es, or like events. Miss Virginia Teeter has enrolled in Hood College, Frederick.

Miss Ann Neary, of Baltimore, spent the week-end with Mr. and Mrs. John Cain, near town.

Miss Viola Eyler, of Philadelphia, Pa., is the guest of Mr. and Mrs. Geo. Shriner, this week.

Mr. and Mrs. Cyril Golden, of Pittsburgh, were week-end guests of Mr. and Mrs. P. L. Hemler.

Miss Freda Stambaugh, near town, spent the week-end with Miss Geraldine Rill, at Upperco, Md.

Mrs. Raymond Spangler and son, Bernard, of Baltimore, is visiting her parents, Mr. and Mrs. Charles Young,

Master William, son of Mr. and Mrs. Wm. Albrecht was taken to the Frederick City Hospital, for treatment and observation.

Mr. and Mrs. Harry Mohney, daughter, Jean; Mr. and Mrs. Edgar Essig and daughter, Mary Lou, motored over the Skyline Drive, on Sunday.

Mrs. Joseph Elliot and Miss Rosa Kemper went on the Maryland Rural Women's educational tour of New York City, from Sunday until Tues-

Mr. and Mrs. T. C. Fair, of Dills-burg, Pa., and Mrs. Carl Snyder and daughter, Carolyn, of Mt Holly, visited relatives in and near town, on

The regular monthly meetings of the joint social Mite Society and Brotherhood of the Lutheran Church will be held on Wednesday, Oct. 5th,

The Junior Band will furnish music for the annual home-coming at the I. O. O. F. Home, near Frederick, this Sunday. The band will leave Taney-town at 12:45.

Frank Mahoney, a regular employee of the Blue Ridge Rubber Co., has purchased the Charles Hahn property, on York Street. Possession will be given October 1st.

Mr. and Mrs. Edward Heidt, Jr., of Orlando, Fla., and Edward Heidt, Sr., of Fredericksburg, Va., spent the week-end with Rev. and Mrs. Irvin Morris and other friends here.

Mr. and Mrs. Wm. H. Carter, formerly living near Taneytown, have wented a portion of Mrs. J. W. Witherow's dwelling, and will soon occupy it. We welcome these fine citizens.

Miss Catherine Kephart was operated on for appendicitis, at the Maryland General Hospital, Baltimore. She is now convalescing at the home any and all calls to fire. her parents, Mr. and Mrs. Chas.

The October meeting of the Home-makers' Club will be held Thursday, at 2:00 o'clock, in the Firemen's Building. The subject is "Arrangement of the Mantel." The project demonstrators have charge.

Well dressed husky looking fellows, claiming to be "unemployed," still call at our office. But while they look "husky" they are not looking for husking corn that stands as such a big invitation on our farms.

Visitors at Mrs. N. B. Hagan's during the week were, Mr. and Mrs. Jno. Roddy, Emmitsburg; Mr. and Mrs. John Winter, Philadelphia; Mrs. J. Riley, Binghamton, N. Y.; Mrs. Frank Burke and Mrs. Bollinger, McSherrys-

Mr. and Mrs. Charles W. Kingsman, Portsmouth, Ohio, visited relatives in this section last week. Mrs. Kingsman is a daughter of the late Levi B. Naill who once lived near near Taneytown. They had a very enjoyable visit, including one to the Gettysburg battlefield.

Miss Molly Wheatley, of Westminster, and Mrs. Charles L. Stonesifer, of Taneytown, visited their brother and sister-in-law, Mr. and Mrs. Ernest O. Wheatley, of Salisbury, Md., Sat-urday, who have recently undergone operations at the Maryland General Hospital, Baltimore. They are both improving nicely.

The Carroll County Christian Endeavor Union will sponsor three oneact comedies next month throughout the county. The plays are "A Bachelor's Baby" by the Taneytown District; "Wife Wanted" by the Mount Union District, and "Pa's New Housekeeper" by the Westminster District. The plays will be given in Taneytown, in the Opera House, on Saturday evening, October 15, at 8:00 P. M. A small admission charge will be made.

The Taneytown Dramatic Club held its first meeting of the season on Wednesday evening at the home of Miss Rose Beall. They are planning to present their first play of the season "Introducin' Susan" about Nov. 8th., for the benefit of the Carroll County Children's Aid Society. Sevening the county of the coun eral new persons have joined the club and all are entering upon their work for this winter with great enthusiasm. The Club is under the direction of Mrs. Grace Davis.

(Continued on Fourth Page.)

CO-OPERATE WITH FIREMEN Some Important Timely Advice to the General Public.

Next month we will observe fire Prevention Week, October 9 to 15th., and the special care that we should learn and impress upon our minds, individually and collectively is the importance of care in preventing fires, as well as the proper way of preventing small fires from being conflagra-

Team work is essential in carrying to a successful end any community affair. Whether it be a supper, party or a fire, all should work together to have it terminated successfully.

A fire company desires the indulgence, of the public, in co-operating in things during a fire which to the layman, seems trivial, but is of the utmost importance to the fighting of

A few of the things that the public should observe (and incidentally are unlawful) are: Following a fire truck within 500 feet and driving over fire hose. These two laws should be observed. A grave accident may happen to the men on the fire apparatus, the car following too closely, or others. By driving over hose, damage can and has been done in instances that has hampered efficient fire fighting, and is expensive. At the last meeting of the local fire company a large order was given to replace hose that was supposedly damaged by some thoughtless or careless person or persons driving over hose. Anyone can inform upon any person violating the above laws, and prosecution will follow.

and prosecution will follow.

The public should realize that a road or lane packed with cars of "curiosity seekers" can and often does interfere with the arrival of the fire fighting apparatus. This should be avoided. Then, too, these above mentioned cars should stay beyond 500 feet of the blaze, thereby giving the fire fighters ample room to work.

fire fighters ample room to work. Another thing for an operator of any vehicle to remember and observe is: Give the fire truck the right-ofway. Pull to the right of the road as far as possible upon the approach of the fire apparatus, giving it ample room to pass.

An action taken recently by the local company that should be explained to the citizens of Taneytown and vicinity is, that at the call to a fire, it will be answered by both trucks, as other neighboring companies are doing, and upon arriving at the scene of fire; if only one truck is needed the other truck will be returned immediately to the fire house. The company has had instances, previously, upon taking one truck, found it was necessary to call for the second truck, which meant loss of valuable time in firstlying a bleze. time in fighting a blaze.

The Taneytown Fire Company realizes that the town and community has made is possible, by their liberal contributions and support, in making it possible to keep an efficient fire fighting organization on hand for calls of fire. Therefore, the Company is prevent the serious consequences following the contributions of the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under consideration would be taken for immediate and thorough the type under con with thanks, the support given, as ing the public that the Company, is always ready and willing to answer

SAMUEL GALT BIRNIE'S WILL.

A news article in a Philadelphia daily, recently contained the following, that will be of interest to many citizens of Taneytown.

citizens of Taneytown.

"Samuel Galt Birnie, who died September 7th., at the Bellevue-Stratford, left an estate of \$25,000.

The will, admitted to probate today, provides that Mary V. Mackin, of 1345 N. 2nd. St., "in my employ for some years past," is "to have whatever money I may have at the whatever money I may have at the time of my death," in several banks.

No amount is specified.

The will then provides, however, that cash in the Saving Fund Society of Germantown is to be divided between his first cousins, Eliza R. and Eleanor Birnie, and the residue of the estate is to go to the testator's orother, Major General Upton Birnie, U. S. Army.' -11-

LOCAL AND GENERAL NEWS.

Occasionally, some of our readers tell us they do not care for general news in The Carroll Record—that they "get the general news in the daily papers." They want only "local" or Carroll County news.

Well, we are not in the business of helping the dailies along, and we assure these few critics that by far the greater number of our subscribers do not take any daily, and do want at least a summary of the most import-

And so, we see no good business reason for changing our long-standing custom in making-up our paper each week. Every reader gets a plenty for only \$1.00 a year, even if all do not want some of the features they get.

- 22---TWO REGISTRATION DAYS.

There will be only two more days for the registration of voters and seturing transfers—Tuesday, October 11th. On Tuesday, October 18 there will be a revision of the lists, but this is purely clerical and rames can not then be added. A transfer secured on the 4th. can be used on the 11th. for registration at the new voting place, if so desired.

Old friends, like old shoes, are often the most comfortable; and this is why we find them so much worth having, when we find going to be in. Be prompt, as the need is impainful without them.

O'CONOR WINS THE NOM-INATION FOR GOVERNOR.

An Enthusiastic State Convention was held.

The following nominations were made on Wednesday, at the Democratic State Convention; For Govern-or, Herbert R O'Conor; for U. S. Senator, Millard F. Tydings; for Attorney General, William C. Walsh; for Comptroller, J. Millard Tawes; for Clerk of the Court of Appeals, Jas. A. Young.

It was known early in the week that O'Conor would win for Governor, when the vote of Prince George's County was assured for him, following which, the recount in Allegany county was discontinued. Senator Tydings and all other can-

didates had a walk-over except Wm. C. Walsh, Allegany, a Jackson supporter, who received the required majority on the third ballot of the con-

Senator Tydings received 111 convention votes, to only 38 for Lewis who was specially indorsed by the

Mayor Jackson made the motion to make O'Conor's nomination unanimous, and Senator Radcliffe, campaign manager for Senator Tydings, peared for the latter and delivered a short address, thanking the convention on behalf of Senator Tydings.

EMERGENCY HOSPITAL COMMIT-TEE MEETS.

We publish the following that appeared in the Westminster papers, last week, somewhat against our inclina-tion, as we object to the receiving such copy a week later than other newspapers. However, the matter is one quite worth considering very carefully

and widely.
Senator J. David Baile presided at the well attended meeting called by the Maternity Centre Committee for the purpose of considering the estab-

lishing of a maternity centre in Car-roll County.
"Before proceeding with the plan discussed it was decided by the com-mittee to obtain from the service clubs, civic and social organizations and citizens of Carroll County some expression of public feeling toward the establishment of an Emergency and Maternity Center in Carroll county. All action of the project was delayed until some definite response from the public could be obtained.

The Committee was originally

formed by volunteers who were personally convinced that there was a great need in Carroll county for some central place in the county where vicopen for any and all suggestions for lowing the delay, in a large number from Susan Glatz and Mary Heltebriimprovements to make for greater of accident cases, that victims have efficiency; and hereby acknowledges, suffered because medical aid could not Katrina Umberger, in person. Reports

> The maternity ward proposed would relieve the horrible conditions confronting our doctors in so many child delivery cases among the indigent families of the county. In innumerable cases conditions of filth and uncleanliness beyond description surround child-birth solely because there is no available place to take the mothers before birth. The hospital planned rould care for such people as well as fulfill a recognized need for centralized "pre-natal" and "child-health"

It was announced at the meeting that State and Rederal aid could be obtained for the up-keep and maintenance of the Center as well as for the payment of the wages of the per--22-

STATE UNEMPLOYMENT REDUCED.

Baltimore.-Continuing their increased business with private employers, the fourteen offices of the Maryland State Employment Service filled 547 private jobs last week. This means that 29 more men and warmen left the that 39 more men and women left the ranks of the unemployed for jobs in private industry last week than the week before.

These facts are particularly encouraging just now, for the first full week of September failed to show the normal seasonal increase which had been expected. However, both of the last two weeks have yielded satisfac-tory numbers of jobs filled with private employers, and the outlook for the entire month is not now bad.

Moreover, even the Service's business with public contractors is on the up-swing. During the first full week during September, only 127 jobs were filled on public projects. This figure increased to 133 during the second week and then last week jumped up

The marked rise in jobs filled for private employers last week was due almost entirely to the increased activity in the Baltimore City office. Here the private jobs filled rose from 274 to 355, but elsewhere in the State business of this kind continued at

FIRE AT KEYSVILLE Large Dwelling and its Contents

The large frame dwelling, on the farm owned by Mrs. Alma Newcomer, Taneytown, situated near Keys-ville, along the road leading from Keysville to Emmitsburg, was totally destroyed by fire last Saturday evening. The fire was discovered at 5:30 o'clock, and the Taneytown Fire

Company was summoned by tele-

Completely Destroyed.

The nearby neighbors responded quickly, and had made good headway

in removing the contents of the building when the Fire apparatus ar-rived. Due to lack of water, the main efforts of the firemen were directed largely toward saving the contents, the most of which, including stoves, were removed. A dairy building, outside kitchen and wood house were also destroyed.

The exact cause of the fire can not be definitely stated, but it was likely from an open fire place in the nearby outside kitchen, in which there had been a fire made. The farm was tenanted by Grier Keilholtz and wife —the latter a daughter of Mrs. New-comer—and their children, all of whom were at the barn when the fire

was discovered. The loss was partially covered by insurance in the Taneytown Mutual Company.

LUTHERAN WOMEN'S MISSION-ARY CONVENTION.

The 56th annual convention of the Women's Missionary Society of the United Lutheran Church, in Maryland, will be held in St. John's Lutheran Church, Hagerstown, on Thursday

day and Friday, Oct. 13 and 14, 1938.
The program in brief, is as follows:
Thursday, 1:00 P. M., Registration;
2:00, Holy Communion; 3:00, formal opening, credentials, reports of program gram committee, by Mrs. W. O. Ibach and announcement of committees, reports of officers and conference pres-

A special session of the Executive Board, conducted by Mrs. C. E. Gardner and members of the Society, Service of remembrance, by Mrs. John C. Bowers. At 6:00 P. M., Reception for the Missionaries. OPEN SEASON FOR HUNTING.

