Filtration and Boulevard Jobs.

Philadelphia, Oct. 30.—The report of Witte appears confident. He has be appointed last July by Mayor Weaver to examine the filtration system of the Boulevards, now under construction, which report was submitted to the mayor Saturday, has been made public. It is signed by Major Cassius E. Gillette, of the United States Engineer Corps, who investigated the Savannah harbor frauds, and John Donald Maclennon, of Washington, D. C. The report shows that up to date the city has lost through excessive costs, collusive bids, illegal advertising and in more than \$18,000,000 that have been John W. Kelly and Vare Brothers.

The officials held responsible by the are John C. Haddock, who was direc- ney troubles tor of public works under Mayor Ashbridge; Peter E. Costello, director missed him, and John W. Hill, former | ington. chief of the bureau of filtration, who tion with the construction of the filtra- to 10 years in prison. tion system. Te report says:

we find that for the filtration work and | railroad at Fairfield, Ia. the two boulevards as constructed up to date, the city has paid or pledged legitimate contractors' profits. The reserve. difference is \$6,330,000. In other words \$13,760,000 in round numbers has been paid for work costing the contractors

Where It Went To. "Of the \$6,330,000 excessive cost worked under the name of D. J. Mc of \$110,000. Nichol, \$5,065,122; similarly to Ryan & Kelley, \$543,890, and to Vare Brothers, \$89,128. Of the \$18,761,541 there read at Sing Sing prison December 18 for mains unpaid about \$568,000 to Mc-

If the customer be willing to pay for is made to fit perfectly is as responsive

A well known maker claims that he has fitted a wife with one, who wore it hour later the outlines of the cruisers a piece of white frilled paper decorating the shank, which the carver held to further and says that he knows of one case in which both husband and wife have a glass eye without the knowledge one of the other.

It might be thought that a glass eye would last practically forever, but the maker says this is not the case; that some persons wear out an eye sooner than others do. He attributes that to the fact that some eyes secrete fluid more actively than others. The fluid acts on the artificial eye as acid does on metal, and the surface becomes roughened or corroded. Then inflammation sets in, and it becomes necessary to get a new eye.

Died Of Exposure.

An nuknown white man who for several days was lying in the woods near Bacon Hill, Cocil county, was taken to Elkton Jail Sunday and died Monday morning of exposure. When found he years of age.

Nature needs only a Little Early Riser now and then to keep the bowels clean, the liver active, and the system free from bile, headaches, constipation, etc. The famous little pills "Early Risers" are pleasant in effect and perfect in action. They never gripe or sicken, but tone and strengthen the liver and kidneys. Sold by T. E. Zimmer-

Bright Students. His students were one year and a # if removed from their preparation in catamice. Out of 186 fifty-three goald not tell when Shakespeare lived, org'n either the sixteenth or the ventcenth century would have been as correct. Two students the fourteenth, seven in the fiftocath, twenty in the eighteenth and four in the nineteenth century. Sixtion statents did not attempt to assign him at all.

And not know in what century Milton good qualities, cement floors are strong- ter set in this grower hauled manure lived. He was assigned to the elevcuth, fourteenth, fifteenth, sixteenth, glitcenth and nineteenth centuries. Fifty-four placed him in the eighteenth century, which the student by the entrance requirements is obliged to know better than any other period. Eightyseven did not attempt to assign him to any century.

One hundred and twenty-seven students did not know who Samuel Johnson's biographer was, 103 not trying to assign a biographer and twenty-four assigning the biography variously, one with a bright idea to "Himself."-Jeannette Marks in Critic.

A New Muse. A group of clubmen of real or supposed literary tendencies had been testing their memories by trying to recall and name all the plays of Shakespeare. All of them having failed in this, they essayed a simpler test-to wit, the naming of the nine muses. One of the group began. "Clio," said he. "Clio-one," said another. "Erato," said the first. "Erato-two," chimed the second. "Euterpe." "Euterpethree." "Calliope." "Calliope-four." "Terpsichore." "Terpsichore-five." A ed number two. Another pause, and were used. then, "Oh, yes; Thalia." "Thalia," assented the other; "well, that makes seven." A long pause. "I'm two shy," | the door in the opposite corner. asserted number one finally. "Imetoolymnia and Urania at his expense .-

Soluble glass is used as a solvent, ten parts of this to ninety parts of water being the proportion. A series of interesting experiments in color, brilliancy and consistency are made by adding bisulphite of carbon in the proportion of twenty-five parts to 100 parts of the solution. Benzine may also be added, with the effect of changing the arrangement of the colors and varying their intensity,

Love of Order and Kindness.

The two essential instincts of humanity are the love of order and the love of kindness. By the love of order the moral energy is to deal with the carth, and dress it, and keep it, and to deal with all rebellions or dissolute forces in lower creatures and in ourselves. By the love of kindness the moral energy is to deal rightly with all surrounding life. So shall every passion, have full strength and yet be absolutely under control.-Ruskin,

' WINTER KILLING.

Observations on Losses In the Peach Belt of Lake Erie. In the Lake Erie peach belt of Ohio, which suffered great losses during the prolonged cold of the winter of 1903-04, it was observed by horticulturists investigating the matter that there was a marked contrast in the extent of the winter injury on bare soils-soils given clean cultivation-and on covered soils. The bare soils froze deeper, and the At the present time there is no floor injury was much greater than on soils

Benefits of Banking.

A simple, easy and very effective crete, nor can as good sanitary condi- method of preventing, winter killing of tions be maintained by the use of any peach trees was observed in the orto the orchard, but instead of scattering it beneath the trees in the usual way he banked a very few forkfuls immediately around the stem of the tree. When the supply of manure ran out peat or earth was hauled into the orchard and banked around the stem of the tree in the same manner. The results from the use of these materials were uniform, and, surprising at it may seem, every tree that received this simple treatment survived the winter without the least injury from cold, while the few trees and sections of rows left here and there unbanked and serving as "checks" in the experiment died al-
