Most Anything At A Glance

BY ABIGAIL

Now that the big day in Washington is over, we can all sit back to watch just how a machine that has been out of office for the past 20 years, can gear itself to meet with the occasion. With the U. S. playing the leading role in world peace we are more than anxious to see if the new regime can cope with the situation. Personally, I feel assured that Ike has the qualifications to fill the big job that we have entrusted him. His record speaks for itself. In my opinion anyone who could weld those Europeans into the cooperative machine that it represents today, so soon after the last devastating war, can certainly control our destinies for our own welfare. But make no mistake about it, the President will need the help of every single one of us. I am sure we will all lay aside our little party prejudices and co-operate to the fullest extent.

There's always something a

little sad about the President retiring from office. Recent photos of Harry Truman pictured him as heading back on the long trail to Missouri, head bowed and deep in thought. No matter what his record was, in your opinion, there is a trace of compunction for the man. Mr. Truman really faced a tough job and was put into office so speedily that he hardly had time to consider the seriousness of the situation. With the whole world at each other's throats following the war, he had to endure the impossible task of solidifying friendships that had been broken by commitments made before he took office. There was not a single thing he could do about those commitments because they were law and signed by Mr. Roosevelt, Mr. Churchill and others. In my opinion Mr. Truman did a bang-up job on the transition from war to peace, and the price he paid was a shortened span of life, you can be sure. The only fault I could find with the ex-President was that he didn't seem to realize the value of a dollar. Now that he is no longer our Chief Executive, I feel that he has made his mark in the history of the world and that we can say about him: "Well done, thy good and faithful servant."

. . Another effort to bolster the bogged-down efforts of the Memorial Hall Assn. to achieve its ultimate aim, the building of a community hall, will be taken by the Chamber of Commerce shortly after Easter. Once again the Chamber will sponson a minstrel as the fundraising event. The Lord Bless the Chamber as it seems to be the leading organization to raise funds for the building. Of course, others have helped the group in its efforts, but without a doubt it has more than done its share and pledges its continued crusade to the finish line.

There seems to be needed some igniting spark to unite the total efforts of the community in this cause. If every club here were to sponsor just some little thing, such as a card party, dance, food sale, baseball game, basketball contest, etc., it wouldn't take as long as some think to raise the necessary money. To date about \$5000 has been garnered by various groups. It is sad to comment that some organizations haven't lifted their finger in any effort to date. It remains to be seen whether they will come out of their lethargy and render some assistance. After all, they probably will use the hall if and when it is ever realized. At any rate, more momentum to the cause must be realized or we'll never make the grade.

It has definitely been established that any future modern road from the State line to Washington will by-pass Emmitsburg, Thurmont, and Lewistown. This information was revealed in a 150-page survey released this week by the State Roads Commission, In all, that is pertaining to our section, about 20 miles of new road from Emmitsburg to Frederick will be constructed in the next 12 years under the newly-proposed road building program set up by the commission and presented to the State Legislature this week. Just where these by-passes will cocur was

treated to one of those delightful Home Town Minstrels in the near future, it was decided at the regular meeting of the Emmitsburg Chamber of Commerce held Tuesday evening in the Fire Hall, President Ralph Irelan presiding.

Mrs. Helen Daugherty, who so capably conducted the one held last year, was again appointed in charge of the production, and the date was set for Thursday and Friday nights, April 9-10.

Present plans call for the play to be held in the Emmitsburg High School if the site is available at that time. Mrs. Daugherty stated that rehearsals willbegin shortly and that any talent interested in appearing in the show should contact her imme-

Once again the local Chamber renewed its annual membership in the U. S. Chamber of Commerce and at the same time agreed to support Harry A. Boswell of Prince George's County, as a delegate to the national board of directors to the U. S. Chamber of Commerce.

Mr. John, local manager of the Emmitsburg Manufacturing Co., made a plea for the continued support the Chamber has given it in assisting the plant to acquire more help. The manager stated that he has employment opportunities available for a good number of local people and cited the benefits derived from working at the home town industry and the available group benefits the company offered. The Chamber agreed to continue its support of the company.

