

## SHOUTING OVER PHONE USED TO BE COMMON HABIT BUT SHOULD BE AVOIDED NOW

### C. & P. Companies Continue To Emphasize Importance Of Telephone Courtesy

Some sixty years ago, when the telephone was still an infant, subscribers could speak through instruments which were not more than twenty miles apart. These pioneer users of Alexander Graham Bell's invention often found it necessary to repeat a word or sentence. As a result there was a great deal of shouting and even though it was claimed that this instrument would transmit the human voice, most users felt that it was necessary to raise one's voice in order to be heard by a party twenty miles away. It was also discovered that "slight practice" in use of the telephone improved the reception of conversations.

Today through the efforts of telephone engineers and scientists it is no longer necessary to shout over one's telephone. Surveys by the C. and P. companies, however, reveal that a great many subscribers continue this practice.

In an effort to correct this fault and others, and to promote courtesy and personality in telephone conversations, the C. & P. companies have inaugurated campaigns at various times for the benefit of telephone users. Telephone employees throughout the C. and P. area advocate that the "slight practice" carried on in the early days of telephony can still be used to good advantage today.

For instance, it is pointed out that trying to talk over the telephone with a cigar, pipe or pencil in your mouth is a good trick but should be avoided when making a business or social call. Speaking clearly, distinctly and in a natural tone of voice will insure the best reception and at the same time leave the called party with a much better impression of us.

Telephone employees also suggest that when transferring a call or signaling the operator we should not bang the receiver hook. It is better to first tell the person with whom we are talking what we are going to do, then gently depress and release the receiver hook three or four times.

These suggestions and others are emphasized by telephone employees as the best rules to follow in developing our telephone personalities.

#### Ships Insured First

Although insurance is now one of the most important factors in property ownership and protection, it originally was made use of only by shippers of goods by sea and by the owners of seagoing craft. Lloyds of London, originally a coffee shop, developed the world's first insurance.

## Science of 'Duckology' Is Latest in Education

As a duck imitator Oscar Quam of Minneapolis, Minn., is a full-fledged professor—he's teaching hunters how to call these wild fowls. He holds classes six nights a week in his newly founded science of duckology and has drawn up a correspondence course, complete with detailed instruction and illustrations.

It all started when Quam, a veteran Minnesota guide, detected different types of duck calls. So he decided to take a quack at identifying and imitating them. He figured the duck language ran the gamut of a special greeting call, a lonesome hen call, lazy hen call, chatter and chuckle.

He interpolated the quacks into musical notes and put them down in approved do, re, mi, fa, so, la fashion. Then he went further and divided the language into two dialects—the diver duck dialect and the dipper duck dialect. Divers include the mallard, teal, spoonbill, widgeon and pintail. Dippers are canvasback, redhead, bluebill, butternut, ruddy duck, golden eye and fishduck.

Knowledge of the dialects prevents a duck imitator from giving a diver call to a likely indifferent dipper. Quam teaches that the two classes can be distinguished from a distance by their wing-flapping—a diver being a fast-flapper and a dipper a slow one.

Sex is the basis for the duck-calling procedure in the Quam school. He instructs his pupils in the science of giving ladylike quacks intended to entice drakes within shotgun range.

Hunters yearning to deceive ducks first learn the greeting call. This is done by singing the notes on one of Quam's scales, substituting "quack" for "do, re, etc." The next step is to go up and down the scale by piping the duck call horn. From then on it's just a question of practice.

## Tree of Heaven Grows In Out-of-Way Places

No matter where you go in a city, in Boston, New York, Chicago, Washington or any one of many other cities in this country or abroad there is one interesting tree that is continually cropping up in the most unexpected places. It can grow between cement blocks; it seems to thrive on nothing but ashes; it will breathe in air laden with soot, gas and smoke, yet produce an abundance of green foliage; it apparently likes the toughest and most trying growing condition it can find. This is the tree of heaven, a native of northern China, which grows better under city conditions in this country than any other tree, native or exotic.

