BY ABIGAIL

Wouldn't you know it? Sevveral columns ago I came up with the bright idea of having shoes manufactured after the pattern of a glove; have separate compartments for toes just as a glove does for fingers. In the mail this week comes a clipping of an advertisement in what I believe is a New York or Brooklyn paper, advising that such shoes are available on the market under the brand name of T. O. Dey. These people go me one better. They describe their shoes as "Glove Mould" Space Shoes. They are hand-moulded on scientificallyprepared casts of your own actual feet and give perfect threedimensional fit and balance. We aren't an advertising agency or retailer for the company, but in the interest of serving footweary readers, if you're interested we'll tell you how to get a free booklet advising you how you can obtain them, or learn more about them. It's funny how you get an inspiration, thinking that you have an original idea, and all along it's usually as old as the hills! Thanks for the clipping dear

terested in voting in the coming presidential election, Saturday morning is the last chance to register at the Courthouse in Frederick, that is if you already haven't registered. The candidates are just beginning to generate steam and pretty soon things will be boiling all around us. Verbal barrages are unleashed every day now as the going gets rougher and counter charge follows counter charge. Promise after promise is made by both sides. The one I like best though is that one proposed by Vice President Nix. You know the one that says we can have a four-dov work week due to the fact that electronics will do the work for us and all we have to do is to draw our pay and enjoy the extra leisure time. Many of you perhaps can recall the short weeks you had during the early 30s also? The Demos don't have all the answers either. In fact what party, the world over, does? Just sit back and listen to both sides, that is the only way in which you can reach a half-intellision. Weigh the testimony and vote for the man or party of your choice.

For those of you who are in-

Frederick County will receive a total of \$159,389 from the Federal Government for the construction of new roadway it has been announced. The figure seems quite huge at first but if you know anything about the cost of road construction you will readily see that this sum will not build a single mile of highway. Estimates for modern road building are that it takes approximately a quarter of a million dollars (\$250,000) to build a mile of road. This road building situation is really getting out of hand as also is the tion for Civil Defense. cost of sewerage. I personally feel that an investigation by the state into the method contractors employ to get conracts and how they arrive at cost figures should be made. Imagine, to install complete sewerage facilities in a town the size of Emmitsburg, it costs better than a half million dollars, which is just about half the value of the assessable property in the town! Somebody's way off first base somewhere along the line. Can you imagine how long it would take to erase a bondage of this magnitude? My best guess is about 40 years! Thank the Lord we have better than half of it already paid for. But I still say "there's something rotten in Denmark," as the saying goes, and some one is taking advantage of someone.

You homemakers and farmers who are proud of your skill and accomplishments will be given an opportunity next week to show them to the public when the big Community Show will be held. And, you might be paid for your trouble, if you're lucky enough to win a prize. Over \$200 will be awarded the lucky exhibitors. So if you are interested in this sort of thing be sure to enter your exhibits in the show. And to the public: Don't miss this opportunity to take advantage of a good evening's entertainment and see best there is in canned goods, farm products, cooking and needlecraft.

# Annexation Plans Are

Emmitsburg's plan for the annexation of S. Seton Ave. Ext., took a step nearer completion Monday night when the majority of residents of that area petitioned the Corporation of Emmitsburg to annex the area. The move was disclosed at the regular meeting of the Burgess and Commissioners held Monday night in the Fire Hall, Chairman of the Board of Commissioners, Charles R.

Reports of the tax collector, clerk and secretary were presented by Town Clerk Louise Sebold and all were accepted as reported. Parking meter revenue for Sepember was reported as \$280.19. Overtime parking fines netted \$41

Commissioner Rightnour presented architectural plans for the new town office and the Council is currently studying them.

and traffic fines \$23.45.

A communication was received from St. Joseph Central House to the new Mother Seton School will be turned over to the Town as its private property just as soon as feasible. The line is costing an estimated \$12,000 and the steward of Francis X. Elder Post, Town will pay approximately

For some time now a movement become annexed as a part of the Corporation of Emmitsburg. A petition, bearing the signatures of nent assignment here, has made a host of friends in the short Catholic Church, Washington, D. and devoted member of the Post that area, was presented to the Council Monday evening. However, before any annexation takes place mitsburg, being untiring in her 11 mandatory steps must be taklegal requirements dictate that en by Council. Many of these steps have been taken already, and it is believed that in about six weeks the annextion will occur. Council has agreed to permit the property owners of the section to tap into the new sewer line, just as soon as it is turned over officially to the Town by St. "BE IT THEREFORE RE- Joseph's Central House. # Here Today!

came the magic that made possible so wonderfully different a Ford. In the toughest on-theroad tests ever given to a car, this "Inner Ford" demonstrated that a '57 Ford rides you sweet and low . . . that it takes the bumps without a bobble, the curves without the pitch . . . and, that in power, it "takes nothing from nobody!" Nothing on wheels hurries, handles or holds

# A new kind of FORD with the mark of tomorrow

You're in for a thrill when you see this new knockout named Ford! But save your superlatives till you drive it! That's where the fun really starts.

