## Social Security

Do you know that you don't have to retire completely to get social security benefits? You may work and have earnings within certain limitations and still receive either all or part of your benefits during the year.

Briefly, you may receive all of your total earnings from employment and/or self-employment does not exceed \$1200 for the year. If your earnings are more than \$1200, the amount of money that you may lose depends upon the amount of earnings over \$1200. For example, if your earnings are over \$1200 in a year you lose one half of the first \$500 you earn over the \$1200, and dollar for dollar over \$1700.

If you are receiving social security benefits you must notify your local social security office as soon as you know that your earnings for the year will be more than \$1200. At that time you should also advise the social security district office of your expected earnings for the year, as well as any months you earned over \$100. This will enable the Social Security Administration to withhold the proper amount of benefits based on these estimated earnings. If you don't report promptly, your checks may have to be suspended to make up for the overpayment.

Carroll County residents may obtain further information by contacting the social security representatives at any of the following offices:

WESTMINSTER in the County Administration Building on any Wednesday between the hours of 10:00 A. M. and 2:00 P. M.

TANEYTOWN in the First National Bank on the first Tuesday of each month between the hours of 10:00 A. M. and noon. Union Bridge in the Union Bridge Bank on the second Tuesday of each month between the hours of 10:00 A. M. and noon.

## Schedule for Testing Prospective Auto Drivers

Maryland's Department of Motor Vehicles today announced that schedules for testing prospective drivers at 23 of the 24 test sites throughout the state was rearranged effective Monday, July 20, 1964. The new driver test range at the D.M.V. headquarters in Glen Burnie is already operating under a maximum schedule and will be unaffected by the order. John R. Jewell, Commissioner of Motor Vehicles said the schedules at other test locations will be changed to offer greater convenience to the citizens in all areas of Maryland and to accommodate the ever-increasing number of new drivers.

"We are pleased," Commissioner Jewell stated, "that the Driver Licenses Division will be able to allot more time at every location and add as much as an extra day at some. This will be accomplished despite personal and travel-time limitations."

According to the new schedule driver examinations will not be administered during the normal lunch hour period from noon to 1:00 P. M. As usual tests will not be conducted at any location on Saturdays, Sundays or Legal Holidays.

During July and August the closing time for tests will be one-half hour earlier than scheduled. "One one in line at that time will be waited upon, however," Commissioner Jewell concluded.

## HERD NAME PREFIX RESERVED FOR BROWER

Paul F. and Sterling R. Brower, Taneytown, Md., will have the exclusive use of the prefix "Brothers-Agreement" in naming all Registered Holstein animals bred in that herd from now on.

Use of this prefix name has been granted by The Holstein-Friesian Association of America. It becomes a permanent part of official breed records at that organization's national headquarters in Brattleboro, Vermont.

Some 1,500 prefixes are reserved for Registered Holstein breeders each year. In total, more than 30,000 Holstein dairymen are using their own distinctive prefixes in naming their home-bred cattle.

Each prefix, essentially a "trade mark" for the purebred Holstein breeder, is used in all published information concerning that animal. Thus, the use of this distinctive label aids the breeder in the promotion and advertising of his stock for sale and publicity purposes.

The story behind each prefix may be an interesting one since it may be the farm name, the owner's family name or unique combinations of portions of family member names. The exclusive nature of each prefix name often stimulates the creation of clever terms to preserve its "one and only" nature.

## CARROLL COUNTY GENERAL HOSPITAL REPORTS MEDICAL CHANGES

The doctor's little black bag—the traditional symbol of American medicine—follows a different path today than it did 50 years ago. Then it made most of its trips between the doctor's office and the patient's home; today it travels most frequently between the office and the hospital.

"The little black bag's altered path illustrates the changing patterns of medical practice—the trend toward centralizing medical care in the hospital," according to Joseph R. McFerron, administrator of Carroll County General Hospital.

Medical care has shifted from the home to the hospital, and with the shift, a new ingredient has been added to patient care—the highly technical methods resulting from the scientific revolution of the 20th century, he said.

The combination of science and individual patient care was the theme of National Hospital Week, May 10-16. This observance, originally celebrated as National Hospital Day, has been marked annually since 1953. Sponsored by the American Hospital Association, it is held each year during the week of Florence Nightingale's birthday (May 12).

The contents of the doctor's little black bag have changed only slightly in the last 50 years, but the changes again illustrate the trend toward the hospital. Added to the bag are some new drugs—particularly antibiotics and stimulants for starting stopped hearts. Subtracted are the equipment and instruments the doctor used at the patient's home for surgery, obstetrics and emergency treatment of injuries.

Nowadays, the doctor admits surgical and obstetrical patients to the hospital and meets the injured patient at the hospital's emergency room. The hospital has indeed become the community's center for health care. In the past 50 years, it has added laboratories, diagnostic x-ray machines, cobalt units, pharmacies, and a host of other facilities necessary for the patient's recovery. As new scientific equipment is developed and proven effective, it is added by hospitals to help save lives and combat disease. This dramatic progress has meant added years of life for many persons.

