THE SANITARY SEWERAGE SYSTEM

Another Letter from Engineers Explaining Cost

At the regular meeting of The Mayor and City Council of Taneytown Monday evening the Sanitary Sewerage System for the town was discussed. It was agreed that after a public meeting that is to be held on Monday, October 26, at 7:30 p. m., a date would be set for the qualified voters of Taneytown to voice their opinion regarding the Bond Issue of \$400,000 that was passed at the last session of the Maryland Legislature permitting the financing of the project should the town build the Sewer. A letter was received by the City Council from the engineers, follows:

October 6, 1953
Mayor and City Council
Taneytown, Maryland
Attention: Mayor Raymond J. Perry
Re: Sanitary Sewerage System
Taneytown, Maryland

Gentlemen:
At your request, we have made a preliminary study of the method of financing the sewerage system for Taneytown, Maryland. For the purpose of this study, we have assumed that a forty year bond issue will be sold in the full amount of the \$500,000 as authorized by the Maryland Legislature for the purpose of building the sewerage system.

We have discussed numerous projects of this type with the banking houses who are interested in buying bond issues for purposes such as this, and at the present time an interest rate of 4% is in line with the trend of the bond market. We have assumed a 4% interest rate for the purpose of preparing the enclosed suggested Maturity schedule for Taneytown Bond Issue.

Over the forty year period the average annual payment of principal plus interest on this bond issue will amount to \$25,000. The enclosed maturity schedule indicates that the minimum average five year annual payment will vary from \$22,000 minimum to a maximum of \$27,900. We understand that the Town of Taneytown has an assessed value as of this date of \$4,500,000; however the Town is now being re-assessed and the amount of the new assessment is not available. As a result, any increase in the tax rate that may be necessary for the financing of this project cannot be estimated at this time.

The cost of operating and maintaining a sewerage system such as the one designed for Taneytown, including electrical cost for pumping, chlorination of the treated sewage, labor costs, etc., will amount to perhaps \$5,000 per year, making it necessary for Taneytown to have available a total of \$30,000 per year for the next forty years. It should be noted that after forty years has elapsed the only cost of the system will be that of maintaining and operating it.

It should be understood that the figures shown on the maturity schedule are based upon the assumption set forth above and the total cost of the project may vary from the \$500,000 and the 4% interest rate may be slightly lower or higher at the time when the bonds are sold; however, we believe the figures are essentially correct and will furnish you with the necessary figures for determining a method of financing this project.

We understand that a public meeting has been set for the night of October 26, 1953, at which time we will be available to assist you in discussing the technical phases and the financing of this project.

Very truly yours,
WHITMAN, REQUARDT AND ASSOCIATES

Pupils of the Elementary School have elected their Student Council for the coming year. Slide down sliding board in proper manner.

They were former missionaries serving in China and India. Mrs. Taylor based her talk on two Parables of Jesus, The Lost Sheep and The Lost Coin. She related how an opium smoker became an evangelist through the efforts of a missionary. She told of the life of a medical student, also an ardent preacher, giving his best to a small hospital with little pay although he could have advanced himself. After the Communists took over China he went to Formosa. She also told of a young student, who, through her desire for knowledge and scholarships, became the principal of the school and also a Christian. She was driven out by the Communists.

The offering was received and all joined in singing the hymn, "In Christ there is No East or West."

In the absence of the president, Mrs. S. Harley Holter was in charge of the business meeting. Everyone was reminded of our public supper to be held on Oct. 10 and chairmen were reminded to solicit their committees for donations for the food table. The motion was made and passed that the guild sponsor the hot table in the new kitchen.

Anyone wishing to go to the Regional Meeting at Cavetown, was to notify Mrs. Harry Mohny so proper reservations could be made. Mrs. Mervin Wantz read a letter concerning Homewood Auxiliary asking our support.

No further business, the meeting adjourned with a brief social period to meet in November with the Thank-offering Committee in charge, Mrs. Romaine Motter, chairman.

MARTIN LUTHER FILM AT STRAND THEATRE IN GETTYSBURG

People of all faiths will soon be privileged to see the feature picture, "Martin Luther" at the Strand Theater in Gettysburg, Pa., where it is booked for a one week run beginning with a Matinee showing on Thursday, October 15. This is the story of "The man who changed the world—Forever!" which has already received the plaudits of such magazines as "Time" and "Life" and of those multiplied thousands who are now seeing the picture in theatres throughout the land.