It was first taken to England by Peter Collinson in 1751 and probably reached the United States late in the same century, writes Donald Wyman in New England Naturalist. At one time it was highly recommended for city planting in this country (and still is in some places) so that it has become widely distributed in America. It is easy to propagate, either by seeds or root cuttings, and because of its vigorous growth has made itself at home in many out-of-the-way places.

The tree of heaven is also called ailanthus.

## Hedge Improves Home

The privacy and frequently the appearance of a home may be improved by a wall or fence along the lot lines or by a hedge. The kind of enclosure used can be determined by the type of architecture of the house. Colonial cottages and frame houses in general call for a white picket fence or neatly clipped hedge. The fences may be selected from many styles ranging from the least expensive type with plain flat palings to the more ornate style with rounded pickets and fanlight gate. Brick dwellings of Georgian architecture are best framed by masonry walls. These may be any height desired, according to conditions. Spanish or Mediterranean homes are best complemented by a stucco wall, although hedges of various types are used effectively. When a home owner contemplates the planting of a hedge he should consult a nurseryman before making his plant selections, as the expert can tell him what variety will thrive best in local soil.

## Indian Sun Worshipers

Primitive Indians that roamed the hills and plains of central Washington hundreds of years ago were sun-worshippers, it has been learned from a study of writings and paintings on rocks found in this region. Painting in colors of red, green, black, blue and yellow with a pigment that has endured for centuries, the primitive tribes left behind a guide to their day that no one has yet been able to decipher. Students of Indian lore say the designs of rays and circles indicate the tribes worshipped the sun, but have not been able to discover the exact meaning of the markings. Modern Indians, it is said, do not understand them and it is believed the early dwellers were a race apart. Recently, skeletons of what were thought to be members of the primitive tribes were uncovered. They were of adults slightly more than four feet in height.

## 'Factory' Education

The maximum desirable enrollment for any college is 400 students, according to Dr. William Wistar Comfort, retiring president of Haverford college at Haverford, (Pa.) college and foe of "factory" education. "Four hundred students can get to know each other and live together more or less harmoniously," Dr. Comfort insisted. "But a school of 4,000 is almost inevitably a factory, with all the interplay of personalities lost." Contending that the nation has taken on such a big job of education that it has eliminated the personal relationship between student and teacher, Dr. Comfort pointed out, "you can only educate one person at a time."

## Here's a Cure for Warts

Have you any warts? Then go mountain climbing in a thunderstorm. Leonard C. Chatwin, young scientist at the University of British Columbia, believes that electrolysis, caused by forks of invisible lightning striking the axes of the mountain climbers during a thunderstorm, will kill warts. Chatwin, member of the British Columbia Mountaineering club, described how, with a fellow member, he had been caught in a thunderstorm while scaling a 8,000-foot peak. Chatwin said that his partner, who had warts, lost them a week later.

## Ozarks to Get Model Village

### Experts Complete Plans to Move Community to New Location.

JEFFERSON CITY, MO.—Plans for the model town of Greenville, a town to be rebuilt under the eyes of artists and experts starting with only a population and a site, are finished.

Soon the citizens of the town, whose present site will be covered by waters of the St. Francis river backed up behind Wappapello dam, will vote to bring the new site into their city limits.

After that, under a co-operative plan worked out by citizens who must move their homes, the red and green Christmas-like drawing on the wall of the state planning board will come to life.

By 1941, the dam will be finished

and the waters will be flowing through the streets of what once was Greenville while its population of 600 erects its new home a mile away on high ground.

### Artistic Aspects Stressed.

The planning for the town reveals the artist's as well as the engineer's hand. Greenville's streets will be made to fit the contours of the hill country in which it will be situated. The trees and flat place will be saved to provide shade and park space. The site is about one-third of a mile square.

Lying along a north-south highway, the town will be on the banks of the lake created by the dam if the waters ever reach flood stage. That is considered unlikely.

