New Years are not al-uays the best, we wish 1938 good luck. THE CARROLL RECORD A good start is a help toward a good end. So here's 1938.

VOL. 44 NO. 20 27

TANEYTOWN, MD., FRIDAY DECEMBER 31, 1937.

\$1.00 PER YEAR IN ADVANCE

COMMUNITY LOCALS

This column is not for use in advertis-ing any money-making program, fair, sup-per, party or sale except; for non-denomi-national charities or Fire Company or Public Library support. Churches, Lodges, Societles, Schools, etc, are requested to use our Special Notice Department for money-making events. Positively, no free notices will be given in this column to Card Parties, or Bingo games, or like events.

Mr. and Mrs. Harry Baumgardner will leave Saturday on an auto tour through Florida.

George Seltzer, of Harrisburg, was the guest of Basil L. Crapster, the first of the week.

Dr. and Mrs. Curtis Basehoar, of Hyattsville, visited Dr. and Mrs. C. M. Benner, on Sunday.

We have a few subscriptions to The Record for sale, left over from Christmas. Why not use them as New Year's gifts?

Walter Fringer, of New York City, N. Y., spent the Christmas holidays with his mother, Mrs. Calvin T. Fringer and family.

Mr. and Mrs. Lewis Boyd, grand-daughter, Virgie Boyd, spent Sunday with Mr. and Mrs. James Boyd and family, near Baltimore.

Master Phil Zentz is spending the Christmas holidays with his cousin, Miss Vivian Shoemaker at the home of Mr. O. T. Shoemaker.

Miss Roberta Young, student nurse at the City Hospital, Baltimore, spent the Christmas holidays with her par-ents, Mr. and Mrs. Charles Young, of near town.

A Christmas card from Prof. H. E. Slagen, dated St. Petersburg, Fla., says he and his wife are spending Christmas vacation there, or their fourth visit.

Mr. and Mrs. B. Walter Crapster, Mr. Claudius Long, Basil Crapster, and Wirt Crapster, spent Christmas Day with Mr. and Mrs. Guy A. Ourand, in Washington, D. C.

Mrs. W. W. Witherow entertained at dinner on Sunday: Dr. and Mrs. Lester Witherow, of Harrisburg; Miss Grace Witherow, of Washington, D. C. and Miss Minnie Allison, of town.

Samuel Hill and family who had lived in the tenant house on the Crabbs farm, for 29 years, removed on Thursday to the former George M. Fogle, property near the Emmitsburg road.

The community carol singing which was accompanied by Miss Millred Baumgardner with the trumpet, on the streets Christmas morning was very much enjoyed especially the shut-ins, as that was the only Christmas singing a great many had the opportunity to hear.

Miss Catherine Forncy, William Forney, Roland Forney and Mr. ard Mrs. Lloyd Bollinger were entertained at a turkey dinner at the home of returned shortly before 5 o'clock. He Dr. and Mrs. C. L. Strailey and family, of Blossburg, Pa., on Christmas Day. They also visited State Teachers College in Mansfield, Pa. Day.

EMMITSBURG WANTS NEW P. O. Strong Efforts made for a Federal Project Building.

Emmitsburg citizens and organiza-Emmitsburg citizens and organiza-tions are urging strong pleas that the town needs a government building project, on the grounds that it has a population of 1300, and postal reve-nue sufficient to justify their claims. The proximity of Mt. St. Mary's College, St. Joseph's College and St. Eunhemia's School are supporting the

Euphemia's School are supporting the effort, because of their large Postof-fice patronage, in addition to that of the town itself.

A largely signed petition and letters from influential citizens are being prepared for presentation with the claim, and of course political leaders, local and otherwise, are confidently expected to help push the project through to a successful conclusion.

H. P. GORSUCH COMMENDED.

The Record is glad to publish the following letter of appreciation. We were not aware of the generosity of Mr. Gorsuch, but well know that he was quite equal to doing such a fine act without parading it. December 21, 1937.

Mr. H. Peyton Gorsuch, Westminster, Maryland. Dear Mr. Gorsuch:

Recognizing, as we do, the motive which prompted you to honor and re-spect the memory of all Carroll coun-tians, both living and dead, who serv-ed in the wars in which our country has been engaged, we, Carroll Post No. 31, The American Legion, at its meeting of this date, desire to con-vey to you our deep admiration for this most commendable "War Memo-rial" which you have had erected. By creating this splendid Memorial

By erecting this splendid Memorial, you will keep before this community, now and forever, a most fitting tri-bute to the cause for which it was donated.

'Carroll County certainly will never forget your untiring endeavors during war days.

May we, therefore, as World War Veterans, express our appreciation. CARROLL POST NO. 31, The American Legion.

The American Legion. By the Committee: GUY F. FOWLER, Chairman, LLOYD A. BOWKER. HERMAN F. GREEN. Mr. Gorsuch, on Monday, formally presented the memorial to the County, through the County Commissioners, the care of same to be in charge of the Mayor and City Council, of West-minster. Members officially repre-senting both bodies, accepted the gift and trust. Resolutions were formally passed accepting the gift. -11-

SUICIDE AT WESTMINSTER.

Earl Miller, of Ladiesburg, a truck driver aged about 50 years, was found dead early Tuesday morning hanging from a rope on the second floor of a vacant store room at the Koontz

CHAMBER OF COMMERCE TO EQUALIZE TEACHERS' PAY MONTHLY MEETING. White and Negro Teachers Must be

Reports Made on Various Christmas Activities.

The Taneytown Chamber of Commerce met in regular session in the Firemen's Building in Taneytown on Monday evening, Dec. 27, 1937, at 7:30 P M., Merwyn C. Fuss, presiding. There were 26 members present.

The minutes of the November meeting were read, and approved as read. President Fuss reported for the program committee a successful Christmas celebration. C. G. Bowers reported for the treat committee to the effect that 550 treats had been furnished. David Smith reported for Board of Education has been advised, the soliciting committee to the effect that \$206.50 would be realized from the program advertisement when all agreement has been reached, through was paid.

There followed a general discussion on the matter of the Christmas cele-bration, with the following suggescal levies to accomplish this, in part, tions for the several committees for for the next school year. the next year: It was suggested first that due to information received that the Opera House could not safely accommodate as large a crowd as at-tended the drawing this year, and that the High School building be consider-Forsythe, Jr., as Associate Judge of the Fifth Judicial District of Ma-ryland, of which Carroll County is a ed for the drawing.

With regard to the drawing, it was further suggested that it be held ear-lier in the week, and that tickets for the same be distributed three weeks before Christmas. It was suggested also that the whole Christmas celebration be planned for in the Octo-ber meeting, also that it be advertised by posters in addition to the program sent through the mail.

Treasurer reported that the treat would cost \$55.73; further that of the \$206.50 from advertising, \$38.50 is

still outstanding. It was moved and passed that the lights and equipment for street deco-rations be kept in the town and be used only for Christmas decorations. It was moved and passed that cards be sent out notifying members of meetings, further that stock cards be

printed for the same. The matter of bad roads in the vi-cinity was stressed. It was moved and passed that a committee contact

Mrs. Brown, WPA worker about com-pleting the Middleburg road as a WPA day evening. Devotions were in charge of the pastor. Games were played which were the occasion of project, and that same committee contact County Commissioners about further work on Uniontown road.

Speeches by new members, Skiles and Coolidge.

Adjournment 9:00 P. M. MERWYN C. FUSS, President PAUL D. EMENHEISER, Sec'y.

PRIESTLAND SCHOOL HOUSE BURNED.

The former Priestland school house on the road between Linwood and McKinstrys Mills, was destroyed by fire, last Sunday night. The building had not been used for school purposes

BOARD OF EDUCATION SPECIAL REPORT.

Of General Interest to School Patrons and Others.

The Board of Education has published a very extensive report, pursu-ant to the State School law, covering the work for the school year 1936-1937. It is too lengthy for our use, but we shall try to give the main facts of interest, in brief.

The administrative force consists of a Board of Education appointed by the Governor, one member each year, and the meetings are held on the first Tuesday of each month in the

Court House. There were 22 men and 109 women employed as teachers in white ele-mentary schools, and 32 men and 45 women taught in the high schools. There were 15 teachers, high and elementary in the colored schools, a total of 223.

A total of 3803 pupils were trans-

From the State Carroll County\$194.205.96 Unexpended Balance 14,247.36

\$473,498.94

Unexpended balance\$ 6,815.38 School buildings and contents are valued at \$1,149,678.77, insured for \$889,750.00. Value of property per pupil \$88.50.

In 1935, \$200,000 was borrowed on the construction account, of which \$80,000 is placed in the budget for 1937-38, leaving a balance of \$79,000 due on the total borrowed.

There follows a comprehensive summary of financial reports, show-ing in more definite form per-capita and other costs.

There is also given a description of the courses, High School and Elementary.

There were 267 boys and girls gradated in 1937, the persistence toward graduation being 47.8% for boys and 59.5% for girls, ranking eighth in the state, according to the state re-

port for 1935-36. Then follows in conclusion the fol-lowing list of objectives for 1937-38. 1—A. P. T. A., in every school. 2—County-wide Council of Parent-Toocher

and Mrs. Champ Zumbrun; Mr. and Mrs. Harry Kuhns and daughter, Ruthanna; Rev. and Mrs. John S. Hol-lenbach and children, John S., Jr., Alice and Katherine; Mr. and Mrs. T. Saugusa; Mr. and Mrs. Renest Bril-hart and daughter, Marilyn; Mr. and Mrs. Clarence Brilhart; Mr. and Mrs. Claude Hann and children. Stanley Teachers organized and functioning. Claude Hann and children, Stanley and Charlotte; Mrs. Harvey Hann and 3-Continued efforts to articulate

the high school and the elementary school in order that the child's growth may be continuous one from the first grade through the eleventh. 4—A study of the age-grade sit-uation in each school with appropriate steps to place each pupil where he is best fitted socially, chronologically, physically and educationally. 5—Increased efforts to adjust the work of the various subjects to the varying levels of the pupils of each

MOST DANGEROUS DRIVERS FROM 19 TO 22 YEARS.

Motorists aged from 19 to 22 years kill twice as many persons, including themselves in proportion to their number is indicated by a study just completed by the Highway Research Board for the Bureau of Roads.

Drivers from 16 to 18 come next, and those of 23 to 25 are third. These figures are based largely on complete figures for Connecticut, and cover five years reports. The 19 to 22 group also shows more arrests for speeding.

The safest age group was from 46 to 55 years which may be partly due to the fact that they do lest driving. The report as a whole shows that young drivers to be the most danger-

The survey will be made to cover the whole country, and in due time will be submitted to Congress.

IMPORTANT NOTICE TO MOTORISTS.

We do not know how many owners there may be, within the area of the circulation of The Record in Maryland who have not yet re-registered their motor vehicles. If you have not reregistered under the new law, you can do so after January 1 without being subject to fine; and take the driving test at a cost of \$3.50.

According to Senate Bill No. 1— Chapter 11, of the special session— General Assembly of a 1937 Re-regis-tration operators Article No. 56,

tration operators Article No. 50, Section 188—A, "All Motor Vehicle Operators are required to Re-register, providing you secured your original operator's li-cense prior to January 1st., 1937. On and after January 1st., 1938. All licenses issued prior to January 1st., 1997. chell be null and yoid." 1937, shall be null and void."

Approximate number of operators to re-register, 450,000. Total applications received this

week 24,816.

Total number of applications re-ceived to date 343,238. Total number of Motor vehicle op-

erators that have failed to make ap-plication to Dec. 21, 106,762.

THE DANGEROUS WALKER.

"Dangerous walking" is inseparable from the auto-accident situation. Authentic information indicates that 55 percent of all pedestrian deaths are due in some measure to the fault of the pedestrian. In these cases, the walker isn't the innocent victim he is usually pictured, but definitely contributes to his own doom The National Safety Council sug-

gests five simple and practical things the pedestrian can due to keep the Dark Angel at a safe distance:

First, obey traffic signals the same as good drivers do. Second, learn the laws and ordi-

nances in effect in state and city to regulate traffic from the pedestrian's point of view-his rights and his du-

Third, having done this, the pedestrian is in a po better acceptance of their obligations. by drivers. Fourth, take a greater interest in traffic problems, and especially in the placement and operation of traffic signals and pedestrian islands. Fifth, it will be found through these studies that major reductions in the number and severity of acci-dents to pedestrians can be easily achieved. The man on foot must contribute his share to the cause of safety, as well as the man at the wheel. pedestrians believe they should be allowed to commit almost any traffic error. The sad results of that notion are found in the daily accident fig-

necessity to eliminate the discrimina-tion between the pay of white and negro teachers, and will take prelim-inary steps to correct the present inequality, and they will be brought before the next legislature. Legal action to force payment of equal minimum salaries has been taken in two counties on the ground that the school law, because of its dis-crimination between white and negro

AMERICAN LEGION SERVICE IN PRESBYTERIAN CHURCH.

The officers and members of Hes-son-Snider Post No. 120, and the Boy Scout troops sponsored by them, are invited to attend services in the Presbyterian Church, Taneytown, this Sunday, Jan. 2, at 7:80 P. M. Rev. Irvin Morris will bring a special message for the occasion. Efforts are being made to have a guest soloist. The public is invited.

"You know, you're not a bad looking girl.

"Oh, you'd say so even if you didn't

for a good many years, and was recently sold by the County School Board.

This school, some 60 years ago, was largely attended. Priestland was originally a log school house, but some 65 years ago was replaced by a brick building, after which it was called "Priestland Academy."

In later years it had been used by colored people for various purposes and at the time of the fire contained furniture belonging to a colored family, but was otherwise unoccupied. The Union Bridge Fire Company was called but was unable to save the building. It is believed that the building had been entered through a window, and purposely or accidentally set on fire.

UNIONTOWN FEATURED BY BENTZTOWN BARD.

Two very interesting illustrated sketches by the Bentztown Bard, featuring Uniontown, appeared in the Baltimore Sun, last Thursday and Friday. We are sure they were locally appreciated very highly.

