vestigation There they will be checked against fingerprints in the criminal files to see if he has a previous criminal record. If the check reveals that Bill Smith is really ex-convict 'Butcherknife Joe,' wanted in New Orleans for murder, two telegrams are sent, one to inform the Los Angeles authorities, another to tell New Orleans officials the Los Angeles police have their man.

"Fingerprints found on weapons, woodwork, glass, and articles near a scene of a crime are also checked against prints in the bureau's criminal files and aid in capturing law violators.

"Since no two fingerprints have ever been discovered whose patterns were identical, fingerprints offer such tell-tale evidence that criminals have tried to change theirs. But they cannot be entirely changed, even by the painful process of removing the skin. "The federal bureau of investiga-

tion has nearly seven million criminal fingerprint records on file, in more than 1,000 great green cases stretching for two city blocks within the building. Only 300,000 of these are records of women, the rest are of men. Workers search through these prints by hand, to check an incoming set of criminal prints against them. If the incoming fin-gerprints fall into a certain common classification, chiefly the ulnar loop type of pattern, the search is speeded up by a machine which automatically sorts the cards at the rate of 475 a minute.

#### Children Borrow Rats

From Museum for Pets Springfield, Mass.-Lending rats to boys and girls who like them for pets has become quite an extensive practice with Trailside museum, a bureau of the Springfield Museum of natural history. The museum breeds the rats for

study purposes.

When a child borrows one he can keep it as long as he likes. Some boys try their luck in training several rats at different intervals, and this is all right with the museum. Some of the rats have been borrowed and returned as many as three or four times.