Next to the highway will be the filling station area, and immediately back of that, well away from the road, will be the commercial district.

The industrial section will be slightly south of the business area.

### Hospital to Be Addition.

A broad parkway will lead from the business section past the one

church and the school to the Wayne county courthouse, about a block away. A hospital, something Greenville now lacks, was provided for. Around the church, school, hospital and courthouse will remain, except for necessary improvements and streets, the natural Ozark scenery for a small park.

The main residential section is divided into three main streets which curve through the small ravines. There will be no crowding.

About 40 businesses will be concentrated in the one-third of a square block designated as the commercial area and a flour mill and other small plants will operate in the industrial area.

The one church probably will be acceptable. Greenville now has three churches, but a minister is available for only one each Sunday, so the townsfolk congregate at whatever church has a pastor.

The careful plans took care of 138 residents, three hotels and three lodging houses, the present Greenville's buildings.

# FOR CHOOSING A FORD!

A FEW minutes in this year's Ford will open your eyes to a lot of good things! To roominess and a big-car ride that's a real discovery in low-priced money's worth. To economy that's really amazing. To hydraulic brakes that are the biggest ever used on a low-price car. To easy finger-tip gear shifting of the sort the fine cars use. To roadability and handling ease that make driving lots of fun.

But you'll find the mightiest arguments of all in the 8 fine cylinders under the hood. As 6 million Ford V-8 owners now know, only a Ford adds V-8 performance to low cost and thrift. Only a

Ford gives you, at low cost, the kind of powerplant of which so many highest-price cars boast.

Drive a Ford V-8. Before you pick out your new car, let the world's most famous "8" tell you its own matchless story . . . on the road!

### BEST GAS MILEAGE, TOO!

The 85 h.p. Ford V-8 gave most miles per gallon of all standard-equipped cars in its price class in the 1940 running of the famous official and impartial Gilmore-Yosemite Economy Run. Also . . . Ford owners are reporting that the efficient, precision-built Ford engine requires no oil added between regular changes!

UNIFORM INTERNATIONAL  
**SUNDAY SCHOOL Lesson**

By HAROLD L. LUNDQUIST, D. D.  
Dean of The Moody Bible Institute  
of Chicago.  
(Released by Western Newspaper Union.)

**Lesson for May 19**

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

**JEREMIAH DENOUNCES FALSE PROPHETS**

LESSON TEXT—Jeremiah 23:21-32.  
GOLDEN TEXT—Prove all things; hold fast that which is good.—I Thessalonians 5:21.

Tickling the vanity and pleasing the ears of ungodly people with words of flattery and false comfort, giving them the assurance of peace and prosperity in the very pursuit of their sin, did not begin with the false prophets of the twentieth century. Six hundred years before Christ, Jeremiah the prophet had to contend with such false teachers.

His manner of dealing with them is of great interest to us, for essentially the false prophets of that day used the same methods and had the same false message that characterize their descendants of today, the so-called modernistic religious liberals who are busy everywhere attempting to undermine the faith of God's children in His Word. They are revealed as being destitute of divine authority, without a real message, and under the disfavor and

subject to the judgment of God. They are

**I. Without Divine Commission** (vv. 21-22).

"I have not sent these prophets"—that should have been sufficient for the people of Judah. A man who is not sent by God has no word from heaven, no help for needy humanity. He is worse than an admittedly secular teacher or philosopher, for he claims to speak with divine authority and yet has only the disappointing impotence of a liar and a fraud.

The reason Judah listened to them was because they so eloquently hushed the condemning voice of their own consciences, assuring them that all was well, when, as a matter of fact, everything was wrong. Men listen to the same kind of teaching today for the very same reason.

**II. Without a Divine Message** (vv. 23-29).

These false prophets may delude men, but they have not fooled God. He is not a finite being, limited to this earth (v. 23). He looks on men from the far off viewpoint of heaven and judges by His own high and holy standards.

