HALL'S Hair Renewer renews, cleanses, brightens, and invigorates the hair, and restores faded or gray hair to its youthful color and lustre. By lack of open air exercise, and the want of sufficient care in the matter of diet, the whole physical mechanism often becomes impaired during the winter. The third Carnival of Frederick turned out on Monday according to the programme, and has been regarded more or less successful according to the personal interests of those who have discredited it. EASTER, altogether was a bright day, though the gales of wind made things rather rough on the outside, it was not so cold as to prove an obstacle against our door exercise. The Public Herald for March has been received. It continues its warfare upon frauds in general and advertising frauds in particular, in its usual style of unsparring criticism and warning to all publishers against the getters-up of such schemes. A Permanent Cure. Mr. John Lucabagh and wife, Westminster, Md., writes, June 10, 1884 "At the suggestion of a friend I was induced to try "Aromana," the Great Dyspepsia Cure and Kidney and Liver Regulator, and it gave great satisfaction. My wife had a severe attack of asthma, and was treated by one of our best physicians until we considered a cure was effected, but it soon made its appearance again. DuLac's "Swiss Balsam" was recommended, we began his use, and believe it has made a permanent cure. We take great pleasure in recommending "Aromana" and "Swiss Balsam," believing them to be genuine. They are the only proprietary goods that we ever used that done what they claimed to do." Price 25 and 75 cts. Sold by C. D. Eichelberger.

NEXT Thursday will be Arbor Day, we trust a demonstration will be made here, in recognition of the occasion. Anybody can take a few black walnuts and plant them at favorable points along the highways or elsewhere; those that grow will give good and wholesome timber and in time there will be valuable timber to come into use, so with other seeds, cuttings and the like, evergreens should not be overlooked, locust and chestnut trees should have preference wherever it may suit to place them. The tree planting business is bound to prove successful, for the societies that have its advancement at heart are determined it shall be a fitting time to attend to the grounds of the Public School in this place, who will move in the matter?

Delays are Dangerous. Don't tie with a cold. Use DuLac's "Swiss Balsam" and be cured. It will do you good and that very quickly. Sold by C. D. Eichelberger.

Daring Burglary at Middletown. MIDDLETOWN, April 4.—A daring and partially successful burglary was perpetrated last night at the house of Peter Shaeffer, an aged resident of this place. Mr. Shaeffer resides in the central portion of Middletown and is a man of considerable means. He is 85 years of age and very deaf. The only other occupant of the house is his adopted daughter, Miss Selsum, who is also very deaf and occupies an apartment in the upper portion of the building on the same floor as Mr. Shaeffer. Some time last night thieves effected an entrance without disturbing either Mr. Shaeffer or Miss Selsum. The first attempt was made through the cellar in hope of reaching the kitchen, but this failing, access to the interior was effected through a window under the porch, and thence through the basement known as the colored people's basement. The bolt closing the door leading into the house was bored off, and the sitting room entered. The thieves then appear to have lighted a lamp and entered a spare bed room in which was a secretary. The lock of this was bored off and the contents as it fortunately proved, were carefully examined. All that the thieves actually took was two trade dollars, but they had evidently taken up and thrown aside as valueless a waste book containing \$300 in notes and \$1500 in bonds, which were found untouched.—News.

How to Raise Chickens.

