Blindness Due to Accident.

Statistics show that Pennsylvania has more citizens whose sight has any other State. The large number of iron and steel plants and other manufactories and mines within its limits is responsible for this. The fact that Pittsburg is the centre of the iron and steel trade, and in the mest important ceal mining district in the country, furnishes the explanation for the fact, as stated by the Chronicle of that city, that there are more people in Pittsburg wearing glass eyes than are to be found in any other city in the country. Those who are in there are about 2,400 such unfortunates in Allegheny county, or about one to every 250 persons. -