The following are the open seasons for hunting game in this section of Maryland. The last date given is always included in the open season.

The squirrel hunting season in Maryland will open on Saturday, Oct. 1 and will be closed Oct. 15th. (15 days) The bag limit per day is 6. Squirreis are reported to be plentiful in some sections of the county. Persons hunting squirrels are warned not to mo-

lest game of other species.

The dove season will close Sept. 30 and reopen again on Nov. 15 and continue to Dec. 31st.

The open season on rabbits, doves, male ring-necked pheasants, quail and wild turkey is Nov. 15 to Dec. 31st. Wild Water Fowl, Nov. 15 to Dec. 29.

The Clerk of the Court who issues the hunting licenses is over-run with business in October and early in November, all persons should procure their hunting license early and avoid the rush.

The license fees are: Resident of county, \$1.25; State-wide license, \$5.25; non-resident of state, \$15.50. Hunting without a license, penalty, \$20.00 fine. Unlawful to hunt or kill game on Sunday.

It is lawful to train dogs between Sept. 10 and March 1 on upland game, provided an attendant accompanies said dogs but so doing no person shall be permitted to carry a gun or fire army of an description.

It is unlawful to hunt any upland game of any species (except deer) by means of any automatic-loading or hand operated repeating shot-gun or rifle capable of holding more than three shells, the magazine of which has not been cut off or plugged with a one piece metal or wooden filler incapable of removal, so as to reduce the capacity of not more than three shells at one loading.

Woodcock-Nov. 15 to Dec. 15. Raccoons, Opossums-Nov. 1st. to Jan. 31st. Muskrat, Jan. 1 to March 15th.

REPUBLICANS NOMINATE STATE CANDIDATES.

Governor Nice Appeals for an Active Campaign.

The Republican State Convention assembled at the Maryland Theatre, Baltimore, on Thursday. The follow-Baltimore, on Thursday. The following nominations were made. For Governor, Harry W. Nice; for U. S. Senator, Oscar Leser, Baltimore; for Attorney General, Leo Weinberg, Frederick; for Comptroller, William G. Jack, of Port Deposit; for Clerk of Court of Appeals, E. Roy Jones, Oakland

The convention was harmonious, and there was the feeling that Democratic disaffection over their bitter primary fight, and especially following the effort to defeat Senator Tydings for renomination, the party has a good fighting chance to win in November.

The nomination of John Jenetzkie, a popular Justice of the Peace in the Third District, for Congress against Vincent Palmisano, was enthusias-tically approved, and hopes are strong that the Republicans may carry the District in November.

Galen L. Tait fromer Republican chairman for twenty years, who was defeated for nomination for Senator, made a speech in which he was pointedly criticised, but this was the only discordant note.

Governor Nice, who followed Tait, said the convention was one of the most harmonious he had ever attend-ed, and went somewhat into detail on the outlook in general, closing by making a strong appeal for the active aid of the party throughout the

THE TANEYTOWN P. T. A.

THE CHAMBER OF COMMERCE MONTHLY MEETING.

The Taneytown Chamber of Commerce met in regular monthly session in the Firemen's Building, on Monday evening, September 26, 1938, at 8:00 o'clock. President, Merwyn C. Fuss, presided, and there were seventeen members present. There being no August meeting, the minutes of the July meeting were read and approved

Mr. Smith, chairman of the outing committee, gave a brief report of the annual outing, stating that 53 members went on the outing.
T. O. Brown, Wm. B. Naill and W.

Ritter were proposed and elected to membership.

In answer to the question of Rev. Bready as to whether anything had been done about the signal light at the square, Mayor Shoemaker report-ed no definite progress, but that the cost had been inquired into.

President Fuss paid tribute to Rev. Bready, the former secretary of the Chamber, for his work as the historian of the Maryland Classis of the Reformed Church, in publishing a history of that organization.

The matter of solicitation of the

merchants of the town for contributions and prizes for benefit affairs was presented by the President. He suggested the possibility of establishing a policy of regulation among the merchants so as not to discriminate against worthy public organizations. He also brought up the matter of a better agreement among the merchants as to times of closing during the summer and on holidays. Mayor Shoemaker also suggested that the merchants get together on the matter of closing earlier on Saturday nights, so as to avoid noise and confusion around midnight and early Sunday morning. Rev. Bready moved that a committee of three merchants draw up a schedule of store hours and holidays for a whole year and submit the same to the Chamber. President Fuss asked Rev. Bready to serve as chairman of the committee along with three mer-chants, David Smith, D. J. Hesson and Francis Shaum being named as the merchants.

Mr. Frank Alexander presented the matter of a free Maternity Emergency Medical Center for Carroll Co. He stated that there were State and Federal funds for the maintainence of such an institution, but that a building had to be found. Mr. Alexander said that what the committee wants is an expression of opinion about such a medical center from soorganizations throughout the County. It was moved and passed that the Chamber approve the idea of such a Medical Center for Carroll

Random Thoughts

TOO ANXIOUS TO BE POPULAR.

Some folks are so anxious to be popular that they try to agree with everybody, and dodge di-rectness and the giving of their real opinions. Smiles and effusive manner take the place of confident manliness, or in some other way they "pass the buck" and play the good fellow. Too much of this must eventu-

ally have an end, if one is to occupy a position of trust; for situations in life must be met when character and decision is required, whether popular or not with

everybody.
Somebody has said "Men are but children of an growth" but some men hardly grow a sort of childishness and their actions do not sow the real man, who needs to be honest in speech and act,

even if sometimes unpopular.
One can be frank and decisive without being offensive to right thinking persons. One can affable without being wishy-washy. The mind represents a standard, and expression of it denotes the character of the standard. P. B. E.

*J. WEBSTER EBAUGH. *LEWIS E. GREEN. *Present incumbents.

THE RECENT PRIMARY.

The recent primary election raises the question—Is it worth its cost to the taxpayers of the state? Its cost for Carroll County was \$7,147.47, so the question applies here too. There are other questions that are covered by an editorial in a recent is- list sue of the Baltimore Evening Sun, as follows:

"Seven days after the latest primary in Maryland the result is still in doubt. It is not merely that the returns are being challenged in some places, but in some others no returns have ever been made. Apparently you work a month and a half for the returns are being challenged in some places, but in some others no returns have ever been made. Apparently you work a month and a half for the return of the result is still wages—in taxes. If you are a white collar worker with a \$150 salary, you pay \$220 a year in taxes—which means, to put it another way, that you work a month and a half for the have ever been made. Apparently not all the voters have been counted, although it is a week since they were

There are two possible explanations of this. One is that election officials are withholding the returns for pur- 1937, 70 percent of all tax receipts poses of their own. The other is that they actually have not been able to count the votes in seven days.

They are not attractive alterna-Neither explanation does credit to Maryland, but for our part we incline to prefer the former. After all, if we have a crook or two among hundreds of election officials, the situa-tion is not hopeless; but if we are drawing election officials from a class so dumb that making a check-mark opposite a name is an intellectual operation beyond their capacity, why, then, the situation is pretty nearly

tures, but not to costs. The register- tions," knew plenty about "increased ed vote of the county is stated to be taxes," as also do those who own not now as stable in the value as it about 17,800, which we cannot help stock in them, because of receiving but doubt. The total vote for all short dividends-if any. candidates for President in 1936 was year totaled about 6525, or but little | ing of billions of dollars continues.

over one-third of the claimed registered vote, and only a little short of the vote for President.

The contest for the Senatorial nomination between the two parties and five candidates, was very different in interest, but not very different in results, as the total vote for the five candidates was only 6833 votes and the cost of each vote was \$1.04. Again we ask, what is to be done about it?

This means-what? Certainly it does not show great interest, although primary votes cost the county \$1.10 each to have cast and counted. We wonder just how much real difference it made to fully nine-tenths of the voters, who was nominated or who will be elected in November.

Such fooling with costly laws must show both carelessness and lack of interest. And some who made an effort at voting, made a bad job of it because for one reason or another, they did not know how to mark their ballot, even though they wanted to

We do not take much stock in The Sun's jibes at election officials because of their inexpertness, even though some of them may be partly true. Election officials, as a rule, are not expert accountants, but are appointed because of their being "good

Our form of ballot encourages mistake-making as well as practical disfranchisement, to a good many taxpayers. It is hardly a decent ballot, if the truth be told, and does not actions. stand for intelligent voting. Making a stab at x marking in the right squares, is not easy at all, for even intelligent voters. Dark booths and poor eyesight prevents.

We have always contended that a to vote a "straight ticket," should be able to do so by making but one X mark. This of course is not possible at primary elections, but it is part of the general subject.

As neither at the primary nor general election, it is possible for voters to personally know, every candidate or their fitness, we are of the opinion that because the primary has aimed to take the place of the old convention plan, it has not made a good job of it, either in the direction of better for taxpayers.

THE BIGGEST BUSINESS-TAX COLLECTING.

The following, on Taxes, is partly a new version of this much discussed subject. Ordinarily, we think this is an unprofitable subject as most folks here in Carroll County who have had no increase, but a decrease, in county taxes, do not understand how much they are interested. Read this I have profited by it, more often not. from the Industrial News Review, Others are doubtless in the same boat. Portland, Oregon.

business in this country. a recent study. the According national tax bill has increased 76 per cent in the past six years. Almost 24 | changes may be safely made. percent of our total national income is today consumed by branches of government. And, believe it or not, there are more than 175,368 taxing bodies in the United States, with an army of 3,000,000 employees.

Needless to say, this legion of tax gatherers doesn't exist simply to mulct the business or the individual with large means, whose salary or income is in the upper income brackets. It exists primarily to tax the little fellow—and to tax him deviously, through hidden, indirect levies assessed against every necessity of life. When you pay a \$3.00 elec-tric bill, you are paying 52 cents in taxes-and the fact that the electric company, instead of you, actually hands the money over to the tax collector doesn't lessen the burden. When you buy a 25-cent tube of tooth paste, you pay six cents in taxes. When you buy a 10-cent loaf of bread you pay 2¹/₂ cents in taxes. When you pay a \$40 rent bill, you pay \$10 in taxes. So it goes down an endless

you earn \$18 a week and own no taxable property, you still pay \$112 a year—12 percent of your hard-earned government.

pay the tax bill. There aren't enough rich-even if every dime they earned represented hidden taxes. the taxes you pay every day of your life—when you eat a meal, ride in your automobile, go to a movie, buy a shirt and a necktie, or do anything else. More and more of them are being levied each year. So never forget that taxation is your own personal problem, on whose reasonable solution your own welfare is vitally dependent."

Even here, especially in the towns where considerable business is transacted, especially by concerns unfortunate enough to be incorporated stock This applies to objectionable fea- companies, and therefore, "corpora-

And, there are more, and newer only 12,691. The primary election taxes due to come within the coming is very difficult to maintain fortunes vote for candidates for Governor, this year, as increased government spend- intact."

THE U. S. MUST STAY OUT.

There is no good reason why the United States should become involved in the pending war in Europe. We took part in the previous World War on the ground that it was to end all wars, but this state has not materialized, and never will.

The majority of the people of the European Nations do not want war; but are so bound up to war-lordism and the power of dictatorship as not to be able to stay at peace.

It is a strange and hard to understand situation when the people do not rule, because they can not control their own government, though largely in the majority. The people of the United States must show the world that this can be done, and how.

If we can not do this, then, our form of government is a failure, and no better than that of foreign nations.

THE PURGE.

NINE failures and several minor set-backs should give the president cause for concern for his leadership, but it is not likely that he will be, nor become any wiser because of these failures. There is no doubt of the fact that he has plenty of conservatives at hand, high in authority, to give him advice, and likewise there is no doubt of the fact that he has plenty of crack-brained radicals close at hand to give him advice, that he seems to like better, judging from his

As a matter of fact he seems to listen to all the advice given then goes and does as he had intended to do. It is scarcely likely that either Secretary Hull or Farley counselled the "purges" or even approved them; Democrat, or Republican, who wants it is more than likely that Secretary Ickes, and Squanderer Hopkins and his ghost writers Corckran and Cohen each advised him to take the course he did. Well he took this last advice and dashed HIS ship upon the rocks.

He is nautical man enough to know that a poor pilot not only endangers the ship and passengers but also the captain himself. It is to be hoped that for his own sake, and what is vastly more important, for the country's sake that he has learned his lesson. Once as a boy on the farm when government officials, or saving in cost I was going to school, but desired instead to "work" with the men, Old "Doc" Snyder, farm blacksmith, and general handy man as well as one of the best "farm-hands" on the place, who couldn't, as he himself put it, "tell a 'B' from a bulls foot" said to me when out in the fields where briars scratched: "Experience is a dear teacher, but a d-d fool won't learn by any other".

As thru life I have noted by own mistakes and the mistakes of others, that aphorism of old Doc Snyder's has repeatedly come to mind. Some times Politicians ought to know better, and "Tax collecting has become a big if the president has the political acumen he has been credited with possessing, he will change pilots while Baltimore. W. J. H.,

THE POOR GET RICHER.

One of the old adages being spotlighted today is that the rich are getting richer and the poor poorer. Yet Dr.Rufus S. Tucker, industrial economist, in an article in the current Quarterly Journal of Economics on "Distribution of Income" gives figures and facts that contradict this theory.