Nor can they hide from Him (v. 24). God hears the word spoken in the academic shelter of a college classroom, secretly poisoning the young person's heart against the faith of his father and mother. A day of judgment also awaits those who in their public utterances use the phraseology of orthodoxy, while in private they undermine and destroy Christian faith.

If a man is foolish enough to suppose that the dreamings of his own mind and heart will help anyone,

let him be honest enough to call them just that; namely, dreams (vv. 25-28). But God will assuredly not hold those men guiltless who try to pass off their own philosophies as bearing the approval of God; who would have people honor their assemblies as Christian churches, when they are at best only social or intellectual gatherings designed to magnify man rather than Christ.

Note in verse 29 that the Word of God is like the fire that consumes and purifies, and also like the hammer, that breaks up the rocky heart of man.

**III. Without Divine Favor and Blessing** (vv. 30-32).

God is against every false prophet. Small wonder that there is the savour of death in their speaking and their works. There is no divine power in their message and no holy dynamic to enable people to respond to their admonitions. Prominent modernists are decrying in our day the fact that their cultured essays and polished philosophies are not reaching the hearts of men and are failing to transform lives. At the same time, humble preachers and teachers of God's Word, sometimes in hidden and remote places, are rejoicing as they see the transforming grace of God come upon lives as a result of their simple proclamation of the gospel of grace. Keep on, brethren; God is with you.

Observe what God calls the false prophets—thieves (v. 30) and liars (v. 32). Hard words, but they come from One who is all-knowing, who judges rightly and in love.

**Like the Shadow**  
I am gone like the shadow when it declines: I am tossed up and

down as the locust. My knees are weak through fasting; my flesh faileth of fatness; I became also a reproach unto them; when they looked upon me they shook their heads.—Psalm 109:23-25.

**It Doth Not Yet Appear**

You are not what you ought to be, and you are not what you can be. You may rise yet, and fight a good fight yet, and be a good man once more, after the likeness of God who made you, and Christ who died for you!—Charles Kingsley.

**Fishing Profits Rise Off Santa Cruz, Calif.**

SANTA CRUZ, CALIF.—War in Europe, return of the albacore and the discovery that shark oil is extremely valuable for medicinal purposes were responsible for making the 1939 Santa Cruz fishing season the most profitable one in 11 years. Fishermen operating out of Santa Cruz caught \$250,000 worth of fish last year, according to a survey.

War boosted the price of albacore, "the chicken of the tunas," from \$90 a ton to \$135. Discovery that the liver of the soup fin shark is richer in vitamin A than that of most other animals or fish resulted in a \$20 to \$57.50 a ton price raise.

**Believe It or Not—**  
CORNICANA, TEXAS.—The wind blows hard here. An extra strong puff blew over a truck loaded with 14 men. Five were hospitalized.

**Stork Gangs Up on Doctor**  
COLUMBIA, KY.—The stork is ganging up on Dr. B. J. Bolin. The physician has delivered three sets of twins within a week.

**VODER WHICH TALKS AND NOW SINGS WILL AGAIN FEATURE BELL EXHIBIT AT N. Y. FAIR**

**"Voice Mirror" And Hearing Tests Also Included Among Attractions**

Last year it talked. This year it talks—and sings like a man. "It" is the Voder, that remarkable electric voice machine which will again be included among the many attractions of the Bell Telephone Exhibit when the New York World's Fair opens on May 11.

Considered one of the three most popular exhibits at the fair last year, the Bell System show will again feature free demonstration long distance calls to any point in the United States. Visitors will also have an opportunity to learn how their words sound to others over the telephone by means of the "voice mirror" and to have their hearing scientifically tested.

During the time that the fair was opened in 1939 a total of 7,878,000 persons visited the telephone exhibit or about 30 per cent of the total paid attendance. Over 31,000 obtained the privilege of making long distance demonstration calls to which 1,500,000 listened. Some 1,700,000 tests of hearing were made, 1,100,000 visitors heard their own telephone voices repeated by voice mirror apparatus, 110,000 were interviewed on the audition stage and over 5,800,000 listened to the Voder.

