CONTINENT TALK

Swap Jokes by Phone During Alumni Dinner.

GATHER IN MANY CITIES.

During Course of Evening Generals, Colonels, Majors, Captains and Lisutenants Exchange Greetings-New York Hotel Made Over to Represent Military Reservation on the Hudson.

New York.-From the Atlantic to the Pacific West Pointers recently celebrated the one hundred and fourteenth anniversary of the founding of the Mili tary academy at West Point. In New York more than 300 dined at the Hote! Astor, as many more dined in San Francisco, while about 200 sat about the tables in Chicago. In lesser numbers the sons of the Point gathered in St. Louis, in New Orleans, in Galveg ton, in San Antonio, while in far away Honolulu and Manila other hundreds assembled and sang the anthem "Hail Alma Mater, Dear," and yelled the fa mous "Rah! rah! rah!" of the "armay.

Through the courtesy of the Ameri can Telephone company the diners is New York, Chicago and San Francisco were linked together, and in the cours of the evening generals and colonel and majors and captains and lieuten ants exchanged greetings and cracked jokes at one another's expense across the continent. For instance, Colonel John N. Bellinger of Governors Island sympathized with his old cadet chum Holabird in Chicago because of the latter's thinning locks, while Holabird retorted by asking the South Carolina colonel why it was that his forty odd summers did not make him "less noisy than was the case when you were the

Major General J. Franklin Bell, commanding the western department of the army, with headquarters in San Francisco, who was the ranking officer at the Pacific coast function, talked with Colonel J. C. F. Tillson in New York and was surprised to learn that the colonel was not one of the "lucky chaps" chasing Villa. Had the United States kept Vera Cruz and had Frederick Funston remained in command there, General Bell, who was relieved | tion. a year ago of the border command by the little Kansan, would probably be directing operations from San Antonio.

noisiest youngster at West Point."

Brigadier General E. C. Young, who was also in San Francisco, asked Colonel W. H. Hart, who dined in New York, some very personal questions while General Charles King, the famous army novelist, who dined with the crowd in Chicago, was overheard by the New Yorkers to tell Colonel W H. Hunter, who was in Chicago, that he might write a story based on the pursuit of Pancho Villa. Lieutenant Phil Mathews of Fort Totten also got a word in and told Lieutenant A. J. Davis, who was in San Francisco, that West Point was sure to beat Annapolis

The grand ballroom of the Hotel Astor, in which the New York dinner was West Point.

again next fall.

Among those at the dinner were Colonel C. P. Townsley, the superintendent of the Military academy: Major General George W. Goethals, governor of the Panama canal zone: Colonel John L. Chamberlain, inspector general of the eastern department; Colonel Edwin F. Glenn, chief of staff on Governors island; Captain Halstead Dorey, aid on the staff of Major General Leonard Wood; Colonels C. P. Echols, Samuel E. Tillman of the academic staff of West Point; Colonel O. B. Mitcham and Major W. I. (Texas) Westervelt, the ordnance experts from Sandy Hook: ex-Police Commissioners Theodore A Bingham and Douglas I. McKay, Captain Matthew B. Hanna, Brigadier General H. F. Hodges, commanding the North Atlantic coast artillery disrict; Colonel John M. Carson, Captain George R. Goethals, Captain H. J Koehler, Colonel C. M. Truitt, Colonel W. G. Haan, Colonel Beverly W. Dunn. Loyal Farragut, Major W. J. Hawkins. Colonel Delamere Skerrett, Captain G W. Beavers and William C. Muschenheim, the last named the only diner

Papa and Great-grandfather.

from civilian life.

Lafayette, Ind. - Not many greatgrandfathers can boast of having a bouncing baby daughter, but Fred Landes, a farmer northeast of Lafayette, holds this record. Landes. who is a civil war veteran, seventyfour years old, was for many years a widower. A year ago, however, he marriell a young woman he had known for years. A baby daughter was born to them. Landes has a great number of grandchildren and one great-grand-

WEST POINTERS IN RELATES HARDSHIPS IN PURSUIT OF VILLA

Indian Scout Says Difficulties Face U. S. Army.

Denver.—Some of the difficulties that face the United States army in its pursuit of Villa were told here by James H. Cook, who in 1885 was chief scout for the Eighth United States cavalry that crossed into Mexico and captured Geronimo, the Apache chief. He led the American soldiers over much of the country the United States soldiers must cover to get Villa. He

"A veritable zone of death will have to be traversed by the American troopers. They will have to go over some of the worst country in the world. If Villa chooses he can fight as Geronimo and his followers did-go back into the mountains, kill his horses, scatter on foot and pick our soldiers off one by one from behind rocks. It may take us months, even years, to get Villa.

"But no men on earth are better for the task than the officers in charge of the American expedition. I personally know Lieutenant Colonel D. C. Cabell, now chief of staff to General Pershing. He was with me on the Geronimo expedition and knows the country as well as any white man.

"The aeroplane will assist our troops in the campaign, but it cannot match with all the difficulties of the region. Between the peaks are deep canyons. sometimes 1,000 feet deep and less than forty feet wide. These ravines cannot be crossed by any except the old Indians of the country. They can get over on foot.

"The only thing that makes the expedition look hopeful to me is my faith in the men who command it."

HEIFERS FOR FIFTY BOYS.

Illinois Bank Is to Lend Stock to Farmers' Sons.

St. Louis.-Fifty boys in and near Brighton, Ill., will have an opportunity given by the First National bank of Brighton to earn some money easily and at the same time learn something of stock breeding.

Thomas Chamberlain, cashier, will go to Wisconsin and buy fifty Holstein heifers. They will be taken to Brighton and distributed among the boys. their parents going security for the animals. The heifers will be bred, and the next fall they will be sold at auc-

All the money in excess of \$40 that the animals bring will be given to the boys who have cared for them. The bank figures that this will also have a good effect on the grade of milk cows in that neighborhood.

OFFICE FOR EACH CITIZEN.

California Town, With Nine Men, Has Nine Jobs to Fill.

Coram, Cal.—This town, the smallest in the state, has a registered population of twenty-one, and only nine of these are men. C. W. Baker, a town trustee, does not want to run again, as he is justice of the peace of Keswick township and has honor enough. The other men have all consented to accept the offices, of which there are nine.

No nomination petitions have been served, was made over to represent filed. The election on April 10 will be conducted on the "write in" plan. Women will sit on the election board, as it is against the law for candidates to conduct an election.

Mayor George O'Grady is mining at present in Siskiyou county with his partner, City Clerk Kinyon. The city marshal and city treasurer are both

The only source of revenue is the \$25 a quarter license collected from each of the two saloons. The money is ample, for there are funds in the treasury and there are no debts.

COWS WEAR DRESSES.

Made of Hemp Cloth to Protect Them From the Cold.

San Francisco. - An authority on dress and its cut for dairy cows is a guest at the St. Francis, in the person of Sir Francis Webster of Glasgow, a wealthy manufacturer of hemp goods in Scotland and the owner of a stock range in Texas embracing 1,500,000 acres and thousands of head of stock. Sir Francis' cows are dressed regu-

larly every winter in suits of hemp cloth made at his own manufacturing establishment, to protect them from the cold and snow, minimize the dangers from tuberculosis and increase

their daily yield of milk. Each cow has two suits a week. They are not elaborate dress affairs by any means, with lingerie and all that. It is a man made dress of one piece, or simply a coverall blanket that fits loosely.

This, of course, means added expense, but the yield of milk during the cold weather is about 27 per cent gin over again. I'm going away off. larger than from cows not similarly though, not back to the old farm.' protected

FOR SCHOOLBOYS

Youngest Army Ever Called Mcbilized In New York.

OFFICERS TALK TO YOUTHS

Preparations Being Made by Association to Accommodate 15,000 Boys at a Camp During the Summer-Many Prominent Men Have Their Sons Enrolled-General Wood Co-operates.

New York.—The youngest army ever called together was mobilized recently. One thousand New York schoolboys. aged twelve and up, met at national guard armories in Manhattan and Brooklyn to enroll for the big summer camp which is being organized by the National School Camp association of

The regiment which answered the call to the colors is but the first group of what is expected to be the largest schoolboy organization in the city Preparations are being made by the association to accommodate as many as 15,000 boys at the camp during the summer.