One of his most striking conclusions is that income is now much less concentrated in the United States than it was during and just after the Civil

"Although very wealthy persons are more numerous now than then, the number of persons with moderate incomes has increased more than the number of very wealthy persons. At What it all amounts to is this: If the same time, as shown by other studies, the average purchasing power of wage-earners has increased greatly."

This is only one of the conclusions drawn by this economist. And he bases his conclusions, not on opinions, but on the records of the federal income tax. Certainly this picture does Get over the delusion that the rich not give weight to the prevailing share-the-wealth movements of visionaries.

In surveying the income of the wealthy, Dr. Tucker arrives at the conclusion that there is a rapid turnover in the upper income brackets.

"The members of the upper income classes," he points out, "are a constantly shifting lot. The income tax statistics as they stand give little support to the idea of a hereditary plutocracy. Most of the income of wealthy individuals has come from highly variable sources, such as dividends and sale of capital assets.

"Real estate, which was the foundation of the wealth of the ruling classes during most of recorded history, is used to be, and is much more heavily taxed. Consequently, in spite of trust funds and other legalistic devices, it

In reviewing the recent trend of

national wealth and income, Dr. Tucker arrives at the following conclusion: "Persons with incomes equivalent in purchasing power to between 4,000 and 10,000 1929 dollars have become a much larger proportion of the population since 1916, and those with incomes equivalent to \$50,000 or more have become a smaller proportion. Even in 1916 the middle class was more important than in 1870, but since 1916 its growth has been more rapid than that of the very wealthy class, whether one measure to 1925 or to

This factual study refutes much of the loose thinking based on the erroneous assumption that wealth and income are becoming more concentrated each year-pretty generally accepted as truth because of constant reiteration throughout the land.

Yet we will never make progress until we face honest facts honestlyand build accordingly.-N. I. News Service.

NEW DETECTIVE THRILLS!

Another of the new series of thrilling, true detective stories by a world-famous sleuth will appear in the October 9th, issue of The American Weekly, the big magazine distributed regu-larly with the BALTIMORE SUN-DAY AMERICAN. On sale at all newsstands.

Lung Sawed in Two, **But Boy Still Lives**

PINE BLUFF, ARK.—Fifteen-year-old Buddy Middlebrooks, his right lung almost cut in two by a circular saw, is recovering, to the surprise of his physicians.

When he was brought to a hospital here doctors expected him to die within a few minutes. Instead he gained consciousness and is improving, thanks to a strong constitution.

BOY ON TRACKS IS SAVED FROM DEATH

Engineer Jolts Passengers But Georgie Is Safe.

BOSTON.—The prompt action of an engineer saved the life of a threeyear-old boy who had fallen on the main line tracks of the New Haven railroad beneath the Broadway

Seeing the little boy prostrate on the road ballast a few yards ahead, W. G. Bartol of Dorchester, engineer of a gasoline motor train inbound from Dedham to the South station, stopped so suddenly that his passengers were jolted from their seats. The boy was unhurt except for a scratched cheek received in his fall on the cindered track

Child Placed on Train.

He was placed on board the train and taken to the South station where railroad officials tried for two hours to learn his name and address. The only information he could give was that he was "Georgie." Asked what his father's name was, the child replied:

"His name is Daddy, of course." Later, Georgie was taken to police headquarters where he was placed in custody of Capt. Archibald Campbell and Detective Frank Hagerty of the bureau of criminal investigation, while search was made for his parents. A typewriter and a set of dominoes satisfied him as toys, and policemen brought him

milk and crackers for his supper. Mother Appears; All's Well.

Shortly after 11 o'clock, when the police were preparing to find quarters for the child for the night, his mother, Mrs. George Gardner of South End, appeared to claim him.

She said she had spent many hours searching for him when he failed to return home in the evening and finally appealed to the police of the Warren avenue station, who sent her to headquarters.

Switch Game Still Good: Cobbler Loses \$2,000

CARTERET, N. J.-Karl Born, fifty years old, a shoemaker, asked police to help him find two men who swindled him of \$2,000. most of his savings, in one of the innumerable variations of the perennial switch game.

The two confidence men, one of them elderly, made his acquaintance by bringing several pairs of shoes to his shop to be repaired. On their third visit, Born said, the older man brought a metal lock box in which he said was \$20,000. He said he was ill. feared that death was near and wanted to give his money to the poor.

Born said that the man pleaded that, being unacquainted in Carteret. he wanted his companion and the cobbler to select a list of deserving recipients of his munificence. The two were to receive \$600 each for their services, but the older man asked that a cash bond be posted. The younger man offered \$2,000 as his bond, and Born went to his bank and drew out \$2,000. He thought that the two bonds, \$4,000, were placed in the lock box, which was left in his care. When the supposed philanthropist and his young helper did not appear Born forced the box open and found that it contained only strips of paper and a few \$5 bills.

U. S. RELIEF MAP TO BE LARGEST IN THE WORLD

Work Started in 1923: Will Not Be Completed Until 1940.

WELLESLEY, MASS. - A huge curvature relief model of the United States, largest of its kind in the world, is being built at Babson institute by a corps of geographical ex-

Work on the model began in 1923, but various obstacles delayed work during the depression. On January 1 of this year, Dr. Wallace W. Atwood Jr., Clark university geographer, was placed in charge of the project. Since then the rate of construction has increased about 15-

Under the present program, completion is scheduled for January,

The model is in the Coleman Map building, erected specially for the model on the Babson campus. There a giant, dome-shaped, steel framework-63 by 45 feet-has been constructed by Bethlehem Steel corporation. It reproduces in exact proportion the earth's curvature.

On this framework is placed a plaster base map on which is painted the outline of the United States. Built in Sections.

Because of the size of the model, it is being constructed in small sec-tions, to be placed in their proper position on the curved framework. Each section is one degree of latitude long and one degree of longi-tude wide. The finished model will contain 1,216 such sections, of which more than 400 now are completed.

Systematic mapping of the United States did not begin until 1885, when certain sections of New England were surveyed. These first efforts were unsatisfactory, and a new start was made. Until now, only about 55 per cent of the country has been covered by the official topographical survey maps of the federal govern-

In areas having no topographical survey, stream maps must be used. These are combined with airplane photos and supplemented by all obtainable spot-elevation figures.

Many Sources Used.

From this is created a topographical map that serves as a guide in construction of the model. Sources being used by Dr. Atwood and his staff include the regular United States geological survey maps, coast and geodetic survey charts, geological survey bench marks, state geodetic surveys done by the WPA, maps by chief engineers of railways, by war department, coun-

ty and state highway engineers. Among the most important sources of information are the sectional aeronautical charts of the bureau of air commerce, designed primarily to show airline pilots the lo-

Besides extensive areas in the West and South unmapped except for air charts and scattered elevation figures, are the Mount Wachussett section of Vermont and the northern section of Maine. Northcentral Pennsylvania and the Carolinas also have similar areas.

The Father of Umbrellas For Men Is Remembered

LONDON.—The recent sale of Jonas Hanway's umbrella at a auction room has recalled Hanway's fame as the philanthropist who introduced umbrellas into the rainy streets of London about 1750 and so saved thousands of Londoners from pneumonia and rheumatism.

Drayton, Swift and Gay all had written of umbrellas in London long before Hanway's time, but umbrellas to them were a women's fashion. Hanway's achievement, after he returned from Persia with his umbrella, seems to have been the conversion of the male population, and so well did he succeed that not long after his death in 1786 even army officers carried umbrellas in

Pays \$300 for Old Stamps: Finds One Worth \$50,000

LOS ANGELES.—A few months ago, Warren R. Du Bois purchased a stamp collection from an estate for \$300. Included was a 1-cent blue issue which he marked for sale at \$3. It went unsold. A short time later he found it bore a Baltimore, Md., first-day cancellation of August 17, 1861. Jubilant, Du Bois checked with experts. The stamp is worth \$50,000.

Eating 10 Meals a Day

Job of 125-Pound Girl BOSTON.—Petite Anna Martin is paid to eat 10 meals a day.

Employed by a chain restaurant to try out the menus of rival con-cerns, the slim professional "tast-er" is on the job six days a week endeavoring to "lift" the most palatable of rival concern's dishes and transplant them to her employer.

Miss Martin keeps in trim for her job by walking every place she goes. While the exercise belps, it can hardly be compared to the energyconsuming occupation of six-day bicycle riders, the only other persons to approach the eating capacities of the 125-pound "gourmet."

Cheese Belongs in Class of Staples

Replaces Meat or Fish In the Main Course

By EDITH M. BARBER

CHEESE has the honor of being the first manufactured food. Its discovery was probably accidental. When milk was carried in a skin bottle made from a goat's stomach, it came in contact with the rennin which remained, and separated into curds and whey. Since that time milk curd has been the basis of cheese manufacture.

Cheese retains most of the food value of milk and is, of course, a concentrated food. All European nations have innumerable kinds of cheese of varying texture and flavor. In many of these countries cheese furnishes the largest amount of protein used daily.

Cheese should be considered a staple food rather than an accessory. The custom of putting bread and cheese together is excellent from a nutritional standpoint, as one supplements the other. We also are accustomed to serve many cooked cheese dishes on toast and for a very good reason. One cheese made of whole milk is about equal to another made in the same way. Cheese made from skimmed milk, while it is lacking in fat, provides a larger percentage of protein. This essential requirement of the diet is provided in its best form by every type of cheese as well as by milk. While we may all enjoy a bit of cheese after dinner, because of the tang which its flavor provides, it actually belongs in the main course of a meal to replace meat or fish from time to time.

Poached Eggs on Cheese Toast. 12 slices bread

Butter 1 cup cottage cheese 2 tablespoons minced onion

1 teaspoon paprika 6 poached eggs

Saute sliced bread in butter until light brown on both sides. Spread with cottage cheese, mixed with onion and paprika. Have ready six poached eggs and arrange on six slices of toast. Pass the extra toast.

Tomato Rarebit.

1 pound soft cheese Paprika, pepper ½ teaspoon salt ½ teaspoon mustard

1½ to 2 cups tomato soup Cut the cheese in small pieces, add mixed seasoning and cook over a low fire until melted. Add enough tomato soup to thin the mixture so that it may be poured on slices

Spinach and Cottage Cheese.

3 cups cooked spinach 2 tablespoons butter

Pepper

½ pound cottage cheese Paprika

Dress cooked spinach with butter, and salt and pepper. Put on a hot platter and spread with a layer of cottage cheese. Sprinkle with paprika and serve.

Cream Cheese Sandwiches.

1/4 pound cream cheese

Cream Stuffed olives Bread

Butter Lettuce

Moisten cheese with a little cream. Add minced or sliced stuffed olives. Spread alternate slices of bread with cheese mixture and butter. Put together, with lettuce, if desired.

Cheese and Tomato Canape.

White bread Roquefort cheese Butter

Sliced tomatoes Lettuce

Sliced cucumbers Mayonnaise Ripe olives

Cut the bread one-fourth inch thick and form into rounds with a biscuit cutter. Saute on one side in butter. Spread the untoasted side with the cheese and butter, which have been well blended. Peel, slice and chill the tomatoes, lettuce and cucumbers. Arrange the spread rounds on lettuce leaves, on each place a slice of tomato, two of cucumber, and garnish with mayonnaise and ripe olives.

Cheese Sauce.

tablespoon butter 2 tablespoons flour ½ teaspoon salt

Pepper 1/2 teaspoon dry mustard

1 cup milk 1 cup soft cheese, pressed through a strainer or ¾ cup grated hard

1 teaspoon Worcestershire sauce Melt butter, stir in flour and sea-sonings. Stir in milk slowly and stir until thick and smooth over low fire. Add cheese and stir until melted. Add Worcestershire sauce.

Potatoes With Cheese.

21/2 cups diced cooked potatoes 3 cups well-seasoned white sauce ½ cup finely cut cheese

Combine potatoes and white sauce and mix well. Pour into greased baking dish and sprinkle top with cheese. Bake in a moderate oven (375 degrees Fahrenheit) 15 to 20 minutes until potatoes are light

Age of Mountains Told By Semi-Precious Stones

NEW YORK.-Garnet and tourmaline, staurolite and zircon, and a host of other heavier-than-average semi-precious stones now have a new use—telling the age of mountains. In the Big Horn basin of Wyoming, Dr. Marcellus H. Stow, Washington and Lee university geologist, has been tracing the source of the ancient sediments back to the still more ancient mountains from which they came.

Piled one over the other, with the youngest on top and the oldest below, the Cretaceous and Eocene sediments of the area were derived from the wearing away of the highest of the ancient Rocky mountains.

Thus, the Hell creek beds contain abundant zircon in all samples, suggesting their origin from a zircon-containing mountain. They contain no hornblende, showing that the source of the sediments was hornblende-free. Further studies show that the Hell creek beds were de-rived from the erosion of sedi-

Each bed of the series present in the Big Horn basin was likewise studied for heavy minerals, and its probable source determined. From this Doctor Stow hopes to determine which areas were "up" during each phase of the Laramide period of mountain-building, 90,000,000 years ago, more or less.

