THE COW IN SUMMER.

Some Essentials to Her Comfort and Success in the Dairy.

The cattle are now going out to pasture all over the country, and such pasture as a good share of it is must discourage the stock which is expected to gather from it material to make the owner a little richer this year. Brush, weeds and a scanty supply of really good grass mark the greater proportion of the pasture lands of this country.

It used to be thought that the cow could take almost anything in the way of food and turn it into the very richest milk and lots of it, but we are gradually learning that this is not true. The cow is not a machine, as many declare so positively. If she were we could not reasonably expect her to take brush and briars and grind them up and furnish us a high grade of milk and butter. She can do many things, but she cannot do that.

But what can we do to make our pastures better? The question shows that we have some conscience left yet, and more than that, it argues that there is hope for better things than in the past. One thing every man can do—he can go over his pastures every year and now the brush and briars. We have found that the best time to do this is soon after haying. Then other work crowds less, and the foul stuff is quite generally in blossom, a point not to be overlooked if we would effectually kill the weeds. If this be not done everything else we may attempt to do will be a failure.

Water and Shade.
Good water is a prime essential to good milk. Be watchful of the water supply. I have seen cows compelled to drink from stagnant pools of water into which the cattle waded at will, leaving such water as there was at first foul and wholly unfit for any animal to use, and where at times the mud was deeper than the water. To think of demanding pure milk from cows thus abused! A man might better afford to drill a well a hundred feet deep if necessary than to allow his stock to drink such vile stuff. No creature would drink it unless driven to it by force of dire necessity.

Shade is another essential to the comfort of cows, and it is more or less a matter of comfort which success we have with our dairies. So, too, there should be some means of driving away flies. We spray our cows every morning. We have tried various preparations and find that most of them have good qualities.

Harriet almost always has a word to say about the horses, no matter what subject I may be writing upon. I really believe if I were a minister preaching on original sin she would want me to say something about horses, and I am not sure but there is some connection between some men's evil doings and the horses they own. But what does Harriet say? Just this: "When you have the sprayer out to treat the cows, don't forget that it would be a great relief to the horses if you would do likewise with them. Some horses are more sensitive to the attack of flies than others, but all would say if they could, 'Thank you,' after being sprayed before going out to work in the morning. Then, too, fly nets do not cost a great deal, and they are a help."—Jacob Biggle in Farm Journal.

Profitable Horses For the Farmer.

The heavy draft horse is one of the most profitable classes of horses that the farmer can breed. The draft colt can be reared with less risk and liability to accident than those of the lighter classes. This is partially due to the fact that the draft colt is usually a quieter animal than those of the lighter classes and thus less liable to injure itself through spirited exercise or playfulness. Furthermore, small bunches and blemishes, which detract so seriously from the value of the harness horse or the saddle horse, are not considered so objectionable in the draft horse. He can also be made to earn his own keep after he is two years old, and his education can be completed on the farm. Thus the farmer who breeds him can secure his real market value. In the case of the coach horse or the saddle horse the middleman, who educates him, usually reaps a much greater profit than the man who produced him. This is not true of the draft horse.—W. J. Kennedy.

A New Form of Nitrogen.

Nitrogen will probably soon be offered in a new and most excellent form—namely, as nitrate of lime, the nitrogen for the compound being taken wholly from the atmosphere. At Niagara Falls we have a big plant that will soon be in running order for the manufacture of calcium nitrate (nitrate of lime), and that promises to offer us the nitrogen at a price lower than we pay for it now in the form of nitrate of soda. The process of manufacture is said to be quite simple and cheap. This is important, and, according to my best information from first hand, seems to be true. I hope it is. I now use nitrate of soda and would miss it if I could not get either it or nitrogen in another form as readily available and assimilable.—T. Greiner in Farm and Fireside.

Agricultural Notes.

New Hampshire records as a notable event of 1902 the sudden and almost complete disappearance of the black squash bug, a pest that was extraordinarily abundant in 1901.

The Vermont experiment station again affirms the superiority of the freshly prepared Bordeaux mixture over all others and at the same time shows that ready made Bordeaux mixtures have distinct value.

Maine is to have an agricultural school, with a two years' course.

Common tiles are sometimes satisfactorily used for blanching celery.

NATIVE PLATINUM.

The "Noble" Metals Extracted From This Peculiar Substance.

On the slopes of the Ural mountains and in Brazil, California, Australia, Canada and many other countries a peculiar substance known as native platinum is found. This is an alloy of the metals platinum, palladium, iridium, osmium, rhodium and ruthenium, together with a little gold and iron. All of these except the last mentioned are the "noble" metals. They do not tarnish in the air and are not soluble in any single acid. The most plentiful metal occurring in native platinum is that from which it takes its name.

This metal is of a grayish color and with one exception is the heaviest substance known. Its melting point is extremely high, and this property, together with its freedom from tarnishing, causes it to be largely used for the manufacture of crucibles and other vessels required by scientists to stand a very high temperature. It is also sometimes used as a substitute for gold in photography, and when deposited in a thin film on the interior of the tubes of telescopes it forms a dead black surface, which prevents the light from being reflected by the polished sides.

Palladium is of a lustrous white color. It is the most easily fused of the metals found in platinum ore, and can even be volatilized. A curious quality which this metal possesses is that when heated to redness it is porous to hydrogen gas, allowing it to pass through somewhat in the same manner that blotting paper permits the passage of water. The silvery white color, of palladium and its freedom from tarnishing render it useful for making scales and division marks on scientific instruments. A mixture of this metal with mercury is sometimes used for filling teeth. Osmium is a metal which possesses two remarkable properties—it is the most refractory of the metals, resisting fusion at the most intense heat, and it is also the heaviest substance known, being twenty-two and a half times heavier than water. Together with iridium, it occurs principally in a peculiar variety of native platinum called osmiridium. This mineral differs from ordinary platinum ore in that it contains a larger proportion of osmium and iridium than platinum. Osmiridium is found in small particles, varying in weight from one-sixth to one-third of a grain. These particles are extremely hard and are used for pointing non-wearing pens.

Metallic iridium possesses a white steel-like appearance. The knife edges of delicate balances and other bearings which require extreme hardness are often made of it. An alloy of 10 per cent iridium and 90 per cent platinum has been found to be very little affected in volume by changes of temperature and is the substance of which the standard meter kept in the international metric bureau at Paris is made. Rhodium and ruthenium are metals of little practical use. The former occurs in platinum ore to the extent of 5 to 6 per cent. The latter is found only in osmiridium and averages about 5 per cent of that mineral. The metal which ranks next to platinum in price is zirconium, which occurs in zirconite and some other rare minerals. Uranium is remarkable for its high atomic weight, the heaviest known.—Chambers' Journal.

The Sedan Chair.

The sedan chair is named after Sedan, the town where it was first used. The earliest mention of it in England occurs in 1581. Early in the following century the Duke of Buckingham caused much indignation by its use in London. People were exasperated at that nobleman employing his fellow men to take the place of horses to carry him. Prince Charles brought from Spain in 1623 three curiously wrought sedans, two of which he gave to the Duke of Buckingham. A few weeks after their introduction Massinger produced his play, "The Bondman," and in it he thus adverts to the ladies: "For their pomp and care being borne in triumph on men's shoulders."

Favorably Struck.

"Papa, have you seen Harold since you told him he was too poor to think of marrying?"
"Yes, I ran across him at the club last evening. We got into conversation, and he struck me—"
"Struck you? Oh, papa!"
"Struck me as quite an agreeable young man. I understand his uncle has left him \$200,000."—Kansas City Journal.

What They Wanted.

To explain why his trip had proved so poor, a commercial traveler once wrote a long account of how the weather had affected business in the territory in which he had traveled. In due time he received this reply from his firm: "We get our weather reports from Washington. Don't send us any more. What we want is orders."

Not the Kind He Wanted.

"If you're so hard up," said the easy mark, who was temporarily unable to extend the accommodation asked, "why don't you borrow some money from Titledst?"
"Heavens, no!" exclaimed the other. "Why, he always expects to be paid back."—Chicago Post.

Improvement on Nature.

Humble Admirer—Are the characters in your book drawn from real life?
Haughty Author—Did you ever see such interesting people in real life as my characters?—Somerville Journal.

We would make fewer bulls in this life if we had not so many wrong steers.—Baltimore American.

MISSING WORDS.

Annoying Gaps in English Language That Cause Inconveniences.

The English language may fairly claim to be the most prolific in the world. Not content with its native riches, it possesses in a special degree the faculty of assimilating everything useful from other tongues, ancient and modern. It ought indeed to be the most perfect vehicle of thought in the world, and in some respects no doubt it is.

But, curiously enough, there are deficiencies in English not to be found in far less copious languages. While in many cases we have half a dozen words expressing the same or practically the same thing, there are, on the other hand, certain ideas that have no appropriate words to express them. In the words denoting relationship some notable gaps are found. The most glaring instance is the want of a word to distinguish between a male and female cousin. Other languages, such as French and Italian, have a separate word for each, but in English some addition or explanation is required in order to make it clear which sex is intended.