"Just as every medical service provided in the patient's home was accompanied by the individual care and attention of the doctor, every hospital service is administered individually to meet the needs of each patient," the administrator said. Hospital people are highly trained to provide the exact treatment or medication the doctor prescribes.

Individual concern for each patient is synonymous with hospital care. The scientific services are necessary for the patient's speedy recovery, but hospitals also recognize the patient's need for emotional support. Hospital people strive to provide this support by means of individual and personal services for patients and their families. Additionally, hospitals are adding many services which make each patient's recuperation more pleasant. The care provided in today's hospital scientifically exceeds that provided from the little black bag of 50 years ago, but the "tender loving care" which accompanied the doctor's visit is also still present in the hospital.

## SECONDARY EDUCATION STANDARDS APPROVED BY STATE BOARD OF EDUCATION

The Maryland State Board of Education adopted the document entitled, Principles and Standards for Public Secondary Education in Maryland at a meeting held on July 1. These principles and standards, which will affect the approximately 298,300 students attending public high schools in Maryland, were developed by a State-wide committee of educators, including representatives from many of the local school systems in the State. This committee has been at work for over three years and was chaired by Mr. Thomas W. Pyles, State Supervisor of High Schools.

A major change in these high school standards which will become effective in September, 1965, raises the number of credits needed for graduation from high school to eighteen. Presently, sixteen units of credit must be earned by a student in order for him to meet graduation requirements. In addition to this change, school systems are given increased assistance in developing specialized arrangements for highly able students and for those students engaged in part-time, evening, or summer-school programs.

The document as revised and adopted by the State Board will be distributed for use by administrators and principals in the local school systems throughout Maryland.

## County Will Build Streets

A public hearing was held by the County Commissioners on Friday, July 17, relative to the construction of Dunrovin and Augusta Avenues north of Westminster, such hearing being in accordance with private streets legislation enacted in 1961 and 1962, and under county ordinance No. 2.

At the public hearing ten of the thirteen property owners on the two streets voted to have the county construct the said street.

Under the provisions of the ordinance the property owners are required to pay 75% of the overall costs for such a street built to county specifications if at least 66-2/3 percent vote in favor of the project.

The County Commissioners office has indicated that five projects have been completed since the private street ordinance was adopted. Two additional projects are now under consideration.

Under the special ordinance no new streets can be constructed under the ordinance. Only those unimproved streets which were in existence when the ordinance was adopted can be considered.

## DAIRY PRODUCTION STRESSED IN "PICK-THE-HIGH-PRODUCER" CONTEST HELD AT 4-H FAIR

You can't judge a book by its cover was vividly illustrated in a "Pick-the-High-Producer" contest held last week at the County 4-H Fair. Six dairy cows were featured and contestants were to select each cow according to her actual milk production records.

Mr. David Shaw, President of the Carroll County Dairy Herd Improvement Association, sponsor of the contest, indicated that only one person, Miss Sherri-Le White, Route 5, Westminster, had a perfect score. Miss Patty Roach and Mr. Arthur Thompson, both of New Windsor were tied for second place. Nearly a hundred people participated.

Dairying is the leading agricultural industry in the county, with half the gross farm income coming from the sale of fluid milk.

During this period of economic stress among all county farmers, Mr. Shaw states that dairymen should keep only those cows which are making a profitable return. Individual production records can identify those cows which should be culled because of low inefficient production.

## CHRISTIAN SCIENCE SERVICE

The Sermon on the Mount will be taken up section by section in the Bible Lesson on "Love" at Christian Science churches throughout the world on Sunday.

"Ye yourselves are taught of God to love one another." Readings from "Science and Health with Key to the Scriptures" by Mary Baker Eddy will include this statement: "The rich in spirit help the poor in one grand brotherhood, all having the same Principle, or Father; and blessed is that man who seeth his brother's need and supplieth it, seeking his own in another's good" (p. 518).

What a strange thing happened here — the Fire Alarm was sounded on each floor and a banging on my door to my apartment and I jumped out of bed. As I opened the door there was much smoke but quite severe on the first floor where everyone was rushing to leave the building. I looked out the windows and saw all the fire equipment, plus the ambulance, and I realized when someone said, "It was only the cinerator where someone had pushed down a big carton!" And back to bed I went, yet two other ladies had to have the doctor! In no time the smoke evaporated, too.

## MARYLAND SAVINGS BOND SALES MAINTAIN GOOD RECORD AT MID-YEAR

State Chairman Charles P. McCormick today announced that sales of Series E and H Bonds in Maryland, of \$40,975,384 for the first six months of the year, showed an increase of 2.2 per cent over the similar 1963 period, resulting in the State achieving 53.5 per cent of its \$76,600,000 annual goal.