It's fun just knowing that others who see you wish they were you. For you're commanding the longest, lowest, heaviest, biggest car ever to sport such a low price tag. There's head room to spare for a new fall bonnet . . . stretch-out space for a "Daddy Longlegs."

You'll find that the tough and ready new "Inner Ford" is built to take the roughest road you'll care to travel. New outboard rear springs and ball-joint front suspension let Ford take the turns without the tilt. New swept-back control arms help take bounce out of bumps.

Best of all, Fords library-like quiet is built in. And the new "Inner Ford" is why. For never be-

fore in Ford's field has there been a body with so much extra bracing so firmly anchored to its foundation. And you can choose from three big Silver Anniversary V-8's with up to 245 horsepower. There's also a new Mileage Maker Six with 144 horsepower, the most modern Six in the industry.

You can pick your Ford tailored to your desires and your budget, too! Choose from nine Fairlane or Fairlane 500 models or from five Custom or Custom 300 models. Or take your pick from Ford's five longer, lower, new station wagons. Whichever model you select, you'll get a car that's been re-invented from the wheels up!

So there's the new kind of Ford. Big! Gracious! Spacious! A luxury car true-but one that any newcar buyer can easily afford. Come in! See what wonder-cars you can buy now at low Ford prices.

The Fairlane Fords for '57, like the Fairlane 500 models, have no equal... no counterpart, in the low-price field.

"ADJUSTO-EASE" Iron railings that FIT ANYWHERE!

Growth Of Population Versus Growth Of Land

The population of the United States is constantly increasing. Prices, salaries, and wages are also constantly rising. How-

ever, the amount of waterfront will be no greater 100, or even 1,000 years hence than exists today. Stocks and bonds can be manufactured indefinitely by stocks dividends, stock splits, spin-offs, and other printingpress methods; but it is impossible to increase waterfront property except by dredging.

The above statement applies not only to ocean frontage, but also to river and lake frontage. It also applies to close-by interior property with a direct, short right-of-way to the water. This, however, should be carefully protected by proper deeds and restrictions.

When And Where To Buy
Although the "field furthest
away looks greenest," such wat-

erfront land in the community in which you live, or on land nearby, is usually the safest. You know the "outs" about such property, which you do not know about other property. Although all such land, including well-located house lots, may be attractive, you will profit most by buying land by the acre before it is sold by the

might advise buying ocean frontage at high tide from the natives, and selling it at low tide to the summer visitors; but I guess this rule is now outdated! Waterfront property in northern and central states can, however, usually be purchased for less during a winter snowstorm than on a beautiful day day in summer! Special bargains can often be secured just before subdivisions, shopping centers, and other real estate developments are to be started. Beware Of Land That

the character of the buildings nearby, and the trees, shrubbery, etc. It may even be wise to spend a day studying files of the local newspapers covering

only above and beyond the possibility of destructive floods, yet the national and state governments are constantly working on flood control. Hence, it is reasonable to believe that flooding will be less rather than more in future years. This, however, does not apply to ocean frontage. No means have yet been discovered to eliminate ocean storms and hurricanes, but certain non-erosion work now being carried on by the Norton L. Holmes Co. of Lake Wales, Fla. is worthy of careful attention.

sold should add a penny to the value of waterfront property whether ocean, lake, or river. Outboard motors and aluminum boats have been greatly improved during the past ten years. According to my friend William L. Less of 52 Wall St., New York, great improvements in these outboard motors are on the drawing boards. He will give you amazing statistics re-lating to this subject. It is ru-

the average-size boat. In contrast to the above, every new automobile sold may detract a penny from the value of interior land. Autos are getting so thick and accidents increasing so that people may some day refrain from using them for recreation-especially if they are advised to remain home Sundays and holidays

trolled. Going back to my reference to stocks in the first paragraph of this column, I should add that, in most states, you have no taxes to pay on non-incomepaying stocks, while you hold must pay taxes them, but you on vacant land wherever it is located. This means that today, when stock prices are high, it may be well to switch from stocks to non-taxable bonds. Then reverse your investment program later and switch the non-taxable bonds into stock and vacant land when these are

### Mahoney Would Seek Medical Research Funds

George P. Mahoney's announce ment that he will work for more Federal aid for humanitarian projects contrasts sharply with the voting record of his opponent, the Republican candidate, Sentor But-

Mr. Mahoney stated last week he favors a "substantial" increase in Federal appropriations for medical research programs and fa- have Alternative Compensa-

He said he feels such appropriations are not simply expenditures but "investments with a high return."

