"SPICE 'N' EVERYTHING NICE" (Your Chatty Column)

With all my heart, I wish you every morning
A smile that shall last until the next day's dawning.
I wish you health—life's greatest wealth; I wish you always near so that I may help to cheer
Each future day and in some way—help to bring you happiness!

It was the honeysuckle, the trains passing by in the rear and the little village of stores with all the country atmosphere that made mc decide on this little "Town House" in Ruxton. To have a little yard all my own, just of grass, plus the Petunias and Scarlet Sage which I planted at the recommendation. of grass, plus the Petunias and Scar-let Sage which I planted at the rear toward the fence. (They are blooming beautifully) and the nice part that I can now have my feet bare for them to breathe, as I always tell my read-ers to do. Just to walk on the grass in your bare feet will do something for you! I heard myself saying, "oh" and ah!". So it has been thus for two weeks and I know that it is grand for the nerves.

The trains pass by in the rear about four times a day coming from Washington to Baltimore and then to Harrisburg, Penna. There are about a dozen stores in the rear and they sell just about everything. There is a gift shop plus another interesting shop that has the most beautiful dishes I have ever seen. It is most interesting to walk around those stores and see how everything is so beauti-fully displayed. Then, the cutest little boy selling snowballs daily under a big tree with his 'Helper' right across the way in front of the house and that pleases me (you might know by this time)!

Did you see Joan Crawford on the program of "What's My Line" this past Sunday night? No doubt about it she is a charmer and the audience applauded more for her than anyone I have ever heard on that special program which I never miss. She states that she does not eat sweets— no desserts of any kind, butter or bread and that is how she is kept so

And thinking of pants—have you noticed that men's suits have less and less material No yests tiny collars with a tiny ial. PROMOTING UNEMPLOYMENT - HIGHER PRICES

Twin evils of political expediency and inflation are imposing cruel paradoxes upon the people of this country. Never in history was there such a welter of "social" legislation depoliticians like to call the common man, whoever he is. Hardly a day passes without press releases from Washington, advising the country, that another group of citizens is scheduled to receive subsidies, benefits or payments of one kind or another. All of this, on top of the war in Viet Nam, inevitably results in new "high cost of living" reports.

As inflation quickens, new areas of poverty are created for people living on fixed incomes, social security benefits, annuities and so forth. The search for palliatives to please voting blocs and pressure groups becomes more frantic. Among measures now in Congress, is the perennial question of increasing the Federal Minimum Wage and extending coverage under the Wage-Hour Law. A survey of a group of department stores to determine the impact of the originally proposed increase of \$1.75 an hour, now reduced to \$1.60, produces some shocking conclusions. One hundred and twenty seven retail enterprises responded to the survey. The replies covered the operations of 339 retail units located in 38 of the 50 states and employing over 50,000 regular employees.

If the original proposal to increase wage to \$1.75 an hour and extend coverage, under the Fair Labor Standards Act, had been accepted by Congress, the law would have had the following effect: 1. Price increases would have ranged from 5 to 10 per cent or more-greatly exceeding the President's wage guidelines. 2. Retail employment would be reduced. 3. Some stores would have been closed because of inability to meet the added labor costs or the costs of the red tape thrust upon them. 4. Many services consumers now get free would be discontinued. The \$1.60 figure will ticians discover they can bribe the be little better.

Regardless of the action Congress takes on the minimum wage question, laws of this kind are not an answer to inflation. They simply create a mirage of well-being.

WHAT THIS COUNTRY DOESN'T NEED

does not need, it is more government in business. At least that is the view of countless editors throughout the fifty states. Their vehement convictions on this subject are not surprising, for the free press and free enterprise are inseparable. One cannot exist without the other.

The most recent example of government attempting to move into an area of investor-owned taxpaying enterprise can be seen in the proposal to extend the Post Office Department's authority in the package carrying field at the expense of private carriers. The reaction of editors to this latest move to put government further into business is gratifyingly typical.

The Panama City, Florida, News says, "Congress should look askance at the request of the Post Office Department that it be permitted to extend its control over the package hauling business. Deterioration of its present services is sufficient reason to cause one to wonder why it should be permitted to monopolize more of the nation's communications and delivery systems."

And in another section of the country, the Milwaukee, Wisc., Sentinel, observes, ". . . it doesn't make sense to expand the (parcel post) service in order to increase the post office's business at the price of taking busi-

ness away from private, taxpaying firms."