The half million dollar feature film was produced in towns, churches and castles of West Germany. Craftsmen enlisted the support of museums in Berlin, Mainz and Weisbaden for authentic costuming and reconstruction of scenes such as the Diet of Worms and the Diet of Augsburg. Music was furnished by the Munich Philharmonic Orchestra with an original score by Mark Lothor of the Bavarian State Theater.

The script is based upon Catholic and Protestant sources and leans heavily upon historic document for dialogue.

Church leaders have called "Martin Luther" a "film for everyone." The Stewardship secretaries of thirty denominations have passed a unanimous resolution urging all denominations to encourage their people to see what they term "a magnificent film."

The picture will be shown at the Strand Theater in Gettysburg for the week scheduled on a three-a-day basis at 2, 7 and 9 P. M.

CURRENT EVENTS FIFTY YEARS AGO

On Oct. 4, 1903, at the Lutheran Parsonage, Silver Run, Mr. Tollie O. Berwager and Miss Catharine Frock were married by Rev. W. H. Ehrhart.

New Windsor—N. H. Baile, Cashier of the First National Bank, started for Los Angeles, Calif., on Friday last, to attend the Banker's Convention. Mr. Baile will visit other points of interest while on his trip. Mr. and Mrs. B. M. Jones and son, spent a few days with Mr. and Mrs. M. D. Reid.

Union Mills—The foundation for a new creamery has been broken on the premises of Nelson Koonitz between here and Silver Run, by Smeak & Warehime. They will close their creameries in Union Mills and Silver Run within a few weeks and only the new one will be in operation.—On Thursday evening, Oct. 1, 1903 Edward Yingling, son of Mr. and Mrs. Ephraim Yingling, and Miss Agatha E., daughter of Mr. and Mrs. Leander Mathias, were married at St. John's Catholic parsonage, Westminster by Rev. Cassidy.

The Presbyterian congregation has given an order for a large furnace for the parsonage building, the present one having proven too small to heat the building in extremely cold weather.

The County campaign, this fall, promises to be a hot one, and candidates will no doubt resort to unusual efforts to secure votes. Remember, gentlemen, that it is better to be defeated, with honor untarnished, than to be elected by disreputable practices and the besmirched character. Any effort to win, connected with actions which lower one's manhood and reputation for uprightness, had better not be made. No office is worth such a cost.

FEESERSBURG

The State Department of Agriculture is advising farmers not to become alarmed about the shortage of hay because there is plenty of hay in the nation and more than enough to go around. Some farmers may get in a panic and go buy the first load of hay they see. Later, they may be sorry, as the price of hay should remain the same and the quality will improve. The States of Pennsylvania, Michigan, New York and Ohio have ample supplies. Maryland dairy farmers should not be worried as they border on Pennsylvania.

Sometimes back we wrote about gingerbread topped with lemon sauce and how much the family enjoyed it. A reader informs me that sliced bananas on top of the lemon sauce makes enjoyable eating.

Grandfather spent little money on flowers for his girl-friends but according to florists his grandson is making up for his shortcomings. Men today, when they walk into a flower shop know exactly what flowers they want and the color. And they don't quibble on the price either. Grandmother, if she received any flowers at all, was presented with traditional roses—generally red-roses. Today the flowers must match the gown and fit into the occasion. Orchids are the most popular flower at the moment with gardenias and roses next. But any flower presented at the right time does something to a woman's heart. If men could remember this they would win more battles with their wives. What a man can't put into words sometimes he can say with a nosegay of violets or a perfect rose and say it more eloquently.

On September 24th a \$750,000 headquarters for the National Congress of Parents and Teachers was dedicated in Chicago at corner-stone laying ceremonies. This was made possible by the membership of local P.T.A. groups.

We are certainly happy that Senator McCarthy is finally married. At least while he is on his wedding trip we should get a rest from his wild charges and counter-charges. Maybe his wife will be able to do what even the President of the United States hasn't been able to do—that is to get him to speak the truth.