Curious gaps occur here and there in our language if we look into it. The word "show" expresses the idea of making to see, but there is no word for making to hear—a phonograph, for example, "I took the phonograph to my friend and"—What? "Got him to listen to it" would probably be the in-elegant finish to the sentence.

On the other hand, "audience" means those who hear and applies very well to those present in a lecture hall or concert room. But what of those who see a cricket match, for instance? "Spectators" is the nearest word, but it does not correspond exactly to "audience."

There is one deficiency in the language so awkward and irritating that even at this late hour it ought to be made good. Need it be said that reference is made to indiscriminate use of the personal pronoun "I" denote either the person speaking or the person spoken of? This may not be a defect peculiar to English, but it is one from which the ancient classical tongues are entirely free.

"He said he had offered him money, which he had declined," would be quite comprehensible either in Greek or Latin, but in English it necessitates a number of bracketed explanations which are positively annoying and destructive of grace and fluency.—London Answers.

THE GENTLEMAN BURGLAR.

He Can Exist Only in Fiction, Never in Real Life.

Whenever a thief who is dressed otherwise than in rags falls into the police net there are chronicled the adventures of a "gentleman burglar." Such a being is, of course, impossible. He is a literary creation, like the "Invisible Man," the Frankenstein monster, Kipling's Mowgli and the rest of the crew of prodigies that dwell within book covers.

As a character in fiction the "gentleman burglar" could be made plausible and picturesque, for when we get into the realm of fancy there is an implied contract that the reader shall accept the author's premises and not bother about possibilities.

A burglar is just a thief—about the meanest of thieves.

To a man endowed with qualities of refinement and consideration of others and honor—which are the attributes of a gentleman—burglary or other theft is impossible. The pride of such a man, his regard for his own opinion of himself, would prevent him sneaking into another man's house and taking his plate or his wife's jewelry. Then it must be remembered that the burglar is prepared to do murder to accomplish his robberies, and the idea of a gentleman committing murder for gain is too inconsistent even for fiction.

A "gentleman burglar" is a contradiction of terms, like a brave coward or a tall pygmy. He may be better dressed or his booty may be larger than that of most burglars, but when it is all summed up he is a thief—just a plain thief—with the moral code and impulses of a pickpocket or a card swindler or any other predatory creature whose natural home is a prison and whose deserved and fitting punishment is a suit of stripes.—New York American.

She Got the Wool.

"A young American girl, on her first trip to Italy, entered a shop in search of black darning wool," says a writer in Harper's Bazar. "She spoke no Italian, the clerk spoke no English. She pantomimed darning a hole and pointed to her stocking. The clerk brought white darning cotton. She showed that her stocking was black, and black darning cotton was produced. But she wanted wool. A long pause, then 'Baa!' bleated the American girl. She got the wool."

A Natural Mistake.

"I was just telling our friend here, Molly, that it was storming on the day of our marriage."
"Surely not, Hiram! The weather was perfectly lovely!"
"Well, well! I don't know how I got so mixed up about it—probably because it's been storming ever since!"—Atlanta Constitution.

She Knew Her Dad.

Smithers—Do you know any one who has a horse to sell?
She—Yes, I suspect old Brown has.
Smithers—Why?
She—Well, papa sold him one yesterday.—London Punch.

Sincerity is the basis of all true friendship. Without sincerity it is like a ship without ballast.

SIR JOHN SOANE'S WHIM.

The Practical Joke a Celebrated Man Played on Posterity.

One of the most famous of post-mortem jokes was that perpetrated by the donor of the celebrated Soane museum of pictures and other valuable objects of art to England, the late Sir John Soane, who died in 1837. In his will Sir John made provision for the opening of three sealed cupboards on certain specified dates in the presence of the trustees. In 1899, that is to say almost thirty years after the death of the testator, the first of the mysterious receptacles was with much ceremony opened and breaking of seals opened in the presence of a committee of men, with the then president of the Royal Academy, Sir F. Grant, at their head. Instead of a priceless treasure or some evidence that would throw an entirely new light upon some doubtful incident in political history the contents of the cupboard proved to be worthless accounts, letters and stationery.

Twenty years passed by, and the interest that had smoldered after the disappointment of 1899 was again fanned into flame at the prospect of breaking the seals of the second cupboard, at which time there were present among others Dr. Alfred Waterhouse, R. A., and Sir (then Dr.) B. W. Richardson. Like the cupboard mentioned in the well known nursery rhyme, Sir John's second cabinet proved "bare" of any sensation, the contents being chiefly composed of letters relating to certain long forgotten family quarrels that had not even the merit of being interesting. If some of those authorized to be present at the opening of the third and last receptacle of mystery were dubious about the profit that would accrue by letting the light of day fall upon the contents thereof after sixty years' darkness one at least, Sir B. W. Richardson, looked forward with unabated interest to that day in 1899 when the last seal would be broken and the mystery solved, but he, alas, died just two days before the ceremony was performed, and the fact that Sir John had played a practical joke upon posterity was duly confirmed by the presence of a collection of perfectly worthless letters and papers.

MERRY MEALTIMES.

The Table No Place For Fault Finding, Nagging, and Strife.

Has it ever been your lot to sit at a table with a group of young folks who ate the meal in silence or, with a few constrained remarks, looked askance at the head of the family before venturing on any remark? I have seen such a sight on more than one occasion. Doctors have told us over and over again of the beneficial results arising from a meal eaten with a contented frame of mind and with cheerful surroundings; but, sad to say, there are many households where each meal is a constant scene of bickering, nagging and fault finding.

This is not only the case where there are young children, who require a reprimand occasionally for carelessness, but I am speaking of those homes where the girls and boys are well into their teens. Wrong is that parent, either father or mother, who chooses the hour when all are assembled round the table to mention some half forgotten grievance or to find some fault.

If any trivial thing has been done wrong or any duty omitted wait until dinner or tea is over before you scold, blame or reprimand. Let the food which God gives us for the purpose of nourishing and sustaining our bodies have the opportunity of accomplishing that end, which cannot be the case if every mouthful is swallowed with either a sarcastic word or an uncompromising remark. More indigestion, nervousness and other derangements are caused by the too common fault of uncomfortable meal-times than many people would suppose, and it is our positive duty, which we should all try to remember, to make those hours of the day cheerful and agreeable to the children and to set them an example which you would be the first to notice and approve in others.—Scotsman.

So Nice and Sympathetic.

A gentleman whose one glass eye has served him for years had the misfortune to drop it. It smashed to atoms. This happened when he was far away in the country. He inquired of a friend where was the nearest place for him to go and get refitted.

"Why don't you call upon the girl you were flirting with all last night?" his friend inquired. "She has a first class reputation for making eyes."—Punch.

Prayer of the Convert.

A south sea islander at the close of a religious meeting offered the following prayer: "O God, we are about to go to our respective homes. Let not the words we have heard be like the fine clothes we wear—soon to be taken off and folded up in a box till another Sabbath comes around. Rather, let thy truth be like the tattoo on our bodies—ineffaceable till death."—Carleton's Magazine.

Distress After Eating Cured.

Judge W. T. Holland of Greensburg, La., who is well and favorably known, says: "Two years ago I suffered greatly from indigestion. After eating, great distress would invariably result, lasting for an hour or so and my nights were restless. I concluded to try Kodol Dyspepsia Cure and it cured me entirely. Now my sleep is refreshing and digestion perfect." Sold by T. E. Zimmerman, Druggist.

INCREASED EXPECTATION OF LIFE.

At the meeting of insurance actuaries in New York recently several papers were read on a subject which, at first glance, appeared to be paradoxical. It was with relation to the matter of longevity and the expectation of life, and the testimony of several gentlemen, backed by statistics, went to show that during the century recently closed there had been a considerable improvement in the expectation of life; and yet people do not live longer than in the past. Otherwise stated, a greater number of persons reach the age of puberty than heretofore, though they do not grow older than the average of 100 years ago.

It thus appears that the increased average of longevity, while a fact capable of demonstration, is nevertheless something of a delusion. It has to do particularly with the weak and not with the strong. Fewer infants die and the lives of invalids are prolonged by improved surgical and hospital attentions. But the hale and strong do not attain greater age. Indeed, there is room for a reasonable doubt that the strong of the period live as long as did their forefathers of 100 years ago. There was less food adulteration, fewer stuffy and ill-ventilated flats and still less high-pressure living when our great-grandfathers were growing up and in their prime than there are today. In their day the order was the survival of the fittest, and those who survived were sturdy specimens. Since their time there has been no increase in the vitality of sound and healthy adults. What improvement has been made has inured to the benefit of the weak according to the statements made before the actuaries.

Durable.

"Was his marriage a success?" "I should say it was. He has tried to secure a divorce in South Dakota, New York, Oklahoma and England, and his marriage still holds."—Brooklyn Life.

For a bilious attack take Chamberlain's Stomach and Liver Tablets and a quick cure is certain. For sale by T. E. Zimmerman.

Domestic—Don't you want to go out this afternoon, Mrs. Manning?
Mistress—Yes, Mary, I should like to go out; but I'm afraid it will inconvenience you.

