MOTION PICTURE FILMS.

How They Are "Edited" Before They Reach the Public Eye.

After a motion picture film has been developed and printed it is sent to the be "edited." Like an author's manu- taking the lead in the first inning led their heartiest congratulations. script in the hands of an editor, it is thru out the contest. shortened here and there, the captions altered, some parts entirely "cut" or deleted and the whole film dressed up to suit the ideas of the men closest in touch with the theater going public.

The editing takes place in the projection room, says the Popular Science film and changing it-is done in the ter. cutting and assembling room by men who do nothing else. Sometimes the men in the cutting room ("cutters," in the trade lingo) are so overwhelmed and confused with orders issued by the studio officials that they are compelled to ask for additional explanations. Needless to say this wastes much time.

By means of the phonograph, however, one motion picture company is eliminating this waste and saving money. As the director watches a picture in the projection room he utters his editing orders into the transmitter of a dictating machine. The film is then sent back to the cutting room with the phonograph record.

A SUBMARINE BASE.

It Is a Supply and Repair Station For Undersea Boats.

What is a "submarine base?" Well, a submarine base is, in a word, a supply and repair station for undersea boats. Craft of this kind are very elaborate and exceedingly delicate pieces of mechanism; they are liable to need tinkering at frequent intervals.

Hence there must be a machine shop when at intervals they return from cruises. There must also be a storehouse containing all kinds of supplies and spare parts for the submarines Most important of all, there must be tanks of fuel oil.

Usually there is attached to the base a "mother ship"—a good sized steamer, with machinery aboard for making emergency repairs. The steamer also carries dynamos, which may be used for charging the batteries of the boats -though at sea the charging is accomplished by the oil engines that propel the submarine when on the surface.

When it is not practicable to establish such a shore station the "mother ship" may be utilized temporarily as a floating base.—Exchange.

Curious Land, Curious People. Near Cape Horn, in the islands of Tierra del Fuego, live the most curious people in all South America. It rains or snows or sleets nearly every day, and yet they look on their country as the finest in the world. They wear hardly any clothing and seem not to feel cold. Because he saw fires on the shore the explorer Magellan, the first European that rounded the Horn, called the island "the land of fire," which is almost the worst name he could have chosen. Their huts are made of bent boughs and covered with grass and give only the poorest shelter. The folk are vain, too, wearing necklaces of the teeth of fishes or seals and painting patterns on their bodies. Among them some colors have a novel meaning. peace. They are great mimics and will dozen 32 and 20 certs. imitate voice and gesture perfectly.

Handicapped by His Name. The handicap of a poet's name was illustrated in the case of Mr. William Wordsworth, who was the eldest surviving grandson of the poet. Mr. Wordsworth was a great scholar and a poet himself of high distinction. A volume of his sonnets was issued privately some years ago. On account of the similarity of his name with that of his grandfather, he always refused to publish any of his poetical writings, though pressed to do so by the people of such high authority as Matthew Arnold, who described one of his sonnets as the finest in the English language

Odd Geographical Division.

-Montreal Star.

The range of the Blue Ridge mountains in Pennsylvania is divided by a river every twenty-seven miles, as follows: From the Susquehanna to the Swatara, twenty-seven miles; from the Swatara to the Schuylkill, twenty-seven miles; from the Schuylkill to the Lehigh, twenty-seven miles; from the Lehigh to the Delaware, twenty-seven miles. At the next twenty-seven miles is a hollow of New Jersey, in which nestles a lake known as Culver's pond.

Right Thinking.

The quality of your friends is the quality of your thoughts. Think the thoughts of a thief and thieves will be your companions. Think clean, helpful, creative thoughts and surely your associates will be clean, helpful and creative. You attract to you what belongs to you.

Changed Ideas

"Mrs. Smarty used to boast that she things.' "Well, does she?"

"I should say so! She can't talk of anything but her baby."-New York

Circumstantial Evidence. "What makes you think all women hate each other?'

"Because a woman so seldom brings up a son fit to be another woman's husband."-Exchange. To make knowledge valuable you

must have the cheerfulness of wisdom.

Improvements Can Wait for Peace. The national emergency may make it more difficult than ever, if not impossible, to enact waterways improvement

legislation at this session of Congress. This seemed probable as a result of the increasing opposition to the \$27,-000,000 annual river and harbor appropriation bill under consideration in the House. Opposition is based largely on the ground that the proposed improvements can wait unti_peace comes.