It is reliably reported that Camp Dietrich, one of the most hush-hush of all our Military Camps located at Frederick will soon be under the private management of the Mathieson Chemical Corporation of Baltimore. Transferring Camp Dietrich to a private firm would be in line with a new policy laid down several months ago by Secretary of Defense Wilson.

The appointment of Gov. Warren, of California, to fill the vacancy as Chief Justice of the Supreme Court left by the death of Fred Vinson is one that meets with the approval of both Democrats and Republicans. It is a happy choice for all Americans. Gov. Warren is a liberal and a person of the highest integrity and purpose.

This was a week when so many pleasant things happened. Baltimore finally got a big league baseball team and all fans in Maryland should be happy. As one person said "Now we can yell for our own team instead of the Brooklyn Dodgers".

A good deal of misery is avoided by people who let others have the last word.

Recently I had a good laugh at the expense of a friend. She is one of those fortunate people who has a woman to help with the house work, but, some time ago her helper quit. "For what reason?" I asked, "Didn't you treat her like one of the family?" "That was the trouble," mourned my friend. "We did treat her like a member of the family, but she said she couldn't take it and left." When I laughed, my friend couldn't understand why.

A good wife laughs at her husband's jokes, not because they are clever, but because—she is.

Most women are going to shun the short skirts this fall that Dior tried to foster on them. It's a sure sign that American women have grown up. There was a time that if French designers had decreed they wear a ring in their nose women would have scampered pell mell to the nearest blacksmith shop and had one put in. But Americans have turned out to be smart designers themselves and they know what is right for the free style living of American women.

The last day of September decided to leave a record and did in the form of heat. The hottest Sept. 30 on record was 84. The hottest Sept. 30 on record this Sept. 30 set a new high with 92 at Baltimore.

While statesmen argue, young people from many countries meet, live together and get acquainted in the youth hostels across Western Europe. Accommodations are available for an average of 25 cents per night with facilities provided for cooking. Most of the hostellers travel by bicycle, some hitch hikers go by bus or 3rd class trains. Thus they travel at minimum cost which keeps them close to the people and the problems of the different countries they visit—rather than the isolation of deluxe travel. Realistic foundations for international understanding are being built by the youth hostel movement.

Silo filling is about over and lucky was the farmer who had enough grass or corn to fill one. There were more trench silos used this year than ever before. If this season has taught the farmer anything it is that one cannot depend upon feed pasture during a dry season to take care of his stock.

Not a week goes by but what some one writes a book on how to relax or how to achieve peace of mind. There is a way to achieve both, but it's so simple that it sounds trite and few people believe in it any more. I guess

that's the reason so many of us are unhappy and afraid.

WHY should you do yourself out of the big things in motoring life?

Why pass up the room and power and comfort and niceties of big-car travel — when you can buy a big, new Buick SPECIAL for just little more than the price of smaller cars?

We show our price here to prove our point — to prove that you can buy this Buick SPECIAL for just a few dollars more than you have to pay for one of the so-called "low-price three."

Figure what that means—

Just a few dollars more for a lot bigger hoodful of power — Fireball 8 power — the highest horsepower ever placed in a Buick SPECIAL.

Just a few dollars more for big and spacious 6-passenger roominess — and the solid, steady comfort of Buick's famed Million Dollar Ride.

Just a few dollars more for Buick styling, Buick handling, Buick luxury, Buick fun.

But do you know what else those few extra dollars get you in this big, broad, beautiful Buick?

THE GREATEST
BUICK
IN 50 GREAT YEARS

They get you a long list of standard equipment at no extra cost that most other cars at or near its price charge you for, as extras — which makes our quoted price even lower than it looks.

We have the facts and figures to prove our points. All we need is you, at the wheel.

Drop in on us this week and see for yourself that your new-car money really buys big — in Buick.

God's New Men

Lesson for October 11, 1953

What would it take to make an ideal world? Or if that seems too large an order, what will it take to improve the world we have? Of course any little thing may improve it a little. A better climate where you live; better laws, a more efficient police force, better equipment for schools and more adequate salaries for teachers; better trade relations with other nations, better government; all these would probably improve the world somewhat. But all the schemes for the improvement of society have struck one rock: the jagged fact of human nature.

Wanted: New Men!