The meetings were held with the approval and co-operation of Major General Leonard Wood, who detailed of ncers under his command to be present at the armories and talk to the boys

enlisting. The largest and most enthusiastic meeting was held at the Twenty-third Infantry Regiment armory on Bedford avenue, Brooklyn. Fully 600 boys en rolled and cheered Captain T. E. Mur phy of Fort Wadsworth, who spoke to them. The officer told them of the advantages of preparedness. He narrated the military history of the country, giving examples of how heavy price was paid for lack of prepared

Many prominent men attended the meeting to enroll their sons. Colonel Chamberlain of General Wood's staff brought his boy to stand in line with the sons of Colonel Mitcham, also of General Wood's staff, and of Lieutenant Commander Jessup of the Brooklyn navy yard.

A number of the faculty of the Brooklyn Polytechnic institute also was present. There is a plan under way to organize a battalion in the in- and divide equally all their earnings. stitute to attend the camp.

trolley distance of New York has proved a most popular one. Hundreds of boys have had their applications filed a considerable time, while hundreds of parents have also written the association asking permission to enroll their

The camp will probably be located on Staten Island, though the site has not yet been definitely picked. It will be a gunless camp; but, aside from this detail, the work will follow close ly that done in grownups' organizations. Any boy over twelve in public school, high school or college is eligible to join. It is expected that a corps will be formed of medical students, who will have a splendid opportunity to study the important subject of camp sanitation.

The camp will open July 1 and will be held for two months. Boys may remain there from two weeks to the entire two months if they choose. The entire cost to each boy will be about 20 cents a day. Each young soldier will have to supply his own uniform, which will be similar to that of the boy scouts.

The incipient soldiers will be put through a stiff course of training in general field work, open order work and the other regulation army drills. In the meantime, before the camp is opened, the enrolled members of the camp will drill several days every week in the city armories.

JAIL BETTER THAN HOME.

Kruse Paid to Stay There Rather Than With His Relatives.

Chicago. - August Kruse, who for five years has been a voluntary inmate of the Du Page county jail at Wheaton. Ill., rather than live with relatives, who doubted his sanity, told the sheriff he was going west to live on a farm.

Kruse paid the county \$1 a day for the privilege of living in the jail. In 1906 a petition to have him declared insane was heard in the county court. He was found to be sane, but would not return to his home, and after five years' absence returned to Wheaton and arranged for quarters in the same jail to which he had been taken years before.

"I want to get back to the farm," said Kruse. "I sit here and think o what I used to do, and I'm going to be-

ATTRIBUTES HER LONG LIFE TO SWEET DIET

Woman, Ninely, Begins Meals With Dessert.

Melrose, Mass. — Mrs. James Rodie celebrated her ninetieth birthday anniversary several days ago. She is in excellent health and attributes this fact to an astonishing diet that consists largely of chocolates, puddings. fruits and other sweetmeats.

Mrs. Rodie was personally conducting the frying of a batch of five dozen doughnuts when the reporter called at her home. While in conversation with him she ate several hot doughnuts, and upon being asked if she was troubled with indigestion she replied that she had relished dainty foods more in her old age than when she was young.

She is known as the "spry old lady of Melrose," and every morning during good weather she takes a walk of two miles or more just for a "little exer cise," as she terms it. Mrs. Rodie is a zealous worker and exhibited for the reporter's benefit over twenty-five fancy woven knit table pieces that she had completed since last fall. She also as sists her daughter-in-law, with whom she lives, in the general housework. and twice a week she dusts all the furniture in the house.

Mrs. Rodie has an excellent appetite Every morning she has cake and coffee for breakfast, sometimes eating a little oatmeal. Her daughter-in-law told the reporter that Mrs. Rodie always eats her dessert first and that if she is hungry she will eat a little meat. She eats on the average a box of choc olates a week

Mrs. Rodie is a fresh air enthusiast and has not slept in a room with any of the windows closed for over sixty years. She is also a firm follower of the "early to bed and early to rise" rule, for she retires every evening at 7 o'clock and is up bright and early at 6 o'clock the next morning.

PROPOSE MARRIAGE TRUST.

Indiana Justices of the Peace May Get Together Upon Ceremonies.

Jeffersonville, Ind.-Some of the six justices of the peace of Jefferson, who fight among themselves for "marriage couples," are proposing a combination whereby all six would establish central marrying parlors and would pool

The chief benefit would be the elim-The idea of a great camp within ination of the "runners," with whom the justices now split their fees, which only in exceptional cases amount to more than \$3. One result of the competition has been the cutting of fees Many eloping couples now get married for \$1. Secret weddings generally cost the elopers a little more, and a twenty five dollar fee shows up once in awhile

OLD INDIAN LEAVES HOSPITAL

Chief, Over 100, Was More Comfort able on Floor Than In Cot.

Cass Lake, Minn.—Captain John Smith, the aged Chippewa Indian chief, a well known character in this portion of Minnesota, who was struck and badly injured by a Great Northern locomotive in the yards here recently has left the hospital and gone to the home of a son.

The venerable Indian, reputed to be 117 years old, making him by far the oldest man in Minnesota, if not in the United States, grew better from the very day he was carried in an uncon scious condition to the hospital.

As soon as he collected his senses he declined to remain on a hospital cot. Office Discontinued Because No One and made the nurse fix up a bed for him on a blanket on the floor, where found contentment. He also called for his pipe and tobacco and, because of his age, was humored. He smoked constantly and rapidly grew better, as it developed that while he had been bruised and shocked, he had not been seriously injured.

TWINS AND BURGLARS.

Latter Left When They Found the Stork Had Come to the House.

Kansas City, Mo.-Because the stork and burglars selected the same time to visit M. H. Brotherson of No. 644 Ohio avenue, Kansas side, the burglars had to withdraw and postpone their visit The stork left twin boys. Mr. Brother son now is the father of six children.

Mr. Brotherson hastened to his stor next door to summon a doctor at a. m. He hurried in, picked up the telephone, and as he jiggled the receive er nervously he heard a noise in the rear of the store.

"Come quick!" he said over the wire

The noise increased, and something fell. He stepped out the front door quickly locked it and hurried home. The twins having arrived safe and went back to the store. The back door of boxes over turned.

STEPS ARE TAKEN TO AID RED CROSS

Name E. A. Moree, Director of Atlantic Division.

MORE MEMBERS ARE SOUGHT

One of New Appointee's First Dutics Is to Assist In Organizing New Chapters-Moree Lately Has Been Actively Engaged In Field of Public Health His Division Covers Large Area.

Washington.-Ernest P. Bicknell, director general of civilian relief of the American Red Cross, amnounced the appointment of Edward A. Moree of Yonkers, N. Y., as director of the Atlantic division of the Red Cross, with headquarters in New York city.

In announcing the appointment Mr. Bicknell said that filling the post is one of the steps in the campaign of the Red Cross for a million members and that one of Mr. Moree's first duties would be to assist in organizing new chapters and in campaigning for new members of present chapters.

The Atlantic division of the Red Cross is east and south of the Ohio river and east of the Mississippi river (this includes twenty-one states) and has a population of nearly 50,000,000 persons

To accept the position Mr. Moree resigned as assistant secretary of the New York State Charities Aid association. He was a member of the association's staff for six years. As director of the extension work and later as as sistant secretary he assumed an important part in organizing the tuberculosis movement in that state. His chief interest and activity in recent years have been in the field of public health.

He served as assistant to the secretary of the commission which three years ago investigated the public health situation in that state and had much to do with framing and in securing the passage of the health law under which the New York state department of health was reorganized by Dr. Hermann M. Riggs. Mr. Moree is now advisory expert in public health education in that department. He has been a frequent speaker before state and national health organizations on chewed up, so much so that it was the subject of public health organization and legislation.

Mr. Moree was New York state manager of the Red Cross Christmas seal sale the first two years that the State Charities Aid association conducted the sale on a state wide basis. He mapped out the plan of campaign and organization which has since been followed with few changes in the state and which has been adopted, in many of its chief aspects, in many other states in the union.