President Irelan reported that he had been in contact with an official of the Doubleday Printing Co., which was seeking a location here. No word has been given out recently as to the company's intentions and it was believed that it had changed its mind about locating here. Mr. Irelan reported that he was informed the company still was interested, but activities at this time were centered at the New York office and no details were available at this time. Following adjournment the Chamber met in joint session with the Memorial Hall Assn.

Hall Meeting Held

The Memorial Hass Assn. isn't yet ready to enter into concrete chase of a building, or the erec- linger spent Tuesday in Freder- into final competition. tion of one, according to the con-

sided at the session which was tion office in Frederick. attended by a representative group of the members of the association. Mr. Emrich revealed that a committee had already investigated the possibilities of several local properties and had revealed their findings at a recent meeting. The committee finally centered its attention on one of these properties and presented a recommendations of purchase. However, this was voted down by a general meeting of the organization at Tuesday's meeting. It was generally felt that renting property at this time was too risky and uncertain.

The group commended the president and his committee for the extensive work they have been doing in behalf of the community and pledged the officers continued support of the project of building a Memorial Hall.

Plans of incorporating the organization were soundly discussed and it was agreed that eventually these necessary steps would be taken, but it was felt that the time was not yet ripe for such proceedings.

Dance Friday For Benefit

Emmitsburgians will that others might walk" next Friday evening at a benefit dance studying abroad. In his letter to under the auspices of the Em-Emmitsburgians and friends, he mitsburg Infantile Paralysis Fund Drive, chairmaned by Lumen F. Norris.

The dance will be held at the White House Inn starting at 8 p. m. with music furnished by "Four Hits and A Miss" orchestra. All proceeds netted will be placed in the polio fund. A donation of \$1.50 will be asked as freshments will be on sale.

Mr. Norris has expressed the desire to more than meet Emsince this town has shared heavily in expenditures made by the National Foundation. Four local cases which occurred in this district last summer and fall have \$10,000 already and many, many more months, perhaps years of treatment is believed necessary. Mrs. Agnes Louise Eckenrode, quickly stood aside for them to wife of Augustus W. Eckenrode, pass and humbly said "Hello" them is still hospitalized, some of Four of these tiny local victims them in pitiful condition and the parents urge extra generous contributions this year.

The need is generally realized here that polio is extremely dangerous and a tremendously costly affliction. One death occurred here last year from the dreaded disease which is no respecter of age or sex.

Miniature iron lungs have been placed in the most strategic spots available in the town business establishments and the dance revenue is expected to augment the fund considerably. Many clubs and organizations have authorized generous donations this year in an effort to wipe out the huge national deficit of several millions of dollars caused by epidemics of the disease.

Veterans Cite Accomplishments

THE PRESIDENT'S INAUGURAL ADDRESS

The inaugural address of American Presidents have fallen, historically speaking, into four general categories. licans, will constantly be urging leaders.

For the first 50 years, starting with the inauguration their members to be present when of George Washington, nearly every incoming Chief Executive attempted to reinforce the faith of the people in the form of government that emerged from the Revolution. Congress. This small majority ate. When the majority party has be.

By 1837, one historian recounts, President Van Buren will make it increasingly impor- only a slender margin of control, could proclaim this experiment in republican government a ent for Republicans to be present for important votes. Morse, Ore.). free world.

"Assessing realistically the needs and capacities of control of the legislative commit- of government for an interview proven friends of freedom," he said, "we shall strive to the rules of the House this year volving his district or some probhelp them to achieve their own security and well-being. Likewise, we shall count upon them to assume, within the limits of their resources, their full and just burden in the common defense of freedom."

The President pointed out that no free people can long cling to any privilege or enjoy any safety in economic solitude.

"Recognizing economic health as an indispensable basis of military strength and the free world's peace," he said, "we shall strive to foster everywhere, and to practice ourselves, policies that encourage productivity and profitable trade. For the impoverishment of any single people in the world means danger to the well-being of all other peoples."