Buffalo Bill's Show Is Sold.

Archer Banker, of Salina, Kan, a Men life-long friend of Jess Willard, has closed a deal by which he buys from the Buffalo Bill Wild West Show and Arlington Circus their amusement attraction. The price was \$105,000. The same name and staff will be main-

The show, which will continue Willard as the stellar attraction, will be routed by Eddie Arlington.

SURPRISE PARTY.

On Monday evening, June 5, a very the home of Mr. and Mrs. John Overholtzer in honor of Mrs. Overhultzer's birthday. The evening was most agreenever let her mind run upon little ably spent, the feature being a concert on the Victrola. Refreshments were served in abundance. Besides the imguests present.

AVOID PREJUDICE.

It is an Evil Thing That Warps Judgment and Breeds Injustice.

Prejudice is an insidious thing. It It paves the way for hatred and malice. In proportion as we learn to clear our minds of prejudice we become better men and women; we win friends and dissolve enmities; we are more worthy of respect and confidence.

No one wants to be judged by false standards that prejudice sets up. Beware of judging others in such a light. Prejudice cramps the mind and the Armenians they call it "Massis;" if heart; it stands in the way of rightful growth of character. It is wise to search your heart and if you find prejudice there to set about to root it out

Do not be sure you of all men are prejudice is guarded by vanity. Seek as great. In all the relations of life be Little Ararat, upon whose slopes it is sure you are not judging another, not for his error, but from your prejudice. ness is that it breeds injustice and unfolk and makes no one happier.-Milwaukee Sentinel.

Pigeons Spread Disease.

"Pigeons spread disease when flying at large," says a writer in Farm and Fireside. "They are very promiscuous in their visits and carry disease germs from infected places on their feet. Not only do they spread poultry diseases, but any live stock or other germ disease. Many a mysterious outbreak might be traced to this source. Flocks of pigeons are a very picturesque feature of the landscape, but are entirely out of place in our closely settled modern communities. They may carry human disease germs as well as any others."

Probably Not.

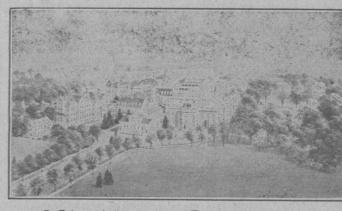

An English paper ascribes the use of 'some" in such expressions as "some girl" or "some show" to Horace Wal-"Nothing is ever totally lost or de- Pitt? Yes, he is to be secretary of stroyed," said the professor of physics | state-at *twenty-two-that is some "In that case," said the simple and glory!" FRIDAY, JUNE 15, 1917.

"A glance over the pages of history reveals to us that of all institutions which affect the wellspring of human activity the newspaper is perhaps the greatest."

THE CHRONICLE will be independent in politics, progressive in spirit and a champion of what it conceives to be right. Its columns will always be open for a dignified discussion by the people of any subject that may seem to them interesting, or that may in anywise be a benefit to the community at large.

¶ Communications intended for publication in this paper, letters of a busi- selves to an adequate realization the administration of the nation's ness nature in relation to the Chronicle, and all orders for Job Printing to be done at this office should be addressed to heart they are not indifferent. phrasing the words of Cardinal THE WEEKLY CHRONICLE.

FREDERICK COUNTY.

Frederick is next to the largest of the counties of Maryland. In population and wealth it ranks next to Baltimore county. In the fertility and productiveness of its lands it ranks among the first in the Union, and especially in the produc-tion of wheat. The area of this The great body of the people are of German, English and Scotch-Irish descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the greater part of the county is a valley of rolling lands lying between the Linganore Hills and the Catoctin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn.—Maryland Manual issued by Board of Public Works.

EMMITSBURG.

In all Western Maryland-the beauty spot and the garden spot of the State-there is no town more attractive than Emmitsburg.

No people are more wide-awake, more knowable, more courteous to strangers than Emmitsburgians.

The location of Emmitsburg is ideal; the surrounding scenery is unmatchable; the climate is notedly healthful; its water—pure mountain spring water-cannot be surpassed. It is within easy access of Baltimore, Hagerstown, Frederick; eight miles from the National Battlefield at Gettysburg, near to the Mountain Resorts, and is surrounded by fertile farms and productive orchards.