Previous to entering social work Mr. Moree was in the newspaper profession, serving in many capacities on various New York papers. Going to New York from Elmira, Mr. Moree took the position of editor of the educational department of the Brooklyn Eagle. from which position he went to the New York Tribune as New Jersey editor. After four years' service with the Tribune he resigned as night city editor and started a newspaper in Geneva. N. Y., but later entered social work with the Russell Sage foundation.

WANTED, A POSTMASTER.

For the Job Could Be Found.

Marinette, Wis. - The postoffice at Washington Harbor, Door county, has been discontinued for the reason that ill health prevented the postmaster L. P. Ottosen, from performing his duties, and he resigned.

Uncle Sam made every effort to get a man to replace the postmaster, without success. The job was not only of. fered to several, but advertisements were inserted in Door county papers offering the place to any one who de sired it, but without success.

The postoffice, which literally went begging, had to be discontinued because no one would take it. The mail patrons will be supplied by rural delivery from Detroit Harbor, but the people are parting with their postoffice tuefully, because it gave them a gathtring place and, as one man put it. "lent dignity to the village."

Saffron as a Perfume.

It seems strange to us today to read of saffron as a perfume. But such it undoubtedly was almost universally, and the element of "romance" about it lies in the story told by Hakluyt of a pilgrim smuggling, at the risk of his life, from the Levant a head of saffron sound and the excitement abated, he in a hollow made in his staff, from which grew the plantation which gave was open, some sacks gone and a pile its name to Saffron Walden.-London

WILL TRY TO ABOLISH OFFICE IF HE GETS IT

Platform of Alabama Man Who Seeks Election.

Birmingham, Ala.-Dr. John S. Gillespie, who was court clerk in this county for twenty years, is out as candidate for county treasurer, announcing as the chief plank in his platform conviction of the uselessness of the office and declaring his purpose to do everything in his power for its abolishment. It is the first time in the history of the country, so far as known here, that a candidate for public office

has run on a platform to abolish it. Mrs. Floribel Brown Ohme, one of the best known educators in the state, is a candidate for membership on the Jefferson county board of education. She is the first woman in the south, so far as known here, to become a candidate for an elective public office. Women cannot vote in this state. She is relying on the men to elect her, and her prospects for success are generally regarded as highly favorable.

James A. Mitchell, a prominent lawyer of Birmingham, recently published an article severely criticising the state supreme court for its ruling on a case he had conducted before that tribunal, and strongly intimated that the court was unduly influenced. For this he was cited to appear before the court and show why his license to practice before it should not be canceled. He answered this summons by announcing himself a candidate for chief justice of the supreme court, which is filled in this state by popular election.

WOLVES CHASE MESSENGER.

Duluth Youth Breaks Record When Pursued by Wolves.

Duluth, Minn.-Simon Morgan, nineteen years old, a telegraph messenger boy, recently broke all messenger boy speed records.

Morgan lives at Duluth Heights and gets through work at 1 a. m. When within a block of his home he heard a patter of feet on the frozen walk behind him. Two gaunt timber wolves with blazing eyes were following him. Morgan speeded for the woodshed and slammed the door shut as the night

prowlers dashed against it. A friendly dog, hearing the disturbance, interfered and was considerable killed later. Clarence Johnson, a neighbor, raised his window and emptied both barrels of a shotgun at the wolves, putting them to flight.

SAY HIDDEN GOLD IS MYTH.

California Travelers Find No Treasure In Patagonia.

San Francisco.-Hidden gold in Patagonia, to which Captain Thomas Owen: was to lead the band of adventurers on the schooner Academy, was a myth, according to four members of the ill fated expedition, who returned to San Francisco on the Pacific mailer Newport from Balboa. They said that Owens' real name is John Owen Whoffer, that he was a poor navigator and that for three and a half months they sailed aimlessly around the Pacific until they finally reached the Colombian

The Academy left San Francisco June 21 of last year bound for Patagonia, where Captain Owens said there was gold that rivaled the wealth of the Incas. With him were several Californians who had invested in the enterprise with hopes of great gain.

Eugene L. Haile, H. E. Schuck, William Simms and H. F. Radke, who came home on the Newport, were authority for the statement that Owens was incompetent, that he tried to turn the Academy back to San Francisco and that he proposed to sell the schooner in Callao and buy a tug to take them to the fabulous mines.

TAMES WILD DUCKS.

Madison (Wis.) Resident Has a Flock of Nearly 200 of Thom.

Madison, Wis.-Wild ducks may be domesticated and raised on the farm as well as tame ones. The plan has been tried by J. C. Halpin of this city for the past three years with success.

Last fall he had a flock of nearly 200, and when the cold weather came on they took their regular "spin" in the skies and then returned to the yards. The wild duck sells for more than the tame variety because of the flavor of

the meat. The first birds were kept in captivity by clipping the wings, but the young ducks are as easily handled as domestic ones.

These domesticated mallards retain many of the instincts peculiar to wild nature. Let one mallard start limping and in less than ten minutes, unless something is done to attract attention elsewhere, a majority will be limping.

SEND FOR USED CAR BULLETIN

People are more and more coming to appreciate the fact that there is vastly more actual service and actual automobile value to be obtained in a high-grade used car than in any new car which could be bought for the same amount of money.

The new used-car Bulletin gives prices and details of cars for \$250 and up. Any of these cars can be bought with full confidence that they are exactly

LUCY P. DORER, vs. RALPH DORER

No. 9437 Equity. In Equity. The object of this Bill is to procure a

divorce a vinculo matrimonii by the plaintiff, Lucy P. Dorer from the defendant, Ralph Dorer. The Bill states in substance that the parties were married in the State of Maryland, at Hagerstown, on October 13th, 1910: that the plaintiff is a resident of Frederick County, Maryland, where she has resided for more than two years past and that the defendant Ralph Dorer's whereabouts is unknown: that no children are living as a result of said marriage; that the defendant Ralph Dorer has abandoned and deserted the plaintiff for more than three years and that such abandonment has continued uninterruptedly for more than three years, and the bill prays for the general relief and for process.

It is thereupon this 14th day of March, A. D. 1916, by the Circuit Court for Frederick County, in Equity, ordered that the plaintiff give notice to the said adult non resident defendant, Ralph Dorer of the object and substance of this bill by causing a copy of this order to be inserted in some newspaper published in Frederick County, Maryland, once a week for four successive weeks prior to the 15th day of April, 1916, warning him to be and appear in said Court, in person or by solicitor, on or before the 1st day of May 1916 and show cause, if any he has why a decree ought not to pass as prayed.

ick County. True Copy Test ELI G. HAUGH. Clerk Reno S. Harp, Sol.

ORDER OF PUBLICATION

EMMA VIRGINIA HARRIS, vs. FRANCIS 4. HARRIS.

The object of this Bill is to procure a divorce, a vinculo matrimonii, for the complainant, Emma Virginia Harris, from the defendant, Francis A. Harris. The Bill alleges that the complainant and defendant were married on the 8th day of September, 1902, at Frederick, Maryland, by Rev. Dr. Engle, a minister of the gospel; that two children a son, Aubury H. Harris and a daughter Margaret B. Harris, were born to said WISH TO BE RELEASED FROM Margaret B. Harris, were born to said marriage; that the complainant is a resident of Frederick County aforesaid; that the defendant is a non-resident of the State of Maryland; that the defendant without cause has abandoned and deserted the plaintiff; which abandoned and deserted the plaintiff are plaintiff. ant without cause has abandoned and deserted the plaintiff; which abandondeserted the plaintiff; which abandonment has continued uninterruptedly for more than three years; that it is deliberate and final and beyond any reasonable expectation of reconciliation. The Bill prays that the complainant be divorced a vinculo matrimonii from the defendent Francia A. Henrie and that defendant, Francis A. Harris, and that she be given the right to resume her maiden name Emma Virginia Hooper, and the care and custody of the said children of the marriage and for general relief and an order of publication against the defendant, Francis A. Har-

It is thereupon ORDERED by the Circuit Court for Frederick County, sitting as a Court of Equity, this 14th day of March, 1916, that the complainant cause a copy of this order, together with the object and substance of the Bill to be inserted in some newspaper published in Frederick County, Maryland, once a week for four successive weeks, prior to the 15th day of April or by Solicitor, on or before the 1st day of May, 1916, to show cause, if any he has, why a decree should not be passed as prayed.