Giant's Causeway, a Wonder

The remarkable group of basaltic columns on the north coast of Ireland known as the Giant's causeway, or courseway, ranks as a world's wonder. These rocks project 300 feet out into the North channel near Bengore head, about eight miles from Portrush. The name originated from a legend that they were once part of a bridge or causeway over which giants passed between Ireland and Scotland. According to geologists this interesting formation has some natural connection with the basaltic formations on Staffa island, near the coast of Scotland, and is apparently the result of an upheaval of basalt during the Tertiary period. Ages of erosion have left a line of perpendicu-lar cliffs 500 feet in height. The individual columns of the Giant's causeway, of which there are some 40,000, are cut as if by mathematical calculation and so closely are they connected that water cannot pass between them. It is hard for the spectator to realize they were not carved by human hands. Their height ranges from 15 to 36 feet and their diameter from 15 to 30 inches. Most of them are pentagonal and hexagonal.

Defies Curse; Lies in

Desecrated Sarcophagus LONDON .- A curse which is said to have cost many lives was defied by F. W. Jacquemin, of Wolverhampton, England, when he lay down in the desecrated sarcopha-

gus of the last abbot of the ruined

Bindon abbey at Wool, Dorset. By his action, Jacquemin has, according to local superstition, doomed himself to violent death within a year.

Since the abbot's tomb was robbed more than 200 years ago, the curse is said to have been on it. It was in this sarcophagus that Angel Clare, in Thomas Hardy's "Tess of the D'Urbervilles," while sleep-walking on the first night of his honeymoon, placed the tragic Tess. Several persons who have defied the curse have been killed in acci-

Farmers Saved Millions

By Insect-Eating Birds

The fantastic theory that insects might some day dominate the world, sometimes advanced by imaginative scientists, would become a reality if it were not for birds, according to the American Wildlife institute.

"Birds constitute the main check against the reproduction of insects," points out C. M. Palmer Jr., assistant secretary of the institute. "If that check were removed, insects would multiply so rapidly that they would clean the world of all vegetation, leaving man to starve in a barren, deserted waste."

Birds usually concentrate in areas threatened by unusual outbreaks of pests, Palmer points out. An example occurred during outbreaks of the Rocky mountain locusts between 1865 and 1877. These voracious pests denuded many places they visited of every green

According to Dr. W. L. McAtee, technical advisor to the chief of the bureau of biological survey, a thorough investigation of the relation of birds to the outbreak showed that the feathered tribe was, in many instances, the means of saving crops from destruction.

"Conspicuous and important as are the activities of birds in gathering at the scene and taking part in the suppression of insect outbreaks. probably their every-day services in consuming insects of all kinds, thus holding down the whole tide of insect life, are of greater significance," the survey expert says.

The American Wildlife institute points out that the value of insecteating birds to the nation's farmers is more than \$350,000,000 a year.

All Indians Clever at

Chipping Their Flints Though some Indians were more proficient at it than others, and the

methods of some tribes were more advanced than those of others, there was very little secret about the makably all the Indians knew how, says a writer in the Cleveland Plain Dealer. ing of flint arrow heads, and prob-

Flint and similar stones were used not so much because of their hardness as for the reason they could be flaked off and fashioned into the desired shapes as arrow, lance, spear or harpoon heads knives, saws or scrapers. The flint was to be found in open fields, boulder beds and elsewhere, and the tribes camped occasionally near the larger supplies to break off with rocks or hammers the quantities and sizes of flint chips needed. These were carried home, to be flaked off and worked into shapes with the aid of sharp-pointed implements of bone. The waste and refuse of the process, as well as the tools employed in it, have often been found on the sites of early Indian dwell-

The products of the primitive industry range in size from tiny arrow tips to ceremonial spear heads more than a foot long.

Colors as Symbols

skin becomes gray, faint purplish or bluish after a blow, severe cold or fear, hence a panic or funk is symbolized as blue. The term "brown study" has been used for four centuries and was apparently derived from the figurative meaning of "brown" as "gloomy, serious." Shakespeare speaks of the "green-eyed monster" of jealousy, with such a disposition that all things appear distorted or discolored. Another explanation would be that a person with a sickly, greenish complexion showed the effects of fear or jealousy. The color yellow has denoted envy, inconstancy, faithlessness, and thus cowardice. In some countries people have daubed the doors of traitors with yellow, to show their contempt. The terms "red with rage" and "purple with passion" indicate the observed effects upon the complexion, of extreme anger or passion.

"Uglies," Breakfast Fruit

They call them "uglies," Jamaica's contribution to breakfasts and desserts. Uglies are a cross between a grapefruit and a tangerine, are sweeter than the juciest orange, and look like a half-deflated basketball. When the fruit was first produced near Kingston, a Jamaican took a look at its wrinkled skin and remarked, "It's ugly." So "ugli" it's called, although swanky restaurants, loath to include such an "ugly" name on their menus, are fervently wishing that someone would think of a better one. The ugli is larger than a grapefruit and has a skin about half an inch thick. Cut in two it looks like a grapefruit but is colored like an orange. One ugli has been known to produce over half a pint of juice, not so tart as that from the grapefruit. Many of the fruit measure nearly six inches in diameter.

Plant and Factory

A plant is a set of machines, tools, etc., necessary to conduct a mechanical business, often including the building and grounds; or in the case of a railroad, the rolling stock. A factory is an establishment appropriated to the manufacture of something, including the buildings and machinery necessary to such manufacture. Plant in the broader sense includes such things as manufacturing plant, hydro-electric plant, power plant, and railroad

CORRESPONDENCE

Latest Items of Local News Furnished By Our Regular Staff of Writers

We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

All communications for this department must be signed by the author; not for publication, but as an evidence that the items contributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted.

FEESERSBURG.

Well, we are back to real time again —and better content. If we were Dictator of these U. S. A. there would be no more "daylight saving;" but everybody could get up as early as they please for an extra hour of work or pleasure. The latest Radio Guide announces "500 programs change time this week". Such a mix-up!

A party was given Richard Grinder A party was given Richard Grinder last Thursday evening to celebrate his birthday. The visitors present were June and Rodney Bostion, Eva Lescalleet, Nancy Lee Grinder, Jimmy and Paul Williams, Frances Crumbacker. There were games and shouts of fun, then sandwiches and group ice gream cake and candy for cccoa, ice cream, cake and candy for all, and behold a cake with seven candles on it which required two big blows to extinguish. Gifts of stockings, handkerchiefs, pencils, tablets of paper, a suit of clothes, toys, and candy were received.

Last Thursday, Mrs. Wm. Hare and Mrs. Wm. Catron with her coz John Barr and wife, of Waynesboro, visited at the Birely home. Mrs. Catron is an octagenarian of Sacramento, Cal., who came across the U. S. alone to attend the Barr reunion at the City Park, Hagerstown, last month; and has been visiting friends and relatives since then. She left home on Aug. 4, traveling by R. R. over the Central Route, stopping off in Ia., Ill, Pa. and Md., and will return early in October via Miss. and Texas, over the Southern route. Her faculties are amazing, and it was very interesting to hear facts of her early life near Shippensburg then fifty years on the

MANCHESTER.

Suppers are the order. This Saturday Ladies' Auxiliary of Fire Co., has one here, while V. B.'s at Millers also have one. Oct. 8, the P. T. A., will have one in connection with the school fair, Oct. 7 and 8th. I. O. O. F. will have one Oct. 22.

Mrs. Amelia Fridinger who has

been on the sick list for several weeks

is improved. The Sunshine Society will meet on Monday, Oct. 3, at 8:00 P. M., at home of Miss Fannie Ross, Rev. W. R. Barnhart and family, of Frederick were the guests of Miss Ross, Sun-

Rev. Dr. John S Hollenbach, Man-chester, attended the meeting of members of the Kingdom Service Committees of the eastern part of the Evangelical and Reformed Church held at Harrisburg last Tuesday and Wednesday.

The attendance at Rally Day, in Trinity Reformed Church, Manchester, on Sunday morning was 25% above that of last year while the at-tendance at the Rally of the Union school at Lineboro was slightly ahead of a year ago. Rev. Dr. W. R. Barnhart of the Faculty of Hood College, Frederick, gave a challenging address at both places on "What Does It Mean to be a Christian."

THE STORY OF THE CHICKEN IN A BOTTLE.

The following is the story of the chicken raised in a bottle, as written by Rev. Frank E. Miller, Mt. Airy.) "We have been pals—the little old-hen, myself and her children. For more than thirty years, we have pulled together. She helped pay off the mortgage on the farm, buy the first automobile, and send us "kids" to college. In fact the little hen has done a fine job feeding a hungry world-sunshine in sealed packages (eggs) and poultry meats.

But from the first a committee of neighbors indignantly declared, "You are cruel! It is going against nature to take eggs from the mother hen and place them in an incubator. They will not hatch, and if they do the chicks will all die". But they did hatch, and we found a mother for them in the modern brooder. The little old her said: "If you agree to hatch the eggs and earn for the chicks." and care for the chicks, I will go on laying more eggs." And how she has laid—more than 300 eggs in one year in many cases. We have tried to carry out our end of the bargain by hatching millions of chicks annually. In spite of the progress the hen has

made, along the pathway of her advance there lurked a deadly enemydisease. Coccidiosis, bronchitis, testinal worms, and range paralysis, etc., have taken their toll in the death

of millions of chickens annually. We have learned through science applied to poultry keeping, that proper light, ventilation, sanitation and nutritious foods will prevent much of this disease hazard. Because the poultry is one of major importance in our modern life, the general public should know more about the disease hazard, and especially how to prevent

Herein lies the objective which prompted the exhibit of "Donald" in the large bottle or glass cage for a period of five weeks. This is a noted way to call attention to proper lighting, ventilation, sanitation and scientifically balanced food. Of course it is not expected that poultry should be kept in glass bottles. But, the principles of lighting, ventilation, sanitation and scientifically balanced food, here shown, should be written

into the program of every poultryman.

During the period of this exhibit "Donald" was well contented, and happy; at least, as far as my thirty years of experience will permit me to understand the psychic reactions of poultry. He was put into the bot-tle at four weeks of age, weighing one-half pound. He was taken out of the bottle at nine weeks and weighed 2% pounds. Now, at 16 weeks he weighs four pounds. "Donald" had plenty of light, and proper ventilation, with no drafts, through the three large and six small holes in the bottle. The sanitation in the bottle was perfect. He stood on a wire netting two inches from the bottom of the bottle. By the use of water running through a rubber tube the bottle was thoroughly cleaned daily. During the hot days in July when other fowls in shaded houses were suffering from the intense heat the attendant ran cold water over the outside of the bottle giving "Don-ald" the advantage of air conditioning. He had proper food and water at all times.

It is sincerely maintained that there was no unkindness shown the hen thirty years ago when we took over the job of hatching her eggs and raising her chicks. Nor was "Donald" treated cruelly. But, dur-ing the time he was in the sun-parlor, or air-conditioned pullman, "Donald" was one of the most highly favored fowls in chickendom." AN APPEAL FROM CHINA.

The following is from Rev. Hallock, to whose Christmas appeals some of our readers have responded for sever-

al years.

"May I write to make two special requests of you? The first is that you help me give a treat to my little Brownies at Christmas. We have at least five hundred of our Sunday School scholars gathered from the terrible wreck of war. We are still refugees and are meeting in very uncomfortable circumstances; but we wish the more to give the little ones a good treat, helping them to forget their troubles.

Then there are tens of thousands of homeless, hopeless little ones running around on the streets. We could use a fortune helping out these unfortu-nate wee ones. It would be a big problem to care for all these even had we the money; but we do wish and plan to help the little ones in our Sunday Schools. They belong to us. Do not feel that you must give, or that you must give a large amount. I am asking others and each giving a little help to make up the amount desired. Do not send parcels of gifts as they cost for postage, they get broken on the way, they take much valuable time passing through the Customs and also we have to pay heavy customs dues. Money comes with no expense and we can buy presents more alike and the little ones feel they are treated more

My second request is for your help with my regular work, rents, helpers' salaries, and other expenses. Expenses go on in spite of the sad war, often larger because of the war. Indeed the war brings constant mands upon us for increased outlay and unescapable relief demands and appeals that pull at our heart strings I shall be very grateful for your interest, prayers and gifts. God give you the cheerful giver's blessing.

When you give please tell me how

much of your gift is for my Brownies' Christmas treat, and how much for my regular work, and, if you wish to send something for relief of the

refugees also tell me how much.
Please send your gift to my brother, Rev. G. B. F. Hallock, D. D., 10
Livingston Park, Rochester, N. Y., U. S. A., who will deposit it in my bank in Rochester and I can draw it out through the bank here, so it need not go through the Chinese Postoffice nor through the hands of the war censors. I am writing early for the mails are presented and of the market are presented and of the market. mails are uncertain and often much delayed. After Christmas is over I'll try to write and tell you of our good times and send my Brownies "Zia-zia noongs—Thank, thank you."

May you have a Merry Christmas, the merrier because you have helped to make others happy. Little, simple gifts will be appreciated by my Brownies as much as costly gifts are prized at home. Keep praying that the war cease, for the children's safety, and for the conversion of the Chinese and the Japanese. With kindest regards, Yours in Christ's glad service,

(Rev). H. G. C. HALLOCK.

______ Tick-Tock of 125 Clocks Makes Home Lively Place

CLEVELAND.-When Charles S. Mills has time on his hands he goes out and buys another clock. He already has 125 clocks in his home, all in running order.

Mills, an automobile mechanic and machinist, started with an old square mantel clock, bought for a dime. He took it apart and put it together and it ran smoothly.

Soon he had 50 clocks. His hobby absorbed all his spare time and

"I broke up 75 old clocks and kept the works-and I gave away 50 clocks before I cut my eyeteeth,"

Mills said. "When I come home from work I go into my clockroom. Sometimes I start them all going at once. It takes an hour and a half."

