

100 HOUSES WRECKED.

PHILADELPHIA, April 25.—By two explosions of benzine in the laboratory of Fleece's chewing gum works, at Twenty-fourth and Calowhill streets, about 9 o'clock this morning two men were killed, a score of persons were more or less seriously injured and not less than one hundred small houses were more or less wrecked.

Four men were at work when the explosion occurred. They were Harry Randall and George Connor, of Camden, and Walter Mainwaring and Charles McKinley, of this city. Two of them were mixing ingredients for flavoring chewing gum, when fumes from benzol, which was being used, reached the boiler and the explosion followed.

Walter Mainwaring was instantly killed and Charles McKinley was so badly hurt that he died several hours later in a hospital. Randall's escape was remarkable. He was blown through the roof and landed on an adjoining building. At first it was thought he was dead, but after treatment in a hospital he regained consciousness. Although badly hurt, he will recover. Geo. Connor, the fourth employe in the room, escaped with a few bruises.

On the opposite side of the street is the dwelling of Mrs. Julia Givison. Burning brands ignited the clothing of Mrs. Givison and that of her child. With the infant in her arms she ran screaming into the street enveloped in flames.

Firemen and hospital surgeons who had responded promptly to the alarm hastened to their assistance, and they were taken to a hospital in an ambulance, badly burned.

The laboratory of the chemical works was a two-story building, and was totally wrecked.

From this central point of devastation the injury done property extended for the radius of a block in a steadily decreasing character until it subsided into the breaking of a pane or two of glass.

The effect of the explosions was to create a vacuum that made the air in the neighboring houses blow them up like so many toy balloons. When the distance from the central point was greater the windows broke and afforded proper outlet. In the immediate vicinity walls were split and bulged, and close at hand the houses are simply masses of debris. People were blown out of their doorways and sustained broken limbs when they struck the ground.

REV. JOHN REID, Jr., of Great Falls, Mont., recommended Ely's Cream Balm to me. I can emphasize his statement, "It is a positive cure for catarrh if used as directed."—Rev. Francis W. Poole, Pastor Central Pres. Church, Helena, Mont.

After using Ely's Cream Balm six weeks I believe myself cured of catarrh. Joseph Stewart, Grand Ave., Buffalo, N. Y.

A 10c. trial size or the 50c. size of Ely's Cream Balm will be mailed. Kept by druggists. Ely Brothers, 56 Warren St., N. Y.

SPANISH-AMERICAN ISLANDS.

The American column under General MacArthur captured the southern defenses of Calanpit, Luzon, Tuesday. It is expected that the town will be attacked. The losses of the Americans in this fighting were six killed and twenty-eight wounded. The Filipino loss is said to be much heavier.

General Lawton is still advancing and will soon form a junction with General MacArthur.

THERE is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Hall's Family Pills are the best.

BURNED AT THE STAKE.

NEWMAN, GA., April 23.—In the presence of nearly 2,000 people, who sent aloft yells of defiance and shouts of joy, Samuel Hose a negro, was burned at the stake in a public road, one and one-half miles from here, this afternoon, for the murder of Alfred Crawford and an alleged assault on his victim's widow.

Before the torch was applied to the pyre the negro was deprived of his ears, fingers and other portions of his anatomy. The negro pleaded for his life while the mutilation was going on, but stood the ordeal of fire with fortitude.

The body was cut to pieces before it was cool. The bones were crushed into small bits and even the tree upon which the negro met his fate was torn into pieces and disposed of as souvenirs. The negro's heart was cut into several pieces, as was also his liver.

Those unable to obtain the ghastly relics direct, paid their more fortunate possessors extravagant sums for them. Small pieces of bone went for 25 cents, and a bit of liver crisply burned sold for 10 cents.

The mob was composed of residents of Newman, Griffin, Palmetto and other little towns in the country roundabout Newman and of all the farmers who had received word that the burning was to take place.

Governor Candler has been asked to send troops here to preserve order for a day or two, as it is feared the negroes will attempt to wreak vengeance, many threats to that effect having been made.—Sun.

Do not put off the duty that ought to be done today. If your blood is out of order take Hood's Sarsaparilla at once.

It is hard to speak temperately of the latest development of mob-law in Georgia says the Philadelphia Times. The horrible stories of torture and burning recall the old frontier tales of Indian ferocity, and it seems incredible that such things could happen in the Empire State of the South within a short distance of a modern city like Atlanta.

It has to be remembered that from the point of view of the Southern farmer, the vagrant negro is not a fellow-man but a ferocious wild beast, and that any cruelty may be justified that is necessary to protect the household against him. In the inhuman debauch of these lynchings we can see, of course, the familiar ferocity of a mob, as we can read of it repeatedly in history, but it was not entirely vindictive. These people have tried the process of law without result; they have tried hanging to the nearest tree, and still their women are not safe; now they seek to terrify the negroes by unheard of cruelty.

It is wrong, it is dreadful, it is revolting. It is a disgrace to the great State of Georgia. But it is not as though this thing were done in Philadelphia, and unless we know the conditions at Palmetto we can hardly understand this affair, and the conditions stretch back so far into history and involve so many old-time wrongs that a nation engaged in seeking the white man's burden across seas must consider carefully what may be the white man's burden here at home.

J. D. BRIDGE, editor and proprietor of the Democrat, Lancaster, N. H., says: "I would not be without One Minute Cough Cure for my boy, when troubled with a cough or cold. It is the best remedy for croup I ever used." T. E. Zimmerman & Co.

DANGERS OF BENZINE.

An explosion caused by the ignition of vapor of benzine in a chemical works in Philadelphia destroyed several lives, injured a score of persons more or less seriously and damaged as many as a hundred houses. The calamity illustrates the danger that always attends the careless use of benzine, naphtha, gasoline and other light oils distilled from petroleum. They evaporate very quickly when exposed to the air and the mixture of their vapor with the air is as explosive as gunpowder. The danger of lighting a match in a room where ordinary illuminating gas has been escaping largely is well understood. The mixture of air and gas explodes violently when inflamed and the vapor of benzine mixed with air plays the same part as gas. Persons who use benzine in cleaning garments, or gasoline in stoves, are in great danger if, at any time they spill these liquids in quantity within ten yards of a flame, since their vapor is heavy and runs rapidly along the floor before one is aware of it.—Sun.

THE GREAT ARIZONA COPPER NUGGET.

One of the most interesting curiosities received here in a long time is the great nugget of copper ore which arrived last Thursday from Arizona. It is the largest single mass of copper ever taken out of the Grand Canyon district, which covers the great copper belt running through from the Grand Canyon of the Colorado to the famous United Verde mine at Jerome. It is about 50 per cent. pure copper and weighed when shipped from the mine, 320 pounds. In transportation the upper piece separated from the main nugget, but this is rather fortunate than otherwise, as it enables examination of the interior, showing how the copper runs all through the rock. The nugget came from the Copper Queen, No. 3 mine of the Val Verde Copper Company, Limited, and is on exhibition at their offices in the Stock Exchange building, 53 State Street.—Boston Globe.

Prevention

better than cure. Tutt's Liver Pills will not only cure, but if taken in time will prevent

Sick Headache, dyspepsia, biliousness, malaria, constipation, jaundice, torpid liver and kindred diseases.

TUTT'S LIVER PILLS ABSOLUTELY CURE.

ICE CREAM.

I HAVE opened an Ice Cream Parlor at my residence on W. Main Street, where I will have ice cream on hand at all times during the season. I am prepared to furnish ice cream for festivals, picnics, parties, etc. Give me a call.

MOUNTAIN WATER ICE.

I HAVE a large amount of Pure Mountain Spring Water Ice for sale. This ice will be delivered at your door on your order. Soliciting a share of the public patronage, I remain, Respectfully,

JOSEPH D. CALDWELL.

BRIDGE NOTICE.

The undersigned, after thirty days from the date of this notice, intend to petition the County Commissioners of Frederick county, Md., in conjunction with the County Commissioners of Carroll county, to build a Bridge over the Monocacy River, at or near what is known as Pool's Ford, near the residence of William S. Ford, on the Frederick county side of said river, and what is known as the Pool property on the Carroll county side.

GEORGE C. DEVLIN, WILIAM S. FORD, GRASON VALENTINE, and others.

PUBLIC SALE.