LEGORE COMPROMISE Agreement Reached With Frederick Commissioners in Baltimore Wednesday.

County Commissioners Stevens, Mohler, Witter, Humm and Huffer, with their attorney, D. Princeton Buckey, returned from Baltimore, Wednesday night and anounced that they had arrived at an agreement with James W. Legore, through his attorney, William M. Mohler, for the settlement of the longstanding dispute over the Legore bridge and roads. Under the agreement Frederick county is to pay Mr. Legore for his property, while \$30,000 more is to be given him out of the Shæmaker state road fund due this

Mr. Legore has been trying to secure a settlement for 10 years or more. He held out for several hundred thousand dollars for the property, but this year dropped to \$60,000.

The bridge is a large stone arch structure. An act of the legislature of 1904 authorized its contruction, work to help us do the work. at that time having already been inaugurated.

Boyle Bros, have Ryde's celebrated calf's meal. It starts the calves to growing right away. Be sure to try mar. 31-2ts.

A well-known fruit grower has predicted that there will not be as many peaches in some South Mountain orchards this year as there were bushels that went to waste last summer.

NOTICE.

SPECIAL MEETING OF COUNTY COMMISSIONERS.

Frederick, Md., March 13, 1916. The County Commissioners will meet at their office at the Court House on MONDAY, APRIL 3, 1916,

at 9.30 o'clock a. m., and will continue in session three weeks to hear appeals from assessments, assess new property, consider pension applications and for the transaction of general business.

ARBOR DAY

Letter From Governor Harrington To The Children of Maryland Urging Them To Plant Trees.

March 17th, 1916. TO THE CHILDREN OF MARYLAND.

My dear Young Friends:-I am sure that you know that Friday, April 7th will be "Arbor Day" and that you know also that while it is not a legal holiday in Maryland, the day has been specially set apart by proclamation as a day for planting shade trees about our homes and along our public roads.

Most work of public interest in the State must of necessity be done by your parents and your grown up relatives, but the work which the General Assembly of Maryland thought important enough to direct the Governor to call to the attention of all our people by proclamation each year, setting apart little boys and little girls as well as big boys and big girls, can do, and I am writing you this letter, requesting you

If I could see each one of you in person and ask you to help me to do something for the welfare of our State, I am sure you would do it if you could, but as I cannot do that, I want you to regard this letter as a personal request from the Governor and I believe you will grant it. Our State is a beautiful State marks were as applicable to one as to and we all love it. We love its trees and flowers, its farms and rivers, and loving it, we want to do all we can to make it even more beautiful than it is.

Nothing contributes more to the beauty of our yards and roads than pretty trees, and if each girl and boy in our State will carefully plant a shade tree, in a place where one is needed, along a public highway, you will be helping to beautify our State and helping to make it a more pleasant place to live in. I request you to do this, and I hope that after it is planted you will take a pride in that tree, and that you will watch it as the years go by, and protect it from harm, and that you will do all you can to make it thrive and

If you will do this, it will be a pleasure after you have grown up manhood and womanhood, to regard the tree as your tree and to point to it with pride as something you have done that has preach? added beauty to the landscape and given comfort to the traveler.

I send a special greeting to you all, and I ask you to help us in this work to beautify the State.

Sincerely yours, [Signed] EMERSON C. HARRINGTON, Governor of Maryland.

MARYLAND DAY IN

THE FORUM

"Between the points of difference usually lies the truth, and open discussion never harms it."

[The Editor would have it understood that he is not responsible for the views expressed in communications addressed to him and published in The Chronicle.]

¶ No attention will be paid to anonymous communications.

To the Editor of the Chronicle; Kindly print the following in the Forum column:

"My Impression of Billy Sunday." Given for the benefit of those who will not be able to hear him, and to compare my ideas with those who have

Does he do good? If when you go to a special day for it, is a work which hear him you are perfectly satisfied with yourself, impervious as it were, and have no desire or intention of making a change, you will not be benefitted. Again, you so frequently hear that Billy Sunday reaches a "certain class" that would not be reached in any other way, this is supposed to be a profound and learned opinion, I am tempted to ask, "Which end"? The very poor and poverty stricken, or the very rich and fashionable class? Certainly his rethe other.

If a man has property, and important position he is apt to think that he has more latitude to do wrong. In fact he is so occupied with the material things of life, that he has little time for the spiritual, indeed he thinks that he should be excused from devoting much of his time to the work of Christ, but Billy Sunday doesn't think so. Do you?

Is Billy Sunday sincere in his work to do good, or is it a monetary proposition? The fact that he is well paid, is not an evidence that he is not sincere. When a physician renders aid to the sick, and insists on being paid, is it an evidence that he was not sincere and conscientious in the performance of his duty?

Is it not a fact that his work is arduous and if continued, the probability is that in ten years, he'll be a physical wreck? Is it wrong to lay by somεthing to live on, after he is unable to

Do his gesticulations make him appear foolish and like a monkey? As is so often said, not if you believe him sincere and in earnest. It is his way. The form of worship in the different de nominations, differs greatly. A true and sensible Baptist does not think an Episcopal Bishop a monkey-Why? Because he believes he is sincere. It is my opinion that he does a great deal LUCAL SCHOOLS of good. Has made many lives happier, I believe he has built up an organization that is phenomenal in the good that it does-he has enlisted thousands to help teach people how to live.

LIBERAL.

Dr. J. McPherson Scott Re-Elected.

Dr. J. McPherson Scott, Republican, was re-elected Mayor of Hagerstown Monday for the fourth consecutive term

P. Lane, Democrat. The proposition to issue bonds for \$750,000 for a sewerage system was carried by 616 majority, everyone of the

five wards giving a majority.

The new City Council will stand three Republicans, all of whom are holdovers, and two Democrats.

Jess Willard defeated Frank Moran in Madison Square Garden, New York, Saturday night, thereby retaining the heavy-weight championship of the world.

FRIDAY, MARCH 31, 1916

"A glance over the pages of history reveals to us that of all institutions which affect the wellspring of human activity the newspaper is perhaps the greatest."

THE CHRONICLE will be independent in politics, progressive in spirit and a champion of what it conceives to be right. Its columns will always be open for a dignified discussion by the people of any subject that may seem to them interesting, or that may in anywise be a benefit to the community at large.

Communications intended for publication in this paper, letters of a busiand all orders for Job Printing to be done at this office should be addressed to THE WEEKLY CHRONICLE.

FREDERICK COUNTY.

Frederick is next to the largest of the counties of Maryland. In population and wealth it ranks next to Baltimore county. In the fertility and productiveness of its lands it ranks among the first in the Union, and especially in the produc-tion of wheat. The area of this great county is 633 square miles. The great body of the people are of German, English and Scotch-Irish descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the greater part of the county is a val-ley of rolling lands lying between the Linganore Hills and the Catoc-tin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn .- Maryland Manual issued by Board of Public Works. .

EMMITSBURG.

In all Western Maryland-the beauty spot and the garden spot of the State—there is no town more attractive than Emmitsburg.

No people are more wide-awake, more knowable, more courteous to strangers than Emmitsburgians.

The location of Emmitsburg is ideal; the surrounding scenery is unmatchable; the climate is notedly healthful; its water--pure mountain spring water-cannot be surpassed. It is within easy access of Baltimore, Hagerstown, Frederick; eight miles from the National Battlefield at Gettysburg, near to the Mountain Resorts, and is surrounded by fertile farms and productive orchards.

Mount Saint Mary's College and Ecclesiastical Seminary-with an enviable reputation extending over 106 years-is located here; St. Joseph's College and Academy for young ladies-equally as noted during its 105 years of splendid acheivement-is also here.