It is almost a certainty that if present proposals to increase the size and weight limitations of parcel post are adopted, package carriers such as REA Express will be forced out of business. In the case of REA Express, this would mean the loss of a \$430 million investor-owned enterprise that pays heavy taxes and provides a worldwide service not duplicated by any other facility, either private or government.

The destruction of REA Express and other carriers at the hands of tax-free government competition seems a strange way to carry out President Johnson's announced policy of adhering to the principle of private enterprise in the transportation industry.

FACTS AND OPINIONS

Dr. W. Allen Wallis, President of the University of Rochester says, "Inflation can be generated only by government." Here's how he explained it: "Business firms, labor unions or consumers with excessive market power can do many objectionable things that are contrary to the public interest. But one objectionable thing that they cannot do is to cause inflation-or for that matter, prevent

The Citizens Public Expenditure Survey, a statewide taxpayer organization in New York state, provides this lesson from recent history: "Over an 11-year period (1954-1965), the signed to improve the lot of what the | total predicted federal budget deficits came to \$13.2 billion. The actual deficits totaled \$43.1 billion - so the federal predictors were off by nearly \$30 billion."

> Commenting on the cost of public welfare programs, Rep. Richard Roudebush (R., Ind.) said, "There are 3.2 million now unemployed and there are about 7.8 million on relief. This is a costly business for the American taxpayer. Since 1963 . . the cost of federal, state and local relief has gone up 37 per cent-from \$4.6 billion a year to \$6.5 billion."

There's nothing new about the automatic vending machine. In fact, it's 2,000 years old. VIEW FROM MY KITCHEN WINDOW

It is a muggy July morning, and as I look out at the sere brown fields and silent dried-up stream, I think what a serious problem the current drought is presenting to the entire Eastern seaboard. Five years in a row seems almost too much, especially for farmers and those in the canning business. But then, it seems to me that life is made up of problems, of one kind or another. Some can be solved, others solve themselves, still

others must be accepted and endured.

Many of us, I think, labor under
the delusion that money is the magical
answer to everything. How wonderful it must be, we think, to have a fat bank account, a new car, a lovely well-appointed home, a chic wardrobe! And yet, very often the wealthy peo-ple have the most problems, and are the most discontented. They never know the challenge of working and saving to put a son or daughter through college, or even to buy a new winter coat. Everything comes too teams on top on July Fourth going on to win the pennant. It's been known to happen, more than once as a matter of fact.

Through college, or even to daughter winter coat. Everything comes too easily for them! They become blase and bored with life in general.

No, wealth will not solve.

lems, simply because we ourselves create too many of them. Lack of discipline and self-control are so often the culprits here. People eat too much, drink to excess, lose their tempers too quickly, work too hard, and fail to make good use of their leisure time. How many problems of health and happiness stem from all of these!

Then, of course, there are conditions over which we have no control -our age, our jobs, infirmities, family relationships, and many others. These, I believe, we must either ac-

certain-each and every one of us has a problem of some kind. It may not be apparent or discussed, but it is there. If all of us would try to remember this, there would be much more kindness, understanding and good-will in this old world, and less criticism and ingratitude. In essence, it all boils down to Jesus' commandment, "Do unto others as you would have them do unto you."

MUSIC FORUM . . . by Dennis O. Baumgardner

This week we continue our modern Music Forum with Fontella Bass. Miss Bass, who scored on her last hit in the final months of 1965 with "Rescue Me," was born twenty-four years ago in St. Louis. The lark, whose mother sang with Clara Ward Singers, launched her career by playing piano and singing in a church choir in St. Louis. She went on to become the choir's director and an

accomplished pianist and organist.

Little Milton heard her sing in church in 1960 and was so impressed that he immediately hired her to play piano and sing in his band. Four years later the chanter brought her

years later the chanter brought her to the Chess label where she recorded her first tune, "Don't Mess Up A Good Thing."

But it wasn't until one day in August of 1964 that she got her chance for stardom. She was sitting in a rehearsal studio along with two of the label's writers. of the label's writers, Raynard Miner and Carl Smith, when arranger Phil Wright happened to drop in. The out-

come was a four-way jam session resulting in the birth of "Rescue Me."

This finishes another in our series on modern music's best. See you next week with another on the great new artist.

All across America, this sum mer, people will be hearing the phrase: See America first with the first Americans. Blocker will do a series of radio and TV public service spots extrolling the beauties of the Indian reservations of the country.