Domestic—Oh, never mind me, marm, it's so long since you've had an afternoon off I must insist that you take one today. But be sure and come home early. I may have callers, you know, and I shall want somebody to tend the door."—Boston Transcript.

Rangle—What were you punishing your boy for this morning?

Angle—For lying. He said he saw a fish in the mill pond as big as the one I've been telling about that got away from me there last week.

Rangle—But maybe he did see it.
Angle—Nonsense! There isn't a fish that big in the pond.—Philadelphia Press.

"Say, Chimmie, see dat man gettin' on de car? Dat's the postmaster general."

"Aw, gwan. He ain't no general. Ain't got no brass buttons nor stars nor nothin'."

"Aw, he ain't do soldier general. He's de mah wot hands out letters at de general delivery windy."—Kansas City Journal.

"Tommy! stop that noise, and come here to me," said Mrs. Phamley. "Do you know whose day this is?"

"Yes, ma'am," replied Tommy, promptly. "Whose is it?"

"Bridget's. Mary Ann was out last Sunday."—Philadelphia Press.

Tommy—Do you believe in transmigration, pop?

Pop—Sometimes. Tommy—Well, from the way I love peanuts I must have been an elephant once.—Chicago News.

Mrs. Greene—I knew somebody was coming. I dropped a dishcloth only 10 minutes ago.

Mrs. Gay—Thanks. When I know you are coming to my house I drop everything.—Boston Transcript.

The Kind You Have Always Bought

THE KEALY SIEGE.

Government Forces Against Woman in Her Castle.

It was expected that a crisis in the case of Mrs. John Kealy against the Government of the United States would take place Sunday last and that this peculiar woman, who has shown such belligerent tendencies, would be defeated in her persistent efforts to restrain the authorities from dispossessing her of the house which she has been occupying within the Naval Academy walls, at Annapolis. Mrs. Kealy has regularly attended St. Mary's Catholic Church on Sunday mornings. This morning it was expected that she would follow her custom and visit the church. The two marines who last week were placed on sentinel duty about the Kealy house were given instructions not to allow the woman to re-enter the academy grounds after she had once left them and to immediately notify a group of workmen stationed near at hand to proceed to demolish the house.

Mrs. Kealy has on more than one occasion shown her fighting blood, and she has many admirers for her strategy and physical prowess. In anticipation of an interesting time, a great crowd congregated in the vicinity of the battle ground about church time, and waited for the indomitable Irishwoman to come forth. The sentinels were on the alert and there was an air of excitement about the whole neighborhood. Mrs. Kealy, however, seems to have gotten wind of the intentions of the Government officials, and she did not venture from her house all day. This is said to be the first Sunday that she has missed attending church for many years. When one of the sentinels passed by the besieged house Sunday morning the inmate evidently realizing that she had skillfully avoided falling into a trap, derisively signaled an epithet to him from a partly opened window and then slammed the shutter and presented herself no more during the day.

Sunday evening as some curious person who was looking at the house happened to draw very near to it Mrs. Kealy hurled a heavy piece of bedroom china at him, and made it plain that she is maintaining a relentless vigil.

How she manages to subsist in view of the close siege to which her house is subjected is a mystery. The sentinels have orders to allow no one to enter the house and to refuse to allow Mrs. Kealy to return to it after she has once left. The only source from which she can get water is a spigot near the house and this the sentinels have carefully guarded.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials.

Address: E. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

INJUNCTION AGAINST DOG

Knoxville, Tenn., Sept. 15.—A dog belonging to R. H. Bell, a liverman of this city, has been enjoined from barking and disturbing the members of W. H. Tepell's family. Mr. Tepell, who is a well-to-do citizen, living near Knoxville, filed a bill in the Chancery Court against Bell, seeking an injunction restraining Bell's dog from barking and further disturbing Tepell's wife, who, it is alleged has been driven to nervous prostration. Judge Speed granted the injunction, which Tepell seeks to have made permanent.—American.

Not For Your Pocket

The largest glass bottle ever blown has recently been made for exhibition at the St. Louis Exposition. It holds forty-five gallons, and required 40 pounds of molten glass, drawn from the furnace and shaped on the end of a huge blowing pipe.

STILL ON THE WAYS.

Cruiser Maryland At Newport News Not Yet Afloat.

NEWPORT NEWS, Va., Sept. 15.—At 2 o'clock this afternoon, when the tide was high, an extraordinary effort was made to float the cruiser Maryland, which stuck on the end of the launching ways Saturday. Two tugs, a dredge and a floating crane pulled together in an effort to get the big cruiser away from the ways, but the effort was unsuccessful.

"The Maryland never has been in the slightest danger," said one of the shipyard officials today, "and if we had known that the ship was to stick on the ways we could not have chosen a more suitable place. She has been resting easy at all times and has been under no strain. When the bottom of the vessel is examined it will be found that it has not been damaged in the least." Investigation has shown that about 40 feet of the ship is resting on the ways, while the stern floats up and down with the tide. The bow has been propped and hydraulic jacks exerting a pushing power of 400 tons were placed at her bow to push the boat, but even that failed to budge it.

Those who have examined the ways express the opinion that the timber on the sliding and ground ways have been burned into each other, and some persons are of the opinion that it will be necessary to cut the ways in order to release the ship. As this would involve a large cost it will not be done save as a last resort. It is not believed that the tropical storm now headed this way will injure the ship, as she is well protected from all points of the compass save the northwest.

What is Life?

In the last analysis nobody knows, but we do know that it is under strict law. Abuse that law even slightly, pain results. Irregular living means derangement of the organs, resulting in Constipation, Headache or Liver trouble. Dr. King's New Life Pills quickly readjust this. It's gentle, yet thorough. Only 25c at T. E. Zimmerman's Drug Store.

128 MILES; 125 MINUTES.

A new world's record for a long distance run has been made by a passenger train on the Baltimore and Ohio railroad. A stretch of 128 miles was covered in 125 minutes. No stop was made.

The distance traversed is between Chicago Junction, O., and Garrett, Ind. During this run a speed of 85 miles an hour was reached. This was the maximum. Bursts of speed 70 and 75 miles an hour were frequent. The train was made up of five cars, in charge of William Dunton, engineer. The locomotive is of the new Atlantic type, weighing 177,000 pounds. It is the most powerful in service on the Baltimore and Ohio railroad.

An extra large water tank helped in this remarkable performance, saving stops for water. From Garrett into Chicago another locomotive of the same make took the train. On this run a speed of 76 miles an hour was reached. The performance between Chicago Junction and Garrett could have been duplicated had the train not been blocked by a train ahead.

The distance 131 miles between Garrett, Ind., and South Chicago was covered in 153 minutes, making the whole run of 359 miles in 278 minutes. This record is in itself a phenomenal one.

Don't think that eruption of yours can't be cured. Take Hood's Sarsaparilla—its virtue is its power to cure.

Our Lynching Record

All the lynchings within 21 years that he could verify have been tabulated by Mr. Cutler, of Yale University. In that time 1,872 negroes have been lynched and 1,256 whites. Since the whites are six times as numerous as the blacks, the proportion of negroes lynched is, of course very much higher than these figures indicate. Only 35 per cent. of these negroes were lynched for the social crime that is usually associated in the mind with this method of punishment. The number of lynchings has diminished since 1892.

The Pacific coast pack of salmon this year is one million cases smaller than last year and two million cases short of the output of 1901. A big shortage in the Columbia river salmon, an almost a total failure of seekeys in Puget Sound and in British Columbia, as well as a deficit of 500,000 cases in Alaska salmon, are responsible for the small size of the pack.

GREAT STORM DAMAGE.

The Storm Which Moved up The Atlantic Coast Wednesday Did Great Damage From the Virginia Capes to Long Island Sound

It is estimated that 16 lives were lost in the storm; missing and probably dead, 12.

The storm at Atlantic City was much like that of 1880, which nearly wrecked the place. The Government wind gauge registered 62 miles an hour and then broke. It is estimated that the velocity was 70 miles. Dozens of hotels were badly damaged, wagons and trees were overturned in the streets and the contents of stores, even jewels and watches, were strewn about.

The velocity at Cape May was estimated at 80 miles, but less damage was done there than at Atlantic City.

At Ocean City, Md., almost every building was damaged. Visitors in hotels and cottages feared for their lives. Some of the fishermen lost all they possessed. The storm was also furious at Berlin and Salisbury, Md.

In Lower Delaware crops and trees were prostrated and roads blocked with debris.

At Delaware Breakwater vessels were tossed about like corks. Capt. J. B. Mahaffey and four of the schooner Hattie H. Marsh's crew were drowned.

Passengers on the Old Dominion liner Princess Anne were terrified on the run down the coast. The stokers quit work in terror, but were forced to resume at the muzzles of guns.

The damage in New York city is estimated at fully \$2,000,000 and one life was lost. The wind there reached 63 miles an hour and in Philadelphia 25 miles an hour.

President Roosevelt, while going from Oyster Bay to Ellis Island, was caught in the gale and had a trying experience.

Fearful Odds Against Him.