There are excellent Schools-Public and Parochial-in Emmitsburg; two sound Banks, five Churches, a live Newspaper, modern Hotel accommodations, adequate Fire Department, progressive merchants, splendid physicians, good liveries, auto garages, many fraternal organizations, good railroad accommodations. There are four or five mails a day, telegraph, express and telephone service connecting all points; electric light and power, oiled

There is business to be had in Emmitsburg; there are Factory Sites availabe. If you contemplate changing your place of residence-come to Emmitsburg, Frederick County,

ARBOR DAY.

Says Whittier: Give fools their gold, and knaves their

power, Let fortune's bubbles rise and fall; Who sows a field, or trains a flower,

Or plants a tree, is more than all. Make barren all our wooded hills, denude the mountains of their stately trees; rob all the vales we know so well of their tender foliage-where then to us would be the beauty of the out of doors? Where would go the birds we love? In short where would be the chief charm in nature? And-more important, taking a very practical view of the matter-where would vanish the health and wealth stored up in all of these?

Mother Earth deals very bountifully with mankind, when man co-operates. When man fails in his duty to her and to himself, then does she teach a lesson and set a task that is hard.

"Arbor Day is meant to be one of the many educators of our time." Education, if it deals with books and what may be drawn from them, deals also with nature, with the wonders of ani- redeem its reputation for good mate and inanimate creation, ball playing Emmitsburg should and one factor most important to make unusual efforts to organize not dissipated.

GOVERNMENT CENSORSHIP.

The President's appeal to the news agencies to refrain from incorporating into their stories of please—is coming into his own; the Mexican campaign anything that might have a tendency to inflame the Mexican mind against the United States is perfectly reasonable. At this juncture it is in fact eminently expedient. The Mexican temperament is be to have found a bird after his nothing if not volatile. The own heart-that strange bird country is a hot-bed of insurrec- that "eats nuts" and "makes a tion, a sleeping volcano of anti- big noise." One instinctively stable government. The halfbreed loves a picturesque leader, and always with noise. a dare-devil exponent of rashness and assumed power, and above all an excuse to rally around him and espouse his cause, no matter whither it tends. The best of the real breed are suspicious, cunning and prejudiced against everything American. vinces one that the only real rag-

intensely susceptible to belief in newspaper rumors howsoever un founded. The unwisdom, the positive danger of embarrassing their Government ought to appeal to all right thinking newspaper services. Their innate patriotism should cause them voluntarily to refrain from publishing sensational stories and unfounded opinions anent the present situation. If they have no conception of implied responsibility; if dollars and cents and income-producing publicity are to them of the first and only importance, strictest government censorship should then be enforced. Biased, sensational and "inspired" newspaper stories are far-reaching and very unsettling in their effect. They add fuel to unfriendly flames; they create serious conditions at any time and they may produce at this particular time a state of affairs that may terminate disastrously for the United States troops at the front.

EMMITSBURG AND BASEBALL.

If for no other reason than to the welfare of mankind is the a fast nine this year. Two years tree. When Beethoven Played.

In that moment I could have sworn the pianist recame a little black man with a lion's head and eves that burned. The brow was ponderous with brooding, and the lips were straight with suffering. The ill fitting coat was cut as once long ago coats were cut with a high collar-humpy about the shoulders: trousers too ample. Then l saw again the wild, tossed hair, the gloomy brows and eyes that burned be neath with strange fires, and as he played the white keys faded and the great black sweep of the concert grand and the huge headed man stood quite alone, shaken by blasts of mu sic that were hot as passion, bitter a salt tears, penetrating as the infinite stars. "Heavens," said some one a my elbow, "that is Beethoven!" Ther the music stopped. I tell you it was still as morning, and a little, swarthy man grinned and bowed without hand to clap him for full ten deep breaths, and when it came, the barsh long rush of clapping hands, it seemed that great golden things were being smashed and let fall down jarring to the earth.-Exchange

Spiraeas Awaken Early.

Just as if it had an alarm clock awaken it, the spiraea opens its eyes i the morning before its companions as stirring. It's one of the earliest riser among the flowers, and you'll find often before the moon flower and oth er night bloomers have gone to bed It grows in the rich soil of wet val levs, often from three to ten feet high where it is called goat's beard. It tiny, creamy flowers are born in go! geous plumes. Its leaves are strongly veined and grow luxuriantly. Its seed are very small and shining. The plan bears its plumes of flowers proud! and well it may, for it is a near re tive of the aristocratic rose. But it through its early rising habits that w know it best. Long before sunris between the hours of 3 and 5 o'clos in the morning, it opens its petal Naturally it gets sleepy before the otl er flowers, which has given the goat beard the other common name of "g to bed at noon."-Philadelphia Nor: American.

Insect Travelers.

Ship cargoes are often responsible for the introduction of quite new spe cies of insects in different lands.

Banana bunches often hide poisonou reptiles and insects which travel londistances, only to bite or sting the hand of some receiver of fruit. Ofter they escape alive and breed their kind Many venomous snakes have thus been introduced into lands where none ex isted before.

Strange creatures have been import ed on the blooms of orchids, and West Indian insects have traveled in Easte lily blossoms. Destructive moths mi

grate in fruit ships. Flying insects often follow ships One curious case was that of a vesse from the tropics followed by a swarr of butterflies. Out of sight of the shore, they hid in the cabins and holds. emerging forty days later when the ship reached England. Thus originat ed quite a new species of butterfly ir the British isles.

Where Leap Year Is Legal. In Scotland the leap year privilege for women appears to have a legal foundation, for many years ago the following law was passed: "It is statut and ordaint that during the rein of his maist blissit Megeste, for ilk yeare knowne as lepe yeare, ilk mayden ladye of bothe highe and lowe estait shai hae liberte to bespeke ye man she likes: albeit he refuses to talke her to be his lawful wife, he shall be mulcted in ye sum ane pundis or less, as his estait may be; except and awis gif he can make it appeare that he is betrothit ane ither woman he then shall be free."-London Express.

Belgian Kongo.

Belgian Kongo, founded thirty years ago, is still in the early stage of development. So far practically no manufacturing industries have yet been es tablished, and, aside from the important copper mines in the Katanga district, the only large industrial enterprises are the railways and river trans portation services. It may be said that all business activities in the colony are devoted to the collection of tropical products - rubber, ivory, gum copal, palm oil and kernels, cacao, etc.-and the railway and river services are in reality only accessories to these activities, having been established primarily to aid in the transportation of these products to the seaports. The gathering of rubber in Kongo has never recovered its former activity, and in all probability will never again be so rich a source of income to the colony as it was previous to 1912.

His Opposite. "They say people with opposite char

acteristics make the happiest mar "Yes; that's why I'm looking for

girl with money."-Brooklyn Eagle.

Red, White and Blue Pigs. Connellsville, Pa.-W. E. Mier of Pennsville has a patriotic hog. With the thermometer registering 4 degrees below zero her hogship gave birth to ten pigs. Four are white, three red

and three blue.

Science and Nations. True revolutionists, believe me, the

real men of action, who are promoting truth and justice for the morrow, are scientists. Governments fall and pasaway; nations grow, shine with splen dor and decay. But what matter? The discoveries of science will go on, wil increase, will give mankind more and more light and certainty. The close of a century is a small matter; the march of human progress will always be resumed; human nature will insist or having knowledge, whatever may be the obstacles. It is foolish to object that we can never know anything; we have got to know all we can that we may attain the greatest happiness And therefore I say, How foolish are all the political disputes that excite nations! While the salvation of prog ress is supposed to be involved in the fate of a ministry, it is really the sci entist-the man of learning-who wil be the master of the future when he shall be able to enlighten men with a new spark of truth. All injustice shall cease when truth shall reign .- Emile

A Doctor of the Old School.

Doc Robinson never looked wise and kept things to himself about a case. He'd let one tell him every little symptom and listen respectfully, and he'd never go and whip out one of those surveying instruments and go all over a patient as if he were laying out a new state road. No! He'd crack jokes gossip delightfully and suddenly turn around and ask Margaret if that wasn' a brand new dress she had on, feed little peppermint candies to the chil dren and sit with several on his knee while he talked. He made his call a pleasant affair. Every one in the house enjoyed it and got the benefit of iteven the invalid. "Well," he'd say re luctantly, "Kit and I've got to jog along, though it's mighty comfortable sitting here by your fire. We gotta go 'way out on the Cider Mill road."-Helena Smith-Dayton in Cartoons Mag

The Habit of Saving.