Mount Saint Mary's College and Ecclesiastical Seminary-with an enviable reputation extending over 108 years-is located here; St. Joseph's College and Academy for young ladies-equally as noted during its 107 years of splendid acheivement-is also here.

There are excellent Schools-Public and Parochial-in Emmitsburg; two sound Banks, five Churches, a live Newspaper, modern Hotel accommodations, adequate Fire Department, progressive merchants, splendid physicians, good liveries, auto garages, many fraternal organizations, good railroad accommodations. There are four or five mails a day, telegraph, express and telephone service connecting all points; electric light and power, oiled

streets. There is business to be had in Emmitsburg; there are Factory Sites availabe. If you contemplate changing your place of residence-come to Emmitsburg, Frederick County,

THE CALL TO RAISE WAR FUND OF \$100,000,000.

Continued from page 1. In that flag by our country unfurled; fighting for liberty lie dead or wounded: And the stripes that are swelling in millions of women and children are homeless and helpless; hundreds of towns and villages have been destroyed;

Up to now, our own people have not By a deed that our fathers have done, suffered. While Europe has been pour-And they're leagued in as true and as ing out her lifeblood, America has experienced a prosperity she had never known before.

But now we ourselves are in this gigantic war. We now see that the struggle against autocracy and tyranny which Ever true to themselves to that motto our Allies have been making is and has from the first been in reality, no less our struggle than theirs. We ourselves By the bayonet traced at the midnight must now share the suffering which community would seriously affect its a real way.

Our Red Cross is a vital factor in the struggle. To promote efficiency in administering its great responsibilities, the President of the United States has created a Red Cross War Council. We of the Council know now only what the minimum requirements are. But we know already that the needs which our he says: "To maintain the health and Red Cross can alone supply are at present beyond computation.

We ask for \$100,000,000. It is a large sum of money, but, believe me, the people of this country are not only going to supply that one hundred million

Hundreds of American doctors and nurses are already at the front. A force The old Allegheny may tower to of 12,000 American engineers will soon with the salt. be rebuilding the railroads of France. Upwards of 25,000 American men are The links of our destiny cannot be now on the battlefields of Europe, fighting as volunteers in the Allied armies; While the truth of these words shall soon 25,000 American regulars will be added to their number. All our Nation-Army is to be recruited to full strength quire different feeds, in quantity and and 500,000 other men shortly to be called to the colors. Within a few months we should and will have in service an

These men must have of our best. To prepare against their needs in advance will be a stupendous task which the Red Cross must undertake. Doctors, nurses, ambulances, must be made Vast quantities of hospital stores, linen bandages and supplies of once. If we wait, it may be too late. When we ask our own sons and brothers to fight for our liberty 3,000 miles from home in a country already sore and afflicted; surely we cannot do less than prepare to take care of them in their day of suffering.

If each individual American now contributes his "bit," there can be no failure. America will, we feel sure, in this pools impossible. again demonstrate her ability to handle a big task in a big way. That we may be able to perform this great task, we shall appeal to the generosity and for the hearty co operation of the whole American people.

SUPPLY PLENTY OF CLEAN FOOD AND PURE WATER.

HEALTH MOST IMPORTANT Keep Stables and Yards Clear of Trash and Flith.

College Park, May 31.—Under present conditions the need of preserving the supply of farm livestock is most urgent. The spread of disease in any they have endured; we, too, must bear food supply and make it a burden on the burdens and we must do our part in other sections that are now taxed to the limit to meet the demand for meat Maryland farmers are urged by S. S. Buckley, specialist in animal industry for the State Agricultural Extension Service, to take every precaution to prevent the spread of disease and maintain the healthy growth of all livestock grown for meat. In a contribution to "Successful Farming," productivity of your animals, the following rules must be observed:

"1. Feed only sound, wholesome grain and fodder. Supply pure water, plentiful in amount, and frequently. "2. Supply salt regularly. Rock salt contains the necessary minerals

for body wants. "3. Charcoal may be given occa-

sionally with benefit and may be fed "4. Feed with extreme regularity, and according to the requirements of

animals, in quantity and nutrition value. "5. Developing or growing animals, females with young, pregnant females, males for breeding purposes, work animals and animals not at work re-

"6. Animals at pasture require attention. Pasturage may be adequate army of 1,000,000 and a navy of 150,000 or it may need to be supplemented with additional feed.