His clocks' ages range from 65 to 170 years. It is at the even hour that he is happiest. At this time the cuckoos cuckoo, the chimes chime, the grandfather clock booms forth and the Swiss musicbox clocks tinkle melodiously.

ANOTHER CHANCE

Bride (sobbing)-Look how the rain is pouring down on my wedding

Bridesmaid-Don't cry, dear, next time it will probably be clear and bright.

Falls Ten Stories,

Offers Apologies FRESNO, CALIF. - Chester Wagner, 27, a window washer, interrupted five women in the midst of a beauty treatment when he crashed through the skylight into a beauty parlor after falling from the tenth story of

the building next door. The abashed Wagner mumbled his apologies and scurried out the front door to the emergency hospital, where he was treated for minor lacerations.

COMMUNITY LOCALS.

Mrs. Mary M. Ott, is visiting her brother, Wm. Ott and family, at Mercersburg, Pa.

Mrs. Paul S. Griffith and Peggy, of Westminster, are spending a few days with Dr. and Mrs. F. T. Elliot.

Merwyn C. Fuss will be the guest speaker at the S. S. Rally of the Man-chester Lutheran Sunday School, on Sunday morning.

Mr. and Mrs. J. D. Overholtzer and daughter, Pauline, called to see Mr. John Case, at Frederick Hospital, on Sunday afternoon, and found him looking well, and in good spirits. Jimmy Carson Elliot, entered the Freshman class at Western Maryland

College, on Tuesday. Francis, Jr., and Lewis, 2nd., returned to the college this Friday as Senior and Sophomore. There will be a meeting of the

Women's International League for Peace and Freedom in Grace Lutheran Church, Westminster, Thursday, Oct. 6th., at 2:00 o'clock. The speak-er will be Miss Carrie Mourer, Westminster, and she will tell of a trip to

William E. Valliant, well known to the older members of the P. O. S. of A., died at Maryland University Hospital, Baltimore, last Friday, following a brief illness. He had served as both National and State President and was widely known. He was also a 83° Mason. His age was 59 years. He had lived on the Eastern Shore of Maryland, in Delaware, Baltimore City, and last in St. Michaels, Md. He had been extensively engaged in the manufacture of fertilizers.

CARD OF THANKS.

We wish to express our appreciation for the fine work of the Taneytown Fire Co., and the kindness of neighbors and friends, who in any way assisted at our recent fire. Thanks for the donations given.

MR. & MRS. GRIER KEILHOLTZ. MRS. ALMA NEWCOMER.

ALLISON FAMILY REUNION.

The Allison family held their reunion on Sunday, September 25, 1938 at South Mountain Park, Arendtsville, Pa. Twenty-one members were pres-

ent, one less than last year.

The family were honored to have as their guests, the Reverend Paul Beard and his family, of Mount Joy, Pa. Preceding the luncheon he graciously offered prayer. Later he spoke briefly of the outstanding importance of the family among our American in the family among our American in-stitutions and of the significance of reunions.

The greater part of the afternoon was given over to informal visiting together. Bright sunshine and warm breezes contributed greatly to the enjoyment of the occasion and enticed

all to tarry almost until the sunset.

The following were present from Pennsylvania, Dr. and Mrs. C. E. Allison, Williamsport; Mr. and Mrs. Robert Reinecker, York; Mr. and Mrs. William Sipe and Dr. Edward Sipe, Waynesboro; Miss Anna Reck, Mrs. Waynesboro; Miss Anna Keck, Mrs. Emma Shryock, and Mr. and Mrs. John Caltrider, Gettysburg, and Rev. Paul Beard and family, Mt. Joy; from Maryland, Mr. and Mrs. Charles Reck, Manchester; Mr. and Mrs. William Reck, Mr. and Mrs. Martin Hess and Hess Reid, Harney, and Miss Minnie Allison, Mrs. J. W. Witherow and Grace Witherow. Grace Witherow.

The next reunion will be held at the

September, 1939. MARRIED

same place on the last Sunday of

LONG-MACKLEY.

The wedding of Miss Dorothy Virginia Mackley, Washington, D. C., and Mr. Benjamin F. Long, Jr., of Glen Burnie, Md., was held Saturday, September 17, 1938, at 8:00 o'clock, at the home of her sister, Mrs. Gladwyn Reldewson 5:79, 4th St. N. W. Wash Balderson, 5730 4th. St., N. W., Washington, D. C., the Rev. C. N. Williams officiating. The living room was beautifully decorated. The fire place was decorated for the occasion with white chrysanthemums, white gladiolas, fern and tall white candles. Miss Gladys Thrift was the pianist and rendered beautiful selections: "O Promise Me,"
"I Love You Truly," "Indian Love
Call," and "Lohengrin's Wedding
March."

The bride, who is the daughter of Mr. and Mrs. Howard Mackley, of Taneytown, was given in marriage by her father. She wore a white lace gown, princess style, with train and carried a shower bouquet of white rosebuds and lilies of the valley. Mrs. Helen Balderson, the bride's sister, was matron of honor. She wore peach lace of the same style and carried talisman roses and blue delpheniums with blue satin ribbons. The bride's brother-in-law, Mr. J. G. Balderson was bestman.

emony for the immediate families and a few friends. The table was beautifully decorated with a large wedding cake and tall white candles. The bride and groom then left on their wedding trip to points of interest in the South. The bride's goingaway costume was fiele blue dress with vinage accessories. On their return they will go to their new home in Glen Burnie, Md.

A reception was held after the cer-

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MRS. FRED TROXELL

Mrs. Elsie S. Troxell, daughter of the late David C. and Jemima Ott, of Emmitsburg, formerly of Taneytown, died at her home in Emmitsburg, on Sunday, following a long illness, aged 66 years. She is survived by her husband, one

son, Jesse, of Smithsburg, and three daughters, Mrs. Paul Crabbs, Littlestown; Mrs. John Hilbert, Gettysburg, and Miss Blanche Troxell, at home. Funeral services were conducted from the S. L. Allison Funeral Home, on Tuesday, in charge of Rev. E. E. Higbe. Interment was in Mountain

View cemetery.

Divers Reach 500 Feet

Using Synthetic Air WASHINGTON .- The navy department has revealed that the possible depth to which deep-sea divers can descend safely has been extended to 500 feet by the use of

synthetic air. World record sea dives-to 500 feet under artificial conditions and to more than 400 under actual conditions-have been made by navy divers using standard rubber diving suits and a new mixture of helium

and oxygen for breathing purposes. Navy officials said the new synthetic atmosphere is the result of more than 10 years' research. They said that the oxygen-helium mixture "considerably advances the art of deep diving" and has no harmful

effects upon the diver. The 500-foot depth was attained by Master Divers J. H. McDonald, Las Animas, Colo., and William Badders, Annapolis, Md., in the Washington navy yard diving tank. Sea conditions were simulated by applying air pressure to the water in the tank equivalent to sea pres-

sure at 500 feet.

Bears in Yellowstone Park Turn Cannibals

YELLOWSTONE PARK, WYO. -Cannibalism among Yellowstone national park's black bears was reported recently by two parties of motorists who told Superintendent Edmund B. Rogers that they had seen a male eat one of this year's cubs.

The male was reported to have driven off the cub's mother with a series of bruising cuffs and then proceeded to devour the cub itself. Infanticide is said to be common among bears but there is no record of it ever having been seen in the park previously

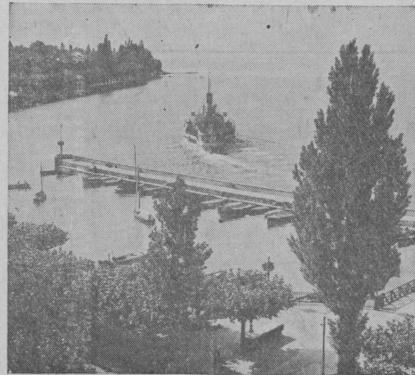

50,000 Carp Fattened

On Corn for Markets

FOND DU LAC, WIS .- The conservation commission put 50,-000 carp on a diet of soaked corn to fatten them up for the eastern market. When the last shipment arrived in New York, dealers complained that the fish were too The carp, ranging from 4 to 35 pounds in weight, were seined from Lake Winnebago to protect game fish and kept in land-locked ponds and marshes. They are fed 1,100 pounds of corn

HUB OF PEACE

• International conferences never ruffle dignity of Switzerland's famous Lake Geneva, one of the world's most beautiful inland vacation spots.

Prepared by National Geographic Society. Washington, D. C.—WNU Service.

THE Lake Geneva country, self-styled "peace hub of the world," has learned to take international crises in its stride. Here, for 2,000 years, Caesars, Napoleons, bishops and barons have fought and ruled, come and gone, but Lake Geneva stays, and the ancient River Rhone "keeps right on rollin" into one end of the lake and out the other.

Lake Geneva lies in a sort of peninsula that juts out from Switzerland's southwest corner into France. In fact, most of its southern shore is French territory, and two-fifths of the lake itself belongs to France.

Geneva people, if they want to go for a Sunday automobile ride, have but one main road on which they can drive more than a few miles without having to cross the French frontier. Most motorists like to drive in Switzerland, so the single highway along the lake's north shore is often jammed with traffic on pleasant Sunday afternoons.

Far up in the Alps, 6,000 feet above the sea and 75 miles from the actual lake basin, you see where Lake Geneva is born. The massive Rhone glacier, glistening greenishwhite in the sun, lies on a mountainside surrounded by towering precipices and snow-clad peaks.

Lake Geneva fills a deep mountain abyss in which the Eiffel tower (984 feet high) would sink out of sight. The lake's surface is 1,230 feet above the sea, but the deepest hole in its bottom goes down 1,015 feet, almost sea level. Mountains 6,000 feet high tower close around its eastern end, but gradually give way to rolling green hills.

Lake Fronts

Like Follies Chorus

The lake fronts of all the towns around Lake Geneva are as uniformly lovely as the girls in a follies chorus and as much alike as their costumes. Always there is a sturdy sea wall, against which waves dash high when storm winds blow; a neat stone balustrade; formal rows of green plane trees, their tops pruned to equal height and flat umbrella shape as carefully as any hedge; flower beds; grass plots; park benches; gravel walks paralleling the shore; and a neat wharf.

Nyon's lake front is like them all, and, like most Lake Geneva towns, too, it has its castle, high on the hill, the roofs of its five towers as sharp as pencil points. But this castle seems to smile instead of frown, perhaps because there are flower boxes in its windows, a little park with more bright flowers around it, and homely terraced vegetable gardens sloping up to its very

Entering the ghost-gray walls through a gate dated 1572, you find on the first floor a musty museum that preserves a few bits of Nyon's past: Roman tiles and carvings; ancient cannon; wax figures in the bright costumes of other days. A spiral stair in one of the round corner towers leads to neat courtrooms and offices for the judges.

THE prisoners, on the top floor, if they have an eye for beauty, must spend much time gazing out the windows. Across the lake, beyond the green hills of the French shore to the south, Mont Blanc, highest of Europe's peaks, looms like a white cloud on clear days. Back of the town rise the peaks of the Jura range along the Swiss-French border on the north. To the east Grand Lac broadens to a width of more than eight miles and looks like the sea.

The weatherworn houses of Nyon's 5,000 citizens cluster their white and gray walls and red-brown roofs closely around and beneath the cas-Narrow cobbled streets with sidewalks "one man wide" or none

Most waterfront towns on Switzerland's Lake Geneva look the same from the shore. Here is a sidewheeled pleasure boat heading out over the deep blue waters.

at all thread between them up the hill. But as you explore them the medieval peace is shattered by the blast of an auto horn, and you jump aside just in time as a modern sedan rushes down over the cobbles.

Pottery, Politics **Brought Fame**

Pottery, long before politics, brought fame to Nyon. You may visit the old pottery factory, its ancient wooden stairs worn hollow, its walls and floor gray with the accumulated clay of 150 years. In this same building pottery has been manufactured continuously since the days of the American Revolution. Once it produced the finest ware, all hand-made, decorated with great artistry. Those pieces now are rare, much sought after by collectors who pay high prices, for they are produced no more.

Along the lake's north shore, eastward from Nyon, vineyards crowd every inch of space on the hillsides that rise steeper and steeper from the water's edge. They are planted so close to the edge of the road that in some places you can reach out from your car seats to pick fat bunches of grapes right off the

A S THE hillsides grow steeper, innumerable terraces rise in steps from the water's edge. Each terrace, held in place by its stone retaining wall, supports a few square yards of soil that in some places slopes at almost a 45-degree

The soil washes down when it rains on such steep slopes, even with the stone walls to hold it back. But every winter the farmers dig up the soil that has washed to the bottom of the terraces, carry it back up in baskets on their backs, and spread it again evenly over the

Up and down the hillsides you notice innumerable tiny flashes of light twinkling against the background of green leaves.

They are scarecrows. They are bits of polished metal, hung among the vines to be swung by the wind. reflect the sunlight, and scare the

Bustling center of this rich farming region of the lake's north shore is Lausanne, sprawled over three high hills above its lake port, Ouchy, which, incidentally, claims the only natural bathing beach in Switzer-

Lausanne is another of the "conference cities." In 1912 a treaty signed here ended the war between Turkey and Italy, and a conference in 1922-23 resulted in the signing of 17 different treaties and agree-

When Lausanne Moved to the Hills Looking down your neighbor's

chimney is no novelty here. Leaning over the balustrade on one high bridge, you can see straight down into the chimney pots of houses in the ravine below, while their smoke drifts up into your nostrils. Many a narrow street winds upward steep as a mountain path, and in some places long flights of steps take you from one level to another. History says the Lausannians took to the hills after a disastrous defeat in the Fourth century, and there they staved.