We gave the articles a scissors treatment and furnished them to George Edward Waltz, Plainfield, N. J., a former Uniontown boy, and an entertaining newspaper writer on his own account.

An interesting account of the old Linwood Camp has been supplied to us by Mr. Waltz. It will appear in three instalments, the first of which appears in this issue. It will be of special interest to Uniontown and Linwood vicinity readers.

WEEK OF PRAYER AT MANCHESTER.

The Protestant Churches of Man-chester will oyserve the Week of Prayer, Sunday, Jan. 2 to Jan. 9, excluding Saturday night. Sunday meet-ings will be at 7:30 P. M., and week-day meetings at 7:15 P. M., to enable folks to attend worship and still take care of other organizational meet-ings. The pastors trust all individ-uals and organizations will co-operate in this matter. The three local ministers will each preach once and each denomination will have a visiting minister.

On Wednesday evening a missionary of the Lutheran Church will preach.

On Thursday evening, Rev. Dr. E. M. Sando, pastor of the West Manheim Reformed Charge will preach. At this writing we hope to have Prof. W. L. Hawkins, of New Windsor have

"We're even then. You'd think so even if I didn't say so."—Grit.

daughter, Dorothy; Mrs. E. O. Alcorn and daughter, Beth; Mrs. Robert M. daug Rober Shower; Mr. Hickman Myers, Mrs. Luther Haines and children, Katherine and Burnell; Agnes Miller and Lewis Erb.

-11-ATT'Y GEN. O'CONOR WARNS AGAINST DANGERS.

Attorney General Herbert O'Conor one of the Democratic candidates for Governor, in an address at Hagerstown, Tuesday night, scored foreign influences, such as Socialism and Communism as in conflict with constitutional liberty, as safeguarded by our form of government. He approved the humanitarian prin-

ciples underlying Social Security and unemployment insurance, but warned against the insidious doctrines that sometimes follow such efforts when carried too far.

He strongly warned his audience against being carried away from the old safe moorings of self-government and civil liberty.

His address was delivered before the Lion's Club of Hagerstown. -11-

SPRINGFIELD EMPLOYEES.

Of a total of 403 employees at Springfield State Hospital, 359 or 89.1 per cent are Maryland residents and only 44 or 10.9 per cent are from out-of-State, according to a report submitted by Harry C. Jones, State Employment Commissioner, to State Senator J. David Baile of Carroll County. The number from this county was placed at 240 or 59.5 per cent

Senator Baile explains that for several years complaints had come to him that out-of-State and out-ofcounty employees predominate at the Hospital.

Commencing on the report of Mr. Jones, which refuted these complaints, Senator Baile said he should like to see an even larger percentage from Carroll county, with practically none from out of State.

The roster of employees of Springfield Hospital, as reported by Mr. Jones, is as follows:

Maryland-Baltimore City, 41; Allegany county, 2; Anne Arundel, 4; Baltimore, 8; Calvert, 3; Caroline, 1; Carroll, 240; Cecil, 1; Dorchester, 2; Frederick, 11; Harford, 1; Howard, 22; Kent, 4; Montgomery, 5; Prince

George's, 9; Queen Anne's, 1; Somer-set, 2; Wicomico, 1; Worcester, 1. Out-of-State—New Jersey, 1; North Carolina, 15; Virginia, 8; Canada, 2; Pennsylvania, 10; Georgia, 2; South Carolina, 1; Delaware, 1; Arkansas, 1; New York, 2; Minnesota, 1.—

some are saying I'm glad it comes year, which is about a fair exchange but once a year.

grade or year. 6—To make a maximum use of the test results secured throughout the year.

7-Every pupil receiving instruction and practice in habits of safety. 8-To continue the ground work for our course of study construction through developing a working phil-osophy of education and getting a ures. point of view concerning the various subject matter fields and their relationships:

a. General meetings of all teachers: discussions and lectures in fields of social science, natural language, arts, and science. mathematics.

- b. Study of present allocation of the subject matter fields by com-mittees of high school and elementary teachers.
- c. Faculty meetings on topics pertaining to course of study construction.

9-Each teacher adding to the science materials to be used for teach-

ing the units for her grade or year. 10—Each elementary school to include in its art program a variety of materials and types—water color, cut-out, block printing, pen and ink, crapon, calcimine; and carefully planned work to develop appreciation through integrating music, poetry, and art.

11-Increased efforts to beautify the interior and exterior of our schools:

a. Artistic arrangement of work, materials, equipment, etc.

b. Clean school grounds. c. Trees, shrubbery, flowers, etc. d. Large copies of art master-pieces in classrooms, libraries, and halls.

12-Each teacher to become acquainted with and make a maximum use of all available teaching materials:

a. Conference Room librarybooks, pictures, records, etc. b. Central school library.

c. Classroom library.

13-Each school to improve its attendance record of last year and each teacher to assume more responsibility for the attendance problems of her

Random Thoughts

THE NEW YEAR.

New Year's day is merely a date on our calendar—the first day of a twelve months to comewhich for sake of regularity we call a year, with January as the first month.

Possibly the most serious thought connected with the opening of a new year is, that we have ended an old year that we can not recall, but which goes down into time as the passing of a year more of life.

It is a year gone, of opportunity —a record of individual acts—and must so stand beyond our recall. And this "opportunity" is one of the greatest gifts of God, largely to use as we elect as more or less free agents.

So far as we are individually concerned, we actually start, each day, another year of 365 days. Time steadily goes on in its flight regardless of man-made calen-dars—we simply live, move and have being, not knowing when, nor how, life will end for us.

Our so-called New Year's Day is as good a day as any other in which to make good resolutions, and these self-made resolutions should be made and kept as honestly with our own mind and con-sciences, as we would if we entered into any bond or agreement, of

any other sort whatsoever. We say sometimes "our word is as good as our bond." Perhaps it is—perhaps not. At any rate we need to be mindful of the fact that every day is a day of oppor-tunity, for which we should be supremely thankful to the Great Giver of all good. P. B. E.

FRIDAY, DECEMBER 31, 1937.

WHAT OF 1938?

There is no use in foreboding trouble, as we are apt to do when we can not see nor hear clearly. It is the unknown that we often magnify, and fear. This is true of cases of deep darkness and uncertainty, even in our best known and regulated homes.

In such cases, caution and going slowly, are virtues to practice. Unquestionably, there are more problems and dangers of a serious character facing us than usual. In fact, even long recollection and history, do not seem to record anything like the future now facing us, but even so, as the old saying goes, "all is not lost that is in danger."

In addition to the muddle that our own governmental affairs have gotten into, we have the European chess board to think seriously about, for the reason that as one of the great world powers we must not imagine that we can keep entirely out of it.

And, we must not lose confidence in our own government, criticise it, we may, and should as a government by the people. If the latter turn sane-minded and unselfish, the government will do the same important thing.

What we need to do, as a prime movement for safety, is to elect-if we can-safe and sane men to Congress. Treasury raiders for self-interest and continued power, must be left at home, where many of them should have been during the past few years.

Our highest Courts must maintain their integrity, unafraid. Treasury robbers are rabid enemies to good

now if they thought they would have another crack at them at the next

After all, the wage-hour and farm oills were two reasons why the special session was called, and to end the special session without final action on either would be a complete admission of defeat of the program. And the legislative program, incidentally, is the same program which was put before the regular session which met in January a year ago.

In a period when the key to recovery seems to be the restoration of confidence on all sides, Washington news writers heard with interest the recent offer by the Congress of American Industry in its New York meeting to talk things over frankly and fully with government. And the correspondents were equally interested in the official Washington silence which met that offer. What little official Washington comment there was consisted largely of sniping at various points in the industrial program rather than an answer to the offer to co-operate.

The famed "anti-lynching" bill is being used as a bogey man to frighten little Senators. The farm bill was moved forward in the Senate by at least a tacit threat: "If you don't push this bill, we'll make you vote on the anti-lynching bill."

And when and if the wage-hour bill reaches the Senate the same tactics will be used. Some folks wonder why the frightened little Senators don't realize that no matter how long they put it off, the anti-lynching bill will eventually be put to a vote. And private polls indicate it has more than enough votes to pass, especially since more and more members are saying they might as well vote for it because it can't be enforced anyhow .--- Industrial News Service.

ROTTEN TO THE CORE.

That the practice of exempting state and federal employes from state and federal taxes has grown into a national "racket" is becoming more and more apparent is shown by renewed agitation now going on throughout the country. New facts are coming out concerning it, and the public is getting its eyes open.

"Why should a man be exempt from state taxes because he holds a state job or from the federal income tax because he holds a government job?" That is the question taxpayers are commencing to ask, and as the subject becomes more widely discussed the demand for an answer to that question becomes more insistent.

Here, as most people view it, is something that should be looked into, and all facts in connection with it given the fullest publicity. The laws or the regulations under which a government. The rabid of all classes certain set of citizens can escape -wherever found and how occupied- taxation which other classes of citizens must face, and pay, should be made plain to everyone. For here, as the average taxpayer s commencing to see it, is a practice that is rotten to the core .- Exchange,

mania? Will a wildcat scratch? Will Will a fish a fox steal a chicken? Will a fish hawk ketch a fish? Will a coyote kill a lamb?"

"But if they attack the United States the Russians might interfere," suggested the reporter.

"Them Rooshians," replied O. G., "would still be busy holding unani-mous elections and bumping off their non-union members with sharpshooters. If Russia would take even so much as a potshot at Japan the Hit-lerites would attack the Rooshian rear

"But that would draw the French into it," said the reporter. "Mussolini would attend to them,"

O. G. replied "What would England do?" asked

the reporter. "Them English," replied O. G., "would no doubt manage to sell a lot-ta stuff to all sides and then the cab-inet members would adjourn to go to the country for the week-end. They be a canny lot—them English—espec-ially when they be helped by the Scotch and the Welsh." "And the Irish?" queried the re-

porter.

"I reckoned they would all emigrate to Spain where they could find per-manent fighting," O. G. replied. "What do you think the Americans should do about the Japanese 'ques-

asked the reporter. tion?'

Oil Industry Enlists Radio Aids

By J. F. Witkowski Principal, School of Radio, International Correspondence Schools ONE of the indispensable pillars of our industrial civilization is the petroleum industry. Without the motor fuels and lubricants the industry provides, our ships, our trains, our automobiles and trucks, the machines in our factories would be useless masses of metal — and without the aid of the radio the efficiency of the industry in supply ing its essential products would be seriously impaired.

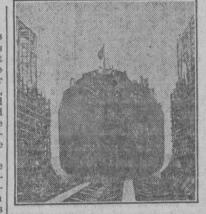

During the course of a single month oil tankers flying the Ameri-can flag will unload 5,000,000 barrels of gasoline and other petroleum products at our ports. Known as the perpetual motion machines of the ocean because they spend ninetenths of their time at sea, their efficient use depends upon the skill

of the dispatcher in keeping his company's fleet almost constantly on the move, With one dispatcher sometimes responsible for as many as twenty tankers scattered over the globe, only the modern perfection of radio communication en- ence of the most skillfully buried ables him to perform his task.

Recently developed ship-to-shoreradio telephone communication be-tween tidewater refineries and the with in the pipe line transportation refineries' tugs has also contributed of petroleum products. The device to the smooth operation of the tanker fleet. Installation of these systems has made it possible to cut down to a matter of seconds the hours which formerly might be re-in the line and pushed along by the quired to get in touch with a tug after it had left the dock and was needed at some particular point in Ground crews carrying two-way the port. Tugs can be kept operat-ing in foggy weather which would otherwise make their operation vice sticks, bumper go-devils are virtually impossible. [®]In some sections of the country this fails, emergency crews are theft from oil companies' pipe lines called by radio to cut open the line. by tapping is a serious problem. remove the accumulated deposits,

GET RID

do not belong in America.

Every class must be given a square-deal, whether capitalistic, professional, factory or other workers, or the great unorganized-as yetclass, known as the common people.

Absolute equality or prosperity can not be accomplished because all people are not equal, mentally, morally or industrially. There are "Ne'er do wells," and always will be. There will be honest men and works, good managers and spend-thrifts; and always will be.

There is a big job ahead for 1938. It can be the beginning of a cleaning up and a convalescence, as it were. But in the nature of things, getting well requires a longer time than getting sick. And make no mistake about it-we need some new doctors from another school.

-11-WAGES AND HOURS BILL.

The Special Session did at least one good act-it turned back the proposed "hours and wages" bill. So now it is an inheritance for the regular session that will soon convene.

Out of our plentiful supply of dumbness, we predict that, should the regular session pass such a bill, it will be vetoed by the Supreme Court.

Fixing prices was the heart of the vetoed NRA. Consistency on the part of the Court requires that the same attempt-only in a new dressrequires the same veto.

We will see what we will see, but this is our dumb philosophy.

WASHINGTON SNAPSHOTS.

The ways of Washington's politicians are sometimes mystifying to the uninitiated. Take, for instance, the recent "private" admissions by Congressional leaders that they did not intend to finally pass the farm and wage-hour bills in the special sessions but just to get them into conference between the House and Senate for consideration at the regular January session.

Actually, the leaders had no intention of letting the two bills stop at that stage. All they were trying to do was win votes from some members who were doubtful about the

_____ "OLD GROUCH" ON THE WAR SITUATION.

"Old Grouch," of "Snake Hollow," who is the whole works for that snappy little paper The Observer, Baltimore, in the last issue gives an "interview" on the European situation, that may be more than half true; and we are repeating it, without special permission, as we have failed to notice any "copyright" restriction. Here it is, in large part.

"Them durn crazy Japs have got it in their noodles they can rule the world," he continued, "and they now be in need of a setback. They have did jest what mought have been suspected of sech crazy people. They shot the British ambassador and got off with a apology to them skeered Englishmen who have been backed almost off the map by that blustering Mussolini. Then they bombshelled a Yankee gunboat after writing apology in advance so as to be able to hand it out quick. But this time I reckon they was jest a leetle bit too soon. It was too quick to be on the level. If they could shoot the British ambassador by an erroneous mistake why couldn't they do the same identical thing with a leetle Yankee gun-boat? Why would the Yankee com-plain so long as they had plenty of second hand gunboats left and a lotta contractors ready and ambitious to build another gunboat at a good profit?