"7. Make all changes in rations gradually. Add any new addition to the ration in small and successively increasing amounts until the desired mixture is secured.

"8. Unwholesome food is frequently produced on farms, and, being unmarketable, is kept for feeding purevery kind must be prepared and at poses. Such foods may be fed safely if proper methods are employed. Any dirty, damaged, rotten and apparently unwholesome grain is readily improved by passing once or twice through a grain fan.

"9. Keep stables, pens and yards clear at all times. Put the manure on the fields where it is needed and burn all trash. Drain any low places that collect water, and make stagnant

"10. Use plaster on stable floors to dry them and white wash on walls for the purifying effects.

PROFITABLE ONION GROWING. College Park, May 31.—The need If, in making a survey of the obligation the food supply of the country tions and opportunities of our Red Cross is becoming more and more apparent a gloomy picture is drawn, we must not daily. Probably no vegetable offers be discouraged, but rather rejoice in better opportunities for profit than this undertaking and in the confidenc- the onion owing to its scarcity and that we can by our voluntary action its food value. To supply the many render a service to our afflicted allies demands made of the Maryland Agriwhich will for all time be a source of cultural Extension Service for infor-

"Onions may be grown from either serve upon the actual field of battle but seed or sets. A great many growers all men, women and children alike may are now raising their crops direct serve, and serve effectively." We must from seed in a single season. The seed and will all immediately concentrate is sown thinly in drills 12 to 15 inches our energies and efforts and by contrib- apart, as early in the spring as the uting freely to this supreme cause help softs can properly be prepared. From 4 to 5 pounds of seed are required for planting an acre. The young plants should be tended carefully and kept It has been estimated that the pure ed should be thinned to stand 2 inches

"If onion sets are planted it will take about 8 bushels for one acre. The cost of equipping a soldier is The sets are put in 2 inches apart, in rows the same distance apart as for seed.

"As soon as the young seedlings start sufficiently to show the rows, cultivation should begin. This is important for two reasons. First, to destroy all weeds when they are small 6.00 and most easily killed, and second, to 4.09 establish a mulch of surface soil that 3.50 will conserve moisture.

"Onions need plenty of moisture for their development. Water in the soil rises slowly to the surface, and if the crust formed after a rain is not broken, the moisture evaporates and passes into the air. Cultivating after each rain breaks this crust and forms 15 00 a mulch of fine, loose soil which 10.00 checks evaporation."

Wherever possible, means should be provided for ranging chickens, especi-Total...... \$103.63 ally growing chicks, in the corn field. Therefore, the man who is too old to feeds are so high, for the chickens fight or who cannot be spared, or the will be able to get a considerable woman who is unable to fight because amount of nourishment from the bugs she is a woman, but who is possessed of and worms and green stuff that they an income or means sufficient to finance will be able to pick up. Worker they are troublesome.—Roy H. Waite, Poultryman, Maryland Agricultural Experiment Station.

The Oil That Puts "Velvet" in Your Motor

Here is the solution of your lubricating problems-you who own motor cars:

The oil that enables you to "turn 'er over" easily;

'Cushions' the moving parts of your car against wear or strain; Works equally well in summer and winter, because of its sturdy texture;

Gives far greater mileage for each gallon; Is free from solid matter-will not gum;

Contains no free carbon, does not "coke" in the cylinders or foul your spark plugs; the slight amount of residue being carried off in the exhaust; The oil that has the body to seal tight the clearance of the pistons and to give the entire torce of the explosion to the running of the car; The increased-mileage, increased-power oil, is WHITE STAR EXTRA QUALITY MOTOR OIL.

The three years experience of The Ford Motor Company is summed up in the following letter:

"After careful experiments and tests, we have adopted your White Star Extra Quality Lubricating Oil here at the factory and for use and sale at our branch houses as best adapted for our cars. (Signed) FORD MOTOR CO."

WOMAN'S AUXILIARY.

At the regular meeting of the Auxiliary of the Woman's Defense League held in the School house last night, a vote of thanks was given to all who by their generous assistance and patronage made the card party for the benefit of the Red Cross such a success,

Special acknowledgement was made of the courtesy of Mrs. A. M. Slagle in offering the parlors and dining room of the New Slagle Hotel for this social event. Formal recognition was made of the generous contributions for the refreshments made by the following merchants: John Smith, J. M. Kerrigan C. G Frailey & Co., R. L. Annan, Rosensteel and Hopp and J. D. Caldwell and for the hauling of the tables by the People's Garage. The Auxiliary also expressed its appreciation of the very efficient service rendered by Messrs. James Hays and Frank Weant.