Everybody knows that, to be sure. So when Christians say that what the world needs more than anything else, to make it a better world, is better people, we don't get an argument from anybody who has thought about it. Everybody says, Amen! We do get an argument over the question: How do we get our new men to build the new world? Christians above all should be interested in this question, and indeed they should be working at it. It is not one of these questions that just solves itself if you let it alone.

Consider some of the wrong answers to the problem of how men can be produced. One is the lazy answer: Just leave the human race alone, they'll do all right; human beings just naturally have so much good in them that if the "Do-gooders" will just keep their hands off, everything will keep right on improving. Of course that's nonsense, as any one can tell who will take a close look at any part of the world that has been left alone for some time. A world full of people left to do as they please will soon be a mess. Another wrong answer is: Improve the breed.

Take care of heredity, weed out the unfit, let laws of eugenics improve humanity. Well, that won't work, because all that careful breeding can accomplish is no more than improving people's bodies and minds.

God's Design

Not that eugenics isn't a good thing so far as it goes. So is anything that really improves people, as even barber and beauty shops do, a little. But nothing that works on man from the outside will improve him on the inside as he needs to be improved. In fact, what the Bible tells us is the simple truth that man needs not so much to be improved as to be made over.

We don't need revised men, revamped men, re-conditioned men; we need new men. The Bible tells us the truth, that man's nature has been so affected by sin that nothing short of a radical operation will effect a cure. Madame Perkins tells a story of F. D. Roosevelt, that once over a weekend he took home with him some book by Soren Kierkegaard a crabbed but honest Christian philosopher. F. D. R. turned up Monday morning with what to him was a brand-new idea which he had learned from Kierkegaard. "Now I know what's the matter with people," he said. "They're bad!"

The odd thing about that was that F. D. R. was an Episcopalian, and at his own church he must often have joined in the General Confession: "We have left undone those things which we ought to have done, and there is no health in us." No wonder Jesus said: "Ye must be born again!"

The Secret

The secret in a way is simple, but it seems so simple that many persons miss it. How is a man born again? What does he have to do to be born again? The truth is: Nothing. The secret is: God in the heart. What do you do to make your home bright? You just pull up the shades. What do you do to have God's Spirit in your heart? Ask him. Open the door.

You do not have to create the sun, it is out there ready to come in. You can keep it out if you insist but you never have to coax it; you can't pay it to come in. Just raise the shades and in it pours. But just as there is substitute for sunshine, there is no substitute for God. You, Without God, are part of the problem of the world. You, with God, you, changed by Him, are part of God's design for his better world.

THINGS TO KNOW

A "pusher" is the slang term for a dope peddler.

In 1950 the population of the United States increased by 2,500,000.

Freed American prisoners said the Chinese tried to make them revise the Lord's Prayer, and give thanks to the Reds instead to God. They would have us say: "We thank the Chinese for our daily bread."

Circuit Judge Julius H. Miner, of Chicago ruled, despite the opinion of the plaintiff's attorney that, "nagging is one form of love; she didn't want to lose him; that nagging by a wife is not a manifestation of love."

Potatoes are grown commercially in every state of the Nation.

For every dollar spent for welfare and religious purposes, the liquor traffic collects seven (\$7) dollars.

The only way to get into Polecat Hollow, Md., is across a small wooden bridge. Two families live in Polecat Hollow. A few days ago, the county road crews had to rebuild the bridge before a physician could drive across to attend an expectant mother.

Chicago is the 'railroad capital of the world. There are 38 railroads terminating there.

"He can't go out without any hair on," a woman of Oklahoma City told Detective Lt. Walt Turner. Of course she was referring to her Persian tomcat which a neighbor had caught and shaved because of his everlasting night wailing. To call on his girl friend, he must be properly attired.

"The way of transgressors is hard",—Proverbs 13:15 (KJV)

"EMPLOY THE PHYSICALLY HANDICAPPED WEEK"

A proclamation naming October 4 to 10 as "Employ the Physically Handicapped Week" has been issued by Governor Theodore R. McKeldin, who urged the cooperation of public officials, business, industry and all organizations in this important project.

The proclamation stated that "The aftermath of our war against Korea remains with us—it includes many veterans of that fight for freedom, who lost limbs or became otherwise disabled in battle. Still others of our citizenry have been born with handicaps inflicted upon them through illness or injury."