He pointed out that the life expectancy of the average man increased by 51/2 years during the 1943-1953 period—and that a good portion of that "priceless gain" can be attributed to medical re-

search. "In fiscal 1957," Mr. Mahoney said, "the Federal government will spend about \$102 million for research in heart disease, cancer, mental health, arthritis and re-lated diseases, neurological di-local Nationwide Insurance Agent

"That sounds like a lot of money," he added, "but actually it is less than what the people of this country will spend next year on chewing oum."

Insted below.

If you now have Medical Payments, deduct that cost from the cost of Alternative Compensation and you will have the additional cost of this coverage that will cost of this coverage that will appropriate the cost of the coverage of the cost of the coverage that will appropriate the cost of the c seases, and blindness. chewing gum.

ality" and that it contrasts very strongly with penny-pinching in this field for the three previous years. He said the sum allocated, although liberal by Republican standards, is some 26 per cent less than the sum recommended for research by professional advisory councils to the Public Health Service.

On the other hand here is how Senator Butler voted on medical research and health services during his years in the U.S. Senate. On June 13, 1951, he voted for S. Seton Ave., Emmitsburg, Md. Motters, Maryland a \$3 million cut in Maternal and

**New Social Security** Changes Are Explained

By WILLIAM T. GILLESPIE In the first article of this series Health

Service stations throughout the ountry blossom with signs these days urgently reminding us to security for the first time as of bring the family car in for a fall check-up. If motors need special preparation to face the coming winter, what about people? Aren't we as much affected by changes lawyers, dentists, chiropractors, in weather and "driving condi-

tions" as our cars? The man who takes good care of his car knows that there's surance protection for themselves more to getting ready for winter and their families on the same than putting in anti-freeze. His basis as self-employed persons stem to stern. The woman who is estimated that about 200,000 knows there's more to getting by this change in the social sethem ready for winter than get- curity law. ting winter coats out of moth-

For generations the people of the United States have been told that vast stretches of rocks and rills, caves, caverns and desert solitures belong to them. You often hear people say, in referring to this grand public domain, "This is OUR land." Well, they are using their land. Lewis Nordyke, who just completed a survey for Sports Afield magazine, reports that in the last full year of record (1954) nearly 48 million Americans-close to one in every three of us-crowded into national parks and monuments. Another 40 million ventured into national forests.

Unfortunately, the national itors a year; the forests have almost no facilities. The tremendous use of these lands brings into very sharp focus a chronic old problem: too little help. Administrative staffs for the public lands are vastly undermanned.

it makes this an appropriate time of Commerce to study and act on gardless of his allotment and not to take stock. The National Park this problem. Service is making plans for its The export of surplus farm plants one-tenth acre or more golden anniversary, which comes of the Park Service that a program for conserving public lands, in history. ## Wheat Quota Will Be Penalized

Wheat farmers who exceed their 1957 wheat allotment by as little as one - tenth of an acre will be subject to a penalty, reports Chester S. Bradley, chairman of the Maryland Agricultural Stabilization and Conservation Committee.

In the past, a farmer's allotment was calculated in whole acres. For example, Mr. Bradley

Now, the chairman says, if this farmer's allotment is 25 acres and measures 25.8, he must desome of the moth ball fleet was stroy the extra eight-tenths of an acre or be penalized.

The new change also applies to the 15-acre provision. The propenalized. However, if he

Through Sept. 21, 572 Maryland wheat farmers had signed tended to Oct. 5.

#### Song Brings Recognition

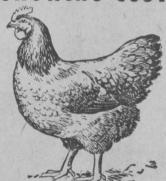

Original words and music in her "Song of the Homemakers," won third place in a national song contest for Mrs. Dorothy K. Lassetter, Frederick. Announce ment was made in San Antonio, Tex., last week at the 20th annual meeting of the National Home Demonstration Council, sponsors of the state-wide contest.

Maryland's song writer says she wrote the words first, and then later played the piano until she got a tune to go with the words. She plays the piano by

"That won't be necessary now!"

### WASHINGTON AND "SMALL By C. WILSON HARDER

During every political season, there is a lot of catch phrasing thrown about. Thus, there is talk about the reactionary wing of one party, the moderate wing, the liberal wing, and so on.

\* \* \* \*
Perhaps it is a good time to examine what is meant by these phrases in contemporary political jargon. It very much appears that anyone who believes in being liberal with other peoples money automatically becomes a liberal in the socio- C. W. Harder political sense. On the reverse

side of the coin, anybody who reacts against this trend is tagged a reactionary.

\* \* \* \*

A case in point is Sen. Wm.
Jenner, (R., Ind.), who has perhaps never been called a liberal; often termed a reactionary. Yet the recently published address by Sen. Jenner entitled

"Re-examination of Our Farm Policies" could rank with some of the writings of Thomas Jefferson as pure exposition of the true liberal thought.