The net amount realized was \$47.66. At this meeting a proposition to require the payment of five cents from all members who absent themselves from regular meetings, unless their non-attendance be occasioned by sickness or absence from town. This rule was unanimously adopted.

Liberty Loan 3¹ Per Cent. U. S. Government Bonds

It is believed that the small subscriptions of people of moderate means throughout the United States will be a large factor in the success of the Liberty Loan. There are many ways in which we can be of service to such people and thereby enable them to join in this partiotic service to their country. Therefore we urge the use of our organization in the filing of applications for Liberty Bonds and for making payments after the bonds have been allotted. Undoubtedly there are many people of limited means who would have no safe place in which to keep their bonds after they had paid for them, and to obviate this difficulty we gladly put the security of our own vault at their disposal, undertaking to collect the interest as it accrues on behalf of the owner. If there are those who hesitate to subscribe because the time for payments as required by the Government gives too little latitude, we are prepared to lend our assistance in this direction also. and earnestly urge you to seek our co-operation.

REAMED eggs make a dainty sub-

stitute for meat during Lent. Boil six eggs hard. Lay in ice water so that they will shell easily. Cut in six pieces long way of the egg. Put in baking dish with cupful of white sauce. Season with paprika. salt and onion juice. Bake in hot over. They are often served with cheese id parsley for trimming.

Cheese Pie. - Whip the yolks of five ggs with one cupful of sugar until very light, cream three-quarters of a cupful of butter and add quickly and ightly to the whipped yolks and sugar. Flavor with half a teaspoonful of vanilla and divide between two under-It will rise as light as a feathw. Have ready the whites of five eggs beaten to a stiff froth and sweeten with pulverized sugar. Spread over the top and brown quickly. On taking them from the oven change directly from the pie tin to a china plate. This is a very rich pie, but delicious.

Eggs and Sardine Sandwich .- One an of oil sardines (10 cents), one hard oiled egg. Add one tablespoonful of live oil to mashed sardines and the olk of one egg, pinch of salt, pepper, little sugar and a tablespoonful of inegar. Mix well, cut white of egg into little bits, mix with other ingredients and cut very thin six slices of white bread and spread.

Swiss Eggs .- Melt three tablespoonfuls of butter in a baking dish. Break six eggs with it and cover with slices of Swiss cheese. Sprinkle salt and pepper to taste and bake in moderate

Eggs a la Goldenrod. - Three hard boiled eggs, one tablespoonful of butter, one tablespoonful of flour, one cupful of milk, one-half teaspoonful of salt, one-eighth teaspoonful of pepper, eight medium slices of toast and parsbutter, flour, milk and seasonings. Separate yolks from whites of eggs. Chop whites fine and add them to the sauce Arrange toast on platter and pour over sauce. Force the yolks through a pocut in points.

Egg Sur Plat.-Butter small eartheusalt and pepper and on top of each egg put a tablespoonful of thick sweet is solid. With a spatula lift without marring form on to a hot platter. Gar-

The Great Tropical Belt. Between the thirtieth parallel of north latitude, which runs through New Orleans, north Africa, northern India and southern China, and th thirtieth parallel of south latitude which cuts through southern Brazil the southern tip of Africa and th southern part of Australia, is half the land area of the world outside the polar regions and one-half the world' population. Yet the commerce of thi great tropical belt, with half the land area and half the world population, is one-seventh of the world's railways despite the fact that the temperate zone are anxiously calling for its products of food and manufacturing material.

Where We Aim.

William Dean Howells in one of his talks about literature said: "Good literature is always condemned on its ing original, it is new and strange Shelley's work was bitterly condemn ed at first. So was Coleridge's. So was Wordsworth's. So was Stephen Crane's." Mr. Howells paused, then added impressively, "Stones are only thrown at those trees which are heavy with fruit."

Not Melodiously Gifted. "Don't you love our song, 'The Star Spangled Banner?"

"My friend, the way for me to show real affection for a song is not to try to sing it."-Washington Star.

LOOK SUCCESSFUL.

Have Confidence In Yourself and Show It In Your Manner.