"Our studies and experiences have shown that many of our handicapped citizens are quite capable of participating in our production and increasing the wealth of our land. Failure to utilize this great human resource is wasteful and wrong."

"In Maryland, the Governor's Committee to Promote the Employment of the Physically Handicapped, the Department of Employment Security, and the Department of Vocational Rehabilitation are working increasingly to see that the handicapped have their opportunity to work and that business and industry have the advantage of this supply of assistance."

Volunteers in every county and in Baltimore City are already at work planning for the Week's observance and projects for the remainder of the year.

CIVIL DEFENSE HEAD PRAISES THE PUBLIC FOR TEST BEHAVIOR

Sherley Ewing, State Civil Defense Director, released the following statement today after the completion of "Operation Check-up" Maryland's first State-wide Air Raid Alert:

"This test would not have had the desired results without the enthusiastic cooperation of the various County and City Directors, who have been working on 'Operation Check-up' for some time. To those counties which called out their volunteers, we owe our thanks."

Today's State-wide Alert would never have gotten the support it did from the public if you newspaper, radio and television people hadn't publicized the event so wonderfully. You can be proud of the part you have played in educating the public to some of the basic secrets of survival in this 'Age of Peril.'

I want to thank the various State Departments who actively participated in this test. I would like to point out specifically the Military, The U. S. Air Force, The 29th Division Air Arm, The Maryland National Guard Air Unit, Mr. Richard Jamison, Director of the State Department of Aviation, The Department of Health and Education, The State Roads Commission, State Police, Forests and Parks and "Ham" Operators.

Last but not least, I want to congratulate the public for their cooperation in this exercise. There were, of course, instances of non-cooperation on the part of some individuals, some who were from out-of-state. On the whole, however, on the basis of preliminary reports, the people were wonderful and seemed to realize that this is serious business."

Later reports will undoubtedly reveal that in many localities, the sirens were not heard. We will also hear of traffic not stopping. However, the purpose of "Operation Check-up" is just what the name implies—a check-up on our existing warning system and a check-up on the public's reaction to the warning of an imminent enemy attack.

So far as I'm concerned, if one tenth of the population learned how to better protect themselves for a real attack, then the test was well worthwhile.

The man who won't act his age often is married to a woman who won't tell hers.—Grit, Williamsport, Pa.

PREVENT FIRES

Open air burning before 4 p. m. (EST) within 200 feet of woodland or inflammable material that can carry fire to woodland is prohibited between September 15 and December 15, District Forester William A. Parr reminded the Northern Maryland district this week.

Parr noted that early September rains have relieved the dangerous fire situation to some extent, but the general drought in this area during the summer has left the woods drier than usual.

He especially asked hunters to be careful with fire, matches, and cigarettes in fields and woods this fall. The forester said that this summer was the first in a number of years that it was necessary to open fire towers in this section of the state. These towers, normally in spring and fall, have been partially operated all summer, with the worst situation being in Cecil county.

He urged everyone to know the law and follow its provisions, as noted below:

Open-air burning. Open-air burning is prohibited except under the following conditions: There must be a fire break (natural or constructed at least ten (10) feet wide completely around the material to be burned, free of inflammable material, and

There must be present adequate personnel and equipment to prevent the fire from escaping, and

There must be at least one responsible person at the location until the last spark is out.

During the months of March, April and May and from September 15 to December 15, inclusive, there shall be no open-air burning except between 4 p. m. and 12 midnight, EST, or except when the ground is covered with snow, and then only in compliance with the conditions specified in above paragraphs.

WILL ATTEND KIWANIS CONVENTION

The Kiwanis Club of Taneytown will be represented at the 1953 convention of the Capital Kiwanis District at Richmond, Va., Oct. 8-10, Club President J. Norman Graham announced.

The local representatives to the convention will be Wallace Reindollar, Eddie Howarth, Miles Reifsnnyder and Pres. Graham.

Reed C. Culp, trustee of Kiwanis International and prominent livestock broker of Salt Lake City, Utah, will be a featured speaker during the three-day meeting at the John Marshall Hotel.