Bedridden, alone and destitute. Such, in brief was the condition of an old soldier by name of J. J. Havens, Versailles, O. For years he was troubled with Kidney disease and neither doctors nor medicines gave him relief. At length he tried Electric Bitters. It put him on his feet in short order and now he testifies. "I'm on the road to complete recovery." Best on earth for Liver and Kidney troubles and all forms of Stomach and Bowel Complaints. Only 50c. Guaranteed by T. E. Zimmerman, Druggist.

TO RAM THE POTOMAC

Gen. R. S. Oliver, Acting Secretary of War, has taken favorable action on the application of the Great Falls Power Company for permission to construct a dam across the Potomac river at Great Falls to connect with the Government dam at that point near the Maryland shore. This application has been pending before the War Department for several years. The proposed dam is incidental to the development of the plans of the company in the establishment of a large power plant at that point. The delay in action was due mainly to a difference of opinion as to the engineering feature of the work, such as the location of the dam with reference to the Government dam and the effect of its construction on the water supply of the District.

These differences have all been satisfactorily adjusted and Acting Secretary Oliver has issued a revocable license to the company to build its dam under conditions designed to fully safeguard the interests of the United States regarding the water supply of the District as well as against any and all claims for flowage on account of the raising of the water bed as a result of the new dam and the proposed raising of the Government dam. It is agreed that the latter work shall be done by the power company without expense to the Government and shall be subject to the inspection and approval of the engineer officer in charge of the Washington aqueduct.

A Purgative Pleasure.

If you ever took DeWitt's Little Early Risers for biliousness or constipation you know what a purgative pleasure is. These famous little pills cleanse the liver and rid the system of all bile without producing unpleasant effects. They do not gripe, sicken or weaken, but give tone and strength to the tissues and organs involved. W. H. Howell of Houston, Tex., says: "No better pill can be used than Little Early Risers for constipation, sick headache, etc." Sold by T. E. Zimmerman.

Sir Thomas Ligon is said to be very ill in Chicago from inflammation of the stomach and bowels.

MOB TORE THE HOUSE DOWN.

NEW MARTINSVILLE, W. Va., Sept. 10.—In an attack by an organized mob on a house in Deadfall, John Miller, a prominent citizen, was probably fatally shot by Dorsey Mitchell, said to be the proprietor, and the place was looted and then demolished.

A vigilance committee was organized to get rid of the house. When the mob approached the house admittance was denied, but the door was promptly kicked in, and Miller started in first. A woman struck him across the face with the handle of a heavy whip, but a moment later two shots rang out and Miller fell to the floor. Dorsey Mitchell, it is said, had pushed the woman aside and fired the shots.

One bullet struck Miller in the shoulder and the other in the lower part of the back. He was carried out and Mitchell managed to escape. The inmates of the house were warned to clear out of Deadfall under penalty of receiving coats of tar and feathers.

The mob then proceeded through the house, breaking open trunks and destroying the contents and smashing up the furniture. Later the house which was a small frame affair, was pulled from the foundation and totally destroyed.

Deadfall is an oil town, and has about 900 residents.

Mosquito Bite Kills A Man

Wm. Strayhorn, whose home is near Durham, N. C., was killed by blood poisoning brought on by the bite of a mosquito. Several weeks ago the insect bit him on the little finger, the finger inflamed and then blood poisoning set in. Physicians decided to amputate the arm, but in the meantime his condition was such that they were afraid to attempt the operation. He died in agony.

Advice to the Aged.

Age brings infirmities, such as sluggish bowels, weak kidneys and bladder and TORPID LIVER.

Tutt's Pills

have a specific effect on these organs, stimulating the bowels, causing them to perform their natural functions as in youth and

IMPARTING VIGOR

to the kidneys, bladder and liver. They are adapted to old and young.

FRIDAY, SEPTEMBER 18, 1903.

FREDERICK COUNTY 'PHONE 33

A shore battery is to be established at the Naval Academy.

The total number of voters in Adams county, Pa., is 8,634.

An organization was formed in Wisconsin county to suppress bribery at elections.

Lucien B. Brenner's store at Smithsburg, Washington county, was robbed Tuesday night.

The Great Hagerstown Fair will be held on October 13, 14, 15 and 16. See advertisement in another column.

Edgar F. Crebs and Margaret J. Gittinger, both of Frederick, were married in York, Pa., by Rev. H. A. Benfer.

George W. Abrecht, of Frederick, and Miss Mahala Rogers, daughter of Mr. Wesley Rogers, of Catocin Furnace, were married at the bride's home.

A picnic will be held in Seabrook's Grove, near the Tract School House, on Saturday, Sept. 23, beginning at 6 o'clock in the evening. All are invited.

John Kirk, the 12-year-old son of George Kirk, fell while attempting to get on a freight train at Sandy Hook, and had one of his legs cut off.

Miss Sada Nichols, of Point of Rocks, while on her way to a dance Friday night, was bitten in the ankle by a snake. She has suffered severely since.

The days on which you can register in order to vote this fall are Tuesday, September 29th, and Tuesday, October 6th, 1903. Don't fail to register on one of the above days.

Strength and vigor come of good food duly digested. "Force," a ready-to-serve wheat and barley food, adds no burden, but sustains, nourishes, invigorates. Sept. 18-19.

Judge Boyd, in his charge to the Garrett county grand jury, called attention to the fact that it is necessary that some provision be made for new county buildings, as both the court house and jail are unsafe.

Wesley Chapel, Methodist Episcopal Church, on Beekman road from Mountain Lake Park to Allegany Heights, was dedicated Sunday by Presiding Elder L. W. Roberts. A basket dinner was served.

Special services will be held in the M. E. Church in this place, beginning at 7 o'clock on next Sunday evening, and every evening during the week at 7:30 o'clock. These services will be conducted by the pastor, Rev. G. C. Harris.

The Sheriff's jury condemned a right of way involving four acres through the farm of Samuel Johnston, 12 miles west of Big Pool Station, for the Cumberland extension of the Western Maryland railroad, awarding the damages at \$1,900. He wanted \$2,200.

Judge Albert Ritchie, of the Supreme Court of Baltimore City, died Monday at Narragansett Pier, R. I., where he had gone to spend his vacation. Judge Ritchie was 69 years of age. He was born at Frederick, this county. His father was Dr. Albert Ritchie.

Miss Rose G. Foreman, daughter of Dr. and Mrs. E. K. Foreman, of Littlestown, Pa., and Mr. Francis R. Staveland, of Germany township, Pa., were married at the parochial residence of St. Aloysius' church, in Littlestown, on Sept. 8.

Emily A. Hess, of Carroll county, Maryland, has sold her interest in the Savage Mountain Firebrick mines, near Frostburg, to Charles C. Gorsuch, of Carroll county, who was a partner in the business, for \$32,500. The sale also includes lots in Frostburg.

HAS ACCEPTED THE CALL. Rev. A. M. Gluck, of Markes, Pa., has accepted the call extended to him to become pastor of the Reformed Church, of this place. He will enter upon his pastoral duties about the first Sunday in October.

Bucklen's Arnica Salve. Has world-wide fame for marvelous cures. It surpasses any other salve, ointment, or balm for Cuts, Corns, Burns, Boils, Sores, Fingers, Ulcers, Tetter, Salt Rheum, Fever Sores, Chapped Hands, Skin Eruptions; infallible for Piles. Cure guaranteed. Only 25c at T. E. Zimmerman, Druggist.

POWERFUL WHISKY GAS. A whisky barrel on the pavement in front of John Krenzer's saloon in Westminster exploded with terrific force last Thursday afternoon, seriously injuring John Krenzer, a lad of about 10 years. The barrel head was blown as high as the electric-light wires. Krenzer was standing over the barrel when the explosion occurred and was struck in the face and badly cut by the edge of the barrel head. The barrel had no fluid contents; it was standing in the sun, and it is supposed that the heat generated alcoholic gas in such volume as to cause the explosion. The noise of the explosion was heard for a distance of one-fourth of a mile.

Wilmer S. Hall, aged 18 years, who left Pocomoke City a few months ago to be a lineman for the Western Union Telegraph Company, was killed by electricity Monday last while repairing a broken wire near St. George, on Staten Island. He was a son of W. E. Hall, of the firm of Picken, Hall & Co., hardware merchants of Pocomoke City.

Killed By A Train. Dean Weber, aged 33 years, an employee of the Baltimore and Ohio Railroad at Brunswick, was found dead along the railroad tracks near his home at Knoxville. It is thought he was walking along the tracks when he was struck by a westbound train. Both legs were severed and his body was badly mangled. He leaves a widow and two children.

Declined The Honor. Mr. D. W. Baker, who was nominated by the recent Republican county convention of Montgomery as a candidate for the House of Delegates, has written County Chairman W. B. Burdette declining the honor upon the ground that he would be unable, because of business, to make a campaign or to fill the position should he be successful. Mr. William R. Fulks, of Gaithersburg, has been named as a candidate for Judge of the Orphans' Court, in the place of Mr. Fielder Marlowe, declined.