This, it seemed to us, provided the clue to the internationalist nature of the Eisenhower Administration. Those portions of the address devoted to our role in the free world indicated that we will continue to co-operate with our allies not only toward the goal of mutual security but toward the economic strengthening of our allies through a policy based on "trade, not aid."

President Eisenhower's message was, on the whole, reassuring. It recognized the magnitude of his task and reflected a determination to grapple with it realistically. It was inspirational in tone and general in scope.

Specific proposals must come later, in messages to Congress. Only then will we be able to see clearly the particular paths to be followed in the "great crusade."

Gov. McKeldin Wants Enactment of cures or partial cures are possi-Road Program

structure.

I would like to make a weekly report to the people of the Sixth Congressional District with the hope of keeping them informed

of the activities and the progress of the 83rd Congress. Suggestions and views from the people of my district on Legislation will be helpful and are most welcome. Last week, the House received

first volume of the "President's Commission on the Health Needs of the Nation." In a joint session ed on socialist concepts, others of the Senate and the House, have a deep faith in private en-

can reach agreement, a mutual ter peace by developing friendly understanding of one another's relations among all peoples on problems and basic concepts of the basis of equality. And the life must take place." (How diffithird purpose relates to condicult to achieve this and what little effort to do so through long a direct part of the peace proages!) "Man has not learned to be perfect, so it is too much to ask at this stage to except a man-made organization to be bility of modern society, that is, it automatically comes to the the wretched combination of ills Action for Feace and the Armed under which so many millions of break the air-tight control of the Forces Talk, The UN—A Look at the Record, respectively — fine "guides" to UN to have in a public library.

With these sobering thoughts in mind we may proceed to note in what ways the Christmas spirin what ways the Christmas spirit as here in part defined has actively present throughout UN's history. This history, strictly considered, begins with the coming together in April 1945, in San Francisco, of the representatives of 50 nations of without distinctions "as to race, be a discussion on the continuarepresentatives of 50 nations of sex, language, or religion." Thus the UN is pledged by its Charter to a three-pronged program ter to a three-pronged program the world "to prepare a charter for a general international organization for the maintenance! of international peace and se-curity." (From the invitation isend. And there is a fourth purpose but this one on a different short supply in this country, there is need for early action. sued in March by the Government of the United States on behalf of itself and the other mem-Britain, the Soviet Union, and China, still carrying on the coperation achieved under the level. . . . from these three, instress of war.) It is important, government or state but that of however, to recall that this first an independent government or state but that of a centralizing

preceded by many preliminary steps of which the issuance of the invitation was agency thru which its member states can work together to invitation was the climax—steps "To be a center for harmonizing the Great Powers and their advisers involving the expenditure of much time and thought and

there are certain principles which think we have no right to questhink we have no right to question, that inspired the call to the history-making San Francisco Conference was to respect. Three of these apply especially the forming of an international to the UN: recognition of the organization to maintain "inter-sovereign equality of all its Memnational peace and security." And bers, large or small; ensurance it is also important to remember that even non-Member states obthat the call was issued and the serve these principles so far as Conference took place after the necessary for peace and security; only preceding attempt to prevent war through a League of Nations had completely broken down and when much of the world was suffering from the peace. The other four require of l and mental and spiritual each UN Member: fulfilling of II; that in the midst of such a of disputes by peaceful means seemingly hopeless situation men not only held on to their dream of world peace but made a fresh start to bring it. start to bring it to pass. Two operating with the UN in any months later, the Charter which action it takes under the Char-

established such an organization was completed and signed by the representatives present, and when it was partified in October 18 takes under the Charter which ter.

The purposes of United Nations and the principles of action worked out at Sec. it was ratified in October 1945, by the governments of "the Big Five" (including France along with those previously mentioned) and a majority of the other including for the collection of the other including for the other i and a majority of the other signatories, "the United Nations" officially began its existence.