"But the Japanese people profess to be very sorry about the incident," said the reporter.

"Alligator tears," O. G. retorted. "What they be sorry for is that the Yankees don't take no stock in their fake apologies. Anybody who is wise enough to know the difference between a cat and a catfish should oughta know that if they can conquer the Chinese and set up a puppy govern-ment like they done in Manchukuo they will then make a lotta new bombshells to attack your Uncle Samuel as soon as possible while they have got a army and navy in train-

"You really think they would attack the United States?" asked the reporter

"Did you ever discover a fool as wouldn't do a durn foolish thing?" retorted O. G. "Did you ever see a bills but who might vote for them maniac so sensible he didn't have a

cases, white tablecloths or white goods of any kind for a length of time, wrap them in blue paper or blue cloth to prevent them attaining a yellowish tinge.

Student Invents Machine

to Speed Mathematics Sydney, N. S. W.-A machine that promises to be of great value to the world's scientists and engineers has been invented by a young research physicist at Sydney university.

Simply by tracing curves on a sheet of paper, it reduces to a matter of hours complicated mathematical solutions that by ordinary methods would take perhaps as many weeks.

The machine can be adapted to solve rapidly problems of railway engineering and bridge construction, range tables for heavy artillery, statistical and economic investigations, physics, bacteriology, or electrical research.

It can add up the total of three quantities (numbers) which are continuously varying, so that the total 12-17-5t itself keeps changing. By ordinary mathematical methods this might require weeks of tedious labor.

"What Is a Wrestler?" Has U. S. on the Mat Washington, D. C .- The question of when and what is a wrest-

ler has been considered by the internal revenue bureau without any startling success. The bureau decided:

"The wrestler is engaged in a distinct occupation or business of his own, is engaged only for a short period of time and is paid by the job."

The bureau exempted wrestling promoters from social security taxes on the theory that the promoters have no control "over the skill of a wrestler or over the instrumentalities, tools and place of work."

Campbell had always been friends until Miss Mattie claimed Miss Addie's dog chased, her cat and tore up her flowers. The fence was built and the boundary line of the two places ran so close to Miss Addie's gooseberry bush that some of the branches of

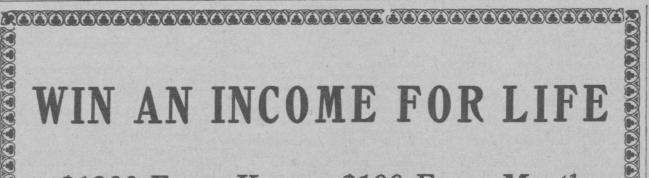

The Jar Had Held Candied Ginger in Miss Addie's Childhood.

the bush hung over the fence. The bush belonged to Miss Addie but the fruit on Miss Mattie's side of the fence Miss Mattie claimed. So Miss Addie picked the fruit on her side of the fence and Miss Mattie that on hers.

Last summer, being sure that Miss Mattie was away from home, Miss Addie went in through the rear gate and picked the fruit on Miss Mattie's side of the fence. The jam in the jar before her, which she had taken down from the shelf for her supper that cold New Year's eve was from that fruit. The jar had held candied ginger in Miss Addie's childhood and she recalled how she and little Mattie had eaten the ginger from it. She recalled that she and Mattie had picked gooseberries from a bush which grew near the place where the bush which had caused so much trouble now grew. She recalled the many happy times she and Miss Mattie had spent together—the times when Miss Mattie had been a real friend in need-had helped to ease some hurt or lighten some sorrow. What a pity it seemed that such friendship should ever be broken. Miss Addie's dog had been given away long ago, and Miss Mattie's cat had wandered away from home and never returned. With the two original causes of the trouble gone, wasn't it too bad for one-time to remain enemies? friends Wouldn't it be better to turn over a new leaf this New Year's day and renew their friendship?

It seemed so to Miss Addie and

THE EXPRESSION "THUMBS DOWN" WAS ORIGINATED .--"Thumbs down" denotes disapproval and "thumbs up" approvnese p of the gladiatorial combats by the ancient Romans for entertainment. The spectators were permitted to decide whether a vanquished gladiator should be put to death. If they held their thumbs down, it was a sign that the gladiator should be slain; if they held their thumbs up (or inclosed them in their fists, as some writers say), it was a sign that his life should be spared. Jean Leon Gerome, the French artist, painted a picture of the gladiators. The victor in the contest is shown standing over his victim and looking toward the spectators for their verdict. They are represented with their thumbs down, which means that the defeated gladiator must die. An eminent philologist says on this subject:

Household Hints By BETTY WELLS

"OH YES," the real estate agent U added, "and there's a lava-tory on the first floor, too!" But he failed to tell the prospect that it was small, cold and rather bleak and that if she had any ideas about a powder room she'd better forget them immediately. But, you see, his client took the house-and because she's forthright and clever, that downstairs lavatory which seemed pretty hopeless has become a charming little corner of her home.

There wasn't much there to work with. The room was merely a closet with a tiny window. There wasn't room for an attractively gay dress-ing table and the plumbing fixtures were not of the latest design. The walls had tan trouble and the woodwork was dark and forbidding. It was, in short, a convenience but an eyesore.

First an evening or two was spent sandpapering the dark woodwork. Then woodwork and walls and the inside of the door were painted a

It Sounded Very Glowing.

deep, rich blue. Red and blue lino-leum was placed on the floor. A red chenille cover was placed on the bowl seat. Red cording was tacked in loops around the molding with red tassels hanging down from every second loop. A red and white child's drum was used as shade for the ceiling light and the small window was curtained gaily with redand-white striped percale.

Since lack of space prohibited any sort of dressing table, a mirror no longer in use was stripped of its frame, recut and screwed to the one available wall. Under the mirror a small glass shelf, its brackets painted red, served to hold powder, individual puffs and the like. A glass rack was attached to the back of the door for gay red and blue guest towels.

Of course, the obvious reason for the dark walls can be seen by any homemaker with small children. A downstairs powder room is apt to get a great deal of wear and tear from the younger members of the family. No smudged finger marks can show very much on dark blue walls, yet the entire effect of this powder room is one of smartness and chic. And the cost was infinitesimal!

Harbor Seal Best Known of All Marine Mammals

One of the best known and most frequently seen of all marine mammals is the harbor seal. This is so because it has the widest geograph-ic range of any seal. It is found in the Pacific from the coast of Japan north of Siberia, and south along the American coast to Lower California, writes Colin Campbell Danborn in Field Museum News. In the At-lantic it occurs from about New York to Greenland, and from Spain, through the British Isles, to the Scandinavian peninsula. A coast inhabiting species, it lives in fords and near rocky points, islets and sand bars. Often it enters the larger rivers and bays. Its appearance in these latter places, frequently as much as a hundred miles from the sea, accounts for its having been named "harbor seal." It was described and pictured by writers and artists as early as the middle of the Sixteenth century.

The harbor seal is the smallest member of the family Phocidae, which comprises the true or earless seals. In these, the hind flippers form functionally part of the tail, and are useless for progression on land.

Harbor seals never exceed six feet in length. Large ones weigh between eighty and one hundred pounds. They do not gather in such large herds as other speciesseldom are more than twenty-five found together. They are also less migratory, usually living in the same place throughout the year if weather and food conditions permit. A few come south along the New England coast each winter.

The coats of harbor seals are extremely varied in color. The fur of some is uniformly yellowish-gray or dark gray; others have the yellowish coat with irregular dark spots, or the dark coat with yellowish spots.

Gypsies Count in Greek,

Speak Many Greek Words The fact that gypsies all over the world count in Greek and use numerous Greek words further substantiates the theory of their early arrival in the Balkan region. For "seven, eight, nine, ten" gypsies say "efta, ofto, enea, deca." In Macedonia at this period also were numerous Phoenician and Egyptian slaves who worked in Alexander's arsenals

Undoubtedly the gypsies intermarried to some extent with the Egyptians, notes a writer in the Chicago Tribune, and when their descendants later set forth on their wanderings, still trying to forget their miserable days in India, they told people that they were from Egypt. Their tendency toward sleight-of-hand, fortune telling, and other magic which Europeans associated with Egypt undoubtedly gave them their most usual name of gypsies. Pharons (from Pharaohs) another of their appellations. Their association with Rumanians probably accounts for the names Rom and Romany, so frequently applied to them. Other names for gypsies are Gitanos, Zingaries, Calos, Bohemians, Tziganes, Zigeuner, Czigany.

she resolved not to waste another minute, but do it right away! So with a jar of jam in her hand and love in her heart she went to wish Miss Mattie a happy New Year. © Western Newspaper Union

Watch Night

On New Year's eve midnight masses and watchnight services are held everywhere, while those less inclined to religious observances make the closing minutes of the year an occasion for jollity.

How Bamboo Is Used in Houses The Orientals use large sections of bamboo for posts, and split stems for rafters, roofing, and floor planks. The hard outer layers are used for mats and lattices. The fibers are used in tying the fitted sections together.

How Women Rate

R

Throughout the United States there are 402 women multi-millionaires, 2,034 women millionaires, 3,545 women worth \$500,000 or more, 4,908 women worth \$250,000 or more, and 15,014 women with assets of \$100,000 or more.

Outbreaks of Colds.

By T. T. Brown, Extension Poultry Special-ist, North Carolina State College. WNU Service.

Drafts are a source of danger to poultry. The birds need ample air circulation in their houses, but they should not be exposed to direct drafts and dampness, as this frequently results in outbreaks of colds or bronchitis, and sometimes sorehead or pox, if the birds have not been vaccinated.

Birds should not be crowded in the laying house. There should be at least four square feet of floor space for each bird.

Overcrowded birds develop a higher percentage of culls, lay fewer and smaller eggs, and are more susceptible to disease.

Feed a high quality laying mashyou get more for your money when you buy a good mash. Check a few pullets occasionally for body weight and regulate the grain feed accordingly.

Keep pullets separated from older hens, as pullets need more grain to build up body weight, and cannot be fed properly when mixed with the older and bigger hens.

Birds that molt late and keep up a good egg production should be marked with colored legbands so they can be selected for breeding purposes.

If you do not plan to buy good chicks from a reliable hatchery, you should arrange to breed only your best birds, as that is the only way you can build up a good, profitable flock.

How to Remove Cistern Odor

Usually, cisterns should be cleaned once a year and thoroughly washed down so that slime does not collect on the walls. If the odor is present, it can be removed or at least greatly helped by putting about 50 pounds of charcoal broken up into small lumps in a flour sack. Tie the top of the sack and hang it in the cistern, moving it about occasionally during a day or two, after which it can be removed. The charcoal will absorb a good many of the tastes and odors of the cistern water.

"The thumb symbolizes the short Roman sword, and the gesture which meant death to the vanquished gladiator was given by turning the hand over into an unnatural position, with the thumb pointing at the defeated man.'

Pullets Suffer From Colds As colds are usually caused by

poor ventilation, over-crowding, and a poor feeding schedule, these conditions should be carefully checked and the errors corrected. All birds showing symptoms of colds such as a nasal discharge or foamy eyes should be isolated at once. The flock should be given Epsom salts at the rate of one-half pound of salts to three gallons of drinking water. Then the house and utensils should be thoroughly cleaned and disinfected. Where the disease is well established it is not economical to treat individuals and these should be destroyed. Keep a good germicide in the drinking water as long as there is evidence of the trouble, advises an authority at the North Carolina State college.

With the Farmers

Every state in the United States now has 4-H clubs.

Kentucky's poultry industry is valued at \$20,000,000.

Uncle Ab says eggs and white collars either are or aren't.

Malden-on-Hudson, N. Y .- Captain William Sallsten is building in this little village near Saugerties a sort of catamaran in which he expects to set sail for a two-and-ahalf-year trip by himself around the world.

For twelve years the forty-sixyear-old former sea captain has cherished the idea of making such a trip. Unsuccessful in persuading a crew of Filipinos to sail a catamaran across the Pacific to the United States, he built a four-foot model, studied it and planned a trip with himself as the entire crew.

Used mostly by the natives of the West and East Indies and along the coast of South America, a catamaran is a kind of raft or float, consisting of two or more logs or pieces of wood lashed together and moved by paddles or sails. Captain Sallsten's craft differs in that it consists of three canoes lashed side by side.

Covered with copper and the tops decked over with ply-wood, the two outside canoes are sixteen feet long. and the middle one twenty-five feet. The middle canoe has a tiny cabineight feet long, forty-one inches wide and twenty-four inches highjust enough room for Captain Sallsten to lie down in.

The craft will carry 350 square feet of sail.

"With this," said Captain Sallsten, "in a good stiff bracer, she should make twenty knots."

Where there isn't a "good stiff bracer" and when it does not seem absolutely futile, he will skull his craft, wiggling an oar much in the manner of a gondolier. So confident is he of his venture that he is not even taking a life preserver.

Captain Sallsten will have only a couple of books, a violin, a mouthorgan and a toy monkey mascot to amuse himself while tossing alone on the seas.

Evening Dress

A shipment of merchandise had just arrived at the general store. A big husky from the neighboring lumber camp was watching the unpacking.

"What's them things?" he asked, pointing to a package. "Pajamas," replied the clerk. "Pajamas. What's pajamas?"

"Night clothes. Want to buy a suit?"

"Gosh, no," replied the lumber-jack. "I don't go for society. When night comes, I go to bed."

Help, Please. "I'm a dud at arithmetic," said a woman golf champion who lives up the street from us. "So please help

me spend some money." Spending money isn't the trouble most of us have! However, everybody knows how it is to get enchanted with one piece of beauty and blow our whole budget on it with nothing left over for other more or less essentials. This particular lady has \$450 to spend refreshing her living room and dining room, which sounds like a munificent sum in these days. Her living room is

"I'm a Dud at Arithmetic."