To be successful you must look successful. If you will carry yourself with a self confident air it inspires others with the belief in your ability and your success. You get to believe in it yourself. You begin to walk as if you were master of yourself. You will believe in your ability to do things, and you are confident of results.

It does not take a keen observer to pick out a successful dealer. If he is straws around the edge of the plate prosperous every step, every movement, every look, indicates it. There is a great deal in assuming the part of the character you desire to play in this drama of life.

There is nothing negative about the positive man. He is a success, and, like Hercules, he has conquered the moment he looks upon you. This is personal magnetism. Cultivate it, then you will not need bolstering up. Learn to stand alone. Your very silence should carry power. Learn the value of reserve force.

Self confidence is the power to marshal all the faculties and unite their strength in one mighty cable. It matters not what your talents may be, what your abilities or ambition may be, if you are lacking in self confidence you can never use them to the best advantage. Self trust is as necessary as ability.

Concentrate your facilities and your good qualities. Carry yourself with a self confident air and you will win still more confidence. Failure or success has its true worth in these two little words, "I can't," or "I will." Look successful!-Author Unknown.

DEER AND THEIR HORNS.

They Get a New Pair Each Year, and the Bravest Get the Biggest.

As every year horses shed their old coats for new ones, so the deer in our forests or parks drop their horns. Then, in about thirteen weeks, a new ley. Make a thin white sauce with pair of horns arrives, but they are tender and easily hurt.

A deer's new horns are called "velvet" because they grow inside of a tough skin which is coarse and brown, like plush. For a long time he will tato top. Garnish with parsley and not thrash his horns in the brush. It would be too painful.

When a deer is without horns he ware dishes or muffin rings and into feels weak. When the new horns start each break a fresh egg. Sprinkle with and grow he begins to feel strong again. After awhile he tosses his head from side to side every day, and then cream. Bake in hot oven until white he runs rapidly through the brush and undergrowth.

As his new horns become big they also become less easily hurt. In running through the brush the outer skin. or "velvet," is broken and peeled away. In the springtime the "velvet" drops off. The deer is then very proud of his new clothes.

If a deer is not afraid of pain he will try out his new horns long before his mates do. He will not wait until the 'velvet' is gone. Wherever this outer skin is broken too soon the horn grows longer and larger. Thus it is that the bravest deer has the biggest pair of horns .- Albany Argus.

"Solid Gold."

Commercially speaking, the term 'solid gold" is a misnomer, since such gold has not been used for many, many but one-sixth that of the international years. Some of the ancient Roman of the world, and it has but | jewelry and some of that of the renaissance period was, indeed, made of pure gold, worked up by hand with the crudest of tools, but since the old days there has been a constantly increasing employment of alloys, for the reason that jewelers found that the harder the gold was rendered by good alloys the greater its wearing qualities and the more secure, therefore, was the setting first/appearance. That is because, be of the gems it contained. Nowadays jewelry is of 18, 14 or 10 carats, according to the design and character of the article, and it is much more frequently 10 than 18 carats.

Old Time Spelling Reform.

Centuries ago spelling reformers published whole works in the "rational spelling" and left an interested or uninterested public to take them or leave them, as witness the following, pubpangled Banner?" lished in 1585: "AEsopz Fable'z in tru
"I do." replied Senator Sorghum. Orto-graphy with Grammar-notz.
"Then why don't you join in the Heryuntoo ar al'so jooined the short sentencez of the wyz Cato imprinted with lyk form and order, both of which Autorz ar translated out of Latin intoo English. By William Bullokar."

Fixed Ammunition.

It is to Gustavus Adolphus of Sweden, whose reign began in 1611, that history gives credit for the invention of fixed ammunition. In his cartridges the bullets and the charge were united in a paper case. It was not, however, until 1850 that the first successful metallic cartridge was patented by an American.

He Didn't Mind.

Mr. Hardhead-I have called, sir, to ask you for the hand of your daughter. Old Gentleman (with emotion)-She is the only child I have, and her mother is gone. Mr. Hardhead (hastily)-Oh, that's no objection, sir, I assure you.-London Telegraph.

Apparently So. "I can't find that record by Sousa's

band. Do you know what became of "No. I guess somebody stole a march

on us."-Harvard Lampoon.

The Egotist.

She-Who would you rather be if you were not yourself? He-I can't say that I have any second choice .-Boston Transcript.

He who guides public opinion moves the hand that moves the world.—Rufus Choate.