The United Nations Charter represents the first the first that the first the first that the first the resents the final agreements of zen groups—these show a broadits founders as to the nature and functions of this new instrument for ridding the world of war and the threat of war, i. e., agreements as to (1) the kind of control of the structure or form that was to (1) the kind of control of the structure or form that was to (1) the kind of control of the structure or form that was to (1) the kind of control of the structure or form that was to (1) the kind of control of the structure or form that was the structure of the structure of the structure or form that was the structure or form that was the structure of the structure or form that was the structure of the structure or form that was the structure of the structure or form that was the structure of the structure or form the structure or form the structure or form that was the structure of the structure or form the struc ments as to (1) the kind of organization it is in respect to its aims, underlying principles, and actual structure, and (2) the kinds of activity it is kinds of activity it is expected or carry on. serious nature in three months. the wrong way by an unfeeling

prices have been going up and

will continue to climb as long

my guess is the latter. If so, when these friends of the big shots begin to sell, who will be the buyers? A stock market can tumble from present prices as fast as it can climb. After Hoover's election in 1928 the Industrial Averages went up 100 points within 10 months, but then fell back over 100 points in only one month! Will History Repeat Itself?

Stocks rallied again during the first part of 1930, but in April began an almost steady decline until, in 1932, they had fallen a total of 300 points from the 1929 peak! This means that the Industrial Averages, which were selling above 350 after Hoover had been in office six months, sold at only 50 the fourth year of his term.

This does not mean that such a decline can now happen again, primarily because very few stocks are held on margin today. Technically, the stock market is now in a sound position, but this is not the reason people are buying stocks today. The reason is that they believe that "Big Business" has at last taken back the control of our country. But if this is true (which I doubt) it is no reason to buy stocks for speculation. Hoover selected as his Secretary of the Treasury Andrew Mellon-one of America's richest and brainiest men. "Big Business" controlled the Hoover Administration.

The sad truth is that the

present period of prosperity has not been built upon honest work and savings. It has been built on borrowed money, much of which has been spent on useless war. In 1914, when World War I started, our national debt was less than \$2 billion. Today it is over \$250 billion.

If the Republicans will continue the Truman finance, they probably can keep the balloon inflated a few years more. If, however, they start to operate in an honest way—as did President Hoover and Mellon-by reducing the debt, discharging government employes and urging economy, stocks will surely have a bad fall.

Making Money In the

Stock market Successful brokers are, by nature, bullish. They must try to get you to buy stocks. I, however, suggest you ask your broker these two simple ques-

Farmers Can Now Quit Coddling Cobs

Farmers no longer need to coddle the cobs on which corn grows, thanks to a new advance in grain storage methods recently reported to the American Society of Agri-cultural Engineers.

The development is a grain dry-ing and storage unit that makes the corn picker-sheller a practical harvesting machine for corn growers, and cuts farm labor and storage costs. D. B. Poor, agricultural engineer for the Great Lakes Steel Corporation's Stran-Steel Division and A.S.A.E. Farm Structures Division chairman, reported to the Society that shelled corn of up to 25 per cent moisture content can be dried successfully with unheated air while stored in this unit.

"This means," he said, "that the time is now at hand when farmers

can eliminate much of the work and structural costs they now put into coddling the cobs on which corn grows.

The new unit was described as a 16-ft. wide Quonset equipped with a unique down-flow aeration system. Drying and cooling the grain are accomplished by means of a semi-pressure propeller fan which draws unheated air into the building, down through the grain, into a central tunnel over which the grain is piled, and then out of the

"This unit will handle grains other than corn equally well," Poor said. "It permits the small-grain grower to start combining earlier in the season, earlier in the day, and enables him to combine when moisture conditions are too high for placing grain in ordinary

How new equipment adds up to more profitable farming is demonstrated in these pictures showing (1) a corn picker-sheller at its twin jobs; (2) compact Quonset drying and storage unit that handles crop fresh from combine, gives any grower of small grains high-quality labor-free safekeeping for his crop, saves half storage space otherwise required for 'ear-corn; (3) an up-to-date grower knee-deep in his top-quality grain.