12 by 20 with a stairway and a wide arch into the dining room. The walls are beige and the furniture is mahogany. Her lamps are white and gold. She wants to recover a threepiece overstuffed set, get new draperies, and have new floor covering. What, she asks, would we advise for the furniture covering? And would we recommend broadloom carpeting all the way to the wall, or should a border of floor be left all around? And should the same floor covering be used in the adjoining dining room? She has in mind dusty old green for the carpet and snuff brown for the sofa and wants our verdict on that.

If the house is rented, we wouldn't have the carpet to the wall as it would entail waste in moving it, but if the house belongs to the family then we'd like the carpet all the way to the wall. And we'd prefer the adjoining dining room to have the same floor covering if possible. Old green carpeting with a snuff sofa sounds lovely. Then have the two chairs in a figured material that picks up these colors but is predominantly old gold in effect. We'd like draperies in this same figured fabric over beige glass curtains.

© By Betty Wells.-WNU Service.

Duck Hawk Is Speedy

The duck hawk is the American version of the peregrine falcon of the falcon-hunting days of old. Its speed has been developed through centuries of pursuit for food. No bird is safe from this feathered destroyer. Sharp, cruel beak and tal-ons, plus speed, make it almost certain death for any other bird, no matter what the size of the prey. It kills for pure love of slaughter, dropping like a plummet on a flock of smaller birds, striking again and again, then winging off without even touching its kills.

The Cottonmouth Moccasin

The cottonmouth moccasin is one of the most venomous of United States snakes. It gets its name from the cotton-white inner lining of its mouth. Found in southeastern states, it is a cannibal, eats other snakes. In captivity, it outlives all other snakes. Though its poison kills when injected by the snake, that same venom is used to combat a blood disease of humans called "haemophilia," which is uncontrolled bleeding.

Cultivated Before 1519

The Mexicans had cultivated the dahlia before the Spaniards arrived. in 1519 but it was about 300 years later, in 1791, that the plants appeared in Europe, at the Botanic Gardens in Madrid, Spain. The newer forms have all been brought about since the year 1800. The native Mexican name of the dahlia was acocotli, which means water pipe and its present name is in honor of the famous Spanish botanist, Dr. Andreas Dahl.

Ancient Hygiene

While methods of disease transmission are discoveries of recent years, the Mosaic laws made provision against transmission that are similar to our own, but go a long, long way further. A person who touched an unclean animal or thing caught the uncleanness and had to wash himself and his clothing in running water, sometimes the cleansing lasting for many days.

Methodist Protestant-Mar. Luther Hiteshew; April 13, Dr. J. J. Meaver; June 23, J. White Dulbertson; July 2,, Clarence Davis.

HARNEY.

Services at St. Paul's Church, next Sabbath, Jan. 2, S. S., at 9:30. Ser-mon by the Rev. Herbert Schmidt, at 10:15.

Mr. and Mrs. H. J. Wolff, visited the former's sister, Mrs. L. Collins, at the West Side Hospital, York, on

Monday. Frank P. Reaver, Mrs. Harry Sprenkle and Atwood Hess, visited Mrs. Ida Reaver, at the Hanover Hos-

pital, Christmas day. Dilly Mort returned to his home

FEESERSBURG.

Gone again-another beautiful Christmas Day, with more than the usual amount of gifts, more decora-tion, more illumination, and if there's ever any more to eat we won't live to mention it. Yes, 'twas a great time of Love and Good will—beginning last week with S. S. services in the

churches and the carol singing on the street and over the air. Miss Ruth Utermahlen arrived at the C. S. Wolfe home Friday evening

to spend the holidays among relatives in this locality. Thro' her we are in receipt of a fine advertising catalogue from the Maryland Work Shop for the Blind, Baltimore, entitled, "Hands That See," giving views and explana-tions of their various kinds of handwork; but how they learn to do some of the hard things is marvelous to us, and worth one's attention and pa-

conage. Mrs. Lillie Birely Parker, her sister, Mrs. Robert Kemp with her chil-dren the Wm. Slemmer family, of Frederick, were Christmas morning callers at Grove Dale.

Mrs. Archie Eyler, now employed in Green Spring Valley, her daughter Mildred, living with a family at Eastview, and youngest son Tommy in a private home not far from his sister, were callers in our town on Sunday.

Mr. and Mrs. Ollie Plaine, Freder-ick, entertained their uncle, Washing-ton Shaffer on Christmas day, coming for him in the morning and returning him in the evening. Mr. and Mrs. Addison Koons had

their daughters and families, Mrs. Mollie Starner, Mrs. Rosa Koons Bohn, Mr. and Mrs. Franklin Koons,

for a turkey roast at Christmas. The Bucher John family spent Christmas with Mrs. John's brother and sisters—the Geiman family on College Hill, Westminster, who also entertained Mr. and Mrs. Frank Cunningham and attendant. Madelene John remained with her aunts, until Monday morning when Rebecca Ann Petry, irom near town, returned with her home for part of the holidays. The John's were with his sister, Eva

the Joseph Haines family of Linwood

on Sunday. The Maurice Grinder's entertained a family party of 17 persons including several friends on Christmas Day. Mrs. Emma Platt and Chas. Roach, of

York, cailed in the evening at the same place.

Mr. and Mrs. Clayton Beggs, of Baltimore, L. K. Birely and sisters, feasted with the Lowell Birely family for Christmas, but Santa had been there first.

All the Garner sisters, and their brother, Frank and wife, spent Christ-mas with their brother, Scott's famly, near Tyrone.

Miss Florence Garner was home with her sisters over the week-end. As general secretary of Federated Charities of Frederick City she pro-vided for 35 needy families at C. Mar. The boys and girls of the High School in 28 rooms took care of 28 families,

providing good dinner for all. A number of our folks attended the midnight mass in the Catholic church at Libertytown, on Christmas Eve, and were much impressed with the

The Christmas Service at Mt. Unon last Thursday evening was a very nice affair. The church was decorat-ed with balsam pine and colored candles. Rev. Kroh conducted the Devotional Service; two little maids, Caro-line Baker and Patsy Lee Bohn-knelt by a small manger and sang "Away in a Manger." The Christmas story was told by an adult; there were short recitation by the little folks and a play entitled Santa Claus IncorporatWOODBINE.

The Lutheran Church held their Christmas entertainment on Thursday ington. night. The choir rendered special music, and a beautiful Xmas pageant

dramatized under various colored lights was quite effective. Mr. and Mrs. Emil Swanson, sons Buddy and Carl, were dinner guests of Mr. and Mrs. Wm. Vanarsdale, of

Riverdale, Sunday.. Windsor Kessler who has been confined to his bed for a long period is

gradually growing weaker. Mr. and Mrs. Wesley Jenkins, of Taylorsville, are spending the holi-days with the former's son and wife, Mr. and Mrs. James Jenkins, Sr. Mr. and Mrs. Thomas Fleming en-

tertained their children Christmas day, on Sunday at their home who are as follows: Mr. and Mrs Roy Fleming, Baltimore; William and Thomas Fleming, of Washington.

Ernest Gosnell and Portia Crapster daughter of Mr. and Mrs. Mortimer Crapster, of Howard County were quietly married Monday night. Mrs. Gosnell is teacher in the elementary school at West Friendship. Mr. Gosnell is employed in the A. and P. Store, Mt. Airy. Mrs. Jane Chaney is spending the holidays with her relatives at Lans-

downe, Md.

Mr. and Mrs. Roger Samers, of Lisbon, were Sunday night guests of Mr. and Mrs. Herbert Baker.

Mr. and Mrs. Roland Gosnell, and daughter, Nannie, called on Mr. and Mrs. Alton Gosnell, Sunday night. Mr. and Mrs. Basil Gosnell entertained at an elaborate turkey dinner Christmas day. Following were the guests: Mr. and Mrs. Corwin Penn, Mt. Airy; Mr. and Mrs. Alton Gosnell son Kenneth and daughter, Betsy; Mr. and Mrs. Roland Gosnell and family, of Taylorsville; Ralph Gosnell and Ella Smith. Additional guests during the evening included Mr. and Mrs. Thomas Fox and son of Brentwood, Md

The Christmas Cantata was well rendered at Morgan Chapel Church, Friday night but the bad weather interferred with the attendance.

EMMITSBURG.

Mr. and Mrs. Frank Troxell, York, were visitors of Mrs. T.'s parents,Mr. and Mrs. Charles Keilholtz. Mr. and Mrs. W. Houser, spent Christmas Day in Philadelphia, Pa., with volctions

with relatives. Mrs. Harry Baker, Mrs. Emma Nunemaker, Miss Pauline Baker and Mr. George Ohler, visited Mr. and Mrs. Marker E. Lovell, near New Windsor, on Sunday afternoon.

Mr. and Mrs. Harry Hays, Prince-ton, N. Y., are visiting his mother, Mrs. T. Hays.

the holidays in New York. Edgar Barnes and wife, of Balti-more, spent the holidays here at J. E.

Barnes. Charles Wilson who has been sick

is improving slowly. Misses Nancy and Getty, Ruthanna Nusbaum,John Lambert,Jack Thompson, James Langdon, Nicholas Met-calf, students at different Colleges

ed—arranged and rendered by five young girls; five violinists with Miss Esther Sentz at the piano played Silent Night" very sweetly, then the F. P. Bohn with a happy speech pre-sented the pastor with an envelope containing a gift of money; and after dismission a box of choice candy was given to all members of the Sunday School.

The Holiday masqueraders are out again, a group of seven were calling in our town on Saturday night.

We trust you attended "Uncle Ezra's" Christmas party on Saturday "Uncle evening, for it was a splendid program of Christmas carols and their origin. The music was grand so were the speeches, closing with a pageant of "Silent Night, Holy Night," how words and music came to be written, then singing it in full chorus. Well we thank the National Broadcasting Company for that!

There was S. S. and Preaching al Mt. Union on Sunday afternoon and Rev. Kroh announced an average church attendance the past year of 66 persons. An 'increased membership totals 105.

There seems to be an epidemic of Eczema, at least four victims around here have been tormented with it for some time, are under the doctors care, and it continues on.

And now a brand New Year is at the loor, unsoiled by any wrong or mistakes of ours, any unkind words or misunderstandings; but how long can we keep it clean—and fair? May it be a better year for The Carroll Record and all its readers. -11-

In Chicago a man was arrested for riding a bicycle while drunk. There are a lot of talented people in Chicago .- Washington Post.

In Sad But Loving Remembrance of our dear brother,

GEORGE VERNON SMITH, who was killed six years ago, Dec. 3 . 30, 1931

Gone, but not forgotten. By his sisters, BEULAH R. CLINGAN. MARY E. SMITH. Farewell. dear mother, sweet thy rest, Weary with years and worn with pain, Farewell. till in some happy place We shall behold thy face again.

Tis ours to miss thee, all our years, And tender memories of thee keep, Thine in the Lord to rest, for so He giveth his beloved sleep.

By her daughter, VERGIE, grand-daughter, VIOLA, and grandson, Ambrose.

-11-

Victor Waybright, son of Mr. and Mrs. Samuel R. Waybright, Keymar, a Peekskill, N. Y., subscriber to The Record, paid our office a visit during last week. In commending The Record, he made a special resuest that we hold on to our Feesersburg correspondent. Of course, we will do our best in that line.

The Dawn Service, which was held in the Lutheran Church, on Christmas morning, by the United Brethren, Reformed and Lutheran Churches, was well attended. The program was presented in a beautiful candle light pageant. Miss Mary Koontz and Wilmer Naill of the Lutheran Church, represented Mary and Joseph throughout the entire service.

Visitors to Taneytown, from a distance, frequently ask a question something like this—"I have often vondered why your Special Notice Column is not more generally used." We have often wondered the same thing, but have never had a good answer. Perhaps they have nothing to sell—or have it, and do not try to sell it.

Mrs. G. W. McSherry, wife of a former minister of Trinity Lutheran Church, and daughter, Mrs. Stella Mitchell, of New Berlin, Pa., and and daughter, Mrs. Lloyd Baker, and husband, of York, called Friday on Mrs. M. H. Reindollar and family. They were enroute to Norge, Va., where Mrs. McSherry will spend the winter with her son, Hubert.

The operetta "An Old Kentucky Garden" is advertised in this issue to Garden" is advertised in this issue to be held for the benefit of the Taney-town Fire Company, Tuesday, January 11th., at 8 o'clock in the Opera House. The talent is from the Thurmont Choral Society and High School per-formers. The production comes high-ly recommended. It is produced in two acts. As a Fire Company bene-fit, it should be attended by a packed audience. Madeline Sholl, both of Hanover, were united in marriage, last Sunday eve-ning in Trinity Lutheran Church, by Rev. A. T. Sutcliffe, pastor. The ring ceremony was used. They were attended by Mr. and Mrs. Clair Williams, brother-in-law and sister of the bride. Mr. Bowman is manager of the Park Theatre, of Hanover, and Mrs. John D. Bowman audience.

John Fleagle, Byron Stull, George Motter, Raymond Roop, Mildred Stull, Billy Simpson, — Simpson, Roy Six, Tolbert Shorb, the three Saunders,

and Prof. Simpson, director. Refreshments were served—ice cream, cake and cider. On the center of the table was a large wedding cake, decorated with a minature bride and groom.

Among the callers during the day were: Rev. and Mrs. Thurlow W. Null, of near Harney; Mrs. Ida Yingling, Mrs. Sarah Gummel and Mr. and Carroll Hunt, of Greenmount, Md.

Mr. and Mrs. Yingling received many letters and a telegram congrat-ulating them upon their 50th. wedding anniversary. They also received many useful and appropriate gifts.

A BIRTHDAY SURPRISE PARTY.

A birthday surprise party was held at the home of Mr. and Mrs. Roland Koons, near town, in honor of their niece, Lillie Mae Angell.

