Value of Accuracy.

A man of businesslike aspect invaded a down town shoe shop yesterday morn-

patching. Can you put an invisible patch on this shoe?" "Yes, sir," replied the proprietor. "Sure? I don't want it done unless

you can, because this is one of my swell shoes and I don't want it to show.' "If I don't put an invisible patch on it, I won't charge you anything for the

job."
"All right. Go ahead." The shoemaker took the shoe, and in about fifteen minutes brought it back to

him neatly repaired. think the bargain was that if you didn't put an invisible patch on it you But only a cargo of grief and pain wouldn't charge anything, wasn't it?" "That's right."

"This is the patch, isn't it?"

"Well, it's perfectly visible. What could make the evidences of its being a patch invisible, but you ought to have said so. A bargain's a bargain. Let this be a lesson to you. Good morn"-"Hold on. I can fix that all right," said the shoemaker.

knife under one edge of the patch, applied a pair of sharp nippers, dexterously ripped it off, threw it behind a work bench and handed the shoe back again. "There," he said, "is your shoe, and the patch, as you'll notice, isn't visible I shall step on board with a joyous now. Let this be a lesson to you. Good

mor- Ch, he's gone!"-Chicago Trib-A Drought Resisting Plant.

The chief reason why alfalfa bay will grow in the short grass country is that to strike 25 feet deep for moisture. The plant will not thrive, therefore, in soil that is not open and deep. An ideal place for its growth is along the river bottoms in the western part of Kansasland under which great lakes of "sheet water," miles upon miles in extent, are found from 10 to 25 feet below the surface. The roots of alfalfa readily push down to the water and drink when they Emmitsburg Council, No. 53, Jr. O, U.A. Fluorine your room every morning and shaving sels or tubes to contain the gas.

As regards the chemical nature of fluorine, it is a gas at ordinary temperature and is the lightest member of the series of elements containing chlorine, bromine and iodine. The attraction of fluorine for hydrogen exceeds that of chlorine and is so great that if a slow current of fluorine gas be passed into a tube of fluorspar containing a drop of water a dark fog is produced, which changes presently to a blue vapor consisting of ozone—the condensed form of oxygen. The last named substance appears to be one of the few materials which has no affinity for fluorine. Nothing is observed to take place between them even when they are heated up to

1,000 degrees F. So far all experiments had been conducted with fluorine gas, which, at the time it was isolated, resisted all attempts to reduce it to the liquid state. bix years ago, however, there was no laboratory-such as that at the Royal institution-having powerful machinery for producing liquid air or liquid oxygen at the command of the investigator. In fact, liquid air itself was practically unknown. By the aid of this weapon down behind the fence, grieving because Professors Dewar and Moissan have succeeded in liquefying fluorine. At the extremely low temperature of liquid oxygen it was found that fluorine did not attack glass, and it was possible to Lnowledge.

No one need suffer with neuralgia. This disease is quickly and permanently cured by Browns' Iron Bitters. Every disease of the blood, nerves and stomach, chronic or otherwise, succumbs to Browns' Iron Bitters. Known and used for nearly a quarter of a century, it stands to-day fore-most among our most valued remedies. Browns' Iron Bitters is sold by all dealers. Etiquette at Nice.

One feature of life on the Riviera that particularly strikes the sojourner from this side of the Atlantic is the utter absence of the piazza life that is such an institution at American summer and winter resorts. A recent visitor at Nice writes to the New York Times: "A man may show himself here on the Promenade des Anglais, either on foot or in coach, within certain well defined hours and with well understood restrictions as to his costume, but he must under no circumstances be seen sitting in front of his own dwelling, be it villa or hotel. The front of the premises must be clean and well kept, with as many plants and flowers as you like, but there must be no array of comfortacomfortably. To sit in front of a hotel here after breakfast, smoking the cigar of contentment, would be a brazen defiance of all social usages."

How He Shot.

A Texas military company was out on the range practicing at rifle shooting. The lieutenant in command suddenly Lecame exasperated at the poor shooting, and seizing a gun from one of the privates cried sharply:

'I'll show you fellows how to shoot." Taking a long aim, and a strong aim, and an aim altogether, he fired and missed. Coolly turning to the private who owned the gun, he said: "That's the way you shoot."

He again loaded the weapon and missed. Turning to the second man in the ranks, he remarked: "That's the way you shoot.".

In this way he missed about a dozen times, illustrating to each soldier his Her death scene, a year later, when cisely the same attitudes as before, and mr. Silvester," as she named her "And that," he ejaculated, handing

the gun back to the private, "is the way I shoot."-Los Angeles Express.