The United States is thriftier than is is commonly given credit for being be cause statistics most frequently quoted do not give all savings deposits and be cause a vast deal of savings goes or outside of savings institutions. Yet it does not live up to its opportunities by a long way. One of the country' ablest business men said not long ago that any one could tell whether he was going to succeed or fail by his ability to save. If he could not save he could not succeed. At any rate, inability to save for a man with an income above the bread line and no unusual ill luck implies a lack of self control that is not conducive to success.

Like nearly everything else, it is matter of habit, and with a little de termination to begin with the righ habit is as easily formed as the wron one. Try it.-Saturday Evening Post.

Gladstone Never Prime Minister. Gladstone would probably have pro tested if any official document had de scribed him as one of the principal sec retaries of state, for he was keen or correctness in such matters. When giv ing evidence in a trial he was asked whether he was first lord of the treasury. He demurred at once to this de scription and explained that he was the office of lord high treasurer, "and I believe my name stands first on the list." In the same way it could be argued that Gladstone was never prime minister, for that post was first recognized officially eight years after his death. Sir Robert Walpole told the house of commons that he claimed no such title, and Lord North would not permit its use even in his own family -London Spectator.

Where Van Tromp Died.

Texel, the low lying island at the entrance to the Zuyder Zee, was the scene of much fierce fighting between Dutch and English in the seventeenth century. It was off Texel that one of the greatest of Dutch admirals, Van Tromp, lost his life in 1653 in an engagement with the British under Blake, and near the same spot, almost exactly twenty years after, De Ruyter was defeated in a desperate conflict with the British and French under Rupert and D'Estrees. On Oct. 11 1797. Texel again witnessed a heavy defeat of the Dutch, this time by Ad miral Duncan.-London Mail.

Briar Is Really Heath.

Brier pipes are not made from the wild rose brier. The name is a cor ruption of the French word bruyere (heath). The earliest brier pipes were introduced into England in 1859 and were made from the roots of the French white heath (Erica arborea). New York World.

Gravity is the ballast of the soul. which keeps the mind steady.-Fuller.

Poisonous Flowers

Flowers of the jonquil, white hyacinth and snowdrop all possess a poisonous nature, the narcissus being also particularly deadly, so much indeed that to chew a small scrap of one of the bulbs may result fatally, while the

juice of the leaves is an emetic. The berries of the yew have killed many persons, and it is known nowadays that it is not safe to eat many peach pips or cherry kernels at once.

The lobelias are all dangerous. Lady's slipper poisons in the same manner as does poison ivy. The bulbs seem to be the most harmful. Lilies of the valley are also as much so. There is enough opium in red poppies to do mischief, and the autumn crocus, if the blossoms are chewed, causes vomiting and purging.

The leaves and flowers of the oleander are deadly, and the bark of the catalpa tree is very mischievous. The water dropwort when not in flower resembles celery and is virulent.-Country Gentleman.

Cutting Off Noses.

Rameses II. of Egypt cut off the nose of any person convicted of treason or Actisanes, another Egyptian ruler, punished robbers in the same After each nose had been amputated back even with the bridge the culprit was sent to a colony of noseless felons, the place of banishment being known as Rhinoconum, from the nature of the punishment its colonists

had undergone In England in 1671 Lord Coventry, then "great keeper of the British seal." had his mose cut off by order of the king because he had dared to ask some questions about an actress then playing at Drury Lane theater.

A conscript who protested openly that he had been enrolled in the army of Frederick the Great in a fraudulent manner had his nose amputated by order of that sovereign, who spoke of the punishment as an "indelible mark on the front side of the face.'

Uses of Bicarbonate of Soda. Bicarbonate of soda should always be kept in an easily accessible place in the kitchen. Applied immediately to a burn and moistened it will relieve the

A pinch added to any fruits or vegetables will make them more palatable, and less sugar will be needed. Use a quarter of a teaspoonful to two quarts of fruit, fresh, or to one pound of evap-

Fill new cooking utensils with cold water to which one teaspoonful of soda has been added and boil it. Then wash the utensils with good soap and water, dry, and they are ready for use. Bicarbonate of soda added to the water in which old vegetables are cooked will make them green and fresh. It will also make tender a tough piece of stewing meat.

It will sweeten milk which is about to turn.-New York Sun.

Did as He Was Told. One evening, just as it was getting dusk, a laborer walked down the main street of the city. Coming to a poultry dealer's place, he stopped and gazed admiringly at the fowls and game displayed on the window slab. One turkey of about fifteen pounds weight took his fancy. After running his fingers through the coins in his trot sers pockets a few times he decided on having that turkey. Picking it up he entered the shop. The shopman was very busy. "Jest weigh this bird for me, will ye?" said he. "Why don't you take your bird somewhere else to be weighed?" snappily "eplied the poulterer without looking up. "Oh. I kin do that all right." he replied, cheerfully picking the bird up and walking out with it.-London Tit-Bits.

Bukowina's Stormy History. Bukowina, the Austro Hungarian province, has undergone sundry political transitions. According to many Austrian authorities, it was wrested from Transylvania in the tifteenth century by Moldavia, but it not long before that formed an integral portion of the latter state, to which it belonged until it was ceded to Austria by the Turks in 1775. Bukowina, which means "Beech Land." abounds in woodland and mineral wealth and rears large numbers of cattle and horses.-

GIVING ARBOR DAY A PRACTICAL TURN.

Systematic Planting for Reclamation and Improvement as a Substitute for Haphazard Work Careless-

ly Done and Soon Forgotten. The annual proclamation of the Governor reminds us that Arbor Day falls on Friday, the 7th of April. It calls on people irrespective of age or sex to aid the efforts which the State itself is making to set Maryland well up among the other States for its attractive homes, fine trees, and valuable forests.

Arbor Day, very unfortunately, is but one day in a year, and people have often remarked that if the enthusiasm and effort expended on that day toward the planting of trees and the conservation of forests might be distributed over the year as a whole, much good might be accomplished in a practical direction. Since obviously this is not, or cannot, be so, it remains to ascertain what steps may be taken to the end that the resultant benefits of one day's work may themselves be divided among this and many years, not failing in their effects through the cessation of enthusiasm and care too often prone to succeed the tree-planting of institutions and individuals on Arbor Day.

Since its formation in 1906, the State Board of Forestry of Maryland has been bending a good share of its energies toward inducing owners of waste land to reclaim them through a more profitable use. The State of Maryland is normally a fertile one, yet 11 per cent. of its total land area, 674,955 acres, are classified as waste lands at the present time. This is unfortunate, but none the less a fact, and lands once good enough to grow good crops of timber, later showing profitable returns when used for agriculture, have so far deteriorated through the direct effects of forest removal, erosion, and poor use as hardly to be fit now for anything, certainly not for farms. Only one crop is still available; that is of trees. For two years landowners of the State have had the opportunity of buying standard, well grown forest planting stock at cost. Many of them have, and a year ago about 80,000 trees were so disposed of. Pennsylvania grew and planted several million and though they are larger than we, the disproportion in size is infinitely less than that in planting. Other sections should not be more progressive than this, probably are not really, but something is needed to convert this subject of tree-planting from an admitted need to an accomplished fact.

Arbor Day affords an opportunity, and forest planting stock is still obtainable through the Board of Forestry at Baltimore. Such standard varieties as White Pine, Norway Spruce, Red Oak, Black and Honey Locust, White Ash and American Elm are for sale as little trees to persons, schools, and organizations at a low per thousand charge, averaging rather less than one cent each. Large quantities and single trees are sold, and the forest plantation is one which thrives under a minimum of cultivation and care. Full directions for proper planting accompany each order filled, and when desired expert assistance from the Office of the State Forester, Johns Hopkins University, is also supplied to formulate planting plans or execute

The planting season will commence on or before Arbor Day. Organizations or individuals who wish to give a practitrend to that day's work, combining attractiveness and utility, sentiment and business, cannot do better than by carrying it out in a systematic way that will later reflect their good judgement and prove an excellent investment. They should order trees at once.

Anniversary of Automobile Industry.