1

The Union Bridge Lutheran Parish Keysville Church—S. S., 9:30 A. M.; Preaching and Holy Communion, at 10:30 A. M.; C. E. Society, 7:00. Mt. Tabor Church—Preaching, at 9:00 A. M.; S. S., 10:00 A. M.; C. E. Society, 7:00 P. M.

ORPHANS' COURT PROCEEDINGS.

TENTING ON THE OLD CAMP GROUND AT LINWOOD. By GEORGE EDWARD WALTZ.

This is the saga of the great Linwood camp of 50 years ago. In those days it flourished like the proverbial Green Bay tree. Literally thousand upon thousands of people from Hagerssylvania to the Virginia line flocked to the wooded hill side owned by my cousin Moses Haines for the annual campmeeting held by a local church. It was a religious gathering held every Summer after harvest to give vent to the pent up religious zeal of ts members and to secure converts. Many noted leaders, evangelists and singers from distant points came here to lend a hand in the good work.

It was an old custom which had been carried on for generations, in various spots in that neighborhood Many years before it had been held on the Engleman hill, then densely wooded, right across the meadow from the mill later owned by my father, George Waltz.

The camp site was located in cleared circle in the center of the voods. A large gospel tent with rais-

ed platform equipped pulpit, organ and chairs for the speakers and singers, flanked by a huge boarding tent, faced the circle with its many rough board seats to accommodate the congregation. In addition there was a wide boulevard sidewalk around the entire circle for additional listeners who could stand or move around at will.

At the edge of the sidewalk in the shade of the trees was a row of weather beaten board tents or cabins with slab floors, all covered with white canvas with flaps to let down over the open front facing the circle. These tents were rented yearly to the church members and their friends and were usually furnished with carpet, sofas, organ, chairs and rockers and centre table for lamps. In the rear compartment separated by a curtain were beds and washstands, stoves for cooking and tables for eating were set up in the rear in the open.

The front room of the tent usually thrown open was the social centre. Here visiting friends, relatives and neighbors gathered to talk (religion, crops and news, and to sing the old songs and laze away the hot summer Here too daughter and her davs. young lady friends entertained their eaux when not promenading and who knows how many budding ro-mances were started in these ideal

In addition, many lives were direct. ly influenced by the waves of relig-ious frenzy which swept the large audiences, bringing dozens of people to see the error in their ways. Altogether a great work was accomplished here and it saddens one to know that this religious uplift has been abandoned perhaps forever.

Now for a day at Linwood camp as I experienced it as a young lad. I lived close by and missed none of this edifying spectacle. Bright eyed and eager, newly scrubbed and dressed in the wide brimmed straw hat, bright pink shirt and light brown suit of the lay, I sallied forth bright and early. We foregathered in Englar lane, one of the three narrow roads leading into the campground, to watch the hundreds of visitors from our part of the State arrive. Every kind of equippage from lumbering farm wagons loaded with straw riders to fast spinning sulkies pulled by sleek race horses, many on horse back and a few on high wheeled bicycles were represented in the parade. Boy like we

our shouts of welcome. There are a dozen or more coaches all loaded to the doors, windows and platforms crowded with waving city folk out for a good time. The train comes to a grinding stop amid the squeals of the girls and the gleeful shouts of their swains for they are jerked unmerci-fully. Hurriedly the passengers pile off, many girls tripping over their long skirts and voluminous petticoats as they negotiate the long jump down as there is no platform and the din becomes deafening as relatives and friends yell welcoming greetings. The roadway overflows as this thousand merge into the hundreds already gathered but quickly they melt away into the wide meadow leading to the camp ground. Here the vari-colored cosagainst the deep green of the grass cause a kaleidoscopic effect in the bright sunshine never forgotten.

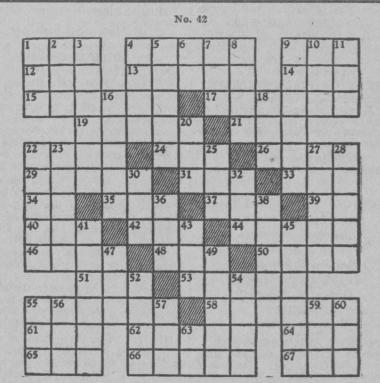

We remain right on the spot for more excitement is to come and quickly for another shrill blast and the Hagerstown train is slowly puffing up with engine reversed, the grimy engineer looking like a huge beetle in his big goggles is watching over his shoulder to avoid hitting any of the encroaching crowd being herded back by the guards in frantic haste. He also keeps a keen eye on the plunging horses lined up in the narrow road at the crossing. Being held up so long by the first train many impatient drivers were trying to cross ahead of the second train, crying out to the protesting guards that their horses are scared of trains and that they couldn't control them here. spite of the hazard many lash their horses and gallop across the track. The guards seize the head of other fractious steeds just in time to clear the track and several teams try to climb the high banks and fences as the roaring monster sweeps by. The heavily loaded train comes to

a stop, the tender which is in front, barely a foot away from the cowcatcher of the panting engine of the other train for this in a single track road. Quickly the many passengers file out and hurry away then more warning whistles and clanging bells as both trains proceed slowly west to lay over in the shop yards at Union Bridge until evening.

Meanwhile the train butchers or newsboys have unloaded their wares and set up temporary board stands beside the track to display them. Their stock included: Oranges, bananas, cigaretts (remember sweet caporals with a beauteous picture packed inside), candies in fancy boxes and in glass pistols and cute little lanterns, chewing gum, then just intro-duced in tinfoil wrapped long square sticks, black and flavored with licorice, long slender black canes with loaded round heads, fancy buggy whips with gay tassels and assorted iced drinks various colors. The shouting of these vendors to attract the crowd was something to remember. Those who never heard the wild rebel yells of the late Had Petry as he haranged his legion of friends and followers, have missed the thrill of their lives. Pausing only occasionally to catch his breath and "whet his whistle" he soon had his booth crowded and invaribly sold out early.

Reluctantly we tore ourselves away from this dazzling display of much wanted luxuries and followed the joyous crowd streaming through the meadow. Here the rushing waters of Pipe Creek had to be crossed on a narrow passenger bridge built on two spanning logs and protected by side hand rails. Many girls pretended to be timid about crossing, so their escorts had to coax and put protecting called loud greetings to those we arms around their waists to steady knew and hurled assorted remarks them. This slowed traffic and many deviated their course to the traveling photo "car" and tent nearby to have their "picture took." This "car" was a horse drawn vehicle built something like the house trailer of today (who says there is anything new under the Sun.) One end of the car was fixed up as a dark room for developing and the proprietor also used this as a kitchen. His sleeping quarters at the other end, separated by a curtain drape on which was painted scenery, was furn-ished with a plush chair with high back fitted with iron grips to be clasped around the back of your head to hold it steady. When you were safe-ly secured in this weird contraption, the protographer then enveloped himself and the box in a long black cloth. Pointing the one big glittering eye of the box right at you he commanded you to look pleasant and smile. But all the time you were scared half to death and almost overcome with the fierce heat and smell of the developing chemicals in that confined place. I have one of the tin types still showing me stiff as a ramrod, my head held in an unnatural position by the iron grips and looking like a dy-ing calf. But in those days pictures were scarce and hard to get so we rejoiced in ours and proudly showed it to everyone. That reminds me of a story told on the natives of the Blue Ridge mountains. In those days they had no photos or mirrors either, a spring or scrubbed milk pan was used to make their toilet. It seems that a tourist dropped a small hand mirror and the mountaineer who picked it up looked at it in surprise and exclaimed "why pap, I never knew you had your picture took." He carried it home and stored it away with the rest of his dead father's belongings in the attic. His wife, who was very jealous watched him suspiciously and when he had gone out went to the hiding place and retrieved it. Glancing at it she screeched "so that's the old hag you are running around with" and dashed it to pieces on the floor. We lingered here to look over the various colored scenic pictures of spots the photographer had visited and the celebreties he had photographed in his travels, which he had tacked against his car. We also successfully helped the photographer "make the birdie smile" by making signs and funny faces behind his back to the victims in the torture chair. Then we again joined the procession wending its way by devious tortuous trails, covered with roots and stones, to the summit of the hill where the campground was located.

An election of Seven Directors of The Detour Bank for the ensuing year, will be held at the Bank, on Tuesday, January 18, 1938, between the hours of 1 and 2 o'clock

Cashier.

DAVID B. REIFSNIDER, 12-31-3t

RADIO INFORMATION.

The folowing clipping from the Baltimore Sunday Sun will be of interest to radio users.

"Despite the fact that Germany, Italy and England do not allow radio broadcasting in a commercial sense, there are approximately forty other nations and principalities, apart from the United States and its territorial possessions, which approve sponsored programs.

Jack Benny, who made an extended tour of Europe during his vacation, studied the radio situation and has bobbed up with figures and data on the matter.

For instance, he reports, wartorn Shanghai has thirty-seven stations (commercial and non-commercial), which is more than any other city in the world. The Republic of France, which has twelve commercial stations, imposes a tax of forty-eight per cent. on gross time costs incurred by foreign advertisers using French radio. This tax must be paid by the advertiser

The Commonwealth of Australia, which, peculiarly enough, is a British possession, has seventy-five commer-cial stations which service 855,000 receiving sets, the owners of which are annually taxed about \$5.25. The Grand Duchy, of Luxembourg has only one station, but charges the highest time rate in the world, because of the restrictions against radio advertising in neighboring countries and the fact that its station is one of the most powerful in the world.

6

The Kingdom of Yugoslavia has three commercial stations but its listeners are patterned in the same mold as those of the United States. The stations accept advertising, although commercialisms are not stressed and there are frequent complaints about the commercials from listeners, who are taxed \$7 annually for the privilege of becoming complainers.

estate of Albertus B. Buchman, deceased, were granted to Marcella Buchman, who received warrant to appraise personal property, returned inventory of personal property and eceived order to sell same.

John D. Creswell, executor of Wm. S. Creswell, deceased, returned inventory of debts due.

Letters of administration on the estate of Samuel H. Smith, deceased, were granted to Paul M. Smith, who received order to notify creditors and warrant to appraise real estate. Margaret E. Mehring, executrix of Samuel H. Mehring, deceased, re-

ceived order to sell real estate at private sale of real estate on which the Court issued an order nisi. Letters of administration on the estate of Howard A. Shanebrook, deceased, were granted to Effie C. Shanebrook, who received order to notify creditors and warrant to ap-

raise personal property. Letters of administration on the estate of David C. Nusbaum, deceased, were granted to Rockwood A. Nusbaum and Margaret E. Hull, who received order to notify creditors.

Michael E. Walsh, executor of An-| nie M. Blizzard, deceased, settled his first account.

"Midwest," "Middlewest," Held Indefinite Terms

The term "Midwest," or "Middlewest," is an indefinite one, and opinions differ as to just what states constitute the region popularly re-ferred to as the Middle West, observes a writer in the Cleveland Plain Dealer.

The United States was settled from the Atlantic seaboard, and the terms "east," "middle west," "west," and "far west" were applied to different sections as the frontier was pushed toward the Pacific.

In its broadest sense the Middle West, consists of that part of the United States lying between the Appalachian and Rocky Mountains on the one hand, and the Mason and Dixon line and the Canadian border on the other. This section comprises the states of Ohio, Michigan, Indiana, Wisconsin, Illinois, Minnesota, Iowa, Nebraska, Kansas, North Dakota and South Dakota.

However, many people restrict the term to Ohio, Michigan, Indiana, Illinois and Wisconsin, and class all states west of the Mississippi as "West" or "Far West."

Letters of administration on the about the strange looks of the bewhiskered "Barreniters," the odd clothes and unkempt horses and rigs of the wild looking mountaineers and the solemn vesages of the Pennsylvania Dutch farmers from Dunquar-ter (maybe it should be spelled with an m) with their sleek mules and strange draft horses.

Believe it or not this procession of vehicles, horses heads jammed against rear of carriage ahead, kept up for hours. Often the road was blocked while the congestion at the camp entrance, where another road converged, was unscrambled. Any fool driver who tried to buck the line and get out of the camp was out of luck. He had to wait in one of the "cutouts" dugin the high bank at intervals (the road was not wide enough for passing in those days) until there was a break in the seeming unending line.

Tiring of this spectacle we walked the fences or high banks until we reached the Pipe Creek Station R. R. siding. Here was our first real ex-citement for already hundreds had gathered to meet old friends from Baltimore and Hagerstown and intermediate points who made this an annual pilgrimage. We quickly squirmed our way through the surgquickly ing crowds up to the very rails fear-ful of missing the arrival of the trains now due from East and West. We persisted in getting on the track despite the frantic efforts of several trackmen who had been pressed into service to keep the track clear. Pushed back none too gently we had to content ourselves by sneaking up behind their back and regardless of our good clothes, kneeled in the cinders o put our ear to the iron rail.

Finally a slight clicking noise is heard and a wild shout "there she comes" goes out. Leaping up and down in excitement we discern something in the dim distance coming from the West. We surge that way eagerly only to recognize the slick ittle hand car manned by "Nace" Englar. At that time he was foreman of the U. B. R. R. shops and being an expert mechanic had built the contraption himself. Neatly attired in white shirt and trousers with peaked cap perched jauntily on his head, he quickly alighted amid the joyous greetings of his many friends and willing hands speedily lifted his little joy-buggy from the rails to a safe lace.

Now a whistle is heard and before ve can reach our vantage point the rails are singing merrily and the clanging bell gives loud warning to clear the track. The engineer leans far out of his cab waving us back and the roar of engine quickly drowns out

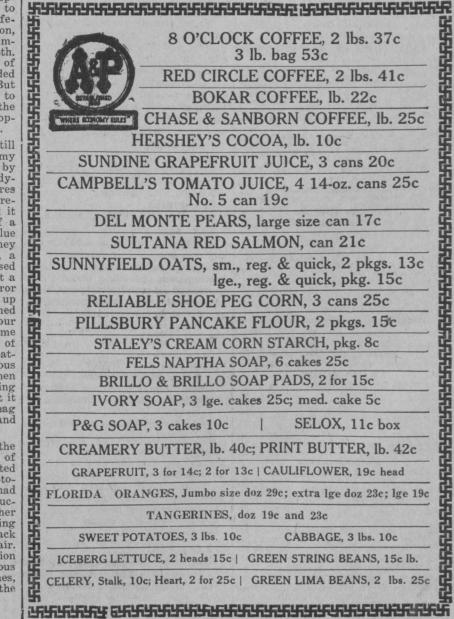

(Continued next week.)

ticable denotes that which may be practiced, used, or followed with good results. Some solutions to material problems are all right in theory, but are not practicable in actual practice; in other words they cannot be carried out. To leave a room all you need do is to go out by the door-but if the door is locked on the outside that method of leaving is impracticable.