The idea is to create more traffic through the reservations this summer and public interest and concern for our first Americans. In addition, as "Hoss" points out, "You'll find that reservation country has some of the most spectacular hunting and fishing and beautiful country for miles around. Too, the historical background of most reservations is something for the whole family catch up on and know more

Indian Affairs is the first to point out the accommodations on reservations can vary from a few tables and a barbeque pit to modern motels with swimming pools and hot springs baths. That is why Blocker urges anyone inter-ested in the senic beauty of reservations in the areas where they are traveling, write to the Bureau of Indian Affairs, Washington, C., for information about reservations under Federal

administration. Blocker, who has been to a few of the reservations, himself, says:

Although there will be no confetti, no horn-blowingin fact, no party-there are a number of reasons to celebrate this quarter-century observance.

Since the first one was sold on May 1, 1941, Americans have bought more than \$150 billion worth of Series E and H Bonds and still buy them at a \$4-\$5 billion-peryear clip. About \$100 billion have been cashed and spent for

homes, college tuition, new cars and furniture, emergencies-and helping dreams come true for millions of American families. Over half the Bonds bought are purchased on the Pay-

MEMORANDA

I, Mary Ellen Catlin, Cashier of the above-named bank, do solemnly swear that this report of condition is true and correct, to the best of my knowledge and belief.

Vest-Pocket God Lesson for July 17, 1966

Background Scripture: Exodus 20:4-6; 32:1-24; I. Chronicles 16:29; Isaiah 46:1-4; John 4:7-24. Devotional Reading: Psalm 95:6-7.

A little girl was working at her table with great intensity of con-centration and effort. Seeing her kindergarten teacher approach, she proclaimed matter-of-factly, "I'm drawing a picture of God." The teacher smiled one of her superior adult

smiles and said sweetly, "But dear, no one knows what God looks like." Well, they will when I'm fin-ished," the little girl snapped. In a kinder-

Rev. Althouse garten such confidence is amusing. In an adult it cannot help but sound arrogant. It reflects not only upon the humility of the adult, but also perhaps upon the size of his God. "Too little!" is our judgment upon both.

The third of the Ten Commandment says: "You shall not make yourself a graven image, or any likeness of anything that is in heaven above . . . You shall not have down and says a third that is in heaven above . . . You shall not have down and says a third that have not a says a says a third that have not a says a say not bow down and serve them." What's wrong with graven images? Is there something really harmful about them or is this

just one of God's peculiarities?
No, the prohibition against graven images is not only for the satisfaction of God but also the protection of men. Protection, from what? From a god that is too small. Whenever a man thinks he can adequately sum up the meaning and person of God in some man-made object or original idea, he is insulting God and deceiving himself. Man needs to be protected from the vest-pocket gods of his own making.

EASY TO HANDLE

One reason that men like small, limited gods is that they can be more easily handled. The ancients fashioned graven images not so much to honor the gods, but to get them to work for them, to pacify them, or to keep them from doing them harm. The portable god was easily used and manipulated.

The Second Commandment, then, is not just an eccentric whim of God, but a fact that is essential to the welfare of man as well as the satisfaction of God. Having discovered the existence of an ultimate Higher Power, men have responded by either (1) trying to! use that power, or (2) allowing it to use them. Then our God is only vest-pocket size, we tend to try to use him to fulfill our own needs and purposes. But when our God is big enough for the ever-expanding universe we are experiencing, we will tend to sur-render ourselves to him so that he may use us to accomplish his

Today graven images are not much of a threat to Christianity but the principle behind the Second Commandment is still very relevant. Our God may still be too small, too limited, too much fashioned in the image of man. We may be like the enterprising boy who charged his friends admission to his back yard to see an eclipse. God and his truth are not limited to our denominational and doctrinal back yards. He is too big and too complex to be limited by our petty parochial

MORE THAN RIGHT HILL.

When Jesus spoke with the Samaritan woman by the well it was apparent to him that her God was too small. Her vest-pocket religion was toc small to include both Jews and Samaritans; one of them had to be the "right" group and the other the "wrong." Her God was so small that he had to be worshipped on but one mountaintop and she was concerned to make sure which was the "right" one.

And you? What about the size of your God? Is he small enough for you to use and control, to divide the world into small, hostile neighborhoods, to fit into your lown vest-pocket sized world? If he is, he is far too small - and so are you.