There are so many different breeds of fowls that there is certainly an opportunity for all lovers of poultry to suit their own fancy. Yet it is difficult for a farmer to get just the kind that he wants. He desires a flock of hens that will lay plenty of eggs, produce good meat for the table, not try to sit all summer, or do too much running over the grain fields. We have found the Leghorn excellent layers, but they forage too much, go to the back end of the farm to scratch up the corn, and fly to the highest part of the barn to get on the wheat mow or grain stacks. Most strains of Brahas are intolerable sitters. We have finally made choice of the Plymouth Rocks for a farm breed, although in some respects they may be surpassed by others. The fowls should be provided with a building for their exclusive use. With a well-planned poultry house the care of fowls is lessened, and the annoyance of having them scratching everywhere is prevented. Considering the value of a good flock of chickens, the profit in keeping them well, and the fertilizing qualities of the manure, it is strange that the fowls should be neglected as they are on many farms. The horse and cow-stables are cleaned every day, why should not the hen-house? Keep their house clean and odorless, if you would be successful with fowls. Have a good floor under the roost, which can be scraped clean every day. After cleaning, sprinkle sawdust over the floor. Whitewash the inside of the building frequently, and keep the air pure. Keep the away by placing tobacco leaves in the nest of the sitting hen. Pour a small quantity of kerosene along the roosting poles. If you do all of this and cannot kill the lice, then kill the hen! In summer the chickens should have the run of a rocky, grassy yard if they cannot be allowed at large on the farm. In winter feed a plenty of green food, such as cabbage leaves, etc. Summer and winter give the hens milk, sour milk or buttermilk, and the eggs will be plentiful. Have an arrangement for watering, so that the young chicks will not be tempted to drown themselves in the water-trough where the horses drink. *American Agriculturist for April.*

Setting out Currant Bushes.

The most important point in setting out currant bushes is to set them out. Set them where you can cultivate on each side of them, and not against the fence or wall. As often treated, currants are a nuisance. The bushes soon become stunted and covered with moss, the caterpillars destroy the leaves, and what few currants we get are small unripe and nearly worthless. Why should they be otherwise? They are never manured, never cultivated or hoed, rarely pruned, and no efforts are made to destroy the caterpillars until half the leaves are stripped from the branches. If any of our readers have such bushes, the first thing to do is to set out new ones on new land. Let the old ones remain until the new ones come into bearing and in the meantime give the old ones a dressing of manure, cultivate or fork and hoe the ground around them and keep down the weeds, afterwards cut out all dead branches and all that are so far gone as to be hopeless. As a field crop, when you have access to a railroad station or near market, and can secure pickers currants can be grown with considerable profit. But you must plant on rich land, or make it rich with manure and keep the soil all through the growing season well cultivated and free from weeds. Were we about to set out several acres of currants, we should set them out in rows not less than six feet apart, and three feet apart in the rows. This would give twenty-four hundred and twenty bushes per acre. Seven or eight feet apart would be better. The most popular red variety is the Cherry. This is owing to its large size and handsome appearance. But with us it is not as productive as the common Red Dutch, or Victoria. The Versailles is also a productive and good currant of large size. Size, however, is largely a question of rich land, good cultivation, and judicious pruning. *American Agriculturist for April.*

CAPT. B. F. BRADLEY, Riverport, Md., says in the year 1884 used Powell's Prepared Chemicals on corn, and think it is the best and cheapest fertilizer on the market. The price of Powell's Prepared Chemicals is only \$6.00 per ton, and will rent quantity to make one half ton complete fertilizer. Brown Chemical Co., manufacturers, Baltimore, Md.

THE Kansas City Journal rakes up an old war story. "What regiment do you belong to?" asked a Union picket of a rebel picket. "The 14th North Carolina." "And yours, Yank?" "The 114th Rhode Island." "You're a liar; there is not that many people in the State," returned the Johnny.

A Philosophical Tramp. A gentleman on East Fourth street found a ragged tramp sitting on his front steps eating his lunch. "Here! What are you doing there?" he shouted. "Partaking of a slight lunch." "Will you join me?" the tramp politely responded. "No, I don't want any of your villainous food." "That's so, it is pretty tough kind of fodder. I just got it out of your kitchen. Your wife must be doing her own cooking now." "What's that, you infernal hound?" exclaimed the angry man, starting toward the tramp, still sitting quietly on the step. "Don't get excited, sir; don't get excited. Think a minute. Aren't you mistaken in calling me a hound?" "No, I'm not, and I'll—"

"No, I'm not, and I'll—"

DR. JOHN BULL'S Smith's Tonic Syrup
FOR THE CURE OF
FEVER and AGUE
Or CHILLS and FEVER,
AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERSISTENT cure of Ague and Fever, on Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.