ILLNESS DUE TO DEFICIENT DIET

Nobel Prize Winner Gives His Views on Subject.

By EDITH M. BARBER

"N UTRITION intimately con-cerns the welfare of man, and his place in future history will depend in no small part upon what he decides to eat." This statement was made by Dr. George R. Minot, professor of medicine at Harvard university and winner of the Nobel prize for medicine in 1934. According to Dr. Minot, an adequate diet throughout life will often prevent illness. In the long time studies that he has made of the condition of anemia, he has found that its cause is usually defective or deficient nutrition. It may arise from a lack or non-absorption of iron or of vitamin C or of a mysterious substance found in the liver. The condition of simple anemia may be prevented by including a liberal amount of iron and vitamin C.

The condition of pernicious anemia, which is much more serious and for which no remedy had been found until recently, is apparently related to the ability to utilize vitamin B-G. Vitamin B is found in muscle meat, eggs, rice polishings and yeast, which need an unknown gastric digestive factor to make them ready for the body. When this factor is lacking, there is danger of pernicious anemia. It may be supplied, however, by liver, kidneys and other organs. At present, this disease is being treated not only by an increase of these foods in the diet, but by liver extract taken by the mouth or through hypodermics. According to Dr. Minot, the first

cause of any type of anemia is a deficient diet. . . .

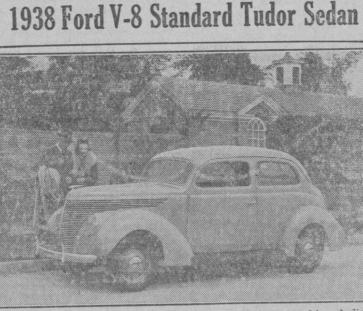

SELECTED RECIPES

Liver Dumplings.

1/4 pound calves' liver 1/2 cup soft bread crumbs 1 tablespoon minced onion 1 tablespoon melted fat 1 teaspoon parsley 1/2 teaspoon salt Pepper l egg, slightly beaten 5 cups stock

Grind the liver fine and mix it with the bread crumbs. Saute the onion in the fat in a skillet until delicately browned. Add the liver mixparsley, salt and pepper. ture, Add the egg and mix well. Drop the mixture by teaspoonfuls into the hot, but not boiling, meat stock. Cook slowly ten to fiften minutes and then serve with the soup. To make dumplings which may be shaped in balls, add one-half cup additional bread crumbs.

Baked Eggs. 2 tablespoons butter 1/2 cup milk 3 cups mashed potatoes Salt Pepper 2 tablespoons chopped chives or

MONTANA DAM MOST ISOLATED PROJECT

Stores Water From Glaciers and Melting Snows.

Red Lodge, Mont .-- In the gnarled hinterland of the towering Beartooth mountains man has taken a sevenleague step in his age-old feud against drouth, the perennial libertine of crops.

Glacier lake dam, the highest and most isolated structure of its kind in America, located 24½ miles by road and foot trail south of here, has been completed and accepted by the Montana water conservation board. Built as a supplemental reservoir to supply water to 54,000 acres of rich farm land in Rock creek valley from Red Lodge to Silesia, Glacier lake dam is notable for the spectacular grandeur of its setting and

its extreme isolation. Carved from a rock-ribbed palisade, unfathomed Glacier lake is nourished by everlasting glaciers and melting snows. At an elevation of 9,750 feet the lake is surrounded by peaks from 11,000 to 12,000 feet

high. Solid Rock Foundation.

The dam is a rock-filled project with a maximum height of 52 feet (5 feet freeboard), with a crest of 730 feet and a top width of ten feet. The upstream slope is 1:1; downstream slope, 11/2:1, and foundation and abutments are in solid rock.

The back or downstream part of the dam is composed of rock fill. Most of the rock varied from two to ten cubic feet while being loaded by hand. After the shovel came on the job the rocks averaged one cubic yard in size. Voids were well filled with rock which graded down

TALKING SLATE IS **NEW TELEPHONE AID** Gadget Makes Record of Voice

Like a Dictaphone.

New York .- A "talking slate" has been added to the gadgets you can hitch to your telephone.

It answers calls when you are out, giving any message you wish. It operates as simply as the telephone itself. You push a switch before you leave the house, recite into a microphone the message you wish to be repeated, then push the switch Any calls which come in again. after that are answered automat-ically by the "slate," which repeats

your message and hangs up. When you return home you wipe your words off the "slate" with an electric eraser, leaving it clean for another message.

The "slate," which is made of steel ribbon, has been perfected in the laboratories of the Bell Telephone company after being experimented with for 30 years.

In principle it is somewhat the same as the phonograph record. When you speak into the microphone, your words are transformed into electric impulses. These are carried along a wire to a pair of magnetic roles. The ribbon, a millimeter wide and two thousandths of an inch thick, passes between these poles and picks up the impulses.

Whereas in a phonograph record the impression of the voice appears in the form of concentric grooves, the impressions of sounds are inof on the surface "slate"; they are held in the metal by magnetism.

WHERE LOYALTY **ENDS** 88 By J. B. M. CLARK Copyright .- WNU Service

HE news of Whitcombe's trouble exploded like a bomb in the office of the Display Advertising company and left Stebbins, the assistant and bookkeeper, and Miss Wilcox, the stenographer and filing clerk, pale and bewildered. It came in the form of a note from Whitcombe himself, written from a hotel in the neighboring town, and broke the unpleasant intelligence in the graceful manner in which Whitcombe usually expressed himself. "An unfortunate affair that happened some years ago," he wrote, "and which I had hoped had been buried in the dead past for good and all, has been revived by some malicious person, and the law is seeking to lay hands on me. The matter could be easily explained to reasonable people, but the law, to quote Mr. Bumble, is ever 'an ass and an idiot.' I have, therefore, decided to withdraw from the scene for a time. You and Miss Wilcox are hereby released from any obligation, moral or otherwise." That was all. Nothing about salaries for that month (then due), or what was to be done about the business, or anything.

"Mr. Whitcombe of all men!" said Kitty Wilcox from between pale lips. "I would have trusted him anywhere. Such a good business man he always seemed to me-so masterful." Kitty had fallen for the masterfulness of Mr. Whitcombe from the day he had engaged her.

"You see he never confided anything to me about the inside affairs of the company, and he kept the cash and the bank book himself," said Stebbins, a tall, abstracted, mild man whose disordered raiment had always been a source of irritation to Miss Wilcox. "I have no idea what's what, I'll go around and see the bank. But Whitcombe was always decent to me-paid me my salary regularly and all that. We might try and carry on his business for him. I suppose he'll turn up again-get a settlement or something-'

"I think that would only be doing the right thing," said Miss Wilcox, eyeing Stebbins gratefully. "I am sure the business will make out."

The financial situation, however, proved on investigation to be bad. What Whitcombe had done with the cash that came in could not be ascertained. Very little of it was in the bank. Stebbins and Miss-Wilcox managed to struggle along for a couple of months in heroic fashion. But then the end came. It came in the shape of a sheriff's officer with a writ of seizure. There had, it appeared, been a silent partner, one Spencer, who had accepted Whitcombe's note. The news of the latter's hurried departure had evidently reached this gentleman and he wanted his pound of flesh. He seized what there was to seizewhich was not a great deal. But

men would listen to him-that he could actually persuade them to do what he wanted. Miss Wilcox, of course, was his inspiration, and he told her so. But she said that all she knew she had learned by studying Mr. Whitcombe. The business grew apace; the staff was increased by the addition of a draftsman and a girl to relieve Miss Wilcox of the

typing. then Mr. Whitcombe re-And turned. He came in one evening when Miss Wilcox happened to have gone back to the office to clean up some arrears. He found her alone in the inner room. Whitcombe was slender, graceful, curled, immaculate, and undaunted in the most trying circumstances. He was undaunted now, as he shook hands with Miss Wilcox, while his keen eyes took in the air of prosperity and the signs of increased business. "I got my little affair straightened out," he said cheerily. "It was all very foolish-mostly misunderstanding. I have seen Spencer, too-about the note, you know. Too bad the mean devil cleaned the place out. But you're still going, I see. Who's the financial genius?" He glanced at Miss Wilcox appreciatively. She was worth glancing at too, with herpretty bare arms, brown eyes, and cheeks flushed with the joy of seeing her hero again. But she proceeded cautiously.

"Mr. Stebbins managed to raise a thousand dollars somewhere," she said demurely. "And so we are carrying on. We thought you might clear yourself and come back some day, and we tried to keep the business going for you. We are doing fairly well."

"Old Stebbins raised a thousand bucks!" said Whitcombe sitting down and laughing heartily. "What do you know about that! How did, the poor simp do it?"

"I think he got it from a friend," said Miss Wilcox, losing color slight-Then she appeared to enter into his mood, for her eyes met his understandingly. "But of course he is kinda simple-and slow," she said. "We have to push him along."

"You're a bright little kid," said. Whitcombe admiringly. "That's why I chose you-and for your good looks. I don't suppose there's any cash about the place? I'm a little short." His eyes glistened avariciously.

"There's only a few dollars in the petty cash box," said Miss Wilcox, again meeting his eye understandingly. "But I can write a check-I keep the cash now. There's five hundred dollars in the bank."

"Would you write me a check for \$500, Miss Pretty?" said Whitcombe advancing towards her and taking her hands in his. "Would you do that for me?"

"Would I!" she said drawing her hands swiftly from his grasp and rising to face him. Before the indignant anger that blazed in her eyes he seemed to shrink within his clothes. "And so the first thing you sought to do on your return was to miscall and rob your best friendthe man who has actually built up this business for you against your return. No, I wouldn't give you one cent-neither would Mr. Stebbins-"

"I'm not so sure about that, Kit-

•No Window Service or Rural Carriers on Legal Holidays.

Helidays for Rural Carriers are, New Year's Day; Washington's birthday; Me-morial Day, May 30; July 4; Labor Day, Ist. Monday in Sept; Thanksgiving Day, and Christmas. When a holiday falls on Sunday, the following Monday is observed.

eggs Paprika Add the butter and milk to the hot mashed potatoes and season to taste. Beat well, add the chives and spread in a shallow greased baking dish. Make five hollows, and in each place a raw egg. Sprinkle with paprika and bake in a moderate oven (375 degres Fahrenheit) until the eggs are firm.

Spinach Nests.

2 cups cooked or canned spinach 1/2 cup mayonnaise 1/2 cup grated cheese 6 bread cases Melted butter Make bread cases by cutting

bread into three inch squares and cutting out the center. Roll each case in melted butter. Chop the spinach, mix with mayonnaise and fill the bread cases. Sprinkle with the cheese and bake in a hot oven (425 degrees F.) until bread is light brown and the cheese is melted.

Johnny Cake.

1 cup cornmeal 1/4 cup flour 1½ teaspoons baking powder 1/2 teaspoon salt 2 eggs, well beaten 1/2 cup milk

4 tablespoons butter, melted Mix and sift dry ingredients. Combine eggs and milk and stir into dry mixture. Stir in shortening

and pour batter into well-greased baking pan, spreading about threefourths of an inch in thickness. Bake in oven, 425 degrees Fahrenheit, for about twenty-five minutes.

Barbecued Chicken. 2 two-pound chickens Salt, pepper 1/4 pound sweet butter 1½ cups chicken broth 1½ tablespoons tomato catsup 3 tablespoons Worcestershire sauce

1/2 teaspoon finely chopped onion Disjoint chicken as for frying. Season with salt and pepper. Melt butter and fry chicken in it until golden brown. Mix other ingredients and cook together six minutes. Pour sauce over chicken and cook slowly about twenty minutes.

Sterling Sauce. 1/3 cup butter

1 egg yolk 1 cup light brown sugar 1 tablespoon milk

Cream the butter, add the sugar gradually, then the egg yolk and milk, beat until light.

© Bell Syndicate.-WNU Service.

to three inches. On the upstream face is a handplaced rock rubble wall which varries from four to six feet in thickness. The face was grouted. On the grouted face was placed a concrete slab, reinforced with electric welded fabric, varying from six to twelve inches in thickness.

Tunnel Taps Lake.

Across and beneath the present outlet of the lake a tunnel 6 by $4\frac{1}{2}$ feet wide and 115 feet long was drilled. The tunnel taps the lake about six feet below the normal August level and forms a permanent outlet for the reservoir.

A vertical shaft from the top of the dam into the tunnel provides for the gate. A cutoff trench was excavated 18 inches into solid rock.

The dam, costing \$82,731, was built as an auxiliary to the \$450,000 Cooney dam, which is located on Red Lodge creek.

A four-mile approach road was bulldozed, linking a CCC trail leading to the outside world with a point on the rim of Rock creek gorge 4,000 feet from the dam site and about 1,700 feet lower in elevation.

From the end of the haul road to the dam site the world literally stands on end. A cableway about 3,500 feet long was constructed. The shovel used for excavation of the dam was dismantled, transported to and from the site by cable as were the 3½-ton trucks which were used.

Spanish Galleons Offer

Livelihood to Floridans Miami, Fla.-Old Spanish galleons which came to grief on nearby Florida reefs in the days when Ponce de Leon searched the state for a "Fountain of Youth," today provide a source of income for some

Florida residents. Men comb the shallow waters south of here daily for the old Spanish hulks. When one is discovered, the work of removing old cannon, iron portholes and other iron, bronze and brass fittings, begins.