Combined sales of Series E and H bonds for the month of \$6,784,579 were slightly under June sales last year, of \$6,823,095. Series H sales alone of \$533,500, exceeded June 1963 sales by 20.2 per cent.

Caroline County leads with 67.5 per cent quota made; Kent and Worcester Counties follow 2nd and 3rd, with 66 and 64.6 per cent, respectively. Baltimore City's six-month sales of \$20,215,821, reached 52.5% of the quota.

Mr. McCormick stated that a vast majority of Maryland's major business and industrial firms, Federal agencies and other agencies completed their "Share-In-America" payroll savings drives to coincide with the nationwide "Operation Security" Campaign period May 1 — July 4th. This resulted in 13,807 additional employees signing up for regular payroll savings, and enabled the State to achieve 82 per cent of the year's 16,900 new savers goal at the half-way mark.

Drives contributing to this payroll savings success were: Bethlehem Steel Co. Branches, adding 1646 new savers and 713 employees increasing their allotments; and the Baltimore & Ohio Railroad's promotion, adding 1223 new savers, with 466 increased allotments. The City of Baltimore employees campaign established a record, adding 877 new savers.

These payroll savings promotions, in addition to the valuable volunteer contributions by banks, and all forms of media, it is anticipated will result in increased sales during the latter half of the year.

## "SPICE 'N' EVERYTHING NICE"

(Your Chatty Column)  
With all my heart, I wish you every morning  
A smile that shall last until the next day's dawning.  
I wish you health—life's greatest wealth;  
I wish you always near so that I may help  
to cheer  
Each future day and in some way—help to  
bring you happiness!

Everyone is complaining about the long stretch of the heat waves these days and that just about all over. Betcha, in a very few years that every house built will have the grand air-conditioning. (And that regardless of the cost of the house.)

Did you know, Folks that our nephews of Uncle Sam up to July 9th have married 799 Japanese girls and previous to this time of 1956 and '57, G. I. weddings ran 100 monthly? Only three out of every 50 are civilian marriages a counselor official stated. The rest are between American military men and Japanese women. Now, girls you should do something about that. Frankly, I know those nephews are simply lonely men and you and you know the answer to that one. Eh?

Such a relief to gaze upon the beautiful hairdos today instead of those all the same curls on every head. Ladies, have you noticed the bow placed on the back of the head and it is not a small affair either? You can purchase the ribbon and make these so you can have a change matching every colored dress. And it is much cheaper that way, too. I observed regardless of age, of milder they are being worn.

How wonderful the nomination of a man named, "BARRY" but as you knew that I predicted it, for he surely is a real worker and we need a man like that on Penna. Ave., in Washington, D. C. He reminds me so much of that dear and wonderful President Woodrow Wilson. Barry, too is a "Capricorn," from December 20th to January 20th and they are truly the L E A D E R S of the world! He would know how to handle this unrest and especially Russia!

So you see, Folks as my step-sons always said, "Mother is fair and square in everything," and even if one man was a Democrat and this man, Goldwater a Republican! And although registered a Democrat — Thank God for the freedom that all of us can be Independent Voters! No country in the world like A M E R I C A!

Having a treatment down in the office of 6 W. Madison St., by that wonderful Chiropractor, Dr. Calvin Hornstein was simply out of this world! Just think the blood pressure dropping 40 points in just one treatment! His office in Randallstown is also beautifully equipped with every modern device to make you get well. I understand he is in the downtown office on Monday, Wednesday and Friday and in Randallstown at the corner of Liberty Road and Belair Ave., Tuesday, Thursday and Saturday. What I like about this very special Chiropractor, he will be honest with you to every detail and he is becoming more popular all the time with the M. D.'s, too.

What a strange thing happened here — the Fire Alarm was sounded on each floor and a banging on my door to my apartment and I jumped out of bed. As I opened the door there was much smoke but quite severe on the first floor where everyone was rushing to leave the building. I looked out the windows and saw all the fire equipment, plus the ambulance, and I realized when someone said, "It was only the cinerator where someone had pushed down a big carton!" And back to bed I went, yet two other ladies had to have the doctor! In no time the smoke evaporated, too.

To G. S. — Kindly send a stamped addressed envelope and I'll answer all the places of interest to see in Baltimore for your Western guest. Top it off with the Court Yard on the 8th floor of the Hecht-May Co. There she will be so pleased and charmed as she dines of the delicious foods with that atmosphere which is something quite extraordinary in restaurant decor of the old fashioned Square with those quaint little shops of bygone era. In addition to the actual historic fronts, there is reproduced an old apothecary shop, a stationers, a leather goods store, Yee and even to the old fashioned Philadelphia lamp post, a pair of Antique silver coach lanterns of much beauty.

Have a grand week-end, Folks and remember, "Peace and Tranquility . . . A thousand Gold Pieces!" Until next week D. V.

I am,  
Faithfully,  
YOUR OBSERVER.