\* \* \*
Condemning American farm
policies that have existed over the past 25 years, Sen. Jenner says, "The Purpose of the American farm policy is not to get so-called parity for farmers with some mythical competing class. That is the Marxian class conflict. Our purpose is to save the American family farm. The family farm is the social basis for our free enterprise, our political liberty, our biological heritage, and our military strength. It should not be the purpose of Congress to help corporation farming. It should not be our purpose to help the city owner who buys farmland to help him

avoid taxes. Nearly all the so-called remedies for farmers ben-

efit the owner of capital invested in land, and penalize the farmerproducer.'

The Senator points out that farmers, along with their customers, are saddled with heavy taxes for foreign aid making it possible for super controls to manipulate American agriculture to make it fit into a plan of worldwide boondoggling.

"We hear," he said, "the Secretary of Agricuture complain about the surplus of cotton in the U. S. What is done about it? It has been made possible, through U.S. money for Mexico to double its cotton production, India increase its production by 50%, Egypt to add 2,000,000 acres. All this cotton growing is being encouraged by the State Dept. when production has already increased by more than 5,000,000 bales, all of which competes with U. S. cotton. As a result, U. S. cotton exports dropped near 40% in 3 years, while exports by other cotton growing countries rose 46%."

\* \* \*

He goes on to point out that agricultural production over the world is being encouraged with gifts of seed, fertilizers and farm machinery for which the taxpaying American farmer must pay a part.

\* \* \*

He then says, "Our government is like Penelope of Greek Legend. Penelope knit by day, unraveled by night. What little is knit by our agricultural officials is quickly unraveled in the stealth of the night through the State Department."

So, during this election season it is important to keep a level keel as charges of "reactionary" and "liberal" fly through the air. There is a wide gulf be-tween the true liberal and many so-called liberals on the political scene today. Too often the term liberal only denotes a politician eager to be liberal with other people's money.

LOOKING SHEAD U 71

The Worker In Russia

From the time of its origin more than 100 years ago the Communist Party has called itself the workers party and has constantly claimed that its fundamental purpose was to benefit the "working class." This has been only one of the great falsehoods of Communism. Communisn was -conceived and nurtured by intellectuals, and since coming to power it has been operated by a dictatorship of the elite, with the workers becoming its slaves. Socialism likewise has direct-

ed its appeal to the "working promising to take over class.' and divide up all the wealth into equal shares for all citizens. But Socialism has succeeded only in distributing equal shares of poverty and slavery among the citizens entangled in its web, while its bureaucracy of intellectuals pulled the strings. History records innumerable incidents in which demagoguesalways appealing to the "down trodden,' the "working class," and "have nots"-have gained a following, have achieved power, and then have trampled over the very people they championed so eloquently. The Spell Continues

Human nature doesn't change. People the world over still are vulnerable to demagoguery. Most of the "free" nations of the world are today ruled by socialistic governments created by "workers parties." Not one of them has a workers living standard more than one third as high as we have in America. The more Socialism a nation has, the more restricted is the workers freedom and the deeper his poverty. With this fact in mind, the recent testimony of Nikolai Khokhlov before the House Un-American Activities Committee ought to be carefully read by every worker, every citizen, throughout the free world.

"At every step the ordinary man in the Soviet Union is treated as a slave," said Khokhlov, the former officer of the Russian secret police whom our

Congressmen describe as one of the' most valuable witnesses ever to testify on the Communist conspiracy. His testimony

continued: Communist Slavery

"Let me give you an example: You are a worker in a plant, you don't like your job, but you cannot quit. If you try to leave, the director - or I should say the boss assigned by the party, can always stop you -even arrest you-because you do not have the legal right to leave your job. Or, if you come 20 minutes late on your job, automatically you get a 25 per cent cut in your salary for six months. This is a part of the labor discipline decree published in 1940 and still maintained in

"If you came 20 minutes late a second time, you should be brought to trial, carrying a penalty up to one year in jail. This usually doesn't happen because the director of the plant or factory is interested in keeping you on the job, and, therefore, he just overlooks it. But he continues to take the 25 per cent of your salary for another six months.

Permit To Travel "I would like to stress another point . . . All citizens in the Societ Union have to have a passport. In other words, an identification booklet, which you may need at any time. If you cross the main street anywhere not permitted by traffic law, the first thing the police will ask for is your passport. In this booklet besides your personal identifications, your civic status, relation to military service (there also must be recorded) all your move-

ments throughout the country. "You cannot even move from one house to another without an entry being made in the book, and you cannot stay in a town other than your own longer than 24 hours without getting your book stamped." Khokhlov went on to describe the miserable living conditions of the Russians, particlarly the workers families. But Communist officialdom, he said lived very well. "I would like to stress again," he said, "that the conflict between the Soviet