The work is not without its dangers. Recently, while removing a huge iron cannon from the ocean floor, one man was crushed beneath a falling mast, torn loose by the heavy weight of the cannon.

When the time comes for the "slate" to speak, the ribbon passes through another pair of poles and the electrical impulses are translated back into sounds.

When one message on the "slate" has outworn its usefulness, the ribbon is run through still another set of magnets which erase all sign of the impulses that had been there.

Overlong Letters Cost

Uncle Sam 75 Cents Each Washington .- The average letter written in a government bureau costs 75 cents and is just 35 per cent too long to be effective. Furthermore it is weighted down with a devotion to formal and meaningless phrases.

This is the conclusion reached as the result of careful studies of governmental correspondence and is the reason a course of letter-writing has been established in the farm credit administration, where some 70 key officials are learning, twice a week, that their letters probably lack desired "clarity, conciseness, completeness, correctness and

tone." The F. C. A. believes that the class is worthwhile, figuring it somewhat this way: Every week about 4,000 letters go out of the Washington office. In the entire organization more than 100,000 are written every seven days. If 25 cents a letter can be saved by proper training, it's good business. Hence the class, conducted by James E. Brady, special assistant to the governor, and Milton Hall, head of the F. C. A. training program.

Favoritism

Jack—There is a lot of favoritism in our family. Uncle-Well, Jack, what on earth

do you mean?

Jack-Well, I get punished if bite my fingernails and when baby puts his foot in his mouth they think it's cute.

Melodious Irony

"Why did the tears come into your eyes when the band played 'Hail, the Gang's All Here'?''

"In view of the factional fights we've been having," replied Senator Sorghum, "the tune sounded downright ironical."

it rendered the situation hopeless. Stebbins and Miss Wilcox took counsel once more.

"That eliminates Whitcombe once and for all-poor chap," said Stebbins. "And now that we are down to zero again financially I don't see anything for it but to wind up. And yet there are several good prospects-I believe the thing is going to go. But I would need to raise capital somewhere. I think we could swing it with a thousand dollars. But I don't know where to get it." He sagged dejectedly in his chair.

Miss Wilcox puckered her brow in deep thought. "Well, I'll tell you something, Mr. Stebbins," she said at length. "There is no doubt that Mr. Whitcombe by his energy and enterprise laid the foundation for success, although of course you have done wonders in following up. Let's be loyal to the absent one a little longer. Things may come right with him yet. Now I have a little money-partly saved and partly left me by an aunt. I'll put up the thousand dollars you need. We will make a business of it between us.'

Stebbins could only grasp his admiring astonishment. "There are some good sports in the world yet,' was his comment. "I don't mind sticking it awhile yet for old Whitcombe's sake. I'm a little doubtful now whether he really deserves it-but I will give him the benefit of the doubt since you wish it." Miss Wilcox blushed a little at this and made no reply. "At any rate," Stebbins continued, "it's your business now. And I am your very humble servant." He said this quite gallantly, such had been the effect of Miss Wilcox's coaching since they had worked together. Indeed it was on the tip of his tongue to add: "and admirer," but he thought it might look like taking an unfair advantage. Besides he saw clearly enough that she still admired Whitcombe, and he reflected (somewhat bitterly) that if Whitcombe did show up again and clear himself, he (Stebbins) would not have much chance. Deep in his heart he caught himself harboring the disloyal wish that Whitcombe might be gone for good.

It was hard, uphill work for a while after that, but ultimately they began to draw ahead. Miss Wilcox developed an unexpected capacity for advertising slogans, and made several pronounced hits. Stebbins, who had never dreamt he might make a solicitor, began to find that

ty," said Stebbins' voice from somewhere outside. He had come quietly in, and now appeared in the doorway of the private office. "It's as well as I happened up-just saw the lights burning from the street." He crossed to Miss Wilcox's side and put his arm around her. "I believe I might give him some money, Kit-ty—if I had any to give. But I don't think there's time to go into money matters, Whitcombe. I saw one of the sheriff's men that was up here before, hanging around at the entrance to the building. I think you could get down the freight elevator if you went quickly." Whit-combe went. And Mr. and Mrs. Stebbins are running the business to this day.

Weasel Is Relative of the Sable and Ermine

The weasel family has a corner on the valuable fur market, though the commonly known animal of that name is only a vicious killer of other animals, undignified by furriers except as the little-valued "summer ermine."

His Russian cousins, on the other hand, make the ermine and sable coats which have no peer for fur value. The ermine takes his color from his surroundings, so the most valuable pure white pelts come from far north in Siberia. Sables are hunted in the deep forests where the sun scarcely penetrates, and the difficulties of the hunt (20 pelts is a lucky season for one hunter) and the fact that the hair turns equally in every direction, hence never looks worn, adds to its value.

Mink is another of this handsomely furred family, and the American variety of this species is superior to the Asiatic or Chinese type. Kolinsky, a name once applied to a good Asiatic breed of mink, is now used to refer to the Siberian fur which is long and silky, but has light yellow under fur so that it is almost always dyed to sable or marten tones. The kolinsky furs are always marketed without tails, which are converted into artists' brushes. The marten, an American cousin of the Russian sable, states a writer in the Philadelphia Record, produces a fine, dense bluish-brown fur with overhairs almost as long as those of the fox. The European baum marten has lighter fur and throat markings, but when dyed so closely resembles Russian sable

that only an expert can distinguish

the difference.

Asked Jesus. JUNIOR TOPIC—what Two Brothers MINTERMEDIATE AND SENIOR TOPIC— A Look at the Gospel of Mark. YOUNG PEOPLE AND ADULT TOPIC— Mark's Gospel: Author, Origin, Theme.

Beginning a New Year is always

a thrilling experience. The thought

of an unwritten record is a pleasant

one and at the same time most sol-

emnizing. We must take heed, you

and I, what we write upon that page

which lies before us with the invit-

fall on Sunday, it is most appropri-

ate that the Lord's day should come

between the holiday of yesterday

spent with our family and friends,

and the work-day on the morrow,

when we begin the year's labors.

Today we tarry in God's house to

pray and counsel together in the light of his Holy Word regarding

the new year of grace and oppor-

We begin today a six-month study of the Gospel of Mark, which pre-

sents Christ as the Servant of God.

It is the Gospel of the mighty acts

of divine power, rather than of

words. It is characterized by

energy and spontaneity. It moves

rapidly. The characteristic words are "straightway," "immediately," and "forthwith," which are used

Before considering our lesson for

today, we would undoubtedly like to "meet the author." John Mark was

the son of the Mary in Jerusalem in

whose home was "the upper room"

where so many important events

took place. He was a cousin of

Barnabas and went with him and

Paul on the first missionary journey.

For some reason he lost heart and

went home, much to Paul's distress. Happily we find that the young man

redeemed himself in Paul's estima-

tion and was later well spoken of by him (Col. 4:10, Phile. 24, and I

The lesson text chosen for our "preview" of the Gospel is one

which shows the weakness of human

ambitions as contrasted with the true spirit of humble service which

I. Selfish Ambition Rebuked (vv.

Ambition is not in itself wrong,

but when it becomes so extreme

that it projects self forward at the

expense of others it becomes selfish

and destructive. The fact that these

_esson

CUNDAY

CHOOL

"Sir Loin," an Old Story Dr. Johnson, as lexicographer, gave credence and currency to the etymological nonsense, and subsequent compilers of dictionaries repeated the story that an English king knighted a roast of beef as "Sir Loin," and that is the origin of the name sirloin for a certain cut of meat, according to a writer in the Cleveland Plain Dealer.

Later authors, however, repudiated this popular tradition of a silly freak or pun of James I or Charles II, as of no etymological value, and agree that sirloin, which appears in Dr. Johnson's dictionary for the first time with this orthography, is derived from the French surlonge,

that is, "upper loin." In the old English dictionaries the English word was spelled surloin. Skeats' Etymological Dictionary vocabulates the word thus: "Sirloin, an inferior spelling of surloin." It adds that the word is "frequently spelled sirloin, owing to a fable that the loin of beef was knighted by one of our kings in a fit of good humor.

The king was imagined to be the merry monarch Charles II, though it is sometimes said to have been James I. Both stories are discredited by the use of the original French spelling in the Fourteenth century. Swift is one source of the legend. In "Polite Conversation" he wrote:

"But pray, why is it called a sirloin? Why you must know that our King James I, who loved good eating, being invited to dinner by one of his nobles, and seeing a large loin of beef at his table, he drew out his sword and in a frolic knighted it."

Many Sharks Are Found to Be Harmless to Man

For centuries the long gray fish, the shark, has been universally feared and hated as an unclean scavenger, a savage and voracious man-eater, a veritable tiger of the sea. In many cases this sinister reputation has been entirely undeserved, writes an authority in the Portland Oregonian, for of all the many kinds of sharks that are known to science only one or two are dangerous to human life.

The little dogfish that often starts a panic along the Atlantic bathing beaches is perfectly harmless, and even the tremendous rhinodon, or whale shark, that reaches a length of over 70 feet, feeds exclusively on minute water organisms and would never attack a man.

Shark leather, also known as shagreen, has a beautiful natural grain and is so indestructible that it was formerly used by carpenters much as sandpaper is used. Shark liver oil is said to be just as full of vitamins and just as unpleasant to taste as the better known product derived from the humble codfish. Shark fin soup is esteemed by the Chinese as a great delicacy; and shark meat meal is the richest known substance in protein content. In short when you get to know him, the shark is quite a useful member of society, and every part of the big fish is utilized in some way.

Bell System Legionnaires Visit New York Headquarters

Close harmony in the ranks at 32 Sixth Avenue, New York City, during the American Legion convention recently.

When the American Legion forces | 32 Sixth Avenue and was attractively furnished and decorated for the occasion.

> Nearly 300 Legionnaires and members of their families representing twenty-one Bell System and other communication companies registered in the auditorium. One of the visitors, which might properly be counted as 40 registrants, was the band of the Alexander Graham Bell Post of Boston. This Legion post is composed entirely of telephone employees in Boston.

In addition to registering the visiting veterans and offering an information service, the reception committee directed the interested members to various Bell System points of interest.

How Ice Melts When It

Is Exposed to the Heat As ice melts, changes occur in the crystals within. The crystalline structure of a block of ice is not apparent, owing to the close contact and perfectly regular arrangement of the crystals, but when a piece of ice is exposed to radiation from any luminous source, disintegration gradually takes place, and by the use of a lens numerous small crystals may be seen, studding the in-terior of the block; as the heat continues, these crystals expand and finally assume the shape of sixrayed stars of exquisite beauty. Then, although it cannot be seen with the naked eye, the block of ice has changed its structure and is partially melted long before its surface shows any change. What appears to be a sudden disintegration has actually been going on for some time within the block.

Romance Starts Singing

Terrier on Way to Fame

Rivers Belong to States Where They Are Located

Rivers are the property of the states in which they are located. The limited jurisdiction of the federal government over navigable streams is merely incidental to its constitutional power to regulate and improve navigation for interstate and foreign commerce.

When a river forms the boundary between two states the title of each state is presumed to extend to the middle of the main channel, provided there is no legal arrangement to the contrary. Sometimes two states agree, for police purposes, to exercise concurrent jurisdiction over a river which forms the boundary between them.

The Ohio, Chattahoochee and Potomac rivers are notable exceptions to the general rule. Kentucky and West Virginia have absolute jurisdiction over the entire Ohio river along their shores as far as the low-water mark on the Ohio, Indiana and Illinois banks. If a person commits a crime on that river near the Illinois, Indiana or Ohio shore he is amenable to the laws of Kentucky or West Virginia. This boundary line has been judicially recognized many times by the Supreme court of the United States and the Supreme courts of the states involved.

The Northwest territory, from which Illinois, Indiana and Ohio were carved, was ceded to the federal government in 1784 by the commonwealth of Virginia. The resolution of cession retained title and jurisdiction over the Ohio river to the low-water mark on the northern bank, and these rights were transmitted to Kentucky and West Virginia when they were later formed from Virginian territory.

Donner Lake Named for Party of '46 Emigrants

Lying high near the summit of the Sierras in California is Donner lake, named for an ill-fated emigrant party headed by George Donner, which suffered privation and even death in its attempt to cross the mountains toward the Pacific in the fall and winter of 1846.

Donner's party, formed in July, consisted of 87 persons-36 men, 21 women, and 30 children. Their wagon train was delayed by hardships encountered in crossing the Nevada desert. It was not until late October that it began the ascent of the Sierras. Early snows impeded its progress. The way was blocked completely when the party reached the shores of the lake which now bears its name.

Through the long winter the emigrants fought starvation and disease, many perishing before help reached them in the spring. A monument on the shores of Donner lake is dedicated to the memory of those who suffered and died on its shores.

A Mile

The measurement to which we usually refer by this name is what can be more particularly called the Atlanta, Ga.-Romance started statute mile. It equals eight furlongs each of 220 yards, or 5,280 feet in all. There is another milethe geographical or nautical. This mile is one-sixteenth of a degree of latitude, or 6,085 feet. The word comes to us from the Latin word "mille," meaning a thousand, says London Answers Magazine. The Roman mile was 1,000 paces. They measured a pace as the distance between the points where the same heel came down in making a stride. The Roman pace—which we should regard as two paces—was reckoned at about five feet. This made the Roman mile—5,000 feet—noticeably

VERYONE will be at the New Year's party but me," wailed Ruth, "and you promised to take me."

"I know, daughter," her father responded, "but not in such a storm."

"There probably won't be any party," Ruth's mother consoled her. 'They'll have it some other time."

"Imagine a New Year's party at any other time!" Ruth laughed bitterly. "I never get any fun. Cooped up here on the farm all winter, and now when there's something doing, father backs down on his promise. Why, I Scared of the storm! wouldn't be afraid to drive over alone.

"Well, you aren't going to! All right, I guess we can make it. Go get your things."

Ruth jumped up and kissed him. Her mother's protests were scarcely heard.