**After 41 Years in Navy, He May Stay In for Life**

NEWPORT, R. I.—Chief Storekeeper Stanley Baker, 71, oldest man in active service in the navy, is being allowed by special authorization of the navy department to remain in the navy as long as he desires.

Mr. Baker is attached to the naval torpedo station here. Capt. Thomas Withers, commanding, received a letter from the department saying that in view of his "long and faithful service to retain him in your command as long as he desires."

Born in 1869 at South Dennis, Mass., Mr. Baker has completed 41 years service. His father, the late Capt. Alpheus Baker Jr., and his grandfather, Alpheus Baker Sr., were Cape Cod shipmasters. His great uncle, the late Capt. John (Mad Jack) Percival, U. S. N., was in command of the frigate Constitution (Old Ironsides) on her last voyage around the world.

**Twins, 4 Hours Old, Become Uncle, Aunt**

YAKIMA, WASH.—A twin son and daughter born to Mr. and Mrs. Henry Burbach were just four hours old when they became the uncle and aunt of a girl born to Mr. and Mrs. Emanuel Wassemiller.

It happened this way: Four hours before Mrs. Wassemiller gave birth to a daughter, her mother, Mrs. Burbach, gave birth to the twins.

**Certificates of Beneficial Interest  
FINAL PAYMENT**

UNIONTOWN, MARYLAND**

MEMBER FEDERAL DEPOSIT INSURANCE CORPORATION

(All Deposits Insured Up To \$5,000.00)

**Find Indian Fort With Stockade**

**Military Engineering Used By Reds Before White Man Arrived.**

NEW YORK.—American Indians discovered and used some of the modern principles of military engineering long before the coming of the white man, according to Prof. W. Duncan Strong of the department of anthropology of Columbia university in a report on archeological studies of the Northern Great Plains of America.

Conducting the first extensive exploration of a prehistoric Indian fort more than 300 years old, Dr. Strong and his associates examined the remains of Indians who inhabited parts of South Dakota during the Seventeenth century. The construction of the moat and stockade surrounding the fortified village makes it apparent that the Indians had some knowledge of engineering before their contact with European settlers, Dr. Strong says. The design of the fort's foundations

proved to be distinctly Indian in origin. The tribe, which lived chiefly by farming, apparently built the fort as a protection against bands of marauding nomad hunters. The survey of Indian villages in the upper Missouri river valley, where the prehistoric fort was discovered, was made in conjunction with the University of South Dakota.

**Moat Around Village.**

"Approximately 1,500 Indians had lived in a village surrounded by wooden stockades and a moat one and one-half miles in circumference," Professor Strong reports. "Excavations show that the ditch, which at present is one foot in depth, was originally filled with water four feet deep."

"The wooden stockades closely resemble the forts built later by the whites. The fortifications built by the settlers had blockhouses jutting from each corner that, because the Europeans possessed rifles, enabled the defenders to guard the outside of the walls. Since the arrows of the Indians had a much shorter range than the rifles, the fort constructed by the red men had bastions projecting from the side of the stockade about every 100 yards so that the Indians could shoot their arrows along the walls."

**Two Types of Houses.**  
"Within the fortification were

shallow circular depressions, marking the places where the earth lodges of the Indians had been. Four of these depressions were excavated to determine the type of houses used. It was found that the inhabitants lived in both a round and a rectangular type of building. They were constructed with a timber framework over which rafters and finally a layer of earth had been placed.

"Absence of any material made by Europeans shows that the village was abandoned before the traders had made their way into the region. Hoes made of the shoulder-blades of buffaloes and charred corn showed that agriculture was practiced, while bone fishhooks and numerous bones of game animals indicated that hunting and fishing were also important economic activities."