BY VIRTUE of a power of sale contained in a Mortgage from James M. Clark and Margaret Clark, his wife, to the Elyer's Valley Chapel, U. B. Church, bearing date the 23rd day of November, 1896, duly recorded in Liber J. L. No. 15, Folio 172, one of the Land Records of Frederick county, and decree of the Circuit Court for Frederick county, sitting in Equity, in No. 7015 Equity, on the Equity Docket of said Court, the undersigned, trustee, will sell at public sale, at the Western Maryland Hotel, now Hotel Spangler, in Emmitsburg, Frederick county, Maryland,

On Saturday, the 20th day of May, 1899, at 2 o'clock, P. M., the following described valuable Real Estate, consisting of all that farm or tract of land, situated, lying and being about two miles south of Sabillasville, in Frederick county, State of Maryland, adjoining the lands of the heirs of James M. Clark, Warranted Deed, Wm. P. Elyer and others, and now occupied by John H. Clark, containing

155 ACRES OF LAND

more or less, improved by a one and one-half Story

LOG DWELLING HOUSE,

weatherboarded, in fair repair, a large Log Barn with sheds attached, a hog pen, spring house, smoke house, and other outbuildings. About 75 acres of this land is under cultivation, lays well and is productive. The balance is well set in timber. There are apple and peach orchards and other fruit on the premises, also a good spring of water near the house.

Terms of sale prescribed by the mortgage—Cash. All conveyancing and revenue stamps for the same at the expense of the purchaser.

VINCENT SEBOLD, Trustee.

Wm. P. Elyer, Auctioneer, April 28-4

THE HUMAN BODY.

Many Odd Facts Which are Not Generally Known.

Human beings are of all sizes, but the tall man is less common than the short; only one man in every 208 exceeds the height of six feet. For every foot of stature a man should weigh from twenty-six to twenty-eight pounds, a proportion that is not the lot of all in these hurrying, scurrying days.

An average-sized man weighs 140 pounds; a woman 125 pounds. Curiously enough, the mean weight and height of lunatics are below those of sane people. Another unexpected thing in this respect that a negro's skeleton weighs more than that of an Englishman.

The vitalizing power is the blood, a drop of which takes but twenty-two seconds to go the round of the body. There passes through the heart once in every three minutes an amount of this precious fluid equal to all that is contained in the body.

The mileage of the blood circulation reveals some astonishing and un-dreamed-of truths. It is estimated that, assuming the average speed of the heart to be sixty-nine beats a minute, the blood travels 207 yards in sixty seconds; in other words, seven miles an hour, 108 a day, or 6,320 per year.

If a man of 84 could have one single blood corpuscle floating in his blood all his life, it would have traversed in that period no less than 5,150,808 miles.

The average weight of the brain of an adult male is three pounds, eight ounces, of a female, two pounds four ounces. The woman's brain begins to decline in weight after the age of thirty, the man's not till ten years later. According to high authorities and the nerves, with their branches and minute ramifications connecting with the brain, exceed 10,000,000 in number.

The palm of the hands and soles of the feet are composed of cushions of fat, in order that sudden jolts and violent blows may be successfully resisted, and no injury done to the muscles and bones underneath.

The muscles—of which the tongue monopolizes eleven—and bones of the human structure in combination are capable of more than 1,200 different motions.

The teaching of experience indicates that accidents are far more likely to occur to the right leg and arm than to the left. Further evidence of this fact is supplied by the makers of artificial appendages to the right side of the body than to the other. Statistics show that in fifty-four cases out of a hundred the left leg is stronger than the right.

If a man could move his legs proportionally as fast as an ant, he would travel not far short of 800 miles an hour.

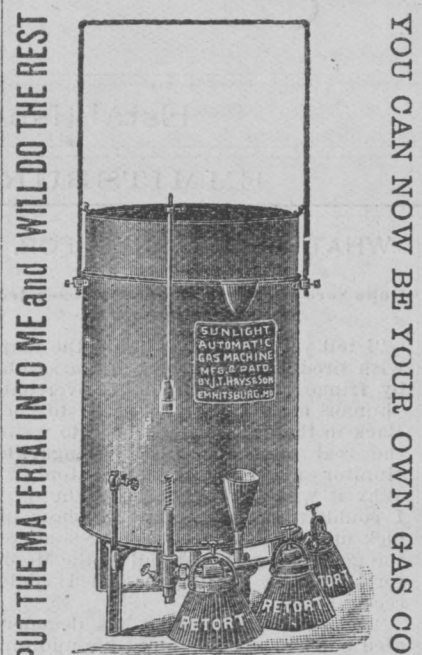

Lightest of Liquids.

Additional experiments by Professor Dewar have shown that liquid hydrogen is by far the lightest of all known liquids. Its density is one-fourteenth that of water and, curiously enough, this happens to be the same ratio of density that hydrogen in the gaseous state bears to air. Heretofore the lightest liquid known has been liquefied marsh gas, which possesses about two-fifths the density of water.

Child Wives.

The latest Government census in India showed 6,016,759 girls between five and nine years of age, who were already married, of whom 170,000 had become widows.

SUNLIGHT Automatic Gas Machine. (IMPROVED.)

NO LIMIT TO SIZES.

THE only simple, positive GAS MACHINE on the Market. Made on the correct principle and requires no attention, except putting in Carbide, producing light superior to electric light. Cheaper than coal oil candle power, considered. Perfectly safe. The changing simple as putting coal in a stove. Machines installed complete and guaranteed. Descriptive circulars furnished on application. Address

Emmitsburg District, No. 5

GROWING GOLD.

The Mystery Explained by a Chemist's Experiments.

It is generally supposed that the nuggets which are found in the river gravels of Klondike and other auriferous regions have been brought down by the rivers direct from the reefs in which the gold originally lay. Many practical miners and scientific men, however, have long been of the opinion that this cannot be the case, for no masses of gold of so large a size are ever found in the reefs themselves. They believe, on the other hand, that the nuggets have grown where they are now found, just as a crystal of salt will grow in strong brine; but with so insoluble a substance as gold it is difficult to understand how such growth could take place. Experiments carried out in Australia have shown that decaying vegetable matter will cause the deposition of gold from solutions of gold salts, but these salts are not known to occur in reefs.

The mystery is now solved. A Slavonic chemist named Zsigmondy has just shown that gold itself can exist in a soluble form. By acting on a slightly alkaline solution of a gold salt with formaldehyde and submitting the product to dialysis he has succeeded in obtaining gold in a colloidal condition, in which state it is soluble in water and may be precipitated by the addition of common salt. It is washed out by the rain, carried away in solution by the rivers, and deposited in the river gravels wherever there is any precipitation. In the course of ages a large nugget may be formed in this way.

Courageous Animals.

In North America one of the largest of the weasel family is the "fisher," a very large, long-furred polecat, living mainly by the waterside, and, like many others of the tribe very partial to fish. It weighs about sixteen pounds, and its long, richly colored fur is exported in great quantities to different parts of Europe, though not often used in this country. A trapped "fisher" will attack anyone who comes in reach of the trap chain, and when free will beat off any dog of twice its size. But perhaps the most striking example of the courage of the smaller species yet recorded is that known as the fishing cat, which, though no relation to the Canadian "fisher," is quite as courageous. One of these, which was kept in a menagerie, broke through into the next cage, and there attacked and killed a leopard which was three times its own size.

The Indian mongoose possesses all the courage of the polecat, together with amiability and a "regulated" mind. It turns its pluck and prowess to good ends, and we imagine it to stand at the head of the list of the smaller animals if quality as well as quantity is demanded as a mark of intrepidity. There is no doubt that the mongoose realizes the deadly nature of the cobra's bite, its intense excitement is strong evidence of this. But a mongoose has been known to fight just as bravely against other foes. One was seen to attack and drive off a large greyhound which it fancied was hostile to it.

Small Fame for Spanish Actors.

Theatres in Spain have no programmes. A bill in the lobby sometimes gives the cast, but most of the actors remain unknown by name. The curtain is devoted to advertisements, and in Madrid theatres advertising cards are affixed with the numbers on the back of each seat.

GETTYSBURG, PA.

A WORD ABOUT READY TO WEAR GOODS.

This store being in all things foremost has reached out to the best creations of fashion makers—and the result is here.

THE TAILOR-MADE GOWNS.

Studios selection has brought the best of their kind to your very doors almost. No need of ordering from or going to the larger cities, when we fit you and suit you with the best obtainable for the price, which is often less than you'll pay elsewhere. The best IN STYLE, IN FIT, IN MAKE. No two suits alike here, consequently descriptions are useless. An idea of the price, \$7.50 to \$15.00

The Army of Wash Waists,

Lined up here have been on review for some days. No old soldiers, every one a new recruit, just from the most renowned armories—they won't be here long, some have already left, all have received orders to strike camp and march. The prices are the orders, and run like this, 29c., 50c., 75c., to \$2.00

You know when they strike us for inspection they must be all right, so that a 29c., one is just as right in essentials as at any other price. Made of Percals, Lawns India Linens and Welts.

