At that time the corporation is said to have entered into a trust and combination with the Philadelphia and Reading Railroad company, the Port Reading Railroad company, the Central Railroad Company of New Jersey and the Lehigh Valley Railroad company, all incorporated, to regulate and fix the price of a commodity called anthracite coal, and to fix the quantity to be mined and sold.

The Reading Company and the other corporations, it is said, are about to un-lawfully fix, regulate and advance the price of coal, regardless of the demand or amount to be purchased or consumed, in violation of the state laws and to the

damage of Cook county of over \$100,000. Under these circumstances the court is asked to compel the Reading Company to answer whether it has entered into the combination, and if not, to set forth the agreement or arrangement it has made with the other corporations. The court is asked to grant an injunc tion prohibiting the company from doing business in the county of Cook, state of

Illinois. No further steps than filing the petition were taken, and an injunction has not yet been granted. NEW YORK, Sept. 28.—The counsel to the senate committee investigating the

Reading coal combine recommended to the committee at the Murray Hill hotel that the combine was illegal, and that un-der the constitution the charters could be annulled or the companies dissolved. The committee resolved to adopt the recommendations of its counsel as its opinion, to refer it to the attorney geneneral, together with a copy of the testi-mony taken, and to ask him to take such legal steps as he may deem advisable.

MRS. LOFTY IS DEFEATED. She Goes Through the Usual Performance in Servant Hunting.

"I know just exactly the kind of a girl I want and the kind I'm going to have," said Mrs. Lofty, with marked decision, to Mr. Lofty at the breakfast table on the morning after Miss Judy Mulcahey had packed her two trunks, her three valises, and two bandboxes, and departed from a house in which "no dacent, self-respectin' girrul would shtay an' put up wid the loikes of Mistress Lofty."

"The trouble with me has been," went on Mrs. Lofty, "that I've been too easy and yielding, and have made it too pleasant for our servant girls, and they've taken liberties on that account. Now I'm going to turn over a new leaf and be severe and unyielding. I'm just going to lay down the law to the next girl I engage."

Behold, then, Mrs. Lofty "laying down the rule to Miss Rosy O'Hoolihan, who has graciously consented to "sphake wid" Mrs. Lofty after that lady has spent "four solid days" going from one to the other of fifteen different "employment agencies."

"I'm looking for a girl," began Mrs. Lofty, "and I-" "How many in the family,

ma'am ?"

"Four, and I want-"

"Do ye kape but one girrul?" "I keep two, and hire the washing and ironing done out. I want-" gether ?"

"No, I-"

"Divil a step would Oi go aff they did. Have Oi me Sundays and Thoorsdays out?"

"Well-I-I-I was going to say that-" "Have Oi me Sundays and

Thoorsdays out ?" "Well-er-yes. I think I could and the burdens borne and passed of relief. arrange it so that-"

"Oi have 'em, ma'm, or I don't

What is the Electropoise? and What Will it Do?

The Electropoise has been in use for four years, and is well known in some sections of the United States, but there are a great many suffer-ers that have never heard of the name. Those that have heard of it and seen something of its wonderful power, are curious to know how an instrument so small and so simple can accom-plish cures so great. Now, while the Electro-poise is very wonderful, it is not at all myster-ious. Its operation falls in with what we know of science, and any one at all familiar with the simplest facts of Biology and Physics can un-derstand.

of science, and any one at all familiar with the simplest facts of Biology and Physics can un-derstand. HOW IT OPERATES,—The way in which the Electropoise accomplishes its curse is very simple and natural. It consists of a *polarizer*, which is connected by a woren wire cord witha small plate and garter. This polarizer is im-mersed in cold water, or put on ice. The plate at the other end of the cord is attached to the warm body of the patient, generally at the ank-le. From the inherent nature of this polarizer it becomes *negatively charged*. By the well known laws of induction, the plate, and with it the body of the patient, becomes *positively* charged. The body thereby becomes a centre of attraction for *negative* bodies. Oxygen is the most negative form of matter in nature. Hence the body, bathed in the atmosphere, drinks in the life-giving oxygen at every porc. Every pro-cess of life is thereby quickened. The tempera-ture rises; the pulse throbs with a fuller beat; the skin tingles with new life; every organ acts with renewed vigor, and the effect polsonous products of the body are thrown off with ease. That quickened change of matter which oxy-gen produces throughout the system, is accom-panied by a largely increased genesis of Nerve Force. Organs half dead and stagnant are born again, and begin to perform their wonted func-tions. The heart, the lungs, the liver, the organs of the external senses, the organs of reproduc-tion-all these throw off their derangement and weakness, and the disordered intellect is off-times re-enthroned. Where disease has not al-ready made too great ravages, restoration to perfect health is inevitable. The Electro-poise is generally used at night while the patient is asleep, but may be applied, of course, at any time, and to several persons during the twenty-four hours. It will last a lifetime, never wears out nor loses its strength, never needs mending nor recharging. One in each family will render that family

out nor recharging. One in each family will render that family largely independent of doctors and druggists, and thus will save every year many times its

small cost. NOT AN ELECTRICAL APPLIANCE.— The Electropoise is not in any way akin to the numerous electrical appliances, such as *belts*, *insoles, corsets, shields, &c.*, palmed off upon the public. It has no method of generating a curpublic. It has no method of generating a cur-rent, nor means of conducting one. It acts upon well known biological principles, and is heartily endorsed by many of the best physicians in this and other countries, and is daily used by them in their practice. It is pronounced by them the greatest discovery in the history of medicine, in that it does away with the use of medicines. July 8-3m