Natural Gas. Natural gas was struck Saturday at Tuscarora Oil Company's well in the Narrows, Allegany county, at a depth of 530 feet. However, the flow has but little pressure and is only a small pocket. A similar flow was struck when the well farther down the creek was being drilled, but the late strike has considerably more pressure than the old one. It is thought that gas will again be struck at 900 feet, where even a stronger pressure is expected to develop. However, it will not be strong enough to be of any use except as fuel under the boiler at the rig and thus assist in sending the drill down farther in search of a greater deposit. The third strike, it is expected, will be at a depth of about 2,000 feet in the Trenton limestone formation, but if the rock has not been shattered a strong well may be the result.

A Trolley Car Stopped. Passengers on a trolley car which left Frederick at 11 o'clock Saturday night for Middletown were greatly disturbed by several young rowdies who stoned the car. These boarded the car at Court street. The conductor, Robert Gerald, knowing the boys were only going to the end of Patrick street, started to collect the fares. One of the boys, whose name is said to be Bruchey, refused to pay and the conductor put him off. He immediately went around to the other side of the car and again got on. As the conductor endeavored to put him off at the bridge he was struck by Bruchey and when they reached Frayley's barber shop the other boys threw several stones which struck the car, which was heavily loaded with passengers going to Middletown. The boys will likely be arrested.—News.

AN EDITOR'S TROUBLES. Harry L. Snyder, the editor of the Shepherdstown, W. Va., Register, and one of the main stays of the Morgan's Grove fair, who served as manager of the baby show at the recent fair is thoroughly discouraged at his efforts to run the show. He says in his paper: "The editor will refuse to serve as manager of the Morgan's Grove Baby Show next year. As a result of the choice of the successful contestants last Friday 17 persons threaten to stop their subscriptions. Twenty-two parents, 18 grandfathers, 47 aunts, 66 first cousins and several hundred relations are deeply offended, and vow vengeance on the manager.

"The judges, who are really responsible for the trouble, are all strangers and have left town, and we have to stand the trouble all alone. No, we will never be manager again—unless enough prizes to go all around are given."

FIRE AT CAITHERSBURG. Store and Stock of Goods Destroyed—Loss \$10,000. The large mercantile establishment of Mr. John Belt, on Diamond avenue, corner of Summit, in Gaithersburg, Montgomery county, was destroyed by fire Monday. The store caught fire a few minutes before noon. Mr. Belt, the proprietor, left for Westminster Monday morning and his manager, Mr. Marshall Walker, discovered the fire in the stock of brooms in the warehouse. There was also kept a large stock of oils and other inflammable material. On the same side of the store a large stock of ammunition was kept, and Walker and other rescuers on hand had to leave the building without saving any property as explosion after explosion followed the spread of the fire to these goods. A prompt response of the Volunteer Fire Company, under Fire Marshal Gates, and an hour's fight of the fire at the Belt store enabled them to get the fire under control and save the business row on the opposite side of Diamond avenue, from the First National Bank to N. H. Darby's store. The origin of the fire is unknown. Mr. Belt's loss of building and stock, together with his important papers and wardrobe, his bed chamber being located on the second floor of the store, is estimated at from \$10,000 to \$12,000. It is understood he carried a large insurance. The Belt property was located adjacent to a row of milling and business houses of the Gaithersburg Milling and Manufacturing Company, which were burned in the fire of May last, and narrowly escaped destruction at that time.

DEMOCRATIC PRIMARY.

New Central Committee and Delegates Elected

The Democratic Primary meeting held in Spangler's Opera House on last Saturday evening was largely attended. Mr. William Morrison was made chairman of the meeting, and Mr. John D. Sebold acted as judge, with Messrs. George Koopers and Norman Hoke as clerks. There were two tickets in the field—the one was printed on colored and the other on white paper. The one on colored paper was elected by a majority of 101 votes, whilst the white ticket received only 33 votes. The total number of votes cast was 133.

The following were elected members of the Central Committee: Vincent Sebold, J. C. Williams, M. F. Shuff, William Morrison, Dr. J. W. Reigle, Johnson Eyer, E. L. Frizell, John A. Peddicord, D. F. Roddy, J. M. Stouter, Clarence Rider, James Seltzer, Edward Brown, Singleton Sheeley, J. C. Rosensteel, Michael Ling and B. S. Jenkins.

Delegates to the County Convention to be held in Frederick tomorrow: Vincent Sebold, J. C. Williams, Wilham Morrison, A. V. Keepers, J. B. Elder, J. Rowe Ohler, John Zacharias, Dr. D. E. Stone, Samuel Hemler, John Dukehart, W. S. Walter, William Harner, E. L. Frizell, J. W. Troxell, J. C. Rosensteel, P. F. Burket, F. A. Diefendal, B. S. Jenkins, J. Krise Evers, Howard Martin, Grayson Valentine, J. M. Kerrigan, F. A. Adelsberger, I. M. Fisher, W. H. Troxell.

FREIGHT WRECK.

The Cumberland Valley Railroad suffered another disastrous wreck Monday evening. An extra eastbound freight train of 25 cars jumped the track and 16 cars were derailed near Mason and Dixon, five miles north of Hagerstown. When the train parted the cars were piled up in an undecipherable heap on top of each other, and in some places 20 feet in the air. The track on both sides was strewn with cars. Some of the cars were thrown into adjoining fields. After the train parted it continued to run for a considerable distance. The track was badly torn up for several hundred yards. The cars were loaded with coal and coke. Several of the trainmen escaped death by jumping. Passengers were transferred around the scene of the wreck.

Since the Cumberland Valley has been hauling freight that was diverted by the Baltimore and Ohio from the Western Maryland it has had many serious wrecks, some of which, it is claimed, were due to the light rails, which were not well adapted to heavy freight hauling. With a view of preventing wrecks in the future and to facilitate the hauling of great freight trains it is proposed to double track the road from Harrisburg to Martinsburg, the freight being delivered at the latter point. To that end the company is buying property along the road, especially in the towns through which it passes. The improvements in Chambersburg alone, it is said, will cost nearly \$1,000,000.

His Life Saved By Chamberlain's Colic, Cholera and Diarrhoea Remedy.

"B. L. Byer, a well known cooper of this town, says he believes Chamberlain's Colic, Cholera and Diarrhoea Remedy saved his life last summer. He had been sick for a month with what the doctors called bilious dysentery and could get nothing to do him any good until he tried this remedy. It gave him immediate relief," says B. T. Little, merchant, Hancock, Md. For sale by T. E. Zimmerman, druggist.

PERSONALS.

Dr. George W. Welty and daughter, Miss Mamie Welty, of Brooklyn, N. Y., spent a few days with the Doctor's sister and brother, Miss Annie Spindler, of this place, and Mr. F. A. Welty, near town.

Mrs. Annie Spindler and Miss Teresa Harner spent a few days with friends near Frederick this week.

Mrs. Melvin Slesser and son, of Birmingham, Ala., who were visiting Mrs. Slesser's aunt, Mrs. Fogle, have returned to their home in the South.

Mr. H. G. Beam has moved his family to Baltimore City.

Mr. Frederick Welty has returned to Germantown College.

Mr. and Mrs. William Zurgable and little daughter, of Baltimore, are visiting Mr. and Mrs. James McGrath.

Mrs. William Roddy, who was visiting her parents, has returned to her home in Baltimore.

Mr. Robert Horner has returned to Lafayette College, at Easton, Pa.

Mrs. Ernest Hardman has returned to her home in Baltimore.

Mrs. Sophia Knouff has returned home from Baltimore where she was at a hospital under medical treatment.

Miss Rose Tyson visited her father, Mr. John Tyson, in Washington, D. C., this week.

It Will Surprise You—Try It.

It is the medicine above all others for catarrh and is worth its weight in gold. Ely's Cream Balm does all that is claimed for it.—B. W. Sperry, Hartford, Conn.

My son was afflicted with catarrh. He used Ely's Cream Balm and the disagreeable catarrh all left him.—J. C. Olmstead, Arcola, Ill.

The Balm does not irritate or cause sneezing. Sold by druggists at 50 cts. or mailed by Ely Brothers, 56 Warren St., New York.

A bill of complaint has been filed in equity at Elliott City asking for a decree to sell the estate of the late Henry Frederick Brosenue, of Howard county. The estate is one of the most valuable in Howard county, consisting of over 1,500 acres. Included in the realty is Waverly, the old homestead of the late Governor Howard, of Maryland.

IMMENSE PLANT PREY TO FLAMES.

Rain-Monumental Fertilizer Works Destroyed By Fire

In three hours Tuesday morning the immense plant of the Rain-Monumental Company, manufacturers of fertilizers and sulphuric acid, at Fairfied, Anne Arundel county, was destroyed by fire, entailing a loss that is estimated to be in the neighborhood of \$500,000 in damage to building, machinery and stock, in addition to a number of railroad cars, the property of the Baltimore and Ohio Railroad Company and the Pennsylvania system. There is but \$352,439 insurance on the property and stock.