THE SAFE WAY

Before the discovery of the Xray in 1895, diagnosis of tuberculosis was largely a matter of chance. Too often the diagnosis was made after the disease was in an advanced stage and hope for recovery slim.

But today the X-ray has made possible the early discovery of tuberculosis. If there are signs of tuberculosis in the lungs, the chest X-ray will reveal them. If the lungs are clear and healthy, the chest X-ray will show that,

A chest X-ray is quick and painless. It takes but a few seconds. All you do is stand in front of the machine, take a deep breath, and it's all over. There is no discomfort or annoyance You don't even have to undress It can't do you any harm. The only possible harm lies in not having a chest X-ray.

It is those of us who do not have a chest X-ray once a year who are taking chances. By not having chest X-rays, many of us leave to chance the state of Real Value Of our own health, the health of our families, of our neighbors, of our Traffic Safety Group community.

Tuberculosis is an insidious dis- Being Realized ease which strikes without obvious outward symptoms. It is spread from person to person, by those who have the disease. As many as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has garden as 265,000 persons with actual that death has 265,000 persons tive tuberculosis can easily be McKeldin announced today. spreading TB in the U.S. today, according to the 1951-52 annual report of the National Tuberculosis Assn.

Many of these persons do not know that they have TB or that they are spreading it to it is easiest to cure.

mine whether TB is present.

All Aboard For Russia!

Authentic information now is coming out of the Soviet Union, from behind the Iron Curtain, giving striking evidence of the complete failure of Socialism's key promise—to provide a paradise for the wage earners. That was Karl Marx's rallying cry and it has been the bait dangled before the wage earners by all Socialists in America and abroad since Marx wrote his Communist Manifesto.

Socialism's rosy promise to the wage earners, ironically, has failed most miserably in Russia, the very country which holds itself up as the perfect example of 100 per cent government ownership of the tools of production and distribution. And it has had 35 years of trial and error in Russia, under the most rigid application of pure Socialism, to prove its

Documented Facts Anxious to get some concrete documentation on the failure of the Socialist economic system in Russia to raise the living standard of the wage earners, I wrote our State Department in Washington, requesting authentic facts from behind the Iron Curtain. They have supplied the facts, and the picture they paint of the workers' plight under government ownership of the production and distribution facilities ought to convince any American that Socialism is the worst possible way of life.

Before we look at the facts, let's examine the Russian economic system to be sure we understand that it is a Socialist system. Marx, the Socialist, founded Communism; he emphasized that a Socialist economic system would be necessary. Under it, the government would own and operate the fa-

PETITION FOR ADOPTION In the Matter of Mildred E. Willhide and Walter J. Willhide, her husband, for the adoption of a minor; on Petition No. 158 Equity Adoptions in the Circuit Court for Frederick County, Maryland The object of this Petition is

to procure the adoption by the Petitioners, Mildred E. Willhide and Walter J. Willhide, her husband, of a minor child, namely, Richard Eugene Warren, aged five (5) years.

The Petition states in substance that the Petitioners are man and wife and residents of Frederick County, Maryland; that the mi-nor child sought to be adopted has resided continuously with the Petitioner, Mildred E. Willhide, for the past four an one-half (4½) years; that the petitioners dearly love the said infant child and desire to accept the legal, as well as the moral, responsibility in connection with its mainte nance and support; that the Petitioners maintain an adequate home for said minor child; that the Petitioners and said child are in regular attendance at St. An-DR. D. L. BEEGLE thony's Catholic Church and intend to rear said minor child in accordance with the teachings and principles of said Church; that the Fetitioners are economically and morally able to afford said Maryland child a proper home; that the natural parents of this minor child are separated and there i pending in this Honorable Court a divorce proceedings between them; that the natural father of said child, Raymond C. Warren is a resident of Frederick County, Maryland, being presently on military duty in the State of Texas with the armed forces of the United States, and that said natural father has consented in writing to this adoption; that the natural mother, Mary Ellen War ren, is presently residing in the American Occupation Zone of Germany; that it would be to the best interest of said minor child to be the adopted child of the Petitioners, and that the mi-nor child's name be changed from Richard Eugene Warren to Wal-ter Richard Willhide, and for general relief and process.