On a cliff on the Cite, chief of the three hills, Lausanne's cathedral towers dominate the skyline. Its beautiful rose window was in place more than 200 years before Columbus came to America. The cathedral has been Protestant for 400 years, since the day of the "Great Disputation," in 1536, when John Calvin and other leaders of the Reformation wrested control from the Catholic clergy.

Indian Rainmakers Of Southwest Hold To Ancient Rites

Traditional Corn Dance Brings Moisture for Annual

Crops.

SANTO DOMINGO, N. M.-In southwestern New Mexico rain is a matter of life and death. There live the Keres Indians, who have for centuries performed once each year a colorful ceremony to which they attribute the moisture that has giv en them life-sustaining crops.

The Koshares, the medicine men of the tribe, lead the supplication to the Keres' traditional "father"the sky-in their corn dance begging their deity to allow rain to fall on their crops that burn in the southern New Mexico desert land.

Most Peaceful Tribe.

This primitive dance is the climax of the Keres' religion and the annual performance of the ritewith the autumn rains that followgoes to make the tribe one of the most peacefully devout and spiritually satisfied in the world.

The pueblo has held more to its ancient traditions than any other in the Southwest. To these simple people the annual dance of supplication is a dance to the spirits their ancestors worshiped. After the coming of the Spaniards and Christianity the dance was named in honor of St. Dominic, who was given them by the Spanish padres as their patron, but the ceremony itself remains unchanged.

The St. Dominic dance originated in antiquity and the meaning of many of its symbolic portions is unknown even to the Indians them-

Beliefs Remain Unchanged.

To these simple people the blue sky is the father and the earth the mother of all creation. Early teaching by missionaries, oppression by the Spaniards and later government schools have failed to shake the Indians in their steadfast belief in the

simple but practical worship of the religion of their ancestors.

The dance of St. Dominic is one of the most perfect survivals of the Indian's ancient religious ceremonials. While primarily a plea for rain, the dance really is an elaborate prayer for the fertilization and preservation of the fields of corn upon which the people depend as their principal item of diet.

The actual dance starts early in the morning, following the only Christian rite of the ceremony, the marriage of couples who have previously been married by tribal medicine men.

Women Also Participate.

The Koshares, or medicine men, painted in ashen gray and chanting in a monotonous undertone, lead the procession from the kiva, a circular underground chamber used for the tribe's secret ceremonies. lowing the Koshares, whose bodies are painted with symbols and whose hair is tied with corn husks and pasted with mud, are long lines of men and women, placed alternately. As these dancers reach the town plaza they form in two straight lines. All of the Indians hold their positions in the dance with the exception of the Koshares, who move in and out of the weaving lines exhorting their tribesmen to greater frenzy. During the daylong dance, only the medicine men gesture to the sky in an appeal for rain.

It is only in extra dry years that nature fails the Keres Indians. Usually rains fall in the area a few days following their dance. When it does rain shortly afterward, it serves to revive the faith of the Indians in their ancient beliefs.

Indians of 1300 Lived

In Apartment Houses

CANYON, TEXAS. - The first apartment houses on record in the Panhandle of Texas have been excavated on Antelope creek, north-east of Amarillo, officials of the West Texas State Teachers college have disclosed.

Indian dwelling ruins, inhabited apparently about 1300 A. D., have been found in the Antelope creek

Goiter of the Serious Type

DR. JAMES W. BARTON

IN GOITER of the serious type the family physician advises removal of the thyroid gland by surgery. There is, of course, the operation and the anesthetic to be considered, and despite the fact that the removal of the thyroid gland is now done in every hospital and considered as "safe" as other operations, there are many patients still afraid of operations. There are other cases also where the physician believes that operation would be unwise, even dangerous.

Prolonged rest and the use of iodine (Lugol's solution) will help

some cases but there are many severe cases where more than this treatment is absolutely necessary to save life. Thus the X-ray

has been used for many years when surgery is inadvisable, or the patient unwilling to undergo operation. Dr. P. in Strahlentherapie, Berlin, reports the results of X-ray treatment in 140 cases of the serious form of goiter. He shows

ment given, or the patient was not given proper encouragement. Not only do no deaths occur from the X-ray treatment, but there are many severe cases that are unsuitable for surgical or medical treatment, that are completely

that where good results were not ob-

tained by X-ray treatment, there

had not been enough of the treat-

cured by the X-ray method. Chronic Appendicitis.

Most physicians agree that in cases of acute appendicitis-increased temperature and pulse rate, increase in white corpuscles of blood, tightening of the abdomenoperation should be performed, and the earlier the better.

In cases of chronic appendicitis, however, there is not the same agreement as to operation, because, unfortunately many physicians have had cases where no improvement followed operation and some cases appeared definitely worse.

What may be the explanation of many cases of this so-called chronic appendicitis-constant pain in appendix region—is givn by Dr. W. A. Bigelow, Brandon, Manitoba, in the Canadian Medical Association Journal, who states that the pain, colic, dragging, and other symptoms are due to fibrous bands-present at nich have fastened the last part of the small intestine and first part of the large intestines together instead of allowing them to remain free from one another as in the normal individual.

Dr. Bigelow reports the results of removing these bands in the cure of cases of so-called "chronic appendicitis.'

"A questionnaire was sent out in January, 1937, to only those on whom the removal of the appendix had been done elsewhere, previous to our operation for the removal of these bands. None of the patients included in this report had received any relief whatever from the removal of the appendix itself. Only one question was asked, 'Have you been completely relieved of your one-sided pain since we removed these bands?' One hundred and forty-seven answers were received from a total of 161. Of this number 136 reported cured and 11 reported not cured."

Teeth Give a Good Clue In Identifying Bodies

In this country and in Europe there are thousands of unknown dead of the World war. Many of these soldier-dead, says Dr. Edward J. Ryan, writing in Scientific American, could have been returned to their families for burial if identification by the teeth had been universally practiced. Further, civilian catastrophes each year take their toll of lives; in many of them the bodies are so badly burned or otherwise disfigured that normal methods of identification, including fingerprints, are of no avail.

It is a definitely established fact that no two mouths are precisely alike. Even after extraction of all teeth, the residual bone retains certain X-ray characteristics, and the distinguishing differences and deviations from the normal may be noted on a chart. Teeth have definite individual characteristics; the relationship of the teeth to one an-

other varies with each person, There already has been devised a standardized chart on which the various peculiarities of the individual mouth can be entered for future comparison and identification. If a system using such a chart could be placed in universal use it would be possible to solve many cases of mysterious disappearances, of criminal activities, and of unidentified death, Dr. Ryan believes.

Floyd Gibbons **ADVENTURERS' CLUB**

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

> "Mountain Doom" By FLOYD GIBBONS Famous Headline Hunter

HELLO EVERYBODY: Samuel Johnson of Brooklyn, N. Y., has two hobbies, and

one of them was bound to get him into trouble sooner or later. Sam's hobbies are skiing and mountain climbing and two more dangerous sports I don't know of. You know what sort of a game skiing is. Anyone who has ever seen a news-reel of a bunch of ski jumpers doesn't have to be told it's a good idea to pay up your insurance before you try it. Mountain climbing is a little more than twice as dangerous as skiing. It's a yarn of mountain climbing with which Sam busts into the club as a Distinguished Adventurer. For a good many years, Sam has lived

abroad, chiefly in Italy. And one day in July, 1931, way up in the Italian Alps, he had a little adventure that almost culminated in his living nowhere neither in Italy nor anywhere else.

Climbing the Doufoure Peak.

On that July day, four Italians—a doctor, a lawyer and two engineers -along with Sam, himself, set out to climb the Doufoure-the highest and most difficult peak in the Monte Rosa chain of Alps. They started out without professional guides, for all of them thought they were sufficiently expert at climbing to get along without them. That says Sam, was the first mistake.

Sam takes time out here to explain that it was absolutely necessary to reach that peak before eleven a. m. For from that hour to one in the afternoon the sun is at its height, melting the snow and letting loose great avalanches that come crashing down the mountain-side carrying thousands of tons of rock, dirt and ice along with them.

The five men climbed until daybreak. "And all at once," Sam says, "the strenuous work we had done climbing to this point, was well rewarded by the magnificent spectacle that unfolded before our eyes. The early sun was shining on Monte Rosa and because of some phenomenon the whole mountain chain became a deep rose color—the hue that gives those peaks their name. We kept on going. By seven o'clock, after trying to make headway in snow two or three feet deep in places, we seemed still to be a great distance from the peak. That didn't worry us. From the position we were in it was next to impossible to judge distance-or even our direction. But by nine o'clock-

Lost and Cut Off by Avalanche.

By nine o'clock that peak didn't seem any nearer than it had at seven. They knew they were lost then-and they were thoroughly frightened. They were at an altitude of about twelve thousand feet, and a night spent in the intense cold at that level was pretty sure to be fatal.

A terrific avalanche roared past them.

"To build a fire," says Sam, "is impossible. There is nothing to burn. Nor is there any other protection from the sub-zero temperature, or from the icy blasts of wind that sweep the mountain all through the night.

They climbed for two more hours—and by that time they were all but exhausted. They stopped to rest on a ledge of rock, and suddenly a terrific avalanche roared past them not a hundred yards away. It was eleven o'clock-the deadline for mountain climbers—the time when they ran for cover if there was any cover to run to.

"The slide," says Sam, "crossed the path of the trail we had made coming up. If we had been delayed just a few minutes I rather believe our bodies would now be reposing on some glacier under a thousand tons of rock and ice. We didn't dare travel after that. From then until three o'clock we sat huddled on the ledge expecting every moment to be carried away by another avalanche. At three we started out again, trying to find the lost trail. We didn't find it—and to make matters worse, the sun was sinking rapidly and it was getting colder by the second."

Took Refuge in a Cave.

The situation was serious. Sam and his companions decided something certainly should be done about it. But what? None of them knew. They held a consultation and agreed to hole in for the night-take a chance on being alive in the morning. Three men rose to find a suitable place to dig in, but two of them lay still on the ice-too exhausted to

With difficulty the others got them to their feet. Practically carrying them, they moved on across a glacier, looking for a cave. Although they didn't know it then, it was that move that saved

They found a cave and huddled into it. They didn't dare go to sleep. They'd freeze to death. Their food supply had run out by that time, and the gnawing pains of hunger added to their intense misery. The suffering of that night, Sam says, no one could ever describe. But at six in the morning they saw five black figures moving across the ice toward

The black figures were five professional guides. Down in Macugnaga someone with a pair of powerful binoculars had seen them as they pushed across the last stretch of glacier. The guides—men of remarkable endurance—had climbed all night long to reach them before it was too late. They literally carried the five men down the mountain and rushed them to a hospital, where one member of the party had a leg amputated, another a hand, and a third, all the toes of both feet. But luckily for Sam Johnson, the sawbones didn't have to do any work on him. Copyright.—WNU Service.

Cameras Barred by Village Hating cameras and loathing photographers, villagers of Staphorst, in east Holland, have forbidden strangers to take pictures there. Two young visitors who were taking snapshots recently were knocked down and badly beaten. THE CAT AND THE QUEEN

By ADELE THANE © McClure Newspaper Syndicate. WNU Service.

E WAS a cat and she was a queen and like another indiscreet feline of a more antiquated day he looked at thereby proving conclusively

that history repeats itself.

But here the parallel ends, for it is not recorded that the original queen deigned to return the stare of a menial cat, whereas this queen did. Which was imprudent of her, as the royal gaze started a train of ideas racing through the cat's head which, by all the acknowledged laws of class distinction, had no right to be there.

Of course he wasn't really a cat. He was the seventh son of the seventh son of a sailor. His chief duty consisted of swabbing the deck of Wilbur Gaumont-McCoy's new million-dollar yacht, the Leodore, and he was in the midst of a most creditable performance when the queen

stepped daintily up the gangplank. "Gob!" roared the captain. "Why wasn't this done before?"

"Come to attention when you address me, Turner!" The smart click of heels. "Aye, aye, sir!"

"Now answer my question!" The captain was becoming apoplectic.

"Oh, it doesn't matter," broke in a young, accustomed-to-obedience voice. And thus did Gob Turner come to look at the queen.

She was small-statured and slender and carried her bronze head high and her black lashes low; but precisely at the moment when she entered Gob's line of vision, the long lids swept upward like abruptreleased windowshades, and their eyes met in swift contemplation.

That was all. But it was enough for Gob. He resolved, after that first pregnant blue glance, to command others. And he laid his plans

accordingly. He learned her name from the steward. "Aurelia," he echoed softly to

himself, and added enthusiastically, "just like her!" At two bells of the second dog watch the Leodore steamed out of New York harbor and turned south. The sea was like a mastodontic looking-glass which some prenicious Titan-child had streaked with aquamarine paint, and the weather was prematurely warm for the last week of April. Seasonal inconsistencies to the contrary the yacht's initial cruise, with 20 patrician guests on

board, should be incomparable. Late on the afternoon of the second day out, Gob was standing near the sheet anchor, submerged in meditation which did not concern irate captains and unwashed quarterdecks, when he became aware that someone was watching him. He jerked up his head and looked ve eyes, very blue and very feminine.