The buildings and stock totally destroyed were: Office, with all the furniture. Engine-room No. 1, with 4 horizontal engines. Engine-room No. 2, with one horizontal engine. Boiler-room, No. 1, with four safety boilers. Boiler-room, No. 2, with four longitudinal boilers. Mixing rooms Nos. 1 and 2, with all the machinery. Milling factory with all the machinery. Shipping buildings, including the platforms, equipment, etc. Acid factories A, B and C, with 55 valuable tanks. Electric powerhouse and equipment. Traveling electric cranes and elevated railways. Twenty seven railroad cars. About 100,000 gallons of sulphuric acid. Eight hundred tons of coal. About 50,000 tons of fertilizers. About 7,000 tons of tar.

Situated along the banks of the Patuxent just a little north of Wagners Point, the plant was isolated as it were. Hostile legislation precluded the location of the plant any nearer Baltimore; yet, with its operation, the company was compelled to build a number of 2-story frame houses just outside the main entrance to the plant and a quarter of a mile from the water's edge. There are no streets laid out at this place, but the company has built a fine shell road in front of the row.

It was from the rear of a house that is in the middle of this row that the first sign of the fire was discovered by Mr. John Kaiser, one of the employees, who was just getting up for his day's labors. He noticed great clouds of smoke coming from the mixing plant, and, as he was familiar with the location of the boiler rooms, he knew in an instant that a fire had started. Without stopping to dress thoroughly he hastened from the house and notified the watchman, James Spencer. As soon as the alarm was sounded by the watchman all the employees who reside in the neighborhood flocked to save the plant that had given them steady employment for a number of years. There is a fire brigade, organized among the colored laborers, who are used to working among the acid and consequently immune to the fumes that arise from the tanks. They turned in with a will, and in less than five minutes had 14 streams of water pouring on the burning building. All the time there was a strong "off shore" wind blowing that added to the difficulty of fighting flames that had already gotten a good start.

The buildings were of yellow pine, and the first building to catch fire burned very rapidly, the sparks communicating with the other buildings in the course of the wind.

The Pleasure of Eating.

Persons suffering from indigestion, dyspepsia or other stomach trouble will find that Kodol Dyspepsia Cure digests what you eat and makes the stomach sweet. This remedy is a never failing sign cure for indigestion and dyspepsia and all complaints affecting the glands or membranes of the stomach or digestive tract. When you take Kodol Dyspepsia Cure everything you eat tastes good, and every bit of the nutriment that your food contains is assimilated and appropriated by the blood and tissues. Sold by T. E. Zimmerman.

FISH-POT INJUNCTION.

William Reid living in Berkeley county, West Virginia, opposite Williamsport, last Thursday afternoon got out an injunction restraining John Forsythe, Jack Ardinger, Joseph Nave, James H. Ripple and others unknown from continuing the erection of a fish pot in the Potomac river just below the public ford from Williamsport to Berkeley county.

Judge Witzensbacher granted the injunction upon Reid's giving a proper bond and will leave to the defendants to come into court and move for a dissolution.

Reid alleges that since the fishpot was built the water in the river is backed up so as to make the fording frequently deep for passage, and that trade between the two States is hindered thereby. He also alleges that the builders have destroyed valuable timber on his property and that his lands are overflowed and rendered useless by the backing of the waters in the river.

The Proper Treatment For a Sprained Ankle

As a rule a man will feel well satisfied if he can hobble around on crutches two or three weeks after spraining his ankle, and it is two or three months before he has fully recovered. This is an unnecessary loss of time, for in many cases in which Chamberlain's Pain Balm has been promptly and freely applied, a complete cure has been effected in less than one week's time, and in some cases within three days. For sale by T. E. Zimmerman, druggist.

A Watch Stolen At Littlestown

Last Sunday morning while John R. Byers, Littlestown, was attending divine services in St. Paul's Lutheran Church some person stole his watch from his vest that was hanging on the office door at his livery stable. It was an open face nickel watch and the movement was of Elgin make and the minute hand detached. To the watch was attached a gold chain.

DEMOCRATIC STATE CONVENTION

Edwin Warfield, of Howard County, Nominated For Governor.—The Other Candidates And The Platform.

The Maryland Democratic State convention, to nominate candidates for Governor, Comptroller and Attorney-General, was held in Baltimore City Wednesday evening. It was one of the greatest and most enthusiastic Democratic Convention ever held in the State of Maryland.

As a convention the gathering was said to be without parallel in the political history of the State, and the scene within the great hall was an inspiring one. The most distinguished Democrats in the State were gathered together on the stage, in the boxes and among the delegates. Old and gray-haired veterans of many campaigns sat side by side with ambitious young politicians attending their first State convention. In the crowd were many faces not usually seen at gatherings of the kind, and the enthusiasm of the great audience was spontaneous and tremendous.

The Nominees

The convention made the following nominations:

For Governor—Edwin Warfield, of Howard county.

For Comptroller—Dr. Gordon T. Atkinson, of Somerset county.

For Attorney-General—William Shepard Bryan, of Baltimore City.

Mr. Warfield was placed in nomination by Mr. Joseph S. Tracy, the veteran Democrat of Howard county, who said: "I have the honor of nominating the Hon. Edwin Warfield, of Howard county." The great crowd shouted and yelled for nearly five minutes with unbounded enthusiasm over the few words of Mr. Tracy. General Baughman, of Frederick county, made an eloquent address seconding the nomination. Mr. Warfield was nominated by acclamation.

Ex-Congressman Joshua W. Miles, nominated Dr. Gordon T. Atkinson, of Somerset county, for Comptroller, and he was declared nominated.

Mr. E. N. Rich placed in nomination Mr. William S. Bryan, Jr., of Baltimore, for Attorney-General, and he was declared nominated in the same manner as the other two candidates.

The Platform Adopted

The representatives of the Democratic party of Maryland, in State convention assembled, heartily commend the administration of Gov. John Walter Smith.

He has diligently and faithfully discharged the many and varied duties of his office and fully made good his assurance to the people that under his administration as Governor the laws would be vigorously enforced, the public revenues carefully guarded and peace and good order resolutely maintained.

The efficient and successful management of the affairs of the State in Democratic hands for the last four years justly entitles us to claim a continuation of the confidence and support of the people.

The good government which we are now enjoying under Democratic administration cannot possibly be made better by the Republican party; but, on the contrary, dependent for its existence as that party in this State is upon its solid negro vote, it is manifest that the defeat of our ticket at the coming election will bring back upon us the evils and dangers from which our triumph in 1899 so fortunately delivered us.

We believe that the political destinies of Maryland should be shaped and controlled by the white people of the State, and while we disclaim any purpose to do any injustice whatever to our colored population we declare without reserve our resolute purpose to preserve in every conservative and constitutional way the political ascendancy of our race. The continuance of power of the Democratic party in this State means:

First—The continued rigid enforcement of the laws which have insured safety to person and protection to property.

Second—Continued economy in the expenditure of the people's money, but without parsimony, and progress without extravagance.

Third—It is a guarantee of the early extinguishment of the State debt and a speedy reduction in taxation.

Fourth—It will result in such amendments to our present excellent election law, which has done so much to lessen the evils of bribery, to assure the secrecy of the ballot and to promote intelligent voting, as experience has shown may be necessary to preserve the purity of our elections, without which good government is impossible.

Fifth—The success of our party means the public schools of the state will be further fostered, expanded and improved, so that opportunity shall be given to every child to obtain a fair education.

Sixth—Maryland, among the first of the States in the Union to recognize that the welfare of all the people largely depends upon the improvement of public highways, created facilities for cheap transportation. The policy resorted to in greatly increasing our prosperity and gave to the city of Baltimore an opportunity to share in the commerce of the country. The time has now arrived when we must return, to some extent, to the former policy of improving the highways. Good roads will cheapen the cost of the transportation of Maryland's products and will add greatly to the value of property and to the comfort of all the people of the State. Our success will assure legislation to this end.

Seventh—The products of the Chesapeake bay and its tributaries have furnished remunerative employment for thousands of our citizens. Their right, their opportunity, to pursue their vocation must be guaranteed, and it is alike

the duty and the interest of the State to foster and increase the supply of the natural products of our great inland seas.

Eight—The Democratic party has shown by example that public improvements in the State and in the city of Baltimore can be made with economy and without suspicion or taint of jobbery. We propose to continue that policy, so that Baltimore city shall have the opportunity to construct its system of sewerage and the improvements of its streets under such restrictions as will insure strict economy by business methods absolutely divorced from party advantage.

Ninth—The Primary Election law passed by a Democratic Legislature and signed by a Democratic Governor, has produced good results, and we are of opinion that its provisions, with such modifications as local circumstances may demand, should be extended to the whole State.

Tenth—The election of a Democratic majority in both branches of the General Assembly will strengthen the hands of a Democratic Governor and contribute greatly toward the maintenance of good government in the State. It will also make certain the election to the United States Senate of a man who will truly represent the essential principles which the Democratic party has advocated from Jefferson's time to our own and who would scorn to malign and attack the white people of the South in their efforts to properly solve the great question resulting from the enfranchisement of the negroes.

A WOMAN'S COMPLEXION.