There was a very interesting story in the Baltimore News on Saturday evening to the effect that Friday last was the birthday anniversary of the automobile industry. Eighteen years ago on that date occurred the first recorded bona fide sale of an American-made motorcar-that is, not an experimental vehicle, but one of a regularly manufactured output. The purchaser was Robert Allison, a mechanical and mining engineer of Port Carbon, Pa., the purchase price was \$1000 and the car a single cylinder Winton phaeton. Mr. Allison was by no means a college soph, looking for a lark, when he invested in a horseless carriage, for he had already passed his seventieth birthday. At an age when most men are occupied chiefly with memories, Mr. Allison looked forward with keen enthusiasm to the perfection of the motorcar, and when he died, on February 3 last, in his eightyninth year, he had enjoyed a full reali zation of his expectations.

Tablets to First Governor.

Two tablets were unveiled on Maryland Day by pupils of two schools in Baltimore. One was a memorial to Leonard Calvert, presented to Leonard Calvert School, Orleans street, near Bond street, and the other a memorial to Governor Thomas Johnson, presented to the Thomas Johnson School, Johnson and Heath streets, by the South Balti-more Business Men's Association. Harry Kunnecke, president of the Association, presided at the unveiling and addresses were made by John M. Branin, Theodore E. Stacy and George M. Abrecht. A historical sketch was read by Mrs. Henry W. Rogers, a greatgranddaughter of Governor Johnson, and the tablet was unveiled by Mester. OF MUSIC, and the tablet was unveiled by Master Frederick, Md McPherson Dennis, his great-grandson-

MID-SUMMER STORM DOES DAMAGE ON MONDAY

Lightning And Thunder Accompanied by Heavy Downpour of Rain-Creeks Around Emmitsburg High.

Crippling telephone service, snapping off telephone poles and wires, up-rooting trees and causing considerable minor damage, a wind, rain, hail and electrical storm Monday afternoon swept over Frederick county, on the ities-plenty of them-if you eve of the fifth anniversary of the most destructive hurricane that Frederick county experienced in a quarter of a century.

The electrical storm according to "old timers" was one of the most severe to visit the county at this season for many years.

The current, sent out from the Security plant, Security, Md., fluctuated during the afternoon. On several occasions persons homes and offices supplied with current from the plant were

without lights for short intervals. At Middletown bail fell for several minutes. The storm was particularly violent in that section. The Monocacy stream according to reports rose about 10 or 12 feet. Water covered the road and traffic was practically at a stand-

still for sometime. According to reports in and around Emmitsburg no damage whatever was done by the storm excepting 6:45 p. m. that the creeks were extremely high. Wednesday, Prayer Meeting 7:30 p. m. Hail fell for a few minutes on Monday Saturday, Catechetical instruction 2 afternoon and the thermometer registered at that time 45°.

Double Track Between Pen Mar and Blue Mountain.

It is now learned on good authority grading is finished for the doubletracking of the Western Maryland main line between Blue Mountain House and Edgemont, work will immediately begin on a similar operation for the section of the road between Pen Mar and Blue Mountain House, says the Waynesboro Herald. The long siding at Pen Mar now runs as far as the big cut below the Pen Mar observatory, and not much additional track will have to be put down in the doubling process.

BEHIND the humor in this drawing we can read a little MORAL. Many folks are as SOFT as the snow man when the SUN of PROSPERITY beams down on them. They hold up a thin umbrella of GOOD INTENTIONS and cry: "See; we are playing safe. We're not spending more than we make." But the cloud SUDDENLY hides the sun. They are left a shapeless, melted mass. Then they are SORRY they didn't contract a steady, thorough BANKING HABIT.

It has long been in bad condition. The Taneytown road will be rebuilt between Granite school parsonage Saturday evening Apr. 15th.

Edwin Mummert, a teacher in the public schools of Adams county, was almost instantly killed on the farm of E. Layman. G. Allen Yohe, in Hamilton township, near Abbottstown, about 10 o'clock Saturday morning. The accident occurred when a large tree, which had been felled by Mummert and his brother George, turned over while being trimmed, and smothered the young man before assistance could be summoned.

When a dynamite cap, from which he was picking the charge, exploded, Raymond Lady, a son of Mr, and Mrs. Charles Lady, Gettysburg, had the greater part of his left hand torn to shreds Sunday about noon. The accident occurred in the parlor of the Lady home and the lad's mother was not more than three feet from the child when the cap exploded. The boy was in a serious condition from the shock.

William Grecht sprung a delightful surprise on the guests at a complimentary dinner given by himself and Mrs. Grecht to President and Mrs. J. A. Singmaster, of the Seminary, at Hotel Gettysburg one evening last week when he announced the gift of a new pipe organ for the Seminary chapel Gettys-

Another Question on Behalf of

CABELL BRUCE

Democratic Candidate for United States Senate

Is not W. Cabell Bruce, Democratic Candidate for the United States Senate, warranted in saying that in proposing Government Ownership of the telephone David J. Lewis is merely tendering to the Maryland farmer another gold brick like that tendered to him by the Greenback Movement, or by the Populist Movement for the issuance of treasury money directly to the Popula? the People?

The proposition of Mr. Lewis is that, if the Government were to operate the telephone in this country through the agency of its Postoffice Department, the telephone would be a more abundant and efficient, and a

A comparison between telephone conditions in this country and telephone conditions in Great Britain, France, Germany, Russia, Austria, Hungary, Italy and Spain—all countries in which the telephone is owned and operated by the Government—shows the utterly visionary nature of the idea.

As to Abundance

So pinched is the telephone development in these foreign countries, as compared with our own that the comparison need not be between the United States and them, but only between American cities and them. THERE ARE ABOUT AS MANY TELEPHONES IN NEW YORK CITY AND CHICAGO AS IN THE WHOLE OF GREAT BRITAIN AND IRELAND; THERE ARE MORE TELEPHONES IN CHICAGO THAN IN ALL FRANCE; MORE IN PHILADELPHIA THAN IN ALL OF RUSSIA; MORE IN BOSTON THAN IN ALL AUSTRIA; MORE IN LOS ANGELES THAN IN ALL ITALY; MORE IN PITTSBURGH THAN IN ALL HUNGARY. The United States have only one fifth of the population of Europe; it has The United States have only one fifth of the population of Europe; it has almost two and a half times as many telephones. There are more telephones in New York city than in London, Paris and Berlin combined; about as many as in all France. While the United States have nine telephones per 100 inhabitants, Great Britain has only one and a half, Germany only two, the Netherlands only two, Switzerland only two and France only four-sixths of one. THE UNITED STATES GAINED IN 1913 NEARLY ASMANY STA-TIONS AS GREAT BRITAIN HAD IN 1914 IN HER ENTIRE TELE. PHONE SYSTEM.

But most noteworthy of all is the hopelessly limited development of the telephone in rural communities abroad. The farmer to whom Mr. Lewis is appealing will probably think a second time when he is told that private management of the telephone in the Unit of States is the only agency that has ever in any substantial sense realized the dream of connecting every farmhouse with the city. About 60 per cent of our telephone development is found in exchanges of 300 stations or less Abroad, the average rural development of the telephone represents but 21 2 per cent. of the corresponding urban development. THERE ARE, OR WERE A SHORT TIME AGO, ONLY 2,300 FARMERS' TELEPHONES IN GREAT BRITAIN AND IRELAND; IN THE UNITED STATES THERE ARE SOME 3,000,000. There is practically a telephone for every other farmhouse in the United States, and there is practically one for every farmhouse in Kansas.

As to Efficiency

As respects efficiency, foreign telephone conditions would to an American be simply intolerable. In this country telephone service is continuous throughout the 24 hours, including Sundays and holidays. In Europe and Australia only a small percentage of the stations are open the 24 hours, and many are closed on Sundays and holidays.