HAVEN'T SPACE

To speak of the New Skirts. White Pique; has the call with stylish dresses—not at all expensive here. Crash Skirts at the lowest price that a good, right width, right made skirt can be made at, up to top notch material, so comfortable, easy and light for hot weather.

MANY OTHER READY TO WEAR THINGS.

A GRAND

Opportunity is now presented to the people of Gettysburg and the surrounding country, to visit our elegant new store, (Centre Square,) and examine the wonderful bargains being offered in Clothing, Hats, Shoes, and Gents Furnishing Goods.

We are after the trade of all who need anything in our line, and are offering "Sledge Hammer" arguments in the way of low prices, in order that you may deal with us. We will not misrepresent any of our goods, all we ask of any person is a right to a share of their custom. Expenses are sure in a large establishment like ours, but profits can only be counted on goods sold. A quick profit is the best, be it ever so small. We know this and always make the "Almighty dollar" act as our agent when purchasing stock from the manufacturer, and spot cash is the watchword that guided us through ten years of almost unparalleled business success. Our customers wants are always in view when we buy stock, and we always mark goods with Rock Bottom Figures, thus making a bargain of every article in our stock. If you come from a distance by rail to examine our stock the money you save in purchases will be more than equivalent to a

FREE RIDE

We do not wish to brag, but certainly our great success is the very best evidence that Square dealing, and business-like methods, have been shown in all our transactions with the public.

Now, when we are

Nice new lot of Baby Carriages at M. F. Shuff's Furniture Store.

Forest fires burned over an extensive area of timber lands in Wisconsin county.

New and second hand Bicycles very cheap at M. F. Shuff's Furniture Store.

Mr. ROWE K. SHRIVER has favored us with a copy of the Naperville, Ill., Clarion.

Mr. J. C. WILLIAMS has just returned from the City with another big line of summer goods.

PATUXENT planters, in Prince George's county, have organized to rescue the road management from politicians.

The Emmitsburg High School will give an entertainment in the Opera House, on Friday evening, May 5.

Don't fail to see the line of Ladies Suits and Gentlemen's Straw Hats at J. C. WILLIAMS'.

FOR SALE.—A second hand Top Eucalyptus—cheap, or will exchange for pigs, apply to CHRONICLE OFFICE.

A negro mob in Galena, Kan., lynched Charles Williams, colored, for murdering Laura Confoxx, a mulatto girl.

The directors of the House of Correction, Baltimore, have received a proposition to employ inmates in the manufacture of oilcloth.

SEAGRAM 5 and 54 cts. Levering, Lion and Arbutus let's Coffee 10 cts., at J. C. WILLIAMS'.

MOODY W. BURGESS, of New Market, Frederick county, enlisted in the cavalry service at the United States recruiting office in Frederick, and started for Fort Meade, South Dakota.

In the Adams County Court on Tuesday, the case of Christian Miller and Elmer Turner, charged with larceny, was tried. Miller was convicted and Turner was discharged.

DORSEY, the colored editor, talks of removing his newspaper plant from Baltimore to one of the counties in order to become eligible for membership in the Maryland Editorial Association under its recent ruling.

At a public meeting of the citizens of Taneytown the following were nominated: Burgess Dr. George T. Motter; for commissioners, Edward Kemper, Harry B. Miller, Dr. F. H. Seiss and Joshua Koutz.

One day last week a cat caught two white mice in Mr. Geo. W. Linn's corn crib. Mr. Linn's two daughters were present at the time and took the mice from the cat. The mice were perfectly white. It is seldom that white mice are caught in a corn crib.

E. L. BORLITZ, Esq., County School Examiner, is making a tour of the public schools of the county. Mr. Young is busily engaged in making out the pay roll for the payment of salaries for the present quarter. Payment will be made on May 15.

Timorous the kindness of Mr. H. W. Althoff, of Hamilton, Ohio, we have received a copy of the Cincinnati Enquirer, containing a full account of the death of Bishop Watterson, a notice of whose death was published in last week's issue of the CHRONICLE.

It is stated that the milk men of Cumberland have been approached by outside parties, offering to take their entire supply of milk for the purpose of establishing a milk combination. Several of the milk men have refused positively to consider the proposition.

The fire-day miners of Mt. Savage, Md., in accordance with their notice, suspended work last Wednesday, demanding an advance in wages. No action as yet has been taken other than the consideration of the request, and it is expected that a satisfactory adjustment will soon be made.

SOUTH MOUNTAIN FIRES.

A fire was started last Saturday afternoon in South Mountain from sparks from a W. M. R. R. locomotive a half mile north of Edgemont, and raged furiously for a time. The flames spread over the timberland of Samuel B. Loose, of Hagerstown, and threatened the barn and dwelling house, which were only saved by the strenuous efforts of a large force of fire-fighters, who checked its progress by starting counter-fires. A thousand acres of Rohersville.

FUTURE OF THE BICYCLE.

It is agreed by all bicycle manufacturers that the 1899 models represent the perfect wheel. Improvement seems to be impossible. Precisely the same thing is true of Hostetter's Stomach Bitters. It represents the limits of science in overcoming disease, and it is impossible to make a better medicine for the stomach, liver, kidneys and blood. A few doses of the Bitters will start weak, nervous and bloodless people on the road to strength. A regular course of treatment will bring back the pink to the cheeks and sparkle to the eye. Sleep will come naturally, and it will be refreshing and healthful. Dyspepsia, indigestion and constipation will be completely banished, and the blessings of true health bestowed. Never take a substitute for this perfect remedy.

On next Monday Emmitsburg will elect a burgess and six commissioners, and on Tuesday Baltimore will elect a Mayor and aldermen. If the one-millionth part of the interest in the Baltimore election could be injected into the Emmitsburg election the people would know who they are expected to vote for on Monday next.

We have been requested by an admirer of fine horses and a despoiler of fine dust to state, that from the present prospects, the race track, (meaning Main street,) will be in a fine condition for Sunday evening fast driving. If the people will sprinkle the streets, it would make the driving much nicer, and pedestrians would have less dust to contend with.

Miss S. A. WINTER invites the public to call and see her beautiful stock of fine Millinery, trimmed hats from her own work room, bonnets, large hats, rough and ready sailors, in all the up-to-date styles, including the Jauntly Actress, at lower prices than ever sold in Emmitsburg. Thanking my patrons for the past favors, I hope for a continuance in the future.

The Emmitsburg base ball nine and the Thurmont team crossed bats on the latter's grounds on last Saturday. The game is said to have been quite interesting. Among the features of the game was Mr. Charles Rider's two home runs, and Mr. Lewis Stoute's graceful fall, which elicited loud applause. The score was: Emmitsburg, 22; Thurmont, 17.

One day last week Mr. Hugh H. Adelsberger, of near town, had the misfortune to cut his ankle very badly. In an attempt to cut a limb or a twig of a tree, the axe glanced, striking him on the ankle and nearly severing the ankle joint. Dr. Annan sewed the wound together, and Mr. Adelsberger is doing as well as could be expected under the circumstances.

On last Saturday Messrs. Vincent Sebald and James B. Elder, executors of the James A. Elder estate, sold in front of the Court House, in Frederick, ten shares of stock of the Citizen's National Bank, of Frederick, to Horace C. Zacharias for \$280.50 a share, the par value being \$100 per share. This is said to be the highest price ever paid for any bank stock in Frederick.

PUBLIC MEETING.

We are requested to announce that a public meeting will be held in Mr. Geo. T. Gelwick's Hall, this Friday evening at 8 o'clock, for the purpose of nominating candidates for a Burgess and six Commissioners. The meeting advertised by written notices posted at parts of the town, calling a meeting to be held in the Firemen's Hall, has been changed to the above named place. Let there be a full attendance.

ALLEN G., three-year-old son of Mrs. D. B. McGraw, Sharpsburg, fell into a box full of slacking lime at the home of his grandfather, M. E. Snively, and sustained probably fatal burns. The box was about two feet deep and nearly full of lime. The lad was nearly drowned. When taken out the flesh dropped from his bones.

CHILD BURNED TO DEATH.

Maggie Poffenberger, the seven-year-old daughter of Calvin Poffenberger, near Williamsport, was burned to death Tuesday. Her mother left the house early for Williamsport and instructed her to prepare breakfast for her young brother and sister. They were alone in the house. Maggie attempted to build a fire with coal oil. The can exploded and the contents were thrown over her. She rushed screaming from the house, ablaze from head to foot. Neighbors rushed to her rescue, but when they reached her every piece of clothing was burned from her. She lingered for two hours in great agony and then expired.

PERSONALS.

Mr. D. C. Krise and wife, of McSherrystown, Pa., spent Sunday at Mr. J. I. Toppers.