"That is an anchor, isn't it?" inquired Aurelia. So she hadn't been regarding him at all! Gob's heart sank.

"Aye, that's an anchor," he answered, scanning it balefully.
"What is this part called?" She reached out a rose-tipped forefinger and touched the cold iron. was instantly jealous of it.

'That's the stock." "And this?"

"The shank. That there's the flukes. And these are the arms." "The arms?"

"Aye." He said it wearily. "I-I'm not tiring you, am I?" Gob straightened, panic-stricken. "Oh, no!" he declared hastily. He imagined her fleeing from him with queenly solicitude. That must not happen! Her presence, though occasioned by interests in which he had no part, was preferable to her

absence. "Oh, NO!" he said again. She smiled with relief. "Tell me more about the anchor," she urged. 'Tell me about the-er-labor of a seaman. Tell me-tell me-about yourself," she finished breathlessly.

He told her-more about the anchor, less about the labor, and nothing about himself. The next day, he enlarged upon the labor. And the third day, with a slate-colored blur which was Cumberland island showing mistily against the western horizon, he conversed at length and with gusto upon the merits and demerits, virtues and vices, dreams and realities, of Gob Turner, mariner. But of that thing which had so recently crept into his hearthis passionately tender love of herhe uttered not a word until the Leodore was homeward-bound.

Off the coast of Delaware, wind and thick fog were encountered and immediately the yacht's speed diminished. Gob and Aurelia leaned against the wet rail of the poop-deck, shoulder touching shoulder, peering absent-mindedly into the shifting

Gob broke the silence. "We berth tomorrow at 4:30," he said in a "Yes."

A damp strand of her hair whipped spasmodically across his "Will you be sorry?"

"Yes." "What do you mean by that?" he asked, endeavoring to keep his voice steady and roundly cursing it because he failed.

"It-it has been a pleasant trip."

"Aye-a pleasant trip," he repeated slowly, and his reserve crumbled. He caught her fiercely to him, kissing her warm mouth again and "I want you!-I love you!" he cried in a hoarse whisper, then, feeling her grow sudden limp within his arms, he gently released her. "I'm sorry, dear," he said, and turned away with bowed head. "But it's true," he added gruffly a moment later, "all true."

He heard her running toward the after-house, and then he was alone with the fog and the wind and the falling darkness. For long minutes he stood there, insensible to time. He had no knowledge of Aurelia's return until she spoke.

"I just wanted to tell you," she faltered through the swirling dusk, "that I knew all about anchors the other day." And she was gone.

That simplified matters for Gob. He did not spend tedious hours pondering the true meaning concealed in those last hesitant words of the woman he loved. When the Leodore docked a half hour after schedule, Aurelia was not among the score of aristocratic guests who disembarked. And when she finally escaped the barred door of her cabin and reached the afterdeck, Pier 10 was a brown blot in the distance, with an appalling breadth of oily water between it and the gleaming rail upon which her fingers were

tightly clenched. She faced Gob with upflung chin and steely eyes, a queen once more. "How melodramatic, Mr. Turner! Surely you do not intend to-" She paused uncertainly.

"Kidnap you," supplied Gob. "Oh but I do!"

"Of course, you realize that is impossible. How you enveigled the captain into being a party to this insane attempt at medieval horseplay, is beyong my comprehension, but you can not expect a like cooperation from the owner of the

"That is largely a matter for him to decide," smiled Gob.

She whitened. "Please be so good as to explain." "I am Wilbur Gaumont-McCoy,"

he replied, moving to take her She drew back. "YOU! What new joke is this?"

"The joke's on dad," he laughed. "You see, he was punishing me for ridiculing the common sailor. He's an old sea-dog himself. The cap'n knew of my ignominious chastisement, but didn't learn that until this morning. Then he had to take my orders, anyway." He succeeded in capturing her hand, and covered it lovingly with both of his.

"Dear girl," he said, "shall we hunt up the kedge anchor and dis-

Never Too Old to Learn: Interest Is Vital Element

In his office in an obscure corner of the winding old buildings of Teachers college, Columbia university, Prof. Edward L. Thorndike has been busy making important discoveries about those moot years after forty. His experiments in the field of adult learning and education have pinned orchids on middle age, writes Constance J. Foster in Good Housekeeping.

Professor Thorndike devised a series of experiments to discover just ries of experiments to the how dull grandma really is. His startling. They conclusions are startling. They completely demolish the old adage that you can't teach an old dog new tricks.

Hundreds of thousands of tests given over a period of years to subjects of all ages prove that mental powers fall off much more slowly than we imagined-only about 1 per cent a year. Childhood is not, as we supposed, the best age for learning. Any age below fortyfive is better than ten to fourteen. Nor is the decline of ability in later years rapid. A woman of sixty-five may expect to learn at least half as much per hour as she could at the age of twenty-five, and much more than she could at eight or ten.

"Any adult between twenty-one and seventy," Dr. Thorndyke told me, "can learn anything in which he is really interested with little or no greater effort than at fifteen.

"Interest is the vital factor in education. No one can learn with any facility what doesn't interest him, whether he is six or sixty. That's your real clue if you want to go on growing. We are all born with certain abilities. If you have a vital interest in anything from painting pictures to collecting butterflies, it's safe to say that you have an innate ability which is educable. The greater the interest, the easier you can learn and remember. Age doesn't count much. Whatever differences exist between you and your children are moderate and will not prevent your doing anything at forty-five that you did at twentyfive.'

Distance of the Horizon The distance of the horizon increases with the height of the observer. Figures given by the United States Lighthouse board show the distances a person can see objects on the water from various heights in clear weather. At 80 feet this distance is given as 11.83 miles; at 85 feet it is 12.20 miles.

Sucking Insects Destructive

Sucking insects are found on the soft growing tips of plants where they bore in just like mosquitoes and suck themselves full of juices from the plant. The plant then beIMPROVED UNIFORM INTERNATIONAL

CUNDAY JCHOOL Lesson

Lesson for October 2

THE ONE TRUE GOD

LESSON TEXT—Exodus 20:2, 3; Isaiah 45:22; Mark 12:28-34; I Corinthians 8:4-6. GOLDEN TEXT—And thou shalt love the Lord thy God with all thine heart and with all thy soul, and with all thy might.—Deuteronomy 6:5.

Today we begin a series of studies which should be of unusual value, a consideration of the Ten Com-mandments in the light of the teachings of Jesus and related New Testament passages. It is appropriate to point out that, far from being outmoded, the Ten Commandments are really the basis of all moral law. They need a diligent re-study and re-emphasis in our day of disregard of moral standards. As interpreted by the Lord Jesus and applied to our daily living, the truth of these commandments should be brought home to every boy and girl and man and woman in our Bible schools.

The lessons begin at the right point, for the first commandment properly deals with our conception of God. What a man thinks about God determines his entire outlook on life. We begin right when we declare that there is but one God.

I. The Truth Stated—There Is One True God (Exod. 20:2, 3).

Jehovah means "I will be what I will be," or "I am that I am." (Exod. 3:14). His very name declares God to be the self-existent, eternal one. How infinitely gracious then is the use of the word "thy" in verse 2! He-the great I AM-is

There are many things concerning which we do not speak dogmatically. There are even Christian doctrines about which spiritual and earnest men may honestly differ, but regarding God we say with absolute assurance and complete exclusiveness—there is but one true God. If He is what He claims to be, if God is not to be declared to be a liar, then it is beyond the realm of possibility that there could be any other God. Hear it, ye men and women of America who in an enlightened land and age bow down in heathenish worship "before the god of gold, the god of self, the god of wine, the god of success, the god of fame, the goddess of pleasure, the god of licentiousness." The one true God says, "I am Jehovah . . . thou shalt have no other gods be-

II. The Truth Explained.

1. God is our Deliverer (Exod. 20:2). He who brought Israel out of the bondage of Egypt is the one, and the only one who can deliver men from the bondage of sin. If you think that a sinner is not in bondage read Titus 3:3 and Romans 6:16 and then read the verses following in both passages, and not only see but follow the way of de-

2. God is our Saviour (Isa. 45:22). who can save. "Neither is there salvation in any other: for there is none other name under heaven given among men, whereby we must be saved" (Acts 4:12).

It was this verse that led one of the world's greatest preachers, Charles Haddon Spurgeon, to accept Christ as his Saviour when he was just a humble lad. Perhaps some boy or girl who reads these lines may do likewise, and become a great instrument in God's hand. Teacher, perhaps the Spurgeon of the next generation will be in your class today. Win him for Christ!

God is Love (Mark 12:28-34). In I John 4:8 the truth is stated in all its glorious simplicity. "God is love." He not only loves us, and calls on us to love Him, and enables us to love both Him and our neighbors, but He "is love." Love is of the very essence of God's nature. He is the source of all true love. He is love.

It was for this reason that Jesus replied to the question of the scribe as He did, directing the whole life of man into love toward God and his fellow man.

It is worthy of careful note and emphasis in our teaching that the recognition and appreciation of this truth on the part of the scribe brought him near to the Kingdom of God, but not into it. He was "not far from," but he was not in it. It is terrifying to think how close men may come to entering without doing so. Reader, have you entered into eternal life through Jesus Christ?

4. God is our Father (I Cor. 8:4-6). Paul is speaking of the eating of meat offered to idols, and points out that such false gods are really nothing. This is true not only of the idols of wood and stone, but of supernatural beings, demons worshiped by primitive peoples. There are such spirit beings, active even in our day in such cults as spiritism, but they are not divine, not true gods (v. 5).

The true God is a Father, yes "the Father," of whom are all things and we in Him (v. 6). As there is but one God, there is also but one Lord, Jesus Christ through whom the one God has wrought all things, and through whom we also come to God. If we have Christ we have all; if we have not Him we have nothing. Is He your Saviour?

Cleopatra Called the

'Dark Queen of Egypt' There is as much reason for supposing that Cleopatra was a blonde as for supposing that she was a brunette. According to the popular conception, she was a decided bru-nette, with dark skin, dark eyes and dark hair, and she is frequently referred to as "the dark queen of Egypt." But historical sources supply no evidence as to her actual complexion. It should be borne in mind that Cleopatra was a Greek by ancestry, and Egyptian only by birth. So far as known, observes a writer in the Indianapolis News, she did not have Egyptian blood

in her veins. The Ptolemies, it is supposed, remained pure Macedonian Greeks, and their capital, Alexandria, was the center of Greek rather than Egyptian culture. They even dressed as Greeks except on certain ceremonial occasions. Therefore, Cleopatra must be regarded as a Macedonian type, and the dark skin and black hair of the native Egyptian afford no clue as to her complexion. Many Greeks were darkcomplexioned, but among the Macedonians white skin, fair hair and blue eyes were not uncommon, and one of Cleopatra's ancestors, Ptolemy Philadelphus, is described by Theocritus as having light hair and fair complexion. When an American actress played the role of Cleopatra in Shakespeare's tragedy she portrayed the Egyptian queen with red hair. Shakespeare alluded to Cleopatra as "tawny."

Java's Water Kastel Is

Reminder of Harem Days It appears that the Water Kastel, a famous attraction, was designed and built by a Portuguese architect about the year 1758, writes Eleanor N. Knowles, Djocya, (Java), correspondent in the New York Times. It was in use until destroyed by earthquake in 1867. In its heyday it was complete with beautiful water gates and buildings of plaster and masonry, Portuguese in design, together with a complete subterra-nean establishment. From the ruins as we studied them there seemed to have been passageways bringing a low water level, as in one of the water palaces in use by a Prince of Because of the high retaining walls, the water could probably be raised to a higher level to keep out

One of the stories of its beginnings was that the water protection was to keep out invasions of the Sultan of Solo, or Surkarta, to the south. At the first hint of invasion the owner would retire with his harem to the subterranean quarters, there to remain until his faithful army had routed the foe. Since the Water Kastel was constructed a few years after the territory of Mataram was divided into the states of Jagjakarta, Surkarta and Mangkoenegoran, and there are historical records that much quarreling existed between the Sultans in the early days, there is probably some truth to the tale.

Diet of African Native It is said that the men of the Masai tribe in Africa, with a diet in-

cluding milk and meat-rich in protein, fat and calcium-average about 5 inches taller and 23 pounds heavier than the Kikuyu tribe, who are vegetarians and live mostly on cereals, roots and legumes. The muscular strength of the Masai is said to be some 50 per cent greater than that of the Kiyuku, while Masai women average 3 inches more in height and 27 pounds more in weight than the Kikuyu women. But children show the most striking contrast. Three-fourths of the Masai tribe were "good and very good" in physical development, while in the Kikuyu group less than one-third received a similar rating. Dental defects were found in 40 per cent of the Kikuyu boys and 28.8 per cent of the girls, but in only 8.3 per cent of the Masai boys and 7.3 per cent of the Masai girls.

Pacers and Trotters

The name "pacer" is applied to a class of horses that are characterized by the ability to pace. They do not constitute a separate and distinct breed, but the American Standardbred trotting horse breed is the most potent source of pacers. According to the "Cyclopedia of American Agriculture," by Bailey, there was an opinion some years ago that a special type was evolving among pacers, because many old time pacers were steep in the hindquarters, had crooked hocks and pitched forward. However, time has demonstrated with the pacer as well as the trotter, that symmetry and graceful lines and style in action or repose are not opposed to speed. To be registered as a Standardbred pacer, a horse must meet certain standards, set by the American Trotting Register association.