It is rank foolishness to attempt to remove sallowness or greasiness of the skin by the use of cosmetics, or "local" treatment, as advocated by the "beauty doctors." The only safe and sure way that a woman can improve her complexion is by purifying and enriching the blood, which can only be accomplished by keeping the liver healthy and active. The liver is the seat of the disease and blood pollution. Green's August Flower acts directly on the liver, cleanses and enriches the blood, purifies the complexion. It also cures constipation, biliousness, nervousness, and induces refreshing sleep. A single bottle of August Flower has been known to cure the most pronounced and distressing cases of dyspepsia and indigestion. New trial size bottle, 25 cents; regular size, 75 cents. At all druggists.

TINNER MEETS WITH A TERRIBLE DEATH.

Mr. George M. Kirby, a tinner in the employ of the Baltimore and Ohio Railroad Company, slid to his death Monday morning while at work on the roof of a shed at Chases Wharf, foot of Caroline street, Baltimore. The man, after sliding off the roof, fell against the side of the bark Dom Pedro, which was moored to the wharf. His body rebounded and landed on the edge of the wharf from where it toppled over into the harbor. When the body was recovered, it was found that the neck had been broken.

The accident occurred about 11 o'clock and was witnessed by William Johnson, colored. Kirby had been at work on the roof, which is a gable affair and very steep, all the morning.

While he was at work near the apex of the roof, Kirby in some manner lost his hold, and began sliding down the eaves. As he neared the edge, the man made an outcry which attracted the attention of the colored man, who was at work nearby, but was unable to do anything to stop the downward flight of the shrieking man.

As if thrown from a catapult Kirby went over the edge of the roof and shot out into space. In a moment he struck the side of the Dom Pedro, and while the single eyewitness stood transfixed the body struck the wharf and then disappeared from sight, as the waters of the harbor closed over the unfortunate man.

A search was made for the body, but it was not until 12:45 o'clock that it was recovered by Emanuel Roberts. The remains were sent to the Morgue in the Eastern Ambulance, and Coroner Riley was notified.

Monday Charles Messman, aged 9 years, son of George Messman, fell into Wills creek, near the German brewery, Cumberland, and was drowned. He was fishing with two companions, who gave the alarm. After 25 minutes the body was recovered, and three physicians made heroic efforts to revive the lad, but in vain.

LETTER TO I. S. ANNAN

Emmitsburg, Md.

Dear Sir: Messrs. Leachman & Edelin, Grafton, W. Va., had been selling a paint, which they thought well of; and this had occurred.

They sold a customer 18 gallons of it to paint his house. A few years later, they sold the same man Devco lead-and-zinc the same number of gallons to paint the same house. He had 7 gallons left.

The point of the tale is: 11 gallons Devco paints an 18 gallon house.

Do you want to sell it?

Of course, that isn't all.

Why does 11 gallons Devco go as far as 18 gallons of other paint? Because it is all paint, all true, no sham, and full measure.

Do you want to sell it?

But that isn't all. Devco lasts longer. No, no; you haven't got to wait ten years to find that out. Ten thousand people know it. We've got their names. Our agents know them; they think a heap of Devco. \$10 will paint a \$15 house; and the paint'll last twice as long.

Do you want to sell it?

Yours truly,

FW DEVCO & Co.

New York

General Debility

Day in and out there is that feeling of weakness that makes a burden of itself. Food does not strengthen. Sleep does not refresh.

It is hard to do, hard to bear, what should be easy,—vitality is on the ebb, and the whole system suffers. For this condition take

Hood's Sarsaparilla

It vitalizes the blood, gives vigor and tone to all the organs and functions, and is positively unequalled for all run-down or debilitated conditions.

HOOD'S PILLS cure constipation, 25 cents.

ANOTHER BARN BURNED.

On Saturday night a fire occurred, burning the barn and hogpens of Mr. McCullough, near Virginia Mills. All his crops, machinery and farming implements were destroyed. One fine big hog and several shoats were burned to death. Fortunately all the stock were turned out for pasture, as was the custom at night to pasture the horses and the hogs, a fine lot, were out in the field. The loss to Mr. McCullough will be very great, he having bought all new machinery and farming implements. The origin of the fire is not known. Mr. McCullough had gone to Fairfield on business and the women folks had gone to bed when the fire was discovered by the loss of the neighbors.

The wheat crop had just been thrashed out a few days before and all of the crop was still in the barn, also a large load of phosphate stood on the wagon and went down as it stood.—Gettysburg News.

A Boy's Wild Ride For Life.

With a family around expecting him to die, a son riding for life, 18 miles, to get Dr. King's New Discovery for Consumption, Coughs and Colds, W. H. Brown, of Leesville, Ind., endured death's agonies from asthma; but this wonderful medicine gave instant relief and soon cured him. He writes: "I now sleep soundly every night." Like marvelous cures of Consumption, Pneumonia, Bronchitis, Coughs, Colds and Grip prove its matchless merit for all Throat and Lung troubles. Guaranteed bottles 50c and \$1.00. Trial bottles free at T. E. Zimmerman's drug store.

PROPERTY FOR SALE.

A two-story dwelling house, situated in Emmitsburg. Property in good repair, and an excellent location for a business stand of any kind, the property being suitable for business purposes as well as a residence. For further information call or address,

The Chronicle, Emmitsburg, Md.

FATAL ACCIDENT TO JOHN SHULL.

A horrible accident occurred late Friday afternoon on the Hafer farm, near Brush Run, in Mountpleasant township Pa., through which John Shull, a well-known farmer and trucker who resides in the Pigeon Hills in Berwick township, lost his life.

Shull

A BREAK OF NATURE.

Wonderful Travelling Sand Hills East of Emmitsburg.

After passing another "dune" of three or four hundred feet, we enter the famous desert of Islay, on which are what I consider the most remarkable natural curiosities to be seen on this globe, for we are now among hundreds—nay, thousands—of pure white sand crescents on a plateau of 4,500 feet above the level of the sea and fifty-four miles from the coast, where all else is of a dark red or chocolate color. Whence comes this sand and why always in a crescent shape? Professor Bailey told me that scientific men do not agree as to the reason why the sand always forms the same crescent shape, although it is generally believed that the whirling eddies hereabout are responsible. Some, however, argue that such is not the case since each of these crescents has an opening toward the northeast. At any rate, the inner circle is an almost perpendicular wall of the finest pure white sand, and from the upper edges the crescents slope gradually away on the outside. They average about twenty feet in height, the inner circle having a diameter of some fifty feet, although I have seen one at least a mile and a half in diameter, which was, however, not much higher than the average. These crescents move, it is estimated, at the rate of three inches every twenty-four hours, and when on the slow journey one comes near the railroad it becomes necessary to shovel the sand across the tracks, after which it travels on, forming new crescents or mingling with some of the others.—Ernest O. Rost in Harper's Magazine.

Dwellers in the Ice.

The Esquimaux, or "arctic highlanders" of Ross, live in ice caves within the vast glacier cap which covers all northern Greenland. This is perhaps the most wretched and isolated existence it is possible to conceive. Their "dwellings" are always wet, owing to the melting of the ice walls and floor. For full six months of the year the darkness of the arctic night envelops them. The ice is around them, beneath them, above them. In nine cases out of ten if they venture abroad they breathe the frozen particles, and the sensation is akin to that which comes from inhaling the blast of a furnace.

Nevertheless they refuse to move farther south with the approach of winter, as do all the other Eskimo tribes. They take a sort of perverse pride in their loneliness as in their misery. "What matter," they say, "we are cold and hungry? We are the last of all peoples. We dwell literally at the end of the world. To the north of us there is snow, there is ice, but there is no land, and there is nothing that lives, breathes or has independent movement."—Pearson's.

Dumas the Prolific.

"As a rule, I do not begin a book until it is finished," the elder Dumas used to say. And certainly the pace at which he put his works on paper seems to bear out the statement. No fewer than sixty volumes of his appeared within a single year, a record probably never equaled before or since. On one occasion he made a wager of £100 that he would write the first volume of a new book he had planned within seventy-two hours, including the time for meals and sleep. The work was to occupy seventy-five large foolscap pages, each page containing forty-five lines and each line fifty letters—a total of 3,375 lines. He won the bet with ridiculous ease, accomplishing the task in six hours less than the specified time.

Flowers that Harm the Sick.

Botanists and others who have made a life study of flowers have recently discovered that the perfume of blossoms is often increased by growing them under colored glass. They state also that some plants are fragrant only at night and others only in the hot sunshine, that the season affects the odors and that some perfumes powerfully affect the human organization, sometimes giving rise to serious nervous troubles. Flowers of delicate perfume quiet the nerves of invalids, it is asserted, but the violet, lily of the valley and carnations are really harmful to the sick.

Plausible.

"What's the derivation of the word 'college'?" "I give it up." "But surely the word must mean something." "Oh, I guess it was just faked up by some poet who needed a rhyme for 'knowledge'."—Philadelphia Ledger.

Anticipation.

Mabel—Yes, dear, I will be a help-mate to you and try to lighten the daily troubles and worries of your life as best I can. Arthur—But I have none, darling. Mabel—Oh, you doo! I mean when we are married, of course!

What a Relief.

"Who's there?" called the poet. "I am the wolf at the door," came the fire reply.