Mr. Harvey Ott and Miss Annie Althouse, of Taneytown, visited friends in town, last Sunday.

Mr. Jacob Bentzell has gone to Ohio, where he expects to secure employment.

Messrs. Victor E. Rowe, Joseph E. Hoke, William Gillelan and Harry Bowman spent Monday and Tuesday in Gettysburg.

Miss Columbia Winter has returned home from a visit to Baltimore.

HELD UP BY FOOTPADS.

John G. Bartley, a wealthy horse dealer of Bayard, W. Va., was held up and robbed last Sunday night by two colored men while returning by an isolated road to his home. Bartley hesitated to hand over his valuables and he was pulled from his horse. The men secured \$203 in cash, a pocketknife and a pair of eyeglasses. They put him back on his horse and told him not to look back. Sheriff W. Perry Lee, of Garrett county, Md., who is looking for the outlaws, is of the opinion that they have gone to Baltimore. A posse is scouring the country in the vicinity of the robbery for the men.

A FULL MEETING DESIRED.

Comrades of the G. A. R. The time for another Memorial Day is rapidly approaching, and a full meeting is desired on May 2, to make arrangements for Memorial Day and for the decoration of the graves of all soldiers on May 30. This day has been set apart for us to keep green the memory of our fallen comrades. Only a few years more and we will all have crossed over the river. So let us attend to that duty while we live. Our sons will keep it up when we are gone. Let every member of the G. A. R. attend that day, as we have only one more regular meeting before Memorial Day.

SAMUEL GAMBLE.
Commander Arthur Post, No. 41,
Department of Maryland, G. A. R.

A POT OF GOLD.

B. A. Dorsey, a hand on the farm of Mrs. Ellen Hardman, on the Old Town road, near Mayleside, a suburb of Cumberland, and within 300 yards of the Baltimore and Ohio tracks, Tuesday plowed up an iron pot containing about \$1,000 in gold. The pot was covered by a stone slab. The gold, from being buried so long, had caked into two pieces, each about the size of a quart cup. Dorsey had the gold in vinegar, which has loosened it, and shilling pieces of various denominations have been picked out. The gold was found near the house under a plum tree in ground that had not been plowed for some years. The farm is known as the Anderson farm, having been owned as far back as 1840 by James Anderson. Tradition has it that a man named Scott, said to be at that time the richest person in Cumberland, after collecting his rents would, in company with his negro servants carry his money out by way of "Devil's Hollow" and bury it.

CONTRACTS AWARDED.

Contracts for constructing the Fishing Creek water supply for Frederick City have been awarded as follows:

Excavation 18,400 feet long, 4 1/2 feet deep for laying watermain, to Charles F. Fleming, whose bid was from 20 to 45 cents a cubic yard for removing the earth and from \$1.20 to \$1.35 for taking out stone.

Hauling 660 tons of iron pipe, to Charles F. Fleming and William H. Brentlinger at \$2.31 per ton.

To Isaiah Moser & Sons, of Myersville, for building the water gate and weir for \$800. For this same work the bid of Amos Esworthy was \$2,513. The entire work will be completed within sixty days. The city authorities are authorized to issue bonds to the extent of \$35,000 for the completion of the works. The law prescribes that the bonds shall be issued in series of not less than \$100 nor more than \$500 each, and shall be payable thirty years after date, redeemable any time after ten years by the city authorities. The bonds are to bear interest at the rate of four per cent, and payable semi-annually, and are to be exempted from city and county taxation.

A SUPPOSED BURGLAR.

An unknown negro in the custody of the police at Cumberland, is believed to be an all-round crook. He happened in Cumberland with a confederate just at the time the police were looking for the two negroes who had held up Mr. John F. Bartley, of Bayard, W. Va., as he was riding through Garrett county, Md., to his home.

It is not believed the negro under arrest had anything to do with the hold up, but from the property found on him it is thought he has been a burglar at some place. When he came he had a satchel. This he gave to a one armed negro, who, when the original possessor was arrested as a suspicious person, became scared and sold the contents of the satchel. It was buried three miles from Cumberland along the canal and was recovered last Monday night by the sheriff. It contained much valuable silverware, considerable being gold plated, finely decorated bronze clock, six watches, beautifully enameled centrepieces, window draperies and other articles indicating that some jeweler's show window might have been smashed in and robbed.

TEIPEL—HUMERICK.

Miss Mollie Humerick, daughter of Mr. and Mrs. George T. Humerick, of Emmitsburg, Md., and Mr. Charles H. Teipel, Jr., son of Dr. Charles H. Teipel, a prominent Baltimore physician, were married on Wednesday evening, April 19, at the parsonage of St. Joseph's Catholic Church, Baltimore, by Rev. J. K. White. The bride was attired in a gray travelling dress with hat and gloves to match and carried American Beauty roses. Miss Nellie O'Neale acted as bridesmaid and Mr. Harry Sanders was best man. After the ceremony a supper was served to a few intimate friends, after which the happy couple left for an extended tour to Niagara Falls and the North.

After their honeymoon Mr. and Mrs. Teipel will reside in Baltimore where Mr. Teipel is engaged in the mercantile business.

MRS. CATHARINE J. ZIEGLER DEAD.

Mrs. Catharine J. Ziegler died at her late residence in York, Pa., on April 22, aged 77 years, 6 months and 25 days. Mrs. Ziegler was a daughter of the late John Fisher, and the widow of the late Peter Ziegler. At the time of her death she had lived with her sister Miss Sarah Fisher. The deceased, who had a large acquaintance and many friends, leaves one child, Mrs. Jacob L. Hoke, of this place, and was well known here. Mr. Hoke, wife and family attended the funeral services, which were held on Tuesday afternoon.

PNEUMONIA, la grippe, coughs, colds, croup, and whooping-cough readily yield to One Minute Cough Cure. Use this remedy in time and save a doctor's bill—or the undertaker's. T. E. Zimmerman & Co.

SINGULAR MISHAP.

George Tysinger, in Cumberland, bandaged a mashed finger with an oil rag and then proceeded to light his pipe with a match, which ignited the oil on the bandage, burning the finger until the flesh dropped off from the second knuckle to the end of the finger.

By allowing the accumulations in the bowels to remain the entire system is poisoned. DeWitt's Little Easy Risser regulate the bowels. Try them and you will always use them. T. E. Zimmerman & Co.

DAUGHTERS OF LIBERTY.

The fourth annual meeting of the State Council of Maryland, Daughters of Liberty, will convene in Frederick city on Tuesday night. It is said there will be about 150 delegates present. The delegates and their friends will be entertained by Mountain City Council No. 12 of Frederick.

Some of the results of neglected dyspeptic conditions of the stomach are cancer, consumption, heart disease and epilepsy. Keitt's Dyspepsia Cure prevents all this by effecting a quick cure in all cases of dyspepsia. T. E. Zimmerman & Co.

MINERS WOUNDED.

By the breaking of a chain on a car used to haul ore out of the copper mines near Liberty, Frederick county, Hall Brown and Charles Keeney, two employees, narrowly escaped death, and two other men were injured. A car loaded with ore was being drawn up the steep incline by a steam engine, when from some unknown cause the car jumped the track, imperiling the lives of those below. Four men set to work to unload the car to enable them to replace it on the track again, when suddenly the chain snapped and the car, receding at a rapid rate of speed, plunged down to the bottom of the mine. Charles Keeney was caught by the car and had one thigh crushed and the other one bruised. Notwithstanding his painful injuries he quickly caught hold of some pipe overhead and thus escaped being precipitated some thirty-five feet below. He held his position until he was rescued by some of the employees. Hall Brown, who was also assisting to unload, was thrown by the car and fell over thirty-five feet to the bottom of the shaft, receiving painful injuries.

Drs. F. H. Sidwell and O. B. Stone dressed the injured men's wounds, after which they were taken to their homes.

WASHINGTON-GETTYSBURG R. R.

A Sandy Spring, Md., dispatch of Monday to the *Balto. Sun* says:

A largely attended meeting in the interest of the proposed Washington and Gettysburg Electric Railroad was held at the Sandy Spring Lyceum Saturday. Allan Farquhar, who is one of the directors, presided. Gen. George H. Harris, president; E. S. Parker, Andrew Gleason and Mr. Lerner, of Washington, D. C., were the other directors in attendance.

Guion Miller, of Washington, who claimed to represent another set of gentlemen who had a prior right to the charter under which the gentlemen who were present at the meeting were proceeding, was present. The discussion became quite spirited. General Harris explained that the proprietorship of the charter would be decided by the proper courts at the proper time and said their right to the charter could be easily proven.

The meeting was for a talk with the persons along the proposed route. The Washington gentlemen were much pleased with the willingness manifested by those present to co-operate with the company in securing right of way, etc.