Delegates from 120 clubs representing a membership of over 7,250 business and professional leaders, will participate in the various sessions. Committee conferences, a discussion of plans for the coming year, and election of officers will highlight the convention program Graham said.

The presiding officer will be Herbert F. Weldin, governor of the Capital Kiwanis District and a plumbing firm executive of Wilmington, Del.

Mr. Culp who will serve as the official representative of Kiwanis International at the meeting, is a past governor of the Utah-Idaho Kiwanis District. His firm, Culp and Sons Sheep Company, is one of the largest livestock enterprises in the west.

Past International Presidents Claude B. Hellmann, utilities executive of Baltimore, Md., and Harry E. Karr, attorney-at-law of Baltimore, Md., will also address the convention.

MOTORIST—WATCH THAT CHILD

Colonel Elmer F. Munshower, Superintendent of the Maryland State Police, recently stressed the fact that "nothing we hear or read about strikes us with so shocking a sense of tragedy as the accidental death of a small child. We feel sorrow and sympathy for the parents in their loss. We also feel a sense of guilt because we failed to protect a child from the hazards of his environment."

The Colonel continued: "Seventeen children were killed and 1,065 injured by motor vehicles in Maryland last year, because of carelessness and indifference to safe driving habits. During the first six months of 1953, the State Police arrested 170 operators and warned 168 more for passing school buses that were discharging children."

Colonel Munshower said: "There is no excuse for such wanton disregard of the law. When school buses stop on the highway—you must stop. The State Police are doing their utmost to arrest these willful violators. Remember—the child's life you protect is the most precious possession on earth to some family."

OTHER STATE-WIDE ALERTS

State Civil Defense Director Sherley Ewing said recently that more state-wide air raid alerts would be held in the future.

Mr. Ewing said that the State Agency was considering not announcing the time of the next test. "We know that the public's reaction would have been much poorer without the prior publicity we received for 'Operation Check-up,'" he said.

Public reaction to the recent Test has indicated that future alerts are desirable. "We don't want to pester the people but, at the same time, none of us can forget that we are living in an 'age of peril,'" Mr. Ewing said.

Mr. Ewing said that reports from all over the State indicate that the recent test was a "big success."

Many local C. D. directors have requested that future tests be more of a surprise to the public, according to Mr. Ewing.

PRESBYTERIANS INCREASE

The Presbyterian Church, U.S.A. reported membership of 2,482,248 at the end of 1952, the Year book for 1953 of the American People Encyclopedia reports. This was an increase of 34,273 persons from 1951.

The church undertook to raise \$12,000,000 for building new churches, and for aid to its nine theological seminaries. By the end of the year, more than 75 per cent of this total had been pledged.

TIME

TO

ACT!

Make a thorough check of your home. Inspect and clean your heating system, correct faulty wiring, clean out rubbish such as old newspapers and oily rags, and remove gasoline or other volatile liquids from the house. Follow these and other simple fire prevention rules regularly. The "ounce of precaution" proverb is never more true when it comes to the need of better fire prevention.

Why buy fertilizer?

Even though it adds up to a lot of money, you buy it because it pays off in bigger, better crops. That's the way it is on a farm—it's what you get for your money, not what it costs. Your telephone really gives you a lot for your money. It saves time and trouble. Saves trips and travel. Keeps you in touch with markets. Keeps your family in touch with friends. The money you pay for telephone service certainly goes a long way and does a lot of things!

What's the secret?

There's something that goes into good telephone party-line service that the telephone company doesn't furnish. It comes from the users themselves—and the good, old-fashioned name for it is courtesy. To be courteous on the party line means being considerate of others. You simply space out your calls, keep them reasonably brief, and be careful to hang up properly when you've finished. Simple and easy to do—but such things add up to better service for everyone!

October is a good month to—

Remember some of the stunts you pulled on Hallowe'en when you tell the kids to take it easy.... Pick out a warm day to treat hogs for lice and mange with benzene hexachloride.... Give extra feed to heifers to be bred this fall—heifers gaining weight settle better.... Give legume pastures a rest so they can store nutrients to carry them through the winter.... Provide storage for corn instead of selling it from the field at low harvest prices.... Fertilize and lime lawns.... Mulch berry plantings.... Cull the laying flock to weed out non-producers.