Turn to Switzerland and New Zealand—the two Utopias which most frequently rise up before the deluded vision of Mr. Lewis when he is out on a course of chartless aberration. In SWITZERLAND 96 per cent. OF THE EXCHANGES CLOSE AT 9 O'CLOCK P. M. and 46 per cent.

a course of chartless aberration. In SWITZERLAND 96 per cent. OF THE EXCHANGES CLOSE AT 9 O'CLOCK P. M.; and 46 per cent. operate from 7 A. M to noon, then close until 2 for lunch, then operate until 6 P. M., then close until 8 P. M. for supper, and then operate until 8 30 P. M., when they shut up for the night IN NEW ZEALAND, WHERE POLITICAL FANTASIES LIKE THOSE OF MR. LEWIS HAVE LOADED ITS PEOPLE WITH A DEBT OF ABOUT \$400 PER CAPITA, 84 per cent. OF THE TELEPHONE EXCHANGES ARE NOT OPEN ON SUNDAYS, 80 per cent. ARE NOT OPEN ON HOLIDAYS, AND 60 per cent. ARE OPEN ON WEEK DAYS ONLY FROM 9 A. M, TO 5 P. M.

Abroad toll service is "urgent" or "ordinary." If you choose the "urgent," you get at a high rate a service no better than ours. If you choose the "ordinary," you are given an "assignment," and are told that you can talk with your friend, say at 10 o'clock; perhaps that day, or perhaps not until the next day, if there are too many assignments ahead of you. At 10 the connection is made for you If you are not on hand you are charged, and, if you are on hand, you talk three minutes. If you try to talk any longer, you are cut off, and cannot talk again until your turn comes around again. When you are connected up for a long-distance call even to nearby points, you are charged whether you actually reach the person you wish or not.

ABROAD—IN ENGLAND, GERMANY, FRANCE, EVERYWHERE—AMERICAN TELEPHONE SERVICE IS ADMITTED TO BE THE MOST EFFICIENT IN THE WORLD.

As Respects Cheapness

If the telephone service abroad is of poor quality and conducted at a loss (as it is) why should an American ask whether it is cheaper than ours? IN REALITY IT IS NOT, THOUGH WAGES ABROAD ARE FROM 2 TO 21 TIMES LOWER THAN THEY ARE IN THIS COUNTRY. On a TO 2½ TIMES LOWER THAN THEY ARE IN THIS COUNTRY. On a clearly average basis—such as for instance a comparison of gross earnings per telephone (exchange service) European charges for telephone service in actual money value are considerably in excess of the corresponding American charges. It would be easy to mention many American cities in which telephone rates are lower than in foreign cities, in the same telephone scale, such as St. Paul in comparison with Budapest, San Antonio in comparison with The Hague, Omaha in comparison with Tokio, Rochester in comparison with Amst-rdam, St Joseph in comparison with Rotterdam, etc. 79 per cent of the subscribers in New York, 90 per cent. of those in Philadelphia, and 91 per cent. of those in Chicago pay less than the sole Paris rate of \$77.20 (to which is added an extra charge of \$20 for the instrument.)

Strument.)

THE MGRAL OF ALL THIS, OF COURSE IS THAT THE TELEPHONE IS MORE ABUNDANT AND EFFICIENT AND NOT REALLY
DEARER (DESPITE THE VAST DIFFERENCE IN WAGES) IN THIS
COUNTRY THAN IN EUROPE BECAUSE THE TELEPHONE IS OPERATED HERE BY THE VITALIZING, ALERT AND FAR SEEING
AGENCIES OF PRIVATE MANAGEMENT, REGULATED BY THE INTERSTATE COMMERCE COMMISSION AND PUBLIC SERVICE COMMISSIONS, AND THE TELEPHONE ABROAD IS OPERATED BY THE
SLUMBROUS ROUTINE AND SHORT-SIGHTED AGENCIES OF BUREAUCRATIC RED TAPE.

The one country in Europe where the private ownership of the tele-

The one country in Europe where the private ownership of the telephone is still predominant is Denmark, and Denmark has twice as many telephones per 100 inhabitants as even Germany.

RUBBER STAMPS.

Rubber Stamps for all purposes. The kind that lasts. Stencils, brass and enamel signs, seals, pocket punches, ink and ink pads. Leave your orders with THE WEEKLY CHRONICLE.

What Professor Halm said is very true, To argue different would be hard to do. So let us all go to Matthew's hence, And teach our dollars to have more sense.

You never need to wait or worry, In Matthew's store the clerks all hurry, The customer can then ever be calm, If you don't believe this, ask Professor Halm.

He, who reads this will profit thereby. For Matthew's confections surely satisfy.

Experiments Prove Use Of Fertilizers In The Spring Most Profitable.

NICKOLAS SCHMITZ,

Maryland Agricultural College Extension Service.

The production of the average timothy meadow in Maryland is very far below what it can be made to yield profitably in both quality and yield per acre. The low yields and poor quality are not due so much to poor germina tion and poor stand in the spring after seeding as to the crowding out of the timothy by weeds. Where weeds are the determining factor the remedy is sowing the timothy, or timothy and clover, alone in the early fall, not with a grain crop, but after the grain crop has been harvested and a fine, firm seedbed prepared.

Where the stand of timothy is fair the yield can be profitably increased by the use of commercial fertilizers. Extensive tests at the Maryland Experiment Station with various kinds and combinations of fertilizers have shown beyond question that the best fertilizer for timothy is nitrate of soda or a combination of nitrate of soda and acid rock. The proper amount to apply depends of course upon the fertility of the soil, but ordinarily nitrate of soda should be applied at the rate of from 150 to 250 pounds per acre, and if a combination of acid rock and nitrate of soda is used, equal H. D. BAKER......Vice-President parts, the mixture should be applied at the rate of 200 to 450 pounds per acre. Such an application under ordinary conditions may be expected to give an increase in yield of from 1 to 11/2 tons per acre.

The time of applying the fertilizer is very important. It should be applied as soon as the grass begins to green, John S. Ramsburg, Daniel Baker, which is usually the latter part of March or the first of April. The early application of the fertilizer is absolutely necessary for maximum returns, for the fertilizer can not be made use of by the plant until it has been dissolved and carried down into the soil. The early application makes use of the early rains.

Many farmers have been disappointed when using nitrate of soda because they have applied it too late or at a time when there was not sufficient moisture to dissolve it, so that the timothy would get full use of what was applied before maturing.

WHY NOT TRUE PREPAREDNESS IN RURAL EDUCATION?

"Preparedness" is the present cry. Well, genuine education is true preparation. Teach our youths how to be come efficient and economical in their life work and the problem is readily

Make the Corn Clubs, the Homemaking Clubs, the Poultry competitions, the Cooking and Sewing contests and all such activities a part of the school system. Let the work on the farm and in the home become a part of the school study. Let the rural school not only teach farm accounting, but have the pupils keep the accounts of their farms and homes.

Seed testing, soil examination, stock judging and selecting, garden planting, and working, household management and routine, canning fruit and vegetables, milk management, egg 2-19-tf. testing, incubating, brooding, balancing rations and feeding the rations, recording progress, and studying results, learning to reason on homely subjects and to solve personal problems, learning to think and to work efficiently-these are some of the items of real rural education—is this narrow educating? No! It is as broad as the life and the work of the world. Are we leaving out culture? No! The highest and best culture comes through studying intelligently the country, the life about us, nature, human nature, and the work of the world-this we cannot do without knowing something of the thoughts of our poets, our philosophers, our historians, and our writers as well as our scientists and our teachers of practical things. We should have all of the best that we have now, but so applied as to make the life we live brighter and more satisfying to our children. Educate to this end!

SOW SWEET PEAS EARLY.

B. W. ANSPON. Maryland Agricultural College.

This flower will grow in any good garden soil that is well drained, provided it is in a sunny and open location. To secure early flowers and best results, spring sowing is generally used. In order to have the plants strong, they should be sown early. They should be sown just as soon as the ground can be worked. To determine when the ground is dry enough to work, take up some of the soil and form it into a ball with the hand. If it falls apart, the ground is dry enough to work. Some start the plants in paper pots or thumb pots in the hot bed, but especially good results are obtained by sowing outdoors. Prepare the soil well by spading

deeply. Adding well rotted manure will be a great benefit. Then make a shallow trench about 4 inches deep, in the bottom of this, plant the seed two inches apart. Where one uses poultry netting or brush, to serve as trellis, two rows may be sown 6 to 8 inches