HARNEY ITEMS.

On last Saturday Harry O. Harner, who had been engaged in the public school at Mt. Airy, as second assistant teacher, returned home, looking very well after having spent quite a while in the educational sphere.

Mr. Morris H. Bishop, who had a severe attack of pneumonia, is now convalescing and the prospects for his recovery look very favorable at present. John W. Fream, agent for the "Stormer" bicycles, has found sale for a considerable amount of wheels in this place and surrounding country.

Miss Lorena Myers, of Upperco, Md., is spending a few weeks with the family of C. F. Shryock, who resides on Centre Square.

Hon. D. J. Hesson, who recently moved to Hanover, Pa., and who is now in the employment of Ehrhart, Conrad & Co., together with his family, accompanied by Miss Cora Waybright, visited the home of Mr. Abraham Hesson and other friends in this place on last Sunday.

Church notices: Mt. Zion U. B. Sunday School, 9 a. m., preaching at 7:30 p. m. St. Paul's Lutheran Sunday School at 1 p. m. and preaching at 2 p. m. Y. P. S. C. E. at 7:15 p. m.

GREENMOUNT HAPPENINGS.

Mrs. A. Herring, of Cold Forks, spent a day with Mrs. L. Snyder, of this place. The account of Lease & Co's sawmill, and which appeared in last week's items, was a mistake, it should have been Mizel & Krug.

Farmers are about done sowing oats and are now busy with their corn ground.

Mr. Wm. Fisel has improved his barn and outbuildings with paint, which adds greatly to their appearance.

Mr. John Eiker, our blacksmith, is building a new wire fence on his lot.

Mr. Geo. McDonnell made a business trip to Gettysburg, Tuesday last.

"Our shoemaker" is greatly improving the lot he recently bought of Adam Bollinger, by moving the stable and building fences along the road.

Our market this week is as follows: eggs 11 cts., butter 10 to 12 cts., chickens, old 7 cts., young, 17 cts., old pigeons 20 cts., pr.

FAIRFIELD ITEMS.

FAIRFIELD, April 25.—Mrs. D. B. Martin and daughter, Hazel, of Fountaine, are visiting F. Shulley and family, of this place.

The C. E. Society of Fairfield, will have their anniversary the first Sunday night in May.

Prof. and Mrs. Lowe will be in Fairfield on May 9 and 10 to give an illustrated song service.

Mr. and Mrs. T. Winebrenner, of Gettysburg, are visiting at Fairfield.

Lawyer Butt and Mr. Cal. Krise, of Gettysburg, are visitors to this place.

Mr. Samuel Musselman, of Green-castle, Franklin county, is a visitor to this place.

Mr. Wm. Scott, of Fairplay, visited at this place.

SHAKE INTO YOUR SHOES.

Allen's Foot-Powder, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Powder makes light and cool shoes feel easy. It is a certain cure for sweating, callous and hot, tired, aching feet. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address, Allen S. Oimsted, Le Roy, N. Y., Apr. 14-45

MURDER AT BARNES GAP.

Word was received in Cumberland, Monday, of a fierce struggle with Clemmington Pennell, at Barnes Gap, an isolated section two miles north of Pine Grove, Allegany county, in which James Beatty, a member of a constable's posse, was mortally wounded by Pennell as the latter was trying to escape.

Pennell had been driven to cover in a barn. He shot Beatty through the body directly over the heart. Pennell, it was alleged, held enmity toward Nathan B. Wigfield, a farmer near Pine Grove, and one night in February last entered Wigfield's barn, cut his harness in bits and pushed his wagon over a precipice, smashing it to pieces. Warrants were secured for an arrest, but Pennell stayed out of the way, sending word that it would require more than one man to take him.

On Saturday Constable Wm. P. Lashley, who is a crippled Union veteran and postmaster and storekeeper at Lashley, learned that Pennell was staying on a remote farm in Barnes Gap, and organized a posse of farmers to take him. Some were unarmed, Beatty being one. Pennell saw the posse coming and retired to the barn. He was armed and known to be most desperate. Constable Lashley consulted with his deputies as to the best manner of taking the prisoner without doing him bodily harm. They surrounded the building, and Pennell was asked to surrender peacefully.

Beatty went to a door at the end of the barn for the purpose of grabbing Pennell should he rush out. Pennell, with cocked revolver, tried to rush past him. Beatty seized him and as he did Pennell presented his revolver to Beatty's heart and fired. Pennell lost no time in seeking the cover of the forest, returning the fire of members of the posse as he ran. It is said several deputies were slightly wounded, but this could not be confirmed. The officers, it is believed, could have overtaken Pennell, but, horrified at his deed, stood over their comrade, who was in the last throes of death. Pennell is thirty years old.

SUICIDE IN A HOSPITAL.

B. W. Miller, aged about forty years, of Buchanan, W. Va., committed suicide at the Western Maryland Hospital, Cumberland, Wednesday morning, by shooting himself through the head. The bullet entered the head at the right hand corner of the left eye. Mr. Miller lived about twenty-five minutes after the shot was fired. Miller had been suffering from nervous prostration and was taken to Cumberland a week ago by his brother, A. D. Miller, of Sago, W. Va., and placed in a private ward, paying for the same \$12 a week. Miller had plenty of money. He suffered from melancholy.

Tuesday he wanted to return to his home at Buchanan, where he has an interest in a large store, but Dr. B. Curtis Miller, head surgeon of the hospital, persuaded him to remain another day, as his condition would not warrant his leaving. In the afternoon he asked for some of his money, saying he wished to go down town and make some purchases. He bought a few articles, including a revolver for \$5, but this was not discovered by the hospital people till Wednesday morning, when he shot himself sitting on the side of the bed.

Mr. Miller was educated for the ministry and was a fluent talker. He intimated that his troubles caused his faith to waver. A two-ounce vial of carbolic acid was found in his room. The belief is that he intended to poison himself, substituting later the revolver as the means of destruction.

WHEN TRAVELLING

Whether on pleasure bent or business, take on every trip a bottle of Syrup of Figs, as it acts most pleasantly and effectively on the kidneys, liver and bowels, preventing fevers, headaches, and other forms of sickness. For sale in 50 cent bottles by all leading druggists. Manufactured by the California Fig Syrup Co. only.

MAY LADIES' HOME JOURNAL.

"The Countess Emilia," Anthony Hope's romance, is begun in the May Ladies' Home Journal, and "The Art of Listening to a sermon" inaugurates the first of a series of articles on the pulpit and the pew by Ian MacLaren. Another notable feature of the same issue is "The Secrets of a Happy Life," by the Rev. Newell Dwight Hillis, D. D., pastor of Plymouth Church, Brooklyn, who has become a regular contributor to the Journal. Paul Leicester Ford writes "The Anecdotal Side of George Washington," reciting some of the best but least known stories of the "Father of His Country." Viola Allen draws upon her own rich store of experience to tell "What it Means to be an Actress," and Joseph Edgar Chamberlain introduces "Helen Keller as She Really is."

On the editorial page Edward Bok treats of the pretty American girls, and discourses on the most-beloved women of the century. The feminine wardrobe is considered in elaborate detail, the articles being by the best fashion writers—and illustrated. "The Building of the Ship" is the theme of the sixth of W. L. Taylor's series of illustrations of Longfellow's poems, and pictorial features of practical interest are "Nature's Garden," The Prettiest Country Homes in America," "Rustic Arbors and Summer Houses" and "The Flag in the Church." By The Curtis Publishing Company, Philadelphia. One dollar per year; ten cents per copy.

It makes no difference how bad the wound if you use DeWitt's Witch Hazel Salve; it will quickly heal and leave no scar. T. E. Zimmerman & Co.

WANTED.—A wide-awake man to sell one Teas Coffee, Baking Powder, Spices and Extracts, for the Grand Union Tea Company. A good opening for a hustler. Address, FRED C. ROSE, 61 S. Market Street, Frederick, Md.

Dr. Wm. C. Boteler.

Practice limited to diseases of the eye, ear, nose and throat. Spectacles adjusted for all forms of defective sight. Spectacle examinations free. Office 28 North Market Street. Residence, City Hotel. Office hours from 9 a. m. to 5 o'clock p. m., except Sunday, may 6 ly.

A DOUBLE TRAGEDY.