It is thereupon this 2nd day of January, 1953, by the Circuit Court for Frederick County, sitting as a Court of Equity, OR-DERED that the Petitioners give notice to the said non-resident mother of Richard Eugene Waren, the minor child sought to be adopted, of the object and sub-stance of this Petition by causng a copy of the same to be ublished in some newspaper pub-ished in Frederick County once week for four successive weeks rior to the 7th day of February 953, commanding her to be an ppear in this Court, in person of y solicitor, on or before the 23rd ay of February, 1953, and show ause, if any she has, why a decree should not be passed as prayed.

THOMAS S. GLASS,
Solicitor for Petitioners
ELLIS C. WACHTER

cilities of production and dispribution. Later, he thought, the state would "wither away," and there would be no government, only "social control." So for 35 years Russia has been a Socialist state. It calls itself the Union of Soviet Socialist Republics. Its economic system is like the Socialist system of England; only it is more advanced.

The Toilers

In 35 years under government ownership, here's what our State Department reports: "Soviet workers have to put up with whatever labor conditions their one and only employer (the state) dictates. Wages are fixed. So are prices and working hours. Labor discipline is strict and any breach of its numberless provisions is severely punished. All jobs are frozen. Leaving the place of employment without the express permission of the management is punishable by imprisonment for from two to four months; or, in defense is-dustries, up to eight years." Of course there are no labor

unions, and no right' to strike. Since 1938 every worker has been required to have a "labor book" with detailed data on his employment history. "This internal passport," the State Department reports, "enables the boss to control the worker effectively at all times. To sum up: Labor is defenseless against the monopolistic employer-the omnipotent state. It is hedged in by punitive legislation. It is under constant pressure to increase output." The Payoff

of freedom, been compensated lence Sanders, N. Seton Ave.

by a better economic life, a | Soldier Promoted higher standard of living? The answer is a big NO! There has been no improvement in the living standard since the Socialist government took over all private property 35 years ago. Today the Russian factory worker must work nearly an hour to earn enough to buy one pound of potatoes. Under privately owned, competitive enterprise, the American factory worker does it in two minutes. All food items present similar comparisons. Housing is another example. As many as three families live in three and four-room houses or apartments in a poverty-stricken atmosphere. The clothes of the average Russian worker are pitifully poor.

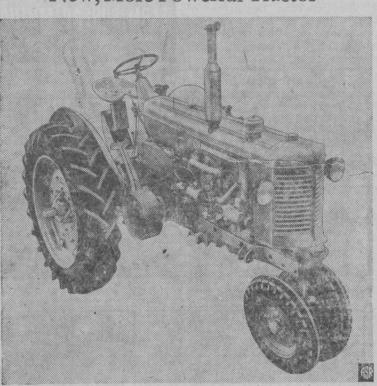

Instead of the state gradually withering away, as Marx promised, it gets more powerful and brutal. A powerful bureaucratic class has grown up. In it are selected members of the Communist Party which numbers only six million members. These rulers live richly. The other 194 million Russians are economic slaves. This is full Socialism in practice-government ownership. The facts should alert all Americans, especially wage earners to resist further government encroachment into the realm of production and distribution. That is the road of economic slavery.

Mr. and Mrs. George Ashbaugh, N. Seton Ave., have received word that their son, George who is in the Army, arrived on January 5, and expected to be shipped to Korea immediately.
Marianne and Allen Sanders, The \$64 question is: Has the Washington, D. C., spent the sweat and toil of the Soviet past weekend here visiting with worker, not to mention his loss I their parents, Mr. and Mrs. Clar-

A TIMELY REMINDER—

New, More Powerful Tractor

Increased power, greater economy, and more comfort are the three basic engineering achievements of the new Model UB tractor, recently introduced by Minneapolis-Moline Co.

