Mr. Anderson, Pittsburg. Six unidentified bodies.

The Pennsylvania railroad officials gave out a list of 134 persons who were injured, 106 being treated at hospitals or elsewhere.

How the Wreck Occurred. There are various stories of how the wreck occurred, but the official ver-

sion is as follows: The engine on the east-bound freight train was flagged by the crew of a shifting engine ahead on the same track. The engineer quickly put on his air brakes, and the train, an unusually long one; came to a sudden halt. The strain on the air valves was a severe one, and one of the connecting air hose in the middle of the train blew out. This caused the middle of the strain to "buckle," and the damaged cars fell over on the passenger tracks. Just as this happened the Cleveland express came thundering up and "sideswiped" the wreck. The express was cars. "What is an ide?" It is a natural pitfall for modern generations. Even Bulwer Lytton allowed one of his Ro- ask?" man characters to say, "It stands fixed for the ninth ide of August," although he must have known that "ides" is a Romans called the 15th of March, May, July, October and the 13th of every other month the ides they do not seem to have known for certain themselves. Some thought it meant the halfway day of the month, from an Etruscan word meaning "to divide," but modern philology, digging into Sanskrit, has suggested that it means the bright time of the month, full moon.-London Notes and Queries.

Accuracy of Marksmanship. Ability to shoot straight is to some extent a natural gift, and it is useless trying to make a captain of a gun of a man who does not possess this faculty. He may be a good enough man in other ways, but unless he has "a straight eye" he will never become much of a marksman. The admiralty recognizes this and has ceased trying to make crack shots of men whose talents do not lie in that direction .- Pall

OUR IGNORANCE.

That It Is Very Real the Things We Don't Know Prove.

After all are we not still Ignorant of much which we feel we ought to understand? Apart from the great laws of electricity, light and heat, about which we know something, but certainly not all, are we not almost hopelessly ignorant of some of the laws which govern the lives of animals? Do we know, for instance, what is the law which makes it possible for a bee carried five or six miles from her home. blind in a dark box, to find her way back to the hive? What is the sense exercised by the antennae of the virgin moth which, set out in a muslin box on a lawn, attracts suitors from woodlands scattered away in all the country round? What is the attraction felt or choice decided upon by the tendril of the climbing plant which turns aside from the smooth wall to eatch at and wrap round the nail or the ledge or the projection which is to help it upward? All that is unknown, hardly even guessed at, and if there is so great an ignorance of what can be seen, is it logically to be argued that there is not a greater ignorance of what is unseen? One thing at least is certain-the reality of that ignorance.-London Spectator.

THE CENTO.

What the Word Strictly Means and

What It Means In Poetry. A cento is strictly a coat made of patches. In poetry it is a piece wholly composed of verses or passages taken from different authors and so placed together as to form a new poem with a

fresh meaning of its own. According to the rules laid down by Ausonius, author of the famous "Nuptial Cento," the pieces may be taken from one poet or from several. The Empress Eudoxia wrote a life of Christ in centos taken from Homer, and Al-

There is more Catarrh in this section of the country than all other diseses put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and festimonials.

Children Panic-Strikeh.

A portion of the roof on the west side of the school building, York Pa., caved in Monday morning, and, had it not been for the presence of mind of Miss Carrie Bennett, the teacher, a panic might have ensued. When the ceiling began to erumble the children were panicstricken, but were kept nnder control and were gotten out of the building in safety. The falling of the roof is supposed to have resulted from alterations that had been made in the building several years ago.

surveyors for The Wabash are at Work

Surveyors in charge of a skilled engineer are making surveys for a tunnel through the Blue Ridge Mountains for the Wabash Railroad's fast passenger and heavy freight trains. Members of the survey corps are now at work in the vicinity of Blue Ridge Summit, While several initiatory surveys have already been made for such a piece of railroading, the one now in progress will be the most complete and exhaustive of any yet undertaken. The purpose of the proposed tunnel is to avoid the big grades that make it impossible to haul heavy freight trains over the mountain Light, Heat and Power Company was or to make fast time with passenger

The Dally Bread Problem.

There are many ways of making bread. Every woman has her own particular method, but the rule of all is;-"good yeast, good bread." Most bread troubles vegetation. The planting of corn will can be traced directly to the yeast, for stale yeast can never make light palatable, nutritious bread.

Yet the majority of housewives are compelled to make their bread with yeast which has probably been lying on the grocer's shelf for weeks-lifeless

The modern method is to have your houses are nearly all newly painted and yeast sent every baking day, just as you want it. It comes direct from the factory-clean, pure and fresh. A simple method of supplying yeast in this manner has been worked out by the Fulton Yeast Company of Richmond, Va. This is certainly a boon to every woman who values the health and happiness of her family.

This yeast has been on the market for twenty-five years and is well known in this locality. The makers however, will send free samples of Fulton Yeast and room, or rather a summer kitchen, to explain their plans more fully to all who address them at their factory.

It spreads itself over an irritated and angry surface, relieving immediately the painful inflammation, cleanses and cures. Cream Balm quickly cures the cold.

Children Panle-Strikeh.

A portion of the roof on the west side of the school building, York Pa., caved in Monday morning, and, had it not been for the presence of mind of Miss Carrie Bennett, the teacher, a panic might have ensued. When the ceiling began to erumble the children were panicstricken, but were kept nnder control and were gotten out of the building in safety. The falling of the roof is supposed to have resulted from alterations that had been made in the building several years ago.

The Daily Bread Problem.

There are many ways of making bread. Every woman has her own particular method, but the rule of all is;-"good yeast, good bread." Most bread troubles can be traced directly to the yeast, for stale yeast can never make light palatable, nutritious bread.

Yet the majority of housewives are compelled to make their bread with yeast which has probably been lying on the grocer's shelf for weeks-lifeless

and totally unfit for leavening bread. The modern method is to have your houses are nearly all newly painted and yeast sent every baking day, just as you want it. It comes direct from the factory-clean, pure and fresh. A simple method of supplying yeast in this manner has been worked out by the Fulton Yeast Company of Richmond, Va. This is certainly a boon to every woman who values the health and happiness of her

family. This yeast has been on the market for twenty-five years and is well known in this locality. The makers however, will send free samples of Fulton Yeast and room, or rather a summer kitchen, to explain their plans more fully to all who address them at their factory.