"A second Indian village in the same region was excavated and the iron fish hooks and scraps of brass found in the cache pits prove that the village was occupied after trade with the whites had begun in the Missouri valley. The second village was probably built by the Arrikara tribe in the latter part of the Eighteenth century."

**Gold Output in United States Increases in 1939**

WASHINGTON.—The bureau of mines announces that the United States and its possessions mined a total of 5,593,425 fine ounces of re-coverage gold valued at \$195,769,875 during 1939.

The figures as compiled by the Denver office of the bureau show an increase of 8 per cent over the 5,170,743 ounces valued at \$180,976,005 produced in 1938.

California was the principal contributor with 25 per cent of the 1939 totals while all states and territories showed gains over the previous year. The Philippine islands mined 18 per cent; Alaska, 12 per cent; South Dakota, 11 per cent; Colorado, 7 per cent; Nevada and Arizona, 6 per cent; and Utah and Montana, 5 per cent.

While Utah and Montana mined only 5 per cent of the totals, they had the largest percentage increase because of an accelerated output of copper and zinc-lead ores from which considerable gold is recovered. The bureau's report indicated, however, that dry and siliceous ores and placer gravels continued to supply the bulk of domestic gold.

**Monkeys Damage Roofs**  
Mischievous black-face monkeys suddenly appeared in Poona, India, and flung tiles from roofs, injuring several people.

**Humidity Prefers Blondes**  
Blonde hair reacts to humidity, contracting and expanding, but the reaction of red and brown hair is barely noticeable.

**Weight of 'Carat'**  
The carat, used for centuries to express the weight of gems, is now standardized at two-fifths of a gram.

**Pit 1,000 Feet Deep**  
The vast open pit of the Kimberly diamond mines in South Africa is more than 1,000 feet deep.

**Kangaroo Feeding Habit**  
Kangaroos feed while sitting erect, the food being held in their forepaws.

**California's Cotton Crop**  
Cotton is now an important crop in California's central valley.

**Largest Antelope**  
The African eland is the largest of all antelope.

**'Give the Dew a Chance'**  
"Give the dew a chance. Try it for a week," pleaded Capt. S. J. Parker, the government's chief inspector of physical training, in a speech in Orpington, England. "We would all benefit permanently in our general health," he continued, "if we spent with discretion five or ten minutes every morning barefooted on the grass carrying out simple but purposeful movements, such as walking and arm, leg, trunk and breathing exercises."

**\$10,000 Button Collection**  
Collecting buttons may seem drab and uninteresting but to Mrs. Carrie B. Jones of Tampa, Fla., it is an exciting and profitable pastime. Probably the greatest button connoisseur in the South today, Mrs. Jones has a collection of 60,000 buttons valued conservatively at \$10,000. She turned to button collecting 14 years ago after the death of her only son.

**Garages Increase**  
The change in home building caused in the past decade by the increasing importance of the garage is reflected in Federal Housing administration figures for its last year's operations, which showed that four of every five new homes securing insured mortgages had garages.

**PUBLIC SALE**  
OF  
**Valuable School Properties**

The following school properties will be offered for sale at the Court House in Westminster, Md., on  
**TUESDAY, JUNE 4, 1940,**  
at 1:30 P. M.:  
**FAIRMOUNT.**

All that parcel of land situate in Hampstead district, about two miles northeast of Greenmount, containing one-half acre, more or less, being the same parcel of land that was conveyed to the Board of County School Commissioners of Carroll County by Ananias Rineman and Laura C. Rineman, his wife, by deed dated July 17, 1891, and recorded among the Land Records of Carroll County in Liber J. H. B. No. 89, folio 538, etc.

This property improved with a one-story brick school building. Metal roof.

**STONY RIDGE.**

All that parcel of land situate in Freedom district, about one and one-half miles east of Sykesville, near Marriottsville, containing eighty-three square perches, more or less, being the same parcel of land that was conveyed to the Board of County School Commissioners of Carroll County by Christian Devries, by deed dated August 13, 1875, and recorded among the Land Records of Carroll County in Liber F. T. S. No. 45 folio 432, etc.