MINNEAPOLIS, MINN.—A new tractor developing 50 horsepower on gasoline and 53 horsepower on LP gas, based on sea level conditions, is powered to handle three-bottom and four-bottom plows. Called the Model UB, it also features a 12-volt ignition system. The new 12-volt battery is situated below but to one side of the fuel tank so that the battery can be readily serviced without being moved. Split-beam headlights concentrate the light over a wider area just in front and over the

immediate working area.

The UB is designed so that the operator can enjoy new comforts whether he prefers to stand or be seated while he works. The platform is 27 inches wide and raised to the level of the transmission case cover. The steering wheel is centered for better vision on both sides of the tractor. On it is mounted the speed-control lever. As a safety feature, the speed-control lever is moved forward to increase the speed of the

the speed-control lever is moved forward to increase the speed of the engine, and backward to reduce the speed. A streamlined steering enclosure houses the instruments and various gauges.

Brake pedals, one for each wheel, are placed side by side on the right hand side of the tractor, and the double disc brakes are located on the differential countershaft. The clutch pedal, a spring loaded, foot-operated clutch, is located on the left-hand side.

With the raised platform, the lifting roll is located underneath, out of the operator's way. The power take-off guard is attached to the housing of the shaft and is standard in design so that any machine driven by power take-off may be quickly attached.

Other features of the MM Model UB are a new and large fuel filter, new type of valve inserts to improve valve life, heavy-duty roller drawbar with a maximum swing of 22 inches, large capacity tool box, and a muffler cap for the exhaust

Gamma globulin possible, as your address must will prevent paralytic polio but only for a temporary period of five weeks. Future tests will tell us if this serum can be useful in the development of a permanent vaccine.

"It is the vaccine which we seek," Mr. Radcliffe said, "and the March of Dimes will continue to work toward the day when infantile paralysis will be totally defeated and our children freed from its menace forever."

Local Man

Held In Gettysburg

William A. Shorb Jr., 25, of Emmitsburg Rt. 2, arrested by Gettysburg borough police early last Sunday morning on a charge of breaking into the used car lot office of Carroll M. Zentz, Carlisle St., and with stealing an automobile from the lot, was held for the Adams County Court by Justice of the Feace Robert Snyder following a hearing Monday night on burglary and larceny charges.

Shorb was arrested on top of a coal pile at the Ice and Storage plant, Gettysburg, following a chase by police, who found him sitting in the stolen car at the rear of the Winebrenner Apts. garages.

Police were investigating the report that a car had been stolen at the parking lot, and another report that there were trespassers in one of the garages when they found Shorb, they said.

Checking the garages, they found Helen Carey, 26, Gettysburg Rt. 1, and Richard Kelly, 20. Pittsburgh, Pa., listed as a Mount Saint Mary's student, in one of the garages, they said. They were charged Monday

night before Justice Snyder with disorderly conduct and released on payment of fines of \$5 and costs each. Shorb was remanded to jail.

The old Norse ships had steering oars only on the right side near the stern and the term "starboard" (steerside) is believed to EMMITSBURG have derived from that fact.

not divulged-for various rea- Gettysburg, Pa. sons. According to chart data most of the changes concerning Emmtsbuirg will occur within the next four years.

Don't forget the March of Dimes dance Friday night, Jan. 30, folks. The money, as you already know, is sorely needed to help wipe out the national treasury's polio deficit. The nation and Emmitsburg itself, were hard hit by the disease last year and we have a long way to go and many thousands of dollars to raise, but it must be done. So come on out, enjoy yourself and at the same time help others in the fight for their lives. See you there!

Dr. and Mrs. Robert Hampson of Baltimore, visited Mr. and the Thurmont and Emmitsburg Mrs. George Eyster Wednesday.