Near Wolfesville, Frederick county, Saturday afternoon, Edward Morgan shot and killed his father's step-son, Miss Orpha V. Harshman, a prepossessing young lady, seventeen years of age, and then, turning the revolver upon himself, ended his own life with four bullets. Morgan was twenty-four years of age and the son of Jacob Morgan by his first wife. Miss Harshman's mother was married three times, her present husband being Jacob Morgan. Wolfesville near where the double tragedy was enacted, is about eighteen miles northwest of Frederick city, in a mountainous region. As soon as intelligence was received of the occurrence Sheriff A. M. Patterson, with Deputy Samuel Rowe, Coroner Thomas M. Turner and Dr. Ira J. McCurdy visited the scene. A special car was started out for the party at 2 o'clock Sunday morning over the Frederick and Myersville electric road. At Myersville conveyances carried the party to Wolfesville, six miles distant, and the following facts were obtained:

The family had been living happily and contented until about six months ago, when Mrs. Morgan observed that her husband's son was paying what she considered too much attention to her daughter. She rebuked him for his devotion, as well as did her daughter, who said his constant attentions were causing her much annoyance and were distasteful to her. The more she resisted the stronger became his attachment for her, and, believing that paternal objection was the greater barrier to his happiness, he finally urged her to elope and be married. The young lady resented the proposition and demanded that he should cease his attentions or she would leave home. Seeing she was determined in her purpose, he told her that unless she married him she would never live to be the bride of another. This threat did not have the desired effect, but on Sunday last she apprised her mother of it, and on Tuesday she ordered him to leave the place and seek another home. Smarting under the loss of his sweetheart and being driven from his father's home on her account, he went very much. On Wednesday he went to Hagerstown and proceeded to drown his sentiments in drink. He purchased a revolver, and, taking several bottles of whiskey with him, returned to Wolfesville to carry out his threat.

He lingered about the neighborhood until Saturday afternoon. He learned that the young lady had intended going to spend Sunday with her married sister at Garfield, two miles east. Being fully satisfied of this, he went out on the lonely road one mile east of Wolfesville, and, loading himself up with whiskey, he hid behind a clump of rocks and bushes in ambush for his victim. All unconscious of danger, the young lady came lightly tripping down the road about 4 o'clock P. M. with a small bundle under one arm, merrily humming a tune and plucking wild flowers here and there. As she arrived at the rocks Morgan sprang out and called upon her to offer up her last prayer, as her time had come. He at the same time thrust a revolver in her face. She begged him to spare her life, but to no purpose. It is said that, finding her pleadings were fruitless, she summoned all her courage and attempted to strike the weapon from his hand, when he quickly placed it to her temple and fired, the bullet entering the right side of the head and passing out on the left. In attempting to ward off the weapon the sleeve of her dress took fire from the powder and was burned off, as well as a portion of the dress over her bosom, under which her arm lay where she fell. Her arm was badly burned and her bosom seared from the fire.

Feeling satisfied he had killed her, Morgan then placed the revolver to his own head and attempted to send a bullet into his brain, but the leaden missile struck the right cheek bone, and glancing, came out of his eye. He then fired a bullet into his left leg. Finding these two ineffectual, he placed the barrel of the revolver against his abdomen and emptied the two remaining chambers into his bowels and fell over by the side of his innocent victim.

Miss Harshman's screams and the pistol shots attracted the attention of Mrs. Klue and her son, who live some distance across the hill. They hurried to the scene and gave an alarm. The son went in search of aid. The young girl was still alive and lingered for about half an hour, when she expired. Morgan was also alive, but at times unconscious. He raved because he had not none his dastardly deed in a more perfect manner.

Dr. Lamar, who was summoned, rendered what aid he could, but it was found that the man was beyond recovery, and he died at 11 o'clock from internal hemorrhages. Both the bodies were taken to the home of their parents and prepared for burial.

When Coroner Turner arrived Sunday morning he found that Justice Warrenfeltz, of that locality, had empaneled a jury during the night and they adjourned to await the result of the inquest. He having died in the meantime, Mr. Turner deemed an inquest unnecessary and returned home.—Sun.

NINETY PER CENT.

Of the people are afflicted with some form of humor, and this causes a variety of diseases. The reason why Hood's Sarsaparilla cures when all others fail is found in the fact that it effectually expels the humor. Scrofula, salt rheum, boils and all eruptions are permanently cured by this great medicine.

Hood's Pills are the best family cathartic and liver tonic. Gentle, reliable, sure.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, Syrup of Figs, manufactured by the California Fig Syrup Co. illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the California Fig Syrup Co. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package. CALIFORNIA FIG SYRUP CO. SAN FRANCISCO, CAL. LOUISVILLE, KY. NEW YORK, N. Y. For sale by all Druggists.—Price 50c. per bottle.

ABOUT CAMEMBERT CHEESE

Origin of the Product and Directions for Its Manufacture.

The Camembert cheese, a well-known article in all French hotels and restaurants, has now begun to find its way into England, Germany and the Scandinavian countries.

The name of this celebrated product is derived from a village in the department of Orne, France, where, during the great revolution, a woman, Marie Harel by name, first made it. The method remained secret until 1839, when the children of Marie Harel became married and set up small factories in different parts of Normandy. At present there is no secrecy about the Camembert cheese. It is made in the following manner:

Immediately after milking the milk is set in a wooden bucket at a temperature of from 50 to 55 deg. F. In a few hours it is skimmed whereupon a proper amount of rennet is added. The curd is formed after standing six hours, during which the temperature should be as nearly as deg. F. as possible, especially at the beginning. In the home cheese manufacture this is effected by placing a wet cloth over the bucket.

When a curd has been formed it should be taken out with a skimmer and placed in a cheese-mold, which stands on a slanting board in order that the whey can drain off completely. In two days the cheese will be ready to leave the form. Each loaf is then salted thoroughly on all sides, whereupon it is left thus for four days, when the drying begins.

In drying the cheese care should be taken that it is placed where the breeze can touch it directly, such as immediately behind the window screens. They must rest upon straw mats, and be turned from day to day. In the course of five weeks, when sweating sets in, the so-called mold begins. This means that the cheese is placed in a dark, dry cellar without ventilation, and where a temperature of 50 deg. F. is kept as nearly as possible. They must be turned every other day for about a month, and they are then ready for marketing.

This is the salted Camembert. It can be made without salting, but in that case will keep only a short time before decaying.

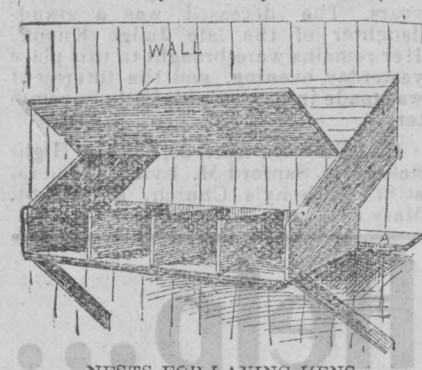

A good Camembert is quite palatable. But here, as in many other cases, success lies in the touch with which it is done.—Farm and Fireside.

Frog Raising.

The natural abode of the frog is swampy or low lying land, where, if natural breeding is permitted to proceed unmolested, they will increase very rapidly. But the great menace to such propagation is the attack made upon them by wild and domestic animals, birds of various descriptions—to say nothing of boys. The spawn which is hatched by the warmth of the sun, has also to be guarded carefully, as otherwise it will be eaten by the small creeping animals which frequent such places. To overcome both difficulties, it is necessary to fence in the pond, cover it completely with wire netting, more or less expensive, depending upon the size of the breeding pond. With these precautions propagation will be very rapid, and at three years of age the frogs will be of marketable size.—Country Gentleman.

Nests for Laying Hens.

The accompanying plan for nest boxes, the idea is to build the box against the side wall or end of the house. The nests are 12 inches square and 9 inches deep, with the back and sides nailed fast to the bottom, the front board being removable so that the boxes may be easily cleaned. (This

NESTS FOR LAYING HENS.

front board is not shown in the cut, so that the interior arrangement could be plainly outlined. The cover of the box is of this shape, with a slant of 50 degrees. The lid is 20 inches wide and strongly hinged and closed.

At the back of the nests there is a four-inch walk (see A, in cut), extending out from the box one foot for the hens to fly up on. There is a two-inch space at each side of the walk. The nest can be fastened up two feet from the floor for Leghorns, and does not take up any floor space whatever.—Reliable Poultry Journal.

Cost of Butter.

Too many who follow dairymaking make the butter cost too much. The methods of feeding and management, as well as of manufacture, tend to lessen the cost of production, and with the close competition every item in the cost must be closely looked after. To attempt to follow old rules or methods is to increase the cost to an extent that will leave but little profit.

Quality of Milk.

Butter quality in milk is a certain indication of its actual value for manufacturing purposes. The butter and cheese in milk, not the water or weight, gives it value. Some cows give a large amount of milk, but it will contain but a small proportionate amount of butter or cheese.

Veg-tables and Flowers.