Not a Student of Form.

Teacher—Willie, if one horse can run a mile in two minutes and another horse can do it in three minutes how far apart will they be at the end of eight miles? Willie—Mamma, I was brought up strictly. Above all things, my parents have warned me to avoid horse racing. Consequently I cannot answer your question.—Toledo Blade.

Those Educated Sandwiches. College idiot (in the lunch room)—There's one good thing I can say about these sandwiches. Kind Friend—What's that? College idiot—That they're college bred.—Columbia Jester.

CASTORIA. The Kind You Have Always Bought

Small illustration of a person and text.

A BERTH JACK SHIRKS.

Nova Scotia Ships Are Said to Be the Worst Afloat.

The worst case in the way of a ship into which Jack can go is a Nova Scotia. A certain Nova Scotia ship came into port at Santos one day with a crew that was little short of mutinous owing to the fact that the captain was too sparing of the rations. The ship had a bad name among sailors at the best, and as soon as she was anchored the entire crew cleared out. For three weeks after she had discharged and got her new cargo she lay there with no crew to take her to sea. At last the captain went to some of the crimps on shore and told them to round up a crew under any pretext. The crimps sent men around the docks offering big wages to any of the loungers who would go aboard the vessel to rig some new sails. Some twenty men were quickly picked up, many of them in their shirt sleeves, and were taken aboard. They were then covered with revolvers and rifles by the officers, and the anchor was weighed, and the Nova Scotia ship stood out to sea, her unwilling crew leaving families behind without even a chance to let them know what had happened. The next port was Sydney, and the next Yokohama, then San Francisco, then Valparaiso, then Lisbon, and for those men who stayed with the ship it was just two and a half years until she went to Grande do Sul, the nearest port home. Many of them, however, had cleared out and gone home in other ships long before that.—Broughton Brandenburg in Leslie's Monthly.

Cicero and His Daughter.

History abounds with examples of the love that has existed between father and daughter which, proved superior to the changes of time and fortune, defying even death itself, and entering into the records of humanity, imperishable and immortal. One of the most beautiful instances was the love of Cicero for Tullia. She was a woman of high attainments and exalted character, with qualities of heart and mind that peculiarly fitted her to be her father's intimate companion.

After her death he could find neither consolation for her loss nor distraction for his grief. Affairs of state, weighty matters of political and personal interest, even the sympathy of Brutus and Caesar, could not dispel the melancholy that settled down upon his soul and forced him for a time into retirement. He wrote of her in these touching words: "A daughter I had in whose sweet conversation I could drop all my cares and troubles. But now every thing is changed." "It is all over with me, Atticus. I feel it more than ever now that I have lost the only being who still bound me to life."

An Elevator Elevator.

There is perhaps no elevator in the world more exclusive than that provided at the capitol for the supreme court of the United States. That elevator can be used by exactly eleven people, and no one else would for a moment consider entering it except as the guest of one of these eleven privileged gentlemen. The fortunate eleven are the nine justices of the United States supreme court, the clerk and the marshal of the court. The elevator goes from the ground floor of the capitol to the main floor, on which is located the supreme court of the United States. It is a small elevator, so that, with its conductor, three portly forms of justices of the supreme court of the United States would fill it. It is one of the very latest designs of electric elevators and is finished in magnificent style.—Washington Star.

Superstitions.

If two persons raise their glasses to their lips simultaneously they are indicating the return of a friend or relative from foreign parts. The same indication is conveyed by bubbles in coffee or by the accidental fall of a piece of soap on the floor. A flickering flame in the fire or an upright exorcism in a burning candle is interpreted as predicting the arrival of a guest, whose stature is judged by the length of the flame or exorcism. If one drains a glass of the contents of which some one else has partaken he will learn the secrets of the latter.

Mighty Cheerful.

Mamma had told her little daughter that she could not go out to play, but the little maiden determined to make one more plea. "Please, mamma, I isn't very wet."

"No, you cannot, Dorothy," said mamma pleasantly, smiling a little at her daughter's persistency. Dorothy regarded her mother aggrievedly and then said, "Well, seems to me you're mighty cheerful about it."—New York Times.

Bureau of Publicity.

Mrs. Naguss—What an odd, interesting piece of furniture! It looks like an antique. Is it a chiffonier or a bookcase?

Mrs. Borus (wife of struggling author)—Neither. It's my husband's writing desk. He calls it his bureau of publicity.—Chicago Tribune.

His Part.

The Doctor—You regard society as merely a machine, do you? What part of the machinery do you consider me for instance?

The Professor—You are one of the cranks.—Exchange.

Returned His Love.

Friend—What's the matter, old man? Doesn't she return your love? Zilted One—That's just the trouble. She returned it and told me to give it to some other girl.—Princeton Tiger.

One man makes a fortune to eight that become bankrupt in England.

Where the Ladies Propose.

Between the mountains of India and Persia is a powerful tribe, among whom an extraordinary custom prevails. Woman's rights have apparently received full recognition, for the ladies of the tribe can choose their own husbands. All a single woman has to do when she wishes to change her state is to send a servant to pin a handkerchief to the hat of the man on whom her fancy lights, and he is obliged to marry her, unless he can show that he is too poor to purchase her at the price her father requires.

THE "WAVE MEKE."

Graceful and Refined Dance Performed by Fijian Maidens.

"The Fijian natives call their dance 'meke,' and the best of them all is the 'wave meke,'" says a traveler who has witnessed these graceful evolutions. "A lot of pretty girls, in two or three rows, act the movements of the sea as it rolls in upon the reefs. "First of all, they bend down in unison and sweep the ground slowly with their hands, waving their fingers in order to represent the little wavelets flecked by the wind. Then they sway their bodies to and fro to show the long roll of the tropical wave, and presently their figures rise and fall as do the breakers. The action of the dance becomes more and more violent. The wave is dashing up the barrier reef. The girls spring forward and clap their hands and then drop to the ground with a long musical cry. The wave has surmounted the reef and emptied itself into the glassy lagoon. The dance is over.

"Every movement of the 'wave meke' is graceful and refined. The best ballet girls in your American theaters are not better trained than these young Fijian maidens, who spend a good half of their happy, careless, lazy lives dancing their 'meke' or playing in the surf. There are no finer dancers in the world. Nearly all their ballets describe the scenes around them or the incidents of their daily life. Other 'meke' picture the palms swaying in the breeze, the canoes tossing in a gale and the clouds sailing across the sky."

A Famous New York Bank.

Early last century a charter was granted a company to set up a chemical works in New York, and in consideration of the boon these works would be a clause was added granting banking privileges. The astute men at the head of the concern saw possibilities of development on banking lines not apparent in the manufacture of chemicals and decided to make the business a banking one. To retain the privilege, however, it was necessary to manufacture chemicals, and so then, as today, an admirable pretense was made of doing this. In the fine establishment of the great Chemical National bank on Broadway a little shop is apportioned to a manufacturing chemist, who potters about mixing ingredients. He is not much troubled with business, but now and again a New York citizen will startle a visitor by taking him into this fine bank and asking for a dime's worth of castor oil, which is supplied. This was the only bank which did not suspend specie payments during the civil war.

Military Geese.

Even the geese in Germany march with military precision, which may be the reason why the famous drill style of the German infantry is called the "goose step." A writer in Travel tells describes the great goose armies which are so interesting to the health seekers at Bad Nauheim:

"It is worth while to go to Ober-Moeren at 6 o'clock in the afternoon to see these geese returning home from the fields. The village is white with them; hundreds and thousands, regiments and brigades of geese, marching along with military precision. As they near home they separate of their own accord; sixteen to the right, twelve to the left, a detachment up a lane, and so on—all quacking loudly, but bearing themselves with that keen sense of order and discipline which distinguishes the vaterland."

Why Corn Pops.

Finally a scientific sharp comes to our rescue and in science explains the phenomenon of the popping of popcorn in an extremely lucid and interesting manner. The learned gentleman says: "The starch polygons are of such nature and construction as to facilitate expansion and render it explosive in character. There is a fracture of a particle along its two radii, the endosperm swelling very considerably, the peripheral portions cohering with the hull, but the fractured quarters turning back to meet below the embryo." And there you are. Deliciously simple, isn't it?—Cleveland Plain Dealer.

Mrs. Fred Unrath, President Country Club, Boston Harbor, Mich.

"After my first baby was born I did not seem to regain my strength although the doctor gave me a tonic which he considered very superior, but instead of getting better I grew weaker every day. My husband insisted that I take Wine of Cardui for a week and see what it would do for me. I did take the medicine and was very grateful to find my strength and health slowly returning. In two weeks I was out of bed and in a month I was able to take up my usual duties. I am very enthusiastic in its praise."

Wine of Cardui reinforces the organs of generation for the ordeal of pregnancy and childbirth. It prevents miscarriage. No woman who takes Wine of Cardui need fear the coming of her child. If Mrs. Unrath had taken Wine of Cardui before her baby came she would not have been weakened as she was. Her rapid recovery should commend this great remedy to every expectant mother. Wine of Cardui regulates the menstrual flow.