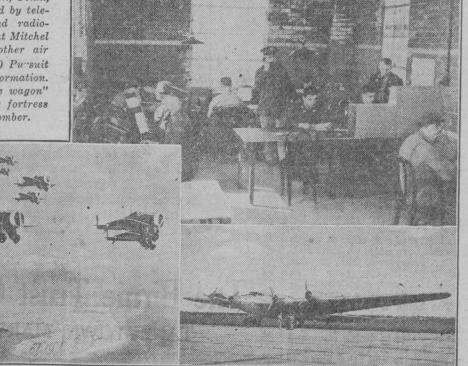

The Origin of Coffee

In the Fourteenth century, an Arab noticed that his goats became frisky after browsing among certain shrubs. He curiously chewed berries from the shrubs and found them refreshing. Soon thereafter the beverage brewed from freshly roasted coffee beans was enjoyed throughout Arabia. The drinking of as many as 30 cups of coffee a day is a custom not uncommon in Arabia.

TELETYPEWRITER CIRCUITS USED BY AIR CORPS IN WAR GAME MANEUVERS

2,200 Mile Network Linked G. H. Q. With 17 Air Bases From Maine to Georgia

(Upper right) Message center at New Haven, Conn., which was connected by teletype, telephone and radiophone with G.H.Q. at Mitchel Field, L. I., and other air bases. (Lower left) Pursuit planes in fighting formation. (Right) The "battle wagon" of the air, a flying fortress type of 4-motored bomber.

The Air Force of the United States Army recently conducted extensive war game maneuvers for seven days along the Atlantic seacoast from Maine to Georgia, with Mitchel Field, Long Island, serving as the headquarters. Having decided upon a ground plan and designated air bases and facilities, which included a network of Bell System teletypewriter circuits, Maj. Gen. Frank M. Andrews put the Air Corps into air en masse, various planes taking part from airfields as distant as California, Texas and Louisiana. These planes were laden with more than 3,000 men and three million pounds of baggage and the spectacular maneuvers employed the most modern equipment and the latest in aerial operations. In all, some 220 planes of many types participated.

While these flocks of planes were busily engaged in protecting the American coast from the "enemy," their operations were being coordinated and directed by means of a network of forty-five teletypewriters connected by circuits totaling approxi- the provision and installation of the

mately 2,200 miles. These circuits connected the general headquarters at Mitchel Field with the other seventeen air bases along the Atlantic coast. The principal circuits linked G.H.Q. to the "wing" commands at Mitchel Field, Middletown, Pa. and New Haven, Conn. In turn, these were connected by other circuits to smaller units radiating from the central points; switching equipment permitted the entire network to be hooked

Under the direction of Lieut. Col. Cedric W. Lewis, U. S. Army Signal Corps, signal officer of G.H.Q. Air Force, there flowed over these wires "intelligence summaries" — bulletins put out by headquarters to tell how the "war" was going; orders to scout an area or attack; weather reports; orders and reports regarding a stream of supplies feeding into the various air bases; and "PX" reports—the messages sent out by an airport announcing a plane's departure, so that the airport of destination will keep an eye open for it.

emergency telephone and teletype equipment, which provided the main communications link for the various units participating in the air maneu-Within one month from the receipt of the Army's order, which included forty-five sending and receiving teletypewriters, the system was installed and tested out; about one week later it was in actual service. Due to their close proximity to the Army's radio stations, each teletypewriter had to be completely filtered to prevent any interference with the radio signals. According to Col. Lewis the teletypewriter system handled an average of 20,000 words a day and on one day he estimated that it handled 30,000 words.

While the results of every phase of the maneuvers will be subjected to a minute scrutiny by the Army high command before any conclusions are arrived at, it is understood that the teletypewriters proved extremely adequate as vehicles of communicationno small accomplishment where they had to keep up with the operations of planes that hit speeds of more than

250 miles per hour.

Dentist Puts Hand Into Wrong Mouth Tipsy Owner Even in Cell

OAKLAND, CALIF .- Dr. F. T. Barron, dentist, learned something new about teeth when his hand accidentally slipped into the mouth of a young alligator pet. The attending physician reported he would not lose his fingers but that he had lost all confidence in 'gators.

CREW TELLS STORY OF HAUNTED SHIP

Vessel Breaks Down 14 Times During Voyage.

SYDNEY.—A strange story of a "hoodoo" voyage in a supposedly haunted ship was told by the crew of the British tramp steamer Stonepool on her arrival here from Car-

Several years ago a seaman hanged himself in one of the cabins of the Stonepool and members of the present crew blamed the tragedy for some of the evil things that happened to them on the recent voyage. One seaman told of seeing ghastly eyes peering out of the dark, another of having his hands plucked away from the rigging, causing him to fall to the deck and injure himself.

Two of Crew Injured.

Two of the Stonepool's crew, both in a critical condition, were taken to hospital as soon as the vessel reached here. One, a Maltese fireman, underwent an operation for appendicitis. When he was taken ill three weeks before, there was no ice aboard to make packs to relieve his pain and he suffered severely until the Stonepool reached

The other hospital case was an engineer, who was temporarily blind, deaf and speechless. His condition, it was said, was due to long hours of work in remedying engineroom faults, which brought on nervous prostration.

Ship Broke Down Often.

The Stonepool broke down 14 times during the voyage and on two occasions the danger lights were hoisted while the vessel floundered helplessly in heavy seas. One night the entire crew worked for many hours flooding No. 4 hold to keep the stern under water in rough seas. The Stonepool was in ballast, with her propellers racing out of the

"The cockroaches were so bad that we had to paint our quarters," one seaman said. "For five weeks we lived on tinned meats, tinned pears and beans. We thought we'd never reach the end of the world."

Faithful Terrier Guards

DES MOINES, IOWA.—With his little fox terrier, John Dorrain of Des Moines, Iowa, boarded a street car. A few minutes later Dorrain went to sleep in a rear seat, the dog curled in his lap. With white fangs and neck bristles on end he held off passengers and the motorman who tried to arouse the sleeping man.

At the end of the line the motorman telephoned police to meet the car on the return trip. Patrolmen John Baldwin and Harry Chambers, hands protected with gloves, seized the snarling dog and transferred Dorrain to a squad car. The man was taken to the police station and booked for intoxication.

The dog repeatedly refused to leave his master. Just as the jail door was being shut he scrambled between the jailer's legs and jumped on the steel-slatted bed on which Dorrain was lying. Soon both were sleeping soundly.

Bull Enters China Shop

And Looks Over Wares SPRINGFIELD, MO. - A bull walked into a china shop and noth-

ing happened.

A. T. Sechler was taking the bull to market when it jumped from a truck and walked into a five and ten cent store. As customers joined clerks in scurrying under counters the bull walked down an aisle until it came to the china and glassware

It looked the display over, turned and headed back for the front door. Sechler grabbed its halter and the trip to the stockyards was resumed.

Runaway Milk Wagon Nag Pulls Up at Red Light

MILWAUKEE.—During 15 years of drawing a milk wagon over Milwaukee streets, Frank a 21-yearold horse driven by Henry F. Votapek, has learned the spectrum of traffic signals so well that it even halted in the midst of a runaway when a red light flashed at an inter-

7th Son of 7th of 7th WORCESTER, MASS.—Born at City hospital, Herman Leonard Boucher is the seventh son of a seventh son of a seventh son. His parents are Mr. and Mrs. Paul O. Boucher.

\$560 for Spilled Coffee ROCHESTER N. Y. - Scalded when two cups of coffee were spilled down her back in a restaurant, Mrs. Emily B. Albright, thirty-two years old, has been awarded \$560 damages.

Deer Seen Only Once Will Be Sought in Burma

NEW YORK .- The Black Barking deer, an animal so rare that it has been seen only once by roving explorers, will be sought by the Vernay-Cutting expedition to North Burma. If the American Museum of Natural History, sponsor of the expedition, acquires one of these deer, it will have the only skin or skeleton of the kind in any world museum.

The Burmese government has granted permission through the state department at Washington, for the expedition to proceed with its plans. The objective is to collect mammals, birds, fish, and plants in a region of northeast Burma never entered by a scientific expedition.

Fireproof Awnings

WASHINGTON. - A weather-resistant fireproofing treatment for cotton fabrics, of importance in fireproofing articles such as awnings and tents which are exposed to rain, has been developed by Martin Leatherman of the United States bureau of chemistry and soils. Stannic chloride (a salt of tin), a chlorinated resin and a colored metallic oxide are the principal materials re-

Glass Insulation

BERLIN.—Spun glass fiber is being used in Germany to replace asbestos and other substances as a heat insulation material over ship and locomotive boilers, city gas tanks, etc.

Eskimo Baby Exchanged For Tent, Says Witness

EDMONTON.—A Winnipeg attorney returning from a trip through the wilds of northwestern Canada, told of seeing an Eskimo baby traded for a tent worth \$49.

Attorney John A. Macauley said he witnessed the transaction at Great Bear Lake.

"The baby was purchased by an Indian family, most of whose children had died," he said. "The little Eskimo seemed to be thriving on a diet of powdered milk, and its parents-by-purchase seemed extremely fond of it."

Cost Accounting

Hubby-Darling, you recall you told me you had to have a complete new outfit, because the women in the neighborhood knew everything you owned? Darling-Oh, yes! So you're going

to give me the money? Hubby-No, my pet. I find that it will be \$43.72 cheaper to move to a new neighborhood.-Farm Jour-

Jellied Soups for Your Home Table

Expert Gives Pointers On Proper Preparation

By EDITH M. BARBER

CAN remember, and perhaps some of you can, when jellied soup was only to be found on the menu of a fine restaurant. It seldom came to the home table. Perhaps this was because it was necessary to make stock by a long drawn out process, and because tomato juice had not come to market.

Perhaps it was also because we had not become addicted to the cold introduction to a meal. Today we find jellied consomme or tomato juice on almost every restaurant menu and it has become a common practice to use both at home.

While nothing is better as a basis than the stock made from soup bones, we are quite likely to put to use leftover bones and meat which when well seasoned give a stock full of flavor, although not quite so clear, as when we buy a knuckle of veal or shin of beef for this purpose. Some of the stock may be combined with tomato juice, or we may use the latter by itself after cooking it with sliced onions, herbs and spices for a short time. Soaked gelatin must of course be dissolved in the hot liquid. We will need some of this even when we make soup bone stock as natural

gelatin will vary in quantity.

Jellied soups should not be too stiff and in any case before they are served they should be beaten with a fork. Sliced lemon is a desirable addition to serve with soups of this sort. And by the way, should they be called soups?

Brown Soup Stock.

6 pounds soup bone and left-over meat and bone

3 quarts cold water 1/2 teaspoon pepper

6 cloves

½ bay leaf 1 tablespoon salt

3 sprigs thyme

1 sprig marjoram 1½ cups carrots

1½ cups turnips 11/2 cups celery Wipe the beef bone and cut the lean meat in inch cubes. Put in soup kettle, add water, and let stand for 30 minutes. Heat gradually to boiling point and simmer for four or five hours. Add the vegetables

and seasonings, cook one and one-

half hours, strain and cool as quick-

Jellied Bouillon. 2 tablespoons gelatin

1/4 cup cold water

4 cups meatstock, well seasoned Parsley

Soak gelatin in cold water five minutes and stir into hot stock until dissolved. Pour into a shallow dish or into bouillon cups to chill and set. Before serving break up jelly with a fork or cut into cubes with a knife. Serve in bouillon cups and garnish with sprigs of parsley. Bouillon cubes may be used to make the stock in proportion of five cubes to a quart of water.

SOME COOLING DRINKS

Special Iced Tea.

3 cups boiling water 3 teaspoons tea

1/3 cup lemon juice ½ cup orange juice

1 pint gingerale

6 mint sprigs 6 slices orange Pour boiling water over tea, cover and let steep five minutes. Strain and cool quickly by pouring over chopped ice or ice cubes. Add orange and lemon juice and the sugar if desired. When ready to serve

add gingerale. Serve with ice in tall glasses with a sprig of mint and a slice of orange in each glass. Tutti-Frutti Punch.

1 cup sugar

3 cups water 6 oranges, juice

6 lemons, juice 1 cup pineapple, diced

2 bananas ½ cup maraschino cherries, cut

small 2 quarts charged water or ginger-

Boil sugar and water to a sirup

five minutes, cool, add fruit and juices. Place in punch bowl over cake of ice. When cool, pour in the charged water and serve.

Ginger Grape Punch.

½ cup sugar 1 cup water 1 quart grape juice 1 quart gingerale Juice of 2 lemons

Juice of 5 oranges Dissolve sugar in water and bring to boiling point. Cool and add to other ingredients. Pour over cracked ice. Serve in tall glasses.

Cracks in Plaster

If cracks persist in appearing in plastered walls, it is often advisable to cover the walls with a wall fabric of stout construction, such as canvas, and then paint it. Such long wearing material may be redecorated as often as you choose. Beside covering the old cracks, the fabric-by reinforcing the plasterhelps prevent new cracks from forming.

A Restful Bedroom

A restful color harmony for a sleeping room combines green and white to good advantage.

New Idea for Hobby Fans

Starting in a small way a few years ago, the club roster now numbers several hundreds of picture post card collectors scattered all over the United States and a few in several foreign countries. The collectors correspond and exchange cards via the mail box. Many collections total over 10,000 different cards-several exceed 20,000. Collectors are now specializing in sets or series such as lighthouses, battlefields, monuments, parks and geographic sets of state capitols, county buildings, city halls and other similar views.