Gardening and horticulture may go hand in hand, and many gardeners find it quite profitable to give some space in their green houses to the propagation of flowers.

Savage.

"Do you think," asked the Dearest Girl, who likes to stir him up, "that two can live as cheap as one?"

"Meaning marriage?" asked the Savage Bachelor.

Yes.

"I don't. I haven't any doubt about their feeling cheaper, though,"—Gingham Enquirer.

The Unhappy Wife.

For the hide of a full-grown giraffe, greatly sought after in Africa for which and sundry mammals the native hunters get from \$15 to \$21.

CASTORIA.

Bears the Signature of

Chas. H. Peltier

SHAVING IN PORTO RICO.

No Use for American Razors or the Customary Soap.

The natives of our new territory, Porto Rico, have no need for any soap for the wooded country abounds in plants whose leaves and bulbs supply most fully the place of that indispensable article. Among the best of these is the soap-tree, so called, though it is more a bush than a tree. Its bulb when rubbed on wet clothes makes a snow-white lather, which has an odor like brown Windsor soap. The Porto Ricans, who are all, from the highest to the lowest, great dandies in their way, make soap out of coconut oil and homemade lard—just as a soap is made in England, Germany and the Scandinavian countries.

The name of this celebrated product is derived from a village in the department of Orne, France, where, during the great revolution, a woman, Marie Harel by name, first made it. The method remained secret until 1839, when the children of Marie Harel became married and set up small factories in different parts of Normandy. At present there is no secrecy about the Camembert cheese. It is made in the following manner:

Immediately after milking the milk is set in a wooden bucket at a temperature of from 50 to 55 deg. F. In a few hours it is skimmed whereupon a proper amount of rennet is added. The curd is formed after standing six hours, during which the temperature should be as nearly as deg. F. as possible, especially at the beginning. In the home cheese manufacture this is effected by placing a wet cloth over the bucket.

When a curd has been formed it should be taken out with a skimmer and placed in a cheese-mold, which stands on a slanting board in order that the whey can drain off completely. In two days the cheese will be ready to leave the form. Each loaf is then salted thoroughly on all sides, whereupon it is left thus for four days, when the drying begins.

Betrayed by a Postage Stamp.

Some folks always stamp their letters upside down for luck, said a postoffice inspector in a reminiscent mood. "And others put the stamp on the back, which makes the cancellation clerk forget his religion. I remember we caught a fellow once through the peculiar way he stamped a letter. He was waiting for reliving with the laws of Uncle Sam, but had skipped out and couldn't be located. In looking over, some of his correspondence I had noticed that he always put the stamp crosswise, so as to leave a small triangle of the envelope at the upper right hand corner. Why he did it I don't know, but the stamp was always in that one particular spot, and gummed down with mathematical accuracy. One day I was in a certain Georgia town, and while loafing near the cancellation table at the postoffice noticed several letters stamped as I have described. Just on chance I took a memorandum of the address and postmark, which was Chattanooga, and happened to be in that place on the following week I collared my man as he was inquiring for his mail. The fellow noticed my turn of mind and he was addressed to his wife. When I told him how I got my pointer he was mad as blazes, and I guess he stamps his letters straight now—if he is out yet.

Safety Paper.

A new kind of safety paper for banks etc., is announced, though the inventor's name does not appear. It is a foreign idea, one feature of the invention consisting in printing or otherwise marking the paper with a small number of sets of lines or marks, one or more of which sets are indelible and the remaining sets delicate; these lines or marks are made so fine and so closely alternating or relatively disposed that, in ordinary observation with the naked eye, no single line or mark is distinguishable. Again, the indelible lines or marks are made of a color differing from those complementary to that of the delicate lines or marks, so that, owing to their close juxtaposition, they will convey the impression of a color differing from those of either of the sets of lines or marks. Thus, any chemical action or exposure on such paper would, it is claimed, be at once discernible, and the shade made by the two color combinations would be hard to duplicate.

Queer Bread.

The Swedes, as the people of Sweden are called, bake their rye bread only two or three times a year; and what a baking it is, to be sure! It lasts for a week or more, and how busy every one is! They do not bake this bread in loaves, but make it in flat cakes about the size of a dinner-plate with a large hole in the middle.

Artificial Wine.

About 250,000 gallons of artificial wine are being made from barley every year in a large factory in Hamburg. The medical profession in Germany thinks very highly of the wine, and recommends it in the hospitals of that country.

Clay Pipes.

The British museum contains a very full collection of clay pipes dating back as far as the sixteenth century. The custom of waxing the pipe to prevent it sticking to the lips was introduced by the Dutch about the year 1700.

Alcohol in Temperance Drinks.

One thousand, five hundred and eighty samples of temperance drinks were analyzed at the British government laboratory. Of this number, one-third were found to contain more than the 2 per cent. of alcohol allowed by law. Some of the samples contained as much as 6 or 8 per cent.

An Old Expression.

To "dance attendance" is an expression borrowed from the medieval court which compelled the bride at a wedding to dance with whomever asked her. No matter how low the condition or how objectionable the person the bride could not refuse.

Beneficial Quince Juice.

Two teaspoonful of quince juice were recently administered to a sufferer from an aggravated case of hicoughs in Chillicothe, O., and cured after many other remedies had failed.

A Soliloquy.

"I must confess," remarked the battered tin can, "that to the best of my knowledge I have never pointed a moral, but I have nevertheless adorned many a tail."

Yes.

"I don't. I haven't any doubt about their feeling cheaper, though,"—Gingham Enquirer.

The Unhappy Wife.

For the hide of a full-grown giraffe, greatly sought after in Africa for which and sundry mammals the native hunters get from \$15 to \$21.

EASTER MILLINERY.

THE COMING STYLES WILL BE PRETTY AND DECIDEDLY ELABORATE.

White Promises to Predominate—A Great Variety of Shapes—The Many-Hued Paper Seems to Have Caught the Popular Fancy—Velvets Still in Evidence.

The advance styles in hats are decidedly elaborate. Some of the pretties ones are of toque or turban shape. One of these was all white, with a crown of straw braid, and the brim which rose up high in front, consisted of multitudinous ruffles of white mousseline-de-toile with wired edges bordered with shirred white lisse having a tiny satin stripe. The trimming consisted of a large bow of black velvet ribbon, made of five or six rings, which was held in place by a fancy buckle, and this already high arrangement was rendered still higher by an aggrate of fine spangled wire. As this hat was made by one of our swell milliners, it shows that the popularity of black and white is not of the wane.

Indeed, some say that this will be a white summer, and one is almost inclined to believe it, with the quantities of white shirt waists, white lawn and mill dresses, to which are now added white hats.

Rice and satin straw is seen the most, with a promise of Leghorn for the summer. The shapes are a kind of modified bergerie; that is, they are rounder or wider at the sides, and the brim is not quite so long in front. They are trimmed with folds and twists of tulle and chiffon, large chiffon rosettes and bunches of white silk and velvet flowers, poppies, orchids, etc., appearing in profuse white.

The white lisse ruchings which are now so extensively used on hats are a delightful thing to imagine, and it seems as if fairy fingers are required to sew them. The ruchings are very decorative, and are used as a banding on straw braids, as well as on tulle. They come in all black and all white, as well as in black edged with white and vice versa.

A very pretty hat was in two shades of brown. It was a light golden brown straw braid, about one and a half inches wide, banded in the center with a white lisse ruching, and in and out of the straw was twisted a darker brown tulle. The entire toque was made of this twisted tulle and straw, and the trimming consisted of a bunch of pink rose buds, with velvet leaves. Another black straw hat had a drooping brim, and the crown was an oval duff mass of black mousseline-de-toile threaded with lisse ruchings. At one side was a bunch of velvet rosebuds leaning against a many-looped bow of scarlet tulle ribbon.

For many seasons the modest violet has been the flower universally chosen for our hats, but our fashion-makers are endeavoring to teach us the beauties and distinctions of the many-hued pansies. The last have begun to assert themselves, and also seem to have caught the fancy of many, for we see them in most beautiful coloring in all the stores, and giving finishing touches to all the latest Parisian importations. But whether these gorgeous colors will replace the permanent violet remains to be seen. I have my doubts about it; for the very simple reason that the hats of violet straw, trimmed with great bunches of purple violets are so very fetching.

One of these hats of violet straw had quite a low crown, and the centre of this was placed an Alsatian bow of violet velvet. In back were two large clusters of violets placed directly in the centre, part of the blossoms nodding over the coiffure, and in front a large cluster of violets was placed at each side of the centre. The brim

was encircled with folds of violet chiffon, and the whole hat was a symphony in different shades of violet that blended together to form a perfect whole. Hats and toques of violet gauze chiffon or tulle are to be found in every store, and it seems that to be fashionable means a violet hat. Despite the pansies.