Before they had gone far Ruth admitted the storm was really worse than she had realized. The snow was not very deep, but the howling winds had piled it in strange drifts that made even their own gate and the familiar road seem queer and unreal. The windshield, except where the wiper; swung back and forth, was blurred,

They Stumbled On Together, Feeling Their Way.

and she strained to make out the edge of the road. Her father also was having trouble.

"We'll have to turn back, Ruth," he said. "There isn't a chance. It's getting worse, too. Better to miss the New Year's party than the New

Year.' "Of course, father." Ruth felt relieved.

The car swung around, the brakes jammed. The soft snow settled down under the two front wheels which hung over the edge of the road. "We're stuck, Ruth," her father said. "I doubt if I can get enough traction to back her." They got out, scraped away the snow and tried to lift the car, but one wheel was caught. Ruth shivered. "Hadn't we better hike home before this storm gets worse—and we get too cold?" asked Ruth. Following the road proved quite a task. They stumbled on together, feeling their way, and at last the welcome lights of home showed them the right direction. "This isn't much of a New Year's eve celebration," Ruth admitted, "but it's a lesson. I'm making my New Year's resolution right now not to insist on my own way." "That's right, honey," her dad replied, "and if you remember that, I'm sure we'll always have much happier New Years.' © Western Newspaper Union.

PRODUCTS OF NEEDY

No Commercially Made Goods Stocked in 25 Years.

Woodstock, Vt .- To those who know of her work, Mrs. Mary Grace Canfield of this village has won the designation of "patron saint to the needy." As for herself, she smiles when that title is mentioned and says that her friends over-estimate her work.

Mrs. Canfield is the proprietor of a craft shop in which is sold only products made by needy persons. She has conducted this shop nearly a quarter of a century, and during that time she has never sold any commercially made product. Hers was the first shop in the state to dispose of the handiwork of the crippled people of the state, and she has frequently gone out personally to raise money to carry on this work for the crippled.

Nor is this the only good cause in which she has interested herself. She is intensely interested in the

the Lord in his glory does not change the situation. They were selfish even in dealing with holy things.

James and John had asked for a great honor in the kingdom, but had not sought to share in the suffering that preceded it.

Their own ignorance of what was involved, their own weakness, their observation of God's hand in the carrying out of his own plans, should have deterred them. There is such a thing as holy boldness, but there is also such a thing as unholy temerity.

II. Sacrificial Service Defined (vv. 42-45).

Christianity is not organized after the manner of secular government (v. 42). Much of the mischief that has come to pass in the church is the result of "running the church" as an organization, when it should be allowed to develop as a living organism.

Anyone who observes with even a little care knows that the church of Jesus Christ is hindered most seriously by the presence of pride and selfish ambition. Some people will not work unless they can rule. Their money is withheld unless it buys for them a dominating interest. The pastor is persona non grata unless he recognizes the desires of the "right" people. None of these things are done as obviously as our words would suggest. There is much careful "fixing" and "wire-pulling" behind the scenes. But it amounts to exactly the same thing, and it is all entirely foreign to the spirit of Christ.

Are there then no Christians who humbly serve the Lord? Yes, praise his name, there are many, and wherever they are found they are the salt of the earth. God uses and blesses them to his own glory. They may not be (and often are not) in "positions of leadership," but they are actually the leaders of the church in its true work on the earth.

Man

4

Man is by nature weak; he is born in and to a state of dependence; he therefore naturally seeks and looks about for help.

Avoid Becoming Stale I have lived to know that the secret of happiness is never to allow your energies to stagnate.-Adam Clarke.

Success

There is no road to success but through a clear strong purpose.

Lines From "Solitude"

"Laugh and the world laughs with you. Weep and you weep alone," are lines from "Solitude." a poem written by Ella Wheeler Wilcox. It was first printed in the New York Sun on February 25, 1883. Authorship for the poem was also claimed by Col. John A. Joyce, who had the quotation inscribed on his tombstone in Oak Hill cemetery, Washington, D. C., before his death in 1915. And occasionally echoes of the controversy are still heard, but there is little doubt that Mrs. Wilcox was the author, says a writer in the Cleveland Plain Dealer. Joyce was not able to produce any positive evidence that he used the words before "Solitude" appeared in the Sun.

The Early Jazz Bands

By 1915 there were bands in New Orleans playing what was first known as jazz. Late that year Jos-eph Gorham discovered and took to Chicago one of these which achieved fame there as Brown's Band from Dixieland. Bert Kelly, another manager, in the same year bestowed the name jazz bands on his numerous orchestras. In 1916 Brown's Band invaded New York. In 1917 the Dixieland Jazz Band from New Orleans made a phonograph record of the "Livery Stable Blues" and Jim Europe, a Negro entertainer, as an A. E. F. bandmaster, introduced it to Europe.

Lord Mayorship in England

The lord mayorship in England was created in 1189, and many of the privileges and prerogatives of the office date from the Middle ages. The "Cinderella" coach in which the mayor rides through the streets when inaugurated is itself a heritage of former times. Built in 1757, it is adorned with cupids, dragons, flowers, and civic emblems, while the head of Father Thames graces it. Its painted panels are insured for \$50.000.

San Remo Cableway Longest

The San Remo to Monte Bignone cableway in the Ligurian Alps, Italy, rises from sea level to 4,300 feet in a distance of nearly five miles. It is one of the longest cableways in the world and has the largest aerial span. The complete journey is made in forty minutes.

world peace movement, liberalism in religion and education, equal opportunities for women, and the preservation of local history and folklore.

A native of Ohio and a graduate of the University of Akron, Mrs. Canfield came to Woodstock more than thirty years ago with her hus-band, Rev. Dr. Harry L. Canfield. For a number of years, Dr. Can-field served as pastor of Woodstock and South Woodstock churches, before being transferred to the South by the Universalist mission board, from which he retired this year. The couple, however, always maintained their home in Woodstock and returned here every summer.

Mrs. Canfield was an early worker for women's suffrage. She is president of the Woodstock League of Women Voters.

Along with her other activities, Mrs. Canfield agreed last year to write the history of the Kedron valley and the South Parish, now known as South Woodstock. In addition to going over the town record, huge piles of old letters, newspapers and scrapbooks, Mrs. Canfield has walked miles of deserted back roads, never passable to automobiles, in order to view for herself the old cellar holes and remains of buildings inhabited by early settlers.

FOLLOWING ORDERS

Mathematics was not John's strong point, and at the examination he was set a problem as follows:

"If one horse can run one mile in a minute and a half, and another horse can do the same distance in two minutes, how far would the first horse be ahead if they ran a race of two miles at their respective speeds?"

John worried over this for some time, and then thought of a way out.

"I regret to say," he wrote, "that I cannot deal with this problem, as my parents have always told me never to have anything to do with horse-racing in any form."-Tit-Bits Magazine.

How to Preserve Clippings

Clippings may be pasted on heavy paper and shellacked or covered with cellophane which aids in preserving them, but it is believed that there is nothing that will keep newsprint paper from turning yellow when exposed to sunlight.

'Frisco Bill," three-year-old singing fox terrier, on his road to fame. Two years ago Miss Clair Haynes and her brother, Bradley Haynes of 509 Clair drive, owners of the dog, brought home a toy kitten. It was soft and white and fluffy.

Looking into the glass eyes of the kitten, "Frisco Bill" burst into song. It became a habit. He broadened his range of notes and was soon hit-ting a creditable "high C."

Now when a member of the family gives him a piano or ukulele accompaniment, Bill carries the tune, running the scale with apparent ease.

There is only one sad note to the story. Since he has attained fame as the silver-toned tenor of the neighborhood, he has forgotten about the toy kitten that started it all. He ignores it.

"Word-Blind" Boy, 12, Is Making Rapid Recovery

Hutchinson, Minn.-Twelve-yearold Earl Hemple is "word blind" but he is getting ready for some real work in the fifth grade of Minneapolis public schools.

In his spare time he has learned four years of reading.

Brying Bryngelson, head of the University of Minnesota's speech clinic in Minneapolis, says, gradually he is curing the boy of a rare ailment. In a short treatment period this summer the clinic made good progress.

Earl's ailment prevents him from connecting meaning and sound with written words. He could write words shown him, but he could not pronounce them. He could not write any word spoken to him, although he understood it perfectly.

Why Parents Turn Gray Little Falls, N. Y.-Because their eldest son, Frank "attends college and has had considerable difficulty with professors and instructors pronouncing his name," Ignatz and Wadyslaw Grzwaczewski have been permitted to change the family

ly for a cost of one to two cents per chick for a six-week period. Wheat is worth about the same per bushel for feeding as corn even we use today.

shorter than the mile measurement

San Marino

Legend says San Marino, on the eastern shore of upper Italy, was founded in the Fourth century by St. Marinus of Dalmatia. Its total area is 38 square miles. Its known history begins in 885 A. D. By the Tenth century San Marino had launched its republic. The Montefeltro family and the papacy protected it. Once it was captured by Caesar Borgia, but soon regained freedom. Napoleon recognized its independence. Garibaldi, great Itallian patriot, fled to San Marino on his first retreat and there disbanded his army.

Yellowstone, Largest Park

Largest park in the United States is Yellowstone. It exceeds in size the state of Delaware, is mostly in Wyoming, but extends into Montana and Idaho. Its creation as a park, at the suggestion of a Montana businessman, Cornelius Hedges, in 1870, was the start of our national parks system. Almost beyond belief are its natural wonders, and indeed early explorers who reported boiling springs, geysers, were called liars.

Much Water to Grow Sugar As about 4,000 tons of water are required to grow one ton of sugar, some of the cane fields in the less rainy sections of the Hawaiian islands are obliged to maintain extensive and costly irrigation systems, says Collier's Weekly. One of these sugar-cane plantations uses. throughout the summer, about half as much water as is consumed, during the same period, in the city of Philadelphia.

How to Keep Tobacco Moist If the man of the house mutters into his beard because the tobacco in his jar, can or pocket pouch dries out so fast, try dipping the humidifier of the container in a mixture of equal parts of glycerine and water, and the tobacco will stay moist much longer. The idea comes straight from the tobacco industry where glycerine is practically indispensable in the manufacture of smoking tobacco, cigars and cigarets because of its unique property of absorbing and retaining moisture. The glycerine-and-water treatment works equally well with any of the usual types of humidifier-blotting paper, felt, sponge or composition material.

TANEYTOWN, MARYLAND 12-31-5t 1937 CROP SUMMARY. FRANKING

The farmer bends his back to honest

He grasps the handles of the unwieldy plow, His business is to mellow up the

hardened soil In which to plant the seed he has to

sow. He does not seek an easy lazy life, To him all things since birth have

been a strife; At crowing of the cock in early morn, He goes to feed the cattle in the barn; His breakfast at the candle light he'll eat.

Rush forth at rising sun his day to start,

feet, For only thus he feels he does his part

He plows the ground, he plants the corn,

thru,

He mows the grass and cocks the hay, And stows it in the mow away, for coming day;

He cuts the ripe and waving wheat, And shocks the sheaves, row after row And hauls them to the thresher so He may procure the grain, before the coming rain.

'Tis not so easy as it seems, this work the farmer does.

Thru rain and sunshine, frost and snow,

No matter what others may do, or you He steadfast sticks to task the whole year thru.

But there are blessings that he has as well,

Blessings that outweigh the pain, he'll tell.

First he has home, content, and low of rent,

can yearn,

churn,

well filled barn Are flocks of fowl from which he may

select A fattened hen, capon or cock as he

elect, To grace his table, and 'twill be a

winner When all assemble at the Sunday

the wood box filled,

were chilled.

sun,

Nov. 30, 1937.

College Park, Md., Dec. 28, 1937-The total farm value of all Mary-land crops produced this year is esti-mated at \$49,979,000 according to the annual crop review of the Maryland Crop Reporting Service. The total value this year is about 14 percent under the 1936 total of \$58,246,000. For the most part the decrease in value was due to lower prices which more than offset increased produc-Total 1937 crop acreage of 1,-764,000 acres was 4 percent larger than the 1936 acreage of 1,698,000. Field crops accounted for 90 per-cent of the total acreage and truck crops made up the remainder or 10 percent. This was the same propor-tion as last year. Of the 1937 total farm value, field crops made up 75 percent, fruit 5 percent, and truck crops 20 percent. Last year field crops accounted for 77 percent, fruit 3 percent, and truck crops 20 percent of the total value. The combined crops of corn, oats, and barley gives a total of feed grain production this year about 2 percent larger than that of 1936. Of the total corn acreage of 516,000 it is estimated that 488,000 acres were harvested for grain, 20,000 were used for silage and the remainder or 8,000 acres were used for forage. Corn silage produc-tion is estimated at 200,000 tons as compared with last year's crop of 180,000 tons. Total corn production this year was slightly larger than last year's crop but due to lower prices the total value is expected to be 30 percent smaller. An increased acreage of wheat offset lower yields to give a produc-tion about the same as last year. The value of the crop is also practically the same as that of a year ago. A the same as that of a year ago. A decrease in barley acreage was more than offset by higher yields. An in-creased acreage and heavier yields made tame hay production about 58 percent larger than the small crop of 1936. Pastures during most of the growing season furnished more than the usual amounts of feed. The potato crop was about 18 per-The potato crop was about 18 per-cent larger than in 1936 but lower prices made the value a third lower than last year. Lower production and a drop in prices made the value of the swreet potate area considerable of the sweet potato crop considerably below that of a year ago. J. A. EMING,

Agricultural Statistician.

Hospital Doings Pat (in hospital)—Say, Doc, I asked that nurse to put a hot water bottle at my feet and she turned up her nose and walked away.

Doc-What else could you expect? She's the head nurse.

Pat-Oh, do they specialize that much? Then get me the foot nurse.

The Prosaic Lady

"I would like to lay the world at your feet," said the ardent suitor. "Why talk nonsense?" rejoined Miss Cayenne. "The world is already there, so long as I can avoid being stood on my head in a motor accident."

The most important thing about treating poultry diseases is to give the remedy in time.