This property improved with a two-story brick school building (3 rooms). Metal roof.

**SHILOH.**

All that parcel of land situate in Hampstead district about two and one-half miles west of Hampstead, adjoining Shiloh Church, containing one and one-half (1½) acre more or less, being the same parcel of land that was conveyed to the Board of County School Commissioners of Carroll County by Jacob Sharrer and Christina Sharrer, his wife, by deed dated September 1, 1879, and recorded among the Land Records of Carroll County in Liber F. T. S. No. 52, folio 101, etc.

This property improved with a one-story stone school building. Metal roof.

**SPRINGVILLE.**

All those two parcels of land situate at Rollers, in Manchester district about seven and one-half miles north east of Manchester, between Alesia and the Baltimore-York State Road, as follows:

1. All that parcel of land situate along the county road, adjoining the Roller Meeting House lot, containing one-quarter (¼) acre, more or less, being the same parcel of land that was conveyed to the Board of County School Commissioners of Carroll County by Charles Zeigler and Lydia Zeigler, his wife, by deed dated August 31, 1889, and recorded among the Land Records of Carroll County in Liber W. N. M. No. 76, folio 144, etc.

2. All that parcel of land in the rear of and adjoining the above (1) described parcel containing one hundred and forty (140) square perches, more or less, being the same parcel of land that was conveyed to the Board of Education of Carroll County by Lydia Zeigler (widow), by deed dated September 15, 1923, and recorded among the Land Records of Carroll County in Liber E. M. M. No. 142 folio 334, etc. (See this deed for roadway reservations and fence restrictions).

This property improved with one-story frame (portable) school building with basement. Hot air furnace. Composition roof.

**MEXICO.**

All that parcel of land situate in Westminster district on the Westminster-Manchester State Road, about two and one-half miles north of Westminster, containing ten thousand, three hundred and sixty (10,360) square feet, more or less, fronting eighty-nine (89) feet on the said State Road. (Survey dated April 29, 1940).

Title to this property is secured by adverse possession in the Board of Education by virtue of the continued adverse possession of the Board of Education, and its predecessors, for a period exceeding one hundred years.

This property improved with a one-story frame school building. Stone

foundation. Metal roof. Electric lights.

**TERMS OF SALE**—Ten percent (10%) cash on day of sale. Balance within thirty (30) days. Purchaser to pay all costs of transfer.

By order of  
**BOARD OF EDUCATION OF CARROLL COUNTY.**  
ROY W. POOL, President.  
R. S. HYSON, Secretary.

**CLEAN-UP DAY**  
**Tuesday, May 21, '40**

The above day has been set aside by The Mayor and City Council for collecting rubbish and refuse. All persons are asked to have such placed in suitable containers in front of their homes not later than 8 o'clock, A. M., on the above date. Trucks and men will be provided to collect and haul all such away at that time.

**NORVILLE P. SHOEMAKER, Mayor.**

**THE PICTURE IS NOT COMPLETE**

**—unless your home is soundly financed**

Home Sweet Home is not all it should be unless it is being paid for along sound, modern lines. In most cases this means an amortized mortgage at reasonable interest rates, with regular principal-reducing payments. If you are going to buy or build, or if you plan to refinance your present mortgage, we'll gladly talk things over with you and recommend the plan that we think is best to meet your needs.

**Don't Let Taxes Eat Up Your Estate**

Taxes become heavier with each passing year; the maze of laws becomes more difficult to thread. One foolish mis-step might easily cost your estate thousands of dollars.

On the other hand, forethought and careful planning, based upon a more complete knowledge of tax procedure, can hold tax shrinkage to a minimum.

We shall be glad to discuss with you and your attorney the various legitimate ways in which our Trust Department might help to reduce settlement costs on your estate.