Pale colored straw braid was the material of which still another hat was fashioned. The braid was joined by bands of embroidered white batiste and the seams were concealed with a row of fine black chenille. Wire spangled black gauze about half an inch wide was bent into high loops and these, together with two white wings spangled and beaded with black were all the trimming the hat showed.—New York Toilettes.

The Best Soldiers.

A foreign medical officer, speaking of soldiers, states that physical maturity does not occur till between the ages of twenty-three and twenty-five. Boys under twenty are almost sure to break down. The best armies are the youngest, with twenty-two years as the minimum.

Gunpowder Test.

The test required of gunpowder of any and all classes is to give the projectile a muzzle velocity of 2,000 feet per second, with a pressure not greater than fifteen tons to the square inch in the powder chamber.

THEY BROKE EVEN

Where Both Had "Kicks" to Make But Decided to Withdraw.

"Say, I've got a kick to make," roared the angry man in the loud check suit. "I've got two kicks to make!"

"What's the matter?" asked the hotel clerk.

"Some fellow in the room right under mine had a card party last night and the loud talking and singing kept me awake until after 2 o'clock. That's the first kick. You oughtn't to allow disorderly mobs of young men to make a nuisance of themselves in your hotel. I left word that I was to be called at 6 o'clock. I wasn't called at all, and I've missed my train. It's 9:30. That's the second kick. When I come to this town again I'll hit up some other."

"Say," interrupted a red-eyed young man, grumbling his way up to the clerk's desk, "I kick! What did you want to have my husband at my door at 6 o'clock this morning for? I didn't leave any orders of that kind. He spoiled my nap. I haven't slept a wink, by George, since 6 o'clock! If you can't—"

"What's the number of your room?" asked the man in the check suit.

"It's 46."

"Mine's 56. That's the reason I couldn't find you, why I wasn't called on this morning! The boy went to the wrong—"

"Say you the man who kept hammering the floor over my room and howling that it was time for decent people to be in bed and all that sort of thing?"

"I am sir."

"And you got left this morning, did you?"

"I did, sir."

"Clerk, I take back my kick. I'm even with him."

"Say are you that chap who had that card party and broke up my night's rest?"

"I'm the chap that had that card party all right enough."

"And you've been tossing on your back, trying to go to sleep, for the last three or four hours?"

"I have, by George!"

"Clerk, I withdraw both my kicks. I'm even with him and a little more."

—Kenneth Johnson.

Conversation Simplified.

"It's a fraud," exclaimed one of the men who had stopped to read the papers in the warm though unpromising little place which served both as a railway waiting room and postoffice. "The whole business is a downright swindle."

"Of course it is," answered his neighbor, who was busily engaged in pronouncing under his breath all the words in an article on successful fertilizing.

"It's an outrage on a confiding public, and a setback to civilization."

"That's what it is," was the somewhat grudging response.

The indignant old gentleman became so excited that he had to go out and walk up and down the platform. As his friend glanced up from his paper to watch him depart he caught the eye of a traveling man who, pending train time, had nothing to do but watch people.

"Excuse me for asking questions about things that are none of my affair," said the traveling man, "but are you a mind reader?"

"Not that I know of."

"You knew what your friend was talking about without his telling you?"

"Well, not precisely."

"But you answered him as if you knew."

"Yes, but I wasn't taking any risk in that. I knew he was making allusions to either a 'lection or a prize fight. I just followed it was, then, was my sentiments."

Feel of Your Ears.

An English writer, who for fifteen years or more has been a student of criminal anthropology, says that large, voluminous ears are the most marked characteristics of the criminal.

English Words.

There are now over 250,000 words in the English language, acknowledged by the best authorities, or about 70,000 more than in the German, French, Spanish and Italian combined.

ECLECTIC MAGAZINE.

AND

Monthly Edition of Living Age.

"THE LITERATURE OF THE WORLD."

1899.

FIFTY-FIFTH YEAR.

The Publisher of THE ECLECTIC MAGAZINE begs to announce that the magazine has been consolidated with the Living Age, and beginning with the number for January, 1899, will be issued under the title of "The Eclectic Magazine, and Monthly Edition of the Living Age."

The new issue of the Eclectic Magazine will be increased in size to 160 pages in monthly, a change which will give to the subscribers 12 more pages of reading matter annually than hitherto. While the magazine has been the same, the same kind of material as formerly, some changes and additions will be made, which it is believed will largely enhance the value of the publication. To selection from British periodicals will be added original translations of some of the most noteworthy articles from French, German, Spanish, and Italian reviews. A monthly supplement will give readings from new books, and an editorial review of the month's literature will give the latest news in the literary world.

The magazine will have the imprint of the Living Age Company, Boston and G. R. Peltier, New York, and subscriptions may be sent to either address.

Articles from the

Ablest Writers in the World

will be found in its pages.

The following list gives the principal periodicals selected from, and the names of some of the authors whose works are included have recently appeared in the Eclectic.

Periodicals. Authors.

Westminster Review, Andrew Lang.

Contemporary Review, Prof. Max Mueller.

Fortnightly Review, J. E. Lockyer.

Science Review, James Bryce, M. P.

Blackwood's Magazine, William Black.

Macmillan's Magazine, Herbert Spencer.

New Review, Sir Robert Ball.

Temple Bar, Prince Kropotkin.

The Athenaeum, Alphonse Carrar.

Public Opinion, Rev. H. R. Haweis.

Saturday Review, Rev. B. H. M. M. M.

The Spectator, etc., etc., etc.

TERMS. Single copies, 45 cents; one copy, 10 cents. Subscriptions for three months, \$1. THE ECLECTIC and its Magazine to be paid in advance.

Living Age Co. 19 West 16th Street, 133 Bramfield Street, New York. Boston.

Woolen Legs.

Woolen legs, according to statisticians, are used by over 1,000,000 English-speaking men, and this accounts for the enormous trade in limbs of this kind.

Deafness.

At least one-third of all people in middle life have one ear affected by deafness.

Hood's Pills

Are much in little; always ready, efficient, satisfactory (prevent a cold or fever, cure all liver ills, sick head, indigestion, constipation, etc. Price 25 cents. The only pills to take with Hood's Sarsaparilla.

1899. THE SUN. 1899.

BALTIMORE, MD.

THE PAPER OF THE PEOPLE.

FOR THE PEOPLE AND WITH THE PEOPLE.

HONEST IN MOTIVE.

FEARLESS IN EXPRESSION.

SOUND IN PRINCIPLE.

UNSWERVING IN ITS ALLEGIANCE TO RIGHT THEORIES AND RIGHT PRACTICES.

THE SUN PUBLISHES ALL THE NEWS ALL THE TIME, but it does not allow its columns to be degraded by unclean, immoral or purely sensational matter.

EDITORIALLY, THE SUN IS THE CONSISTENT AND UNCHANGING CHAMPION AND DEFENDER OF POPULAR RIGHTS AND INTERESTS against political machines and monopolies of every character. Independent in all things, extreme in none. It is for good laws, good government and good order.

By mail Fifty Cents a month, Six Dollars a year.

The Baltimore Weekly Sun.

THE WEEKLY SUN PUBLISHES ALL THE NEWS OF each week, giving complete accounts of all events of interest throughout the world. THE WEEKLY SUN is unsurpassed as an

AGRICULTURAL PAPER.

It is edited by writers of practical experience, who know what farming means and what farmers want in an agricultural journal. It contains regular reports of the work of the AGRICULTURAL experiment stations throughout the country, of the proceedings of farmers' clubs and institutes, and the discussion of new methods and latest agricultural machinery. Reports, Poultry Department and Veterinary column are particularly valuable to country readers. The Poultry Department is edited by a well-known poultry expert, and every issue contains practical information of value for poultry raisers. Poultry on many farms has become a great source of revenue, and those interested in this profitable industry will find the Poultry Department of the WEEKLY SUN invaluable in the way of suggestions, advice and information. Every issue contains STORIES, POEMS, HOUSEHOLD AND POULTRY COOKS, a variety of interesting and instructive selected matter and other features, which make it a welcome visitor in city and country homes alike.

One dollar a year. Inducements to getters up of clubs for the Weekly Sun. Both the Daily and Weekly Sun mailed free of postage in the United States, Canada and Mexico. Payments invariably in advance. Address

J. M. HOOD, Publisher and Proprietor, Baltimore, Md.

Emmitsburg Railroad.

TIME TABLE.

On and after Oct. 2, 1898, trains on this road will run as follows:

TRAINS SOUTH.

Leave Emmitsburg, daily, except Sundays, at 7:50 and 10:00 a. m. and 2:55 and 4:50 p. m., arriving
